§ 123. Contrary to this busy inquisitive temper, there is sometimes observable in children a listless carelessness, a want of regard to any thing, and a sort of trifling, even at their business. This sauntering humour I look on as one of the worst qualities can appear in a child, as well as one of the hardest to be cured, where it is natural. But, it being liable to be mistaken in some cases, care must be taken to make a right judgment concerning that trifling at their books or business, which may sometimes be complained of in a child. Upon the first suspicion a father has, that his son is of a sauntering temper, he must carefully observe him, whether he be listless and indifferent in all his actions, or whether in some things alone he be slow and sluggish, but in others vigorous and eager: for though he find that he does loiter at his book, and let a good deal of the time he spends in his chamber or study run idly away, he must not presently conclude, that this is from a sauntering humour in his temper; it may be childishness, and a preferring something to his study, which his thoughts run on; and he dislikes his book, as is natural, because it is forced upon him as a task. To know this perfectly, you must watch him at play, when he is out of his place and time of study, following his own inclinations; and see there, whether he be stirring and active; whether he designs any thing, and with labour and eagerness pursues it, till he has accomplished what he aimed at; or whether he lazily and listlessly dreams away his time. If this sloth be only when he is about his book, I think it may be easily cured; if it be in his temper, it will require a little more pains and attention to remedy it.

§ 124. If you are satisfied, by his earnestness at play, or any thing else he sets his mind on, in the intervals between his hours of business, that he is not of himself inclined to laziness, but that only want of relish of his book makes him negligent and sluggish in his application to it; the first step is to try, by talking to him kindly of the folly and inconvenience of it, whereby he loses a good part of his time, which he might have for his diversion; but be sure to talk calmly and kindly, and not much at first, but only these plain reasons in short. If this prevails, you have gained the point in the most desirable way, which is that of reason and kindness. If this softer application prevails not, try to shame him out of it, by laughing at him for it, asking every day, when he comes to table, if there be no strangers there, “how long he was that day about his business?” And if he has not done it, in the time he might be well supposed to have dispatched it, expose and turn him into ridicule for it; but mix no chiding, only put on a pretty cold brow towards him, and keep it till he reform; and let his mother, tutor, and all about him, do so too. If this work not the effect you desire, then tell him, “he shall be no longer troubled with a tutor to take care of his education: you will not be at the charge to have him spend his time idly with him: but since he prefers this or that [whatever play he delights in] to his book, that only he shall do;” and so in earnest set him to work on his beloved play, and keep him steadily, and in earnest to it, morning and afternoon, till he be fully surfeited, and would at any rate change it for some hours at his book again: but when you thus set him his task of play, you must be sure to look after him yourself, or set somebody else to do it, that may constantly see him employed in it, and that he be not permitted to be idle at that too. I say, yourself look after him; for it is worth the father’s while, whatever business he has, to bestow two or three days upon his son, to cure so great a mischief as his sauntering at his business.

§ 125. This is what I propose, if it be idleness, not from his general temper, but a peculiar or acquired aversion to learning, which you must be careful to examine and distinguish. But, though you have your eyes upon him, to watch what he does with the time which he has at his own disposal, yet you must not let him perceive that you, or any body else do so; for that may hinder him from following his own inclination, which he being full of, and not daring, for fear of you, to prosecute what his head and heart are set upon, he may neglect all other things, which then he relishes not, and so may seem to be idle and listless: when, in truth, it is nothing but being

intent on that, which the fear of your eye or knowledge keeps him from executing. To be clear in this point, the observation must be made when you are out of the way, and he not so much as under the restraint of a suspicion that any body has an eye upon him. In those seasons of perfect freedom, let somebody, you can trust, mark how he spends his time, whether he inactively loiters it away, when, without any check, he is left to his own inclination. Thus, by his employing of such times of liberty, you will easily discern whether it be listlessness in his temper, or aversion to his book, that makes him saunter away his time of study.

§ 126. If some defect in his constitution has cast a damp on his mind, and he be naturally listless and dreaming, this unpromising disposition is none of the easiest to be dealt with; because generally carrying with it an unconcernedness for the future, it wants the two great springs of action, foresight and desire; which, how to plant and increase, where nature has given a cold and contrary temper, will be the question. As soon as you are satisfied that this is the case, you must carefully inquire whether there be nothing he delights in; inform yourself, what it is he is most pleased with; and if you can find any particular tendency his mind hath, increase it all you can, and make use of that to set him on work, and to excite his industry. If he loves praise, or play, or fine clothes, &c. or, on the other side, dreads pain, disgrace, or your displeasure, &c. whatever it be that he loves most, except it be sloth, (for that will never set him on work) let that be made use of to quicken him, and make him bestir himself; for in this listless temper you are not to fear an excess of appetite (as in all other cases) by cherishing it. It is that which you want, and therefore must labour to raise and increase; for, where there is no desire, there will be no industry.

§ 127. If you have not hold enough upon him this way, to stir up vigour and activity in him, you must employ him in some constant bodily labour, whereby he may get an habit of doing something: the keeping him hard to some study, were the better way to get him an habit of exercising and applying his mind. But, because this is an invisible attention, and nobody can tell when he is, or is not idle at it, you must find bodily employments for him, which he must be constantly busied in, and kept to; and, if they have some little hardship and shame in them, it may not be the worse, that they may the sooner weary him, and make him desire to return to his book: but be sure, when you exchange his book for his other labour, set him such a task, to be done in such a time, as may allow him no opportunity to be

idle. Only, after you have by this way brought him to be attentive and industrious at his book, you may, upon his dispatching his study within the time set him, give him, as a reward, some respite from his other labour; which you may diminish, as you find him grow more and more steady in his application; and, at last, wholly take off, when his sauntering at his book is cured.

Compulsion. § 128. We formerly observed, that variety and freedom was that which delighted children, and recommended their plays to them; and that therefore their book, or any thing we would have them learn, should not be enjoined them as business. This their parents, tutors, and teachers, are apt to forget; and their impatience to have them busied in what is fit for them to do, suffers them not to deceive them into it: but, by the repeated injunctions they meet with, children quickly distinguish between what is required of them, and what not. When this mistake has once made his book uneasy to him, the cure is to be applied at the other end. And since it will be then too late to endeavour to make it a play to him, you must take the contrary course: observe what play he is most delighted with; enjoin that, and make him play so many hours every day, not as a punishment for playing, but as if it were the business required of him. This, if I mistake not, will, in a few days, make him so weary of his most beloved sport, that he will prefer his book, or any thing, to it, especially if it may redeem him from any part of the task of play is set him; and he may be suffered to employ some part of the time destined to his task of play in his book, or such other exercise as is really useful to him. This I at least think a better cure than that forbidding (which usually increases the desire) or any other punishment should be made use of to remedy it; for, when you have once glutted his appetite, (which may safely be done in all things but eating and drinking,) and made him surfeit of what you would have him avoid, you have put into him a principle of aversion, and you need not so much fear afterwards his longing for the same thing again.

§ 129. This, I think, is sufficiently evident, that children generally hate to be idle: all the care then is, that their busy humour should be constantly employed in something of use to them; which if you will attain, you must make what you would have them do, a recreation to them, and not a business. The way to do this, so that they may not perceive you have any hand in it, is this proposed here, viz. to make them weary of that which you would not have them do, by enjoining and making them, under some

pretence or other, do it till they are surfeited. For example; Does your son play at top and scourge too much? Enjoin him to play so many hours every day, and look that he do it; and you shall see he will quickly be sick of it, and willing to leave it. By this means, making the recreations you dislike, a business to him, he will of himself, with delight, betake himself to those things you would have him do, especially if they be proposed as rewards for having performed his task in that play which is commanded him. For, if he be ordered every day to whip his top, so long as to make him sufficiently weary, do you not think he will apply himself with eagerness to his book, and wish for it, if you promise it him as a reward of having whipped his top lustily, quite out all the time that is set him? Children, in the things they do, if they comport with their age, find little difference, so they may be doing: the esteem they have for one thing above another, they borrow from others; so that what those about them make to be a reward to them, will really be so. By this art, it is in their governor's choice, whether scotch-hoppers shall reward their dancing, or dancing their scotch-hoppers; whether peg-top, or reading, playing at trap, or studying the globes, shall be more acceptable and pleasing to them; all that they desire being to be busy, and busy, as they imagine, in things of their own choice, and which they receive as favours from their parents, or others for whom they have a respect, and with whom they would be in credit. A set of children thus ordered, and kept from the ill example of others, would, all of them, I suppose, with as much earnestness and delight, learn to read, write, and what else one would have them, as others do their ordinary plays; and the eldest being thus entered, and this made the fashion of the place, it would be as impossible to hinder them from learning the one, as it is ordinarily to keep them from the other.

§ 130. Play-things, Play-games. I think, children should have, and of divers sorts; but still to be in the custody of their tutors, or somebody else, whereof the child should have in his power but one at once, and should not be suffered to have another, but when he restored that: this teaches them, betimes, to be careful of not losing or spoiling the things they have; whereas plenty and variety, in their own keeping, makes them wanton and careless, and teaches them from the beginning to be squanderers and wasters. These, I confess, are little things, and such as will seem beneath the care of a governor; but nothing that may form children's minds is to be overlooked and neglected; and whatsoever introduces habits, and settles customs in

them, deserves the care and attention of their governors, and is not a small thing in its consequences.

One thing more about children's play-things may be worth their parent's care: though it be agreed they should have of several sorts, yet, I think, they should have none bought for them. This will hinder that great variety they are often overcharged with, which serves only to teach the mind to wander after change and superfluity, to be unquiet, and perpetually stretching itself after something more still, though it knows not what, and never to be satisfied with what it hath. The court that is made to people of condition in such kind of presents to their children, does the little ones great harm; by it they are taught pride, vanity, and covetousness, almost before they can speak; and I have known a young child so distracted with the number and variety of his play-games, that he tired his maid every day to look them over; and was so accustomed to abundance, that he never thought he had enough, but was always asking, What more? What more? What new thing shall I have? A good introduction to moderate desires, and the ready way to make a contented happy man!

How then shall they have the play-games you allow them, if none must be bought for them? I answer, they should make them themselves, or at least endeavour it, and set themselves about it; till then they should have none, and till then, they will want none of any great artifice. A smooth pebble, a piece of paper, the mother's bunch of keys, or any thing they cannot hurt themselves with, serves as much to divert little children, as those more chargeable and curious toys from the shops, which are presently put out of order and broken. Children are never dull or out of humour for want of such play-things, unless they have been used to them: when they are little, whatever occurs serves the turn; and as they grow bigger, if they are not stored by the expensive folly of others, they will make them themselves. Indeed, when they once begin to set themselves to work about any of their inventions, they should be taught and assisted; but should have nothing whilst they lazily sit still, expecting to be furnished from other hands without employing their own: and if you help them where they are at a stand, it will more endear you to them, than any chargeable toys you shall buy for them. Play-things which are above their skill to make, as tops, gigs, battledores, and the like, which are to be used with labour, should, indeed, be procured them: these, it is convenient, they should have, not for variety, but exercise; but these, too, should be given them as bare as might be. If

they had a top, the scourge-stick and leather-strap should be left to their own making and fitting. If they sit gaping to have such things drop into their mouths, they should go without them. This will accustom them to seek for what they want in themselves, and in their own endeavours; whereby they will be taught moderation in their desires, application, industry, thought, contrivance, and good husbandry; qualities that will be useful to them when they are men, and therefore cannot be learned too soon, nor fixed too deep. All the plays and diversions of children should be directed towards good and useful habits, or else they will introduce ill ones. Whatever they do, leaves some impression on that tender age, and from thence they receive a tendency to good or evil: and whatever hath such an influence, ought not to be neglected.

§ 131. Lying. Lying is so ready and cheap a cover for any miscarriage, and so much in fashion amongst all sorts of people, that a child can hardly avoid observing the use is made of it on all occasions, and so can scarce be kept, without great care, from getting into it. But it is so ill a quality, and the mother of so many ill ones, that spawn from it, and take shelter under it, that a child should be brought up in the greatest abhorrence of it imaginable: it should be always (when occasionally it comes to be mentioned) spoken of before him with the utmost detestation, as a quality so wholly inconsistent with the name and character of a gentleman, that nobody of any credit can bear the imputation of a lye; a mark that is judged the utmost disgrace, which debases a man to the lowest degree of a shameful meanness, and ranks him with the most contemptible part of mankind, and the abhorred rascality; and is not to be endured in any one, who would converse with people of condition, or have any esteem or reputation in the world. The first time he is found in a lye, it should rather to be wondered at, as a monstrous thing in him, than reproved as an ordinary fault. If that keeps him not from relapsing, the next time he must be sharply rebuked, and fall into the state of great displeasure of his father and mother, and all about him, who take notice of it. And if this way work not the cure, you must come to blows; for, after he has been thus warned, a premeditated lye must always be looked upon as obstinacy, and never be permitted to escape unpunished.

§ 132. Children, afraid to have their faults seen in their naked colours, will, like the rest of the sons of Adam, be apt to make excuses. Excuses. This is a fault usually bordering upon, and leading to untruth, and is not to

be indulged in them; but yet it ought to be cured rather with shame than roughness. If therefore, when a child is questioned for any thing, his first answer be an excuse, warn him soberly to tell the truth; and then, if he persists to shuffle it off with a falsehood, he must be chastised; but, if he directly confess, you must commend his ingenuity, and pardon the fault, be it what it will; and pardon it so, that you never so much as reproach him with it, or mention it to him again: for, if you would have him in love with ingenuity, and by a constant practice make it habitual to him, you must take care that it never procure him the least inconvenience; but, on the contrary, his own confession, bringing always with it perfect impunity, should be, besides, encouraged by some marks of approbation. If his excuse be such at any time, that you cannot prove it to have any falsehood in it, let it pass for true, and be sure not to show any suspicion of it. Let him keep up his reputation with you as high as is possible; for, when once he finds he has lost that, you have lost a great and your best hold upon him. Therefore let him not think he has the character of a liar with you, as long as you can avoid it without flattering him in it. Thus some slips in truth may be overlooked. But, after he has once been corrected for a lye, you must be sure never after to pardon it in him, whenever you find, and take notice to him, that he is guilty of it: for it being a fault, which he has been forbid, and may, unless he be wilful, avoid, the repeating of it is perfect perverseness, and must have the chastisement due to that offence.

§ 133. This is what I have thought, concerning the general method of educating a young gentleman; which, though I am apt to suppose may have some influence on the whole course of his education, yet I am far from imagining it contains all those particulars which his growing years, or peculiar temper, may require. But this being premised in general, we shall, in the next place, descend to a more particular consideration of the several parts of his education.

§ 134. That which every gentleman (that takes any care of his education) desires for his son, besides the estate he leaves him, is contained (I suppose) in these four things, virtue, wisdom, breeding, and learning. I will not trouble myself whether these names do not some of them sometimes stand for the same thing, or really include one another. It serves my turn here to follow the popular use of these words, which I presume is clear enough to make me be understood, and I hope there will be no difficulty to comprehend my meaning.

§ 135. I place virtue as the first and most necessary of those endowments that belong to a man or a gentleman, as absolutely requisite to make him valued and beloved by others, acceptable or tolerable to himself. Without that, I think, he will be happy neither in this, nor the other world.

§ 136. As the foundation of this, there ought very early to be imprinted on his mind a true notion of God, God. as of the independent supreme Being, Author, and Maker of all things, from whom we receive all our good, who loves us, and gives us all things: and, consequent to this, instil into him a love and reverence of this supreme Being. This is enough to begin with, without going to explain this matter any farther, for fear, lest by talking too early to him of spirits, and being unseasonably forward to make him understand the incomprehensible nature of that infinite Being, his head be either filled with false, or perplexed with unintelligible notions of him. Let him only be told upon occasion, that God made and governs all things, hears and sees every thing, and does all manner of good to those that love and obey him. You will find, that, being told of such a God, other thoughts will be apt to rise up fast enough in his mind about him; which, as you observe them to have any mistakes, you must set right. And I think it would be better, if men generally rested in such an idea of God, without being too curious in their notions about a Being, which all must acknowledge incomprehensible; whereby many, who have not strength and clearness of thought to distinguish between what they can, and what they cannot know, run themselves into superstition or atheism, making God like themselves, or (because they cannot comprehend any thing else) none at all. And I am apt to think the keeping children constantly morning and evening to acts of devotion to God, as to their Maker, Preserver, and Benefactor, in some plain and short form of prayer, suitable to their age and capacity, will be of much more use to them in religion, knowledge, and virtue, than to distract their thoughts with curious inquiries into his inscrutable essence and being.

§ 137. Having by gentle degrees, as you find him capable of it, settled such an idea of God in his mind, and taught him to pray to him, and praise him as the Author of his being, and of all the good he does or can enjoy, forbear any discourse of other spirits, Spirits. till the mention of them coming in his way, upon occasion hereafter to be set down, and his reading the scripture-history, put him upon that inquiry.

§ 138. But even then, and always whilst he is young, be sure to preserve his tender mind from all impressions and notions of spirits and

goblins, Goblins. or any fearful apprehensions in the dark. This he will be in danger of from the indiscretion of servants, whose usual method is to awe children, and keep them in subjection, by telling them of raw-head and bloody-bones, and such other names, as carry with them the ideas of something terrible and hurtful, which they have reason to be afraid of, when alone, especially in the dark. This must be carefully prevented; for though by this foolish way they may keep them from little faults, yet the remedy is much worse than the disease; and there are stamped upon their imaginations, ideas that follow them with terror and affrightment. Such bug-bear thoughts, once got into the tender minds of children, and being set on with a strong impression from the dread that accompanies such apprehensions, sink deep, and fasten themselves so, as not easily, if ever, to be got out again; and, whilst they are there, frequently haunt them with strange visions, making children dastards when alone, and afraid of their shadows and darkness all their lives after. I have had those complain to me, when men, who had been thus used, when young; that, though their reason corrected the wrong ideas they had taken in, and they were satisfied that there was no cause to fear invisible beings more in the dark, than in the light; yet that these notions were apt still, upon any occasion, to start up first in their prepossessed fancies, and not to be removed without some pains. And, to let you see how lasting frightful images are, that take place in the mind early, I shall here tell you a pretty remarkable, but true story; there was in a town on the west a man of a disturbed brain, whom the boys used to teaze, when he came in their way: this fellow one day, seeing in the street one of those lads that used to vex him, stepped into a cutler's shop he was near, and there seizing on a naked sword, made after the boy, who, seeing him coming so armed, betook himself to his feet, and ran for his life, and by good luck had strength and heels enough to reach his father's house, before the madman could get up to him: the door was only latched: and, when he had the latch in his hand, he turned about his head to see how near his pursuer was, who was at the entrance of the porch, with his sword up ready to strike; and he had just time to get in and clap to the door, to avoid the blow, which, though his body escaped, his mind did not. This frightening idea made so deep an impression there, that it lasted many years, if not all his life after; for telling this story when he was a man, he said, that after that time till then, he never went in at that door (that he could remember) at any

time, without looking back, whatever business he had in his head, or how little soever, before he came thither, he thought of this madman.

If children were let alone, they would be no more afraid in the dark, than in broad sun-shine; they would in their turns as much welcome the one for sleep, as the other to play in: there should be no distinction made to them, by any discourse, of more danger, or terrible things in the one than the other. But, if the folly of any one about them should do them this harm, and make them think there is any difference between being in the dark and winking, you must get it out of their minds as soon as you can; and let them know, that God, who made all things good for them, made the night, that they might sleep the better and the quieter: and that they being under his protection, there is nothing in the dark to hurt them. What is to be known more of God and good spirits, is to be deferred till the time we shall hereafter mention; and of evil spirits, it will be well if you can keep him from wrong fancies about them, till he is ripe for that sort of knowledge.

§ 139. Having laid the foundations of virtue in a true Truth. notion of a God, such as the creed wisely teaches, as far as his age is capable, and by accustoming him to pray to him; the next thing to be taken care of, is to keep him exactly to speaking of truth, and by all the ways imaginable inclining him to be good-natured. Good-nature. Let him know, that twenty faults are sooner to be forgiven, than the straining of truth, to cover any one by an excuse: and to teach him betimes to love and be good-natured to others, is to lay early the true foundation of an honest man; all injustice generally springing from too great love of ourselves, and too little of others.

This is all I shall say of this matter in general, and is enough for laying the first foundations of virtue in a child. As he grows up, the tendency of his natural inclination must be observed; which, as it inclines him, more than is convenient, on one or the other side, from the right path of virtue, ought to have proper remedies applied; for few of Adam's children are so happy, as not to be born with some bias in their natural temper, which it is the business of education either to take off, or counterbalance: but to enter into particulars of this, would be beyond the design of this short treatise of education. I intend not a discourse of all the virtues and vices, and how each virtue is to be attained, and every particular vice by its peculiar remedies cured; though I have mentioned some of the most ordinary faults, and the ways to be used in correcting them.

§ 140. WisdomWisdom. I take, in the popular acceptation, for a man's managing his business ably, and with foresight, in this world. This is the product of a good natural temper, application of mind, and experience together; and so above the reach of children. The greatest thing that in them can be done towards it, is to hinder them, as much as may be, from being cunning; which, being the ape of wisdom, is the most distant from it that can be: and, as an ape, for the likeness it has to a man, wanting what really should make him so, is by so much the uglier; cunning is only the want of understanding; which, because it cannot compass its end by direct ways, would do it by a trick and circumvention; and the mischief of it is, a cunning trick helps but once, but hinders ever after. No cover was ever made either so big, or so fine, as to hide itself. Nobody was ever so cunning, as to conceal their being so: and, when they are once discovered, every body is shy, every body distrustful of crafty men; and all the world forwardly join to oppose and defeat them: whilst the open, fair, wise man has every body to make way for him, and goes directly to his business. To accustom a child to have true notions of things, and not to be satisfied till he has them; to raise his mind to great and worthy thoughts; and to keep him at a distance from falsehood and cunning, which has always a broad mixture of falsehood in it; is the fittest preparation of a child for wisdom. The rest, which is to be learned from time, experience, and observation, and an acquaintance with men, their tempers and designs, is not to be expected in the ignorance and inadvertency of childhood, or the inconsiderate heat and unwariness of youth: all that can be done towards it, during this unripe age, is, as I have said, to accustom them to truth and sincerity; to a submission to reason; and, as much as may be, to reflection on their own actions.

§ 141. The next good quality belonging to a gentleman, is good-breeding.Breeding. There are two sorts of ill-breeding; the one, a sheepish bashfulness; and the other, a misbecoming negligence and disrespect in our carriage; both which are avoided, by duly observing this one rule, Not to think meanly of ourselves, and not to think meanly of others.

§ 142. The first part of this rule must not be understood in opposition to humility, but to assurance. We ought not to think so well of ourselves, as to stand upon our own value; and assume to ourselves a preference before others, because of any advantage we may imagine we have over them; but modestly to take what is offered, when it is our due. But yet we ought to think so well of ourselves, as to perform those actions which are incumbent

on, and expected of us, without discomposure or disorder, in whose presence soever we are, keeping that respect and distance which is due to every one's rank and quality. There is often in people, especially children, a clownish shamefacedness before strangers, or those above them; they are confounded in their thoughts, words, and looks, and so lose themselves in that confusion, as not to be able to do any thing, or at least not to do it with that freedom and gracefulness which pleases and makes them acceptable. The only cure for this, as for any other miscarriage, is by use to introduce the contrary habit. But since we cannot accustom ourselves to converse with strangers, and persons of quality, without being in their company, nothing can cure this part of ill-breeding, but change and variety of company, and that of persons above us.

§ 143. As the before-mentioned consists in too great a concern how to behave ourselves towards others, so the other part of ill-breeding lies in the appearance of too little care of pleasing or showing respect to those we have to do with. To avoid this these two things are requisite: first, a disposition of the mind not to offend others; and, secondly, the most acceptable and agreeable way of expressing that disposition. From the one, men are called civil; from the other, well-fashioned. The latter of these is that decency and gracefulness of looks, voice, words, motions, gestures, and of all the whole outward demeanour, which takes in company, and makes those with whom we may converse easy and well-pleased. This is, as it were, the language, whereby that internal civility of the mind is expressed; which, as other languages are, being very much governed by the fashion and custom of every country, must, in the rules and practice of it, be learned chiefly from observation, and the carriage of those who are allowed to be exactly well-bred. The other part, which lies deeper than the outside, is that general good-will and regard for all people, which makes any one have a care not to show, in his carriage, any contempt, disrespect, or neglect of them; but to express, according to the fashion and way of that country, a respect and value for them, according to their rank and condition. It is a disposition of the mind that shows itself in the carriage, whereby a man avoids making any one uneasy in conversation.

I shall take notice of four qualities that are most directly opposite to this first and most taking of all the social virtues. And from some one of these four it is, that incivility commonly has its rise. I shall set them down, that children may be preserved or recovered from their ill influence.

The first is, a natural roughness, *Roughness*. which makes a man uncomplaisant to others, so that he has no deference for their inclinations, tempers, or conditions. It is the sure badge of a clown, not to mind what pleases or displeases those he is with; and yet one may often find a man, in fashionable clothes, give an unbounded swing to his own humour, and suffer it to jostle or over-run any one that stands in its way, with a perfect indifferency how they take it. This is a brutality that every one sees and abhors, and nobody can be easy with: and therefore this finds no place in any one, who would be thought to have the least tincture of good-breeding. For the very end and business of good-breeding is to supple the natural stiffness, and so soften men's tempers, that they may bend to a compliance, and accommodate themselves to those they have to do with.

Contempt, *Contempt*. or want of due respect, discovered either in looks, words, or gesture: this, from whomsoever it comes, brings always uneasiness with it; for nobody can contentedly bear being slighted.

Censoriousness, *Censoriousness*. and finding fault with others, has a direct opposition to civility. Men, whatever they are or are not guilty of, would not have their faults displayed, and set in open view and broad daylight, before their own, or other people's eyes. Blemishes affixed to any one, always carry shame with them: and the discovery, or even bare imputation of any defect, is not born without some uneasiness. Raillery, *Raillery*. is the most refined way of exposing the faults of others; but, because it is usually done with wit and good language, and gives entertainment to the company, people are led into a mistake, and, where it keeps within fair bounds, there is no incivility in it: and so the pleasantry of this sort of conversation often introduces it amongst people of the better rank; and such talkers are favourably heard, and generally applauded by the laughter of the by-standers on their side: but they ought to consider, that the entertainment of the rest of the company is at the cost of that one, who is set out in their burlesque colours, who therefore is not without uneasiness, unless the subject, for which he is rallied, be really in itself matter of commendation; for then the pleasant images and representations, which make the raillery, carrying praise as well as sport with them, the rallied person also finds his account, and takes part in the diversion. But, because the nice management of so nice and ticklish a business, wherein a little slip may spoil all, is not every body's talent, I think those, who would secure themselves from provoking others, especially all young people, should

carefully abstain from raillery; which, by a small mistake, or any wrong turn, may leave upon the mind of those, who are made uneasy by it, the lasting memory of having been piquantly, though wittily, taunted for something censurable in them.

Besides raillery, contradiction. is a kind of censoriousness, wherein ill-breeding often shows itself. Complaisance does not require that we should always admit all the reasonings or relations that the company is entertained with; no, nor silently let pass all that is vented in our hearing. The opposing the opinions, and rectifying the mistakes of others, is what truth and charity sometimes require of us, and civility does not oppose, if it be done with due caution and care of circumstances. But there are some people, that one may observe possessed, as it were, with the spirit of contradiction, that steadily, and without regard to right or wrong, oppose some one, or perhaps every one of the company, whatever they say. This is so visible and outrageous a way of censuring, that nobody can avoid thinking himself injured by it. All opposition to what another man has said, is so apt to be suspected of censoriousness, and is so seldom received without some sort of humiliation, that it ought to be made in the gentlest manner, and softest words can be found; and such as, with the whole deportment, may express no forwardness to contradict. All marks of respect and good-will ought to accompany it, that, whilst we gain the argument, we may not lose the esteem of those that hear us.

Captiousness. is another fault opposite to civility, not only because it often produces misbecoming and provoking expressions and carriage, but because it is a tacit accusation and reproach of some incivility, taken notice of in those whom we are angry with. Such a suspicion, or intimation, cannot be born by any one without uneasiness. Besides, one angry body discomposes the whole company, and the harmony ceases upon any such jarring.

The happiness, that all men so steadily pursue, consisting in pleasure, it is easy to see why the civil are more acceptable than the useful. The ability, sincerity, and good intention, of a man of weight and worth, or a real friend, seldom atones for the uneasiness, that is produced by his grave and solid representations. Power and riches, nay virtue itself, are valued only as conducing to our happiness; and therefore he recommends himself ill to another, as aiming at his happiness, who, in the services he does him, makes him uneasy in the manner of doing them. He that knows how to make those

he converses with easy, without debasing himself to low and servile flattery, has found the true art of living in the world, and being both welcome and valued every-where. Civility therefore is what, in the first place, should with great care be made habitual to children and young people.

§ 144. There is another fault in good manners, and that is, excess of ceremony, and an obstinate persisting to force upon another what is not his due, and what he cannot take without folly or shame. This seems rather a design to expose, than oblige; or, at least, looks like a contest for mastery; and, at best, is but troublesome, and so can be no part of good breeding, which has no other use or end, but to make people easy and satisfied in their conversation with us. This is a fault few young people are apt to fall into; but yet, if they are ever guilty of it, or are suspected to incline that way, they should be told of it, and warned of this mistaken civility. The thing they should endeavour and aim at in conversation, should be to show respect, esteem, and good-will, by paying to every one that common ceremony and regard, which is in civility due to them. To do this, without a suspicion of flattery, dissimulation, or meanness, is a great skill, which good sense, reason, and good company, can only teach; but is of so much use in civil life, that it is well worth the studying.

§ 145. Though the managing ourselves well in this part of our behaviour has the name of good-breeding, as if peculiarly the effect of education; yet, as I have said, young children should not be much perplexed about it; I mean, about putting off their hats, and making legs modishly. Teach them humility, and to be good-natured, if you can, and this sort of manners will not be wanting: civility being, in truth, nothing but a care not to show any slighting or contempt, of any one in conversation. What are the most allowed and esteemed ways of expressing this, we have above observed. It is as peculiar and different, in several countries of the world, as their languages; and therefore, if it be rightly considered, rules and discourses, made to children about it, are as useless and impertinent, as it would be, now and then, to give a rule or two of the Spanish tongue, to one that converses only with Englishmen. Be as busy as you please with discourses of civility to your son; such as is his company, such will be his manners. A ploughman of your neighbourhood, that has never been out of his parish, read what lectures you please to him, will be as soon in his language, as his courage, a courtier; that is, in neither will be more polite, than those he uses to converse with: and therefore of this no other care can be taken, till he be

of an age to have a tutor put to him, who must not fail to be a well-bred man. And, in good earnest, if I were to speak my mind freely, so children do nothing out of obstinacy, pride, and illnature, it is no great matter how they put off their hats, or make legs. If you can teach them to love and respect other people, they will, as their age requires it, find ways to express it acceptably to every one, according to the fashions they have been used to: and, as to their motions, and carriage of their bodies, a dancing-master, as has been said, when it is fit, will teach them what is most becoming. In the mean time, when they are young, people expect not that children should be over-mindful of these ceremonies; carelessness is allowed to that age, and becomes them as well as compliments do grown people: or, at least, if some very nice people will think it a fault, I am sure it is a fault that should be over-looked, and left to time, a tutor, and conversation, to cure: and therefore I think it not worth your while to have your son (as I often see children are) molested or child about it; but where there is pride, or ill-nature, appearing in his carriage, there he must be persuaded, or shamed, out of it.

Though children, when little, should not be much perplexed with rules and ceremonious parts of breeding; yet there is a sort of unmannerliness very apt to grow up with young people, if not early restrained; and that is a forwardness to interrupt. Others that are speaking, and to stop them with some contradiction. Whether the custom of disputing, and the reputation of parts and learning usually given to it, as if it were the only standard and evidence of knowledge, make young men so forward to watch occasions to correct others in their discourse, and not to slip any opportunity of showing their talents; so it is, that I have found scholars most blamed in this point. There cannot be a greater rudeness, than to interrupt another in the current of his discourse; for, if there be not impertinent folly in answering a man before we know what he will say, yet it is a plain declaration, that we are weary to hear him talk any longer; and have a disesteem of what he says; which we, judging not fit to entertain the company, desire them to give audience to us, who have something to produce worth their attention. This shows a very great disrespect, and cannot but be offensive; and yet, this is what almost all interruption constantly carries with it. To which, if there be added, as is usual, a correcting of any mistake, or a contradiction of what has been said, it is a mark of yet greater pride and self-conceitedness, when we thus intrude

ourselves for teachers, and take upon us, either to set another right in his story, or show the mistakes of his judgment.

I do not say this, that I think there should be no difference of opinions in conversation, nor opposition in men's discourses: this would be to take away the greatest advantage of society, and the improvements that are to be made by ingenious company; where the light is to be got from the opposite arguings of men of parts, showing the different sides of things, and their various aspects and probabilities, would be quite lost, if every one were obliged to assent to, and say after the first speaker. It is not the owning one's dissent from another that I speak against, but the manner of doing it. Young men should be taught not to be forward to interpose their opinions, unless asked, or when others have done, and are silent; and then only by way of inquiry, not instruction. The positive asserting, and the magisterial air, should be avoided; and when a general pause of the whole company affords an opportunity, they may modestly put in their question as learners.

This becoming decency will not cloud their parts, nor weaken the strength of their reason; but bespeak the more favourable attention, and give what they say the greater advantage. An ill argument, or ordinary observation, thus introduced, with some civil preface of deference and respect to the opinions of others, will procure them more credit and esteem, than the sharpest wit, or profoundest science, with a rough, insolent, or noisy management; which always shocks the hearers, and leaves an ill opinion of the man, though he get the better of it in the argument.

This therefore should be carefully watched in young people, stopped in the beginning, and the contrary habit introduced in all their conversation: and the rather, because forwardness to talk, frequent interruptions in arguing, and loud wrangling, are too often observable amongst grown people, even of rank amongst us. The Indians, whom we call barbarous, observe much more decency and civility in their discourses and conversation, giving one another a fair silent hearing, till they have quite done: and then answering them calmly, and without noise or passion. And if it be not so in this civilized part of the world, we must impute it to a neglect in education, which has not yet reformed this ancient piece of barbarity amongst us. Was it not, think you, an entertaining spectacle, to see two ladies of quality accidentally seated on the opposite sides of a room, set round with company, fall into a dispute, and grow so eager in it, that in the heat of their controversy, edging by degrees their chairs forwards, they were

in a little time got up close to one another in the middle of the room; where they for a good while managed the dispute. as fiercely as two game-cocks in the pit, without minding, or taking any notice of the circle, which could not all the while forbear smiling? This I was told by a person of quality, who was present at the combat, and did not omit to reflect upon the indecencies, that warmth in dispute often runs people into; which, since custom makes too frequent, education should take the more care of. There is nobody but condemns this in others, though they overlook it in themselves: and many who are sensible of it in themselves, and resolve against it, cannot yet get rid of an ill custom, which neglect in their education has suffered to settle into an habit.

§ 146. What has been above said concerning company, Company. would, perhaps, if it were well reflected on, give us a larger prospect, and let us see how much farther its influence reaches. It is not the modes of civility alone, that are imprinted by conversation; the tincture of company sinks deeper than the outside; and possibly, if a true estimate were made of the morality and religions of the world, we should find, that the far greater part of mankind received even those opinions and ceremonies they would die for, rather from the fashions of their countries, and the constant practice of those about them, than from any conviction of their reasons. I mention this only to let you see of what moment I think company is to your son in all the parts of his life, and therefore how much that one part is to be weighed and provided for, it being of greater force to work upon him, than all you can do besides.

§ 147. You will wonder, perhaps, that I put learning. last, especially if I tell you I think it the least part. This may seem strange in the mouth of a bookish man: and this making usually the chief, if not only bustle and stir about children, this being almost that alone, which is thought on, when people talk of education, makes it the greater paradox. When I consider what ado is made about a little Latin and Greek, how many years are spent in it, and what a noise and business it makes to no purpose, I can hardly forbear thinking, that the parents of children still live in fear of the schoolmaster's rod, which they look on as the only instrument of education; as if a language or two were its whole business. How else is it possible, that a child should be chained to the oar seven, eight, or ten of the best years of his life, to get a language or two, which I think might be had at a great deal cheaper rate of pains and time, and be learned almost in playing?

Forgive me, therefore, if I say, I cannot with patience think, that a young gentleman should be put into the herd, and be driven with a whip and scourge, as if he were to run the gauntlet through the several classes, “ad capiendum ingenii cultum.” “What then, say you, would you not have him write and read? Shall he be more ignorant than the clerk of our parish, who takes Hopkins and Sternhold for the best poets in the world, whom yet he makes worse than they are, by his ill reading?” Not so, not so fast, I beseech you. Reading, and writing, and learning, I allow to be necessary, but yet not the chief business. I imagine you would think him a very foolish fellow, that should not value a virtuous, or a wise man, infinitely before a great scholar. Not but that I think learning a great help to both, in well-disposed minds; but yet it must be confessed also, that in others not so disposed, it helps them only to be the more foolish, or worse men. I say this, that, when you consider of the breeding of your son, and are looking out for a school-master, or a tutor, you would not have (as is usual) Latin and logic only in your thoughts. Learning must be had, but in the second place, as subservient only to greater qualities. Seek out somebody, that may know how discreetly to frame his manners: place him in hands, where you may, as much as possible, secure his innocence, cherish and nurse up the good, and gently correct and weed out any bad inclinations, and settle in him good habits. This is the main point; and this being provided for, learning may be had into the bargain; and that as I think, at a very easy rate, by methods that may be thought on.

§ 148. When he can talk, it is time he should begin to learn to read. Reading. But as to this, give me leave here to inculcate again what is very apt to be forgotten, viz. that great care is to be taken, that it be never made as a business to him, nor he look on it as a task. We naturally, as I said, even from our cradles, love liberty, and have therefore an aversion to many things, for no other reason, but because they are enjoined us. I have always had a fancy, that learning might be made a play and recreation to children; and that they might be brought to desire to be taught, if it were proposed to them as a thing of honour, credit, delight, and recreation, or as a reward for doing something else, and if they were never chid or corrected for the neglect of it. That which confirms me in this opinion, is, that amongst the Portuguese, it is so much a fashion and emulation amongst their children to learn to read and write, that they cannot hinder them from it: they will learn it one from another, and are as intent on it as if it were

forbid them. I remember, that being at a friend's house, whose younger son, a child in coats, was not easily brought to his book (being taught to read at home by his mother); I advised to try another way, than requiring it of him as his duty. We therefore, in a discourse on purpose amongst ourselves, in his hearing, but without taking any notice of him, declared that it was the privilege and advantage of heirs and elder brothers, to be scholars; that this made them fine gentlemen, and beloved by every body: and that for younger brothers, it was a favour to admit them to breeding; to be taught to read and write, was more than came to their share; they might be ignorant bumpkins and clowns, if they pleased. This so wrought upon the child, that afterwards he desired to be taught; would come himself to his mother to learn; and would not let his maid be quiet, till she heard him his lesson. I doubt not but some way like this might be taken with other children; and, when their tempers are found, some thoughts be instilled into them, that might set them upon desiring of learning themselves, and make them seek it, as another sort of play or recreation. But, then, as I said before, it must never be imposed as a task, nor made a trouble to them. There may be dice, and play-things, with the letters on them, to teach children the alphabet by playing; and twenty other ways may be found, suitable to their particular tempers, to make this kind of learning a sport to them.

§ 149. Thus children may be cozened into a knowledge of the letters; be taught to read, without perceiving it to be any thing but a sport, and play themselves into that which others are whipped for. Children should not have any thing like work, or serious, laid on them; neither their minds nor bodies will bear it. It injures their healths; and their being forced and tied down to their books, in an age at enmity with all such restraint, has, I doubt not, been the reason why a great many have hated books and learning all their lives after: it is like a surfeit, that leaves an aversion behind, not to be removed.

§ 150. I have therefore thought, that if play-things were fitted to this purpose, as they are usually to none, contrivances might be made to teach children to read, whilst they thought they were only playing. For example; What if an ivory ball were made like that of the royal-oak lottery, with thirty-two sides, or one rather of twenty-four or twenty-five sides; and upon several of those sides pasted on an A, upon several others B, on others C, and on others D? I would have you begin with but these four letters, or perhaps only two at first; and when he is perfect in them, then add another;

and so on, till each side having one letter, there be on it the whole alphabet. This I would have others play with before him, it being as good a sort of play to lay a stake who shall first throw an A or B, as who upon dice shall throw six or seven. This being a play amongst you, tempt him not to it, lest you make it business; for I would not have him understand it is any thing but a play of older people, and I doubt not but he will take to it of himself. And that he may have the more reason to think it is a play that he is sometimes in favour admitted to; when the play is done, the ball should be laid up safe out of his reach, that so it may not, by his having it in his keeping at any time, grow stale to him.

§ 151. To keep up his eagerness to it, let him think it a game belonging to those above him; and when by this means he knows the letters, by changing them into syllables, he may learn to read, without knowing how he did so, and never have any chiding or trouble about it, nor fall out with books, because of the hard usage and vexation they have caused him. Children, if you observe them, take abundance of pains to learn several games, which, if they should be enjoined them, they would abhor as a task, and business. I know a person of great quality, (more yet to be honoured for his learning and virtue, than for his rank and high place,) who, by pasting on the six vowels (for in our language Y is one) on the six sides of a die, and the remaining eighteen consonants on the sides of three other dice, has made this a play for his children, that he shall win, who, at one cast, throws most words on these four dice; whereby his eldest son, yet in coats, has played himself into spelling, with great eagerness, and without once having been chid for it, or forced to it.

§ 152. I have seen little girls exercise whole hours together, and take abundance of pains to be expert at dibstones, as they call it. Whilst I have been looking on, I have thought it wanted only some good contrivance to make them employ all that industry about something that might be more useful to them; and methinks it is only the fault and negligence of elder people, that it is not so. Children are much less apt to be idle than men; and men are to be blamed, if some part of that busy humour be not turned to useful things; which might be made usually as delightful to them as those they are employed in, if men would be but half so forward to lead the way, as these little apes would be to follow. I imagine some wise Portuguese heretofore began this fashion amongst the children of his country, where I have been told, as I said, it is impossible to hinder the children from

learning to read and write: and in some parts of France they teach one another to sing and dance from the cradle.

§ 153. The letters pasted upon the sides of the dice, or polygon, were best to be of the size of those of the folio bible to begin with, and none of them capital letters; when once he can read what is printed in such letters, he will not long be ignorant of the great ones: and in the beginning he should not be perplexed with variety. With this die also, you might have a play just like the royal-oak, which would be another variety; and play for cherries or apples, &c.

§ 154. Besides these, twenty other plays might be invented, depending on letters, which those, who like this way, may easily contrive, and get made to this use, if they will. But the four dice above mentioned I think so easy and useful, that it will be hard to find any better, and there will be scarce need of any other.

§ 155. Thus much for learning to read, which let him never be driven to, nor chid for; cheat him into it if you can, but make it not a business for him. It is better it be a year later before he can read, than that he should this way get an aversion to learning. If you have any contests with him, let it be in matters of moment, of truth, and good-nature: but lay no task on him about A B C. Use your skill to make his will supple and pliant to reason: teach him to love credit and commendation; to abhor being thought ill or meanly of, especially by you and his mother; and then the rest will come all easily. But, I think, if you will do that, you must not shackle and tie him up with rules about indifferent matters, nor rebuke him for every little fault, or perhaps some, that to others would seem great ones. But of this I have said enough already.

§ 156. When, by these gentle ways he begins to be able to read, some easy pleasant book, suited to his capacity, should be put into his hands, wherein the entertainment, that he finds, might draw him on, and reward his pains in reading; and yet not such as should fill his head with perfectly useless trumpery, or lay the principles of vice and folly. To this purpose I think Æsop's fables the best, which being stories apt to delight and entertain a child, may yet afford useful reflections to a grown man; and if his memory retain them all his life after, he will not repent to find them there, amongst his manly thoughts, and serious business. If his Æsop has pictures in it, it will entertain him much the better, and encourage him to read, when it carries the increase of knowledge with it; for such visible objects children

hear talked of in vain, and without any satisfaction, whilst they have no ideas of them: those ideas being not to be had from sounds, but from the things themselves, or their pictures. And therefore, I think, as soon as he begins to spell, as many pictures of animals should be got him as can be found, with the printed names to them, which at the same time will invite him to read, and afford him matter of inquiry and knowledge. Reynard the fox is another book, I think, may be made use of to the same purpose. And if those about him will talk to him often about the stories he has read, and hear him tell them, it will, besides other advantages, add encouragement and delight to his reading, when he finds there is some use and pleasure in it. These baits seem wholly neglected in the ordinary method; and it is usually long before learners find any use or pleasure in reading, which may tempt them to it, and so take books only for fashionable amusements, or impertinent troubles, good for nothing.

§ 157. The Lord's prayer, the creed, and ten commandments, it is necessary he should learn perfectly by heart; but, I think, not by reading them himself in his primer, but by somebody's repeating them to him, even before he can read. But learning by heart, and learning to read, should not, I think, be mixed, and so one made to clog the other. But his learning to read should be made as little trouble or business to him as might be.

What other books there are in English of the kind of those above mentioned, fit to engage the liking of children, and tempt them to read, I do not know; but am apt to think, that children, being generally delivered over to the method of schools, where the fear of the rod is to inforce, and not any pleasure of the employment to invite, them to learn; this sort of useful books, amongst the number of silly ones that are of all sorts, have yet had the fate to be neglected; and nothing that I know has been considered of this kind out of the ordinary road of the horn-book, primer, psalter, Testament, and Bible.

§ 158. As for the Bible, which children are usually employed in, to exercise and improve their talent in reading, I think the promiscuous reading of it, though by chapters as they lie in order, is so far from being of any advantage to children, either for the perfecting their reading, or principling their religion, that perhaps a worse could not be found. For what pleasure or encouragement can it be to a child, to exercise himself in reading those parts of a book where he understands nothing? And how little are the law of Moses, the Song of Solomon, the prophecies in the Old, and

the epistles and apocalypse in the New Testament, suited to a child's capacity? And though the history of the evangelists, and the Acts, have something easier; yet, taken all together, it is very disproportional to the understanding of childhood. I grant, that the principles of religion are to be drawn from thence, and in the words of the scripture; yet none should be proposed to a child, but such as are suited to a child's capacity and notions. But it is far from this to read through the whole Bible, and that for reading's sake. And what an odd jumble of thoughts must a child have in his head, if he have any at all, such as he should have concerning religion, who in his tender age reads all the parts of the Bible indifferently, as the word of God, without any other distinction! I am apt to think, that this, in some men, has been the very reason why they never had clear and distinct thoughts of it all their lifetime.

§ 159. And now I am by chance fallen on this subject, give me leave to say, that there are some parts of the scripture, which may be proper to be put into the hands of a child to engage him to read: such as are the story of Joseph and his brethren, of David and Goliath, of David and Jonathan, &c. and others, that he should be made to read for his instruction; as that, "What you would have others do unto you, do you the same unto them:" and such other easy and plain moral rules, which, being fitly chosen, might often be made use of, both for reading and instruction together; and so often read, till they are thoroughly fixed in his memory; and then afterwards, as he grows ripe for them, may in their turns, on fit occasions, be inculcated as the standing and sacred rules of his life and actions. But the reading of the whole scripture indifferently, is what I think very inconvenient for children, till, after having been made acquainted with the plainest fundamental parts of it, they have got some kind of general view of what they ought principally to believe and practise, which yet, I think, they ought to receive in the very words of the scripture, and not in such as men, prepossessed by systems and analogies, are apt in this case to make use of, and force upon them. Dr. Worthington, to avoid this, has made a catechism, which has all its answers in the precise words of the scripture, a thing of good example, and such a sound form of words as no christian can except against, as not fit for his child to learn. Of this, as soon as he can say the Lord's prayer, creed, and ten commandments by heart, it may be fit for him to learn a question every day, or every week, as his understanding is able to receive, and his memory to retain them. And when he has this catechism perfectly by heart,

so as readily and roundly to answer to any question in the whole book, it may be convenient to lodge in his mind the remaining moral rules, scattered up and down in the Bible, as the best exercise of his memory, and that which may be always a rule to him, ready at hand, in the whole conduct of his life.

§ 160. When he can read English well, it will be seasonable to enter him in writing. Writing. And here the first thing should be taught him, is to hold his pen right; and this he should be perfect in, before he should be suffered to put it to paper: for not only children, but any body else, that would do any thing well, should never be put upon too much of it at once, or be set to perfect themselves in two parts of an action at the same time, if they can possibly be separated. I think the Italian way of holding the pen between the thumb and the fore-finger alone may be best; but in this you should consult some good writing-master, or any other person who writes well and quick. When he has learned to hold his pen right, in the next place he should learn how to lay his paper, and place his arm and body to it. These practices being got over, the way to teach him to write without much trouble, is to get a plate graved with the characters of such a hand as you like best: but you must remember to have them a pretty deal bigger than he should ordinarily write; for every one naturally comes by degrees to write a less hand than he at first was taught, but never a bigger. Such a plate being graved, let several sheets of good writing-paper be printed off with red ink, which he has nothing to do but to go over with a good pen filled with black ink, which will quickly bring his hand to the formation of those characters, being at first showed where to begin, and how to form every letter. And when he can do that well, he must then exercise on fair paper; and so may easily be brought to write the hand you desire.

§ 161. When he can write well, and quick, I think it may be convenient, not only to continue the exercise of his hand in writing, but also to improve the use of it farther in drawing. Drawing. a thing very useful to a gentleman on several occasions, but especially if he travel, as that which helps a man often to express, in a few lines well put together, what a whole sheet of paper in writing would not be able to represent and make intelligible. How many buildings may a man see, how many machines and habits meet with, the ideas whereof would be easily retained and communicated by a little skill in drawing; which, being committed to words, are in danger to be lost, or at best but ill retained in the most exact descriptions? I do not mean that I

would have your son a perfect painter; to be that to any tolerable degree, will require more time than a young gentleman can spare from his other improvements of greater moment; but so much insight into perspective, and skill in drawing, as will enable him to represent tolerably on paper any thing he sees, except faces, may, I think, be got in a little time, especially if he have a genius to it: but where that is wanting, unless it be in the things absolutely necessary, it is better to let him pass them by quietly, than to vex him about them to no purpose: and therefore in this, as in all other things not absolutely necessary, the rule holds, “*Nihil invitâ Minervâ.*”

¶ 1. Short-hand, Short-hand. an art, as I have been told, known only in England, may perhaps be thought worth the learning, both for dispatch in what men write for their own memory, and concealment of what they would not have lie open to every eye. For he that has once learned any sort of character, may easily vary it to his own private use or fancy, and with more contraction suit it to the business he would employ it in. Mr. Rich’s, the best contrived of any I have seen, may, as I think, by one who knows and considers grammar well, be made much easier and shorter. But, for the learning this compendious way of writing, there will be no need hastily to look out a master; it will be early enough, when any convenient opportunity offers itself, at any time after his hand is well settled in fair and quick writing. For boys have but little use of short-hand, and should by no means practise it, till they write perfectly well, and have thoroughly fixed the habit of doing so.

§ 162. As soon as he can speak English, it is time for him to learn some other language: this nobody doubts of, when FrenchFrench. is proposed. And the reason is, because people are accustomed to the right way of teaching that language, which is by talking it into children in constant conversation, and not by grammatical rules. The Latin tongue would easily be taught the same way, if his tutor, being constantly with him, would talk nothing else to him, and make him answer still in the same language. But because French is a living language, and to be used more in speaking, that should be first learned, that the yet pliant organs of speech might be accustomed to a due formation of those sounds, and he get the habit of pronouncing French well, which is the harder to be done, the longer it is delayed.

§ 163. When he can speak and read French well, which in this method is usually in a year or two, he should proceed to Latin, Latin. which it is a

wonder parents, when they have had the experiment in French, should not think ought to be learned the same way, by talking and reading. Only care is to be taken, whilst he is learning those foreign languages, by speaking and reading nothing else with his tutor, that he do not forget to read English, which may be preserved by his mother, or some body else, hearing him read some chosen parts of the scripture or other English book, every day.

§ 164. Latin I look upon as absolutely necessary to a gentleman; and indeed custom, which prevails over every thing, has made it so much a part of education, that even those children are whipped to it, and made spend many hours of their precious time uneasily in Latin, who, after they are once gone from school, are never to have more to do with it, as long as they live. Can there be any thing more ridiculous, than that a father should waste his own money, and his son's time, in setting him to learn the Roman language, when, at the same time, he designs him for a trade, wherein he having no use of Latin, fails not to forget that little which he brought from school, and which it is ten to one he abhors for the ill usage it procured him? Could it be believed, unless we had every-where amongst us examples of it, that a child should be forced to learn the rudiments of a language, which he is never to use in the course of life that he is designed to, and neglect all the while the writing a good hand, and casting accounts, which are of great advantage in all conditions of life, and to most trades indispensably necessary? But though these qualifications, requisite to trade and commerce, and the business of the world, are seldom or never to be had at grammar-schools; yet thither not only gentlemen send their younger sons intended for trades, but even tradesmen and farmers fail not to send their children, though they have neither intention nor ability to make them scholars. If you ask them, why they do this? they think it as strange a question as if you should ask them why they go to church? Custom serves for reason, and has, to those that take it for reason, so consecrated this method, that it is almost religiously observed by them; and they stick to it, as if their children had scarce an orthodox education, unless they learned Lilly's grammar.

§ 165. But how necessary soever Latin be to some, and is thought to be to others, to whom it is of no manner of use or service, yet the ordinary way of learning it in a grammar-school, is that, which having had thoughts about, I cannot be forward to encourage. The reasons against it are so evident and cogent, that they have prevailed with some intelligent persons

to quit the ordinary road, not without success, though the method made use of was not exactly that which I imagine the easiest, and in short is this: to trouble the child with no grammar at all, but to have Latin, as English has been, without the perplexity of rules, talked into him; for, if you will consider it, Latin is no more unknown to a child, when he comes into the world, than English: and yet he learns English without master, rule, or grammar; and so might he Latin too, as Tully did, if he had somebody always to talk to him in this language. And when we so often see a Frenchwoman teach an English girl to speak and read French perfectly, in a year or two, without any rule of grammar, or any thing else, but prattling to her; I cannot but wonder, how gentlemen have been overseen this way for their sons, and thought them more dull or incapable than their daughters.

§ 166. If therefore a man could be got, who, himself speaking good Latin, could always be about your son, talk constantly to him, and suffer him to speak or read nothing else, this will be the true and genuine way, and that which I would propose, not only as the easiest and best, wherein a child might, without pains or chiding, get a language, which others are wont to be whipped for at school, six or seven years together; but also as that, wherein at the same time he might have his mind and manners formed, and he be instructed to boot in several sciences, such as are a good part of geography, astronomy, chronology, anatomy, besides some parts of history, and all other parts of knowledge of things, that fall under the senses, and require little more than memory. For there, if we would take the true way, our knowledge should begin, and in those things be laid the foundation; and not in the abstract notions of logic and metaphysics, which are fitter to amuse, than inform the understanding, in its first setting out towards knowledge. When young men have had their heads employed a while in those abstract speculations, without finding the success and improvement, or that use of them which they expected, they are apt to have mean thoughts, either of learning, or themselves; they are tempted to quit their studies, and throw away their books, as containing nothing but hard words, and empty sounds; or else to conclude, that if there be any real knowledge in them, they themselves have not understandings capable of it. That this is so, perhaps I could assure you upon my own experience. Amongst other things to be learned by a young gentleman in this method, whilst others of his age are wholly taken up with Latin and languages, I may also set down geometry

for one, having known a young gentleman, bred something after this way, able to demonstrate several propositions in Euclid, before he was thirteen.

§ 167. But if such a man cannot be got, who speaks good Latin, and, being able to instruct your son in all these parts of knowledge, will undertake it by this method; the next best is to have him taught as near this way as may be, which is by taking some easy and pleasant book, such as *Æsop's fables*, and writing the English translation (made as literal as it can be) in one line, and the Latin words, which answer each of them, just over it in another. These let him read every day over and over again, till he perfectly understands the Latin; and then go on to another fable, till he be also perfect in that, not omitting what he is already perfect in, but sometimes reviewing that, to keep it in his memory. And when he comes to write, let these be set him for copies; which, with the exercise of his hand, will also advance him in Latin. This being a more imperfect way than by talking Latin unto him, the formation of the verbs first, and afterwards the declensions of the nouns and pronouns perfectly learnt by heart, may facilitate his acquaintance with the genius and manner of the Latin tongue, which varies the signification of verbs and nouns, not as the modern languages do by particles prefixed, but by changing the last syllables. More than this of grammar I think he need not have, till he can read himself "*Sanctii Minerva*," with *Scioppius* and *Perizonius's* notes.

In teaching of children this too, I think, it is to be observed, that in most cases, where they stick, they are not to be farther puzzled, by putting them upon finding it out themselves; as by asking such questions as these, viz. Which is the nominative case in the sentence they are to construe? or demanding what "*aufero*," signifies, to lead them to the knowledge what "*abstulere*" signifies, &c. when they cannot readily tell. This wastes time only in disturbing them; for whilst they are learning, and applying themselves with attention, they are to be kept in good humour, and every thing made easy to them, and as pleasant as possible. Therefore, wherever they are at a stand, and are willing to go forwards, help them presently over the difficulty, without any rebuke or chiding: remembering that, where harsher ways are taken, they are the effect only of pride and peevishness in the teacher, who expects children should instantly be masters of as much as he knows: whereas he should rather consider, that his business is to settle in them habits, not angrily to inculcate rules, which serve for little in the conduct of our lives; at least are of no use to children, who forget them as

soon as given. In sciences where their reason is to be exercised, I will not deny, but this method may sometimes be varied, and difficulties proposed on purpose to excite industry, and accustom the mind to employ its whole strength and sagacity in reasoning. But yet, I guess, this is not to be done to children whilst very young; nor at their entrance upon any sort of knowledge: then every thing of itself is difficult, and the great use and skill of a teacher is to make all as easy as he can. But particularly in learning of languages there is least occasion for posing of children. For languages being to be learned by rote, custom, and memory, are then spoken in greatest perfection, when all rules of grammar are utterly forgotten. I grant the grammar of a language is sometimes very carefully to be studied: but it is only to be studied by a grown man, when he applies himself to the understanding of any language critically, which is seldom the business of any but professed scholars. This, I think, will be agreed to, that, if a gentleman be to study any language, it ought to be that of his own country, that he may understand the language, which he has constant use of, with the utmost accuracy.

There is yet a farther reason, why masters and teachers should raise no difficulties to their scholars; but, on the contrary, should smooth their way, and readily help them forwards, where they find them stop. Children's minds are narrow and weak, and usually susceptible but of one thought at once. Whatever is in a child's head, fills it for the time, especially if set on with any passion. It should therefore be the skill and art of the teacher, to clear their heads of all other thoughts, whilst they are learning of any thing, the better to make room for what he would instil into them, that it may be received with attention and application, without which it leaves no impression. The natural temper of children disposes their minds to wander. Novelty alone takes them; whatever that presents, they are presently eager to have a taste of, and are as soon satiated with it. They quickly grow weary of the same thing, and so have almost their whole delight in change and variety. It is a contradiction to the natural state of childhood, for them to fix their fleeting thoughts. Whether this be owing to the temper of their brains, or the quickness or instability of their animal spirits, over which the mind has not yet got a full command; this is visible, that it is a pain to children to keep their thoughts steady to any thing. A lasting continued attention is one of the hardest tasks can be imposed on them: and therefore, he that requires their application, should endeavour to make what he proposes as grateful

and agreeable as possible; at least, he ought to take care not to join any displeasing or frightful idea with it. If they come not to their books with some kind of liking and relish, it is no wonder their thoughts should be perpetually shifting from what disgusts them, and seek better entertainment in more pleasing objects, after which they will unavoidably be gadding.

It is, I know, the usual method of tutors, to endeavour to procure attention in their scholars, and to fix their minds to the business in hand, by rebukes and corrections, if they find them ever so little wandering. But such treatment is sure to produce the quite contrary effect. Passionate words or blows from the tutor fill the child's mind with terour and affrightment, which immediately takes it wholly up, and leaves no room for other impressions. I believe there is nobody, that reads this, but may recollect, what disorder hasty or imperious words from his parents or teachers have caused in his thoughts; how for the time it has turned his brains, so that he scarce knew what was said by, or to him: he presently lost the sight of what he was upon; his mind was filled with disorder and confusion, and in that state was no longer capable of attention to any thing else.

It is true, parents and governors ought to settle and establish their authority, by an awe over the minds of those under their tuition; and to rule them by that: but when they have got an ascendant over them, they should use it with great moderation, and not make themselves such scarecrows, that their scholars should always tremble in their sight. Such an austerity may make their government easy to themselves, but of very little use to their pupils. It is impossible children should learn any thing, whilst their thoughts are possessed and disturbed with any passion, especially fear, which makes the strongest impression on their yet tender and weak spirits. Keep the mind in an easy calm temper, when you would have it receive your instructions, or any increase of knowledge. It is as impossible to draw fair and regular characters on a trembling mind, as on a shaking paper.

The great skill of a teacher is to get and keep the attention of his scholar: whilst he has that, he is sure to advance as fast as the learner's abilities will carry him; and without that, all his bustle and pother will be to little or no purpose. To attain this, he should make the child comprehend (as much as may be) the usefulness of what he teaches him; and let him see, by what he has learned, that he can do something which he could not do before; something which gives him some power and real advantage above others, who are ignorant of it. To this he should add sweetness in all his

instructions; and by a certain tenderness in his whole carriage, make the child sensible that he loves him, and designs nothing but his good; the only way to beget love in the child, which will make him hearken to his lessons, and relish what he teaches him.

Nothing but obstinacy should meet with any imperiousness or rough usage. All other faults should be corrected with a gentle hand; and kind encouraging words will work better and more effectually upon a willing mind, and even prevent a good deal of that perverseness, which rough and imperious usage often produces in well-disposed and generous minds. It is true, obstinacy and wilful neglects must be mastered, even though it cost blows to do it: but I am apt to think perverseness in the pupils is often the effect of frowardness in the tutor; and that most children would seldom have deserved blows, if needless and misapplied roughness had not taught them ill-nature, and given them an aversion to their teacher, and all that comes from him.

Inadvertency, forgetfulness, unsteadiness, and wandering of thought, are the natural faults of childhood: and therefore, when they are not observed to be wilful, are to be mentioned softly, and gained upon by time. If every slip of this kind produces anger and rating, the occasions of rebuke and corrections will return so often, that the tutor will be a constant terrour and uneasiness to his pupils; which one thing is enough to hinder their profiting by his lessons, and to defeat all his methods of instruction.

Let the awe he has got upon their minds be so tempered with the constant marks of tenderness and goodwill, that affection may spur them to their duty, and make them find a pleasure in complying with his dictates. This will bring them with satisfaction to their tutor; make them hearken to him; as to one who is their friend, that cherishes them, and takes pains for their good; this will keep their thoughts easy and free, whilst they are with him, the only temper wherein the mind is capable of receiving new informations, and of admitting into itself those impressions, which if not taken and retained, all that they and their teacher do together is lost labour; there is much uneasiness, and little learning.

§ 168. When, by this way of interlining Latin and English one with another, he has got a moderate knowledge of the Latin tongue, he may then be advanced a little farther to the reading of some other easy Latin book, such as Justin, or Eutropius; and to make the reading and understanding of it the less tedious, and difficult to him, let him help himself, if he please,

with the English translation. Nor let the objection, that he will then know it only by rote, fright any one. This, when well considered, is not of any moment against, but plainly for, this way of learning a language; for languages are only to be learned by rote; and a man, who does not speak English or Latin perfectly by rote, so that having thought of the thing he would speak of, his tongue of course, without thought of rule or grammar, falls into the proper expression and idiom of that language, does not speak it well, nor is master of it. And I would fain have any one name to me that tongue, that any one can learn or speak as he should do, by the rules of grammar. Languages were made not by rules or art, but by accident, and the common use of the people. And he that will speak them well, has no other rule but that: nor any thing to trust to but his memory, and the habit of speaking after the fashion learned from those that are allowed to speak properly, which, in other words, is only to speak by rote.

It will possibly be asked here, Is grammarGrammar. then of no use? And have those who have taken so much pains in reducing several languages to rules and observations, who have writ so much about declensions and conjugations, about concords and syntaxis, lost their labour, and been learned to no purpose? I say not so; grammar has its place too. But this I think I may say, there is more stir a great deal made with it than there needs, and those are tormented about it, to whom it does not at all belong; I mean children, at the age wherein they are usually perplexed with it in grammar-schools.

There is nothing more evident, than that languages learned by rote serve well enough for the common affairs of life, and ordinary commerce. Nay, persons of quality of the softer sex, and such of them as have spent their time in well-bred company, show us, that this plain natural way, without the least study or knowledge of grammar, can carry them to a great degree of elegancy and politeness in their language: and there are ladies who, without knowing what tenses and participles, adverbs and prepositions are, speak as properly, and as correctly, (they might take it for an ill compliment, if I said as any country school-master,) as most gentlemen who have been bred up in the ordinary methods of grammar-schools. Grammar therefore we see may be spared in some cases. The question then will be, To whom should it be taught, and when? To this I answer,

Men learn languages for the ordinary intercourse of society, and communication of thoughts in common life, without any farther design in

their use of them. And for this purpose the original way of learning a language by conversation not only serves well enough, but is to be preferred, as the most expedite, proper, and natural. Therefore to this use of language one may answer, that grammar is not necessary. This so many of my readers must be forced to allow, as understand what I here say, and who, conversing with others, understand them without having ever been taught the grammar of the English tongue: which I suppose is the case of incomparably the greatest part of Englishmen; of whom I have never yet known any one who learned his mother-tongue by rules.

Others there are, the greatest part of whose business in this world is to be done with their tongues, and with their pens; and to those it is convenient, if not necessary, that they should speak properly and correctly, whereby they may let their thoughts into other men's minds, the more easily, and with the greater impression. Upon this account it is, that any sort of speaking, so as will make him be understood, is not thought enough for a gentleman. He ought to study grammar, amongst the other helps of speaking well; but it must be the grammar of his own tongue, of the language he uses, that he may understand his own country speech nicely, and speak it properly, without shocking the ears of those it is addressed to with solecisms and offensive irregularities. And to this purpose grammar is necessary: but it is the grammar only of their own proper tongues, and to those only who would take pains in cultivating their language, and in perfecting their styles. Whether all gentlemen should not do this, I leave to be considered, since the want of propriety, and grammatical exactness, is thought very misbecoming one of that rank, and usually draws on one guilty of such faults the censure of having had a lower breeding, and worse company, than suits with his quality. If this be so, (as I suppose it is,) it will be matter of wonder, why young gentlemen are forced to learn the grammars of foreign and dead languages, and are never once told of the grammar of their own tongues: they do not so much as know there is any such thing, much less is it made their business to be instructed in it. Nor is their own language ever proposed to them as worthy their care and cultivating, though they have daily use of it, and are not seldom in the future course of their lives judged of, by their handsome or awkward way of expressing themselves in it. Whereas the languages whose grammars they have been so much employed in, are such as probably they shall scarce ever speak or write; or, if upon occasion this should happen, they shall be excused for the mistakes and faults they make

in it. Would not a Chinese, who took notice of this way of breeding, be apt to imagine, that all our young gentlemen were designed to be teachers and professors of the dead languages of foreign countries, and not to be men of business in their own?

There is a third sort of men, who applying themselves to two or three foreign, dead (and which amongst us are called the learned) languages, make them their study, and pique themselves upon their skill in them. No doubt those who propose to themselves the learning of any language with this view, and would be critically exact in it, ought carefully to study the grammar of it. I would not be mistaken here, as if this were to undervalue Greek and Latin: I grant these are languages of great use and excellency; and a man can have no place amongst the learned, in this part of the world, who is a stranger to them. But the knowledge a gentleman would ordinarily draw for his use, out of the Roman and Greek writers, I think he may attain without studying the grammars of those tongues, and, by bare reading, may come to understand them sufficiently for all his purposes. How much farther he shall at any time be concerned to look into the grammar and critical niceties of either of these tongues, he himself will be able to determine, when he comes to propose to himself the study of any thing that shall require it. Which brings me to the other part of the inquiry, viz.

“When grammar should be taught?”

To which upon the premised grounds, the answer is obvious, viz.

That, if grammar ought to be taught at any time, it must be to one that can speak the language already: how else can he be taught the grammar of it? This, at least, is evident from the practice of the wise and learned nations amongst the ancients. They made it a part of education to cultivate their own, not foreign tongues. The Greeks counted all other nations barbarous, and had a contempt for their languages. And, though the Greek learning grew in credit amongst the Romans, towards the end of their commonwealth, yet it was the Roman tongue that was made the study of their youth: their own language they were to make use of, and therefore it was their own language they were instructed and exercised in.

But more particularly to determine the proper season for grammar; I do not see how it can reasonably be made any one's study, but as an introduction to rhetoric: when it is thought time to put any one upon the care of polishing his tongue, and of speaking better than the illiterate, then is the time for him to be instructed in the rules of grammar, and not before.

For grammar being to teach men not to speak, but to speak correctly, and according to the exact rules of the tongue, which is one part of elegancy, there is little use of the one to him that has no need of the other; where rhetoric is not necessary, grammar may be spared. I know not why any one should waste his time, and beat his head about the Latin grammar, who does not intend to be a critic, or make speeches, and write dispatches in it. When any one finds in himself a necessity or disposition to study any foreign language to the bottom, and to be nicely exact in the knowledge of it, it will be time enough to take a grammatical survey of it. If his use of it be only to understand some books writ in it, without a critical knowledge of the tongue itself, reading alone, as I have said, will attain this end, without charging the mind with multiplied rules and intricacies of grammar.

§ 169. For the exercise of his writing, let him sometimes translate Latin into English: but the learning of Latin being nothing but the learning of words, a very unpleasant business both to young and old, join as much other real knowledge with it as you can, beginning still with that which lies most obvious to the senses; such as is the knowledge of minerals, plants, and animals, and particularly timber and fruit-trees, their parts and ways of propagation, wherein a great deal may be taught a child, which will not be useless to the man: but more especially geography, astronomy, and anatomy. But, whatever you are teaching him, have a care still, that you do not clog him with too much at once; or make any thing his business but downright virtue, or reprove him for any thing but vice, or some apparent tendency to it.

§ 170. But if, after all, his fate be to go to school to get the Latin tongue, it will be in vain to talk to you concerning the method I think best to be observed in schools. You must submit to that you find there, not expect to have it changed for your son; but yet by all means obtain, if you can, that he be not employed in making Latin themesThemes. and declamations, and, least of all, verses of any kind. You may insist on it, if it will do any good, that you have no design to make him either a Latin orator or poet, but barely would have him understand perfectly a Latin author; and that you observe those who teach any of the modern languages, and that with success, never amuse their scholars to make speeches or verses either in French or Italian, their business being language barely, and not invention.

§ 171. But to tell you, a little more fully, why I would not have him exercised in making of themes and verses: 1. As to themes, they have, I

confess, the pretence of something useful, which is to teach people to speak handsomely and well on any subject; which, if it could be attained this way, I own would be a great advantage; there being nothing more becoming a gentleman, nor more useful in all the occurrences of life, than to be able, on any occasion, to speak well, and to the purpose. But this I say, that the making of themes, as is usual in schools, helps not one jot towards it; for do but consider what it is in making a theme that a young lad is employed about; it is to make a speech on some Latin saying, as “*Omnia vincit amor,*” or “*Non licet in bello bis peccare,*” &c. And here the poor lad, who wants knowledge of those things he is to speak of, which is to be had only from time and observation, must set his invention on the rack, to say something where he knows nothing, which is a sort of *Ægyptian* tyranny, to bid them make bricks who have not yet any of the materials. And therefore it is usual, in such cases, for the poor children to go to those of higher forms with this petition, “*Pray give me a little sense;*” which, whether it be more reasonable or more ridiculous, is not easy to determine. Before a man can be in any capacity to speak on any subject, it is necessary he be acquainted with it; or else it is as foolish to set him to discourse of it, as to set a blind man to talk of colours, or a deaf man of music. And would you not think him a little cracked who would require another to make an argument on a moot point, who understands nothing of our laws? And what, I pray, do school-boys understand concerning those matters, which are used to be proposed to them in their themes, as subjects to discourse on, to whet and exercise their fancies?

§ 172. In the next place, consider the language that their themes are made in: it is Latin, a language foreign in their country, and long since dead every-where; a language which your son, it is a thousand to one, shall never have an occasion once to make a speech in as long as he lives, after he comes to be a man; and a language wherein the manner of expressing one’s self is so far different from ours, that to be perfect in that, would very little improve the purity and facility of his English style. Besides that, there is now so little room or use for set speeches in our own language in any part of our English business, that I can see no pretence for this sort of exercise in our schools; unless it can be supposed, that the making of set Latin speeches should be the way to teach men to speak well in English extempore. The way to that I should think rather to be this: that there should be proposed to young gentlemen rational and useful questions, suited to their age and

capacities, and on subjects not wholly unknown to them, nor out of their way: such as these, when they are ripe for exercises of this nature, they should, extempore, or after a little meditation upon the spot, speak to, without penning of any thing. For I ask, if he will examine the effects of this way of learning to speak well, who speak best in any business, when occasion calls them to it upon any debate; either those who have accustomed themselves to compose and write down before-hand what they would say; or those, who thinking only of the matter to understand that as well as they can, use themselves only to speak extempore? And he that shall judge by this, will be little apt to think, that the accustoming him to study speeches, and set compositions, is the way to fit a young gentleman for business.

§ 173. But perhaps we shall be told, it is to improve and perfect them in the Latin tongue. It is true, that is their proper business at school; but the making of themes is not the way to it: that perplexes their brains, about invention of things to be said, not about the signification of words to be learnt; and, when they are making a theme, it is thoughts they search and sweat for, and not language. But the learning and mastery of a tongue, being uneasy and unpleasant enough in itself, should not be cumbered with any other difficulties, as is done in this way of proceeding. In fine, if boys invention be to be quickened by such exercise, let them make themes in English, where they have facility, and a command of words, and will better see what kind of thoughts they have, when put into their own language: and, if the Latin tongue be to be learned, let it be done in the easiest way, without toiling and disgusting the mind by so uneasy an employment as that of making speeches joined to it.

§ 174. If these may be any reasons against children's making Latin themes at school, I have much more to say, and of more weight, against their making versesVerses. of any sort, for, if he has no genius to poetry, it is the most unreasonable thing in the world to torment a child, and waste his time about that which can never succeed; and if he have a poetic vein, it is to me the strangest thing in the world, that the father should desire or suffer it to be cherished or improved. Methinks the parents should labour to have it stifled and suppressed as much as may be; and I know not what reason a father can have to wish his son a poet, who does not desire to have him bid defiance to all other callings and business; which is not yet the worst of the case; for if he proves a successful rhymers, and gets once the reputation of a

wit, I desire it may be considered, what company and places he is like to spend his time in, nay, and estate too: for it is very seldom seen, that any one discovers mines of gold or silver in Parnassus. It is a pleasant air, but a barren soil; and there are very few instances of those who have added to their patrimony by any thing they have reaped from thence. Poetry and gaming, which usually go together, are alike in this too, that they seldom bring any advantage, but to those who have nothing else to live on. Men of estates almost constantly go away losers; and it is well if they escape at a cheaper rate than their whole estates, or the greatest part of them. If therefore you would not have your son the fiddle to every jovial company, without whom the sparks could not relish their wine, nor know how to pass an afternoon idly; if you would not have him waste his time and estate to divert others, and condemn the dirty acres left him by his ancestors, I do not think you will much care he should be a poet, or that his school-master should enter him in versifying. But yet, if any one will think poetry a desirable quality in his son, and that the study of it would raise his fancy and parts, he must need yet confess, that, to that end, reading the excellent Greek and Roman poets, is of more use than making bad verses of his own, in a language that is not his own. And he, whose design it is to excel in English poetry, would not, I guess, think the way to it were to make his first essays in Latin verses.

Memoriter. § 175. Another thing, very ordinary in the vulgar method of grammar-schools, there is, of which I see no use at all, unless it be to baulk young lads in the way to learning languages, which, in my opinion, should be made as easy and pleasant as may be; and that which was painful in it, as much as possible, quite removed. That which I mean, and here complain of, is, their being forced to learn by heart great parcels of the authors which are taught them; wherein I can discover no advantage at all, especially to the business they are upon. Languages are to be learnt only by reading and talking, and not by scraps of authors got by heart; which when a man's head is stuffed with, he has got the just furniture of a pedant, and it is the ready way to make him one, than which there is nothing less becoming a gentleman. For what can be more ridiculous, than to mix the rich and handsome thoughts and sayings of others with a deal of poor stuff of his own; which is thereby the more exposed; and has no other grace in it, nor will otherwise recommend the speaker, than a thread-bare russet-coat would that was set off with large patches of scarlet and glittering brocade? Indeed,

where a passage comes in the way, whose matter is worth remembrance, and the expression of it very close and excellent, (as there are many such in the ancient authors,) it may not be amiss to lodge it in the minds of young scholars, and with such admirable strokes of those great masters sometimes exercise the memories of school-boys: but their learning of their lessons by heart, as they happen to fall out in their books without choice or distinction, I know not what it serves for, but to mispend their time and pains, and give them a disgust and aversion to their books, wherein they find nothing but useless trouble.

§ 176. I hear it is said, that children should be employed in getting things by heart, to exercise and improve their memories. I could wish this were said with as much authority of reason, as it is with forwardness of assurance; and that this practice were established upon good observation, more than old custom; for it is evident, that strength of memory is owing to an happy constitution, and not to any habitual improvement got by exercise. It is true, what the mind is intent upon, and for fear of letting it slip, often imprints afresh on itself by frequent reflection, that it is apt to retain, but still according to its own natural strength of retention. An impression made on bees wax or lead will not last so long as on brass or steel. Indeed, if it be renewed often, it may last the longer; but every new reflecting on it is a new impression, and it is from thence one is to reckon, if one would know how long the mind retains it. But the learning pages of Latin by heart, no more fits the memory for retention of any thing else, than the graving of one sentence in lead, makes it the more capable of retaining firmly any other characters. If such a sort of exercise of the memory were able to give it strength, and improve our parts, players of all other people must needs have the best memories, and be the best company; but whether the scraps they have got into their head this way, make them remember other things the better; and whether their parts be improved proportionably to the pains they have taken in getting by heart other sayings; experience will show. Memory is so necessary to all parts and conditions of life, and so little is to be done without it, that we are not to fear it should grow dull and useless for want of exercise, if exercise would make it grow stronger. But I fear this faculty of the mind is not capable of much help and amendment in general, by any exercise or endeavour of ours, at least not by that used upon this pretence in grammar-schools. And if Xerxes was able to call every common soldier by his name, in his army, that consisted of no less than an hundred thousand

men, I think it may be guessed, he got not this wonderful ability by learning his lessons by heart, when he was a boy. This method of exercising and improving the memory by toilsome repetitions, without book, of what they read, is, I think, little used in the education of princes: which, if it had that advantage talked of, should be as little neglected in them, as in the meanest school-boys: princes having as much need of good memories as any men living, and have generally an equal share in this faculty with other men: though it has never been taken care of this way. What the mind is intent upon, and careful of, that it remembers best, and for the reason above mentioned: to which if method and order be joined, all is done, I think, that can be, for the help of a weak memory; and he that will take any other way to do it, especially that of charging it with a train of other people's words, which he that learns cares not for; will, I guess, scarce find the profit answer half the time and pains employed in it.

I do not mean hereby, that there should be no exercise given to children's memories. I think their memories should be employed, but not in learning by rote whole pages out of books, which, the lesson being once said, and that task over, are delivered up again to oblivion, and neglected for ever. This mends neither the memory nor the mind. What they should learn by heart out of authors, I have above mentioned: and such wise and useful sentences, being once given in charge to their memories, they should never be suffered to forget again, but be often called to account for them: whereby, besides the use those sayings may be to them in their future life, as so many good rules and observations; they will be taught to reflect often, and bethink themselves what they have to remember, which is the only way to make the memory quick and useful. The custom of frequent reflection will keep their minds from running adrift, and call their thoughts home from useless inattentive roving: and therefore, I think, it may do well to give them something every day to remember; but something still, that is in itself worth the remembering, and what you would never have out of mind, whenever you call or they themselves search for it. This will oblige them often to turn their thoughts inwards, than which you cannot wish them a better intellectual habit.

§ 177. But under whose care soever a child is put to be taught during the tender and flexible years of his life, this is certain, it should be one who thinks Latin Latin. and language the least part of education; one, who knowing how much virtue, and a well-tempered soul, is to be preferred to

any sort of learning or language, makes it his chief business to form the mind of his scholars and give that a right disposition: which, if once got, though all the rest should be neglected, would, in due time, produce all the rest; and which if it be not got, and settled so as to keep out ill and vicious habits, languages and sciences, and all the other accomplishments of education, will be to no purpose, but to make the worse or more dangerous man. And indeed, whatever stir there is made about getting of Latin, as the great and difficult business; his mother may teach it him herself, if she will but spend two or three hours in a day with him, and make him read the evangelists in Latin to her: for she need but buy a Latin testament, and having got somebody to mark the last syllable but one, where it is long, in words above two syllables, (which is enough to regulate her pronunciation, and accenting the words,) read daily in the gospels, and then let her avoid understanding them in Latin, if she can. And when she understands the evangelists in Latin, let her, in the same manner, read Æsop's fables, and so proceed on to Eutropius, Justin, and other such books. I do not mention this as an imagination of what I fancy may do, but as of a thing I have known done, and the Latin tongue with ease got this way.

But to return to what I was saying: he that takes on him the charge of bringing up young men, especially young gentlemen, should have something more in him than Latin, more than even a knowledge in the liberal sciences; he should be a person of eminent virtue and prudence, and with good sense have good humour, and the skill to carry himself with gravity, ease and kindness, in a constant conversation with his pupils. But of this I have spoken at large in another place.

§ 178. At the same time that he is learning French and Latin, a child, as has been said, may also be entered in arithmetic, geography, Geography. chronology, history, and geometry too. For if these be taught him in French or Latin, when he begins once to understand either of these tongues, he will get a knowledge in these sciences, and the language to-boot.

Geography, I think, should be begun with; for the learning of the figure of the globe, the situation and boundaries of the four parts of the world, and that of particular kingdoms and countries, being only an exercise of the eyes and memory, a child with pleasure will learn and retain them: and this is so certain, that I now live in the house with a child, whom his mother has so well instructed this way in geography, that he knew the limits of the four parts of the world, could readily point, being asked, to any country upon the

globe, or any county in the map of England; knew all the great rivers, promontories, straits, and bays in the world, and could find the longitude and latitude of any place before he was six years old. These things, that he will thus learn by sight, and have by rote in his memory, are not all, I confess, that he is to learn upon the globes. But yet it is a good step and preparation to it, and will make the remainder much easier, when his judgment is grown ripe enough for it: besides that, it gets so much time now, and by the pleasure of knowing things, leads him on insensibly to the gaining of languages.

§ 179. When he has the natural parts of the globe well fixed in his memory, it may then be time to begin arithmetic. By the natural parts of the globe, I mean several positions of the parts of the earth and sea, under different names and distinctions of countries; not coming yet to those artificial and imaginary lines, which have been invented, and are only supposed, for the better improvement of that science.

§ 180. Arithmetic. is the easiest, and consequently the first sort of abstract reasoning, which the mind commonly bears, or accustoms itself to: and is of so general use in all parts of life and business, that scarce any thing is to be done without it. This is certain, a man cannot have too much of it, nor too perfectly; he should therefore begin to be exercised in counting, as soon, and as far, as he is capable of it; and do something in it every day till he is master of the art of numbers. When he understands addition and subtraction, he may then be advanced farther in geography, and after he is acquainted with the poles, zones, parallel circles, and meridians, be taught longitude and latitude, and by them be made to understand the use of maps, and by the numbers placed on their sides, to know the respective situation of countries, and how to find them out on the terrestrial globe. Which when he can readily do, he may then be entered in the celestial; Astronomy. and there going over all the circles again, with a more particular observation of the ecliptic or zodiac, to fix them all very clearly and distinctly in his mind, he may be taught the figure and position of the several constellations, which may be showed him first upon the globe, and then in the heavens.

When that is done, and he knows pretty well the constellations of this our hemisphere, it may be time to give him some notions of this our planetary world, and to that purpose it may not be amiss to make him a draught of the Copernican system; and therein explain to him the situation

of the planets, their respective distances from the sun, the centre of their revolutions. This will prepare him to understand the motion and theory of the planets the most easy and natural way. For, since astronomers no longer doubt of the motion of the planets about the sun, it is fit he should proceed upon that hypothesis, which is not only the simplest and least perplexed for a learner, but also the likeliest to be true in itself. But in this, as in all other parts of instruction, great care must be taken with children, to begin with that which is plain and simple, and to teach them as little as can be at once, and settle that well in their heads, before you proceed to the next, or any thing new in that science. Give them first one simple idea, and see that they take it right, and perfectly comprehend it, before you go any farther; and then add some other simple idea, which lies next in your way to what you aim at; and so proceeding by gentle and insensible steps, children, without confusion and amazement, will have their understandings opened, and their thoughts extended, farther than could have been expected. And when any one has learned any thing himself, there is no such way to fix it in his memory, and to encourage him to go on, as to set him to teach it others.

§ 181. When he has once got such an acquaintance with the globes, as is above mentioned, he may be fit to be tried a little in geometry; Geometry. wherein I think the six first books of Euclid enough for him to be taught. For I am in some doubt whether more to a man of business be necessary or useful; at least if he have a genius or inclination to it, being entered so far by his tutor, he will be able to go on of himself without a teacher.

The globes therefore must be studied, and that diligently, and, I think, may be begun betimes, if the tutor will but be careful to distinguish what the child is capable of knowing, and what not; for which this may be a rule, that perhaps will go a pretty way, (viz.) that children may be taught any thing that falls under their senses, especially their sight, as far as their memories only are exercised; and thus a child very young may learn, which is the æquator, which the meridian, &c. which Europe, and which England, upon the globes, as soon almost as he knows the rooms of the house he lives in; if care be taken not to teach him too much at once, nor to set him upon a new part, till that, which he is upon, be perfectly learned and fixed in his memory.

§ 182. With geography, chronology Chronology. ought to go hand in hand; I mean the general part of it, so that he may have in his mind a view of the whole current of time, and the several considerable epochs that are

made use of in history. Without these two, history, which is the great mistress of prudence and civil knowledge; and ought to be the proper study of a gentleman or man of business in the world: without geography and chronology, I say, history will be very ill retained, and very little useful; but be only a jumble of matters of fact, confusedly heaped together without order or instruction. It is by these two that the actions of mankind are ranked into their proper places of times and countries; under which circumstances, they are not only much easier kept in the memory, but, in that natural order, are only capable to afford those observations, which make a man the better and the abler for reading them.

§ 183. When I speak of chronology as a science he should be perfect in, I do not mean the little controversies that are in it. These are endless, and most of them of so little importance to a gentleman, as not to deserve to be inquired into, were they capable of an easy decision. And therefore all that learned noise and dust of the chronologist is wholly to be avoided. The most useful book I have seen in that part of learning, is a small treatise of Strauchius, which is printed in twelves, under the title of “*Breviarium Chronologicum*,” out of which may be selected all that is necessary to be taught a young gentleman concerning chronology; for all that is in that treatise a learner need not be cumbered with. He has in him the most remarkable or usual epochs reduced all to that of the Julian period, which is the easiest, and plainest, and surest method, that can be made use of in chronology. To this treatise of Strauchius, Helvicus’s tables may be added, as a book to be turned to on all occasions.

§ 184. As nothing teaches, so nothing delights, more than history. History. The first of these recommends it to the study of grown men; the latter makes me think it the fittest for a young lad, who, as soon as he is instructed in chronology, and acquainted with the several epochs in use in this part of the world, and can reduce them to the Julian period, should then have some Latin history put into his hand. The choice should be directed by the easiness of the style; for wherever he begins, chronology will keep it from confusion; and the pleasantness of the subject inviting him to read, the language will insensibly be got, without that terrible vexation and uneasiness which children suffer where they are put into books beyond their capacity, such as are the Roman orators and poets, only to learn the Roman language. When he has by reading mastered the easier, such perhaps as Justin, Eutropius, Quintus Curtius, &c. the next degree to these will give

him no great trouble: and thus, by a gradual progress from the plainest and easiest historians, he may at last come to read the most difficult and sublime of the Latin authors, such as are Tully, Virgil, and Horace.

§ 185. The knowledge of virtue, all along from the beginning, in all the instances he is capable of, being taught him, more by practice than rules; and the love of reputation, instead of satisfying his appetite, being made habitual in him; I know not whether he should read any other discourses of morality, but what he finds in the bible; or have any system of ethics put into his hand, till he can read Tully's Offices, not as a school-boy to learn Latin, but as one that would be informed in the principles and precepts of virtue, for the conduct of his life.

§ 186. When he has pretty well digested Tully's Offices, and added to it "Puffendorf de officio hominis & civis," it may be seasonable to set him upon "Grotius de jure belli & pacis," or, which perhaps is the better of the two, "Puffendorf de jure naturali & gentium," wherein he will be instructed in the natural rights of men, and the original and foundations of society, and the duties resulting from thence. This general part of civil law and history are studies which a gentleman should not barely touch at, but constantly dwell upon, and never have done with. A virtuous and well-behaved young man, that is well versed in the general part of the civil law, (which concerns not the chicane of private cases, but the affairs and intercourse of civilized nations in general, grounded upon principles of reason,) understands Latin well, and can write a good hand, one may turn loose into the world, with great assurance that he will find employment and esteem every-where.

§ 187. It would be strange to suppose an English gentleman should be ignorant of the law of his country. This, whatever station he is in, is so requisite, that, from a justice of the peace to a minister of state, I know no place he can well fill without it. I do not mean the chicane or wrangling and captious part of the law; a gentleman whose business is to seek the true measures of right and wrong, and not the arts how to avoid doing the one, and secure himself in doing the other, ought to be as far from such a study of the law, as he is concerned diligently to apply himself to that wherein he may be serviceable to his country. And to that purpose I think the right way for a gentleman to study our law, which he does not design for his calling, is to take a view of our English constitution and government, in the ancient books of the common law, and some more modern writers, who out of them

have given an account of this government. And having got a true idea of that, then to read our history, and with it join in every king's reign the laws then made. This will give an insight into the reason of our statutes, and show the true ground upon which they came to be made, and what weight they ought to have.

§ 188. Rhetoric and logic. Rhetoric. Logic. being the arts that in the ordinary method usually follow immediately after grammar, it may perhaps be wondered, that I have said so little of them. The reason is, because of the little advantage young people receive by them; for I have seldom or never observed any one to get the skill of reasoning well, or speaking handsomely, by studying those rules which pretend to teach it: and therefore I would have a young gentleman take a view of them in the shortest systems could be found, without dwelling long on the contemplation and study of those formalities. Right reasoning is founded on something else than the predicaments and predicables, and does not consist in talking in mode and figure itself. But it is besides my present business to enlarge upon this speculation. To come therefore to what we have in hand; if you would have your son reason well, let him read Chillingworth; and if you would have him speak well, let him be conversant in Tully, to give him the true idea of eloquence; and let him read those things that are well writ in English, to perfect his style in the purity of our language.

§ 189. If the use and end of right reasoning be to have right notions, and a right judgment of things; to distinguish betwixt truth and falsehood, right and wrong, and to act accordingly; be sure not to let your son be bred up in the art and formality of disputing, either practising it himself, or admiring it in others; unless, instead of an able man, you desire to have him an insignificant wrangler, opiniatre in discourse, and priding himself in contradicting others; or, which is worse, questioning every thing, and thinking there is no such thing as truth to be sought, but only victory, in disputing. There cannot be any thing so disingenuous, so misbecoming a gentleman, or any one who pretends to be a rational creature, as not to yield to plain reason, and the conviction of clear arguments. Is there any thing more inconsistent with civil conversation, and the end of all debate, than not to take an answer, though ever so full and satisfactory; but still to go on with the dispute, as long as equivocal sounds can furnish [a “medius terminus”] a term to wrangle with on the one side, or a distinction on the other? Whether pertinent or impertinent, sense or nonsense, agreeing with,

or contrary to, what he had said before, it matters not. For this, in short, is the way and perfection of logical disputes, that the opponent never takes any answer, nor the respondent ever yields to any argument. This neither of them must do, whatever becomes of truth or knowledge, unless he will pass for a poor baffled wretch, and lie under the disgrace of not being able to maintain whatever he has once affirmed, which is the great aim and glory in disputing. Truth is to be found and supported by a mature and due consideration of things themselves, and not by artificial terms and ways of arguing: these lead not men so much into the discovery of truth, as into a captious and fallacious use of doubtful words, which is the most useless and most offensive way of talking, and such as least suits a gentleman or a lover of truth of any thing in the world.

There can scarce be a greater defect in a gentleman, than not to express himself well, either in writing or speaking. But yet, I think, I may ask my reader, Whether he doth not know a great many, who live upon their estates, and so, with the name, should have the qualities of gentlemen, who cannot so much as tell a story as they should, much less speak clearly and persuasively in any business? This I think not to be so much their fault, as the fault of their education; for I must, without partiality, do my countrymen this right, that where they apply themselves, I see none of their neighbours outgo them. They have been taught rhetoric, but yet never taught how to express themselves handsomely with their tongues, or pens, in the language they are always to use; as if the names of the figures, that embellished the discourses of those who understood the art of speaking, were the very art and skill of speaking well. This, as all other things of practice, is to be learned not by a few or a great many rules given, but by exercise and application, according to good rules, or rather patterns, till habits are got, and a facility of doing it well.

Style. Agreeable hereunto, perhaps it might not be amiss to make children, as soon as they are capable of it, often to tell a story of any thing they know; and to correct at first the most remarkable fault they are guilty of, in their way of putting it together. When that fault is cured, then to show them the next, and so on, till, one after another, all, at least the gross ones, are mended. When they can tell tales pretty well, then it may be time to make them write them. The fables of Æsop, the only book almost that I know fit for children, may afford them matter for this exercise of writing English, as well as for reading and translating, to enter them in the Latin

tongue. When they are got past the faults of grammar, and can join in a continued coherent discourse the several parts of a story, without bald and unhandsome forms of transition (as is usual) often repeated; he that desires to perfect them yet farther in this, which is the first step to speaking well, and needs no invention, may have recourse to Tully; and by putting in practice those rules, which that master of eloquence gives in his first book "De Inventione," § 20. make them know wherein the skill and graces of an handsome narrative, according to the several subjects and designs of it, lie. Of each of which rules fit examples may be found out, and therein they may be shown how others have practised them. The ancient classic authors afford plenty of such examples, which they should be made not only to translate, but have set before them as patterns for their daily imitation.

When they understand how to write English with due connexion, propriety, and order, and are pretty well masters of a tolerable narrative style, they may be advanced to writing of letters; wherein they should not be put upon any strains of wit or compliment, but taught to express their own plain easy sense, without any incoherence, confusion, or roughness. And when they are perfect in this, they may, to raise their thoughts, have set before them the example of Voiture's, for the entertainment of their friends at a distance, with letters of compliment, mirth, raillery, or diversion; and Tully's epistles, as the best pattern, whether for business or conversation. The writing of letters. Letters. has so much to do in all the occurrences of human life, that no gentleman can avoid showing himself in this kind of writing: occasions will daily force him to make this use of his pen, which, besides the consequences, that, in his affairs, his well or ill managing of it often draws after it, always lays him open to a severer examination of his breeding, sense, and abilities, than oral discourses; whose transient faults, dying for the most part with the sound that gives them life, and so not subject to a strict review, more easily escape observation and censure.

Had the methods of education been directed to their right end, one would have thought this, so necessary a part, could not have been neglected, whilst themes and verses in Latin, of no use at all, were, so constantly everywhere, pressed, to the racking of children's inventions beyond their strength, and hindering their cheerful progress in learning the tongues, by unnatural difficulties. But custom has so ordained it, and who dares disobey? And would it not be very unreasonable to require of a learned country school-master (who has all the tropes and figures in Farnaby's

rhetoric at his fingers ends) to teach his scholar to express himself handsomely in English, English. when it appears to be so little his business or thought, that the boy's mother (despised, it is like, a illiterate, for not having read a system of logic and rhetoric) outdoes him in it?

To write and speak correctly, gives a grace, and gains a favourable attention to what one has to say: and, since it is English that an English gentleman will have constant use of, that is the language he should chiefly cultivate, and wherein most care should be taken to polish and perfect his style. To speak or write better Latin than English, may make a man be talked of; but he would find it more to his purpose to express himself well in his own tongue, that he uses every moment, than to have the vain commendation of others for a very insignificant quality. This I find universally neglected, and no care taken any-where to improve young men in their own language, that they may thoroughly understand and be masters of it. If any one among us have a facility or purity more than ordinary in his mother tongue, it is owing to chance, or his genius, or any thing, rather than to his education, or any care of his teacher. To mind what English his pupil speaks or writes, is below the dignity of one bred up amongst Greek and Latin, though he have but little of them himself. These are the learned languages, fit only for learned men to meddle with and teach; English is the language of the illiterate vulgar; though yet we see the policy of some of our neighbours hath not thought it beneath the public care to promote and reward the improvement of their own language. Polishing and enriching their tongue, is no small business amongst them: it hath colleges and stipends appointed it, and there is raised amongst them a great ambition and emulation of writing correctly: and we see what they are come to by it, and how far they have spread one of the worst languages, possibly, in this part of the world, if we look upon it as it was in some few reigns backwards, whatever it be now. The great men amongst the Romans were daily exercising themselves in their own language; and we find yet upon record the names of orators, who taught some of their emperors Latin, though it were their mother-tongue.

It is plain the Greeks were yet more nice in theirs; all other speech was barbarous to them but their own, and no foreign language appears to have been studied or valued amongst that learned and acute people; though it be past doubt, that they borrowed their learning and philosophy from abroad.

I am not here speaking against Greek and Latin; I think they ought to be studied, and the Latin, at least, understood well, by every gentleman. But whatever foreign languages a young man meddles with, (and the more he knows, the better,) that which he should critically study, and labour to get a facility, clearness, and elegancy to express himself in, should be his own, and to this purpose he should daily be exercised in it.

§ 190. Natural philosophy, Natural Philosophy. as a speculative science, I imagine, we have none; and perhaps I may think I have reason to say, we never shall be able to make a science of it. The works of nature are contrived by a wisdom, and operate by ways, too far surpassing our faculties to discover, or capacities to conceive, for us ever to be able to reduce them into a science. Natural philosophy being the knowledge of the principles, properties, and operations of things, as they are in themselves, I imagine there are two parts of it, one comprehending spirits, with their nature and qualities; and the other bodies. The first of these is usually referred to metaphysics: but under what title soever the consideration of spirits comes, I think it ought to go before the study of matter and body, not as a science that can be methodized into a system, and treated of, upon principles of knowledge; but as an enlargement of our minds towards a truer and fuller comprehension of the intellectual world, to which we are led both by reason and revelation. And since the clearest and largest discoveries we have of other spirits, besides God and our own souls, is imparted to us from heaven by revelation, I think the information, that at least young people should have of them, should be taken from that revelation. To this purpose, I conclude, it would be well, if there were made a good history of the Bible for young people to read; wherein if every thing that is fit to be put into it, were laid down in its due order of time, and several things omitted, which are suited only to riper age; that confusion, which is usually produced by promiscuous reading of the scripture, as it lies now bound up in our Bibles, would be avoided; and also this other good obtained, that by reading of it constantly, there would be instilled into the minds of children a notion and belief of spirits, they having so much to do, in all the transactions of that history, which will be a good preparation to the study of bodies. For, without the notion and allowance of spirit, our philosophy will be lame and defective in one main part of it, when it leaves out the contemplation of the most excellent and powerful part of the creation.

§ 191. Of this history of the Bible, I think too it would be well, if there were a short and plain epitome made, containing the chief and most material heads for children to be conversant in, as soon as they can read. This, though it will lead them early into some notion of spirits, yet is not contrary to what I said above, that I would not have children troubled, whilst young, with notions of spirits; whereby my meaning was, that I think it inconvenient, that their yet tender minds should receive early impressions of goblins, spectres, and apparitions, wherewith their maids, and those about them, are apt to fright them into a compliance of their orders, which often proves a great inconvenience to them all their lives after, by subjecting their minds to frights, fearful apprehensions, weakness, and superstition: which, when coming abroad into the world and conversation, they grow weary and ashamed of; it not seldom happens, that to make, as they think, a thorough cure, and ease themselves of a load, which has sat so heavy on them, they throw away the thoughts of all spirits together, and so run into the other, but worse extreme.

§ 192. The reason why I would have this premised to the study of bodies, and the doctrine of the scriptures well imbibed, before young men be entered in natural philosophy, is, because matter being a thing that all our senses are constantly conversant with, it is so apt to possess the mind, and exclude all other beings but matter, that prejudice, grounded on such principles, often leaves no room for the admittance of spirits, or the allowing any such things as immaterial beings, “in rerum naturâ;” when yet it is evident, that by mere matter and motion, none of the great phænomena of nature can be resolved: to instance but in that common one of gravity, which I think impossible to be explained by any natural operation of matter, or any other law of motion, but the positive will of a superior Being so ordering it. And therefore since the deluge cannot be well explained, without admitting something out of the ordinary course of nature, I propose it to be considered, whether God’s altering the centre of gravity in the earth for a time (a thing as intelligible as gravity itself, which perhaps a little variation of causes, unknown to us, would produce) will not more easily account for Noah’s flood, than any hypothesis yet made use of, to solve it. I hear the great objection to this is, that it would produce but a partial deluge. But the alteration of the centre of gravity once allowed, it is no hard matter to conceive, that the divine power might make the centre of gravity, placed at a due distance from the centre of the earth, move round it in a convenient

space of time; whereby the flood would become universal, and, as I think, answer all the phænomena of the deluge, as delivered by Moses, at an easier rate than those many hard suppositions that are made use of, to explain it. But this is not a place for that argument, which is here only mentioned by the by, to show the necessity of having recourse to something beyond bare matter, and its motion, in the explication of nature: to which the notions of spirits, and their power, as delivered in the bible, where so much is attributed to their operation, may be a fit preparative; reserving to a fitter opportunity a fuller explication of this hypothesis, and the application of it to all the parts of the deluge, and any difficulties that can be supposed in the history of the flood, as recorded in the scripture.

§ 193. But to return to the study of natural philosophy: though the world be full of systems of it, yet I cannot say, I know any one which can be taught a young man as a science, wherein he may be sure to find truth and certainty, which is what all sciences give an expectation of. I do not hence conclude, that none of them are to be read: it is necessary for a gentleman, in this learned age, to look into some of them to fit himself for conversation: but whether that of Des Cartes be put into his hands, as that which is the most in fashion, or it be thought fit to give him a short view of that and several others also; I think the systems of natural philosophy, that have obtained in this part of the world, are to be read more to know the hypotheses, and to understand the terms and ways of talking of the several sects, than with hopes to gain thereby a comprehensive scientific and satisfactory knowledge of the works of nature: only this may be said, that the modern corpuscularians talk, in most things, more intelligibly than the peripatetics, who possessed the schools immediately before them. He that would look farther back, and acquaint himself with the several opinions of the ancients, may consult Dr. Cudworth's Intellectual System: wherein that very learned author hath, with such accurateness and judgment, collected and explained the opinions of the Greek philosophers, that what principles they built on, and what were the chief hypotheses that divided them, is better to be seen in him, than any where else that I know. But I would not deter any one from the study of nature, because all the knowledge we have, or possibly can have of it, cannot be brought into a science. There are very many things in it, that are convenient and necessary to be known to a gentleman; and a great many other, that will abundantly reward the pains of the curious with delight and advantage. But these, I think, are rather to be

found amongst such writers, as have employed themselves in making rational experiments and observations, than in starting barely speculative systems. Such writings, therefore, as many of Mr. Boyle's are, with others that have writ of husbandry, planting, gardening, and the like, may be fit for a gentleman, when he has a little acquainted himself with some of the systems of natural philosophy in fashion.

§ 194. Though the systems of physics, that I have met with, afford little encouragement to look for certainty, or science, in any treatise, which shall pretend to give us a body of natural philosophy from the first principles of bodies in general; yet the incomparable Mr. Newton has shown, how far mathematics, applied to some parts of nature, may, upon principles that matter of fact justify, carry us in the knowledge of some, as I may so call them, particular provinces of the incomprehensible universe. And if others could give us so good and clear an account of other parts of nature, as he has of this our planetary world, and the most considerable phænomena observable in it, in his admirable book "*Philosophiæ naturalis principia mathematica*," we might in time hope to be furnished with more true and certain knowledge in several parts of this stupendous machine, than hitherto we could have expected. And though there are very few that have mathematics enough to understand his demonstrations; yet the most accurate mathematicians, who have examined them, allowing them to be such, his book will deserve to be read, and give no small light and pleasure to those, who, willing to understand the motions, properties, and operations of the great masses of matter in this our solar system, will but carefully mind his conclusions, which may be depended on as propositions well proved.

§ 195. This is, in short, what I have thought concerning a young gentleman's studies; wherein it will possibly be wondered, that I should omit Greek, Greek. since amongst the Grecians is to be found the original, as it were, and foundation of all that learning which we have in this part of the world. I grant it so; and will add, that no man can pass for a scholar, that is ignorant of the Greek tongue. But I am not here considering the education of a professed scholar, but of a gentleman, to whom Latin and French, as the world now goes, is by every one acknowledged to be necessary. When he comes to be a man, if he has a mind to carry his studies farther, and look into the Greek learning, he will then easily get that tongue himself; and if he has not that inclination, his learning of it under a tutor, will be but lost

labour, and much of his time and pains spent in that, which will be neglected and thrown away as soon as he is at liberty. For how many are there of an hundred, even amongst scholars themselves, who retain the Greek they carried from school; or ever improve it to a familiar reading and perfect understanding of Greek authors?

To conclude this part, which concerns a young gentleman's studies; his tutor should remember, that his business is not so much to teach him all that is knowable, as to raise in him a love and esteem of knowledge; and to put him in the right way of knowing and improving himself, when he has a mind to it.

The thoughts of a judicious author on the subject of languages, I shall here give the reader, as near as I can, in his own way of expressing them. He says, "One can scarce burden children too much with the knowledge of languages. They are useful to men of all conditions, and they equally open them the entrance, either to the most profound, or the more easy and entertaining parts of learning. If this irksome study be put off to a little more advanced age, young men either have not resolution enough to apply to it out of choice, or steadiness to carry it on. And if any one has the gift of perseverance, it is not without the inconvenience of spending that time upon languages, which is destined to other uses: and he confines to the study of words that age of his life that is above it, and requires things; at least, it is losing the best and beautifullest season of one's life. This large foundation of languages cannot be well laid, but when every thing makes an easy and deep impression on the mind; when the memory is fresh, ready, and tenacious; when the head and heart are as yet free from cares, passions, and designs; and those, on whom the child depends, have authority enough to keep him close to a long-continued application. I am persuaded that the small number of truly learned, and the multitude of superficial pretenders, is owing to the neglect of this."

I think every body will agree with this observing gentleman, that languages are the proper study of our first years. But it is to be considered by the parents and tutors, what tongues it is fit the child should learn. For it must be confessed, that it is fruitless pains, and loss of time, to learn a language, which in the course of life that he is designed to, he is never like to make use of; or, which one may guess by his temper, he will wholly neglect and lose again, as soon as an approach to manhood, setting him free from a governor, shall put him into the hands of his own inclination; which

is not likely to allot any of his time to the cultivating the learned tongues; or dispose him to mind any other language, but what daily use, or some particular necessity, shall force upon him.

But yet, for the sake of those who are designed to be scholars, I will add, what the same author subjoins, to make good his foregoing remark. It will deserve to be considered by all who desire to be truly learned, and therefore may be a fit rule for tutors to inculcate, and leave with their pupils, to guide their future studies.

“The study, says he, of the original text can never be sufficiently recommended. It is the shortest, surest, and most agreeable way to all sorts of learning. Draw from the spring-head, and take not things at second-hand. Let the writings of the great masters be never laid aside; dwell upon them, settle them in your mind, and cite them upon occasion; make it your business thoroughly to understand them in their full extent, and all their circumstances: acquaint yourself fully with the principles of original authors; bring them to a consistency, and then do you yourself make your deductions. In this state were the first commentators, and do not you rest till you bring yourself to the same. Content not yourself with those borrowed lights, nor guide yourself by their views, but where your own fails you, and leaves you in the dark. Their explications are not yours, and will give you the slip. On the contrary, your own observations are the product of your own mind, where they will abide, and be ready at hand upon all occasions in converse, consultation, and dispute. Lose not the pleasure it is to see that you were not stopped in your reading, but by difficulties that are invincible: where the commentators and scholiasts themselves are at a stand, and have nothing to say; those copious expositors of other places, who, with a vain and pompous overflow of learning, poured out on passages plain and easy in themselves, are very free of their words and pains, where there is no need. Convince yourself fully by thus ordering your studies, that it is nothing but men’s laziness, which hath encouraged pedantry to cram, rather than enrich libraries, and to bury good authors under heaps of notes and commentaries; and you will perceive, that sloth herein hath acted against itself, and its own interest, by multiplying reading and inquiries, and increasing the pains it endeavoured to avoid.”

This, though it may seem to concern none but direct scholars, is of so great moment for the right ordering of their education and studies, that I hope I shall not be blamed for inserting of it here, especially if it be

considered, that it may be of use to gentlemen too, when at any time they have a mind to go deeper than the surface, and get to themselves a solid, satisfactory, and masterly insight in any part of learning.

Order and constancy are said to make the great difference between one man and another; this I am sure, nothing so much clears a learner's way, helps him so much on in it, and makes him go so easy and so far in any enquiry, as a good method. Method. His governor should take pains to make him sensible of this, accustom him to order, and teach him method in all the applications of his thoughts; show him wherein it lies, and the advantages of it; acquaint him with the several sorts of it, either from general to particulars, or from particulars to what is more general; exercise him in both of them; and make him see, in what cases each different method is most proper, and to what ends it best serves.

In history the order of time should govern; in philosophical inquiries, that of nature, which in all progression is to go from the place one is then in, to that which joins and lies next to it; and so it is in the mind, from the knowledge it stands possessed of already, to that which lies next, and is coherent to it; and so on to what it aims at, by the simplest and most uncompounded parts it can divide the matter into. To this purpose, it will be of great use to his pupil to accustom him to distinguish well, that is, to have distinct notions, wherever the mind can find any real difference; but as carefully to avoid distinctions in terms, where he has not distinct and different clear ideas.

§ 196. Besides what is to be had from study and books, there are other accomplishments necessary for a gentleman, to be got by exercise, and to which time is to be allowed, and for which masters must be had.

Dancing. being that which gives graceful motions all the life, and, above all things, manliness and a becoming confidence to young children, I think it cannot be learned too early, after they are once of an age and strength capable of it. But you must be sure to have a good master, that knows, and can teach, what is graceful and becoming, and what gives a freedom and easiness to all the motions of the body. One that teaches not this, is worse than none at all; natural unfashionableness being much better than apish, affected postures; and I think it much more passable to put off the hat, and make a leg, like an honest country gentleman, than like an ill-fashioned dancing master. For, as for the jigging part, and the figures of

dances, I count that little or nothing, farther than as it tends to perfect graceful carriage.

§ 197. Music. is thought to have some affinity with dancing, and a good hand, upon some instruments, is by many people mightily valued. But it wastes so much of a young man's time, to gain but a moderate skill in it; and engages often in such odd company, that many think it much better spared: and I have, amongst men of parts and business, so seldom heard any one commended or esteemed for having an excellency in music, that amongst all those things, that ever came into the list of accomplishments, I think I may give it the last place. Our short lives will not serve us for the attainment of all things; nor can our minds be always intent on something to be learned. The weakness of our constitutions, both of mind and body, requires that we should be often unbent: and he that will make a good use of any part of his life, must allow a large portion of it to recreation. At least this must not be denied to young people, unless, whilst you with too much haste make them old, you have the displeasure to set them in their graves, or a second childhood, sooner than you could wish. And therefore I think, that the time and pains allotted to serious improvements, should be employed about things of most use and consequence, and that too in the methods the most easy and short, that could be at any rate obtained; and perhaps, as I have above said, it would be none of the least secrets of education, to make the exercises in the body and the mind, the recreation one to another. I doubt not but that something might be done in it, by a prudent man, that would well consider the temper and inclination of his pupil. For he that is wearied either with study or dancing, does not desire presently to go to sleep; but to do something else which may divert and delight him. But this must be always remembered, that nothing can come into the account of recreation, that is not done with delight.

§ 198. Fencing, and riding the great horse, are looked upon as so necessary parts of breeding, that it would be thought a great omission to neglect them: the latter of the two being for the most part to be learned only in great towns, is one of the best exercises for health, which is to be had in those places of ease and luxury; and, upon that account, makes a fit part of a young gentleman's employment, during his abode there. And, as far as it conduces to give a man a firm and graceful seat on horseback, and to make him able to teach his horse to stop, and turn quick, and to rest on his haunches, is of use to a gentleman both in peace and war. But whether it be

of moment enough to be made a business of, and deserve to take up more of his time, than should barely for his health be employed, at due intervals, in some such vigorous exercise, I shall leave to the discretion of parents and tutors; who will do well to remember, in all the parts of education, that most time and application is to be bestowed on that, which is like to be the greatest consequence, and frequentest use, in the ordinary course and occurrences of that life the young man is designed for.

§ 199. As for fencing, Fencing. it seems to me a good exercise for health, but dangerous to the life, the confidence of their skill being apt to engage in quarrels those that think they have learned to use their swords. This presumption makes them often more touchy than needs, on points of honour, and slight, or no provocations. Young men in their warm blood are forward to think they have in vain learned to fence, if they never show their skill and courage in a duel; and they seem to have reason. But how many sad tragedies that reason has been the occasion of, the tears of many a mother can witness. A man that cannot fence, will be more careful to keep out of bullies and gamesters company, and will not be half so apt to stand upon punctilios, nor to give affronts, or fiercely justify them when given, which is that which usually makes the quarrel. And when a man is in the field, a moderate skill in fencing rather exposes him to the sword of his enemy, than secures him from it. And certainly a man of courage, who cannot fence at all, and therefore will put all upon one thrust, and not stand parrying, has the odds against a moderate fencer, especially if he has skill in wrestling. And therefore, if any provision be to be made against such accidents, and a man be to prepare his son for duels, I had much rather mine should be a good wrestler, than an ordinary fencer; which is the most a gentleman can attain to in it, unless he will be constantly in the fencing school, and every day exercising. But since fencing, and riding the great-horse, are so generally looked upon as necessary qualifications in the breeding of a gentleman, it will be hard wholly to deny any one of that rank these marks of distinction. I shall leave it therefore to the father, to consider, how far the temper of his son, and the station he is like to be in, will allow or encourage him to comply with fashions, which, having very little to do with civil life, were yet formerly unknown to the most warlike nations; and seem to have added little of force or courage to those who have received them: unless we will think martial skill or prowess have been improved by

duelling, with which fencing came into, and with which, I presume, it will go out of the world.

§ 200. These are my present thoughts concerning learning and accomplishments. The great business of all is virtue and wisdom.

“Nullum numen abest, si sit prudentia.”

Teach him to get a mastery over his inclinations, and submit his appetite to reason. This being obtained, and by constant practice settled into habit, the hardest part of the task is over. To bring a young man to this, I know nothing which so much contributes, as the love of praise and commendation, which should therefore be instilled into him by all arts imaginable. Make his mind as sensible of credit and shame as may be: and when you have done that, you have put a principle into him, which will influence his actions, when you are not by; to which the fear of a little smart of a rod is not comparable; and which will be the proper stock, whereon afterwards to graft the true principles of morality and religion.

§ 201. I have one thing more to add, which as soon as I mention, I shall run the danger of being suspected to have forgot what I am about, and what I have above written concerning education, all tending towards a gentleman's calling, with which a tradeTrade. seems wholly to be inconsistent. And yet, I cannot forbear to say, I would have him learn a trade, a manual trade; nay, two or three, but one more particularly.

§ 202. The busy inclination of children being always to be directed to something that may be useful to them, the advantages proposed from what they are set about may be considered of two kinds; 1. Where the skill itself, that is got by exercise, is worth the having. Thus skill not only in languages, and learned sciences, but in painting, turning, gardening, tempering and working in iron, and all other useful arts, is worth the having. 2. Where the exercise itself, without any consideration, is necessary or useful for health. Knowledge in some things is so necessary to be got by children, whilst they are young, that some part of their time is to be allotted to their improvement in them, though those employments contribute nothing at all to their health: such are reading, and writing, and all other sedentary studies, for the cultivating of the mind, which unavoidably take up a great part of gentlemen's time, quite from their cradles. Other manual arts, which are both got and exercised by labour, do many of them, by that exercise, not only increase our dexterity and skill, but contribute to our health too; especially such as employ us in the open air. In these, then, health and

improvement may be joined together; and of these should some fit ones be chosen, to be made the recreations of one, whose chief business is with books and study. In this choice, the age and inclination of the person is to be considered, and constraint always to be avoided in bringing him to it. For command and force may often create, but can never cure an aversion; and whatever any one is brought to by compulsion, he will leave as soon as he can, and be little profited, and less recreated by, whilst he is at it.

§ 203. That which of all others would please me best, would be a painter, Painting. were there not an argument or two against it, not easy to be answered. First, ill painting is one of the worst things in the world; and to attain a tolerable degree of skill in it, requires too much of a man's time. If he has a natural inclination to it, it will endanger the neglect of all other more useful studies, to give way to that; and if he have no inclination to it, all the time, pains, and money shall be employed in it, will be thrown away to no purpose. Another reason why I am not for painting in a gentleman, is, because it is a sedentary recreation, which more employs the mind than the body. A gentleman's more serious employment, I look on to be study; and when that demands relaxation and refreshment, it should be in some exercise of the body, which unbends the thought, and confirms the health and strength. For these two reasons I am not for painting.

§ 204. In the next place, for a country gentleman, I should propose one, or rather both these; viz. gardening Gardening. or husbandry in general, and working in wood, as a carpenter, joiner, Joiner. or turner; these being fit and healthy recreations for a man of study or business. For since the mind endures not to be constantly employed in the same thing or way; and sedentary or studious men should have some exercise, that at the same time might divert their minds, and employ their bodies; I know none that could do it better for a country gentleman, than these two, the one of them affording him exercise, when the weather or season keeps him from the other. Besides that, by being skilled in the one of them, he will be able to govern and teach his gardener; by the other, contrive and make a great many things both of delight and use: though these I propose not as the chief ends of his labour, but as temptations to it; diversion from his other more serious thoughts and employments, by useful and healthy manual-exercise, being what I chiefly aim at in it.

§ 205. The great men among the ancients understood very well how to reconcile manual labour with affairs of state, and thought it no lessening to

their dignity, to make the one the recreation to the other. That indeed which seems most generally to have employed and diverted their spare hours, was agriculture. Gideon amongst the Jews was taken from threshing, as well as Cincinnatus amongst the Romans, from the plough, to command the armies of their countries against their enemies; and it is plain their dexterous handling of the flail, or the plough, and being good workmen with these tools, did not hinder their skill in arms, nor make them less able in the arts of war or government. They were great captains and statesmen, as well as husbandmen. Cato major, who had with great reputation born all the great offices of the commonwealth, has left us an evidence under his own hand, how much he was versed in country affairs; and, as I remember, Cyrus thought gardening so little beneath the dignity and grandeur of a throne, that he showed Xenophon a large field of fruit-trees, all of his own planting. The records of antiquity, both amongst jews and gentiles, are full of instances of this kind, if it were necessary to recommend useful recreations by examples.

§ 206. Nor let it be thought, that I mistake, when I call these or the like exercises of manual arts, diversions or recreations; Recreation. for recreations is not being idle, (as every one may observe,) but easing the wearied part by change of business: and he that thinks diversion may not lie in hard and painful labour, forgets the early rising, hard riding, heat, cold and hunger of huntsmen, which is yet known to be the constant recreation of men of the greatest condition. Delving, planting, inoculating, or any the like profitable employments, would be no less a diversion, than any of the idle sports in fashion, if men could but be brought to delight in them, which custom and skill in a trade will quickly bring any one to do. And I doubt not but there are to be found those, who, being frequently called to cards, or any other play, by those they could not refuse, have been more tired with these recreations, than with any the most serious employment of life: though the play has been such as they have naturally had no aversion to, and with which they could willingly sometimes divert themselves.

§ 207. Play, wherein persons of condition, especially ladies, waste so much of their time, is a plain instance to me, that men cannot be perfectly idle; they must be doing something. For how else could they sit so many hours toiling at that, which generally gives more vexation than delight to people, whilst they are actually engaged in it? It is certain, gaming leaves no satisfaction behind it to those who reflect when it is over; and it no way

profits either body or mind: as to their estates, if it strike so deep as to concern them, it is a trade then, and not a recreation, wherein few, that have any thing else to live on, thrive; and, at best, a thriving gamester has but a poor trade on it, who fills his pockets at the price of his reputation.

Recreation belongs not to people who are strangers to business, and are not wasted and wearied with the employment of their calling. The skill should be, so to order their time of recreation, that it may relax and refresh the part that has been exercised, and is tired; and yet do something, which, besides the present delight and ease, may produce what will afterwards be profitable. It has been nothing but the vanity and pride of greatness and riches, that has brought unprofitable and dangerous pastimes (as they are called) into fashion, and persuaded people into a belief, that the learning or putting their hands to any thing that was useful, could not be a diversion fit for a gentleman. This has been that which has given cards, dice, and drinking, so much credit in the world; and a great many throw away their spare hours in them, through the prevalency of custom, and want of some better employment to fill up the vacancy of leisure, more than from any real delight is to be found in them. They cannot bear the dead weight of unemployed time lying upon their hands, nor the uneasiness it is to do nothing at all; and having never learned any laudable manual art, wherewith to divert themselves, they have recourse to those foolish or ill ways in use, to help off their time, which a rational man, till corrupted by custom, could find very little pleasure in.

§ 208. I say not this, that I would never have a young gentleman accommodate himself to the innocent diversions in fashion, amongst those of his age and condition. I am so far from having him austere and morose to that degree, that I would persuade him to more than ordinary complaisance for all the gaieties and diversions of those he converses with, and be averse or testy in nothing they should desire of him, that might become a gentleman, and an honest man: though, as to cards and dice, I think the safest and best way is never to learn any play upon them, and so to be incapacitated for those dangerous temptations, and incroaching wasters, of useful time. But allowance being made for idle and jovial conversation, and all fashionable becoming recreations; I say, a young man will have time enough, from his serious and main business, to learn almost any trade. Trade. It is for want of application, and not of leisure, that men are not skilful in more arts than one; and an hour in a day, constantly employed in

such a way of diversion, will carry a man in a short time a great deal farther than he can imagine: which, if it were of no other use but to drive the common, vicious, useless, and dangerous pastimes out of fashion, and to show there was no need of them, would deserve to be encouraged. If men from their youth were weaned from that sauntering humour, wherein some, out of custom, let a good part of their lives run uselessly away, without either business or recreation; they would find time enough to acquire dexterity and skill in hundreds of things, which, though remote from their proper callings, would not at all interfere with them. And therefore, I think, for this, as well as other reasons before mentioned, a lazy, listless humour, that idly dreams away the days, is of all others the least to be indulged, or permitted in young people. It is the proper state of one sick, and out of order in his health, and is tolerable in nobody else, of what age or condition soever.

§ 209. To the arts above mentioned may be added perfuming, varnishing, graving, and several sorts of working in iron, brass, and silver: and if, as it happens to most young gentlemen, that a considerable part of his time be spent in a great town, he may learn to cut, polish, and set precious stones, or employ himself in grinding and polishing optical glasses. Amongst the great variety there is of ingenious manual arts, it will be impossible that no one should be found to please and delight him, unless he be either idle or debauched, which is not to be supposed in a right way of education. And since he cannot always be employed in study, reading, and conversation, there will be many an hour, besides what his exercises will take up, which, if not spent this way, will be spent worse. For, I conclude, a young man will seldom desire to sit perfectly still and idle; or if he does, it is a fault that ought to be mended.

§ 210. But if his mistaken parents, frightened with the disgraceful names of mechanic and trade, shall have an aversion to any thing of this kind in their children; yet there is one thing relating to trade, which, when they consider, they will think absolutely necessary for their sons to learn.

Merchants accounts, Merchants accounts. though a science not likely to help a gentleman to get an estate, yet possibly there is not any thing of more use and efficacy to make him preserve the estate he has. It is seldom observed, that he who keeps an account of his income and expences, and thereby has constantly under view the course of his domestic affairs, lets them run to ruin; and I doubt not but many a man gets behind-hand, before

he is aware, or runs further on, when he is once in, for want of this care, or the skill to do it. I would therefore advise all gentlemen to learn perfectly merchants accounts, and not to think it is a skill that belongs not to them, because it has received its name from, and has been chiefly practised by, men of traffic.

§ 211. When my young master has once got the skill of keeping accounts, (which is a business of reason more than arithmetic) perhaps it will not be amiss, that his father from thenceforth require him to do it in all his concernments. Not that I would have him set down every pint of wine, or play, that costs him money; the general name of expences will serve for such things well enough: nor would I have his father look so narrowly into these accounts, as to take occasion from thence to criticise on his expences. He must remember, that he himself was once a young man, and not forget the thoughts he had then, nor the right his son has to have the same, and to have allowance made for them. If therefore I would have the young gentleman obliged to keep an account, it is not at all to have that way a check upon his expences, (for what the father allows him, he ought to let him be fully master of,) but only, that he might be brought early into the custom of doing it, and that it might be made familiar and habitual to him betimes, which will be so useful and necessary to be constantly practised through the whole course of his life. A noble Venetian, whose son wallowed in the plenty of his father's riches, finding his son's expences grow very high and extravagant, ordered his cashier to let him have, for the future, no more money than what he should count when he received it. This one would think no great restraint to a young gentleman's expences, who could freely have as much money as he would tell. But yet this, to one who was used to nothing but the pursuit of his pleasures, proved a very great trouble, which at last ended in this sober and advantageous reflection: "If it be so much pains to me, barely to count the money I would spend; what labour and pains did it cost my ancestors, not only to count, but get it?" This rational thought, suggested by this little pains imposed upon him, wrought so effectually upon his mind, that it made him take up, and from that time forwards prove a good husband. This at least every body must allow, that nothing is likelier to keep a man within compass, than the having constantly before his eyes the state of his affairs, in a regular course of account.

§ 212. The last part usually in education, is travel, Travel. which is commonly thought to finish the work, and complete the gentleman. I

confess, travel into foreign countries has great advantages; but the time usually chosen to send young men abroad, is, I think, of all other, that which renders them least capable of reaping those advantages. Those which are proposed, as to the main of them, may be reduced to these two: first, language; secondly, an improvement in wisdom and prudence, by seeing men, and conversing with people of tempers, customs, and ways of living, different from one another, and especially from those of his parish and neighbourhood. But from sixteen to one-and-twenty, which is the ordinary time of travel, men are, of all their lives, the least suited to these improvements. The first season to get foreign languages, and form the tongue to their true accents, I should think, should be from seven to fourteen or sixteen; and then too a tutor with them is useful and necessary, who may with those languages, teach them other things. But to put them out of their parents view, at a great distance, under a governor, when they think themselves too much men to be governed by others, and yet have not prudence and experience enough to govern themselves: what is it but to expose them to all the greatest dangers of their whole life, when they have the least fence and guard against them? Till that boiling boisterous part of life comes on, it may be hoped the tutor may have some authority; neither the stubbornness of age, nor the temptation or examples of others can take him from his tutor's conduct, till fifteen or sixteen: but then, when he begins to consort himself with men, and thinks himself one; when he comes to relish, and pride himself in, manly vices, and thinks it a shame to be any longer under the control and conduct of another: what can be hoped from even the most careful and discreet governor, when neither he has power to compel, nor his pupil a disposition to be persuaded; but, on the contrary, has the advice of warm blood, and prevailing fashion, to hearken to the temptations of his companions, just as wise as himself, rather than to the persuasions of his tutor, who is now looked on as the enemy to his freedom? And when is a man so like to miscarry, as when at the same time he is both raw and unruly? This is the season of all his life, that most requires the eye and authority of his parents and friends, to govern it. The flexibleness of the former part of a man's age, not yet grown up to be headstrong, makes it more governable and safe; and, in the after-part, reason and foresight begin a little to take place, and mind a man of his safety and improvement. The time therefore I should think the fittest for a young gentleman to be sent abroad, would be, either when he is younger, under a tutor, whom he might

be the better for; or when he is some years older, without a governor; when he is of age to govern himself, and make observations of what he finds in other countries worthy his notice, and that might be of use to him after his return: and when too, being thoroughly acquainted with the laws and fashions, the natural and moral advantages and defects of his own country, he has something to exchange with those abroad, from whose conversation he hoped to reap any knowledge.

§ 213. The ordering of travel otherwise, is that, I imagine, which makes so many young gentlemen come back so little improved by it. And if they do bring home with them any knowledge of the places and people they have seen, it is often an admiration of the worst and vainest practices they met with abroad; retaining a relish and memory of those things, wherein their liberty took its first swing, rather than of what should make them better and wiser after their return. And indeed, how can it be otherwise, going abroad at the age they do, under the care of another, who is to provide their necessities, and make their observations for them? Thus, under the shelter and pretence of a governor, thinking themselves excused from standing upon their own legs, or being accountable for their own conduct, they very seldom trouble themselves with inquiries, or making useful observations of their own. Their thoughts run after play and pleasure, wherein they take it as a lessening to be controlled; but seldom trouble themselves to examine the designs, observe the address, and consider the arts, tempers, and inclinations of men they meet with; that so they may know how to comport themselves towards them. Here he that travels with them, is to skreen them, get them out, when they have run themselves into the briars; and in all their miscarriages be answerable for them.

§ 214. I confess, the knowledge of men is so great a skill, that it is not to be expected a young man should presently be perfect in it. But yet his going abroad is to little purpose, if travel does not sometimes open his eyes, make him cautious and wary, and accustom him to look beyond the outside, and, under the inoffensive guard of a civil and obliging carriage, keep himself free and safe in his conversation with strangers, and all sorts of people, without forfeiting their good opinion. He that is sent out to travel at the age, and with the thoughts, of a man designing to improve himself, may get into the conversation and acquaintance of persons of condition where he comes: which, though a thing of most advantage to a gentleman that travels; yet I ask, among our young men that go abroad under tutors, What one is there of

an hundred, that ever visits any person of quality? much less makes an acquaintance with such, from whose conversation he may learn what is good breeding in that country, and what is worth observation in it; though from such persons it is, one may learn more in one day, than in a year's rambling from one inn to another. Nor indeed is it to be wondered; for men of worth and parts will not easily admit the familiarity of boys, who yet need the care of a tutor: though a young gentleman and stranger, appearing like a man, and showing a desire to inform himself in the customs, manners, laws, and government of the country he is in, will find welcome assistance and entertainment amongst the best and most knowing persons everywhere, who will be ready to receive, encourage, and countenance any ingenious and inquisitive foreigner.

§ 215. This, how true soever it be, will not, I fear, alter the custom, which has cast the time of travel upon the worst part of a man's life; but for reasons not taken from their improvement. The young lad must not be ventured abroad at eight or ten, for fear of what may happen to the tender child, though he then runs ten times less risque than at sixteen or eighteen. Nor must he stay at home till that dangerous heady age be over, because he must be back again by one-and-twenty, to marry and propagate. The father cannot stay any longer for the portion, nor the mother for a new set of babies to play with: and so my young master, whatever comes on it, must have a wife looked out for him, by that time he is of age; though it would be no prejudice to his strength, his parts, or his issue, if it were respited for some time, and he had leave to get, in years and knowledge, the start a little of his children, who are often found to tread too near upon the heels of their fathers, to the no great satisfaction either of son or father. But the young gentleman being got within view of matrimony, it is time to leave him to his mistress.

§ 216. Though I am now come to a conclusionConclusion. of what obvious remarks have suggested to me concerning education, I would not have it thought, that I look on it as a just treatise on this subject. There are a thousand other things that may need consideration; especially if one should take in the various tempers, different inclinations, and particular defaults, that are to be found in children; and prescribe proper remedies. The variety is so great, that it would require a volume; nor would that reach it. Each man's mind has some peculiarity, as well as his face, that distinguishes him from all others; and there are possibly scarce two children, who can be

conducted by exactly the same method. Besides that, I think a prince, a nobleman, and an ordinary gentleman's son, should have different ways of breeding. But having had here only some general views in reference to the main end and aims in education, and those designed for a gentleman's son, who being then very little, I considered only as white paper, or wax, to be moulded and fashioned as one pleases; I have touched little more than those heads, which I judged necessary for the breeding of a young gentleman of his condition in general; and have now published these my occasional thoughts, with this hope, that, though this be far from being a complete treatise on this subject, or such as that every one may find what will just fit his child in it; yet it may give some small light to those, whose concern for their dear little ones makes them so irregularly bold, that they dare venture to consult their own reason, in the education of their children, rather than wholly to rely upon old custom.

THE REASONABLENESS OF CHRISTIANITY, AS DELIVERED IN THE SCRIPTURES

THE 1824 TEXT

CONTENTS

THE PREFACE.

THE REASONABLENESS OF CHRISTIANITY, AS DELIVERED IN
THE SCRIPTURES.

THE PREFACE.

The little satisfaction and consistency that is to be found, in most of the systems of divinity I have met with, made me betake myself to the sole reading of the scriptures (to which they all appeal) for the understanding the Christian Religion. What from thence, by an attentive and unbiassed search, I have received, Reader, I here deliver to thee. If by this my labour thou receivest any light, or confirmation in the truth, join with me in thanks to the Father of lights, for his condescension to our understandings. If upon a fair and unprejudiced examination, thou findest I have mistaken the sense and tenour of the Gospel, I beseech thee, as a true Christian, in the spirit of the Gospel, (which is that of charity,) and in the words of sobriety, set me right, in the doctrine of salvation.

THE REASONABLENESS OF CHRISTIANITY, AS DELIVERED IN THE SCRIPTURES.

It is obvious to any one, who reads the New Testament, that the doctrine of redemption, and consequently of the gospel, is founded upon the supposition of Adam's fall. To understand, therefore, what we are restored to by Jesus Christ, we must consider what the scriptures show we lost by Adam. This I thought worthy of a diligent and unbiassed search: since I found the two extremes that men run into on this point, either on the one hand shook the foundations of all religion, or, on the other, made christianity almost nothing: for while some men would have all Adam's posterity doomed to eternal, infinite punishment, for the transgression of Adam, whom millions had never heard of, and no one had authorised to transact for him, or be his representative; this seemed to others so little consistent with the justice or goodness of the great and infinite God, that they thought there was no redemption necessary, and consequently, that there was none; rather than admit of it upon a supposition so derogatory to the honour and attributes of that infinite Being; and so made Jesus Christ nothing but the restorer and preacher of pure natural religion; thereby doing violence to the whole tenour of the New Testament. And, indeed, both sides will be suspected to have trespassed this way, against the written word of God, by any one, who does but take it to be a collection of writings, designed by God, for the instruction of the illiterate bulk of mankind, in the way to salvation; and therefore, generally, and in necessary points, to be understood in the plain direct meaning of the words and phrases: such as they may be supposed to have had in the mouths of the speakers, who used them according to the language of that time and country wherein they lived; without such learned, artificial, and forced senses of them, as are sought out, and put upon them, in most of the systems of divinity, according to the notions that each one has been bred up in.

To one that, thus unbiassed, reads the scriptures, what Adam fell from (is visible) was the state of perfect obedience, which is called justice in the New Testament; though the word, which in the original signifies justice, be translated righteousness: and by this fall he lost paradise, wherein was tranquillity and the tree of life; i. e. he lost bliss and immortality. The

penalty annexed to the breach of the law, with the sentence pronounced by God upon it, show this. The penalty stands thus, Gen. ii. 17, "In the day that thou eatest thereof, thou shalt surely die." How was this executed? He did eat: but, in the day he did eat, he did not actually die; but was turned out of paradise from the tree of life, and shut out for ever from it, lest he should take thereof, and live for ever. This shows, that the state of paradise was a state of immortality, of life without end; which he lost that very day that he eat: his life began from thence to shorten, and waste, and to have an end; and from thence to his actual death, was but like the time of a prisoner, between the sentence passed, and the execution, which was in view and certain. Death then entered, and showed his face, which before was shut out, and not known. So St. Paul, Rom. v. 12, "By one man sin entered into the world, and death by sin;" i. e. a state of death and mortality: and, 1 Cor. xv. 22, "In Adam all die;" i. e. by reason of his transgression, all men are mortal, and come to die.

This is so clear in these cited places, and so much the current of the New Testament, that nobody can deny, but that the doctrine of the gospel is, that death came on all men by Adam's sin; only they differ about the signification of the word death: for some will have it to be a state of guilt, wherein not only he, but all his posterity was so involved, that every one descended of him deserved endless torment, in hell-fire. I shall say nothing more here, how far, in the apprehensions of men, this consists with the justice and goodness of God, having mentioned it above: but it seems a strange way of understanding a law, which requires the plainest and directest words, that by death should be meant eternal life in misery. Could any one be supposed, by a law, that says, "For felony thou shalt die;" not that he should lose his life; but be kept alive in perpetual, exquisite torments? And would any one think himself fairly dealt with, that was so used?

To this, they would have it be also a state of necessary sinning, and provoking God in every action that men do: a yet harder sense of the word death than the other. God says, that "in the day that thou eatest of the forbidden fruit, thou shalt die;" i. e. thou and thy posterity shall be, ever after, incapable of doing any thing, but what shall be sinful and provoking to me and shall justly deserve my wrath and indignation. Could a worthy man be supposed to put such terms upon the obedience of his subjects? Much less can the righteous God be supposed, as a punishment of one sin,

wherewith he is displeased, to put man under the necessity of sinning continually, and so multiplying the provocation. The reason of this strange interpretation, we shall perhaps find, in some mistaken places of the New Testament. I must confess, by death here, I can understand nothing but a ceasing to be, the losing of all actions of life and sense. Such a death came on Adam, and all his posterity, by his first disobedience in paradise; under which death they should have lain for ever, had it not been for the redemption by Jesus Christ. If by death, threatened to Adam, were meant the corruption of human nature in his posterity, 'tis strange, that the New Testament should not any-where take notice of it, and tell us, that corruption seized on all, because of Adam's transgression, as well as it tells us so of death. But, as I remember, every one's sin is charged upon himself only.

Another part of the sentence was, "Cursed is the ground for thy sake: in sorrow shalt thou eat of it all the days of thy life; in the sweat of thy face shall thou eat bread, till thou return unto the ground; for out of it wast thou taken; dust thou art, and to dust shalt thou return," Gen. iii. 17 — 19. This shows, that paradise was a place of bliss, as well as immortality; without drudgery, and without sorrow. But, when man was turned out, he was exposed to the toil, anxiety, and frailties of this mortal life, which should end in the dust, out of which he was made, and to which he should return; and then have no more life or sense, than the dust had, out of which he was made.

As Adam was turned out of paradise, so all his posterity were born out of it, out of the reach of the tree of life; all, like their father Adam, in a state of mortality, void of the tranquility and bliss of paradise. Rom. v. 12, "By one man sin entered into the world, and death by sin." But here will occur the common objection, that so many stumble at: "How doth it consist with the justice and goodness of God, that the posterity of Adam should suffer for his sin; the innocent be punished for the guilty?" Very well, if keeping one from what he has no right to, be called a punishment; the state of immortality, in paradise, is not due to the posterity of Adam, more than to any other creature. Nay, if God afford them a temporary, mortal life, 'tis his gift; they owe it to his bounty; they could not claim it as their right, nor does he injure them when he takes it from them. Had he taken from mankind any thing that was their right, or did he put men in a state of misery, worse than not being, without any fault or demerit of their own; this, indeed, would be hard to reconcile with the notion we have of justice;

and much more with the goodness, and other attributes of the supreme Being, which he has declared of himself; and reason, as well as revelation, must acknowledge to be in him; unless we will confound good and evil, God and Satan. That such a state of extreme, irremediable torment is worse than no being at all; if every one's own sense did not determine against the vain philosophy, and foolish metaphysics of some men; yet our Saviour's peremptory decision, Matt. xxvi. 24, has put it past doubt, that one may be in such an estate, that it had been better for him not to have been born. But that such a temporary life, as we now have, with all its frailties and ordinary miseries, is better than no being, is evident, by the high value we put upon it ourselves. And therefore, though all die in Adam, yet none are truly punished, but for their own deeds. Rom. ii. 6, "God will render to every one," How? "According to his deeds. To those that obey unrighteousness, indignation and wrath, tribulation and anguish, upon every soul of man that doth evil," ver. 9. 2 Cor. v. 10, "We must appear before the judgment seat of Christ, that every one may receive the things done in his body, according to that he has done, whether it be good or bad." And Christ himself, who knew for what he should condemn men at the last day, assures us, in the two places, where he describes his proceeding at the great judgment, that the sentence of condemnation passes only upon the workers of iniquity, such as neglected to fulfil the law in acts of charity, Matt. vii. 23, Luke xiii. 27, Matt. xxv. 41, 42, &c. "And again, John v. 29, our Saviour tells the jews, that all shall come forth of their graves, they that have done good to the resurrection of life; and they that have done evil, unto the resurrection of damnation." But here is no condemnation of any one, for what his forefather Adam had done; which it is not likely should have been omitted, if that should have been a cause why any one was adjudged to the fire, with the devil and his angels. And he tells his disciples, that when he comes again with his angels, in the glory of his Father, that then he will render to every one according to his works, Matt. xvi. 27.

Adam being thus turned out of paradise, and all his posterity born out of it, the consequence of it was, that all men should die, and remain under death for ever, and so be utterly lost.

From this estate of death, Jesus Christ restores all mankind to life; 1 Cor. xv. 22, "As in Adam all die, so in Christ shall all be made alive." How this shall be, the same apostle tells us in the foregoing ver. 21. "By man death came, by man also came the resurrection from the dead." Whereby it

appears, that the life, which Jesus Christ restores to all men, is that life, which they receive again at the resurrection. Then they recover from death, which otherwise all mankind should have continued under, lost for ever; as appears by St. Paul's arguing, 1 Cor. xv. concerning the resurrection.

And thus men are, by the second Adam, restored to life again; that so by Adam's sin they may none of them lose any thing, which by their own righteousness they might have a title to: for righteousness, or an exact obedience to the law, seems, by the scripture, to have a claim of right to eternal life, Rom. iv. 4. "To him that worketh," i. e. does the works of the law, "is the reward not reckoned of grace, but of debt." And Rev. xxii. 14, "Blessed are they who do his commandments, that they may have right to the tree of life, which is in the paradise of God." If any of the posterity of Adam were just, they shall not lose the reward of it, eternal life and bliss, by being his mortal issue: Christ will bring them all to life again; and then they shall be put every one upon his own trial, and receive judgment, as he is found to be righteous, or not. And the righteous, as our Saviour says, Matt. xxv. 46, shall go into eternal life. Nor shall any one miss it, who has done, what our Saviour directed the lawyer, who asked, Luke x. 25, What he should do to inherit eternal life? "Do this," i. e. what is required by the law, "and thou shalt live."

On the other side, it seems the unalterable purpose of the divine justice, that no unrighteous person, no one that is guilty of any breach of the law, should be in paradise: but that the wages of sin should be to every man, as it was to Adam, an exclusion of him out of that happy state of immortality, and bring death upon him. And this is so conformable to the eternal and established law of right and wrong, that it is spoken of too, as if it could not be otherwise. St. James says, chap. i. 15, "Sin, when it is finished, bringeth forth death," as it were, by a natural and necessary production. "Sin entered into the world, and death by sin," says St. Paul, Rom. v. 12: and vi. 23, "The wages of sin is death." Death is the purchase of any, of every sin. Gal. iii. 10, "Cursed is every one, who continueth not in all things which are written in the book of the law to do them." And of this St. James gives a reason, chap. ii. 10, 11, "Whosoever shall keep the whole law, and yet offend in one point, he is guilty of all: for he that said, Do not commit adultery, said also, Do not kill:" i. e. he that offends in any one point, sins against the authority which established the law.

Here then we have the standing and fixed measures of life and death. Immortality and bliss, belong to the righteous; those who have lived in an exact conformity to the law of God, are out of the reach of death; but an exclusion from paradise and loss of immortality is the portion of sinners; of all those who have any way broke that law, and failed of a complete obedience to it, by the guilt of any one transgression. And thus mankind by the law are put upon the issues of life or death, as they are righteous or unrighteous, just, or unjust; i. e. exact performers or transgressors of the law.

But yet, “all having sinned,” Rom. iii. 23, “and come short of the glory of God,” i. e. the kingdom of God in heaven, (which is often called his glory,) “both jews and gentiles;” ver. 22, so that, “by the deeds of the law,” no one could be justified, ver. 20, it follows, that no one could then have eternal life and bliss.

Perhaps, it will be demanded, “Why did God give so hard a law to mankind, that to the apostle’s time no one of Adam’s issue had kept it? As appears by Rom. iii. and Gal. iii. 21, 22.”

Answ. It was such a law as the purity of God’s nature required, and must be the law of such a creature as man; unless God would have made him a rational creature, and not required him to have lived by the law of reason; but would have countenanced in him irregularity and disobedience to that light which he had, and that rule which was suitable to his nature; which would have been to have authorised disorder, confusion, and wickedness in his creatures: for that this law was the law of reason, or as it is called, of nature; we shall see by and by: and if rational creatures will not live up to the rule of their reason, who shall excuse them? If you will admit them to forsake reason in one point, why not in another? Where will you stop? To disobey God in any part of his commands, (and ’tis he that commands what reason does,) is direct rebellion; which, if dispensed with in any point, government and order are at an end; and there can be no bounds set to the lawless exorbitancy of unconfined man. The law therefore was, as St. Paul tells us, Rom. vii. 12, “holy, just, and good,” and such as it ought, and could not otherwise be.

This then being the case, that whoever is guilty of any sin should certainly die, and cease to be; the benefit of life, restored by Christ at the resurrection, would have been no great advantage, (for as much as, here again, death must have seized upon all mankind, because all have sinned;

for the wages of sin is everywhere death, as well after as before the resurrection,) if God had not found out a way to justify some, i. e. so many as obeyed another law, which God gave; which in the New Testament is called “the law of faith,” Rom. iii. 27, and is opposed to “the law of works.” And therefore the punishment of those who would not follow him, was to lose their souls, i. e. their lives, Mark viii. 35 — 38, as is plain, considering the occasion it was spoke on.

The better to understand the law of faith, it will be convenient, in the first place, to consider the law of works. The law of works then, in short, is that law which requires perfect obedience, without any remission or abatement; so that, by that law, a man cannot be just, or justified, without an exact performance of every tittle. Such a perfect obedience, in the New Testament, is termed δικαιοσύνη, which we translate righteousness.

The language of this law is, “Do this and live, transgress and die.” Lev. xviii. 5, “Ye shall keep my statutes and my judgments, which if a man do, he shall live in them.” Ezek. xx. 11, “I gave them my statutes, and showed them my judgments, which if a man do, he shall even live in them. Moses, says St. Paul, Rom. x. 5, describeth the righteousness, which is of the law, that the man, which doth these things, shall live in them.” Gal. iii. 12, “The law is not of faith; but that man, that doth them, shall live in them.” On the other side, transgress and die; no dispensation, no atonement. Ver-10, “Cursed is every one that continueth not in all things which are written in the book of the law to do them.”

Where this law of works was to be found, the New Testament tells us, viz. in the law delivered by Moses, John i. 17, “The law was given by Moses, but grace and truth came by Jesus Christ.” Chap. vii. 19, “Did not Moses give you the law?” says our Saviour, “and yet none of you keep the law.” And this is the law, which he speaks of, where he asks the lawyer, Luke x. 26, “What is written in the law? How readest thou? ver. 28, This do, and thou shalt live.” This is that which St. Paul so often styles the law, without any other distinction, Rom. ii. 13, “Not the hearers of the law are just before God, but the doers of the law are justified.” ’Tis needless to quote any more places; his epistles are full of it, especially this of the Romans.

“But the law given by Moses, being not given to all mankind, how are all men sinners; since, without a law, there is no transgression?” To this the apostle, ver. 14, answers, “For when the gentiles, which have not the law,

do (i. e. find it reasonable to do) by nature the things contained in the law; these, having not the law, are a law unto themselves; which show the work of the law written in their hearts; their consciences also bearing witness, and amongst themselves their thoughts accusing or excusing one another.” By which, and other places in the following chapter, ’tis plain, that under the law of works, is comprehended also the law of nature, knowable by reason, as well as the law given by Moses. For, says St. Paul, Rom. iii. 9, 23, “We have proved both jews and gentiles, that they are all under sin: for all have sinned, and come short of the glory of God:” which they could not do without a law.

Nay, whatever God requires any-where to be done, without making any allowance for faith, that is a part of the law of works: so that forbidding Adam to eat of the tree of knowledge was part of the law of works. Only we must take notice here, that some of God’s positive commands, being for peculiar ends, and suited to particular circumstances of times, places, and persons; have a limited and only temporary obligation by virtue of God’s positive injunction; such as was that part of Moses’s law, which concerned the outward worship or political constitution of the jews; and is called the ceremonial and judicial law, in contradistinction to the moral part of it; which being conformable to the eternal law of right, is of eternal obligation; and therefore remains in force still, under the gospel; nor is abrogated by the law of faith, as St. Paul found some ready to infer, Rom. iii. 31, “Do we then make void the law, through faith? God forbid; yea we establish the law.”

Nor can it be otherwise: for, were there no law of works, there could be no law of faith. For there could be no need of faith, which should be counted to men for righteousness; if there were no law, to be the rule and measure of righteousness, which men failed in their obedience to. Where there is no law, there is no sin; all are righteous equally, with or without faith.

The rule, therefore, of right, is the same that ever it was; the obligation to observe it is also the same: the difference between the law of works, and the law of faith, is only this: that the law of works makes no allowance for failing on any occasion. Those that obey are righteous; those that in any part disobey, are unrighteous, and must not expect life, the reward of righteousness. But, by the law of faith, faith is allowed to supply the defect of full obedience: and so the believers are admitted to life and immortality,

as if they were righteous. Only here we must take notice, that when St. Paul says, that the gospel establishes the law, he means the moral part of the law of Moses; for that he could not mean the ceremonial, or political part of it, is evident, by what I quoted out of him just now, where he says, That the gentiles do, by nature, the things contained in the law, their consciences bearing witness. For the gentiles neither did, nor thought of, the judicial or ceremonial institutions of Moses; 'twas only the moral part their consciences were concerned in. As for the rest, St. Paul tells the Galatians, chap. iv. they are not under that part of the law, which ver. 3, he calls elements of the world; and ver. 9, weak and beggarly elements. And our Saviour himself, in this gospel sermon on the mount, tells them, Matt. v. 17, That, whatever they might think, he was not come to dissolve the law, but to make it more full and strict: for that which is meant by πληρῶσαι is evident from the following part of that chapter, where he gives the precepts in a stricter sense, than they were received in before. But they are all precepts of the moral law, which he re-inforces. What should become of the ritual law, he tells the woman of Samaria, in these words, John iv. 21, 23, "The hour cometh, when you shall, neither in this mountain, nor yet at Jerusalem, worship the Father. But the true worshippers shall worship the Father in spirit and in truth; for the Father seeketh such to worship him."

Thus then, as to the law, in short: the civil and ritual part of the law, delivered by Moses, obliges not christians, though, to the jews, it were a part of the law of works; it being a part of the law of nature, that man ought to obey every positive law of God, whenever he shall please to make any such addition to the law of his nature. But the moral part of Moses's law, or the moral law, (which is every-where the same, the eternal rule of right,) obliges christians, and all men, every-where, and is to all men the standing law of works. But christian believers have the privilege to be under the law of faith too; which is that law, whereby God justifies a man for believing, though by his works he be not just or righteous, i. e. though he come short of perfect obedience to the law of works. God alone does or can justify, or make just, those who by their works are not so: which he doth, by counting their faith for righteousness, i. e. for a complete performance of the law. Rom. iv. 3, "Abraham believed God, and it was counted to him for righteousness." Ver. 5, "To him that believeth on him that justifieth the ungodly, his faith is counted for righteousness." Ver. 6, "Even as David also describeth the blessedness of the man unto whom God imputeth

righteousness without works;" i. e. without a full measure of works, which is exact obedience. Ver. 7, Saying, "Blessed are they whose iniquities are forgiven, and whose sins are covered." Ver. 8, "Blessed is the man, to whom the Lord will not impute sin."

This faith, for which God justified Abraham, what was it? It was the believing God, when he engaged his promise in the covenant he made with him. This will be plain to any one, who considers these places together, Gen. xv. 6, "He believed in the Lord, or believed the Lord." For that the Hebrew phrase, "believing in," signifies no more but believing, is plain from St. Paul's citation of this place, Rom. iv. 3, where he repeats it thus: "Abraham believed God," which he thus explains, ver. 18 — 22, "Who against hope believed in hope, that he might become the father of many nations: according to that which was spoken, So shall thy seed be. And, being not weak in faith, he considered not his own body now dead, when he was about an hundred years old, nor yet the deadness of Sarah's womb. He staggered not at the promise of God, through unbelief; but was strong in faith giving glory to God. And being fully persuaded, that what he had promised he was also able to perform. And therefore it was imputed to him for righteousness." By which it is clear, that the faith which God counted to Abraham for righteousness, was nothing but a firm belief of what God declared to him; and a steadfast relying on him, for the accomplishment of what he had promised.

"Now this," says St. Paul, ver. 23, 24, "was not writ for his [Abraham's] sake alone, but for us also;" teaching us, that as Abraham was justified for his faith, so also ours shall be accounted to us for righteousness, if we believe God, as Abraham believed him. Whereby it is plain is meant the firmness of our faith, without staggering, and not the believing the same propositions that Abraham believed; viz. that though he and Sarah were old, and past the time and hopes of children, yet he should have a son by her, and by him become the father of a great people, which should possess the land of Canaan. This was what Abraham believed, and was counted to him for righteousness. But nobody, I think, will say, that any one's believing this now, shall be imputed to him for righteousness. The law of faith then, in short, is for every one to believe what God requires him to believe, as a condition of the covenant he makes with him: and not to doubt of the performance of his promises. This the apostle intimates in the close here, ver. 24, "But for us also, to whom it shall be imputed, if we believe on him

that raised up Jesus our Lord from the dead.” We must, therefore, examine and see what God requires us to believe now, under the revelation of the gospel; for the belief of one invisible, eternal, omnipotent God, maker of heaven and earth, &c. was required before, as well as now.

What we are now required to believe to obtain eternal life, is plainly set down in the gospel. St. John tells us, John iii. 36, “He that believeth on the Son, hath eternal life; and he that believeth not the Son, shall not see life.” What this believing on him is, we are also told in the next chapter: “The woman said unto him, I know that the Messiah cometh: when he is come, he will tell us all things. Jesus saith unto her, I that speak unto thee, am he. The woman then went into the city, and saith to the men, come see a man that hath told me all things that ever I did: is not this the Messiah? and many of the Samaritans believed on him for the saying of the woman, who testified, he told me all that ever I did. So when the Samaritans were come unto him, many more believed because of his words, and said to the woman, We believe not any longer, because of thy saying; for we have heard ourselves, and we know that this man is truly the Saviour of the world, the Messiah.” John iv. 25, 26, 29, 39, 40, 41, 42.

By which place it is plain, that believing on the Son is the believing that Jesus was the Messiah; giving credit to the miracles he did, and the profession he made of himself. For those who are said to believe on him, for the saying of the woman, ver. 39, tell the woman that they now believed not any longer, because of her saying: but that having heard him themselves, they knew, i. e. believed, past doubt, that he was the Messiah.

This was the great proposition that was then controverted, concerning Jesus of Nazareth, “Whether he was the Messiah or no?” And the assent to that was that which distinguished believers from unbelievers. When many of his disciples had forsaken him, upon his declaring that he was the bread of life, which came down from heaven, “He said to his apostles, Will ye also go away?” Then Simon Peter answered him, “Lord, to whom shall we go? Thou hast the words of eternal life. And we believe, and are sure, that thou art the Messiah, the Son of the living God,” John vi. 69. This was the faith which distinguished them from apostates and unbelievers, and was sufficient to continue them in the rank of apostles: and it was upon the same proposition, “That Jesus was the Messiah, the Son of the living God,” owned by St. Peter, that our Sayiour said, he would build his church, Matt. xvi. 16 — 18.

To convince men of this, he did his miracles; and their assent to, or not assenting to this, made them to be, or not to be, of his church; believers, or not believers: "The jews came round about him, and said unto him, How long dost thou make us doubt? If thou be the Messiah, tell us plainly. Jesus answered them, I told you, and ye believed not: the works that I do in my Father's name, they bear witness of me. But ye believe not, because ye are not of my sheep," John x. 24 — 26. Conformable hereunto, St. John tells us, that "many deceivers are entered into the world, who confess not that Jesus, the Messiah, is come in the flesh. This is a deceiver and an antichrist; whosoever abideth not in the doctrine of the Messiah, has not God. He that abideth in the doctrine of the Messiah," i. e. that Jesus is he, "hath both the Father and the Son," 2 John 7, 9. That this is the meaning of the place, is plain from what he says in his foregoing epistle, "Whosoever believeth that Jesus is the Messiah, is born of God," 1 John v. 1. And therefore, drawing to a close of his gospel, and showing the end for which he writ it, he has these words: "Many other signs truly did Jesus in the presence of his disciples, which are not written in this book: but these are written that ye may believe that Jesus is the Messiah, the Son of God; and that believing, you might have life through his name," John xx. 30, 31. Whereby it is plain, that the gospel was writ to induce men into a belief of this proposition, "That Jesus of Nazareth was the Messiah;" which if they believed, they should have life.

Accordingly the great question among the jews was, whether he were the Messiah or no? and the great point insisted on and promulgated in the gospel, was, that he was the Messiah. The first glad tidings of his birth, brought to the shepherds by an angel, was in these words: "Fear not: for, behold, I bring you good tidings of great joy, which shall be to all people: for to you is born this day, in the city of David, a Saviour, who is the Messiah, the Lord," Luke ii. 11. Our Saviour discoursing with Martha about the means of attaining eternal life, saith to her, John xi. 27, "Whosoever believeth in me, shall never die. Believest thou this? She saith unto him, Yea, Lord, I believe that thou art the Messiah, the Son of God, which should come into the world." This answer of hers sheweth, what it is to believe in Jesus Christ, so as to have eternal life; viz. to believe that he is the Messiah, the son of God, whose coming was foretold by the prophets. And thus Andrew and Philip express it: Andrew says to his brother Simon, "we have found the Messiah, which is, being interpreted, the Christ. Philip saith to Nathanael, we have found him, of whom Moses in the law and the prophets

did write, Jesus of Nazareth, the son of Joseph,” John i. 41, 45. According to what the evangelist says in this place, I have, for the clearer understanding of the scripture, all along put Messiah for Christ: Christ being but the Greek name for the Hebrew Messiah, and both signifying the Anointed.

And that he was the Messiah, was the great truth he took pains to convince his disciples and apostles of; appearing to them after his resurrection: as may be seen, Luke xxiv. which we shall more particularly consider in another place. There we read what gospel our Saviour preached to his disciples and apostles; and that as soon as he was risen from the dead, twice, the very day of his resurrection.

And, if we may gather what was to be believed by all nations from what was preached unto them, we may certainly know what they were commanded, Matt. ult. to teach all nations, by what they actually did teach all nations. We may observe, that the preaching of the apostles every-where in the Acts, tended to this one point, to prove that Jesus was the Messiah. Indeed, now, after his death, his resurrection was also commonly required to be believed, as a necessary article, and sometimes solely insisted on: it being a mark and undoubted evidence of his being the Messiah, and necessary now to be believed by those who would receive him as the Messiah. For since the Messiah was to be a Saviour and a king, and to give life and a kingdom to those who received him, as we shall see by and by; there could have been no pretence to have given him out for the Messiah, and to require men to believe him to be so, who thought him under the power of death, and corruption of the grave. And therefore those who believed him to be the Messiah, must believe that he was risen from the dead: and those who believed him to be risen from the dead, could not doubt of his being the Messiah. But of this more in another place.

Let us see therefore, how the apostles preached Christ, and what they proposed to their hearers to believe. St. Peter at Jerusalem, Acts ii. by his first sermon, converted three thousand souls. What was his word, which, as we are told, ver. 41, “they gladly received, and thereupon were baptized?” That may be seen from ver. 22 to 36. In short, this; which is the conclusion, drawn from all that he had said, and which he presses on them, as the thing they were to believe, viz. “Therefore let all the house of Israel know assuredly, that God hath made that same Jesus, whom ye have crucified, Lord and Messiah,” ver. 36.

To the same purpose was his discourse to the jews, in the temple, Acts iii. the design whereof you have, ver. 18. “But those things that God before had showed, by the mouth of all his prophets, that the Messiah should suffer, he hath so fulfilled.”

In the next chapter, Acts iv. Peter and John being examined, about the miracle on the lame man, profess it to have been done in the name of Jesus of Nazareth, who was the Messiah, in whom alone there was salvation, ver. 10 — 12. The same thing they confirm to them again, Acts v. 29 — 32. “And daily in the temple, and in every house, they ceased not to teach and preach Jesus the Messiah,” ver. 42.

What was Stephen’s speech to the council, Acts vii. but a reprehension to them that they were the betrayers and murderers of the Just One? Which is the title, by which he plainly designs the Messiah whose coming was foreshown by the prophets, ver. 51, 52. And that the Messiah was to be without sin, (which is the import of the word Just,) was the opinion of the jews, appears from John ix. ver. 22, compared with 24.

Act viii. Philip carries the gospel to Samaria: “Then Philip went down to Samaria, and preached to them.” What was it he preached? You have an account of it in this one word, “the Messiah,” ver. 5. This being that alone which was required of them, to believe that Jesus was the Messiah; which when they believed they were baptized. “And when they believed Philip’s preaching the gospel of the kingdom of God, and the name of Jesus the Messiah, they were baptized, both men and women,” ver. 12.

Philip being sent from thence by a special call of the Spirit, to make an eminent convert; out of Isaiah preaches to him Jesus, ver. 35. And what it was he preached concerning Jesus, we may know by the profession of faith the eunuch made, upon which he was admitted to baptism, ver. 37. “I believe that Jesus Christ is the Son of God:” which is as much as to say, I believe that he, whom you call Jesus Christ, is really and truly the Messiah, that was promised. For, that believing him to be the Son of God, and to be the Messiah, was the same thing, may appear, by comparing John i. 45, with ver. 49, where Nathanael owns Jesus to be the Messiah, in these terms: “Thou art the Son of God; thou art the king of Israel.” So the jews, Luke xxii. 70, asking Christ, whether he were the Son of God, plainly demanded of him, whether he were the Messiah? Which is evident, by comparing that with the three preceding verses. They ask him, ver. 67, Whether he were the Messiah? He answers, “If I tell you, you will not believe:” but withal tells

them, that from thenceforth he should be in possession of the kingdom of the Messiah, expressed in these words, ver. 69. "Hereafter shall the Son of Man sit on the right hand of the power of God:" which made them all cry out, "Art thou then the Son of God?" i. e. Dost thou then own thyself to be the Messiah? To which he replies, "Ye say that I am." That the Son of God was the known title of the Messiah at that time, amongst the jews, we may see also from what the jews say to Pilate, John xix. 7. "We have a law, and by our law he ought to die, because he made himself the Son of God;" i. e. by making himself the Messiah, the prophet which was to come, but falsely; and therefore he deserves to die by the law, Deut. xviii. 20. That this was the common signification of the Son of God, is farther evident, from what the chief priests, mocking him, said, when he was on the cross, Matt. xxvii. 42. "He saved others, himself he cannot save: if he be the king of Israel, let him now come down from the cross, and we will believe him. He trusted in God, let him deliver him now, if he will have him; for he said, I am the Son of God;" i. e. He said, he was the Messiah: but 'tis plainly false; for, if he were, God would deliver him: for the Messiah is to be king of Israel, the Saviour of others; but this man cannot save himself. The chief priests mention here the two titles, then in use, whereby the jews commonly designed the Messiah, viz. "Son of God, and king of Israel." That of Son of God was so familiar a compellation of the Messiah, who was then so much expected and talked of, that the Romans, it seems, who lived amongst them, had learned it, as appears from ver. 54. "Now when the centurion and they that were with him, watching Jesus, saw the earthquake, and those things that were done, they feared greatly, saying, truly this was the Son of God;" this was that extraordinary person that was looked for.

Acts ix. St. Paul, exercising the commission to preach the gospel, which he had received in a miraculous way, ver. 20. "Straitway preached Christ in the synagogues, that he is the Son of God;" i. e. that Jesus was the Messiah: for Christ, in this place, is evidently a proper name. And that this was it, which Paul preached, appears from ver. 22. "Saul increased the more in strength, and confounded the jews, who dwelt in Damascus, proving that this is the very Christ," i. e. the Messiah.

Peter, when he came to Cornelius at Cæsarea, who, by a vision, was ordered to send for him, as St. Peter on the other side was by a vision commanded to go to him; what does he teach him? His whole discourse, Acts x. tends to show what, he says, God commanded the apostles, "To

preach unto the people, and to testify, that it is he [Jesus] which was ordained of God to be the judge of the quick and the dead. And that it was to him, that all the prophets give witness, that, through his name, whosoever believeth in him, shall have remission of sins,” ver. 42, 43. “This is the word, which God sent to the children of Israel; that word, which was published throughout all Judea, and began from Galilee, after the baptism which John preached,” ver. 36, 37. And these are the words, which had been promised to Cornelius, Acts xi. 14, “Whereby he and all his house should be saved:” which words amount only to thus much: that Jesus was the Messiah, the Saviour that was promised. Upon their receiving of this, (for this was all was taught them,) the Holy Ghost fell on them, and they were baptized. ’Tis observable here, that the Holy Ghost fell on them, before they were baptized, which, in other places, converts received not till after baptism. The reason whereof seems to be this, that God, by bestowing on them the Holy Ghost, did thus declare from Heaven, that the gentiles, upon believing Jesus to be the Messiah, ought to be admitted into the church by baptism, as well as the jews. Whoever reads St. Peter’s defence, Acts xi. when he was accused by those of the circumcision, that he had not kept that distance, which he ought, with the uncircumcised, will be of this opinion; and see by what he says, ver. 15, 16, 17, that this was the ground, and an irresistible authority to him for doing so strange a thing, as it appeared to the jews, (who alone yet were members of the christian church,) to admit gentiles into their communion, upon their believing. And therefore St. Peter, in the foregoing chapter, Acts x. before he would baptize them, proposes this question, “to those of the circumcision, which came with him, and were astonished, because that on the gentiles also was poured out the gift of the Holy Ghost: can any one forbid water, that these should not be baptized, who have received the Holy Ghost as well as we?” ver. 47. And when some of the sect of the pharisees, who believed, thought it needful that the converted gentiles should be circumcised and keep the law of Moses, Acts xv. “Peter rose up and said unto them, men and brethren, you know that a good while ago God made choice amongst us, that the gentiles,” viz. Cornelius, and those here converted with him, “by my mouth should hear the gospel and believe. And God, who knoweth the hearts, bare them witness, giving them the Holy Ghost, even as he did unto us, and put no difference between us and them, purifying their hearts by faith,” v. 7 — 9. So that both jews and gentiles, who believed Jesus to be the Messiah,

received thereupon the seal of baptism; whereby they were owned to be his, and distinguished from unbelievers. From what is above said, we may observe that this preaching Jesus to be the Messiah is called the Word, and the Word of God: and believing it, receiving the Word of God. Vid. Acts x. 36, 37. and xi. 1, 19, 20. and the word of the gospel, Acts xv. 7. And so likewise in the history of the gospel, what Mark, chap. iv. 14, 15, calls simply the word, St. Luke calls the word of God, Luke viii. 11. And St. Matthew, chap. xiii. 19, the word of the kingdom; which were, it seems, in the gospel-writers synonymous terms, and are so to be understood by us.

But to go on: Acts xiii. Paul preaches in the synagogue at Antioch, where he makes it his business to convince the jews, that “God, according to his promise, had of the seed of David raised to Israel a Saviour Jesus.” v. 24. That he was He of whom the prophets writ, v. 25 — 29, i. e. the Messiah: and that, as a demonstration of his being so, God had raised him from the dead, v. 30. From whence he argues thus, v. 32, 33. We evangelize to you, or bring you this gospel, “how that the promise which was made to our fathers, God hath fulfilled the same unto us, in that he hath raised Jesus again;” as it is also written in the second psalm, “Thou art my Son, this day I have begotten thee.” And having gone on to prove him to be the Messiah, by his resurrection from the dead, he makes this conclusion, v. 38, 39. “Be it known unto you, therefore, men and brethren, that through this man is preached unto you forgiveness of sins; and by him all who believe are justified from all things, from which they could not be justified by the law of Moses.” This is in this chapter called “the Word of God,” over and over again: compare v. 42, with 44, 46, 48, 49, and chap. xii. v. 24.

Acts xvii. 2 — 4. At Thessalonica, “Paul, as his manner was, went into the synagogue, and three sabbath days reasoned with the jews out of the scriptures; opening and alleging, that the Messiah must needs have suffered, and risen again from the dead: and that this Jesus, whom I preach unto you, is the Messiah. And some of them believed, and consorted with Paul and Silas: but the jews which believed not, set the city in an uproar.” Can there be any thing plainer, than that the assenting to this proposition, that Jesus was the Messiah, was that which distinguished the believers from the unbelievers? For this was that alone, which, three sabbaths, Paul endeavoured to convince them of, as the text tells us in direct words.

From thence he went to Berœa, and preached the same thing: and the Berœans are commended, v. 11, for searching the scriptures, whether those

things, i. e. which he had said, v. 2, 3, concerning Jesus's being the Messiah, were true or no.

The same doctrine we find him preaching at Corinth, Acts xviii. 4 — 6. "And he reasoned in the synagogue every sabbath, and persuaded the jews and the Greeks. And when Silas and Timotheus were come from Macedonia, Paul was pressed in spirit, and testified to the jews, that Jesus was the Messiah. And when they opposed themselves, and blasphemed, he shook his raiment, and said unto them, Your blood be upon your own heads, I am clean; from henceforth I will go unto the Greeks."

Upon the like occasion he tells the jews at Antioch, Acts xiii. 46, "It was necessary that the word of God should first have been spoken to you; but seeing you put it off from you, we turn to the gentiles." 'Tis plain here, St. Paul's charging their blood on their own heads, is for opposing this single truth, that Jesus was the Messiah; that salvation or perdition depends upon believing or rejecting this one proposition. I mean, this is all that is required to be believed by those who acknowledge but one eternal and invisible God, the maker of heaven and earth, as the jews did. For that there is something more required to salvation, besides believing, we shall see hereafter. In the mean time, it is fit here on this occasion to take notice, that though the apostles in their preaching to the jews, and the devout, (as we translate the word σε[Editor: illegible character]όμενοι, who were proselytes of the gate, and the worshippers of one eternal and invisible God,) said nothing of the believing in this one true God, the maker of heaven and earth; because it was needless to press this to those who believed and professed it already (for to such, 'tis plain, were most of their discourses hitherto.) Yet when they had to do with idolatrous heathens, who were not yet come to the knowledge of the one only true God; they began with that, as necessary to be believed; it being the foundation on which the other was built, and without which it could signify nothing.

Thus Paul speaking to the idolatrous Lystrians, who would have sacrificed to him and Barnabas, says, Acts xiv. 15, "We preach unto you, that ye should turn from these vanities unto the living God, who made heaven and earth, and the sea, and all things that are therein: who in times past suffered all nations to walk in their own ways. Nevertheless he left not himself without witness, in that he did good, and gave us rain from heaven, and fruitful seasons, filling our hearts with food and gladness."

Thus also he proceeded with the idolatrous Athenians, Acts xvii. telling them, upon occasion of the altar, dedicated to the unknown God, “whom you ignorantly worship, him declare I unto you. God who made the world, and all things therein, seeing that he is Lord of heaven and earth, dwelleth not in temples made with hands. — Forasmuch then as we are the offspring of God, we ought not to think that the Godhead is like unto gold, or silver, or stone, graven by art, or man’s device. And the times of this ignorance God winked at; but now commandeth all men every-where to repent; because he hath appointed a day in which he will judge the world in righteousness, by that man whom he hath ordained: whereof he hath given assurance unto all men, in that he hath raised him from the dead.” So that we see, where any thing more was necessary to be proposed to be believed, as there was to the heathen idolaters, there the apostles were careful not to omit it.

Acts xviii. 4, “Paul at Corinth reasoned in the synagogue every sabbath-day, and testified to the jews, that Jesus was the Messiah.” Ver. 11, “And he continued there a year and six months, teaching the word of God amongst them;” i. e. The good news, that Jesus was the Messiah; as we have already shown is meant by “the Word of God.”

Apollos, another preacher of the gospel, when he was instructed in the way of God more perfectly, what did he teach but this same doctrine? As we may see in this account of him, Acts xviii. 27. That, “when he was come into Achaia, he helped the brethren much, who had believed through grace. For he mightily convinced the jews, and that publicly, showing by the scriptures that Jesus was the Messiah.”

St. Paul, in the account he gives of himself before Festus and Agrippa, professes this alone to be the doctrine he taught after his conversion: for, says he, Acts xxvi. 22, “Having obtained help of God, I continue unto this day, witnessing both to small and great, saying none other things than those which the prophets and Moses did say should come: that the Messiah should suffer, and that he should be the first that should rise from the dead, and should show light unto the people, and to the gentiles.” Which was no more than to prove that Jesus was the Messiah. This is that, which, as we have above observed, is called the Word of God; Acts xi. 1. compared with the foregoing chapter, from v. 34. to the end. And xiii. 42. compared with 44, 46, 48, 49, and xvii. 13. compared with v. 11, 13. It is also called, “the Word of the Gospel,” Acts xv. 7. And this is that Word of God, and that

Gospel, which, wherever their discourses are set down, we find the apostles preached; and was that faith, which made both jews and gentiles believers and members of the church of Christ; purifying their hearts, Acts xv. 9, and carrying with it remission of sins, Acts x. 43. So that all that was to be believed for justification, was no more but this single proposition, that “Jesus of Nazareth was the Christ, or the Messiah.” All, I say, that was to be believed for justification: for that it was not all that was required to be done for justification, we shall see hereafter.

Though we have seen above from what our Saviour has pronounced himself, John iii. 36, “that he that believeth on the Son hath everlasting life; and he that believeth not the Son, shall not see life, but the wrath of God abideth on him;” and are taught from John iv. 39, compared with v. 42, that believing on him, is believing that he is the Messiah, the Saviour of the world; and the confession made by St. Peter, Matt. xvi. 16, that he is “the Messiah, the Son of the living God,” being the rock, on which our Saviour has promised to build his church; though this I say, and what else we have already taken notice of, be enough to convince us what it is we are in the gospel required to believe to eternal life, without adding what we have observed from the preaching of the apostles; yet it may not be amiss, for the farther clearing this matter, to observe what the evangelists deliver concerning the same thing, though in different words; which, therefore, perhaps, are not so generally taken notice of to this purpose.

We have above observed, from the words of Andrew and Philip compared, that “the Messiah, and him of whom Moses in the law and the prophets did write,” signify the same thing. We shall now consider that place, John i. a little farther. Ver. 41, “Andrew says to Simon, we have found the Messiah.” Philip, on the same occasion, v. 45, says to Nathanael, “we have found him of whom Moses in the law and the prophets did write, Jesus of Nazareth, the son of Joseph.” Nathanael, who disbelieved this, when, upon Christ’s speaking to him, he was convinced of it, declares his assent to it in these words: “Rabbi, thou art the Son of God, thou art the king of Israel.” From which it is evident, that to believe him to be “Him of whom Moses and the prophets did write,” or to be “the Son of God,” or to be “the king of Israel,” was in effect the same as to believe him to be the Messiah: and an assent to that, was what our Saviour received for believing. For, upon Nathanael’s making a confession in these words, “Thou art the Son of God, thou art the king of Israel, Jesus answered and said to him,

Because I said to thee I saw thee under the fig-tree, dost thou believe? Thou shalt see greater things than these,” ver. 51. I desire any one to read the latter part of the first of John, from ver. 25, with attention, and tell me, whether it be not plain, that this phrase, The Son of God, is an expression used for the Messiah. To which let him add Martha’s declaration of her faith, John xi. 27, in these words: “I believe that thou art the Messiah, the Son of God, who should come into the world;” and that passage of St. John xx. 31, “That ye might believe that Jesus is the Messiah, the Son of God; and that, believing, ye might have life through his name:” and then tell me whether he can doubt that Messiah, the Son of God, were synonymous terms, at that time, amongst the jews.

The prophecy of Daniel, chap. ix. when he is called “Messiah the Prince;” and the mention of his government and kingdom, and the deliverance by him, in Isaiah, Daniel, and other prophecies, understood of the Messiah; were so well known to the jews, and had so raised their hopes of him about this time, which, by their account, was to be the time of his coming, to restore the kingdom of Israel; that Herod no sooner heard of the magi’s inquiry after “Him that was born king of the jews,” Matt. ii. but he forthwith “demanded of the chief priests and scribes, where the Messiah should be born,” ver. 4. Not doubting but, if there were any king born to the jews, it was the Messiah: whose coming was now the general expectation, as appears, Luke iii. 15, “The people being in expectation, and all men musing in their hearts, of John, whether he were the Messiah or not.” And when the priests and levites sent to ask him who he was; he, understanding their meaning, answers, John i. 20, “That he was not the Messiah;” but he bears witness, that Jesus “is the Son of God,” i. e. the Messiah, ver. 34.

This looking for the Messiah, at this time, we see also in Simeon; who is said to be “waiting for the consolation of Israel,” Luke ii. 21. And having the child Jesus in his arms, he says he had “seen the salvation of the Lord,” ver. 30. And, “Anna coming at the same instant into the temple, she gave thanks also unto the Lord, and spake of him to all them that looked for redemption in Israel,” ver. 38. And of Joseph of Arimathea, it is said, Mark xv. 43, That “he also expected the kingdom of God:” by all which was meant the coming of the Messiah; and Luke xix. 11, it is said, “They thought that the kingdom of God should immediately appear.”

This being premised, let us see what it was that John the Baptist preached, when he first entered upon his ministry. That St. Matthew tells us,

chap. iii. 1, 2, “In those days came John the Baptist preaching in the wilderness of Judea, saying, repent; for the kingdom of heaven is at hand.” This was a declaration of the coming of the Messiah: the kingdom of heaven, and the kingdom of God, being the same, as is clear out of several places of the evangelists; and both signifying the kingdom of the Messiah. The profession which John the Baptist made, when sent to the jews, John i. 19, was, that “he was not the Messiah;” but that Jesus was. This will appear to any one, who will compare ver. 26 — 34, with John iii. 27, 30. The jews being very inquisitive to know, whether John were the Messiah; he positively denies it; but tells them, he was only his forerunner; and that there stood one amongst them, who would follow him, whose shoe-latchet he was not worthy to untie. The next day, seeing Jesus, he says, he was the man; and that his own baptizing in water was only that Jesus might be manifested to the world; and that he knew him not, till he saw the Holy Ghost descend upon him: he that sent him to baptize, having told him, that he on whom he should see the Spirit descend, and rest upon, he it was that should baptize with the Holy Ghost; and that therefore he witnessed, that “this was the Son of God,” ver. 34, i. e. the Messiah; and, chap. iii. 26, &c. they come to John the Baptist, and tell him, that Jesus baptized, and that all men went to him. John answers, He has his authority from heaven; you know I never said, I was the Messiah, but that I was sent before him. He must increase, but I must decrease; for God hath sent him, and he speaks the words of God; and God hath given all things into the hands of his Son, “And he that believes on the Son, hath eternal life;” the same doctrine, and nothing else but what was preached by the apostles afterwards: as we have seen all through the Acts. v. g. that Jesus was the Messiah. And thus it was, that John bears witness of our Saviour, as Jesus himself says, John v. 33.

This also was the declaration given of him at his baptism, by a voice from heaven: “This is my beloved Son in whom I am well pleased.” Matt. iii. 17. Which was a declaration of him to be the Messiah, the Son of God being (as we have showed) understood to signify the Messiah. To which we may add the first mention of him after his conception, in the words of the angel to Joseph, Matt. i. 21. “Thou shalt call his name Jesus,” or Saviour; “for he shall save his people from their sins.” It was a received doctrine in the jewish nation, that at the coming of the Messiah, all their sins should be forgiven them. These words, therefore, of the angel, we may look upon as a declaration, that Jesus was the Messiah; whereof these words, “his people,”

are a farther mark: which suppose him to have a people, and consequently to be a king.

After his baptism, Jesus himself enters upon his ministry. But, before we examine what it was he proposed to be believed, we must observe, that there is a threefold declaration of the Messiah.

By miracles. The spirit of prophecy had now for many ages forsaken the jews; and, though their commonwealth were not quite dissolved, but that they lived under their own laws, yet they were under a foreign dominion, subject to the Romans. In this state their account of the time being up, they were in expectation of the Messiah, and of deliverance by him in a kingdom he was to set up, according to their ancient prophecies of him: which gave them hopes of an extraordinary man yet to come from God, who, with an extraordinary and divine power, and miracles, should evidence his mission, and work their deliverance. And, of any such extraordinary person, who should have the power of doing miracles, they had no other expectation, but only of their Messiah. One great prophet and worker of miracles, and only one more, they expected; who was to be the Messiah. And therefore we see the people justified their believing in him, i. e. their believing him to be the Messiah, because of the miracles he did; John vii. 41. “And many of the people believed in him, and said, When the Messiah cometh, will he do more miracles, than this man hath done?” And when the jews, at the feast of dedication, John x. 24, 25, coming about him, said unto him, “How long dost thou make us doubt? If thou be the Messiah, tell us plainly; Jesus answered them, I told you, and ye believed not; the works that I do in my Father’s name bear witness of me.” And, John v. 36, he says, “I have a greater witness than that of John; for the works, which the Father hath given me to do, the same works that I do, bear witness of me, that the Father hath sent me.” Where, by the way, we may observe, that his being “sent by the Father,” is but another way of expressing the Messiah; which is evident from this place here, John v. compared with that of John x. last quoted. For there he says, that his works bear witness of him: And what was that witness? viz. That he was “the Messiah.” Here again he says, that his works bear witness of him: And what is that witness? viz. “That the Father sent him.” By which we are taught, that to be sent by the Father, and to be the Messiah, was the same thing, in his way of declaring himself. And accordingly we find, John iv. 53, and xi. 45, and elsewhere, many

hearkened and assented to his testimony, and believed on him, seeing the things that he did.

Another way of declaring the coming of the Messiah, was by phrases and circumlocutions, that did signify or intimate his coming; though not in direct words pointing out the person. The most usual of these were, "The kingdom of God, and of heaven;" because it was that which was often spoken of the Messiah, in the Old Testament, in very plain words: and a kingdom was that which the jews most looked after and wished for. In that known place, Isa. ix. "The government shall be upon his shoulders; he shall be called the Prince of peace: of the increase of his government and peace there shall be no end; upon the throne of David, and upon his kingdom, to order it, and to establish it with judgment, and with justice, from henceforth even for ever." Micah v. 2, "But thou, Bethlehem Ephratah, though thou be little among the thousands of Judah, yet out of thee shall he come forth unto me, that is to be the Ruler in Israel." And Daniel, besides that he calls him "Messiah the Prince," chap. ix. 25, in the account of his vision "of the Son of man," chap. vii. 13, 14, says, "There was given him dominion, glory, and a kingdom, that all people, nations, and languages should serve him: his dominion is an everlasting dominion, which shall not pass away; and his kingdom that which shall not be destroyed." So that the kingdom of God, and the kingdom of heaven, were common phrases amongst the jews, to signify the times of the Messiah. Luke xiv. 15, "One of the jews that sat at meat with him, said unto him, Blessed is he that shall eat bread in the kingdom of God." Chap. xvii. 20, The pharisees demanded, "when the kingdom of God should come?" And St. John Baptist "came, saying, Repent; for the kingdom of heaven is at hand;" a phrase he would not have used in preaching, had it not been understood.

There are other expressions that signified the Messiah, and his coming, which we shall take notice of, as they come in our way.

By plain and direct words, declaring the doctrine of the Messiah, speaking out that Jesus was he; as we see the apostles did, when they went about preaching the gospel, after our Saviour's resurrection. This was the open clear way, and that which one would think the Messiah himself, when he came, should have taken; especially, if it were of that moment, that upon men's believing him to be the Messiah depended the forgiveness of their sins. And yet we see, that our Saviour did not: but on the contrary, for the most part, made no other discovery of himself, at least in Judea, and at the

beginning of his ministry, but in the two former ways, which were more obscure; not declaring himself to be the Messiah, any otherwise than as it might be gathered from the miracles he did, and the conformity of his life and actions with the prophecies of the Old Testament concerning him: and from some general discourses of the kingdom of the Messiah being come, under the name of the “kingdom of God, and of heaven.” Nay, so far was he from publicly owning himself to be the Messiah, that he forbid the doing of it: Mark viii. 27 — 30. “He asked his disciples, Whom do men say that I am? And they answered, John the Baptist; but some say Elias; and others, one of the prophets.” (So that it is evident, that even those, who believed him an extraordinary person, knew not yet who he was, or that he gave himself out for the Messiah; though this was in the third year of his ministry, and not a year before his death.) “And he saith unto them, But whom say ye that I am? And Peter answered and said unto him, Thou art the Messiah. And he charged them, that they should tell no man of him.” Luke iv. 41. “And devils came out of many, crying, Thou art the Messiah, the Son of God: and he, rebuking them, suffered them not to speak, that they knew him to be the Messiah.” Mark iii. 11, 12. “Unclean spirits, when they saw him, fell down before him, and cried, saying, Thou art the Son of God: and he straitly charged them, that they should not make him known.” Here again we may observe, from the comparing of the two texts, that “Thou art the Son of God,” or, “Thou art the Messiah,” were indifferently used for the same thing. But to return to the matter in hand.

This concealment of himself will seem strange, in one who was come to bring light into the world, and was to suffer death for the testimony of the truth. This reservedness will be thought to look, as if he had a mind to conceal himself, and not to be known to the world for the Messiah, nor to be believed on as such. But we shall be of another mind, and conclude this proceeding of his according to divine wisdom, and suited to a fuller manifestation and evidence of his being the Messiah; when we consider that he was to fill out the time foretold of his ministry; and after a life illustrious in miracles and good works, attended with humility, meekness, patience, and sufferings, and every way conformable to the prophecies of him; should be led as a sheep to the slaughter, and with all quiet and submission be brought to the cross, though there were no guilt, nor fault found in him. This could not have been, if, as soon as he appeared in public, and began to preach, he had presently professed himself to have been the Messiah; the

king that owned that kingdom, he published to be at hand. For the sanhedrim would then have laid hold on it, to have got him into their power, and thereby have taken away his life; at least they would have disturbed his ministry, and hindered the work he was about. That this made him cautious, and avoid, as much as he could, the occasions of provoking them and falling into their hands, is plain from John vii. 1. "After these things Jesus walked in Galilee;" out of the way of the chief priests and rulers; "for he would not walk in Jewry, because the jews sought to kill him." Thus, making good what he foretold them at Jerusalem, when, at the first passover after his beginning to preach the gospel, upon his curing the man at the pool of Bethesda, they sought to kill him, John v. 16, "Ye have not," says he, ver. 38, "his word abiding amongst you; for whom he hath sent, him ye believe not." This was spoken more particularly to the jews of Jerusalem, who were the forward men, zealous to take away his life: and it imports, that, because of their unbelief and opposition to him, the word of God, i. e. the preaching of the kingdom of the Messiah, which is often called "the word of God," did not stay amongst them, he could not stay amongst them, preach and explain to them the kingdom of the Messiah.

That the word of God, here, signifies "the word of God," that should make Jesus known to them to be the Messiah, is evident from the context: and this meaning of this place is made good by the event. For, after this, we hear no more of Jesus at Jerusalem, till the pentecost come twelvemonth; though it is not to be doubted, but that he was there the next passover, and other feasts between; but privately. And now at Jerusalem, at the feast of pentecost, near fifteen months after, he says little of any thing, and not a word of the kingdom of heaven being come, or at hand; nor did he any miracle there. And returning to Jerusalem at the feast of tabernacles, it is plain, that from this time 'till then, which was a year and a half, he had not taught them at Jerusalem.

For, 1. it is said, John vii. 2, 15, That, he teaching in the temple at the feast of tabernacles, "the jews marvelled, saying, How knoweth this man letters, having never learned?" A sign they had not been used to his preaching: for, if they had, they would not now have marvelled.

2. Ver. 19, He says thus to them: "Did not Moses give you the law, and yet none of you keep the law? Why go ye about to kill me? One work," or miracle, "I did here amongst you, and ye all marvel. Moses therefore gave unto you circumcision, and ye on the sabbath-day circumcise a man: if a

man on the sabbath-day receive circumcision, that the law of Moses should not be broken, are ye angry with me, because I have made a man every way whole on the sabbath-day?" Which is a direct defence of what he did at Jerusalem, a year and a half before the work he here speaks of. We find he had not preached to them there, from that time to this; but had made good what he had told them, ver. 38, "Ye have not the word of God remaining among you, because whom he hath sent ye believe not." Whereby, I think, he signifies his not staying, and being frequent amongst them at Jerusalem, preaching the gospel of the kingdom; because their great unbelief, opposition, and malice to him, would not permit it.

This was manifestly so in fact: for the first miracle he did at Jerusalem, which was at the second passover after his baptism, brought him in danger of his life. Hereupon we find he forbore preaching again there, 'till the feast of tabernacles, immediately preceding his last passover: so that 'till the half a year before his passion, he did but one miracle, and preached but once publicly at Jerusalem. These trials he made there; but found their unbelief such, that if he had staid and persisted to preach the good tidings of the kingdom, and to show himself by miracles among them, he could not have had time and freedom to do those works which his Father had given him to finish, as he says, ver. 36, of this fifth of St. John.

When, upon the curing of the withered hand on the sabbath-day, "The pharisees took counsel with the herodians, how they might destroy him, Jesus withdrew himself, with his disciples, to the sea: and a great multitude from Galilee followed him, and from Judea, and from Jerusalem, and from Idumea, and from beyond Jordan, and they about Tyre and Sidon, a great multitude; when they had heard what great things he did, came unto him, and he healed them all, and charged them, that they should not make him known: that it might be fulfilled which was spoken by the prophet Isaiah, saying, Behold, my servant, whom I have chosen; my beloved, in whom my soul is well pleased: I will put my spirit upon him, and he shall show judgment to the gentiles. He shall not strive, nor cry, neither shall any man hear his voice in the streets." Matt. xii. Mark iii.

And, John xi. 47, upon the news of our Saviour's raising Lazarus from the dead, "The chief priests and pharisees convened the sanhedrim, and said, What do we? For this man does many miracles." Ver. 53, "Then from that day forth they took counsel together for to put him to death." Ver. 54, "Jesus therefore walked no more openly amongst the jews." His miracles

had now so much declared him to be the Messiah, that the jews could no longer bear him, nor he trust himself amongst them; “But went thence unto a country near to the wilderness, into a city called Ephraim; and there continued with his disciples.” This was but a little before his last passover, as appears by the following words, ver. 55. “And the jews passover was nigh at hand,” and he could not, now his miracles had made him so well known, have been secure, the little time that remained, ‘till his hour was fully come, if he had not, with his wonted and necessary caution, withdrawn; “And walked no more openly amongst the jews,” ‘till his time (at the next passover) was fully come; and then again he appeared amongst them openly.

Nor would the Romans have suffered him, if he had gone about preaching, that he was the king whom the jews expected. Such an accusation would have been forwardly brought against him by the jews, if they could have heard it out of his own mouth; and that had been his public doctrine to his followers, which was openly preached by the apostles after his death, when he appeared no more. And of this they were accused, Acts xvii. 5 — 9. “But the jews, which believed not, moved with envy, took unto them certain lewd fellows of the baser sort, and gathered a company, and set all the city in an uproar, and assaulted the house of Jason, and sought to bring them out to the people. And when they found them [Paul and Silas] not, they drew Jason, and certain brethren, unto the rulers of the city, crying, These that have turned the world upside down, are come hither also; whom Jason hath received: and these all do contrary to the decrees of Cæsar, saying, That there is another king, one Jesus. And they troubled the people, and the rulers of the city, when they heard these things: and when they had taken security of Jason and the other, they let them go.”

Though the magistrates of the world had no great regard to the talk of a king who had suffered death, and appeared no longer any where; yet, if our Saviour had openly declared this of himself in his life time, with a train of disciples and followers every where owning and crying him up for their king; the Roman governors of Judea could not have forborne to have taken notice of it, and have made use of their force against him. This the jews were not mistaken in; and therefore made use of it as the strongest accusation, and likeliest to prevail with Pilate against him, for the taking away his life; it being treason, and an unpardonable offence, which could not escape death from a Roman deputy, without the forfeiture of his own

life. Thus then they accuse him to Pilate, Luke xxiii. 2. "We found this fellow perverting the nation, forbidding to give tribute to Cæsar, saying, that he himself is a king;" or rather "the Messiah, the King."

Our Saviour, indeed, now that his time was come, (and he in custody, and forsaken of all the world, and so out of all danger of raising any sedition or disturbance,) owns himself to Pilate to be a king; after first having told Pilate, John xviii. 36, "That his kingdom was not of this world;" and, for a kingdom in another world, Pilate knew that his master at Rome concerned not himself. But had there been any the least appearance of truth in the allegations of the jews, that he had perverted the nation, forbidding to pay tribute to Cæsar, or drawing the people after him, as their king; Pilate would not so readily have pronounced him innocent. But we see what he said to his accusers, Luke xxiii. 13, 14. "Pilate, when he had called together the chief priests and the rulers of the people, said unto them, You have brought this man unto me as one that perverteth the people; and behold, I, having examined him before you, have found no fault in this man, touching those things whereof you accuse him: no, nor yet Herod, for I sent you to him; and, lo, nothing worthy of death is done by him." And therefore, finding a man of that mean condition, and innocent life, (no mover of seditions, or disturber of the public peace) without a friend or a follower, he would have dismissed him, as a king of no consequence; as an innocent man, falsely and maliciously accused by the jews.

How necessary this caution was in our Saviour, to say or do nothing that might justly offend, or render him suspected to the Roman governor: and how glad the jews would have been to have had any such thing against him, we may see, Luke xx. 20. The chief priests and the scribes "watched him, and sent forth spies, who should feign themselves just men, that might take hold of his words, that so they might deliver him unto the power and authority of the governor." And the very thing wherein they hoped to entrap him in this place, was paying tribute to Cæsar; which they afterwards falsely accused him of. And what would they have done, if he had before them professed himself to have been the Messiah, their King and deliverer?

And here we may observe the wonderful providence of God, who had so ordered the state of the jews, at the time when his son was to come into the world, that though neither their civil constitution nor religious worship were dissolved, yet the power of life and death was taken from them; whereby he had an opportunity to publish "the kingdom of the Messiah;" that is, his

own royalty, under the name of “the kingdom of God, and of heaven;” which the jews well enough understood, and would certainly have put him to death for, had the power been in their own hands. But this being no matter of accusation to the Romans, hindered him not from speaking of the “kingdom of heaven,” as he did, sometimes in reference to his appearing in the world, and being believed on by particular persons; sometimes in reference to the power should be given him by the Father at his resurrection; and sometimes in reference to his coming to judge the world at the last day, in the full glory and completion of his kingdom. These were ways of declaring himself, which the jews could lay no hold on, to bring him in danger with Pontius Pilate, and get him seized and put to death.

Another reason there was, that hindered him as much as the former, from professing himself, in express words, to be the Messiah; and that was, that the whole nation of the jews, expecting at this time their Messiah, and deliverance, by him, from the subjection they were in to a foreign yoke, the body of the people would certainly, upon his declaring himself to be the Messiah, their king, have rose up in rebellion, and set him at the head of them. And indeed, the miracles that he did, so much disposed them to think him to be the Messiah, that, though shrouded under the obscurity of a mean condition, and a very private simple life; though he passed for a Galilean (his birth at Bethlehem being then concealed), and assumed not to himself any power or authority, or so much as the name of the Messiah; yet he could hardly avoid being set up by a tumult, and proclaimed their king. So John tells us, chap. vi. 14, 15, “Then those men, when they had seen the miracles that Jesus did, said, This is of a truth that prophet that should come into the world. When therefore Jesus perceived that they would come to take him by force to make him king, he departed again into a mountain, himself alone.” This was upon his feeding of five thousand with five barley loaves and two fishes. So hard was it for him, doing those miracles which were necessary to testify his mission, and which often drew great multitudes after him, Matt. iv. 25, to keep the heady and hasty multitude from such disorder, as would have involved him in it; and have disturbed the course, and cut short the time of his ministry; and drawn on him the reputation and death of a turbulent, seditious malefactor; contrary to the design of his coming, which was, to be offered up a lamb blameless, and void of offence; his innocence appearing to all the world, even to him that delivered him up to be crucified. This it would have been impossible to have avoided, if, in his preaching

every-where, he had openly assumed to himself the title of their Messiah; which was all was wanting to set the people in a flame; who drawn by his miracles, and the hopes of finding a Deliverer in so extraordinary a man, followed him in great numbers. We read every-where of multitudes, and in Luke xii. 1, of myriads that were gathered about him. This conflux of people, thus disposed, would not have failed, upon his declaring himself to be the Messiah, to have made a commotion, and with force set him up for their King. It is plain, therefore, from these two reasons, why (though he came to preach the gospel, and convert the world to a belief of his being the Messiah; and though he says so much of his kingdom, under the title of the kingdom of God, and the kingdom of heaven) he yet makes it not his business to persuade them, that he himself is the Messiah, nor does, in his public preaching, declare himself to be him. He inculcates to the people, on all occasions, that the kingdom of God is come: he shows the way of admittance into this kingdom, viz. repentance and baptism; and teaches the laws of it, viz. good life, according to the strictest rules of virtue and morality. But who the King was of this kingdom, he leaves to his miracles to point out, to those who would consider what he did, and make the right use of it now; or to witness to those who should hearken to the apostles hereafter when they preached it in plain words, and called upon them to believe it, after his resurrection, when there should be no longer room to fear, that it should cause any disturbance in civil societies, and the governments of the world. But he could not declare himself to be the Messiah, without manifest danger of tumult and sedition: and the miracles he did declared it so much, that he was fain often to hide himself, and withdraw from the concourse of the people. The leper that he cured, Mark i, though forbid to say any thing, yet “blazed it so abroad, that Jesus could no more openly enter into the city, but was without in desert places,” living in retirement, as appears from Luke v. 16, and there “they came to him from every quarter.” And thus he did more than once.

This being premised, let us take a view of the promulgation of the gospel by our Saviour himself, and see what it was he taught the world, and required men to believe.

The first beginning of his ministry, whereby he showed himself, seems to be at Cana in Galilee, soon after his baptism; where he turned water into wine: of which St. John, chap. ii. 11, says thus: “This beginning of miracles Jesus made, and manifested his glory, and his disciples believed in him.”

His disciples here believed in him, but we hear not of any other preaching to them, but by this miracle, whereby he “manifested his glory,” i. e. of being the Messiah, the Prince. So Nathanael, without any other preaching, but only our Saviour’s discovering to him, that he knew him after an extraordinary manner, presently acknowledges him to be the Messiah; crying, “Rabbi, thou art the Son of God; thou art the King of Israel.”

From hence, staying a few days at Capernaum, he goes to Jerusalem, to the passover, and there he drives the traders out of the temple, John ii. 12 — 15, saying, “Make not my Father’s house a house of merchandize.” Where we see he uses a phrase, which, by interpretation, signifies that he was the “Son of God,” though at that time unregarded. Ver. 16, Hereupon the jews demand, “What sign dost thou show us, since thou doest these things?” Jesus answered, “Destroy ye this temple, and in three days I will raise it again.” This is an instance of what way Jesus took to declare himself: for it is plain, by their reply, the jews understood him not, nor his disciples neither; for it is said, ver. 22, “When, therefore, he was risen from the dead, his disciples remembered, that he said this to them: and they believed the scripture, and the saying of Jesus to them.”

This, therefore, we may look on in the beginning, as a pattern of Christ’s preaching, and showing himself to the jews, which he generally followed afterwards; viz. such a manifestation of himself, as every one at present could not understand; but yet carried such an evidence with it, to those who were well disposed now, or would reflect on it when the whole course of his ministry was over, as was sufficient clearly to convince them that he was the Messiah.

The reason of this method used by our Saviour, the scripture gives us here, at this his first appearing in public, after his entrance upon his ministry, to be a rule and light to us in the whole course of it: for the next verse taking notice, that many believed on him, “because of his miracles,” (which was all the preaching they had,) it is said, ver. 24, “But Jesus did not commit himself unto them, because he knew all men;” i. e. he declared not himself so openly to be the Messiah, their King, as to put himself into the power of the jews, by laying himself open to their malice; who, he knew, would be so ready to lay hold on it to accuse him; for, as the next verse 25, shows, he knew well enough what was in them. We may here further observe, that “believing in his name” signifies believing him to be the Messiah. Ver. 22, tells us, That “many at the passover believed in his name,

when they saw the miracles that he did.” What other faith could these miracles produce in them who saw them, but that this was he of whom the scripture spoke, who was to be their Deliverer?

Whilst he was now at Jerusalem, Nicodemus, a ruler of the jews, comes to him, John iii. 1 — 21, to whom he preaches eternal life by faith in the Messiah, ver. 15 and 17, but in general terms, without naming himself to be that Messiah, though his whole discourse tends to it. This is all we hear of our Saviour the first year of his ministry, but only his baptism, fasting, and temptation in the beginning of it, and spending the rest of it after the passover, in Judea with his disciples, baptizing there. But “when he knew that the pharisees reported, that he made and baptized more disciples than John, he left Judea,” and got out of their way again into Galilee, John iv. 1, 3.

In his way back, by the well of Sichar, he discourses with the Samaritan woman; and after having opened to her the true and spiritual worship which was at hand, which the woman presently understands of the times of the Messiah, who was then looked for; thus she answers, ver. 25, “I know that the Messiah cometh: when he is come, he will tell us all things.” Whereupon our Saviour, though we hear no such thing from him in Jerusalem or Judea, or to Nicodemus; yet here, to this Samaritan woman, he in plain and direct words owns and declares, that he himself, who talked with her, was the Messiah, ver. 26.

This would seem very strange, that he should be more free and open to a Samaritan, than he was to the jews, were not the reason plain, from what we have observed above. He was now out of Judea,, among a people with whom the jews had no commerce; ver. 9, who were not disposed, out of envy, as the jews were, to seek his life, or to accuse him to the Roman governor, or to make an insurrection, to set a jew up for their King. What the consequence was of his discourse with this Samaritan woman, we have an account, ver. 28, 39 — 42. “She left her water-pot, and went her way into the city, and saith to the men, Come, see a man who told me all things that ever I did: Is not this the Messiah? And many of the Samaritans of that city believed on him for the saying of the woman, which testified, He told me all that ever I did. So when the Samaritans were come unto him, they besought him, that he would tarry with them: and he abode there two days. And many more believed because of his own word; and said unto the woman, Now we believe not because of thy saying: for we have heard him ourselves; and we

know,” (i.e. are fully persuaded) “that this is indeed the Messiah, the Saviour of the world.” By comparing ver. 39, with 41 and 42, it is plain, that “believing on him” signifies no more than believing him to be the Messiah.

From Sichar Jesus goes to Nazareth, the place he was bred up in; and there reading in the synagogue a prophecy concerning the Messiah, out of the lxi. of Isaiah, he tells them, Luke iv. 21, “This day is this scripture fulfilled in your ears.”

But being in danger of his life at Nazareth, he leaves it for Capernaum: and then, as St. Matthew informs us, chap. iv. 17, “He began to preach and say, Repent; for the kingdom of heaven is at hand.” Or, as St. Mark has it, chap. i. 14, 15, “Preaching the gospel of the kingdom of God, and saying, The time is fulfilled, and the kingdom of God is at hand; repent ye, and believe the gospel;” i. e. believe this good news. This removing to Capernaum, and seating himself there in the borders of Zabulon and Naphtali, was, as St. Matthew observes, chap. iv. 13 — 16, that a prophecy of Isaiah might be fulfilled. Thus the actions and circumstances of his life answered the prophecies, and declared him to be the Messiah. And by what St. Mark says in this place, it is manifest, that the gospel which he preached and required them to believe, was no other but the good tidings of the coming of the Messiah, and of his kingdom, the time being now fulfilled.

In his way to Capernaum, being come to Cana, a nobleman of Capernaum came to him, ver. 47, “And besought him that he would come down and heal his son; for he was at the point of death.” Ver. 48, “Then said Jesus unto him, Except ye see signs and wonders, ye will not believe.” Then he returning homewards, and finding that his son began to “mend at the same hour which Jesus said unto him, Thy son liveth; he himself believed, and his whole house,” ver. 53.

Here this nobleman is by the apostles pronounced to be a believer. And what does he believe? Even that which Jesus complains, ver. 48, “they would not believe, except they saw signs and wonders; which could be nothing but what those of Samaria in the same chapter believed, viz. that he was the Messiah. For we no-where in the gospel hear of any thing else, that had been proposed to be believed by them.

Having done miracles, and cured all their sick at Capernaum, he says, “Let us go to the adjoining towns, that I may preach there also; for therefore came I forth,” Mark i. 38. Or, as St. Luke has it, chap. iv. 43, he tells the multitude, who would have kept him, that he might not go from them, “I

must evangelize,” or tell the good tidings of “the kingdom of God to other cities also; for therefore am I sent.” And St. Matthew, chap. iv. 23, tells us how he executed this commission he was sent on: “And Jesus went about all Galilee, teaching in their synagogues, and preaching the gospel of the kingdom, and curing all diseases.” This then was what he was sent to preach every-where, viz. the gospel of the kingdom of the Messiah; and by the miracles and good he did he let them know who was the Messiah.

Hence he goes up to Jerusalem, to the second passover, since the beginning of his ministry. And here, discoursing to the jews, who sought to kill him upon occasion of the man whom he had cured carrying his bed on the sabbath-day, and for making God his Father, he tells them that he wrought these things by the power of God, and that he shall do greater things; for that the dead shall, at his summons, be raised; and that he, by a power committed to him from his Father, shall judge them; and that he is sent by his Father, and that whoever shall hear his word, and believe in him that sent him, has eternal life. This though a clear description of the Messiah, yet we may observe, that here, to the angry jews, who sought to kill him, he says not a word of his kingdom, nor so much as names the Messiah; but yet that he is the Son of God, and sent from God, he refers them to the testimony of John the Baptist; to the testimony of his own miracles, and of God himself in the voice from heaven, and of the scriptures, and of Moses. He leaves them to learn from these the truth they were to believe, viz. that he was the Messiah sent from God. This you may read more at large, John v. 1 — 47.

The next place where we find him preaching, was on the mount, Matt. v. and Luke vi. This is by much the longest sermon we have of his, any-where; and, in all likelihood, to the greatest auditory: for it appears to have been to the people gathered to him from Galilee, and Judea, and Jerusalem, and from beyond Jordan, and that came out of Idumea, and from Tyre and Sidon, mentioned Mark iii. 7, 8. and Luke vi. 17. But in this whole sermon of his, we do not find one word of believing, and therefore no mention of the Messiah, or any intimation to the people who himself was. The reason whereof we may gather from Matt. xii. 16, where “Christ forbids them to make him known;” which supposes them to know already who he was. For that this 12th chapter of St. Matthew ought to precede the sermon in the mount, is plain, by comparing it with Mark ii. beginning at ver. 13, to Mark iii. 8, and comparing those chapters of St. Mark with Luke vi. And I desire

my reader, once for all, here to take notice, that I have all along observed the order of time in our Saviour's preaching, and have not, as I think, passed by any of his discourses. In this sermon, our Saviour only teaches them what were the laws of his kingdom, and what they must do who were admitted into it, of which I shall have occasion to speak more at large in another place, being at present only inquiring what our Saviour proposed as matter of faith to be believed.

After this, John the Baptist sends to him this message, Luke vii. 19, asking, "Art thou he that should come, or do we expect another?" That is, in short, Art thou the Messiah? And if thou art, why dost thou let me, thy forerunner, languish in prison? Must I expect deliverance from any other? To which Jesus returns this answer, ver. 22, 23, "Tell John what ye have seen and heard; the blind see, the lame walk, the lepers are cleansed, the deaf hear, the dead are raised, to the poor the gospel is preached; and blessed is he who is not offended in me." What it is to be "offended, or scandalized in him," we may see by comparing Matt. xiii. 28, and Mark iv. 17, with Luke viii. 13. For what the two first call "scandalized," the last call "standing off from, or forsaking," i. e. not receiving him as the Messiah (vid. Mark vi. 1 — 6.) or revolting from him. Here Jesus refers John, as he did the jews before, to the testimony of his miracles, to know who he was; and this was generally his preaching, whereby he declared himself to be the Messiah, who was the only prophet to come, whom the jews had any expectation of; nor did they look for any other person to be sent to them with the power of miracles, but only the Messiah. His miracles, we see by his answer to John the Baptist, he thought a sufficient declaration amongst them, that he was the Messiah. And therefore, upon his curing the possessed of the devil, the dumb, and blind, Matt. xii. the people, who saw the miracles, said, ver. 23, "Is not this the son of David?" As much as to say, Is not this the Messiah? Whereat the pharisees being offended, said, "He cast out devils by Beelzebub." Jesus, showing the falsehood and vanity of their blasphemy, justifies the conclusion the people made from this miracle, saying, ver. 28, That his casting out devils by the Spirit of God, was an evidence that the kingdom of the Messiah was come.

One thing more there was in the miracles done by his disciples, which showed him to be the Messiah; that they were done in his name. "In the name of Jesus of Nazareth, rise up and walk," says St. Peter to the lame man, whom he cured in the temple, Acts iii. 6. And how far the power of

that name reached, they themselves seem to wonder, Luke x. 17. "And the seventy returned again with joy, saying, Lord, even the devils are subject to us in thy name."

From this message from John the Baptist, he takes occasion to tell the people that John was the forerunner of the Messiah; that from the time of John the Baptist the kingdom of the Messiah began; to which time all the prophets and the law pointed, Luke vii. and Matt. xi.

Luke viii. 1, "Afterwards he went through every city and village, preaching and showing the good tidings of the kingdom of God." Here we see as everywhere, what his preaching was, and consequently what was to be believed.

Soon after, he preaches from a boat to the people on the shore. His sermon at large we may read, Matt. xiii. Mark iv. and Luke viii. But this is very observable, that this second sermon of his, here, is quite different from his former in the mount: for that was all so plain and intelligible, that nothing could be more so; whereas this is all so involved in parables, that even the apostles themselves did not understand it. If we inquire into the reason of this, we shall possibly have some light, from the different subjects of these two sermons. There he preached to the people only morality; clearing the precepts of the law from the false glosses which were received in those days, and setting forth the duties of a good life in their full obligation and extent, beyond what the judiciary laws of the Israelites did, or the civil laws of any country could prescribe, or take notice of. But here, in this sermon by the sea-side, he speaks of nothing but the kingdom of the Messiah, which he does all in parables. One reason whereof St. Matthew gives us, chap. xiii. 35, "That it might be fulfilled which was spoken by the prophets," saying, "I will open my mouth in parables, I will utter things that have been kept secret from the foundations of the world." Another reason our Saviour himself gives of it, ver. 11, 12, "Because to you is given to know the mysteries of the kingdom of heaven, but to them it is not given. For whosoever hath, to him shall be given, and he shall have more abundantly; but whosoever hath not," i. e. improves not the talents that he hath, "from him shall be taken away even that he hath."

One thing it may not be amiss to observe, that our Saviour here, in the explication of the first of these parables to his apostles, calls the preaching of the kingdom of the Messiah, simply, "The word," and Luke viii. 21, "The word of God:" from whence St. Luke, in the Acts, often mentions it under

the name of the “word,” and “the word of God,” as we have elsewhere observed. To which I shall here add that of Acts viii. 4, “Therefore they that were scattered abroad, went every-where preaching the word;” which word, as we have found by examining what they preached all through their history, was nothing but this, that “Jesus was the Messiah:” I mean, this was all the doctrine they proposed to be believed: for what they taught, as well as our Saviour, contained a great deal more; but that concerned practice, and not belief. And therefore our Saviour says, in the place before quoted, Luke viii. 21, “they are my mother and my brethren, who hear the word of God, and do it:” obeying the law of the Messiah their king being no less required, than their believing that Jesus was the Messiah, the king and deliverer that was promised them.

Matt. ix. 13, we have an account again of this preaching; what it was, and how: “And Jesus went about all the cities and villages, teaching in their synagogues, and preaching the gospel of the kingdom, and healing every sickness and every disease among the people.” He acquainted them, that the kingdom of the Messiah was come, and left it to his miracles to instruct and convince them, that he was the Messiah.

Matt. x. when he sent his apostles abroad, their commission to preach we have, ver. 7, 8, in these words: “As ye go, preach saying, The kingdom of heaven is at hand: heal the sick,” &c. All that they had to preach was, that the kingdom of the Messiah was come.

Whosoever should not receive them, the messengers of these good tidings, nor hearken to their message, incurred a heavier doom than Sodom and Gomorrah, at the day of judgment, ver. 14, 15. But ver. 32, “Whosoever shall confess me before men, I will confess him before my Father who is in heaven.” What this confessing of Christ is, we may see by comparing John xii. 42. with ix. 22. “Nevertheless, among the chief rulers also many believed on him; but because of the pharisees they did not confess him, lest they should be put out of the synagogue. And chap. ix. 22, “These words spake his parents, because they feared the jews; for the jews had agreed already, that if any man did confess that he was the Messiah, he should be put out of the synagogue.” By which places it is evident, that to confess him was to confess that he was the Messiah. From which, give me leave to observe also, (what I have cleared from other places, but cannot be too often remarked, because of the different sense has been put upon that phrase) viz. “that believing on, or in him,” (for εἰς αὐτὸν is rendered either

way by the English translation,) signifies believing that he was the Messiah. For many of the rulers (the text says) “believed on him:” but they durst not confess what they believed, “for fear they should be put out of the synagogue.” Now the offence for which it was agreed that any one should be put out of the synagogue, was, if he “did confess, that Jesus was the Messiah.” Hence we may have a clear understanding of that passage of St. Paul to the Romans, where he tells them positively, what is the faith he preaches, Rom. x. 8, 9, “That is the word of faith which we preach, that if thou shalt confess with thy mouth the Lord Jesus, and believe in thine heart, that God hath raised him from the dead, thou shalt be saved;” and that also of 1 John iv. 14, 15, “We have seen, and do testify, that the Father sent the Son to be the Saviour of the world: whosoever shall confess, that Jesus is the Son of God, God dwelleth in him, and he in God.” Where confessing Jesus to be the Son of God, is the same with confessing him to be the Messiah; those two expressions being understood amongst the jews to signify the same thing, as we have shown already.

How calling him the Son of God, came to signify that he was the Messiah, would not be hard to show. But it is enough, that it appears plainly, that it was so used, and had that import among the jews at that time: which if any one desires to have further evidenced to him, he may add Matt. xxvi. 63. John vi. 69. and xi. 27. and xx. 31. to those places before occasionally taken notice of.

As was the apostles commission, such was their performance; as we read, Luke xi. 6, “They departed and went through the towns, preaching the gospel, and healing every-where.” Jesus bid them preach, “saying, The kingdom of heaven is at hand.” And St. Luke tells us, they went through the towns preaching the gospel; a word which in Saxon answers well the Greek εὐαγγέλιον, and signifies, as that does, “good news.” So that what the inspired writers call the gospel, is nothing but the good tidings, that the Messiah and his kingdom was come; and so it is to be understood in the New Testament, and so the angel calls it, “good tidings of great joy,” Luke ii. 10, bringing the first news of our Saviour’s birth. And this seems to be all that his disciples were at that time sent to preach.

So, Luke ix. 59, 60, to him that would have excused his present attendance, because of burying his father; “Jesus said unto him, let the dead bury their dead, but go thou and preach the kingdom of God.” When I say, this was all they were to preach, I must be understood that this was the faith

they preached; but with it they joined obedience to the Messiah, whom they received for their king. So likewise, when he sent out the seventy, Luke x. their commission was in these words, ver. 9, "Heal the sick, and say unto them, The kingdom of God is come nigh unto you."

After the return of his apostles to him, he sits down with them on a mountain; and a great multitude being gathered about them, St. Luke tells us, chap. ix. 11, "The people followed him, and he received them, and spake unto them of the kingdom of God, and healed them that had need of healing." This was his preaching to this assembly, which consisted of five thousand men, besides women and children: all which great multitude he fed with five loaves and two fishes, Matt. xiv. 21. And what this miracle wrought upon them, St. John tells us, chap. vi. 14, 15, "Then these men, when they had seen the miracle that Jesus did, said, This is of a truth that prophet that should come into the world," i. e. the Messiah. For the Messiah was the only person that they expected from God, and this the time they looked for him. And hence John the Baptist, Matt. xi. 3, styles him, "He that should come;" as in other places, "come from God," or "sent from God," are phrases used for the Messiah.

Here we see our Saviour keep to his usual method of preaching: he speaks to them of the kingdom of God, and does miracles; by which they might understand him to be the Messiah, whose kingdom he spake of. And here we have the reason also, why he so much concealed himself, and forbore to own his being the Messiah. For what the consequence was, of the multitude's but thinking him so, when they were got together, St. John tells us in the very next words: "When Jesus then perceived, that they would come and take him by force to make him a king, he departed again into a mountain himself alone." If they were so ready to set him up for their king, only because they gathered from his miracles that he was the Messiah, whilst he himself said nothing of it: what would not the people have done, and what would not the scribes and pharisees have had an opportunity to accuse him of, if he had openly professed himself to have been the Messiah, that king they looked for? But this we have taken notice of already.

From hence going to Capernaum, whither he was followed by a great part of the people, whom he had the day before so miraculously fed; he, upon the occasion of their following him for the loaves, bids them seek for the meat that endureth to eternal life: and thereupon, John vi. 22 — 69, declares to them his being sent from the Father; and that those who believed

in him, should be raised to eternal life: but all this very much involved in a mixture of allegorical terms of eating, and of bread; bread of life, which came down from heaven, &c. Which is all comprehended and expounded in these short and plain words, ver. 47 and 54, “Verily, verily, I say unto you, he that believeth on me hath everlasting life, and I will raise him up at the last day.” The sum of all which discourse is, that he was the Messiah sent from God; and that those who believed him to be so, should be raised from the dead at the last day, to eternal life. These whom he spoke to here were of those who, the day before, would by force have made him king; and therefore it is no wonder he should speak to them of himself, and his kingdom and subjects, in obscure and mystical terms; and such as should offend those who looked for nothing but the grandeur of a temporal kingdom in this world, and the protection and prosperity they had promised themselves under it. The hopes of such a kingdom, now that they had found a man that did miracles, and therefore concluded to be the Deliverer they expected; had the day before almost drawn them into an open insurrection, and involved our Saviour in it. This he thought fit to put a stop to; they still following him, ’tis like, with the same design. And therefore, though he here speaks to them of his kingdom, it was in a way that so plainly baulked their expectation, and shocked them, that when they found themselves disappointed of those vain hopes, and that he talked of their eating his flesh, and drinking his blood, that they might have life; the jews said, ver. 52, “How can this man give us his flesh to eat? And many, even of his disciples said, It was an hard saying: Who can hear it?” And so were scandalized in him, and forsook him, ver. 60, 66. But what the true meaning of this discourse of our Saviour was, the confession of St. Peter, who understood it better, and answered for the rest of the apostles, shows: when Jesus answered him, ver. 67, “Will ye also go away?” Then Simon Peter answered him, “Lord, to whom shall we go? Thou hast the words of eternal life:” i. e. thou teachest us the way to attain eternal life; and accordingly, “we believe, and are sure, that thou art the Messiah, the Son of the living God.” This was the eating his flesh and drinking his blood, whereby those who did so had eternal life.

Some time after this, he inquires of his disciples, Mark viii. 27, who the people took him for? They telling him, “for John the Baptist,” or one of the old prophets risen from the dead; he asked, What they themselves thought? And here again, Peter answers in these words, Mark viii. 29, “Thou art the

Messiah,” Luke ix. 20, “The Messiah of God.” And Matt. xvi. 16, “Thou art the Messiah, the Son of the living God:” Which expressions, we may hence gather, amount to the same thing. Whereupon our Saviour tells Peter, Matt. xvi. 17, 18, That this was such a truth “as flesh and blood could not reveal to him, but only his Father who was in heaven;” and that this was the foundation, on which he was “to build his church:” by all the parts of which passage it is more than probable, that he had never yet told his apostles in direct words, that he was the Messiah; but that they had gathered it from his life and miracles. For which we may imagine to ourselves this probable reason; because that, if he had familiarly, and in direct terms, talked to his apostles in private, that he was the Messiah the Prince, of whose kingdom he preached so much in public every-where; Judas, whom he knew false and treacherous, would have been readily made use of, to testify against him, in a matter that would have been really criminal to the Roman governor. This, perhaps, may help to clear to us that seemingly abrupt reply of our Saviour to his apostles, John vi. 70, when they confessed him to be the Messiah: I will, for the better explaining of it, set down the passage at large. Peter having said, “We believe and are sure that thou art the Messiah, the Son of the living God; Jesus answered them, Have not I chosen you twelve, and one of you is διά[Editor: illegible character]ολος?” This is a reply, seeming at first sight, nothing to the purpose; when yet it is sure all our Saviour’s discourses were wise and pertinent. It seems therefore to me to carry this sense, to be understood afterwards by the eleven (as that of destroying the temple, and raising it again in three days was) when they should reflect on it, after his being betrayed by Judas: you have confessed, and believe the truth concerning me; I am the Messiah your king: but do not wonder at it, that I have never openly declared it to you; for amongst you twelve, whom I have chosen to be with me, there is one who is an informer, or false accuser, (for so the Greek word signifies, and may, possibly, here be so translated, rather than devil) who, if I had owned myself in plain words to have been the “Messiah, the king of Israel,” would have betrayed me, and informed against me.

That he was yet cautious of owning himself to his apostles, positively, to be the Messiah, appears farther from the manner wherein he tells Peter, ver. 18, that he will build his church upon that confession of his, that he was the Messiah: I say unto thee, “Thou art Cephas,” or a rock, “and upon this rock I will build my church, and the gates of hell shall not prevail against it.”

Words too doubtful to be laid hold on against him, as a testimony that he professed himself to be the Messiah; especially if we join with them the following words, ver. 19, “And I will give thee the keys of the kingdom of heaven, and what thou shalt bind on earth, shall be bound in heaven; and what thou shalt loose on earth, shall be loosed in heaven.” Which being said personally to Peter, render the foregoing words of our Saviour (wherein he declares the fundamental article of his church to be the believing him to be the Messiah) the more obscure and doubtful, and less liable to be made use of against him; but yet such as might afterwards be understood. And for the same reason, he yet, here again, forbids the apostles to say that he was the Messiah, ver. 20.

From this time (say the evangelists) “Jesus began to show to his disciples,” i. e. his apostles, (who are often called disciples,) “that he must go to Jerusalem, and suffer many things from the elders, chief priests, and scribes; and be killed, and be raised again the third day,” Matt. xvi. 21. These, though all marks of the Messiah, yet how little understood by the apostles, or suited to their expectation of the Messiah, appears from Peter’s rebuking him for it in the following words, Matt. xvi. 22. Peter had twice before owned him to be the Messiah, and yet he cannot here bear that he should suffer, and be put to death, and be raised again. Whereby we may perceive, how little yet Jesus had explained to the apostles what personally concerned himself. They had been a good while witnesses of his life and miracles: and thereby being grown into a belief that he was the Messiah, were, in some degree, prepared to receive the particulars that were to fill up that character, and answer the prophecies concerning him. This, from henceforth, he began to open to them (though in a way which the jews could not form an accusation out of;) the time of the accomplishment of all, in his sufferings, death, and resurrection, now drawing on. For this was in the last year of his life: he being to meet the jews at Jerusalem but once more at the passover, and then they should have their will upon him: and, therefore, he might now begin to be a little more open concerning himself: though yet so, as to keep himself out of the reach of any accusation, that might appear just or weighty to the Roman deputy.

After his reprimand to Peter, telling him, “That he savoured not the things of God, but of man,” Mark viii. 34, he calls the people to him, and prepares those, who would be his disciples, for suffering, telling them, ver. 38, “Whosoever shall be ashamed of me and my words in this adulterous

and sinful generation, of him also shall the Son of man be ashamed, when he cometh in the glory of his Father, with the holy angels:" and then subjoins, Matt. xvi. 27, 28, two great and solemn acts, wherein he would show himself to be the Messiah, the king: "For the Son of man shall come in the glory of his Father, with his angels; and then he shall render to every man according to his works." This is evidently meant of the glorious appearance of his kingdom, when he shall come to judge the world at the last day; described more at large, Matt. xxv. "When the Son of man shall come in his glory, and all the holy angels with him, then shall he sit upon the throne of his glory. Then shall the King say to them on his right hand," &c.

But what follows in the place above quoted, Matt. xvi. 28, "Verily, verily, there be some standing here, who shall not taste of death, till they see the Son of man coming in his kingdom;" importing that dominion, which some there should see him exercise over the nation of the jews; was so covered, by being annexed to the preaching, ver. 27, (where he spoke of the manifestation and glory of his kingdom, at the day of judgment,) that though his plain meaning here in ver. 28, be, that the appearance and visible exercise of his kingly power in his kingdom was so near, that some there should live to see it; yet if the foregoing words had not cast a shadow over these latter, but they had been left plainly to be understood, as they plainly signified; that he should be a King, and that it was so near, that some there should see him in his kingdom; this might have been laid hold on, and made the matter of a plausible and seemingly just accusation against him, by the jews before Pilate. This seems to be the reason of our Saviour's inverting here the order of the two solemn manifestations to the world, of his rule and power; thereby perplexing at present his meaning, and securing himself, as was necessary, from the malice of the jews, which always lay at catch to entrap him, and accuse him to the Roman governor; and would, no doubt, have been ready to have alleged these words, "Some here shall not taste of death, till they see the Son of man coming in his kingdom," against him, as criminal, had not their meaning been, by the former verse, perplexed, and the sense at that time rendered unintelligible, and not applicable by any of his auditors to a sense that might have been prejudicial to him before Pontius Pilate. For how well the chief of the jews were disposed towards him, St. Luke tells us, chap. xi. 54, "Laying wait for him, and seeking to catch something out of his mouth, that they might accuse him;" which may

be a reason to satisfy us of the seemingly doubtful and obscure way of speaking, used by our Saviour in other places; his circumstances being such, that without such a prudent carriage and reservedness, he could not have gone through the work which he came to do; nor have performed all the parts of it, in a way correspondent to the descriptions given of the Messiah; and which would be afterwards fully understood to belong to him, when he had left the world.

After this, Matt. xvii. 10, &c. he, without saying it in direct words, begins, as it were, to own himself to his apostles to be the Messiah, by assuring them, that as the scribes, according to the prophecy of Malachi, chap. iv. 5, rightly said, that Elias was to usher in the Messiah; so indeed Elias was already come, though the jews knew him not, and treated him ill; whereby “they understood that he spoke to them of John the Baptist,” ver. 13. And a little after he somewhat more plainly intimates, that he is the Messiah, Mark ix. 41, in these words: “Whosoever shall give you a cup of water to drink in my name, because ye belong to the Messiah.” This, as I remember, is the first place where our Saviour ever mentioned the name of Messiah; and the first time that he went so far towards the owning, to any of the jewish nation, himself to be him.

In his way to Jerusalem, bidding one follow him, Luke ix. 59, who would first bury his father, ver. 60, “Jesus said unto him, Let the dead bury their dead; but go thou and preach the kingdom of God.” And Luke x. 1, sending out the seventy disciples, he says to them, ver. 9, “Heal the sick, and say, The kingdom of God is come nigh unto you.” He had nothing else for these, or for his apostles, or any one, it seems, to preach, but the good news of the coming of the kingdom of the Messiah. And if any city would not receive them, he bids them, ver. 10, “Go into the streets of the same, and say, Even the very dust of your city, which cleaveth on us, do we wipe off against you; notwithstanding, be ye sure of this, that the kingdom of God is come nigh unto you.” This they were to take notice of, as that which they should dearly answer for, viz. that they had not with faith received the good tidings of the kingdom of the Messiah.

After this, his brethren say unto him, John vii. 2, 3, 4, (the feast of tabernacles being near,) “Depart hence, and go into Judea, that thy disciples also may see the works that thou doest: for there is no man that does any thing in secret, and he himself seeketh to be known openly. If thou do these things, show thyself to the world.” Here his brethren, which, the next verse

tells us, “did not believe in him,” seem to upbraid him with the inconsistency of his carriage; as if he designed to be received for the Messiah, and yet was afraid to show himself: to whom he justified his conduct (mentioned ver. 1.) in the following verses, by telling them, “That the world” (meaning the jews especially) “hated him, because he testified of it, that the works thereof are evil; and that his timew as not yet fully come,” wherein to quit his reserve, and abandon himself freely to their malice and fury. Therefore, though he “went up unto the feast,” it was “not openly, but, as it were, in secret,” ver. 10. And here, coming into the temple about the middle of the feast, he justifies his being sent from God; and that he had not done any thing against the law, in curing the man at the pool of Bethesda, John v. 1 — 16, on the sabbath-day; which, though done above a year and a half before, they made use of as a pretence to destroy him. But what was the true reason of seeking his life, appears from what we have in this viith chapter, ver. 25 — 34, “Then said some of them at Jerusalem, Is not this he whom they seek to kill? But lo, he speaketh boldly, and they say nothing unto him. Do the rulers know indeed, that this is the very Messiah? Howbeit, we know this man whence he is; but when the Messiah cometh, no man knoweth whence he is. Then cried Jesus in the temple, as he taught, Ye both know me and ye know whence I am: and I am not come of myself, but he that sent me is true, whom ye know not. But I know him; for I am from him, and he hath sent me. Then they sought [an occasion] to take him, but no man laid hands on him, because his hour was not yet come. And many of the people believed on him, and said, When the Messiah cometh, will he do more miracles than these, which this man hath done? The pharisees heard that the people murmured such things concerning him; and the pharisees and chief priests sent officers to take him. Then said Jesus unto them, Yet a little while am I with you, and then I go to him that sent me: ye shall seek me, and not find me; and where I am, there you cannot come. Then said the jews among themselves, Whither will he go, that we shall not find him?” Here we find that the great fault in our Saviour, and the great provocation to the jews, was his being taken for the Messiah; and doing such things as made the people “believe in him;” i. e. believe that he was the Messiah. Here also our Saviour declares, in words very easy to be understood, at least after his resurrection, that he was the Messiah: for, if he were “sent from God,” and did his miracles by the Spirit of God, there could be no doubt but he was the Messiah. But yet this declaration was in a

way that the pharisees and priests could not lay hold on, to make an accusation of, to the disturbance of his ministry, or the seizure of his person, how much soever they desired it: for his time was not yet come. The officers they had sent to apprehend him, charmed with his discourse, returned without laying hands on him, ver. 45, 46. And when the chief priests asked them, "Why they brought him not?" They answered, "Never man spake like this man." Whereupon the pharisees reply, "Are ye also deceived? Have any of the rulers, or of the pharisees, believed on him? But this people, who know not the law, are cursed." This shows what was meant "by believing on him," viz. believing that he was the Messiah. For, say they, have any of the rulers, who are skilled in the law, or of the devout and learned pharisees, acknowledged him to be the Messiah? For as for those who in the division among the people concerning him, say, "That he is the Messiah," they are ignorant and vile wretches, know nothing of the scripture, and being accursed, are given up by God, to be deceived by this impostor, and to take him for the Messiah. Therefore, notwithstanding their desire to lay hold on him, he goes on; and ver. 37, 38, "In the last and great day of the feast, Jesus stood and cried, saying, If any man thirst, let him come unto me and drink: he that believeth on me, as the scripture hath said, out of his belly shall flow rivers of living water." And thus he here again declares himself to be the Messiah; but in the prophetic style, as we may see by the next verse of this chapter, and those places in the Old Testament, that these words of our Saviour refer to.

In the next chapter, John viii. all that he says concerning himself, and what they were to believe, tends to this, viz. that he was sent from God his Father; and that, if they did not believe that he was the Messiah, they should die in their sins: but this, in a way, as St. John observes, ver. 27, that they did not well understand. But our Saviour himself tells them, ver. 28, "When ye have lift up the Son of man, then ye shall know that I am he."

Going from them, he cures the man born blind, whom meeting with again, after the jews had questioned him, and cast him out, John ix. 35 — 38, "Jesus said to him, Dost thou believe on the Son of God? He answered, Who is he, Lord, that I might believe on him? And Jesus said unto him, Thou hast both seen him, and it is he that talketh with thee. And he said, Lord, I believe." Here we see this man is pronounced a believer, when all that was proposed to him to believe, was, that Jesus was "the Son of God," which was, as we have already shown, to believe that he was the Messiah.

In the next chapter, John x. 1 — 21, he declares the laying down of his life both for jews and gentiles; but in a parable which they understood not, ver. 6 — 20.

As he was going to the feast of the dedication, the pharisees ask him, Luke xvii. 20, “When the kingdom of God,” i. e. of the Messiah, “should come?” He answers, That it should not come with pomp and observation, and great concourse; but that it was already begun amongst them. If he had stopt here, the sense had been so plain, that they could hardly have mistaken him; or have doubted, but that he meant, that the Messiah was already come, and amongst them; and so might have been prone to infer, that Jesus took upon him to be him. But here, as in the place before taken notice of, subjoining to this future revelation of himself, both in his coming to execute vengeance on the jews, and in his coming to judgment, mixed together, he so involved his sense, that it was not easy to understand him. And therefore the jews came to him again in the temple, John x. 23, and said, “How long dost thou make us doubt? If thou be the Christ tell us plainly. Jesus answered, I told you, and ye believed not: the works that I do in my Father’s name, they bear witness of me. But ye believed not, because ye are not of my sheep, as I told you.” The believing here, which he accuses them of not doing, is plainly their not believing him to be the Messiah, as the foregoing words evince; and in the same sense it is evidently meant in the following verses of this chapter.

From hence Jesus going to Bethabara, and thence returning into Bethany; upon Lazarus’s death, John xi. 25 — 27, Jesus said to Martha, “I am the resurrection and the life; he that believeth in me, though he were dead, yet shall he live; and whosoever liveth and believeth in me shall not die for ever.” So I understand ἀποθάνη εἰς τὸν αἰῶνα, answerable to ζήσεται εἰς τὸν αἰῶνα, of the septuagint, Gen. iii. 22, or John vi. 51, which we read right, in our English translation, “live for ever.” But whether this saying of our Saviour here, can with truth be translated, “He that liveth and believeth in me shall never die,” will be apt to be questioned. But to go on, “Believest thou this? She said unto him, Yea, Lord, I believe that thou art the Messiah, the Son of God, which should come into the world.” This she gives as a full answer to our Saviour’s demands; this being that faith, which, whoever had, wanted no more to make them believers.

We may observe farther, in this same story of the raising of Lazarus, what faith it was our Saviour expected, by what he says, ver. 41, 42,

“Father, I thank thee, that thou hast heard me; and I know that thou hearest me always. But because of the people who stand by, I said it, that they may believe that thou hast sent me.” And what the consequence of it was, we may see, ver. 45, “Then many of the jews who came to Mary, and had seen the things which Jesus did, believed on him;” which belief was, that he was “sent from the Father;” which, in other words, was, that he was the Messiah. That this is the meaning, in the evangelists, of the phrase, of “believing on him,” we have a demonstration in the following words, ver. 47, 48, “Then gathered the chief priests and pharisees a council, and said, What do we? For this man does many miracles; and if we let him alone, all men will believe on him.” Those who here say, all men would believe on him, were the chief priests and pharisees, his enemies, who sought his life, and therefore could have no other sense nor thought of this faith in him, which they spake of; but only the believing him to be the Messiah: and that that was their meaning, the adjoining words show: “If we let him alone, all the world will believe on him;” i. e. believe him to be the Messiah. “And the Romans will come and take away both our place and nation.” Which reasoning of theirs was thus grounded: If we stand still, and let the people “believe on him,” i. e. receive him for the Messiah: they will thereby take him and set him up for their king, and expect deliverance by him; which will draw the Roman arms upon us, to the destruction of us and our country. The Romans could not be thought to be at all concerned in any other belief whatsoever, that the people might have on him. It is therefore plain, that “believing on him,” was, by the writers of the gospel, understood to mean the “believing him to be the Messiah.” The sanhedrim therefore, ver. 53, 54, from that day forth consulted to put him to death. “Jesus therefore walked not yet” (for so the word ἔτι signifies, and so I think it ought here to be translated) “boldly,” or open-faced, “among the jews,” i. e. of Jerusalem.” Ἐτι cannot well here be translated “no more,” because, within a very short time after, he appeared openly at the passover, and by his miracles and speech declared himself more freely than ever he had done; and all the week before his passion, taught daily in the temple, Matt. xx. 17. Mark. x. 32. Luke xviii. 31, &c. The meaning of this place seems therefore to be this: that his time being not yet come, he durst not yet show himself openly and confidently before the scribes and pharisees, and those of the sanhedrim at Jerusalem, who were full of malice against him, and had resolved his death: “But went thence into a country near the wilderness, into a city called

Ephraim, and there continued with his disciples,” to keep himself out of the way until the passover, “which was nigh at hand,” ver. 55. In his return thither, he takes the twelve aside, and tells them before-hand what should happen to him at Jerusalem, whither they were now going; and that all things that are written by the prophets, concerning the Son of man, should be accomplished; that he should be betrayed to the chief priests and scribes; and that they should condemn him to death and deliver him to the gentiles; that he should be mocked, and spit on, and scourged and put to death; and the third day he should rise again. But St. Luke tells us, chap. xviii. 34, That the apostles “understood none of these things, and this saying was hid from them; neither knew they the things which were spoken.” They believed him to be the Son of God, the Messiah sent from the Father; but their notion of the Messiah was the same with the rest of the jews, that he should be a temporal prince and deliverer: accordingly we see, Mark x. 35, that, even in this their last journey with him to Jerusalem, two of them, James and John, coming to him, and falling at his feet, said, “Grant unto us that we may sit one on thy right hand, and the other on thy left hand, in thy glory:” or, as St. Matthew has it, chap. xx. 21, “in thy kingdom.” That which distinguished them from the unbelieving jews, was, that they believed Jesus to be the very Messiah, and so received him as their King and Lord.

And now, the hour being come that the Son of man should be glorified, he, without his usual reserve, makes his public entry into Jerusalem, riding on a young ass! “As it is written, Fear not, daughter of Sion; behold, thy King cometh, sitting on an ass’s colt.” But “these things,” says St. John, chap. xii. 16, “his disciples understood not, at the first; but when Jesus was glorified, then remembered they that these things were written of him, and that they had done these things unto him.” Though the apostles believed him to be the Messiah, yet there were many occurrences of his life, which they understood not (at the time when they happened) to be foretold of the Messiah; which, after his ascension, they found exactly to quadrate. Thus according to what was foretold of him, he rode into the city, “all the people crying, Hosanna, blessed is the King of Israel, that cometh in the name of the Lord.” This was so open a declaration of his being the Messiah, that, Luke xix. 39, “Some of the pharisees from among the multitude said unto him, Master, rebuke thy disciples.” But he was so far now from stopping them, or disowning this their acknowledgment of his being the Messiah, that he said unto them, “I tell you, that if these should hold their peace, the

stones would immediately cry out.” And again upon the like occasion of their crying, “Hosanna to the Son of David,” in the temple, Matt. xxi. 15, 16, “When the chief priests and scribes were sore displeased, and said unto him, Hearest thou what they say? Jesus said unto them, Yea; have ye never read, Out of the mouths of babes and sucklings thou hast perfected praise?” And now, ver. 14, 15, “He cures the blind and the lame openly in the temple. And when the chief priests and scribes saw the wonderful things that he did, and the children crying in the temple, Hosanna, they were enraged.” One would not think, that after the multitude of miracles that our Saviour had now been doing for above three years together, the curing the lame and blind should so much move them. But we must remember, that though his ministry had abounded with miracles, yet the most of them had been done about Galilee, and in parts remote from Jerusalem. There is but one left on record, hitherto done in that city; and that had so ill a reception, that they sought his life for it: as we may read John v. 16. And therefore we hear not of his being at the next passover, because he was there only privately, as an ordinary jew: the reason whereof we may read, John vii. 1, “After these things Jesus walked in Galilee; for he would not walk in Jewry, because the jews sought to kill him.”

Hence we may guess the reason why St. John omitted the mention of his being at Jerusalem, at the third passover, after his baptism; probably because he did nothing memorable there. Indeed when he was at the feast of tabernacles, immediately preceding this his last passover, he cured the man born blind: but it appears not to have been done in Jerusalem itself, but in the way, as he retired to the mount of Olives; for there seems to have been nobody by when he did it, but his apostles. Compare ver. 2. with ver. 8, 10, of John ix. This, at least, is remarkable, that neither the cure of this blind man, nor that of the other infirm man, at the passover, above a twelve-month before, at Jerusalem, was done in the sight of the scribes, pharisees, chief priests, or rulers. Nor was it without reason, that in the former part of his ministry, he was cautious of showing himself to them to be the Messiah. But now, that he was come to the last scene of his life, and that the passover was come, the appointed time, wherein he was to complete the work he came for, in his death and resurrection, he does many things in Jerusalem itself before the face of the scribes, pharisees, and whole body of the jewish nation, to manifest himself to be the Messiah. And, as St. Luke says, chap. xix. 47, 48, “he taught daily in the temple: but the chief priests, and the

scribes, and the chief of the people, sought to destroy him; and could not find what they might do; for all the people were very attentive to hear him." What he taught we are left to guess, by what we have found him constantly preaching elsewhere: but St. Luke tells us, chap. xx. 1, "He taught in the temple, and evangelized;" or, as we translate it, "preached the gospel;" which, as we have showed, was the making known to them the good news of the kingdom of the Messiah. And this we shall find he did, in what now remains of his history.

In the first discourse of his, which we find upon record, after this, John xii. 20, &c. he foretels his crucifixion, and the belief of all sorts, both jews and gentiles, on him after that. Whereupon the people say to him, ver. 34, "We have heard out of the law, that the Messiah abideth for ever: and how sayest thou, that the Son of man must be lifted up? Who is this Son of man?" In his answer, he plainly designs himself under the name of Light; which was what he had declared himself to them to be, the last time that they had seen him in Jerusalem. For then at the feast of tabernacles, but six months before, he tells them in the very place where he now is, viz. in the temple, "I am the Light of the world; whosoever follows me shall not walk in darkness, but shall have the light of life;" as we may read, John viii. 12. And ix. 5, he says, "As long as I am in the world, I am the Light of the world." But neither here, nor any-where else, does he, even in these four or five last days of his life, (though he knew his hour was come, and was prepared to his death, ver. 27, and scrupled not to manifest himself to the rulers of the jews to be the Messiah, by doing miracles before them in the temple,) ever once in direct words own himself to the jews to be the Messiah; though by miracles and other ways he did every-where make it known unto them, so that it might be understood. This could not be without some reason; and the preservation of his life, which he came now to Jerusalem on purpose to lay down, could not be it. What other could it then be, but the same which had made him use caution in the former part of his ministry; so to conduct himself, that he might do the work which he came for, and in all parts answer the character given of the Messiah, in the law and the prophets? He had fulfilled the time of his ministry; and now taught and did miracles openly in the temple, before the rulers and the people, not fearing to be seized. But he would not be seized for any thing that might make him a criminal to the government: and therefore he avoided giving those, who, in the division that was about him, inclined towards him,

occasion of tumult for his sake: or to the jews, his enemies, matter of just accusation, against him, out of his own mouth, by professing himself to be the Messiah, the King of Israel, in direct words. It was enough that by words and deeds he declared it so to them, that they could not but understand him; which it is plain they did, Luke xx. 16, 19. Matt. xxi. 45. But yet neither his actions, which were only doing of good; nor words, which were mystical and parabolical (as we may see, Matt. xxi. and xxii, and the parallel places of Matthew and Luke;) nor any of his ways of making himself known to be the Messiah; could be brought in testimony, or urged against him, as opposite or dangerous to the government. This preserved him from being condemned as a malefactor; and procured him a testimony from the Roman governor, his judge, that he was an innocent man, sacrificed to the envy of the jewish nation. So that he avoided saying that he was the Messiah, that to those who would call to mind his life and death, after his resurrection, he might the more clearly appear to be so. It is farther to be remarked, that though he often appeals to the testimony of his miracles, who he is, yet he never tells the jews, that he was born at Bethlehem, to remove the prejudice that lay against him, whilst he passed for a Galilean, and which was urged as a proof that he was not the Messiah, John vii. 41, 42. The healing of the sick, and doing good miraculously, could be no crime in him, nor accusation against him. But the naming of Bethlehem for his birth-place might have wrought as much upon the mind of Pilate, as it did on Herod's; and have raised a suspicion in Pilate, as prejudicial to our Saviour's innocence as Herod was to the children born there. His pretending to be born at Bethlehem, as it was liable to be explained by the jews could not have failed to have met with a sinister interpretation in the Roman governor, and have rendered Jesus suspected of some criminal design against the government. And hence we see, that when Pilate asked him, John xix. 9, "Whence art thou? Jesus gave him no answer."

Whether our Saviour had not an eye to this straitness, this narrow room that was left to his conduct, between the new converts and the captious jews, when he says, Luke xii. 50, "I have a baptism to be baptized with, and πῶς συνέχομαι, how am I straitened until it be accomplished!" I leave to be considered. "I am come to send fire on the earth," says our Saviour, "and what if it be already kindled?" i. e. There begin already to be divisions about me, John vii. 12, 43, and ix. 16, and x. 19. And I have not the

freedom, the latitude, to declare myself openly to be the Messiah; though I am he, that must not be spoken on, until after my death. My way to my throne is closely hedged in on every side, and much straitened; within which I must keep, until it bring me to my cross in its due time and manner; so that it do not cut short the time, nor cross the end of my ministry.

And therefore, to keep up this inoffensive character, and not to let it come within the reach of accident or calumny, he withdrew, with his apostles, out of the town, every evening; and kept himself retired out of the way, Luke xxi. 37. "And in the day-time he was teaching in the temple, and every night he went out and abode in the mount, that is called the Mount of Olives," that he might avoid all concourse to him in the night, and give no occasion of disturbance, or suspicion of himself, in that great conflux of the whole nation of the jews, now assembled in Jerusalem at the passover.

But to return to his preaching in the temple: he bids them, John xii. 36, "To believe in the Light, whilst they have it." And he tells them, ver. 46, "I am the Light come into the world, that every one who believes in me, should not remain in darkness;" which believing in him, was the believing him to be the Messiah, as I have elsewhere showed.

The next day, Matt. xxi. he rebukes them for not having believed John the Baptist, who had testified that he was the Messiah. And then, in a parable, declares himself to be the "Son of God," whom they should destroy; and that for it God would take away the kingdom of the Messiah from them, and give it to the gentiles. That they understood him thus, is plain from Luke xxi. 16, "And when they heard it, they said, God forbid." And ver. 19, "For they knew that he had spoken this parable against them."

Much to the same purpose was his next parable, concerning "the kingdom of heaven," Matt. xxi. 1 — 10. That the jews not accepting of the kingdom of the Messiah, to whom it was first offered, other should be brought in.

The scribes and pharisees and chief priests, not able to bear the declaration he made of himself to be the Messiah (by his discourses and miracles before them, ἔμπροσθεν αὐτῶν, John xii. 37, which he had never done before) impatient of his preaching and miracles, and being not able otherwise to stop the increase of his followers, (for, "said the pharisees among themselves, Perceive ye how ye prevail nothing? Behold, the world is gone after him,") John xii. 19. So that "the chief priests, and the scribes, and the chief of the people sought to destroy him," the first day of his

entrance into Jerusalem, Luke xix. 47. The next day again, they were intent upon the same thing, Mark xi. 17, 18, “And he taught in the temple; and the scribes and the chief priests heard it, and sought how they might destroy him; for they feared him, because all the people were astonished at his doctrine.”

The next day but one, upon his telling them the kingdom of the Messiah should be taken from them, “The chief priests and scribes sought to lay hands on him the same hour, and they feared the people,” Luke xx. 19. If they had so great a desire to lay hold on him, why did they not? They were the chief priests and the rulers, the men of power. The reason St. Luke plainly tells us in the next verse: “And they watched him, and sent forth spies, who should feign themselves just men, that they might take hold of his words, that so they might deliver him unto the power and authority of the governor.” They wanted matter of accusation against him, to the power they were under; that they watched for, and that they would have been glad of, if they could have “entangled him in his talk;” as St. Matthew expresses it, chap. xxii. 15. If they could have laid hold on any word, that had dropt from him, that they might have rendered him guilty, or suspected to the Roman governor; that would have served their turn, to have laid hold upon him, with hopes to destroy him. For their power not answering their malice, they could not put him to death by their own authority, without the permission and assistance of the governor; as they confess, John xviii. 31, “It is not lawful for us to put any man to death.” This made them so earnest for a declaration in direct words, from his own mouth, that he was the Messiah. It was not that they would more have believed in him, for such a declaration of himself, than they did for his miracles, or other ways of making himself known, which it appears they understood well enough. But they wanted plain direct words, such as might support an accusation, and be of weight before an heathen judge. This was the reason why they pressed him to speak out, John x. 24, “Then came the jews round about him, and said unto him, How long dost thou hold us in suspense? If thou be the Messiah, tell us plainly, παρρησίᾳ;” i. e. in direct words: for that St. John uses it in that sense we may see, chap. xi. 11 — 14, “Jesus saith to them, Lazarus sleepeth. His disciples said, If he sleeps, he shall do well. Howbeit, Jesus spake of his death; but they thought he had spoken of taking rest in sleep. Then said Jesus to them plainly, παρρησίᾳ, Lazarus is dead.” Here we see what is meant by παρρησίᾳ, plain, direct words, such as express the

same thing without a figure; and so they would have had Jesus pronounce himself to be the Messiah. And the same thing they press again, Matt. xxvi. 63, the high priest adjuring him by the living God, to tell them whether he were the Messiah the Son of God; as we shall have occasion to take notice by-and-by.

This we may observe in the whole management of their design against his life. It turned upon this, that they wanted and wished for a declaration from him in direct words, that he was the Messiah; something from his own mouth that might offend the Roman power, and render him criminal to Pilate. In the 21st verse of this xxth of Luke, "They asked him, saying, Master, we know that thou sayest and teachest rightly; neither acceptest thou the person of any, but teachest the way of God truly. Is it lawful for us to give tribute to Cæsar, or no?" By this captious question they hoped to catch him, which way soever he answered. For if he had said they ought to pay tribute to Cæsar, it would be plain he allowed their subjection to the Romans; and so in effect disowned himself to be their King and Deliverer; whereby he would have contradicted what his carriage and doctrine seemed to aim at, the opinion that was spread amongst the people, that he was the Messiah. This would have quashed the hopes, and destroyed the faith of those that believed on him; and have turned the ears and hearts of the people from him. If on the other side he answered, No, it is not lawful to pay tribute to Cæsar, they had out of his own mouth wherewithal to condemn him before Pontius Pilate. But St. Luke tells us, ver. 23, "He perceived their craftiness, and said unto them, Why tempt ye me?" i. e. Why do ye lay snares for me? "Ye hypocrites, show me the tribute money;" so it is, Matt. xxii. 19, "Whose image and inscription has it? They said Cæsar's." He said unto them, "Render therefore to Cæsar the things that are Cæsar's, and to God the things that are God's." By the wisdom and caution of which unexpected answer, he defeated their whole design: "and they could not take hold of his words before the people; and they marvelled at his answer, and held their peace." Luke xx. 26. "And leaving him, they departed." Matt. xxii. 22.

He having, by this reply (and what he answered to the sadducees, concerning the resurrection, and to the lawyer about the first commandment, Mark xii.) answered so little to their satisfaction or advantage, they durst ask him no more questions, any of them. And now, their mouths being stopped, he himself begins to question them about the

Messiah; asking the pharisees, Matt. xxii. 41, "What think ye of the Messiah? whose son is he? They say unto him, the Son of David." Wherein though they answered right, yet he shows them in the following words, that, however they pretended to be studiers and teachers of the law, yet they understood not clearly the scriptures concerning the Messiah; and thereupon he sharply rebukes their hypocrisy, vanity, pride, malice, covetousness, and ignorance; and particularly tells them, ver. 13, "Ye shut up the kingdom of heaven against men: for ye neither go in yourselves, nor suffer ye them that are entering, to go in." Whereby he plainly declares to them, that the Messiah was come, and his kingdom begun; but that they refused to believe in him themselves, and did all they could to hinder others from believing in him; as is manifest throughout the New Testament; the history whereof sufficiently explains what is meant here by "the kingdom of heaven," which the scribes and pharisees would neither go into themselves, nor suffer others to enter into. And they could not choose but understand him, though he named not himself in the case.

Provoked anew by his rebukes, they get presently to council, Matt. xxvi. 3, 4. "Then assembled together the chief priests, and the scribes and the elders of the people, unto the palace of the high priest, who was called Caiaphas, and consulted that they might take Jesus by subtlety, and kill him. But they said, Not on the feast-day, lest there should be an uproar among the people. For they feared the people," says Luke, chap. xxii. 2.

Having in the night got Jesus into their hands, by the treachery of Judas, they presently led him away bound to Annas, the father-in-law of Caiaphas. Annas, probably, having examined him, and getting nothing out of him for his purpose, sends him away to Caiaphas, John xviii. 24, where the chief priests, the scribes, and the elders were assembled, Matt. xxvi. 57. John xviii. 13, 19. "The high priest then asked Jesus of his disciples, and of his doctrine. Jesus answered him, I spake openly to the world: I ever taught in the synagogue, and in the temple, whither the jews always resort, and in secret have I said nothing." A proof that he had not in private, to his disciples, declared himself in express words to be the Messiah, the Prince. But he goes on: "Why askest thou me?" Ask Judas, who has been always with me. "Ask them who heard me, what I have said unto them; behold, they know what I said." Our Saviour, we see here, warily declines, for the reasons above-mentioned, all discourse of his doctrine. The sanhedrim, Matt. xxvi. 59, "sought false witness against him:" but when "they found

none that were sufficient,” or came up to the point they desired, which was to have something against him to take away his life (for so I think the words ἵσασι and ἵση mean, Mark xiv. 56, 59.) they try again what they can get out of him himself, concerning his being the Messiah; which, if he owned in express words, they thought they should have enough against him at the tribunal of the Roman governor, to make him “læsæ majestatis reum,” and to take away his life. They therefore say to him, Luke xxii. 67, “If thou be the Messiah, tell us.” Nay, as St. Matthew hath it, the high priest adjures him by the living God, to tell him whether he were the Messiah. To which our Saviour replies, “If I tell you, ye will not believe; and if I also ask you, ye will not answer me, nor let me go.” If I tell you, and prove to you, by the testimony given me from heaven, and by the works that I have done among you, you will not believe in me, that I am the Messiah. Or if I should ask where the Messiah is to be born, and what state he should come in; how he should appear, and other things that you think in me are not reconcileable with the Messiah; you will not answer me, nor let me go, as one that has no pretence to be the Messiah, and you are not afraid should be received for such. But yet I tell you, “Hereafter shall the Son of man sit on the right hand of the power of God,” ver. 70. “Then say they all, Art thou then the Son of God? And he said unto them, Ye say that I am.” By which discourse with them, related at large here by St. Luke, it is plain, that the answer of our Saviour, set down by St. Matthew, chap. xxvi. 64, in these words, “Thou hast said;” and by St. Mark, chap. xiv. 62, in these, “I am;” is in answer only to this question, “Art thou then the Son of God?” and not to that other, “Art thou the Messiah?” which preceded, and he had answered to before; though Matthew and Mark, contracting the story, set them down together, as if making but one question, omitting all the intervening discourse; whereas it is plain out of St. Luke, that they were two distinct questions, to which Jesus gave two distinct answers. In the first whereof he, according to his usual caution, declined saying in plain express words, that he was the Messiah; though in the latter he owned himself to be “the Son of God.” Which though they, being jews, understood to signify the Messiah, yet he knew could be no legal or weighty accusation against him before a heathen; and so it proved. For upon his answering to their question, “Art thou then the Son of God? Ye say that I am;” they cry out, Luke xxii. 71, “What need we any further witness? For we ourselves have heard out of his own mouth.” And so thinking they had enough against him, they hurry him away

to Pilate. Pilate asking them, John xviii. 29 — 32, “What accusation bring you against this man? They answered and said, If he were not a malefactor we would not have delivered him up unto thee.” Then said Pilate unto them, “Take ye him, and judge him according to your law.” But this would not serve their turn, who aimed at his life, and would be satisfied with nothing else. “The jews therefore said unto him, It is not lawful for us to put any man to death.” And this was also, “That the saying of Jesus might be fulfilled, which he spake, signifying what death he should die.” Pursuing therefore their design of making him appear, to Pontius Pilate, guilty of treason against Cæsar, Luke xxiii. 2, “They began to accuse him, saying, We found this fellow perverting the nation, and forbidding to give tribute to Cæsar; saying, that he himself is the Messiah, the King;” all which were inferences of theirs, from his saying, he was “the Son of God:” which Pontius Pilate finding (for it is consonant that he examined them to the precise words he had said), their accusation had no weight with him. However, the name of king being suggested against Jesus, he thought himself concerned to search it to the bottom, John xviii. 33 — 37. “Then Pilate entered again into the judgment-hall, and called Jesus, and said unto him, Art thou the king of the jews? Jesus answered him, Sayest thou this of thyself, or did others tell it thee of me? Pilate answered, Am I a jew? Thine own nation and the chief priests have delivered thee unto me: what hast thou done? Jesus answered, My kingdom is not of this world: if my kingdom were of this world, then would my servants fight, that I should not be delivered to the jews; but now my kingdom is not from hence. Pilate therefore said unto him, Art thou a king then? Jesus answered, Thou sayest that I am a king. For this end was I born, and for this cause came I into the world, that I should bear witness to the truth: every one that is of the truth heareth my voice.” In this dialogue between our Saviour and Pilate, we may observe, 1. That being asked, Whether he were “The king of the jews?” he answered so, that though he deny it not, yet he avoids giving the least umbrage, that he had any design upon the government. For, though he allows himself to be a king, yet, to obviate any suspicion, he tells Pilate, “his kingdom is not of this world;” and evidences it by this, that if he had pretended to any title to that country, his followers, which were not a few, and were forward enough to believe him their king, would have fought for him, if he had had a mind to set himself up by force, or his kingdom were

so to be erected. "But my kingdom," says he, "is not from hence," is not of this fashion, or of this place.

2. Pilate being, by his words and circumstances, satisfied that he laid no claim to his province, or meant any disturbance of the government; was yet a little surprised to hear a man in that poor garb, without retinue, or so much as a servant, or a friend, own himself to be a king; and therefore asks him, with some kind of wonder, "Art thou a king then?"

That our Saviour declares, that his great business into the world was, to testify and make good this great truth, that he was a king; i. e. in other words, that he was the Messiah.

That whoever were followers of truth, and got into the way of truth and happiness, received this doctrine concerning him, viz. That he was the Messiah, their King.

Pilate being thus satisfied that he neither meant, nor could there arise, any harm from his pretence, whatever it was, to be a king; tells the jews, ver. 31, "I find no fault in this man." But the jews were the more fierce, Luke xxiii. 5. saying, "He stirreth up the people to sedition, by his preaching through all Jewry, beginning from Galilee to this place." And then Pilate, learning that he was of Galilee, Herod's jurisdiction, sent him to Herod; to whom also "the chief priests and scribes," ver. 10, "vehemently accused him." Herod, finding all their accusations either false or frivolous, thought our Saviour a bare object of contempt; and so turning him only into ridicule, sent him back to Pilate: who, calling unto him the chief priests, and the rulers, and the people, ver. 14, "Said unto them, Ye have brought this man unto me, as one that perverteth the people; and behold, I having examined him before you, have found no fault in this man, touching these things whereof ye accuse him; no, nor yet Herod; for I sent you to him: and lo, nothing worthy of death is done by him." And therefore he would have released him: "For he knew the chief priests had delivered him through envy," Mark xv. 10. And when they demanded Barabbas to be released, but as for Jesus, cried, "Crucify him;" Luke xxiii. 22; "Pilate said unto them the third time, Why? What evil hath he done? I have found no cause of death in him; I will, therefore, chastise him, and let him go.

We may observe, in all this whole prosecution of the jews, that they would fain have got it out of Jesus's own mouth, in express words, that he was the Messiah: which not being able to do, with all their heart and endeavour; all the rest that they could allege against him not amounting to a

proof before Pilate, that he claimed to be king of the jews; or that he had caused, or done any thing towards a mutiny or insurrection among the people (for upon these two, as we see, their whole charge turned); Pilate again and again pronounced him innocent: for so he did a fourth, and a fifth time; bringing him out to them, after he had whipped him, John xix. 4, 6. And after all, “when Pilate saw that he could prevail nothing, but that rather a tumult was made, he took water, and washed his hands before the multitude, saying, I am innocent of the blood of this just man: see you to it:” Matt. xxvii. 24. Which gives us a clear reason of the cautious and wary conduct of our Saviour, in not declaring himself, in the whole course of his ministry, so much as to his disciples, much less to the multitude, or to the rulers of the jews, in express words, to be the Messiah the King; and why he kept himself always in prophetic or parabolical terms (he and his disciples preaching only the kingdom of God, i. e. of the Messiah, to be come), and left to his miracles to declare who he was; though this was the truth, which he came into the world, as he says himself, John xviii. 37, to testify and which his disciples were to believe.

When Pilate, satisfied of his innocence, would have released him; and the jews persisted to cry out, “Crucify him, crucify him,” John xix. 6, “Pilate says to them, Take ye him yourselves, and crucify him: for I do not find any fault in him.” The jews then, since they could not make him a state criminal, by alleging his saying, that he was “the Son of God,” say, by their law it was a capital crime, ver. 7. “The jews answered to Pilate, We have a law, and by our law he ought to die; because he made himself the Son of God,” i. e. because, by saying “he is the Son of God,” he has made himself the Messiah, the prophet, which was to come. For we find no other law but that against false prophets, Deut. xviii. 20, whereby “making himself the Son of God,” deserved death. After this, Pilate was the more desirous to release him, ver. 12, 13. “But the jews cried out, saying, If thou let this man go, thou art not Cæsar’s friend; whosoever maketh himself a king, speaketh against Cæsar.” Here we see the stress of their charge against Jesus; whereby they hoped to take away his life, viz. that he “made himself king.” We see also upon what they grounded this accusation, viz. because he had owned himself to be “the Son of God.” For he had in their hearing, never made or professed himself to be a king. We see here, likewise, the reason why they were so desirous to draw from his own mouth a confession in express words, that he was the Messiah; viz. That they might have what

might be a clear proof that he did so. And, last of all, we see reason why, though in expressions which they understood, he owned himself to them to be the Messiah; yet he avoided declaring it to them in such words as might look criminal at Pilate's tribunal. He owned himself to be the Messiah plainly, to the understanding of the jews; but in ways that could not, to the understanding of Pilate, make it appear that he had laid claim to the kingdom of Judea; or went about to make himself king of that country. But whether his saying that he was "the Son of God," was criminal by their law, that Pilate troubled not himself about.

He that considers what Tacitus, Suetonius, Seneca de benef. l. 3. c. 26. say of Tiberius and his reign, will find how necessary it was for our Saviour, if he would not die as a criminal and a traitor, to take great heed to his words and actions; that he did or said not any thing that might be offensive, or give the least umbrage to the Roman government. It behoved an innocent man, who was taken notice of, for something extraordinary in him, to be very wary under a jealous and cruel prince, who encouraged informations, and filled his reign with executions for treason; under whom, words spoken innocently, or in jest, if they could be misconstrued, were made treason, and prosecuted with a rigour, that made it always the same thing to be accused and condemned. And therefore we see, that when the jews told Pilate, John xix. 12, that he should not be a friend to Cæsar, if he let Jesus go (for that whoever made himself king, was a rebel against Cæsar:) he asks them no more whether they would take Barabbas, and spare Jesus, but (though against his conscience) gives him up to death, to secure his own head.

One thing more there is, that gives us light into this wise and necessarily cautious management of himself, which manifestly agrees with it and makes a part of it: and that is, the choice of his apostles: exactly suited to the design and foresight of the necessity of keeping the declaration of the kingdom of the Messiah, which was now expected, within certain general terms, during his ministry. It was not fit to open himself too plainly or forwardly to the heady jews, that he himself was the Messiah; that was to be left to the observation of those who would attend to the purity of his life, the testimony of his miracles, and the conformity of all with the predictions concerning him: by these marks, those he lived amongst were to find it out, without an express promulgation that he was the Messiah until after his death. His kingdom was to be opened to them by degrees, as well to prepare

them to receive it, as to enable him to be long enough amongst them, to perform what was the work of the Messiah to be done; and fulfil all those several parts of what was foretold of him in the Old Testament, and we see applied to him in the New.

The jews had no other thoughts of their Messiah, but of a mighty temporal prince, that should raise their nation into an higher degree of power, dominion, and prosperity than ever it had enjoyed. They were filled with the expectation of a glorious earthly kingdom. It was not, therefore, for a poor man, the son of a carpenter, and (as they thought) born in Galilee, to pretend to it. None of the jews, no, not his disciples, could have borne this, if he had expressly avowed this at first, and began his preaching and the opening of his kingdom this way, especially if he had added to it, that in a year or two, he should die an ignominious death upon the cross. They are therefore prepared for the truth by degrees. First, John the Baptist tells them, "The kingdom of God" (a name by which the jews called the kingdom of the Messiah) "is at hand." Then our Saviour comes, and he tells them "of the kingdom of God;" sometimes that it is at hand, and upon some occasions, that it is come; but says, in his public preaching, little or nothing of himself. Then come the apostles and evangelists after his death, and they, in express words, teach what his birth, life, and doctrine had done before, and had prepared the well-disposed to receive, viz. That "Jesus is the Messiah."

To this design and method of publishing the gospel, was the choice of the apostles exactly adjusted; a company of poor, ignorant, illiterate men; who, as Christ himself tells us, Matt. xi. 25, and Luke x. 21, were not of the "wise and prudent" men of the world: they were, in that respect, but mere children. These, convinced by the miracles they saw him daily do, and the unblameable life he led, might be disposed to believe him to be the Messiah: and though they, with others, expected a temporal kingdom on earth, might yet rest satisfied in the truth of their master (who had honoured them with being near his person) that it would come, without being too inquisitive after the time, manner, or seat of his kingdom, as men of letters, more studied in their rabbins, or men of business, more versed in the world, would have been forward to have been. Men, great or wise in knowledge, or ways of the world, would hardly have been kept from prying more narrowly into his design and conduct; or from questioning him about the ways and measures he would take, for ascending the throne; and what means were to

be used towards it, and when they should in earnest set about it. Abler men, of higher births or thoughts, would hardly have been hindered from whispering, at least to their friends and relations, that their master was the Messiah; and that, though he concealed himself to a fit opportunity, and until things were ripe for it, yet they should, ere long, see him break out of his obscurity, cast off the cloud, and declare himself, as he was, King of Israel. But the ignorance and lowness of these good, poor men, made them of another temper. They went along, in an implicit trust on him, punctually keeping to his commands, and not exceeding his commission. When he sent them to preach the gospel, he bid them preach “the kingdom of God” to be at hand; and that they did, without being more particular than he had ordered, or mixing their own prudence with his commands, to promote the kingdom of the Messiah. They preached it, without giving, or so much as intimating that their master was he: which men of another condition, and an higher education, would scarce have forborne to have done. When he asked them, who they thought him to be; and Peter answered, “The Messiah, the Son of God,” Matt. xvi. 16, he plainly shows by the following words, that he himself had not told them so; and at the same time, ver. 20. forbids them to tell this their opinion of him to any body. How obedient they were to him in this, we may not only conclude from the silence of the evangelists concerning any such thing, published by them any-where before his death; but from the exact obedience three of them paid to a like command of his. He takes Peter, James, and John, into a mountain; and there Moses and Elias coming to him, he is transfigured before them, Matt. xvii. 9. He charges them, saying, “See that ye tell no man what ye have seen, until the Son of man shall be risen from the dead.” And St. Luke tells us, what punctual observers they were of his orders in this case, chap. ix. 36, “They kept it close, and told no man in those days, any of those things which they had seen.”

Whether twelve other men, of quicker parts, and of a station or breeding, which might have given them any opinion of themselves, or their own abilities, would have been so easily kept from meddling, beyond just what was prescribed them, in a matter they had so much interest in; and have said nothing of what they might, in human prudence, have thought would have contributed to their master’s reputation, and made way for his advancement to his kingdom; I leave to be considered. And it may suggest matter of meditation, whether St. Paul was not for this reason, by his learning, parts,

and warmer temper, better fitted for an apostle after, than during our Saviour's ministry: and therefore, though a chosen vessel, was not by the divine wisdom called, until after Christ's resurrection.

I offer this only as a subject of magnifying the admirable contrivance of the divine wisdom, in the whole work of our redemption, as far as we are able to trace it, by the footsteps which God hath made visible to human reason. For though it be as easy to omnipotent power to do all things by an immediate over-ruling will, and so to make any instruments work, even contrary to their nature, in subserviency to his ends; yet his wisdom is not usually at the expence of miracles, (if I may so say,) but only in cases that require them, for the evidencing of some revelation or mission to be from him. He does constantly (unless where the confirmation of some truth requires it otherwise) bring about his purposes by means operating according to their natures. If it were not so, the course and evidence of things would be confounded, miracles would lose their name and force; and there could be no distinction between natural and supernatural.

There had been no room left to see and admire the wisdom, as well as innocence of our Saviour, if he had rashly every-where exposed himself to the fury of the jews, and had always been preserved by a miraculous suspension of their malice, or a miraculous rescuing him out of their hands. It was enough for him once to escape from the men of Nazareth, who were going to throw him down a precipice, for him never to preach to them again. Our Saviour had multitudes that followed him for the loaves; who barely seeing the miracles that he did, would have made him king. If to the miracles he did, he had openly added, in express words, that he was the Messiah, and the king they expected to deliver them, he would have had more followers, and warmer in the cause, and readier to set him up at the head of a tumult. These indeed God, by a miraculous influence, might have hindered from any such attempt: but then posterity could not have believed, that the nation of the jews did, at that time, expect the Messiah, their king and deliverer; or that Jesus, who declared himself to be that king and deliverer, showed any miracles amongst them, to convince them of it; or did any thing worthy to make him be credited or received. If he had gone about preaching to the multitude, which he drew after him, that he was the "Messiah, the king of Israel," and this had been evidenced to Pilate; God could indeed, by a supernatural influence upon his mind, have made Pilate pronounce him innocent, and not condemn him as a malefactor, who had

openly for three years together, preached sedition to the people, and endeavoured to persuade them, that he was “the Messiah, their king,” of the royal blood of David, come to deliver them. But then I ask, Whether posterity would not either have suspected the story, or that some art had been used to gain that testimony from Pilate? Because he could not (for nothing) have been so favourable to Jesus, as to be willing to release so turbulent and seditious a man; to declare him innocent, and to cast the blame and guilt of his death, as unjust, upon the envy of the jews.

But now, the malice of the chief priests, scribes and pharisees; the headiness of the mob, animated with hopes, and raised with miracles; Judas’s treachery, and Pilate’s care of his government, and of the peace of his province, all working naturally as they should; Jesus, by the admirable wariness of his carriage, and an extraordinary wisdom, visible in his whole conduct; weathers all these difficulties, does the work he comes for, uninterruptedly goes about preaching his full appointed time, sufficiently manifests himself to be the Messiah, in all the particulars the scriptures had foretold of him; and when his hour is come, suffers death: but is acknowledged, both by Judas that betrayed, and Pilate that condemned him, to die innocent. For, to use his own words, Luke xxiv. 46, “Thus it is written, and thus it behoved the Messiah to suffer.” And of his whole conduct we have a reason and clear resolution in those words to St. Peter, Matt. xxvi. 53, “Thinkest thou that I cannot now pray to my Father, and he shall presently give me more than twelve legions of angels? But how then shall the scripture be fulfilled, that thus it must be?”

Having this clew to guide us, let us now observe, how our Saviour’s preaching and conduct comported with it in the last scene of his life. How cautious he had been in the former part of his ministry, we have already observed. We never find him to use the name of the Messiah but once, until he now came to Jerusalem, this last passover. Before this, his preaching and miracles were less at Jerusalem) where he used to make but very short stays) than any-where else. But now he comes six days before the feast, and is every day in the temple teaching; and there publicly heals the blind and the lame, in the presence of the scribes, pharisees, and chief priests. The time of his ministry drawing to an end, and his hour coming, he cared not how much the chief priests, elders, rulers, and the sanhedrim, were provoked against him by his doctrine and miracles: he was as open and bold in his preaching, and doing the works of the Messiah now at Jerusalem, and

in the sight of the rulers, and of all the people; as he had been before cautious and reserved there, and careful to be little taken notice of in that place, and not to come in their way more than needs. All that he now took care of was, not what they should think of him, or design against him, (for he knew they would seize him,) but to say or do nothing that might be a just matter of accusation against him, or render him criminal to the governor. But, as for the grandees of the jewish nation, he spares them not, but sharply now reprehends their miscarriages publicly in the temple; where he calls them more than once, “hypocrites;” as is to be seen, Matt. xxiii. And concludes all with no softer a compellation than “serpents,” and “a generation of vipers.”

After this severe reproof of the scribes and pharisees, being retired with his disciples into the “Mount of Olives” over against the temple, and there foretelling the destruction of it; his disciples ask him, Matt. xxiv. 3, &c. “When it should be, and what should be the sign of his coming?” He says, to them, “Take heed that no man deceive you: for many shall come in my name,” (i. e. taking on them the name and dignity of the Messiah, which is only mine,) saying, “I am the Messiah, and shall deceive many.” But be not you by them misled, nor by persecution driven away from this fundamental truth, that I am the Messiah: “for many shall be scandalized,” and apostatize; “but he that endures to the end, the same shall be saved: and this gospel of the kingdom shall be preached in all the world:” i. e. the good news of me, the Messiah, and my kingdom, shall be spread through the world. This was the great and only point of belief they were warned to stick to; and this is inculcated again, ver. 23 — 26, and Mark xiii. 21 — 23, with this emphatical application to them, in both these evangelists, “Behold, I have told you beforehand; remember, you are forewarned.”

This was in answer to the apostles inquiry, concerning his “coming, and the end of the world,” ver. 3. For so we translate τῆς συντελείας τ[Editor: illegible character] αἰῶνος. We must understand the disciples here to put their question, according to the notion and way of speaking of the jews. For they had two worlds, as we translate it, ὁ νῦν αἰὼν, καὶ ὁ μέλλων αἰὼν; “the present world,” and the “world to come.” The kingdom of God, as they called it, or the time of the Messiah, they called ὁ μέλλων αἰὼν, “the world to come,” which they believed was to put an end to “this world;” and that then the just should be raised from the dead, to enjoy in that “new world” a happy eternity, with those of the jewish nation, who should be then living.

These two things, viz. the visible and powerful appearance of his kingdom, and the end of the world, being confounded in the apostles question, our Saviour does not separate them, nor distinctly reply to them apart; but, leaving the inquirers in the common opinion, answers at once concerning his coming to take vengeance on the jewish nation, and put an end to their church worship and commonwealth; which was their $\acute{\omicron} \nu\tilde{\upsilon}\nu \alpha\lambda\acute{\omicron}\nu$, “present world,” which they counted should last till the Messiah came; and so it did, and then had an end put to it. And to this he joins his last coming to judgment, in the glory of his Father, to put a final end to this world, and all the dispensation belonging to the posterity of Adam upon earth. This joining them together, made his answer obscure, and hard to be understood by them then; nor was it safe for him to speak plainer of his kingdom, and the destruction of Jerusalem; unless he had a mind to be accused for having designs against the government. For Judas was amongst them: and whether no other but his apostles were comprehended under the name of “his disciples,” who were with him at this time, one cannot determine. Our Saviour, therefore, speaks of his kingdom in no other style, but that which he had all along hitherto used, viz. “the kingdom of God,” Luke xxi. 31, “When you see these things come to pass, know ye that the kingdom of God is nigh at hand.” And continuing on his discourse with them, he has the same expression, Matt. xxv. 1, “Then the kingdom of heaven shall be like unto ten virgins.” At the end of the following parable of the talents, he adds, ver. 31, “When the Son of man shall come in his glory, and all the holy angels with him, then shall he sit upon the throne of his glory. And before him shall be gathered all the nations. And he shall set the sheep on his right hand, and the goats on his left. Then shall the King say,” &c. Here he describes to his disciples the appearance of his kingdom, wherein he will show himself a king in glory upon his throne; but this in such a way, and so remote, and so unintelligible to an heathen magistrate; that, if it had been alleged against him, it would have seemed rather the dream of a crazy brain, than the contrivance of an ambitious or dangerous man, designing against the government: the way of expressing what he meant, being in the prophetic style, which is seldom so plain as to be understood, till accomplished. It is plain, that his disciples themselves comprehended not what kingdom he here spoke of, from their question to him after his resurrection, “Wilt thou at this time restore again the kingdom unto Israel?”

Having finished these discourses, he takes order for the passover, and eats it with his disciples; and at supper tells them, that one of them should betray him; and adds, John xiii. 19, "I tell it you now, before it come, that when it is come to pass, you may know that I am." He does not say out, "the Messiah;" Judas should not have that to say against him, if he would; though that be the sense in which he uses this expression, ἔγω εἰμι, "I am," more than once. And that this is the meaning of it, is clear from Mark xii. 6, Luke xxi. 8. In both which evangelists the words are, "For many shall come in my name, saying, ἔγω εἰμι, I am;" the meaning whereof we shall find explained in the parallel place of St. Matthew, chap. xxiv. 5, "For many shall come in my name, saying, ἔγω εἰμι ὁ Χριστός, I am the Messiah." Here, in this place of John xiii. Jesus foretels what should happen to him, viz. that he should be betrayed by Judas; adding this prediction to the many other particulars of his death and suffering, which he had at other times foretold to them. And here he tells them the reason of these his predictions, viz. that afterwards they might be a confirmation to their faith. And what was it that he would have them believe, and be confirmed in the belief of? Nothing but this, ὅτι ἔγω εἰμι ὁ Χριστός, "that he was the Messiah." The same reason he gives, John xiv. 28, You have heard how I said unto you, I go away, and come again unto you: and now I have told you, before it comes to pass, that when it comes to pass, ye might believe."

When Judas had left them, and was gone out, he talks a little freer to them of his glory and his kingdom, than ever he had done before. For now he speaks plainly of himself, and of his kingdom, John xiii. 31, "Therefore when he [Judas] was gone out, Jesus said, Now is the Son of man glorified, and God is also glorified in him. And, if God be glorified in him, God shall also glorify him in himself, and shall straitway glorify him." And Luke xxii. 29, "And I will appoint unto you a kingdom, as my Father hath appointed unto me; that ye may eat and drink with me at my table, in my kingdom." Though he has every-where, all along through his ministry, preached the "gospel of the kingdom," and nothing else but that and repentance, and the duties of a good life: yet it has been always "the kingdom of God," and "the kingdom of heaven:" and I do not remember, that "any-where, till now, he uses any such expression, as my kingdom." But here now he speaks in the first person, "I will appoint you a kingdom," and, "in my kingdom:" and this we see is only to the eleven, now Judas was gone from them.

With these eleven, whom he was just now leaving, he has a long discourse, to comfort them for the loss of him; and to prepare them for the persecution of the world, and to exhort them to keep his commandments, and to love one another. And here one may expect all the articles of faith should be laid down plainly, if any thing else were required of them to believe, but what he had taught them, and they believed already, viz. “That he was the Messiah.” John xiv. 1, “Ye believe in God, believe also in me.” Ver. 29, “I have told you before it come to pass, that when it is come to pass, ye may believe.” It is believing on him without any thing else. John xvi. 31, “Jesus answered them, Do ye now believe?” This was in answer to their profession, ver. 30, “Now are we sure that thou knowest all things, and needest not that any man should ask thee: by this we believe that thou camest forth from God.”

John xvii. 20, “Neither pray I for these alone, but for them also which shall believe on me through their word.” All that is spoke of believing, in this his last sermon to them, is only “believing on him,” or believing that “he came from God;” which was no other than believing him to be the Messiah.

Indeed, John xiv. 9, our Saviour tells Philip, “He that hath seen me, hath seen the Father.” And adds, ver. 10, “Believest thou not that I am in the Father, and the Father in me? The words that I speak unto you, I speak not of myself: but the Father that dwelleth in me, he doth the works.” Which being in answer to Philip’s words, ver. 9, “Show us the Father,” seem to import thus much: “No man hath seen God at any time,” he is known only by his works. And that he is my Father, and I the Son of God, i. e. the Messiah, you may know by the works I have done; which it is impossible I could do of myself, but by the union I have with God my Father. For that by being “in God,” and “God in him,” he signifies such an union with God, that God operates in and by him, appears not only by the words above cited out of ver. 10 (which can scarce otherwise be made coherent sense), but also from the same phrase, used again by our Saviour presently after, ver. 20, “At that day,” viz. after his resurrection, when they should see him again, “you shall know that I am in the Father, and you in me, and I in you;” i. e. by the works that I shall enable you to do, through a power I have received from the Father: which whosoever sees me do, must acknowledge the Father to be in me; and whosoever sees you do, must acknowledge me to be in you. And therefore he says, ver. 12, “Verily, verily, I say unto you,

he that believeth on me, the works that I do shall he do also, because I go unto my Father.” Though I go away, yet I shall be in you, who believe in me; and ye shall be enabled to do miracles also, for the carrying on of my kingdom, as I have done; that it may be manifested to others, that you are sent by me, as I have evidenced to you, that I am sent by the Father. And hence it is that he says, in the immediately preceding ver. 11, “Believe me, that I am in the Father, and the Father in me; if not, believe me for the sake of the works themselves.” Let the works that I have done convince you, that I am sent by the Father; that he is with me, and that I do nothing but by his will; and by virtue of the union I have with him; and that consequently I am the Messiah, who am anointed, sanctified, and separated by the Father, to the work for which he sent me.

To confirm them in this faith, and to enable them to do such works as he had done, he promises them the Holy Ghost, John xiv. 25, 26. “These things I have said unto you, being yet present with you.” But when I am gone, “The Holy Ghost, the Paraclet,” (which may signify Monitor, as well as Comforter, or Advocate,) “which the Father shall send you in my name, he shall show you all things, and bring to your remembrance all things which I have said.” So that considering all that I have said, and laying it together, and comparing it with what you shall see come to pass; you may be more abundantly assured, that I am the Messiah; and fully comprehend, that I have done and suffered all things foretold of the Messiah, and that were to be accomplished and fulfilled by him, according to the scriptures. But be not filled with grief, that I leave you, John xvi. 7, “It is expedient for you, that I go away; for if I go not away, the Paraclet will not come unto you.” One reason why, if he went not away, the Holy Ghost could not come, we may gather from what has been observed, concerning the prudent and wary carriage of our Saviour all through his ministry, that he might not incur death with the least suspicion of a malefactor. And therefore, though his disciples believed him to be the Messiah, yet they neither understood it so well, nor were so well confirmed in the belief of it, as after that, he being crucified and risen again, they had received the Holy Ghost; and with the gifts of the Holy Spirit, a fuller and clearer evidence and knowledge that he was the Messiah. They then were enlightened to see how his kingdom was such as the scriptures foretold; though not such as they, till then, had expected. And now this knowledge and assurance, received from the Holy Ghost, was of use to them after his resurrection; when they could now

boldly go about, and openly preach, as they did, that Jesus was the Messiah; confirming that doctrine by the miracles which the Holy Ghost empowered them to do. But till he was dead and gone, they could not do this. Their going about openly preaching, as they did after his resurrection, that Jesus was the Messiah, and doing miracles every-where, to make it good, would not have consisted with that character of humility, peace and innocence, which the Messiah was to sustain, if they had done it before his crucifixion. For this would have drawn upon him the condemnation of a malefactor, either as a stirrer of sedition against the public peace, or as a pretender to the kingdom of Israel. Hence we see, that they, who before his death preached only the “gospel of the kingdom;” that “the kingdom of God was at hand;” as soon as they had received the Holy Ghost, after his resurrection, changed their style, and everywhere in express words declare, that Jesus is the Messiah, that King which was to come. This, the following words here in St. John xvi. 8 — 14, confirm; where he goes on to tell them, “And when he is come, he will convince the world of sin; because they believed not on me.” Your preaching then, accompanied with miracles, by the assistance of the Holy Ghost, shall be a conviction to the world, that the jews sinned in not believing me to be the Messiah. “Of righteousness,” or justice; “because I go to my Father, and ye see me no more.” By the same preaching and miracles you shall confirm the doctrine of my ascension; and thereby convince the world, that I was that just one, who am, therefore, ascended to the Father into heaven, where no unjust person shall enter. “Of judgment; because the prince of this world is judged.” And by the same assistance of the Holy Ghost ye shall convince the world, that the devil is judged or condemned by your casting of him out, and destroying his kingdom, and his worship, where-ever you preach. Our Saviour adds, “I have yet many things to say unto you, but you cannot bear them now.” They were yet so full of a temporal kingdom, that they could not bear the discovery of what kind of kingdom his was, nor what a king he was to be: and therefore he leaves them to the coming of the Holy Ghost, for a farther and fuller discovery of himself, and the kingdom of the Messiah; for fear they should be scandalized in him, and give up the hopes they now had in him, and forsake him. This he tells them, ver. 1, of this xvth chapter: “These things I have said unto you, that you may not be scandalized.” The last thing he had told them, before his saying this to them, we find in the last verses of the preceding chapter: “When the Paraclet is come, the Spirit

of truth, he shall witness concerning me.” He shall show you who I am, and witness it to the world; and then, “Ye also shall bear witness, because ye have been with me from the beginning.” He shall call to your mind what I have said and done, that ye may understand it, and know, and bear witness concerning me. And again here, John xvi. after he had told them they could not bear what he had more to say, he adds, ver. 13, “Howbeit, when the Spirit of truth is come, he will guide you into all truth; and he will show you things to come: he shall glorify me.” By the Spirit, when he comes, ye shall be fully instructed concerning me; and though you cannot yet, from what I have said to you, clearly comprehend my kingdom and glory, yet he shall make it known to you wherein it consists: and though I am now in a mean state, and ready to be given up to contempt, torment, and death, so that ye know not what to think of it; yet the Spirit, when he comes, “shall glorify me,” and fully satisfy you of my power and kingdom; and that I sit on the right hand of God, to order all things for the good and increase of it, till I come again at the last day, in the fulness of glory.

Accordingly, the apostles had a full and clear sight and persuasion of this, after they had received the Holy Ghost; and they preached it everywhere boldly and openly, without the least remainder of doubt or uncertainty. But that, even so late as this, they understood not his death and resurrection, is evident from ver. 17, 18, “Then said some of his disciples among themselves, What is it that he saith unto us; A little while, and ye shall not see me; and again, a little while, and ye shall see me; and because I go to the Father? They said therefore, What is this that he saith, A little while? We know not what he saith.” Upon which he goes on to discourse to them of his death and resurrection, and of the power they should have of doing miracles. But all this he declares to them in a mystical and involved way of speaking: as he tells them himself, ver. 25, “These things have I spoken to you in proverbs;” i. e. in general, obscure, ænigmatical, or figurative terms (all which, as well as allusive apologues, the jews called proverbs or parables). Hitherto my declaring of myself to you hath been obscure, and with reserve: and I have not spoken of myself to you in plain and direct words, because ye “could not bear it.” A Messiah, and not a King, you could not understand: and a King living in poverty and persecution, and dying the death of a slave and malefactor upon a cross; you could not put together. And I had told you in plain words, that I was the Messiah, and given you a direct commission to preach to others, that I

professedly owned myself to be the Messiah, you and they would have been ready to have made a commotion, to have set me upon the throne of my father David, and to fight for me; and that your Messiah, your King, in whom are your hopes of a kingdom, should not be delivered up into the hands of his enemies, to be put to death; and of this Peter will instantly give you a proof. But “the time cometh, when I shall no more speak unto you in parables; but I shall show unto you plainly of the Father.” My death and resurrection, and the coming of the Holy Ghost, will speedily enlighten you, and then I shall make you know the will and design of my Father; what a kingdom I am to have, and by what means, and to what end, ver. 27. And this the Father himself will show unto you: “For he loveth you, because ye have loved me, and have believed that I came out from the Father.” Because ye have believed that I am “the Son of God, the Messiah;” that he hath anointed and sent me; though it hath not yet been fully discovered to you, what kind of kingdom it shall be, nor by what means brought about. And then our Saviour, without being asked, explaining to them what he had said, and making them understand better what before they stuck at, and complained secretly among themselves that they understood not; they thereupon declare, ver. 30, “Now are we sure that thou knowest all things, and needest not that any man should ask thee.” It is plain, thou knowest men’s thoughts and doubts before they ask. “By this we believe that thou camest forth from God. Jesus answered, Do ye now believe?” Notwithstanding that you now believe, that I came from God, and am the Messiah, sent by him: “Behold, the hour cometh, yea, is now come, that ye shall be scattered;” and as it is Matth. xxvi. 31, and “shall all be scandalized in me.” What it is to be scandalized in him, we may see by what followed hereupon, if that which he says to St. Peter, Mark xiv. did not sufficiently explain it.

This I have been the more particular in; that it may be seen, that in this last discourse to his disciples (where he opened himself more than he had hitherto done; and where, if any thing more was required to make them believers than what they already believed, we might have expected they should have heard of it) there were no new articles proposed to them, but what they believed before, viz. that he was the Messiah, the Son of God, sent from the Father; though of his manner of proceeding, and his sudden leaving of the world, and some few particulars, he made them understand something more than they did before. But as to the main design of the

gospel, viz. that he had a kingdom, that he should be put to death, and rise again, and ascend into heaven to his Father, and come again in glory to judge the world; this he had told them: and so had acquainted them with the great counsel of God, in sending him the Messiah, and omitted nothing that was necessary to be known or believed in it. And so he tells them himself, John xv. 15, "Henceforth I call you not servants: for the servant knoweth not what his Lord does: but I have called you friends; for all things that I have heard of my Father, I have made known unto you;" though perhaps ye do not so fully comprehend them, as you will shortly, when I am risen and ascended.

To conclude all, in his prayer, which shuts up this discourse, he tells the Father, what he had made known to his apostles; the result whereof we have John xvii. 8, "I have given unto them the words which thou gavest me, and they have received them, and they have believed that thou didst send me." Which is, in effect, that he was the Messiah promised and sent by God. And then he prays for them, and adds, ver. 20, 21, "Neither pray I for these alone, but for them also who shall believe on me through their word." What that word was, through which others should believe in him, we have seen in the preaching of the apostles, all through the history of the Acts, viz. this one great point, that Jesus was the Messiah. The apostles, he says, ver. 25, "know that thou hast sent me;" i. e. are assured that I am the Messiah. And in ver. 21 and 23, he prays, "That the world may believe" (which, ver. 23, is called knowing) "that thou has sent me." So that what Christ would have believed by his disciples, we may see by this his last prayer for them, when he was leaving the world, as by what he preached whilst he was in it.

And, as a testimony of this, one of his last actions, even when he was upon the cross, was to confirm his doctrine, by giving salvation to one of the thieves that was crucified with him, upon his declaration that he believed him to be the Messiah: for so much the words of his request imported, when he said, "Remember me, Lord, when thou comest into thy kingdom," Luke xxiii. 42. To which Jesus replied, ver. 43, "Verily, I say unto thee, To-day shalt thou be with me in paradise." An expression very remarkable: for as Adam, by sin, lost paradise, i. e. a state of happy immortality; here the believing thief, through his faith in Jesus the Messiah, is promised to be put in paradise, and so re-instated in an happy immortality.

Thus our Saviour ended his life. And what he did after his resurrection, St. Luke tells us, Acts i. 3, That he showed himself to the apostles, “forty days, speaking things concerning the kingdom of God.” This was what our Saviour preached in the whole course of his ministry, before his passion: and no other mysteries of faith does he now discover to them after his resurrection. All he says, is concerning the kingdom of God; and what it was he said concerning that, we shall see presently out of the other evangelists; having first only taken notice, that when now they asked him, ver. 6, “Lord, wilt thou at this time restore again the kingdom of Israel? He said unto them, ver. 7, It is not for you to know the times and the seasons, which the Father hath put in his own power: but ye shall receive power, after that the Holy Ghost is come upon you; and ye shall be witnesses unto me, unto the utmost parts of the earth.” Their great business was to be witnesses to Jesus, of his life, death, resurrection, and ascension; which, put together, were undeniable proofs of his being the Messiah. This was what they were to preach, and what he said to them, concerning the kingdom of God; as will appear by what is recorded of it in the other evangelists.

When on the day of his resurrection he appeared to the two going to Emmaus, Luke xxiv. they declare, ver. 21, what his disciples faith in him was: “But we trusted that it had been he that should have redeemed Israel:” i. e. we believed that he was the Messiah, come to deliver the nation of the jews. Upon this, Jesus tells them they ought to believe him to be the Messiah, notwithstanding what had happened: nay, they ought, by his sufferings and death, to be confirmed in that faith, that he was the Messiah. And ver. 26, 27, “Beginning at Moses and all the prophets, he expounded unto them, in all the scriptures, the things concerning himself,” how, “that the Messiah ought to have suffered these things, and to have entered into his glory.” Now he applies the prophecies of the Messiah to himself, which we read not, that he did ever do before his passion. And afterwards appearing to the eleven, Luke xxiv. 36, he said unto them, ver. 44 — 47, “These are the words, which I spake unto you, while I was yet with you, that all things must be fulfilled which are written in the law of Moses, and in the prophets, and in the psalms concerning me. Then opened he their understanding, that they might understand the scripture, and said unto them: Thus it is written, and thus it behoved the Messiah to suffer, and to rise from the dead the third day; and that repentance and remission of sins should be preached in his name among all nations, beginning at Jerusalem.” Here we see what it was

he had preached to them, though not in so plain open words before his crucifixion; and what it is he now makes them understand; and what it was that was to be preached to all nations, viz. That he was the Messiah that had suffered, and rose from the dead the third day, and fulfilled all things that were written in the Old Testament concerning the Messiah; and that those who believed this, and repented, should receive remission of their sins, through this faith in him. Or, as St. Mark has it, chap. xvi. 15, "Go into all the world, and preach the gospel to every creature; he that believeth, and is baptized, shall be saved; but he that believeth not, shall be damned," ver. 16. What the "gospel," or "good news," was, we have showed already, viz. The happy tidings of the Messiah being come. Ver. 20, And "they went forth and preached every-where, the Lord working with them, and confirming the word with signs following." What the "word" was which they preached, and the Lord confirmed with miracles, we have seen already, out of the history of their Acts. I have already given an account of their preaching every-where, as it is recorded in the Acts, except some few places, where the kingdom of "the Messiah" is mentioned under the name of "the kingdom of God;" which I forbore to set down, till I had made it plain out of the evangelists, that that was no other but the kingdom of the Messiah.

It may be seasonable therefore, now, to add to those sermons we have formerly seen of St. Paul, (wherein he preached no other article of faith, but that Jesus was "the Messiah," the King, who being risen from the dead, now reigneth, and shall more publicly manifest his kingdom, in judging the world at the last day,) what farther is left upon record of his preaching. Acts xix. 8, at Ephesus, "Paul went into the synagogues, and spake boldly for the space of three months; disputing and persuading, concerning the kingdom of God." And, Acts xx. 25, at Miletus he thus takes leave of the elders of Ephesus: "And now, behold, I know that ye all, among whom I have gone preaching the kingdom of God, shall see my face no more." What this preaching the kingdom of God was, he tells you, ver. 20, 21, "I have kept nothing back from you, which was profitable unto you; but have showed you, and have taught you publickly, and from house to house; testifying both to the jews, and to the Greeks, repentance towards God, and faith towards our Lord Jesus Christ." And so again, Acts xxviii. 23, 24, "When they [the jews at Rome] had appointed him [Paul] a day, there came many to him into his lodging; to whom he expounded and testified the kingdom of

God; persuading them concerning Jesus, both out of the law of Moses, and out of the prophets, from morning to evening. And some believed the things which were spoken, and some believed not.” And the history of the Acts is concluded with this account of St. Paul’s preaching: “And Paul dwelt two whole years in his own hired house, and received all that came in unto him, preaching the kingdom of God, and teaching those things which concern the Lord Jesus the Messiah.” We may therefore here apply the same conclusion to the history of our Saviour, writ by the evangelists, and to the history of the apostles, writ in the Acts, which St. John does to his own gospel, chap. xx. 30, 31, “Many other signs did Jesus before his disciples;” and in many other places the apostles preached the same doctrine, “which are not written” in these books; “but these are written that you may believe that Jesus is the Messiah, the Son of God; and that believing you may have life in his name.”

What St. John thought necessary and sufficient to be believed, for the attaining eternal life, he here tells us. And this not in the first dawning of the gospel; when, perhaps, some will be apt to think less was required to be believed, than after the doctrine of faith, and mystery of salvation, was more fully explained, in the epistles writ by the apostles, for it is to be remembered, that St. John says this, not as soon as Christ was ascended; for these words, with the rest of St. John’s gospel, were not written till many years after not only the other gospels, and St. Luke’s history of the Acts, but in all appearance, after all the epistles writ by the other apostles. So that above threescore years after our Saviour’s passion (for so long after, both Epiphanius and St. Jerom assure us this gospel was written) St. John knew nothing else required to be believed, for the attaining of life, but that “Jesus is the Messiah, the Son of God.”

To this, it is likely, it will be objected by some, that to believe only that Jesus of Nazareth is the Messiah, is but an historical, and not a justifying, or saving faith.

To which I answer, That I allow to the makers of systems and their followers to invent and use what distinctions they please, and to call things by what names they think fit. But I cannot allow to them, or to any man, an authority to make a religion for me, or to alter that which God hath revealed. And if they please to call the believing that which our Saviour and his apostles preached, and proposed alone to be believed, an historical faith; they have their liberty. But they must have a care, how they deny it to be a

justifying or saving faith, when our Saviour and his apostles have declared it so to be; and taught no other which men should receive, and whereby they should be made believers unto eternal life: unless they can so far make bold with our Saviour, for the sake of their beloved systems, as to say, that he forgot what he came into the world for; and that he and his apostles did not instruct people right in the way and mysteries of salvation. For that this is the sole doctrine pressed and required to be believed in the whole tenour of our Saviour's and his apostles preaching, we have showed through the whole history of the evangelists and the Acts. And I challenge them to show that there was any other doctrine, upon their assent to which, or disbelief of it, men were pronounced believers or unbelievers; and accordingly received into the church of Christ, as members of his body; as far as mere believing could make them so: or else kept out of it. This was the only gospel-article of faith which was preached to them. And if nothing else was preached every-where, the apostle's argument will hold against any other articles of faith to be believed under the gospel, Rom. x. 14, "How shall they believe that whereof they have not heard?" For to preach any other doctrines necessary to be believed, we do not find that any body was sent.

Perhaps it will farther be urged, that this is not a "saving faith;" because such a faith as this the devils may have, and it was plain they had; for they believed and declared "Jesus to be the Messiah." And St. James, ch. ii. 19, tells us, "The devils believe and tremble;" and yet they shall not be saved. To which I answer, 1. That they could not be saved by any faith, to whom it was not proposed as a means of salvation, nor ever promised to be counted for righteousness. This was an act of grace shown only to mankind. God dealt so favourably with the posterity of Adam, that if they would believe Jesus to be the Messiah, the promised King and Saviour, and perform what other conditions were required of them by the covenant of grace; God would justify them, because of this belief. He would account this faith to them for righteousness, and look on it as making up the defects of their obedience; which being thus supplied, by what was taken instead of it, they were looked on as just or righteous; and so inherited eternal life. But this favour shown to mankind, was never offered to the fallen angels. They had no such proposals made to them: and therefore, whatever of this kind was proposed to men, it availed not devils, whatever they performed of it. This covenant of grace was never offered to them.

2. I answer; that though the devils believed, yet they could not be saved by the covenant of grace; because they performed not the other condition required in it, altogether as necessary to be performed as this of believing; and that is repentance. Repentance is as absolute a condition of the covenant of grace as faith; and as necessary to be performed as that. John the Baptist, who was to prepare the way for the Messiah, “Preached the baptism of repentance for the remission of sins,” Mark i. 4.

As John began his preaching with “Repent; for the kingdom of heaven is at hand,” Mat. iii. 2; so did our Saviour begin his, Matt. iv. 17, “From that time began Jesus to preach, and to say, Repent; for the kingdom of heaven is at hand.” Or, as St. Mark has it in that parallel place, Mark i. 14, 15, “Now, after that John was put in prison, Jesus came into Galilee, preaching the gospel of the kingdom of God, and saying, The time is fulfilled, and the kingdom of God is at hand: repent ye, and believe the gospel.” This was not only the beginning of his preaching, but the sum of all that he did preach; viz. That men should repent, and believe the good tidings which he brought them; that “the time was fulfilled” for the coming of the Messiah. And this was what his apostles preached, when he sent them out, Mark vi. 12, “And they, going out, preached that men should repent.” Believing Jesus to be the Messiah, and repenting, were so necessary and fundamental parts of the covenant of grace, that one of them alone is often put for both. For here St. Mark mentions nothing but their preaching repentance: as St. Luke, in the parallel place, chap. ix. 6, mentions nothing but their evangelizing, or preaching the good news of the kingdom of the Messiah: and St. Paul often, in his epistles, puts faith for the whole duty of a christian. But yet the tenour of the gospel is what Christ declares, Luke xii. 3, 5, “Unless ye repent, ye shall all likewise perish.” And in the parable of the rich man in hell, delivered by our Saviour, Luke xvi. repentance alone is the means proposed, of avoiding that place of torment, ver. 30, 31. And what the tenour of the doctrine which should be preached to the world should be, he tells his apostles, after his resurrection, Luke xxiv. 27, viz. “That repentance and remission of sins” should be preached “in his name,” who was the Messiah. And accordingly, believing Jesus to be the Messiah, and repenting, was what the apostles preached. So Peter began, Acts ii. 38, “Repent, and be baptized.” These two things were required for the remission of sins, viz. entering themselves in the kingdom of God; and owning and professing themselves the subjects of Jesus, whom they believed to be the Messiah,

and received for their Lord and King; for that was to be “baptized in his name:” baptism being an initiating ceremony, known to the jews, whereby those, who leaving heathenism, and professing a submission to the law of Moses, were received into the commonwealth of Israel. And so it was made use of by our Saviour, to be that solemn visible act, whereby those who believed him to be the Messiah, received him as their king, and professed obedience to him, were admitted as subjects into his kingdom: which, in the gospel, is called “the kingdom of God;” and in the Acts and epistles, often by another name, viz. the “Church.”

The same St. Peter preaches again to the jews, Acts iii. 19, “Repent, and be converted, that your sins may be blotted out.”

What this repentance was which the new covenant required, as one of the conditions to be performed by all those who should receive the benefits of that covenant; is plain in the scripture, to be not only a sorrow for sins past, but (what is a natural consequence of such sorrow, if it be real) a turning from them into a new and contrary life. And so they are joined together, Acts iii. 19, “Repent and turn about;” or, as we render it, “be converted.” And Acts xxvi. 20, “Repent and turn to God.”

And sometimes “turning about” is put alone to signify repentance, Matt. xiii. 15, Luke xxii. 32, which in other words is well expressed by “newness of life.” For it being certain that he, who is really sorry for his sins, and abhors them, will turn from them, and forsake them; either of these acts, which have so natural a connection one with the other, may be, and is often put for both together. Repentance is an hearty sorrow for our past misdeeds, and a sincere resolution and endeavour, to the utmost of our power, to conform all our actions to the law of God. So that repentance does not consist in one single act of sorrow, (though that being the first and leading act gives denomination to the whole,) but in “doing works meet for repentance;” in a sincere obedience to the law of Christ, the remainder of our lives. This was called for by John the Baptist, the preacher of repentance, Matt. iii. 8, “Bring forth fruits meet for repentance.” And by St. Paul here, Acts xxvi. 20, “Repent and turn to God, and do works meet for repentance.” There are works to follow belonging to repentance, as well as sorrow for what is past.

These two, faith and repentance, i. e. believing Jesus to be the Messiah, and a good life, are the indispensable conditions of the new covenant, to be performed by all those who would obtain eternal life. The reasonableness,

or rather necessity of which, that we may the better comprehend, we must a little look back to what was said in the beginning.

Adam being the Son of God, and so St. Luke calls him, chap. iii. 38, had this part also of the likeness and image of his father, viz. that he was immortal. But Adam, transgressing the command given him by his heavenly Father, incurred the penalty; forfeited that state of immortality, and became mortal. After this, Adam begot children: but they were “in his own likeness, after his own image;” mortal, like their father.

God nevertheless, out of his infinite mercy, willing to bestow eternal life on mortal men, sends Jesus Christ into the world; who being conceived in the womb of a virgin (that had not known man) by the immediate power of God, was properly the Son of God; according to what the angel declared unto his mother, Luke i. 30 — 35, “The Holy Ghost shall come upon thee, and the power of the Highest shall over-shadow thee: therefore also that holy thing, which shall be born of thee, shall be called the Son of God.” So that being the Son of God, he was like the Father, immortal; as he tells us, John v. 26, “As the Father hath life in himself, so hath he given to the Son to have life in himself.”

And that immortality is a part of that image, wherein those (who were the immediate sons of God, so as to have no other father) were made like their father, appears probable, not only from the places in Genesis concerning Adam, above taken notice of, but seems to me also to be intimated in some expressions, concerning Jesus the Son of God, in the New Testament. Col. i. 15, he is called “the image of the invisible God.” Invisible seems put in, to obviate any gross imagination, that he (as images used to do) represented God in any corporeal or visible resemblance. And there is farther subjoined, to lead us into the meaning of it, “The first-born of every creature;” which is farther explained, ver. 18, where he is termed “The first-born from the dead;” thereby making out, and showing himself to be the image of the invisible; that death hath no power over him; but being the Son of God, and not having forfeited that sonship by any transgression; was the heir of eternal life, as Adam should have been, had he continued in his filial duty. In the same sense the apostle seems to use the word image in other places, viz. Rom. viii. 29, “Whom he did foreknow, he also did predestinate to be conformed to the image of his Son, that he might be the first-born among many brethren.” This image, to which they were conformed, seems to be immortality and eternal life: for it is remarkable,

that in both these places, St. Paul speaks of the resurrection; and that Christ was “The first-born among many brethren;” he being by birth the Son of God, and the others only by adoption, as we see in this same chapter ver. 15 — 17, “Ye have received the Spirit of adoption, whereby we cry, Abba, Father; the Spirit itself bearing witness with our spirit, that we are the children of God. And if children, then heirs, and joint-heirs with Christ; if so be that we suffer with him, that we may also be glorified together.” And hence we see, that our Saviour vouchsafes to call those, who at the day of judgment are, through him, entering into eternal life, his brethren; Matt. xxv. 40, “Inasmuch as ye have done it unto one of the least of these my brethren.” May we not in this find a reason, why God so frequently in the New Testament, and so seldom, if at all, in the Old, is mentioned under the single title of the father? And therefore our Saviour says, Matt. xi. “No man knoweth the Father, save the Son, and he to whomsoever the Son will reveal him.” God has now a son again in the world, the first-born of many brethren, who all now, by the Spirit of adoption, can say, Abba, Father. And we, by adoption, being for his sake made his brethren, and the sons of God, come to share in that inheritance, which was his natural right; he being by birth the Son of God: which inheritance is eternal life. And again, ver. 23, “We groan within ourselves, waiting for the adoption, to wit, the redemption of our body;” whereby is plainly meant, the change of these frail mortal bodies, into the spiritual immortal bodies at the resurrection; “When this mortal shall have put on immortality,” 1 Cor. xv. 54; which in that chapter, ver. 42 — 44, he farther expresses thus; “So also is the resurrection of the dead. It is sown in corruption, it is raised in incorruption; it is sown in dishonour, it is raised in glory; it is sown in weakness, it is raised in power; it is sown a natural body, it is raised a spiritual body,” &c. To which he subjoins, ver. 49, “As we have born the image of the earthly,” (i. e. as we have been mortal, like earthy Adam, our father, from whom we are descended, when he was turned out of paradise,) “we shall also bear the image of the heavenly;” into whose sonship and inheritance being adopted, we shall, at the resurrection, receive that adoption we expect, “even the redemption of our bodies;” and after his image, which is the image of the Father, become immortal. Hear what he says himself, Luke xx. 35, 36, “They who shall be accounted worthy to obtain that world, and the resurrection from the dead, neither marry, nor are given in marriage. Neither can they die any more; for they are equal to the angels, and are the sons of

god, being the sons of the resurrection.” And he that shall read St. Paul’s arguing, Acts xiii. 32, 33, will find that the great evidence that Jesus was the “Son of God,” was his resurrection. Then the image of his Father appeared in him, when he visibly entered into the state of immortality. For thus the apostle reasons, “We preach to you, how that the promise which was made to our fathers, God hath fulfilled the same unto us, in that he hath raised up Jesus again; as it is also written in the second psalm, Thou art my Son, this day have I begotten thee.”

This may serve a little to explain the immortality of the sons of God, who are in this like their Father, made after his image and likeness. But that our Saviour was so, he himself farther declares, John x. 18, where speaking of his life, he says, “No one taketh it from me, but I lay it down of myself; I have power to lay it down, and I have power to take it up again.” Which he could not have had, if he had been a mortal man, the son of a man, of the seed of Adam; or else had by any transgression forfeited his life. “For the wages of sin is death;” and he that hath incurred death for his own transgression, cannot lay down his life for another, as our Saviour professes he did. For he was the just one, Acts vii. 52, and xxii. 14, “Who knew no sin;” 2 Cor. v. 21, “Who did no sin, neither was guile found in his mouth.” And thus, “As by man came death, so by man came the resurrection of the dead. For as in Adam all die, so in Christ shall all be made alive.”

For this laying down his life for others, our Saviour tells us, John x. 17, “Therefore does my Father love me, because I lay down my life, that I might take it again.” And this his obedience and suffering was rewarded with a kingdom: which he tells us, Luke xxii. “His Father had appointed unto him:” and which, it is evident out of the epistle to the Hebrews, chap. xii. 2, he had a regard to in his sufferings: “Who for the joy that was set before him, endured the cross, despising the shame, and is set down at the right hand of the throne of God.” Which kingdom, given him upon this account of his obedience, suffering, and death, he himself takes notice of in these words, John xvii. 1 — 4, “Jesus lifted up his eyes to heaven, and said, Father, the hour is come: glorify thy Son, that thy Son also may glorify thee: as thou hast given him power over all flesh, that he should give eternal life to as many as thou hast given him. And this is life eternal, that they may know thee the only true God, and Jesus, the Messiah, whom thou hast sent. I have glorified thee on earth: I have finished the work which thou gavest me to do.” And St. Paul, in his epistle to the Philippians, chap. ii. 8 — 11,

“He humbled himself, and became obedient unto death, even the death of the cross. Wherefore God also hath highly exalted him, and given him a name that is above every name; that at the name of Jesus every knee should bow, of things in heaven, and things in earth, and things under the earth; and that every tongue should confess, that Jesus Christ is Lord.”

Thus God, we see, designed his Son Jesus Christ a kingdom, an everlasting kingdom in heaven. But though, “as in Adam all die, so in Christ shall all be made alive;” and all men shall return to life again at the last day; yet all men having sinned, and thereby “come short of the glory of God,” as St. Paul assures us, Rom. iii. 23, i. e. not attaining to the heavenly kingdom of the Messiah, which is often called the glory of God; (as may be seen, Rom. v. 2, and xv. 7; and ii. 7; Matt. xvi. 27; Mark vii. 38. For no one who is unrighteous, i. e. comes short of perfect righteousness, shall be admitted into the eternal life of that kingdom; as is declared, 1 Cor. vi. 9, “The unrighteous shall not inherit the kingdom of God;”) and death, the wages of sin, being the portion of all those who had transgressed the righteous law of God; the son of God would in vain have come into the world to lay the foundations of a kingdom, and gather together a select people out of the world, if, (they being found guilty at their appearance before the judgment-seat of the righteous Judge of all men at the last day,) instead of entrance into eternal life in the kingdom he had prepared for them, they should receive death, the just reward of sin which every one of them was guilty of; this second death would have left him no subjects; and instead of those ten thousand times ten thousand, and thousands of thousands, there would not have been one left him to sing praises unto his name, saying, “Blessing, and honour, and glory, and power, be unto him that sitteth on the throne, and unto the lamb for ever and ever.” God therefore, out of his mercy to mankind, and for the erecting of the kingdom of his Son, and furnishing it with subjects out of every kindred, and tongue, and people, and nation; proposed to the children of men, that as many of them as would believe Jesus his Son (whom he sent into the world) to be the Messiah, the promised Deliverer; and would receive him for their King and Ruler; should have all their past sins, disobedience, and rebellion forgiven them: and if for the future they lived in a sincere obedience to his law, to the utmost of their power; the sins of human frailty for the time to come, as well as all those of their past lives; should, for his Son’s sake, because they gave themselves up to him, to be his subjects, be forgiven

them: and so their faith, which made them be baptized into his name, (i. e. enrol themselves in the kingdom of Jesus the Messiah, and profess themselves his subjects, and consequently live by the laws of his kingdom,) should be accounted to them for righteousness; i. e. should supply the defects of a scanty obedience in the sight of God; who, counting faith to them for righteousness, or complete obedience, did thus justify, or make them just, and thereby capable of eternal life.

Now, that this is the faith for which God of his free grace justifies sinful man, (for “it is God alone that justifieth,” Rom. viii. 33, Rom. iii. 26,) we have already showed, by observing through all the history of our Saviour and the apostles, recorded in the evangelists, and in the Acts, what he and his apostles preached, and proposed to be believed. We shall show now, that besides believing him to be the Messiah, their King, it was farther required, that those who would have the privilege, advantage, and deliverance of his kingdom, should enter themselves into it; and by baptism being made denizens, and solemnly incorporated into that kingdom, live as became subjects obedient to the laws of it. For if they believed him to be the Messiah, their King, but would not obey his laws, and would not have him to reign over them; they were but the greater rebels; and God would not justify them for a faith that did but increase their guilt, and oppose diametrically the kingdom and design of the Messiah; “Who gave himself for us, that he might redeem us from all iniquity, and purify unto himself a peculiar people zealous of good works,” Titus ii. 14. And therefore St. Paul tells the Galatians, That that which availeth is faith; but “faith working by love.” And that faith without works, i. e. the works of sincere obedience to the law and will of Christ, is not sufficient for our justification, St. James shows at large, chap. ii.

Neither, indeed, could it be otherwise; for life, eternal life, being the reward of justice or righteousness only, appointed by the righteous God (who is of purer eyes than to behold iniquity) to those who only had no taint or infection of sin upon them, it is impossible that he should justify those who had no regard to justice at all whatever they believed. This would have been to encourage iniquity, contrary to the purity of his nature; and to have condemned that eternal law of right, which is holy, just, and good; of which no one precept or rule is abrogated or repealed; nor indeed can be, whilst God is an holy, just, and righteous God, and man a rational creature. The duties of that law, arising from the constitution of his very nature, are of

eternal obligation; nor can it be taken away or dispensed with, without changing the nature of things, overturning the measures of right and wrong, and thereby introducing and authorizing irregularity, confusion, and disorder in the world. Christ's coming into the world was not for such an end as that; but, on the contrary, to reform the corrupt state of degenerate man; and out of those who would mend their lives, and bring forth fruit meet for repentance, erect a new kingdom.

This is the law of that kingdom, as well as of all mankind; and that law, by which all men shall be judged at the last day. Only those who have believed Jesus to be the Messiah, and have taken him to be their King, with a sincere endeavour after righteousness, in obeying his law; shall have their past sins not imputed to them; and shall have that faith taken instead of obedience, where frailty and weakness made them transgress, and sin prevailed after conversion; in those who hunger and thirst after righteousness, (or perfect obedience,) and do not allow themselves in acts of disobedience and rebellion, against the laws of that kingdom they are entered into.

He did not expect, it is true, a perfect obedience, void of slips and falls: he knew our make, and the weakness of our constitution too well, and was sent with a supply for that defect. Besides, perfect obedience was the righteousness of the law of works; and then the reward would be of debt, and not of grace; and to such there was no need of faith to be imputed to them for righteousness. They stood upon their own legs, were just already, and needed no allowance to be made them for believing Jesus to be the Messiah, taking him for their king, and becoming his subjects. But that Christ does require obedience, sincere obedience, is evident from the law he himself delivers (unless he can be supposed to give and inculcate laws, only to have them disobeyed) and from the sentence he will pass when he comes to judge.

The faith required was, to believe Jesus to be the Messiah, the Anointed: who had been promised by God to the world. Among the jews (to whom the promises and prophecies of the Messiah were more immediately delivered) anointing was used to three sorts of persons, at their inauguration; whereby they were set apart to three great offices, viz. of priests, prophets, and kings. Though these three offices be in holy writ attributed to our Saviour, yet I do not remember that he any-where assumes to himself the title of a priest, or mentions any thing relating to his priesthood; nor does he speak of his being

a prophet but very sparingly, and only once or twice, as it were by the by: but the gospel, or the good news of the kingdom of the Messiah, is what he preaches every-where, and makes it his great business to publish to the world. This he did not only as most agreeable to the expectation of the jews, who looked for the Messiah, chiefly as coming in power to be their king and deliverer: but as it best answered the chief end of his coming, which was to be a king, and, as such, to be received by those who would be his subjects in the kingdom which he came to erect. And though he took not directly on himself the title of king, until he was in custody, and in the hands of Pilate; yet it is plain, “King” and “King of Israel,” were the familiar and received titles of the Messiah. See John i. 50, Luke xix. 38, compared with Matt. xxi. 9; and Mark xi. 9, John xii. 13, Matt. xxi. 5, Luke xxiii. 2, compared with Matt. xxvii. 11; and John xviii. 33 — 37, Mark xv. 12, compared with Matt. xxvii. 22, 42.

What those were to do, who believed him to be the Messiah, and received him for their king, that they might be admitted to be partakers with him of his kingdom in glory, we shall best know by the laws he gives them, and requires them to obey; and by the sentence which he himself will give, when sitting on his throne they shall all appear at his tribunal, to receive every one his doom from the mouth of this righteous judge of all men.

What he proposed to his followers to be believed, we have already seen, by examining his and his apostles preaching, step by step, all through the history of the four evangelists, and the Acts of the Apostles. The same method will best and plainest show us, whether he required of those who believed him to be the Messiah, any thing besides that faith, and what it was. For, he being a king, we shall see by his commands what he expects from his subjects: for, if he did not expect obedience to them, his commands would be but mere mockery; and if there were no punishment for the transgressors of them, his laws would not be the laws of a king, and that authority to command, and power to chastise the disobedient, but empty talk, without force, and without influence.

We shall therefore from his injunctions (if any such there be) see what he has made necessary to be performed, by all those who shall be received into eternal life, in his kingdom prepared in the heavens. And in this we cannot be deceived. What we have from his own mouth, especially if repeated over and over again, in different places and expressions, will be past doubt and controversy. I shall pass by all that is said by St. John Baptist, or any other

before our Saviour's entry upon his ministry, and public promulgation of the laws of his kingdom.

He began his preaching with a command to repent, as St. Matthew tells us, iv. 17. "From that time Jesus began to preach, saying, Repent; for the kingdom of heaven is at hand." And Luke v. 32, he tells the scribes and pharisees, "I come not to call the righteous;" (those who were truly so, needed no help, they had a right to the tree of life), "but sinners, to repentance."

In his sermon, as it is called, in the mount, Luke vi. and Matt. v. &c. he commands they should be exemplary in good works: "Let your light so shine amongst men, that they may see your good works, and glorify your Father which is in heaven," Matt. v. 15. And that they might know what he came for, and what he expected of them, he tells them, ver. 17 — 20, "Think not that I am come to dissolve," or loosen, "the law, or the prophets: I am not come to dissolve," or loosen, "but to make it full," or complete; by giving it you in its true and strict sense. Here we see he confirms, and at once re-inforces all the moral precepts in the Old Testament. "For verily I say to you, Till heaven and earth pass, one jot or one tittle, shall in no wise pass from the law, till all be done. Whosoever therefore shall break one of these least commandments, and shall teach men so, he shall be called the least (i. e. as it is interpreted, shall not be at all) in the kingdom of heaven." Ver. 21, "I say unto you, That except your righteousness," i. e. your performance of the eternal law of right, "shall exceed the righteousness of the scribes and pharisees, ye shall in no case enter into the kingdom of heaven." And then he goes on to make good what he said, ver. 17, viz. "That he was come to complete the law," viz. by giving its full and clear sense, free from the corrupt and loosening glosses of the scribes and pharisees, ver. 22 — 26. He tells them, That not only murder, but causeless anger, and so much as words of contempt, were forbidden. He commands them to be reconciled and kind towards their adversaries; and that upon pain of condemnation. In the following part of his sermon, which is to be read Luke vi. and more at large, Matt. v. vi. vii. he not only forbids actual uncleanness, but all irregular desires, upon pain of hell-fire; causeless divorces; swearing in conversation, as well as forswearing in judgment; revenge; retaliation; ostentation of charity, of devotion, and of fasting; repetitions in prayer, covetousness, worldly care, censoriousness: and on the other side commands loving our enemies, doing good to those that hate us, blessing those that curse us, praying for those that despitefully use us; patience and meekness under injuries, forgiveness, liberality, compassion: and closes all his particular injunctions, with this general golden rule, Matt. vii. 12, "All things whatsoever ye would that men should do to you, do you even so to them, for this is the law and the prophets." And to show how much he is in earnest, and expects obedience to these laws, he tells them, Luke vi. 35, That if they obey, "great shall be their reward;" they "shall be called the sons of the Highest." And to all this, in the conclusion, he adds

the solemn sanction; “Why call ye me, Lord, Lord, and do not the things that I say?” It is in vain for you to take me for the Messiah your King, unless you obey me. “Not every one who calls me, Lord, Lord, shall enter into the kingdom of heaven,” or be the Sons of God; “but he that doth the will of my father which is in heaven.” To such disobedient subjects, though they have prophesied and done miracles in my name, I shall say at the day of judgment, “Depart from me, ye workers of iniquity; I know you not.”

When, Matt. xii. he was told, that his mother and brethren sought to speak with him, ver. 49, “Stretching out his hands to his disciples, he said, Behold my mother and my brethren; for whosoever shall do the will of my Father, who is in heaven, he is my brother, and sister, and mother.” They could not be children of the adoption, and fellow heirs with him of eternal life, who did not do the will of his heavenly Father.

Matt. xv. and Mark vi. the pharisees finding fault, that his disciples eat with unclean hands, he makes this declaration to his apostles: “Do not ye perceive, that whatsoever from without entereth into a man cannot defile him, because it entereth not into his heart, but his belly? That which cometh out of the man, that defileth the man; for from within, out of the heart of men, proceed evil thoughts, adulteries, fornications, murders, thefts, false witnesses, covetousness, wickedness, deceit, lasciviousness, an evil eye, blasphemy, pride, foolishness. All these ill things come from within, and defile a man.”

He commands self-denial, and the exposing ourselves to suffering and danger, rather than to deny or disown him: and this upon pain of losing our souls; which are of more worth than all the world. This we may read, Matt. xvi. 24 — 27, and the parallel places, Mark viii. and Luke ix.

The apostles disputing among them, who should be greatest in the kingdom of the Messiah, Matt. xviii. 1, he thus determines the controversy, Mark ix. 35, “If any one will be first, let him be last of all, and servant of all:” and setting a child before them adds, Matt. xviii. 3, “Verily I say unto you, Unless ye turn, and become as children, ye shall not enter into the kingdom of heaven.”

Matth. xviii. 15, “If thy brother shall trespass against thee, go and tell him his fault between thee and him alone: if he shall hear thee, thou hast gained thy brother. But if he will not hear thee, then take with thee one or two more, that in the mouth of two or three witnesses every word may be established. And if he shall neglect to hear them, tell it to the church: but if

he neglect to hear the church, let him be unto thee, as an heathen and publican.” Ver. 21, “Peter said, Lord, how often shall my brother sin against me and I forgive him? Till seven times? Jesus said unto him, I say not unto thee, till seven times; but until seventy times seven.” And then ends the parable of the servant, who being himself forgiven, was rigorous to his fellow-servant, with these words, ver. 34, “and his Lord was wroth, and delivered him to the tormentors, till he should pay all that was due to him. So likewise shall my heavenly Father do also unto you, if you from your hearts forgive not every one his brother their trespasses.”

Luke x. 25, to the lawyer, asking him, “What shall I do to inherit eternal life? He said, What is written in the law? How readest thou?” He answered, “Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy strength, and with all thy mind; and thy neighbour as thyself.” Jesus said, “This do, and thou shalt live.” And when the lawyer, upon our Saviour’s parable of the good Samaritan, was forced to confess, that he that showed mercy was his neighbour; Jesus dismissed him with this charge, ver. 37, “Go, and do thou likewise.”

Luke xi. 41, “Give alms, of such things as ye have; behold all things are clean unto you.”

Luke xii. 15, “Take heed, and beware of covetousness.” Ver. 22, “Be not solicitous what ye shall eat, or what ye shall drink, nor what ye shall put on;” be not fearful, or apprehensive of want; “for it is your Father’s pleasure to give you a kingdom. Sell that you have, and give alms: and provide yourselves bags that wax not old, a treasure in the heavens, that faileth not: for where your treasure is, there will your heart be also. Let your loins be girded, and your lights burning; and ye yourselves like unto men that wait for the Lord when he will return. Blessed are those servants, whom the Lord, when he cometh, shall find watching. Blessed is that servant, whom the Lord having made ruler of his household, to give them their portion of meat in due season, the Lord, when he cometh, shall find so doing. Of a truth I say unto you, that he will make him ruler over all that he hath. But if that servant say in his heart, my Lord delayeth his coming; and shall begin to beat the men servants, and maidens, and to eat and drink, and to be drunken; the Lord of that servant will come in a day when he looketh not for him, and at an hour when he is not aware; and will cut him in sunder, and will appoint him his portion with unbelievers. And that servant who knew his lord’s will, and prepared not himself, neither did according to his

will, shall be beaten with many stripes. But he that knew not and did commit things worthy of stripes, shall be beaten with few stripes. For unto whomsoever much is given, of him shall much be required: and to whom men have committed much, of him they will ask the more.”

Luke xiv. 11, “Whosoever exalteth himself shall be abased: and he that humbleth himself shall be exalted.”

Ver. 12, “When thou makest a dinner, or supper, call not thy friends, or thy brethren, neither thy kinsmen, nor thy neighbours; lest they also bid thee again, and a recompense be made thee. But when thou makest a feast, call the poor, and maimed, the lame and the blind; and thou shalt be blessed, for they cannot recompense thee; for thou shalt be recompensed at the resurrection of the just.”

Ver. 33, “So likewise, whosoever he be of you, that is not ready to forego all that he hath, he cannot be my disciple.”

Luke xiv. 9, “I say unto you, make to yourselves friends of the mammon of unrighteousness: that when ye fail, they may receive you into everlasting habitations. If ye have not been faithful in the unrighteous mammon, who will commit to your trust the true riches? And if ye have not been faithful in that which is another man’s, who shall give you that which is your own?”

Luke xvii. 3, “If thy brother trespass against thee, rebuke him; and if he repent forgive him. And if he trespass against thee seven times in a day, and seven times in a day turn again unto thee, saying, I repent, thou shalt forgive him.”

Luke xviii. 1, “He spoke a parable to them to this end, that men ought always to pray, and not to faint.”

Ver. 18, “One comes to him and asks him, saying, Master, what shall I do to inherit eternal life? Jesus said unto him, If thou wilt enter into life, keep the commandments. He says, Which? Jesus said, Thou knowest the commandments. Thou shalt not kill; thou shalt not commit adultery; thou shalt not steal; thou shalt not bear false witness; defraud not; honour thy father and thy mother; and thou shalt love thy neighbour as thyself. He said, all these have I observed from my youth. Jesus hearing this, loved him, and said unto him, Yet lackest thou one thing: sell all that thou hast, and give it to the poor, and thou shalt have treasure in heaven; and come, follow me.” To understand this right, we must take notice, that this young man asks our Saviour, what he must do to be admitted effectually into the kingdom of the Messiah? The jews believed, that when the Messiah came, those of their

nation that received him, should not die; but that they, with those who, being dead, should then be raised again by him, should enjoy eternal life with him. Our Saviour, in answer to this demand, tells the young man, that to obtain the eternal life of the kingdom of the Messiah, he must keep the commandments. And then enumerating several of the precepts of the law, the young man says, he had observed these from his childhood. For which the text tells us, Jesus loved him. But our Saviour, to try whether in earnest he believed him to be the Messiah, and resolved to take him to be his king, and to obey him as such, bids him give all that he has to the poor, and come, and follow him; and he should have treasure in heaven. This I look on to be the meaning of the place; this, of selling all he had, and giving it to the poor, not being a standing law of his kingdom; but a probationary command to this young man; to try whether he truly believed him to be the Messiah, and was ready to obey his commands, and relinquish all to follow him, when he, his prince, required it.

And therefore we see, Luke xix. 14, where our Saviour takes notice of the jews not receiving him as the Messiah, he expresses it thus: “We will not have this man to reign over us.” It is not enough to believe him to be the Messiah, unless we also obey his laws, and take him to be our king to reign over us.

Matt. xxii. 11 — 13, he that had not on the wedding-garment, though he accepted of the invitation, and came to the wedding, was cast into utter darkness. By the wedding-garment, it is evident good works are meant here; that wedding-garment of fine linen, clean, and white, which we are told, Rev. xix, 8, is the δικαιώματα, “righteous acts of the saints;” or, as St. Paul calls it, Ephes. iv. 1, “The walking worthy of the vocation wherewith we are called.” This appears from the parable itself: “The kingdom of heaven,” says our Saviour, ver. 2, “is like unto a king, who made a marriage for his son.” And here he distinguishes those who were invited, into three sorts: 1. Those who were invited, and came not; i. e. those who had the gospel, the good news of the kingdom of God proposed to them, but believed not. 2. Those who came, but had not on a wedding-garment; i. e. believed Jesus to be the Messiah, but were not new clad (as I may so say) with a true repentance, and amendment of life: nor adorned with those virtues, which the apostle, Col. iii. requires to be put on. 3. Those who were invited, did come, and had on the wedding-garment; i. e. heard the gospel, believed Jesus to be the Messiah, and sincerely obeyed his laws. These three sorts

are plainly designed here; whereof the last only were the blessed, who were to enjoy the kingdom prepared for them.

Matt. xxiii. “Be not ye called Rabbi; for one is your master, even the Messiah, and ye are all brethren. And call no man your father upon the earth: for one is your Father which is in heaven. Neither be ye called masters: for one is your master, even the Messiah. But he that is greatest amongst you, shall be your servant. And whosoever shall exalt himself, shall be abased; and he that shall humble himself, shall be exalted.”

Luke xxi. 34, “Take heed to yourselves, lest your hearts be at any time overcharged with surfeiting and drunkenness, and cares of this life.”

Luke xxii. 25, “He said unto them, the kings of the gentiles exercise lordship over them; and they that exercise authority upon them, are called benefactors. But ye shall not be so. But he that is greatest among you, let him be as the younger; and he that is chief, as he that doth serve.”

John xiii. 34, “A new commandment I give unto you, That ye love one another: as I have loved you, that ye also love one another. By this shall all men know that ye are my disciples, if ye love one another.” This command, of loving one another, is repeated again, chap. xv. 12, and 17.

John xiv. 15, “If ye love me, keep my commandments.” Ver. 21, “He that hath my commandments, and keepeth them, he it is that loveth me: and he that loveth me, shall be loved of my Father, and I will love him, and manifest myself to him.” Ver. 23, “If a man loveth me he will keep my words.” Ver. 24, “He that loveth me not, keepeth not my sayings.”

John xv. 8, “In this is my Father glorified, that ye bear much fruit; so shall ye be my disciples.” Ver. 14, “Ye are my friends, if ye do whatsoever I command you.”

Thus we see our Saviour not only confirmed the moral law; and clearing it from the corrupt glosses of the scribes and pharisees, showed the strictness as well as obligation of its injunctions; but moreover, upon occasion, requires the obedience of his disciples to several of the commands he afresh lays upon them; with the inforcement of unspeakable rewards and punishments in another world, according to their obedience or disobedience. There is not, I think, any of the duties of morality, which he has not, somewhere or other, by himself and his apostles, inculcated over and over again to his followers in express terms. And is it for nothing that he is so instant with them to bring forth fruit? Does he, their King, command, and is it an indifferent thing? Or will their happiness or misery

not at all depend upon it, whether they obey or no? They were required to believe him to be the Messiah; which faith is of grace promised to be reckoned to them, for the completing of their righteousness, wherein it was defective: but righteousness, or obedience to the law of God, was their great business, which, if they could have attained by their own performances, there would have been no need of this gracious allowance, in reward of their faith: but eternal life, after the resurrection, had been their due by a former covenant, even that of works; the rule whereof was never abolished, though the rigour was abated. The duties enjoined in it were duties still. Their obligations had never ceased; nor a wilful neglect of them was ever dispensed with. But their past transgressions were pardoned, to those who received Jesus, the promised Messiah, for their king; and their future slips covered, if renouncing their former iniquities, they entered into his kingdom, and continued his subjects with a steady resolution and endeavour to obey his laws. This righteousness therefore, a complete obedience, and freedom from sin, are still sincerely to be endeavoured after. And it is nowhere promised, that those who persist in a wilful disobedience to his laws, shall be received into the eternal bliss of his kingdom, how much soever they believe in him.

A sincere obedience, how can any one doubt to be, or scruple to call, a condition of the new covenant, as well as faith; whoever reads our Saviour's sermon in the mount, to omit all the rest? Can any thing be more express than these words of our Lord? Matt. vi. 14, "If you forgive men their trespasses, your heavenly Father will also forgive you: but if you forgive not men their trespasses, neither will your Father forgive your trespasses." And John xiii. 17, "If ye know these things, happy are ye if you do them." This is so indispensable a condition of the new covenant, that believing without it, will not do, nor be accepted; if our Saviour knew the terms on which he would admit men into life. "Why call ye me, Lord, Lord," says he, Luke vi. 46, "and do not the things which I say?" It is not enough to believe him to be the Messiah, the Lord, without obeying him. For that these he speaks to here, were believers, is evident from the parallel place, Matt. vii. 21 — 23, where it is thus recorded: "Not every one who says, Lord, Lord, shall enter into the kingdom of heaven; but he that doth the will of my father, which is in heaven." No rebels, or refractory disobedient, shall be admitted there, though they have so far believed in Jesus, as to be able to do miracles in his name: as is plain out of the following words: "Many will say

to me in that day, Have we not prophesied in thy name, and in thy name have cast out devils, and in thy name have done many wonderful works? And then will I profess unto them, I never knew you; depart from me, ye workers of iniquity.”

This part of the new covenant, the apostles also, in their preaching the gospel of the Messiah, ordinarily joined with the doctrine of faith.

St. Peter, in his first sermon, Acts ii. when they were pricked in heart, and asked, “What shall we do?” says, ver. 38, “Repent, and be baptized, every one of you in the name of Jesus Christ, for the remission of sins.” The same he says to them again in his next speech, Acts iv. 26, “Unto you first, God having raised up his Son Jesus, sent him to bless you.” How was this done? “in turning away every one from your iniquities.”

The same doctrine they preach to the high priest and rulers, Acts v. 30, “The God of our fathers raised up Jesus, whom ye slew, and hanged on a tree. Him hath God exalted with his right hand, to be a Prince and a Saviour, for to give repentance to Israel, and forgiveness of sins; and we are witnesses of these things, and so is also the Holy Ghost, whom God hath given to them that obey him.”

Acts xvii. 30, St. Paul tells the Athenians, That now under the gospel, “God commandeth all men everywhere to repent.”

Acts xx. 21, St. Paul, in his last conference with the elders of Ephesus, professes to have taught them the whole doctrine necessary to salvation: “I have,” says he, “kept back nothing that was profitable unto you; but have showed you, and have taught you publicly, and from house to house; testifying both to the jews and to the Greeks:” and then gives an account what his preaching had been, viz. “Repentance towards God, and faith towards our Lord Jesus the Messiah.” This was the sum and substance of the gospel which St. Paul preached, and was all that he knew necessary to salvation; viz. “Repentance, and believing Jesus to be the Messiah:” and so takes his last farewell of them, whom he shall never see again, ver. 32, in these words, “And now, brethren, I commend you to God, and to the word of his grace, which is able to build you up, and to give you an inheritance among all them that are sanctified.” There is an inheritance conveyed by the word and covenant of grace; but it is only to those who are sanctified.

Acts xxiv. 24, “When Felix sent for Paul,” that he and his wife Drusilla might hear him, “concerning the faith in Christ;” Paul reasoned of righteousness, or justice; and temperance; the duties we owe to others, and

to ourselves; and of the judgment to come; until he made Felix to tremble. Whereby it appears, that “temperance and justice” were fundamental parts of the religion that Paul professed, and were contained in the faith which he preached. And if we find the duties of the moral law not pressed by him every-where, we must remember, that most of his sermons left upon record, were preached in their synagogues to the jews, who acknowledged their obedience due to all the precepts of the law; and would have taken it amiss to have been suspected not to have been more zealous for the law than he. And therefore it was with reason that his discourses were directed chiefly to what they yet wanted, and were averse to, the knowledge and embracing of Jesus, their promised Messiah. But what his preaching generally was, if we will believe him himself, we may see, Acts xxvi. where giving an account to king Agrippa, of his life and doctrine, he tells him, ver. 20, “I showed unto them of Damascus, and at Jerusalem, and throughout all the coasts of Judea, and then to the gentiles, that they should repent and turn to God, and do works meet for repentance.”

Thus we see, by the preaching of our Saviour and his apostles, that he required of those who believed him to be the Messiah, and received him for their Lord and Deliverer, that they should live by his laws: and that (though in consideration of their becoming his subjects, by faith in him, whereby they believed and took him to be the Messiah, their former sins should be forgiven, yet) he would own none to be his, nor receive them as true denizens of the new Jerusalem, into the inheritance of eternal life; but leave them to the condemnation of the unrighteous; who renounced not their former miscarriages, and lived in a sincere obedience to his commands. What he expects from his followers, he has sufficiently declared as a legislator: and that they may not be deceived, by mistaking the doctrine of faith, grace, free-grace, and the pardon and forgiveness of sins, and salvation by him, (which was the great end of his coming,) he more than once declares to them, for what omissions and miscarriages he shall judge and condemn to death, even those who have owned him, and done miracles in his name: when he comes at last to render to every one according to what he had done in the flesh, sitting upon his great and glorious tribunal, at the end of the world.

The first place where we find our Saviour to have mentioned the day of judgment, is John v. 28, 29, in these words: “the hour is coming, in which all that are in their grave shall hear his [i. e. the Son of God’s] voice, and

shall come forth; they that have done good, unto the resurrection of life; and they that have done evil, unto the resurrection of damnation.” That which puts the distinction, if we will believe our Saviour, is the having done good or evil. And he gives a reason of the necessity of his judging or condemning those “who have done evil,” in the following words, ver. 30, “I can of myself do nothing. As I hear I judge; and my judgment is just; because I seek not my own will, but the will of my Father who hath sent me.” He could not judge of himself; he had but a delegated power of judging from the Father, whose will he obeyed in it; and who was of purer eyes than to admit any unjust person into the kingdom of heaven.

Matt. vii. 22, 23, speaking again of that day, he tells what his sentence will be, “Depart from me, ye workers of iniquity.” Faith in the penitent and sincerely obedient, supplies the defect of their performances; and so by grace they are made just. But we may observe, none are sentenced or punished for unbelief, but only for their misdeeds. “They are workers of iniquity” on whom the sentence is pronounced.

Matt. xiii. 41, “At the end of the world, the Son of man shall send forth his angels; and they shall gather out of his kingdom all scandals, and them which do iniquity; and cast them into a furnace of fire; there shall be wailing and gnashing of teeth.” And again, ver. 49, “The angels shall sever the wicked from among the just; and shall cast them into the furnace of fire.”

Matt. xvi. 24, “For the Son of man shall come in the glory of his Father, with his angels: and then he shall reward every man according to his works.”

Luke xiii. 26, “Then shall ye begin to say, We have eaten and drank in thy presence, and thou hast taught in our streets. But he shall say, I tell you, I know you not; depart from me, ye workers of iniquity.”

Matt. xxv. 31 — 46, “When the Son of man shall come in his glory; and before him shall be gathered all nations; he shall set the sheep on his right hand, and the goats on his left. Then shall the king say to them on his right hand, Come, ye blessed of my Father, inherit the kingdom prepared for you from the foundation of the world; for I was an hungered, and ye gave me meat; I was thirsty, and ye gave me drink; I was a stranger, and ye took me in; naked, and ye clothed me; I was sick, and ye visited me; I was in prison, and ye came unto me. Then shall the righteous answer him, saying, Lord, when saw we thee an hungered, and fed thee? &c. And the King shall

answer and say unto them, Verily, I say unto you, Inasmuch as ye have done it unto one of the least of these my brethren, ye have done it unto me. Then shall he say unto them on the left hand, Depart from me, ye cursed, into everlasting fire, prepared for the devil and his angels: for I was an hungered, and ye gave me no meat; I was thirsty, and ye gave me no drink; I was a stranger, and ye took me not in; naked, and ye clothed me not; sick, and in prison, and ye visited me not. Insomuch that ye did it not to one of these, ye did it not to me. And these shall go into everlasting punishment; but the righteous into life eternal.”

These, I think, are all the places where our Saviour mentions the last judgment, or describes his way of proceeding in that great day; wherein, as we have observed, it is remarkable, that every-where the sentence follows doing or not doing, without any mention of believing or not believing. Not that any, to whom the gospel hath been preached, shall be saved, without believing Jesus to be the Messiah: for all being sinners, and transgressors of the law, and so unjust; are all liable to condemnation; unless they believe, and so through grace are justified by God, for this faith, which shall be accounted to them for righteousness. But the rest wanting this cover, this allowance for their transgressions, must answer for all their actions; and being found transgressors of the law, shall, by the letter and sanction of that law, be condemned for not having paid a full obedience to that law; and not for want of faith. That is not the guilt on which the punishment is laid; though it be the want of faith, which lays open their guilt uncovered; and exposes them to the sentence of the law, against all that are unrighteous.

The common objection here, is, If all sinners shall be condemned, but such as have a gracious allowance made them; and so are justified by God, for believing Jesus to be the Messiah, and so taking him for their King, whom they are resolved to obey to the utmost of their power; “What shall become of all mankind, who lived before our Saviour’s time, who never heard of his name, and consequently could not believe in him?” To this the answer is so obvious and natural, that one would wonder how any reasonable man should think it worth the urging. No-body was, or can be required to believe, what was never proposed to him to believe. Before the fulness of time, which God from the counsel of his own wisdom had appointed to send his Son in, he had, at several times, and in different manners, promised to the people of Israel, an extraordinary person to come; who, raised from amongst themselves, should be their Ruler and Deliverer.

The time, and other circumstances of his birth, life, and person, he had in sundry prophecies so particularly described, and so plainly foretold, that he was well known, and expected by the jews, under the name of the Messiah, or Anointed, given him in some of these prophecies. All then that was required, before his appearing in the world, was to believe what God had revealed, and to rely with a full assurance on God, for the performance of his promise; and to believe, that in due time he would send them the Messiah, this anointed King, this promised Saviour and Deliverer, according to his word. This faith in the promises of God, this relying and acquiescing in his word and faithfulness, the Almighty takes well at our hands, as a great mark of homage, paid by us poor frail creatures, to his goodness and truth, as well as to his power and wisdom: and accepts it as an acknowledgment of his peculiar providence, and benignity to us. And therefore our Saviour tells us, John xii. 44, “He that believes on me, believes not on me, but on him that sent me.” The works of nature show his wisdom and power; but it is his peculiar care of mankind most eminently discovered in his promises to them, that shows his bounty and goodness; and consequently engages their hearts in love and affection to him. This oblation of an heart, fixed with dependence on, and affection to him, is the most acceptable tribute we can pay him, the foundation of true devotion, and life of all religion. What a value he puts on this depending on his word, and resting satisfied in his promises, we have an example in Abraham; whose faith “was counted to him for righteousness,” as we have before remarked out of Rom. iv. And his relying firmly on the promise of God, without any doubt of its performance, gave him the name of the father of the faithful; and gained him so much favour with the Almighty, that he was called the “friend of God;” the highest and most glorious title that can be bestowed on a creature. The thing promised was no more but a son by his wife Sarah; and a numerous posterity by him, which should possess the land of Canaan. These were but temporal blessings, and (except the birth of a son) very remote, such as he should never live to see, nor in his own person have the benefit of. But because he questioned not the performance of it; but rested fully satisfied in the goodness, truth, and faithfulness of God, who had promised, it was counted to him for righteousness. Let us see how St. Paul expresses it, Rom. iv. 18 — 22, “Who, against hope, believed in hope, that he might become the father of many nations; according to that which was spoken, So shall thy seed be. And being not weak in faith, he

considered not his own body now dead, when he was above an hundred years old, neither yet the deadness of Sarah's womb. He staggered not at the promise of God through unbelief, but was strong in faith: giving glory to God, and being fully persuaded, that what he had promised he was able to perform. And therefore it was imputed to him for righteousness." St. Paul having here emphatically described the strength and firmness of Abraham's faith, informs us, that he thereby "gave glory to God;" and therefore it was accounted to him for righteousness." This is the way that God deals with poor frail mortals. He is graciously pleased to take it well of them, and give it the place of righteousness, and a kind of merit in his sight; if they believe his promises, and have a steadfast relying on his veracity and goodness. St. Paul, Heb. xi. 6, tells us, "Without faith it is impossible to please God:" but at the same time tells us what faith that is. "For," says he, "he that cometh to God, must believe that he is; and that he is a rewarder of them that diligently seek him." He must be persuaded of God's mercy and goodwill to those who seek to obey him; and rest assured of his rewarding those who rely on him, for whatever, either by the light of nature, or particular promises, he has revealed to them of his tender mercies, and taught them to expect from his bounty. This description of faith (that we might not mistake what he means by that faith, without which we cannot please God, and which recommended the saints of old) St. Paul places in the middle of the list of those who were eminent for their faith; and whom he sets as patterns to the converted Hebrews, under persecution, to encourage them to persist in their confidence of deliverance by the coming of Jesus Christ, and in their belief of the promises they now had under the gospel. By those examples he exhorts them not to "draw back" from the hope that was set before them, nor apostatize from the profession of the christian religion. This is plain from ver. 35 — 38, of the precedent chapter: "Cast not away therefore your confidence, which hath great recompence of reward. For ye have great need of persisting or perseverance;" (for so the Greek word signifies here, which our translation renders "patience." Vide Luke viii. 15.) "that after ye have done the will of God, ye might receive the promise. For yet a little while, and he that shall come will come, and will not tarry. Now the just shall live by faith. But if any man draw back, my soul shall have no pleasure in him."

The examples of faith, which St. Paul enumerates and proposes in the following words, chap. xi. plainly show, that the faith whereby those

believers of old pleased God, was nothing but a steadfast reliance on the goodness and faithfulness of God, for those good things, which either the light of nature, or particular promises, had given them grounds to hope for. Of what avail this faith was with God, we may see, ver. 4, "By faith Abel offered unto God a more excellent sacrifice than Cain; by which he obtained witness that he was righteous." Ver. 5, "By faith Enoch was translated, that he should not see death: for before his translation he had this testimony, that he pleased God." Ver. 7, "Noah being warned of God of things not seen as yet;" being wary, "by faith prepared an ark, to the saving of his house; by the which he condemned the world, and became heir of the righteousness which is by faith." And what it was that God so graciously accepted and rewarded, we are told, ver. 11, "Through faith also Sarah herself received strength to conceive seed, and was delivered of a child, when she was past age." How she came to obtain this grace from God, the apostle tells us, "Because she judged him faithful who had promised." Those therefore, who pleased God, and were accepted by him before the coming of Christ, did it only by believing the promises, and relying on the goodness of God, as far as he had revealed it to them. For the apostle, in the following words, tells us, ver. 13, "These all died in faith, not having received (the accomplishment of) the promises; but having seen them afar off: and were persuaded of them, and embraced them." This was all that was required of them; to be persuaded of, and embrace the promises which they had. They could be "persuaded of" no more than was proposed to them; "embrace" no more than was revealed; according to the promises they had received, and the dispensations they were under. And if the faith of things "seen afar off;" if their trusting in God for the promises he then gave them; if a belief of the Messiah to come; were sufficient to render those who lived in the ages before Christ acceptable to God, and righteous before him: I desire those who tell us, that God will not (nay, some go so far as to say, cannot) accept any, who do not believe every article of their particular creeds and systems, to consider, why God, out of his infinite mercy, cannot as well justify men now, for believing Jesus of Nazareth to be the promised Messiah, the King and Deliverer; as those heretofore, who believed only that God would, according to his promise, in due time, send the Messiah, to be a King and Deliverer.

There is another difficulty often to be met with, which seems to have something of more weight in it: and that is, that "though the faith of those

before Christ (believing that God would send the Messiah, to be a Prince and a Saviour to his people, as he had promised), and the faith of those since his time (believing Jesus to be that Messiah, promised and sent by God), shall be accounted to them for righteousness; yet what shall become of all the rest of mankind, who, having never heard of the promise or news of a Saviour; not a word of a Messiah to be sent, or that was come; have had no thought or belief concerning him?"

To this I answer; that God will require of every man, "according to what a man hath, and not according to what he hath not." He will not expect the improvement of ten talents, where he gave but one; nor require any one should believe a promise of which he has never heard. The apostle's reasoning, Rom. x. 14, is very just: "How shall they believe in him, of whom they have not heard?" But though there be many who being strangers to the commonwealth of Israel, were also strangers to the oracles of God, committed to that people; many, to whom the promise of the Messiah never came, and so were never in a capacity to believe or reject that revelation; yet God had, by the light of reason, revealed to all mankind, who would make use of that light, that he was good and merciful. The same spark of the divine nature and knowledge in man, which making him a man, showed him the law he was under, as a man; showed him also the way of atoning the merciful, kind, compassionate Author and Father of him and his being, when he had transgressed that law. He that made use of this candle of the Lord, so far as to find what was his duty, could not miss to find also the way to reconciliation and forgiveness, when he had failed of his duty: though, if he used not his reason this way, if he put out or neglected this light, he might, perhaps, see neither.

The law is the eternal, immutable standard of right. And a part of that law is, that a man should forgive, not only his children, but his enemies, upon their repentance, asking pardon, and amendment. And therefore he could not doubt that the author of this law, and God of patience and consolation, who is rich in mercy, would forgive his frail offspring, if they acknowledged their faults, disapproved the iniquity of their transgressions, begged his pardon, and resolved in earnest, for the future, to conform their actions to this rule, which they owned to be just and right. This way of reconciliation, this hope of atonement, the light of nature revealed to them: and the revelation of the gospel, having said nothing to the contrary, leaves

them to stand and fall to their own Father and Master, whose goodness and mercy is over all his works.

I know some are forward to urge that place of the Acts, chap. iv. as contrary to this. The words, ver. 10 and 12, stand thus: “Be it known unto you all, and to all the people of Israel, that by the name of Jesus Christ of Nazareth, whom ye crucified, whom God raised from the dead, even by him, doth this man” [i. e. the lame man restored by Peter] “stand here before you whole. This is the stone which is set at nought by you builders, which is become the head of the corner. Neither is there salvation in any other: for there is none other name under heaven given among men, in which we must be saved.” Which, in short, is, that Jesus is the only true Messiah, neither is there any other person, but he, given to be a mediator between God and man; in whose name we may ask, and hope for salvation.

It will here possibly be asked, “Quorsum perditio hæc?” What need was there of a Saviour? What advantage have we by Jesus Christ?

It is enough to justify the fitness of any thing to be done, by resolving it into the “wisdom of God,” who had done it; though our short views, and narrow understandings, may utterly incapacitate us to see that wisdom, and to judge rightly of it. We know little of this visible, and nothing at all of the state of that intellectual world, wherein are infinite numbers and degrees of spirits out of the reach of our ken, or guess; and therefore know not what transactions there were between God and our Saviour, in reference to his kingdom. We know not what need there was to set up an head and a chieftain, in opposition to “the prince of this world, the prince of the power of the air,” &c. whereof there are more than obscure intimations in scripture. And we shall take too much upon us, if we shall call God’s wisdom or providence to account, and pertyly condemn for needless all that our weak, and perhaps biassed, understanding cannot account for.

Though this general answer be reply enough to the forementioned demand, and such as a rational man, or fair searcher after truth, will acquiesce in; yet in this particular case, the wisdom and goodness of God has shown itself so visibly to common apprehensions, that it hath furnished us abundantly wherewithal to satisfy the curious and inquisitive; who will not take a blessing, unless they be instructed what need they had of it, and why it was bestowed upon them. The great and many advantages we receive by the coming of Jesus the Messiah, will show, that it was not without need, that he was sent into the world.

The evidence of our Saviour's mission from heaven is so great, in the multitude of miracles he did before all sorts of people, that what he delivered cannot but be received as the oracles of God, and unquestionable verity. For the miracles he did were so ordered by the divine providence and wisdom, that they never were, nor could be denied by any of the enemies, or opposers of christianity.

Though the works of nature, in every part of them, sufficiently evidence a deity; yet the world made so little use of their reason, that they saw him not, where, even by the impressions of himself, he was easy to be found. Sense and lust blinded their minds in some, and a careless inadvertency in others, and fearful apprehensions in most, (who either believed there were, or could not but suspect there might be, superiour unknown beings,) gave them up into the hands of their priests, to fill their heads with false notions of the Deity, and their worship with foolish rites, as they pleased: and what dread or craft once began, devotion soon made sacred, and religion immutable. In this state of darkness and ignorance of the true God, vice and superstition held the world. Nor could any help be had, or hoped for, from reason; which could not be heard, and was judged to have nothing to do in the case; the priests, everywhere, to secure their empire, having excluded reason from having any thing to do in religion. And in the crowd of wrong notions, and invented rites, the world had almost lost the sight of the one only true God. The rational and thinking part of mankind, it is true, when they sought after him, they found the one supreme, invisible God; but if they acknowledged and worshipped him, it was only in their own minds. They kept this truth locked up in their own breasts as a secret, nor ever durst venture it amongst the people; much less amongst the priests, those wary guardians, of their own creeds and profitable inventions. Hence we see, that reason, speaking ever so clearly to the wise and virtuous, had never authority enough to prevail on the multitude; and to persuade the societies of men, that there was but one God, that alone was to be owned and worshipped. The belief and worship of one God, was the national religion of the Israelites alone: and if we will consider it, it was introduced and supported amongst the people by revelation. They were in Goshen, and had light, whilst the rest of the world were in almost Egyptian darkness, "without God in the world." There was no part of mankind, who had quicker parts, or improved them more; that had a greater light of reason, or followed it farther in all sorts of speculations, than the Athenians; and yet we find but

one Socrates amongst them, that opposed and laughed at their polytheism, and wrong opinions of the Deity; and we see how they rewarded him for it. Whatsoever Plato, and the soberest of the philosophers, thought of the nature and being of the one God, they were fain, in their outward professions and worship, to go with the herd, and keep to their religion established by law: which what it was, and how it had disposed the minds of these knowing and quick-sighted Grecians, St. Paul tells us, Acts xvii. 22 — 29, “Ye men of Athens,” says he, “I perceive, that in all things ye are too superstitious. For as I passed by, and beheld your devotions, I found an altar with this inscription, to the unknown god. Whom therefore ye ignorantly worship, him declare I unto you. God that made the world, and all things therein, seeing that he is Lord of heaven and earth, dwelleth not in temples made with hands: neither is worshipped with men’s hands, as though he needed any thing, seeing that he giveth unto all life, and breath, and all things; and hath made of one blood all the nations of men, for to dwell on the face of the earth; and hath determined the times before appointed, and the bounds of their habitations; that they should seek the Lord, if haply they might feel him out and find him, though he be not far from every one of us.” Here he tells the Athenians, that they, and the rest of the world (given up to superstition) whatever light there was in the works of creation and providence, to lead them to the true God; yet few of them found him. He was every-where near them; yet they were but like people groping and feeling for something in the dark, and did not see him with a full and clear day-light; “but thought the Godhead like to gold and siver, and stone, graven by art and man’s device.”

In this state of darkness and errour, in reference to the “true God,” our Saviour found the world. But the clear revelation he brought with him, dissipated this darkness; made the “one invisible true God” known to the world: and that with such evidence and energy, that polytheism and idolatry have no-where been able to withstand it: but wherever the preaching of the truth he delivered, and the light of the gospel hath come, those mists have been dispelled. And, in effect, we see, that since our Saviour’s time, the “belief of one God” has prevailed and spread itself over the face of the earth. For even to the light that the Messiah brought into the world with him, we must ascribe the owning and profession of one God, which the mahometan religion hath derived and borrowed from it. So that in this sense it is certainly and manifestly true of our Saviour, what St. John says of him,

1 John iii. 8, “For this purpose the Son of God was manifested, that he might destroy the works of the devil.” This light the world needed, and this light is received from him: that there is but “one God,” and he “eternal, invisible;” not like to any visible objects, nor to be represented by them.

If it be asked, whether the revelation to the patriarchs by Moses did not teach this, and why that was not enough? The answer is obvious; that however clearly the knowledge of one invisible God, maker of heaven and earth, was revealed to them; yet that revelation was shut up in a little corner of the world; amongst a people, by that very law, which they received with it, excluded from a commerce and communication with the rest of mankind. The gentile world, in our Saviour’s time, and several ages before, could have no attestation of the miracles on which the Hebrews built their faith, but from the jews themselves, a people not known to the greatest part of mankind; contemned and thought vilely of, by those nations that did know them; and therefore very unfit and unable to propagate the doctrine of one God in the world, and diffuse it through the nations of the earth, by the strength and force of that ancient revelation, upon which they had received it. But our Saviour, when he came, threw down this wall of partition; and did not confine his miracles or message to the land of Canaan, or the worshippers at Jerusalem. But he himself preached at Samaria, and did miracles in the borders of Tyre and Sidon, and before multitudes of people gathered from all quarters. And after his resurrection, sent his apostles amongst the nations, accompanied with miracles; which were done in all parts so frequently, and before so many witnesses of all sorts, in broad daylight, that, as I have before observed, the enemies of christianity have never dared to deny them; no, not Julian himself: who neither wanted skill nor power to inquire into the truth: nor would have failed to have proclaimed and exposed it, if he could have detected any falsehood in the history of the gospel; or found the least ground to question the matter of fact published of Christ and his apostles. The number and evidence of the miracles done by our Saviour and his followers, by the power and force of truth, bore down this mighty and accomplished emperor, and all his parts, in his own dominions. He durst not deny so plain a matter of fact, which being granted, the truth of our Saviour’s doctrine and mission unavoidably follows; notwithstanding whatsoever artful suggestions his wit could invent, or malice should offer to the contrary.

Next to the knowledge of one God; maker of all things; “a clear knowledge of their duty was wanting to mankind.” This part of knowledge, though cultivated with some care by some of the heathen philosophers, yet got little footing among the people. All men, indeed, under pain of displeasing the gods, were to frequent the temples: every one went to their sacrifices and services: but the priests made it not their business to teach them virtue. If they were diligent in their observations and ceremonies; punctual in their feasts and solemnities, and the tricks of religion; the holy tribe assured them the gods were pleased, and they looked no farther. Few went to the schools of the philosophers to be instructed in their duties, and to know what was good and evil in their actions. The priests sold the better pennyworths, and therefore had all the custom. Lustrations and processions were much easier than a clean conscience, and a steady course of virtue; and an expiatory sacrifice that atoned for the want of it, was much more convenient than a strict and holy life. No wonder then, that religion was everywhere distinguished from, and preferred to virtue; and that it was dangerous heresy and profaneness to think the contrary. So much virtue as was necessary to hold societies together, and to contribute to the quiet of governments, the civil laws of commonwealths taught, and forced upon men that lived under magistrates. But these laws being for the most part made by such, who had no other aims but their own power, reached no farther than those things that would serve to tie men together in subjection; or at most were directly to conduce to the prosperity and temporal happiness of any people. But natural religion, in its full extent, was nowhere, that I know, taken care of, by the force of natural reason. It should seem, by the little that has hitherto been done in it, that it is too hard a task for unassisted reason to establish morality in all its parts, upon its true foundation, with a clear and convincing light. And it is at least a surer and shorter way, to the apprehensions of the vulgar, and mass of mankind, that one manifestly sent from God, and coming with visible authority from him, should, as a king and law-maker, tell them their duties; and require their obedience; than leave it to the long and sometimes intricate deductions of reason, to be made out to them. Such trains of reasoning the greatest part of mankind have neither leisure to weigh; nor, for want of education and use, skill to judge of. We see how unsuccessful in this the attempts of philosophers were before our Saviour’s time. How short their several systems came of the perfection of a true and complete morality, is very

visible. And if, since that, the christian philosophers have much out-done them: yet we may observe, that the first knowledge of the truths they have added, is owing to revelation: though as soon as they are heard and considered, they are found to be agreeable to reason; and such as can by no means be contradicted. Every one may observe a great many truths, which he receives at first from others, and readily assents to, as consonant to reason, which he would have found it hard, and perhaps beyond his strength, to have discovered himself. Native and original truth is not so easily wrought out of the mine, as we, who have it delivered already dug and fashioned into our hands, are apt to imagine. And how often at fifty or threescore years old are thinking men told what they wonder how they could miss thinking of? Which yet their own contemplations did not, and possibly never would have helped them to. Experience shows, that the knowledge of morality, by mere natural light, (how agreeable soever it be to it,) makes but a slow progress, and little advance in the world. And the reason of it is not hard to be found in men's necessities, passions, vices, and mistaken interests; which turn their thoughts another way: and the designing leaders, as well as following herd, find it not to their purpose to employ much of their meditations this way. Or whatever else was the cause, it is plain, in fact, that human reason unassisted failed men in its great and proper business of morality. It never from unquestionable principles, by clear deductions, made out an entire body of the "law of nature." And he that shall collect all the moral rules of the philosophers, and compare them with those contained in the New Testament, will find them to come short of the morality delivered by our Saviour, and taught by his apostles; a college made up, for the most part, of ignorant, but inspired fishermen.

Though yet, if any one should think, that out of the sayings of the wise heathens before our Saviour's time, there might be a collection made of all those rules of morality, which are to be found in the christian religion; yet this would not at all hinder, but that the world, nevertheless, stood as much in need of our Saviour, and the morality delivered by him. Let it be granted (though not true) that all the moral precepts of the gospel were known by somebody or other, amongst mankind before. But where, or how, or of what use, is not considered. Suppose they may be picked up here and there; some from Solon and Bias in Greece, others from Tully in Italy: and to complete the work, let Confucius, as far as China, be consulted; and Anacharsis, the Scythian, contribute his share. What will all this do, to give the world a

complete morality, that may be to mankind the unquestionable rule of life and manners? I will not here urge the impossibility of collecting from men, so far distant from one another, in time and place, and languages. I will suppose there was a Stobeus in those times, who had gathered the moral sayings from all the sages of the world. What would this amount to, towards being a steady rule; a certain transcript of a law that we are under? Did the saying of Aristippus, or Confucius, give it an authority? Was Zeno a law-giver to mankind? If not, what he or any other philosopher delivered, was but a saying of his. Mankind might hearken to it, or reject it, as they pleased; or as it suited their interest, passions, principles or humours. They were under no obligation; the opinion of this or that philosopher was of no authority. And if it were, you must take all he said under the same character. All his dictates must go for law, certain and true; or none of them. And then, if you will take any of the moral sayings of Epicurus (many whereof Seneca quotes with esteem and approbation) for precepts of the law of nature, you must take all the rest of his doctrine for such too; or else his authority ceases: and so no more is to be received from him, or any of the sages of old, for parts of the law of nature, as carrying with it an obligation to be obeyed, but what they prove to be so. But such a body of ethics, proved to be the law of nature, from principles of reason, and teaching all the duties of life; I think nobody will say the world had before our Saviour's time. It is not enough, that there were up and down scattered sayings of wise men, conformable to right reason. The law of nature, is the law of convenience too: and it is no wonder that those men of parts, and studious of virtue, (who had occasion to think on any particular part of it,) should, by meditation, light on the right even from the observable convenience and beauty of it; without making out its obligation from the true principles of the law of nature, and foundations of morality. But these incoherent apophthegms of philosophers, and wise men, however excellent in themselves, and well intended by them; could never make a morality, whereof the world could be convinced; could never rise to the force of a law, that mankind could with certainty depend on. Whatsoever should thus be universally useful, as a standard to which men should conform their manners, must have its authority, either from reason or revelation. It is not every writer of morality, or compiler of it from others, that can thereby be erected into a law-giver to mankind; and a dictator of rules, which are therefore valid, because they are to be found in his books; under the

authority of this or that philosopher. He, that any one will pretend to set up in this kind, and have his rules pass for authentic directions, must show, that either he builds his doctrine upon principles of reason, self-evident in themselves; and that he deduces all the parts of it from thence, by clear and evident demonstration: or must show his commission from heaven, that he comes with authority from God, to deliver his will and commands to the world. In the former way, no-body that I know, before our Saviour's time, ever did, or went about to give us a morality. It is true, there is a law of nature: but who is there that ever did, or undertook to give it us all entire, as a law; no more, nor no less, than what was contained in, and had the obligation of that law? Who ever made out all the parts of it, put them together, and showed the world their obligation? Where was there any such code, that mankind might have recourse to, as their unerring rule, before our Saviour's time? If there was not, it is plain there was need of one to give us such a morality; such a law, which might be the sure guide of those who had a desire to go right; and, if they had a mind, need not mistake their duty, but might be certain when they had performed, when failed in it. Such a law of morality Jesus Christ hath given us in the New Testament; but by the latter of these ways, by revelation. We have from him a full and sufficient rule for our direction, and conformable to that of reason. But the truth and obligation of its precepts have their force, and are put past doubt to us, by the evidence of his mission. He was sent by God: his miracles show it; and the authority of God in his precepts cannot be questioned. Here morality has a sure standard, that revelation vouches, and reason cannot gainsay, nor question; but both together witness to come from God the great law-maker. And such an one as this, out of the New Testament, I think the world never had, nor can any one say, is any-where else to be found. Let me ask any one, who is forward to think that the doctrine of morality was full and clear in the world, at our Saviour's birth; whither would he have directed Brutus and Cassius, (both men of parts and virtue, the one whereof believed, and the other disbelieved a future being,) to be satisfied in the rules and obligations of all the parts of their duties; if they should have asked him, Where they might find the law they were to live by, and by which they should be charged, or acquitted, as guilty, or innocent? If to the sayings of the wise, and the declarations of philosophers, he sends them into a wild wood of uncertainty, to an endless maze, from which they should never get out: if to the religions of the world, yet worse: and if to their own reason, he

refers them to that which had some light and certainty; but yet had hitherto failed all mankind in a perfect rule; and we see, resolved not the doubts that had arisen amongst the studious and thinking philosophers; nor had yet been able to convince the civilized parts of the world, that they had not given, nor could, without a crime, take away the lives of their children, by exposing them.

If any one shall think to excuse human nature, by laying blame on men's negligence, that they did not carry morality to an higher pitch; and make it out entire in every part, with that clearness of demonstration which some think it capable of; he helps not the matter. Be the cause what it will, our Saviour found mankind under a corruption of manners and principles, which ages after ages had prevailed, and must be confessed, was not in a way or tendency to be mended. The rules of morality were in different countries and sects different. And natural reason no-where had cured, nor was like to cure the defects and errors in them. Those just measures of right and wrong, which necessity had anywhere introduced, the civil laws prescribed, or philosophy recommended, stood on their true foundations. They were looked on as bonds of society, and conveniencies of common life, and laudable practices. But where was it that their obligation was thoroughly known and allowed, and they received as precepts of a law; of the highest law, the law of nature? That could not be, without a clear knowledge and acknowledgment of the law-maker, and the great rewards and punishments, for those that would, or would not obey him. But the religion of the heathens, as was before observed, little concerned itself in their morals. The priests, that delivered the oracles of heaven, and pretended to speak from the gods, spoke little of virtue and a good life. And, on the other side, the philosophers, who spoke from reason, made not much mention of the Deity in their ethics. They depended on reason and her oracles, which contain nothing but truth: but yet some parts of that truth lie too deep for our natural powers easily to reach, and make plain and visible to mankind; without some light from above to direct them. When truths are once known to us, though by tradition, we are apt to be favourable to our own parts; and ascribe to our own understandings the discovery of what, in reality, we borrowed from others: or, at least, finding we can prove, what at first we learn from others, we are forward to conclude it an obvious truth, which, if we had sought, we could not have missed. Nothing seems hard to our understandings that is once known: and because what we see, we see

with our own eyes; we are apt to overlook, or forget the help we had from others who showed it us, and first made us see it; as if we were not at all beholden to them, for those truths they opened the way to, and led us into. For knowledge being only of truths that are perceived to be so, we are favourable enough to our own faculties, to conclude, that they of their own strength would have attained those discoveries, without any foreign assistance; and that we know those truths, by the strength and native light of our own minds, as they did from whom we received them by theirs, only they had the luck to be before us. Thus the whole stock of human knowledge is claimed by every one, as his private possession, as soon as he (profiting by others discoveries) has got it into his own mind: and so it is; but not properly by his own single industry, nor of his own acquisition. He studies, it is true, and takes pains to make a progress in what others have delivered: but their pains were of another sort, who first brought those truths to light, which he afterwards derives from them. He that travels the roads now, applauds his own strength and legs that have carried him so far in such a scantling of time; and ascribes all to his own vigour; little considering how much he owes to their pains, who cleared the woods, drained the bogs, built the bridges, and made the ways passable; without which he might have toiled much with little progress. A great many things which we have been bred up in the belief of, from our cradles, (and are notions grown familiar, and, as it were, natural to us, under the gospel,) we take for unquestionable obvious truths, and easily demonstrable; without considering how long we might have been in doubt or ignorance of them, had revelation been silent. And many are beholden to revelation, who do not acknowledge it. It is no diminishing to revelation, that reason gives its suffrage too, to the truths revelation has discovered. But it is our mistake to think, that because reason confirms them to us, we had the first certain knowledge of them from thence; and in that clear evidence we now possess them. The contrary is manifest, in the defective morality of the gentiles, before our Saviour's time; and the want of reformation in the principles and measures of it, as well as practice. Philosophy seemed to have spent its strength, and done its utmost: or if it should have gone farther, as we see it did not, and from undeniable principles given us ethics in a science like mathematics, in every part demonstrable; this yet would not have been so effectual to man in this imperfect state, nor proper for the cure. The greatest part of mankind want leisure or capacity for demonstration; nor can carry a

train of proofs, which in that way they must always depend upon for conviction, and cannot be required to assent to, until they see the demonstration. Wherever they stick, the teachers are always put upon proof, and must clear the doubt by a thread of coherent deductions from the first principle, how long, or how intricate soever they be. And you may as soon hope to have all the day-labourers and tradesmen, the spinsters and dairy-maids, perfect mathematicians, as to have them perfect in ethics this way. Hearing plain commands, is the sure and only course to bring them to obedience and practice. The greatest part cannot know, and therefore they must believe. And I ask, whether one coming from heaven in the power of God, in full and clear evidence and demonstration of miracles, giving plain and direct rules of morality and obedience; be not likelier to enlighten the bulk of mankind, and set them right in their duties, and bring them to do them, than by reasoning with them from general notions and principles of human reason? And were all the duties of human life clearly demonstrated, yet I conclude, when well considered, that method of teaching men their duties would be thought proper only for a few, who had much leisure, improved understandings, and were used to abstract reasonings. But the instruction of the people were best still to be left to the precepts and principles of the gospel. The healing of the sick, the restoring sight to the blind by a word, the raising and being raised from the dead, are matters of fact, which they can without difficulty conceive, and that he who does such things, must do them by the assistance of a divine power. These things lie level to the ordinarist apprehension: he that can distinguish between sick and well, lame and sound, dead and alive, is capable of this doctrine. To one who is once persuaded that Jesus Christ was sent by God to be a King, and a Saviour of those who do believe in him; all his commands become principles; there needs no other proof for the truth of what he says, but that he said it. And then there needs no more, but to read the inspired books, to be instructed: all the duties of morality lie there clear, and plain, and easy to be understood. And here I appeal, whether this be not the surest, the safest, and most effectual way of teaching: especially if we add this farther consideration, that as it suits the lowest capacities of reasonable creatures, so it reaches and satisfies, nay, enlightens the highest. The most elevated understandings cannot but submit to the authority of this doctrine as divine; which coming from the mouths of a company of illiterate men, hath not only the attestation of miracles, but reason to confirm it: since they

delivered no precepts but such, as though reason of itself had not clearly made out, yet it could not but assent to, when thus discovered, and think itself indebted for the discovery. The credit and authority our Saviour and his apostles had over the minds of men, by the miracles they did, tempted them not to mix (as we find in that of all the sects and philosophers, and other religions) any conceits, any wrong rules, any thing tending to their own by-interest, or that of a party, in their morality. No tang of prepossession, or fancy; no footsteps of pride, or vanity; no touch of ostentation, or ambition: appears to have a hand in it. It is all pure, all sincere; nothing too much, nothing wanting; but such a complete rule of life, as the wisest men must acknowledge, tends entirely to the good of mankind, and that all would be happy, if all would practise it.

3. The outward forms of worshipping the Deity, wanted a reformation. Stately buildings, costly ornaments, peculiar and uncouth habits, and a numerous huddle of pompous, fantastical, cumbersome ceremonies, everywhere attended divine worship. This, as it had the peculiar name, so it was thought the principal part, if not the whole of religion. Nor could this, possibly, be amended, whilst the jewish ritual stood; and there was so much of it mixed with the worship of the true God. To this also our Saviour, with the knowledge of the infinite, invisible, supreme Spirit, brought a remedy, in a plain, spiritual, and suitable worship. Jesus says to the woman of Samaria, "The hour cometh, when ye shall neither in this mountain, nor yet at Jerusalem, worship the Father. But the true worshippers shall worship the Father, both in Spirit and in truth; for the Father seeketh such to worship him." To be worshipped in spirit and truth, with application of mind, and sincerity of heart, was what God henceforth only required. Magnificent temples, and confinement to certain places, were now no longer necessary for his worship, which by a pure heart might be performed any-where. The splendour and distinction of habits, and pomp of ceremonies, and all outside performances, might now be spared. God, who was a spirit, and made known to be so, required none of those, but the spirit only; and that in public assemblies, (where some actions must lie open to the view of the world), all that could appear and be seen, should be done decently, and in order, and to edification. Decency, order and edification, were to regulate all their public acts of worship, and beyond what these required, the outward appearance (which was of little value in the eyes of God) was not to go. Having shut indecency and confusion out of their assemblies, they need not

be solicitous about useless ceremonies. Praises and prayer, humbly offered up to the Deity, were the worship he now demanded; and in these every one was to look after his own heart, and to know that it was that alone which God had regard to, and accepted.

4. Another great advantage received by our Saviour, is the great encouragement he brought to a virtuous and pious life; great enough to surmount the difficulties and obstacles that lie in the way to it, and reward the pains and hardships of those who stuck firm to their duties, and suffered for the testimony of a good conscience. The portion of the righteous has been in all ages taken notice of, to be pretty scanty in this world. Virtue and prosperity do not often accompany one another; and therefore virtue seldom had many followers. And it is no wonder she prevailed not much in a state, where the inconveniencies that attended her were visible, and at hand; and the rewards doubtful, and at a distance. Mankind, who are and must be allowed to pursue their happiness, nay, cannot be hindered; could not but think themselves excused from a strict observation of rules, which appeared so little to consist of their chief end, happiness; whilst they kept them from the enjoyments of this life; and they had little evidence and security of another. It is true they might have argued the other way, and concluded, That because the good were most of them ill-treated here, there was another place where they should meet with better usage; but it is plain they did not: their thoughts of another life were at best obscure, and their expectations uncertain. Of manes, and ghosts, and the shades of departed men, there was some talk; but little certain, and less minded. They had the names of Styx and Acheron, of Elysian fields and seats of the blessed: but they had them generally from their poets, mixed with their fables. And so they looked more like the inventions of wit, and ornaments of poetry, than the serious persuasions of the grave and the sober. They came to them bundled up among their tales, and for tales they took them. And that which rendered them more suspected, and less useful to virtue, was, that the philosophers seldom set their rules on men's minds and practices, by consideration of another life. The chief of their arguments were from the excellency of virtue; and the highest they generally went, was the exalting of human nature, whose perfection lay in virtue. And if the priest at any time talked of the ghosts below, and a life after this; it was only to keep men to their superstitious and idolatrous rites; whereby the use of this doctrine was lost to the credulous multitude, and its belief to the quicker-sighted; who

suspected it presently of priestcraft. Before our Saviour's time the doctrine of a future state, though it were not wholly hid, yet it was not clearly known in the world. It was an imperfect view of reason, or, perhaps, the decayed remains of an ancient tradition, which seemed rather to float on men's fancies, than sink deep into their hearts. It was something they knew not what, between being and not being. Something in man they imagined might escape the grave; but a perfect complete life, of an eternal duration, after this, was what entered little into their thoughts and less into their persuasions. And they were so far from being clear herein, that we see no nation of the world publicly professed it, and built upon it: no religion taught it; and it was no-where made an article of faith, and principle of religion, until Jesus Christ came; of whom it is truly said, that he, at his appearing, "brought life and immortality to light." And that not only in the clear revelation of it, and in instances shown of men raised from the dead; but he has given us an unquestionable assurance and pledge of it in his own resurrection and ascension into heaven. How has this one truth changed the nature of things in the world, and given the advantage to piety over all that could tempt or deter men from it! The philosophers, indeed, showed the beauty of virtue; they set her off so, as drew men's eyes and approbation to her; but leaving her unendowed, very few were willing to espouse her. The generality could not refuse her their esteem and commendation; but still turned their backs on her, and forsook her, as a match not for their turn. But now there being put into the scales on her side, "an exceeding and immortal weight of glory;" interest is come about to her, and virtue now is visibly the most enriching purchase, and by much the best bargain. That she is the perfection and excellency of our nature; that she is herself a reward, and will recommend our names to future ages, is not all that can now be said of her. It is not strange that the learned heathens satisfied not many with such airy commendations. It has another relish and efficacy to persuade men, that if they live well here, they shall be happy hereafter. Open their eyes upon the endless, unspeakable joys of another life, and their hearts will find something solid and powerful to move them. The view of heaven and hell will cast a slight upon the short pleasures and pains of this present state, and give attractions and encouragements to virtue which reason and interest, and the care of ourselves, cannot but allow and prefer. Upon this foundation, and upon this only, morality stands firm, and may defy all competition. This makes it more than a name; a substantial good, worth all

our aims and endeavours; and thus the gospel of Jesus Christ has delivered it to us.

To these I must add one advantage more by Jesus Christ, and that is the promise of assistance. If we do what we can, he will give us his Spirit to help us to do what, and how we should. It will be idle for us, who know not how our own spirits move and act us, to ask in what manner the Spirit of God shall work upon us. The wisdom that accompanies that Spirit knows better than we, how we are made, and how to work upon us. If a wise man knows how to prevail on his child, to bring him to what he desires; can we suspect that the spirit and wisdom of God should fail in it; though we perceive or comprehend not the ways of his operation? Christ has promised it, who is faithful and just; and we cannot doubt of the performance. It is not requisite on this occasion, for the enhancing of this benefit, to enlarge on the frailty of our minds, and weakness of our constitutions; how liable to mistakes, how apt to go astray, and how easily to be turned out of the paths of virtue. If any one needs go beyond himself, and the testimony of his own conscience in this point; if he feels not his own errors and passions always tempting, and often prevailing, against the strict rules of his duty; he need but look abroad into any stage of the world, to be convinced. To a man under the difficulties of his nature, beset with temptations, and hedged in with prevailing custom; it is no small encouragement to set himself seriously on the courses of virtue, and practice of true religion; that he is from a sure hand, and an Almighty arm, promised assistance to support and carry him through.

There remains yet something to be said to those, who will be ready to object, “If the belief of Jesus of Nazareth to be the Messiah, together with those concomitant articles of his resurrection, rule, and coming again to judge the world, be all the faith required, as necessary to justification, to what purpose were the epistles written; I say, if the belief of those many doctrines contained in them be not also necessary to salvation; and what is there delivered a christian may believe or disbelieve, and yet, nevertheless, be a member of Christ’s church, and one of the faithful?”

To this I answer, that the epistles are written upon several occasions: and he that will read them as he ought, must observe what it is in them, which is principally aimed at; find what is the argument in hand, and how managed; if he will understand them right, and profit by them. The observing of this will best help us to the true meaning and mind of the writer; for that is the

truth which is to be received and believed; and not scattered sentences in scripture-language, accommodated to our notions and prejudices. We must look into the drift of the discourse, observe the coherence and connexion of the parts, and see how it is consistent with itself and other parts of scripture; if we will conceive it right. We must not cull out, as best suits our system, here and there a period or verse; as if they were all distinct and independent aphorisms; and make these the fundamental articles of the christian faith, and necessary to salvation; unless God has made them so. There be many truths in the bible, which a good christian may be wholly ignorant of, and so not believe: which, perhaps, some lay great stress on, and call fundamental articles, because they are the distinguishing points of their communion. The epistles, most of them, carry on a thread of argument, which, in the style they are writ, cannot every-where be observed without great attention, and to consider the texts as they stand, and bear a part in that, is to view them in their due light, and the way to get the true sense of them. They were writ to those who were in the faith, and true christians already: and so could not be designed to teach them the fundamental articles and points necessary to salvation. The epistle to the Romans was writ to all “that were at Rome, beloved of God, called to be saints, whose faith was spoken of through the world,” chap. i. 7, 8. To whom St. Paul’s first epistle to the Corinthians was, he shows, chap. i. 2, 4, &c. “Unto the church of God which is at Corinth, to them that are sanctified in Christ Jesus, called to be saints; with all them that in every place call upon the name of Jesus Christ our Lord, both theirs and ours. I thank my God always on your behalf, for the grace of God which is given you by Jesus Christ; that in every thing ye are enriched by him, in all utterance, and in all knowledge: even as the testimony of Christ was confirmed in you. So that ye come behind in no gift; waiting for the coming of our Lord Jesus Christ.” And so likewise the second was, “To the church of God at Corinth, with all the saints in Achaia,” chap. i. 1. His next is to the churches of Galatia. That to the Ephesians was, “To the saints that were at Ephesus, and to the faithful in Christ Jesus.” So likewise, “To the saints and faithful brethren in Christ at Colosse, who had faith in Christ Jesus, and love to the saints. To the church of the Thessalonians. To Timothy his son in the faith. To Titus his own son after the common faith. To Philemon his dearly beloved, and fellow-labourer.” And the author to the Hebrews calls those he writes to “Holy brethren, partakers of the heavenly calling,” chap. iii. 1. From whence it is evident, that all those whom St. Paul

writ to, were brethren, saints, faithful in the church, and so christians already; and therefore, wanted not the fundamental articles of the christian religion; without a belief of which they could not be saved; nor can it be supposed, that the sending of such fundamentals was the reason of the apostle's writing to any of them. To such also St. Peter writes, as is plain from the first chapter of each of his epistles. Nor is it hard to observe the like in St. James's and St. John's epistles. And St. Jude directs his thus: "To them that are sanctified by God the Father, and preserved in Jesus Christ, and called." The epistles, therefore, being all written to those who were already believers and christians, the occasion and end of writing them could not be to instruct them in that which was necessary to make them christians. This, it is plain, they knew and believed already; or else they could not have been christians and believers. And they were writ upon particular occasions; and without those occasions, had not been writ; and so cannot be thought necessary to salvation: though they resolving doubts, and reforming mistakes, are of great advantage to our knowledge and practice. I do not deny, but the great doctrines of the christian faith are dropt here and there, and scattered up and down in most of them. But it is not in the epistles we are to learn what are the fundamental articles of faith, where they are promiscuously and without distinction mixed with other truths, in discourses that were (though for edification, indeed, yet) only occasional. We shall find and discern those great and necessary points best, in the preaching of our Saviour and the apostles, to those who were yet strangers, and ignorant of the faith; to bring them in, and convert them to it. And what that was, we have seen already, out of the history of the evangelists, and the acts; where they are plainly laid down, so that nobody can mistake them. The epistles to particular churches, besides the main argument of each of them, (which was some present concernment of that particular church, to which they severally were addressed,) do in many places explain the fundamentals of the christian religion, and that wisely; by proper accommodations to the apprehensions of those they were writ to; the better to make them imbibe the christian doctrine, and the more easily to comprehend the method, reasons, and grounds of the great work of salvation. Thus we see, in the epistle to the Romans, adoption (a custom well known amongst those of Rome) is much made use of, to explain to them the grace and favour of God, in giving them eternal life; to help them to conceive how they became the children of God, and to assure them of a

share in the kingdom of heaven, as heirs to an inheritance. Whereas the setting out, and confirming the christian faith to the Hebrews, in the epistle to them, is by illusions and arguments, from the ceremonies, sacrifices, and œconomy of the jews, and references to the records of the Old Testament. And as for the general epistles, they, we may see, regard the state and exigencies, and some peculiarities of those times. These holy writers, inspired from above, writ nothing but truth; and in most places, very weighty truths to us now; for the expounding, clearing, and confirming of the christian doctrine, and establishing those in it who had embraced it. But yet every sentence of theirs must not be taken up, and looked on as a fundamental article, necessary to salvation; without an explicit belief whereof, no-body could be a member of Christ's church here, nor be admitted into his eternal kingdom hereafter. If all, or most of the truths declared in the epistles, were to be received and believed as fundamental articles, what then became of those christians who were fallen asleep (as St. Paul witnesses in his first to the Corinthians, many were) before these things in the epistles were revealed to them? Most of the epistles not being written till above twenty years after our Saviour's ascension, and some after thirty.

But farther, therefore, to those who will be ready to say, "May those truths delivered in the epistles, which are not contained in the preaching of our Saviour and his apostles, and are therefore, by this account, not necessary to salvation; be believed or disbelieved, without any danger? May a christian safely question or doubt of them?"

To this I answer, That the law of faith, being a covenant of free grace, God alone can appoint what shall be necessarily believed by every one whom he will justify. What is the faith which he will accept and account for righteousness, depends wholly on his good pleasure. For it is of grace, and not of right, that this faith is accepted. And therefore he alone can set the measures of it: and what he has so appointed and declared is alone necessary. No-body can add to these fundamental articles of faith; nor make any other necessary, but what God himself hath made, and declared to be so. And what these are which God requires of those who will enter into, and receive the benefits of the new covenant, has already been shown. An explicit belief of these is absolutely required of all those to whom the gospel of Jesus Christ is preached, and salvation through his name proposed.

The other parts of divine revelation are objects of faith, and are so to be received. They are truths, whereof no one can be rejected; none that is once known to be such, may, or ought to be disbelieved. For to acknowledge any proposition to be of divine revelation and authority; and yet to deny, or disbelieve it; is to offend against this fundamental article and ground of faith, that God is true. But yet a great many of the truths revealed in the gospel, every one does, and must confess, a man may be ignorant of; nay, disbelieve, without danger to his salvation: as is evident in those, who, allowing the authority, differ in the interpretation and meaning of several texts of scripture, not thought fundamental: in all which, it is plain, the contending parties on one side or the other, are ignorant of, nay, disbelieve the truths delivered in holy writ; unless contrarieties and contradictions can be contained in the same words; and divine revelation can mean contrary to itself.

Though all divine revelation requires the obedience of faith, yet every truth of inspired scriptures is not one of those, that by the law of faith is required to be explicitly believed to justification. What those are, we have seen by what our Saviour and his apostles proposed to, and required in those whom they converted to the faith. Those are fundamentals, which it is not enough not to disbelieve: every one is required actually to assent to them. But any other proposition contained in the scripture, which God has not thus made a necessary part of the law of faith, (without an actual assent to which, he will not allow any one to be a believer,) a man may be ignorant of, without hazarding his salvation by a defect in his faith. He believes all that God has made necessary for him to believe, and assent to; and as for the rest of divine truths, there is nothing more required of him, but that he receive all the parts of divine revelation, with a docility and disposition prepared to embrace and assent to all truths coming from God; and submit his mind to whatsoever shall appear to him to bear that character. Where he, upon fair endeavours, understands it not, how can he avoid being ignorant? And where he cannot put several texts, and make them consist together, what remedy? He must either interpret one by the other, or suspend his opinion. He that thinks that more is, or can be required of poor frail man in matters of faith, will do well to consider what absurdities he will run into. God, out of the infiniteness of his mercy, has dealt with man, as a compassionate and tender Father. He gave him reason, and with it a law: that could not be otherwise than what reason should dictate: unless we

should think, that a reasonable creature should have an unreasonable law. But, considering the frailty of man, apt to run into corruption and misery, he promised a Deliverer, whom in his good time he sent; and then declared to all mankind, that whoever would believe him to be the Saviour promised, and take him now raised from the dead, and constituted the Lord and Judge of all men, to be their King and Ruler, should be saved. This is a plain intelligible proposition: and the all-merciful God seems herein to have consulted the poor of this world, and the bulk of mankind. These are articles that the labouring and illiterate man may comprehend. This is a religion suited to vulgar capacities; and the state of mankind in this world, destined to labour and travel. The writers and wranglers in religion fill it with niceties, and dress it up with notions, which they make necessary and fundamental parts of it; as if there were no way into the church, but through the academy or lyceum. The greatest part of mankind have not leisure for learning and logic, and superfine distinctions of the schools. Where the hand is used to the plough and the spade, the head is seldom elevated to sublime notions, or exercised in mysterious reasoning. It is well if men of that rank (to say nothing of the other sex) can comprehend plain propositions, and a short reasoning about things familiar to their minds, and nearly allied to their daily experience. Go beyond this, and you amaze the greatest part of mankind; and may as well talk Arabic to a poor day-labourer, as the notions and language that the books and disputes of religion are filled with; and as soon you will be understood. The dissenting congregation are supposed by their teachers to be more accurately instructed in matters of faith, and better to understand the christian religion, than the vulgar conformists, who are charged with great ignorance; how truly, I will not here determine. But I ask them to tell me seriously, "Whether half their people have leisure to study? Nay, Whether one in ten, of those who come to their meetings in the country, if they had time to study them, do or can understand the controversies at this time so warmly managed amongst them, about 'justification,' the subject of this present treatise?" I have talked with some of their teachers, who confess themselves not to understand the difference in debate between them. And yet the points they stand on, are reckoned of so great weight; so material, so fundamental in religion, that they divide communion, and separate upon them. Had God intended that none but the learned scribe, the disputer, or wise of this world, should be christians, or be saved, thus religion should have been prepared

for them, filled with speculations and niceties, obscure terms, and abstract notions. But men of that expectation, men furnished with such acquisitions, the apostle tells us, 1 Cor. i. are rather shut out from the simplicity of the gospel; to make way for those poor, ignorant, illiterate, who heard and believed promises of a Deliverer, and believed Jesus to be him; who could conceive a man dead and made alive again; and believe that he should, at the end of the world, come again and pass sentence on all men, according to their deeds. That the poor had the gospel preached to them; Christ makes a mark, as well as business of his mission, Matt. xi. 5. And if the poor had the gospel preached to them, it was, without doubt, such a gospel as the poor could understand; plain and intelligible; and so it was, as we have seen, in the preachings of Christ and his apostles.

A VINDICATION OF THE REASONABLENESS OF CHRISTIANITY

THE 1824 TEXT

MY BOOK had not been long out, before it fell under the correction of the author of a Treatise, entitled, “Some Thoughts concerning the several Causes and Occasions of Atheism, especially in the present Age.” No contemptible adversary, I’ll assure you; since, as it seems, he has got the faculty to heighten every thing that displeases him, into the capital crime of atheism; and breathes against those, who come in his way, a pestilential air, whereby every the least distemper is turned into the plague, and becomes mortal. For whoever does not just say after Mr. Edwards, cannot, it is evident, escape being an atheist, or a promoter of atheism. I cannot but approve of any one’s zeal, to guard and secure that great and fundamental article of all religion and morality, “That there is a God:” but atheism being a crime, which, for its madness as well as guilt, ought to shut a man out of all sober and civil society, should be very warily charged on any one, by deductions and consequences, which he himself does not own, or, at least, do not manifestly and unavoidably flow from what he asserts. This caution, charity, I think, obliges us to: and our author would possibly think himself hardly dealt with, if, for neglecting some of those rules he himself gives, and 34, against atheism, he should be pronounced a promoter of it: as rational a charge, I imagine, as some of those he makes; and as fitly put together, as “the Treatise of the Reasonableness of Christianity, &c.” brought in among the causes of atheism. However I shall not much complain of him, since he joins me, , with no worse company, than two eminently pious and learned prelates of our church, whom he makes favourers of the same conceit, as he calls it. But what has that conceit to do with atheism? Very much. That conceit is of kin to socinianism, and socinianism to atheism. Let us hear Mr. Edwards himself. He says, , I am “all over socinianized:” and therefore, my book fit to be placed among the causes of atheism. For in the 64th, and following pages, he endeavours to show, That “a socinian is an atheist;” or, lest that should seem harsh, “one

that favours the cause of atheism,” . For so he has been pleased to mollify, now it is published as a treatise, what was much more harsh, and much more confident in it, when it was preached as a sermon. In this abatement, he seems a little to comply with his own advice, against his fourth cause of atheism; which we have in these words, , “Wherefore, that we may effectually prevent this folly in ourselves, let us banish presumption, confidence, and self-conceit; let us extirpate all pride and arrogance; let us not list ourselves in the number of capricious opinionators.”

I shall leave the socinians themselves to answer his charge against them, and shall examine his proof of my being a socinian. It stands thus, , “When he” (the author of the Reasonableness of Christianity, &c.) “proceeds to mention the advantages and benefits of Christ’s coming into the world, and appearing in the flesh, he hath not one syllable of his satisfying for us; or, by his death, purchasing life or salvation, or any thing that sounds like it. This, and several other things, show, that he is all over socinianized.” Which in effect is, that because I have not set down all that this author perhaps would have done, therefore I am a socinian. But what if I should say, I set down as much as my argument required, and yet am no socinian? Would he, from my silence and omission, give me the lie, and say I am one? Surmises that may be overturned by a single denial, are poor arguments, and such as some men would be ashamed of: at least, if they are to be permitted to men of this gentleman’s skill and zeal, who knows how to make a good use of conjectures, suspicions, and uncharitable censures in the cause of God; yet even there too (if the cause of God can need such arts) they require a good memory to keep them from recoiling upon the author. He might have taken notice of these words in my book, (page 9 of this vol.) “From this estate of death, Jesus Christ restores all mankind to life.” And a little lower, “The life which Jesus Christ restores to all men.” And , “He that hath incurred death for his own transgression, cannot lay down his life for another, as our Saviour professes he did.” This, methinks, sounds something like “Christ’s purchasing life for us by his death.” But this reverend gentleman has an answer ready; it was not in the place he would have had it in, it was not where I mention the advantages and benefits of Christ’s coming. And therefore, I not having there one syllable of Christ’s purchasing life and salvation for us by his death, or any thing that sounds like it: this and several other things that might be offered, show that I am

“all over socinianized.” A very clear and ingenuous proof, and let him enjoy it.

But what will become of me, that I have not mentioned satisfaction!

Possibly, this reverend gentleman would have had charity enough for a known writer of the brotherhood, to have found it by an “inuendo,” in those words above quoted, of laying down his life for another. But every thing is to be strained here the other way. For the author of “the Reasonableness of Christianity, &c.” is of necessity to be represented as a socinian; or else his book may be read, and the truths in it, which Mr. Edwards likes not, be received, and people put upon examining. Thus one, as full of happy conjectures and suspicions as this gentleman, might be apt to argue. But what if the author designed his treatise, as the title shows, chiefly for those who were not yet thoroughly, or firmly, christians, proposing to work on those, who either wholly disbelieved, or doubted of the truth of the christian religion? Would any one blame his prudence, if he mentioned only those advantages, which all christians are agreed in? Might he not remember and observe that command of the apostle, Rom. xiv. 1, “Him that is weak in the faith, receive ye, but not to doubtful disputations;” without being a socinian? Did he amiss, that he offered to the belief of those who stood off, that, and only that, which our Saviour and his apostles preached, for the reducing the unconverted world: and would any one think he in earnest went about to persuade men to be christians, who should use that as an argument to recommend the gospel, which he has observed men to lay hold on, as an objection against it? To urge such points of controversy, as necessary articles of faith, when we see our Saviour and the apostles, in their preaching, urged them not as necessary to be believed to make men christians, is (by our own authority) to add prejudices to prejudices, and to block up our own way to those men, whom we would have access to, and prevail upon. But some men had rather you should write booty, and cross your own design of removing men’s prejudices to christianity, than leave out one tittle of what they put into their systems. To such, I say, convince but men of the mission of Jesus Christ, make them but see the truth, simplicity, and reasonableness, of what he himself taught, and required to be believed by his followers; and you need not doubt, but being once fully persuaded of his doctrine, and the advantages which all christians agree are received by him, such converts will not lay by the scriptures, but by a constant reading and study of them get all the light they can from this divine

revelation, and nourish themselves up in the words of faith, and of good doctrine, as St. Paul speaks to Timothy. But some men will not bear it, that any one should speak of religion, but according to the model that they themselves have made of it. Nay, though he proposes it upon the very terms, and in the very words which our Saviour and his apostles preached it in, yet he shall not escape censures and the severest insinuations. To deviate in the least, or to omit any thing contained in their articles, is heresy, under the most invidious names in fashion, and 'tis well if he escapes being a downright atheist. Whether this be the way for teachers to make themselves hearkened to, as men in earnest in religion, and really concerned for the salvation of men's souls, I leave them to consider. What success it has had, towards persuading men of the truth of christianity, their own complaints of the prevalency of atheism, on the one hand, and the number of deists on the other, sufficiently show.

Another thing laid to my charge, and 107, is my "forgetting, or rather wilful omitting, some plain and obvious passages," and some "famous testimonies in the evangelists; namely, Matt. xxviii. 19, Go, teach all nations, baptizing them in the name of the Father, and of the Son, and of the Holy Ghost." And John i. 1, "In the beginning was the Word, and the word was with God, and the word was God." And verse 14, "And the word was made flesh." Mine, it seems, in this book, are all sins of omission. And yet, when it came out, the buz, the flutter, and noise which was made, and the reports which were raised, would have persuaded the world, that it subverted all morality, and was designed against the christian religion. I must confess, discourses of this kind, which I met with, spread up and down, at first amazed me; knowing the sincerity of those thoughts, which persuaded me to publish it (not without some hope of doing some service to decaying piety, and mistaken and slandered christianity.) I satisfied myself against those heats, with this assurance, that, if there was any thing in my book against what any one called religion, it was not against the religion contained in the gospel. And for that, I appeal to all mankind.

But to return to Mr. Edwards, in particular, I must take leave to tell him, that if "omitting plain and obvious passages, the famous testimonies in the evangelists," be a fault in me, I wonder why he, among so many of this kind that I am guilty of, mentions so few. For I must acknowledge I have omitted more, nay, many more, that are "plain and obvious passages, and famous testimonies in the evangelists," than those he takes notice of. But if I have

left out none of those “passages or testimonies,” which contain what our Saviour and his apostles preached, and required assent to, to make men believers, I shall think my omissions (let them be what they will) no faults in the present case. Whatever doctrines Mr. Edwards would have to be believed, if they are such as our Saviour and his apostles required to be believed, to make a man a christian, he will be sure to find them in those preachings and “famous testimonies,” of our Saviour and his apostles, that I have quoted. And if they are not there, he may rest satisfied, that they were not proposed by our Saviour and his apostles, as necessary to be believed, to make men Christ’s disciples.

If the omission of other texts in the evangelists (which are all true also, and no one of them to be disbelieved) be a fault, it might have been expected that Mr. Edwards should have accused me for leaving out Matth. i. 18 — 23, and Matth. xxvii. 24, 35, 50, 60, for these are “plain and obvious passages and famous testimonies in the evangelists;” and such, whereon these articles of the apostles creed, viz. “born of the virgin Mary, suffered under Pontius Pilate, was crucified, dead and buried,” are founded. These, being articles of the apostles creed, are looked upon as “fundamental doctrines:” and one would wonder, why Mr. Edwards so quietly passes by their omission; did it not appear, that he was so intent on fixing his imputation of socinianism upon me, that, rather than miss that, he was content to drop the other articles of his creed. For I must observe to him, that if he had blamed me for the omission of the places last quoted out of St. Matthew, (as he had as much reason as for any other,) it would plainly have appeared, how idle and ill-grounded his charging socinianism on me was. But, at any rate, he was to give the book an ill name: not because it was socinian; for he has no more reason to charge it with socinianism for the omissions he mentions, than the apostles creed. It is therefore well for the compilers of that creed, that they lived not in Mr. Edwards’s days: for he would, no doubt, have found them “all over socinianized,” for omitting the texts he quotes, and the doctrines he collects out of John i. and John xiv. , 108. Socinianism then is not the fault of the book, whatever else it be. For I repeat it again, there is not one word of socinianism in it. I, that am not so good at conjectures as Mr. Edwards, shall leave it to him to say, or to those who can bear the plainness and simplicity of the gospel, to guess, what its fault is.

Some men are shrewd guessers, and others would be thought to be so; but he must be carried far by his forward inclination, who does not take notice, that the world is apt to think him a diviner, for any thing rather than for the sake of truth, who sets up his own suspicions against the direct evidence of things; and pretends to know other men's thoughts and reasons, better than they themselves. I had said, that the epistles, being writ to those who were already believers, could not be supposed to be writ to them to teach them fundamentals, without which they could not be believers.

And the reason I gave, why I had not gone through the writings in the epistles, to collect the fundamental articles of faith, as I had through the preachings of our Saviour and the apostles, was, because those fundamental articles were in those epistles promiscuously, and without distinction, mixed with other truths. And, therefore, we shall find and discern those great and necessary points best in the preachings of our Saviour and the apostles, to those who were yet ignorant of the faith, and unconverted. This, as far as I know my own thoughts, was the reason why I did (as Mr. Edwards complains,) “not proceed to the epistles, and not give an account of them, as I had done of the gospels and acts.” This, I imagined, I had in the close of my book so fully and clearly expressed, particularly of this vol. that I supposed no-body, how willing soever, could have mistaken me. But this gentleman is so much better acquainted with me, than I am with myself; sees so deeply into my heart, and knows so perfectly every thing that passes there; that he, with assurance, tells the world, , “That I purposely omitted the epistolary writings of the apostles, because they are fraught with other fundamental doctrines, besides that one which I mention.” And then he goes to enumerate those fundamental articles, , 111, viz. “The corruption and degeneracy of human nature, with the true original of it, (the defection of our first parents,) the propagation of sin and mortality, our restoration and reconciliation by Christ's blood, the eminency and excellency of his priesthood, the efficacy of his death, the full satisfaction made, thereby, to divine justice, and his being made an all-sufficient sacrifice for sin. Christ's righteousness, our justification by it, election, adoption, sanctification, saving faith, the nature of the gospel, the new covenant, the riches of God's mercy in the way of salvation by Jesus Christ, the certainty of the resurrection of human bodies, and of the future glory.”

Give me leave now to ask you seriously, whether these, which you have here set down under the title of “fundamental doctrines,” are such (when

reduced to propositions) that every one of them is required to be believed to make a man a christian, and such as, without the actual belief thereof, he cannot be saved. If they are not so, every one of them, you may call them “fundamental doctrines,” as much as you please, they are not of those doctrines of faith I was speaking of, which are only such as are required to be actually believed to make a man a christian. If you say, some of them are such necessary points of faith, and others not, you, by this specious list of well-sounding, but unexplained terms, arbitrarily collected, only make good what I have said, viz. that the necessary articles of faith are, in the epistles, promiscuously delivered with other truths, and, therefore, they cannot be distinguished but by some other mark, than being barely found in the epistles. If you say, that they are all of them necessary articles of faith, I shall then desire you to reduce them to so many plain doctrines, and then prove them to be every one of them required to be believed by every christian man, to make him a member of the christian church. For, to begin with the first, it is not enough to tell us, as you do, that “the corruption and degeneracy of human nature, with the true original of it, (the defection of our first parents,) the propagation of sin and mortality, is one of the great heads of christian divinity.” But you are to tell us, what are the propositions we are required to believe concerning this matter: for nothing can be an article of faith, but some proposition; and then it will remain to be proved, that these articles are necessary to be believed to salvation. The apostles creed was taken, in the first ages of the church, to contain all things necessary to salvation; I mean, necessary to be believed: but you have now better thought on it, and are pleased to enlarge it, and we, no doubt, are bound to submit to your orthodoxy.

The list of materials for his creed (for the articles are not yet formed) Mr. Edwards closes, , with these words, “These are the matters of faith contained in the epistles, and they are essential and integral parts of the gospel itself.” What, just these? Neither more nor less? If you are sure of it, pray let us have them speedily, for the reconciling of differences in the christian church, which has been so cruelly torn, about the articles of the christian faith, to the great reproach of christian charity, and scandal of our true religion.

Mr. Edwards, having thus, with two learned terms of “essential and integral parts,” sufficiently proved the matter in question, viz. That all those he has set down are articles of faith necessary to be believed to make a man

a christian, he grows warm at my omission of them. This I cannot complain of as unnatural: the spirit of creed-making always rising from an heat of zeal for our own opinions, and warm endeavours, by all ways possible, to decry and bear down those who differ in a tittle from us. What then could I expect more gentle and candid, than what Mr. Edwards has subjoined in these words? “And therefore it is no wonder that our author, being sensible of this,” (viz. That the points he has named were essential and integral parts of the gospel,) “would not vouchsafe to give us an abstract of those inspired writings [the epistles]; but passes them by with some contempt.” Sir, when your angry fit is over, and the abatement of your passion has given way to the return of your sincerity, I shall beg you to read this passage in page 154 of this vol. “These holy writers (viz. the pen-men of the scriptures) inspired from above, writ nothing but truth, and, in most places, very weighty truths to us now, for the expounding, clearing, and confirming of the christian doctrine; and establishing those in it who had embraced it.” And again, , “The other parts of divine revelation are objects of faith, and are so to be received. They are truths, of which none that is once known to be such, i. e. revealed, may or ought to be disbelieved.” And if this does not satisfy you, that I have as high a veneration for the epistles, as you or any one can have, I require you to publish to the world those passages, which show my contempt of them. In the mean time, I shall desire my reader to examine what I have writ concerning the epistles, which is all contained between and 158 of this vol. and then to judge whether I have made bold with the epistles in what I have said of them, or this gentleman made bold with truth in what he has writ of me. Human frailty will not, I see, easily quit its hold; what it loses in one part, it will be ready to regain in another; and not be hindered from taking reprisals, even on the most privileged sort of men. Mr. Edwards, who is intrenched in orthodoxy, and so is as safe in matters of faith almost as infallibility itself, is yet as apt to err as others in matters of fact.

But he has not yet done with me about the epistles: all his fine draught of my slighting that part of the scripture will be lost, unless the strokes complete it into socinianism. In his following words you have the conclusion of the whole matter. His words are these: “And more especially, if I may conjecture,” (by all means, sir, conjecturing is your proper talent: you have hitherto done nothing else; and I will say that for you, you have a lucky hand at it:) “he doth this (i. e. pass by the epistles with contempt)

because he knew that there are so many and frequent, and those so illustrious and eminent attestations to the doctrine of the ever to be adored Trinity, in these epistles.” Truly, sir, if you will permit me to know what I know, as well as you do allow yourself to conjecture what you please, you are out for this once; the reason why I went not through the epistles, as I did the gospels and the acts, was that very reason I printed, and that will be found so sufficient a one to all considerate readers, that I believe, they will think you need not strain your conjectures for another. And, if you think it to be so easy to distinguish fundamentals from non-fundamentals in the epistles, I desire you to try your skill again, in giving the world a perfect collection of propositions out of the epistles, that contain all that is required, and no more than what is absolutely required to be believed by all christians, without which faith they cannot be of Christ’s church. For I tell you, notwithstanding the show you have made, you have not yet done it, nor will you affirm that you have.

His next page, , is made up of the same, which he calls, not uncharitable conjectures. I expound, he says, “John xiv. 9, &c. after the antitrinitarian mode:” and I make “Christ and Adam to be sons of God, in the same sense, and by their birth, as the racovians generally do.” I know not but it may be true, that the antitrinitarians and racovians understand those places as I do: but it is more than I know, that they do so. I took not my sense of those texts from those writers, but from the scripture itself, giving light to its own meaning, by one place compared with another: what in this way appears to me its true meaning, I shall not decline, because I am told that it is so understood by the racovians, whom I never yet read; nor embrace the contrary, though the “generality of divines” I more converse with should declare for it. If the sense, wherein I understand those texts, be a mistake, I shall be beholden to you, if you will set me right. But they are not popular authorities, or frightful names, whereby I judge of truth or falsehood. You will now, no doubt, applaud your conjectures; the point is gained, and I am openly a socinian, since I will not disown, that I think the Son of God was a phrase, that among the jews, in our Saviour’s time, was used for the Messiah, though the socinians understand it in the same sense; and therefore I must certainly be of their persuasion in every thing else. I admire the acuteness, force, and fairness of your reasoning, and so I leave you to triumph in your conjectures. Only I must desire you to take notice, that that ornament of our church, and every way eminent prelate, the late archbishop

of Canterbury, understood that phrase in the same sense that I do, without being a socinian. You may read what he says concerning Nathanael, in his first “Sermon of Sincerity,” published this year: his words are these, , “And being satisfied that he [our Saviour] was the Messiah, he presently owned him for such, calling him the Son of God, and the King of Israel.”

Though this gentleman knows my thoughts as perfectly as if he had for several years past lain in my bosom, yet he is mightily at a loss about my person: as if it at all concerned the truth contained in my book, what hand it came from. However, the gentleman is mightily perplexed about the author. Why, sir, what if it were writ by a scribbler of Bartholomew-fair drolls, with all that flourish of declamatory rhetoric, and all that smartness of wit and jest about captain Tom, unitarians, units, and cyphers, &c. which are to be found between pages 115 and 123 of a book that came out during the merry time of rope dancing, and puppet plays? What is truth, would, I hope, nevertheless be truth in it, however oddly spruced up by such an author: though perhaps, it is likely some would be apt to say, such merriment became not the gravity of my subject, and that I writ not in the style of a graduate in divinity. I confess (as Mr. Edwards rightly says) my fault lies on the other side, in a want of “vivacity and elevation:” and I cannot wonder, that one of his character and palate, should find out and complain of my flatness, which has so over-charged my book with plain and direct texts of scripture, in a matter capable of no other proofs. But yet I must acknowledge his excess of civility to me; he shows me more kindness than I could expect or wish, since he prefers what I say to him myself to what is offered to him from the word of God; and makes me this compliment, that I begin to mend, about the close, i. e. when I leave off quoting of scripture: and the dull work was done, of “going through the history of the Evangelists and Acts,” which he computes, , to take up three quarters of my book. Does not all this deserve, at least, that I should, in return, take some care of his credit? Which I know not how better to do, than by entreating him, that when he takes next in hand such a subject as this, wherein the salvation of souls is concerned, he would treat it a little more seriously, and with a little more candour; lest men should find in his writings, another cause of atheism, which in this treatise, he has not thought fit to mention. “Ostentation of wit” in general he has made a “cause of atheism,” . But the world will tell him, that frothy light discourses concerning the serious matters of religion; and ostentation of trifling and misbecoming wit in those

who come as ambassadors from God, under the title of successors of the apostles, in the great commission of the gospel; are none of the least causes of atheism.

Some men have so peculiar a way of arguing, that one may see it influences them in the repeating another man's reasoning, and seldom fails to make it their own. In the next paragraph I find these words: "what makes him contend for one single article, with the exclusion of all the rest? He pretends it is this, that all men ought to understand their religion." This, I confess, is a reasoning I did not think of; nor could it hardly, I fear, have been used but by one who had first took up his opinion from the recommendation of fashion or interest, and then sought topics to make it good. Perhaps the deference due to your character, excused you from the trouble of quoting the page, where I pretend, as you say; and it is so little like my way of reasoning, that I shall not look for it in a book where I remember nothing of it, and where, without your direction, I fear the reader will scarce find it. Though I have not "that vivacity of thought, that elevation of mind," which Mr. Edwards demands, yet common sense would have kept me from contending that there is but one article, because all men ought to understand their religion. Numbers of propositions may be harder to be remembered, but it is the abstruseness of the notions, or obscurity, inconsistency, or doubtfulness of the terms or expressions that makes them hard to be understood; and one single proposition may more perplex the understanding than twenty others. But where did you find "I contended for one single article, so as to exclude all the rest?" You might have remembered that I say, , 17, That the article of the one only true God, was also necessary to be believed. This might have satisfied you, that I did not so contend for one article of faith, as to be at defiance with more than one. However, you insist on the word one with great vigour, from to 121. And you did well, you had else lost all the force of that killing stroke reserved for the close, in that sharp jest of unitarians, and a clench or two more of great moment.

Having found, by a careful perusal of the preachings of our Saviour and his apostles, that the religion they proposed, consisted in that short, plain, easy and intelligible summary which I set down, , in these words: "Believing Jesus to be the Saviour promised, and taking him, now raised from the dead, and constituted the Lord and Judge of men, to be their King and "Ruler;" I could not forbear magnifying the wisdom and goodness of

God (which infinitely exceeds the thoughts of ignorant, vain, and narrow-minded man) in these following words: “The All-merciful God seems herein to have consulted the poor of this world, and the bulk of mankind: these are articles that the labouring and illiterate man may comprehend.” Having thus plainly mentioned more than one article, I might have taken it amiss, that Mr. Edwards should be at so much pains as he is, to blame me for “contending for one” article; because I thought more than one could not be understood; had he not had many fine things to say in his declamation upon one article, which affords him so much matter, that less than seven pages could not hold it. Only here and there, as men of oratory often do, he mistakes the business, as, where he says, “I urge, that there must be nothing in christianity that is not plain, and exactly levelled to all men’s mother-wit.” I desire to know where I said so, or that “the very manner of every thing in christianity must be clear and intelligible, every thing must be presently comprehended by the weakest noddle, or else it is no part of religion, especially of christianity;” as he has it, . I am sure it is not in — 136, 149 — 151, of my book: these, therefore, to convince him that I am of another opinion, I shall desire somebody to read to Mr. Edwards, for he himself reads my book with such spectacles, as make him find meanings and words in it, neither of which I put there. He should have remembered, that I speak not of all the doctrines of christianity, nor all that is published to the world in it; but of those truths only, which are absolutely required to be believed to make any one a christian. And these, I find, are so plain and easy, that I see no reason why every body, with me, should not magnify the goodness and condescension of the Almighty, who having, out of his free grace, proposed a new law of faith to sinful and lost man; hath, by that law, required no harder terms, nothing as absolutely necessary to be believed, but what is suited to vulgar capacities, and the comprehension of illiterate men.

You are a little out again, , where you ironically say, as if it were my sense, “Let us have but one article, though it be with defiance to all the rest.” Jestings apart, sir, this is a serious turn, that what our Saviour and his apostles preached, and admitted men into the church for believing, is all that is absolutely required to make a man a christian. But this is, without any “defiance to all the rest,” taught in the word of God. This excludes not the belief of any of those many other truths contained in the scriptures of the Old and New Testaments, which it is the duty of every christian to study,

and thereby build himself up in our most holy faith; receiving with stedfast belief, and ready obedience, all those things which the spirit of truth hath therein revealed. But that all the rest of the inspired writings, or, if you please, “articles, are of equal necessity” to be believed to make a man a christian, with what was preached by our Saviour and his apostles, that I deny. A man, as I have shown, may be a christian and believer, without actually believing them, because those whom our Saviour and his apostles, by their preaching and discourses, converted to the faith, were made christians and believers, barely upon the receiving what they preached to them.

I hope it is no derogation to the christian religion, to say, that the fundamentals of it, i. e. all that is necessary to be believed in it, by all men, is easy to be understood by all men. This I thought myself authorized to say, by the very easy and very intelligible articles, insisted on by our Saviour and his apostles; which contain nothing but what could be understood by the bulk of mankind: a term which, I know not why, Mr. Edwards, , is offended at; and thereupon is, after his fashion, sharp upon me about captain Tom and his myrmidons, for whom, he tells me, I am “going to make a religion.” The making of religions and creeds I leave to others. I only set down the christian religion as I find our Saviour and his apostles preached it, and preached it to, and left it for, the “ignorant and unlearned multitude.” For I hope you do not think, how contemptibly soever you speak of the “venerable mob,” as you are pleased to dignify them, , that the bulk of mankind, or, in your phrase, the “rabble,” are not concerned in religion, or ought to understand it, in order to their salvation. Nor are you, I hope, acquainted with any who are of that Muscovite divine’s mind, who, to one that was talking to him about religion, and the other world, replied, That for the czar, indeed, and bojars, they might be permitted to raise their hopes to heaven; but that for such poor wretches as he, they were not to think of salvation.

I remember the pharisees treated the common people with contempt, and said, “Have any of the rulers, or of the pharisees, believed in him? But this people, who knoweth not the law, are cursed.” But yet these, who in the censure of the pharisees, were cursed, were some of the poor; or, if you please to have it so, the mob, to whom the “gospel was preached” by our Saviour, as he tells John’s disciples, Matt. xi. 5.

Pardon me, sir, that I have here laid these examples and considerations before you; a little to prevail with you not to let loose such a torrent of wit and eloquence against the “bulk of mankind,” another time, and that for a mere fancy of your own: for I do not see how they here came in your way; but that you were resolved to set up something to have a fling at, and show your parts, in what you call your “different strain,” though besides the purpose. I know nobody was going to “ask the mob, What you must believe?” And as for me, I suppose you will take my word for it, that I think no mob, no, not your “venerable mob,” is to be asked, what I am to believe; nor that “Articles of faith” are to be “received by the vote of club-men,” or any other sort of men, you will name instead of them.

In the following words, , you ask, “Whether a man may not understand those articles of faith, which you mentioned out of the gospels and epistles, if they be explained to him, as well as that one, I speak of?” It is as the articles are, and as they are explained. There are articles that have been some hundreds of years explaining; which there are many, and those not of the most illiterate, who profess they do not yet understand. And to instance in no other, but “He descended into hell,” the learned are not yet agreed in the sense of it, though great pains have been taken to explain it.

Next, I ask, Who are to explain your articles? The papists will explain some of them one way, and the reformed another. The remonstrants, and anti-remonstrants, give them different senses. And probably, the trinitarians and unitarians will profess, that they understand not each others explications. And at last, I think it may be doubted, whether any articles, which need men’s explications, can be so clearly and certainly understood, as one which is made so very plain by the scripture itself, as not to need any explication at all. Such is this, that Jesus is the Messiah. For though you learnedly tell us, that Messiah is a Hebrew word, and no better understood by the vulgar, than Arabic; yet I guess it is so fully explained in the New Testament, and in those places I have quoted out of it, that nobody, who can understand any ordinary sentence in the scripture, can be at a loss about it. And it is plain, it needs no other explication, than what our Saviour and the apostles gave it in their preaching; for, as they preached it, men received it, and that sufficed to make them believers.

To conclude, when I heard that this learned gentleman, who had a name for his study of the scriptures, and writings on them, had done me the honour to consider my treatise, I promised myself, that his degree, calling,

and fame in the world, would have secured to me something of weight in his remarks, which might have convinced me of my mistakes; and, if he had found any in it, justified my quitting of them. But having examined what, in his, concerns my book, I to my wonder find, that he has only taken pains to give it an ill name, without so much as attempting to refute any one position in it, how much soever he is pleased to make a noise against several propositions, which he might be free with, because they are his own: and I have no reason to take it amiss if he has shown his zeal and skill against them. He has been so favourable to what is mine, as not to use any one argument against any passage in my book. This, which I take for a public testimony of his approbation, I shall return him my thanks for, when I know whether I owe it to his mistake, conviction, or kindness. But if he writ only for his bookseller's sake, he alone ought to thank him.

After the foregoing papers were sent to the press, the "Witnesses to Christianity," of the reverend and learned Dr. Patrick, now lord bishop of Ely, fell into my hands. I regretted the not having seen it, before I writ my treatise of the "Reasonableness of Christianity, &c." I should then, possibly, by the light given me by so good a guide, and so great a man, with more confidence directly have fallen into the knowledge of christianity; which, in the way I sought it, in its source, required the comparing of texts with texts, and the more than once reading over the Evangelists and Acts, besides other parts of scripture. But I had the ill luck not to see that treatise, until so few hours since, that I have had time only to read as far as the end of the introduction or first chapter: and there Mr. Edwards may find, that this pious bishop (whose writings show he studies, as well as his life that he believes, the scriptures) owns what Mr. Edwards is pleased to call, "a plausible conceit," which, he says, "I give over and over again in these formal words, viz. That nothing is required to be believed by any christian man, but this, That Jesus is the Messiah."

The liberty Mr. Edwards takes, in other places, deserves not it should be taken upon his word, "That these formal words" are to be found "over and over again" in my book, unless he had quoted the pages. But I will set him down the "formal words," which are to be found in this reverend prelate's book, , "To be the Son of God, and to be Christ, being but different expressions of the same thing." And, , "It is the very same thing to believe, that Jesus is the Christ, and to believe, that Jesus is the Son of God; express it how you please. This alone is the faith which can regenerate a man, and

put a divine spirit into him; that is, make him a conqueror over the world, as Jesus was." I have quoted only these few words; but Mr. Edwards, if he pleases, or any body else, may, in this first chapter, satisfy himself more fully, that the design of it is to show, that in our Saviour's time, "Son of God," was a known and received name and appellation of the Messiah, and so used in the holy writers. And that the faith that was to make men christians, was only the believing, "that Jesus is the Messiah." It is to the truth of this proposition that he "examines his witnesses," as he speaks, . And this, if I mistake not, in his epistle dedicatory, he calls "christianity;" fol. A 3, where he calls them "witnesses to christianity." But these two propositions, viz. That "Son of God," in the gospel, stands for Messiah; and that the faith, which alone makes men christians, is the believing "Jesus to be the Messiah," displeases Mr. Edwards so much in my book, that he thinks himself authorized from them, to charge me with socinianism, and want of sincerity. How he will be pleased to treat this reverend prelate, whilst he is alive (for the dead may, with good manners, be made bold with) must be left to his decisive authority. This, I am sure, which way soever he determine, he must, for the future, either afford me more good company, or fairer quarter.

A SECOND VINDICATION OF THE REASONABLENESS OF CHRISTIANITY

THE 1824 TEXT

CONTENTS

PREFACE TO THE READER.

TO MR. BOLD.

A SECOND VINDICATION OF THE REASONABLENESS OF
CHRISTIANITY, &C.

PREFACE TO THE READER.

It hath pleased Mr. Edwards, in answer to the “Reasonableness of Christianity, &c.” and its “Vindication,” to turn one of the most weighty and important points that can come into question (even no less, than the very fundamentals of the christian religion), into a mere quarrel against the author: as every one, with Mr. Bold, may observe. In my reply to him, I have endeavoured, as much as his objections would allow me, to bring him to the subject-matter of my book, and the merits of the cause; though his peculiar way of writing controversy has made it necessary for me in following him step by step, to wipe off the dirt he has thrown on me, and clear myself from those falsehoods he has filled his book with. This I could not but do, in dealing with such an antagonist; that by the untruths I have proved upon him, the reader may judge of those other allegations of his, whereof the proof lying on his side, the bare denial is enough on mine, and, indeed, are wholly nothing to the truth or falsehood of what is contained in my “Reasonableness of Christianity, &c.” To which I shall desire the reader to add this farther consideration from his way of writing, not against my book, but against me, for writing it, that if he had had a real concern for truth and religion in this dispute, he would have treated it after another manner; and we should have had from him more argument, reasoning, and clearness, and less boasting declamation, and railing. It has been unavoidable for me to take notice of a great deal of this sort of stuff, in answering a writer, who has very little else to say in the controversy, and places his strength in things beside the question: but yet I have been so careful, to take all occasions to explain the doctrine of my book, that I hope the reader will not think his pains wholly lost labour, in persuing this reply; wherein he will find some farther, and, I hope, satisfying account, concerning the writings of the New Testament, and the Christian Religion contained in it.

Mr. Edwards’s ill language, which I thought personally to me (though I know not how I had provoked a man whom I had never had to do with), I am now satisfied, by his rude and scurrilous treating of Mr. Bold, is his way and strength in management of controversy; and therefore requires a little more consideration in this disputant, than otherwise it would deserve. Mr. Bold, with the calmness of a christian, the gravity of a divine, the clearness

of a man of parts, and the civility of a well-bred man, made some “animadversions” on his “Socinianism unmasked;” which, with a sermon preached on the same subject with my “Reasonableness of Christianity,” he published: and how he has been used by Mr. Edwards, let the world judge.

I was extremely surprised with Mr. Bold’s book, at a time when there was so great an outcry against mine, on all hands. But, it seems, he is a man that does not take up things upon hearsay; nor is afraid to own truth, whatever clamour or calumny it may lie under. Mr. Edwards confidently tells the world, that Mr. Bold has been drawn in to espouse this cause, upon base and mean considerations. Whose picture of the two, such a description is most likely to give us, I shall leave to the reader to judge, from what he will find in their writings on this subject. For as to the persons themselves, I am equally a stranger to them both: I know not the face of either of them: and having hitherto never had any communication with Mr. Bold, I shall begin with him, as I did with Mr. Edwards in print; and here publicly return him this following acknowledgment, for what he has printed in this controversy.

TO MR. BOLD.

Sir,

Though I do not think I ought to return thanks to any one, for being of my opinion, any more than to fall out with him, for differing from me; yet I cannot but own to all the world, the esteem, that I think is due to you, for that proof you have given, of a mind and temper becoming a true minister of the gospel; in appearing as you have done, in the defence of a point, a great point of christianity, which it is evident you could have no other temptation to declare for, but the love of truth. It has fared with you herein no better than with me. For Mr. Edwards not being able to answer your arguments, he has found out already, that you are a mercenary, defending a cause against your persuasion for hire; and that you “are sailing to Racovia by a side-wind:” such inconsistencies can one (whose business it is to rail for a cause he cannot defend) put together to make a noise with: and he tells you plainly, what you must expect, if you write any more on this argument, viz. to be pronounced a downright apostate and renegado.

As soon as I saw your sermon and animadversions, I wondered what scarecrow Mr. Edwards would set up wherewith he might hope to deter men of more caution than sense, from reading of them; since socinianism, from which you were known to be as remote as he, I concluded would not do. The unknown author of the “Reasonableness of Christianity,” he might make a socinian, mahometan, atheist, or what sort of raw-head and bloody-bones he pleased. But I imagined he had had more sense than to venture any such aspersions, on a man whom, though I have not yet the happiness personally to know; yet, I know, hath justly a great and settled reputation amongst worthy men: and I thought that that coat, which you had worn with so much reputation, might have preserved you from the bespatterings of Mr. Edwards’s dunghill. But what is to be expected from a warrior that hath no other ammunition, and yet ascribes to himself victory from hence, and, with this artillery, imagines he carries all before him? And so Skimmington rides in triumph, driving all before him, by the ordures that he bestows on those that come in his way. And, were not christianity concerned in the case, a man would scarce excuse to himself the ridiculousness of entering into the list with such a combatant. I do not, therefore, wonder that this mighty boaster, having no other way to answer the books of his opponents, but by

popular calumnies, is fain to have recourse to his only refuge, and lay out his natural talent in vilifying and slandering the author. But I see, by what you have already writ, how much you are above that; and as you take not up your opinions from fashion or interest, so you quit them not, to avoid the malicious reports of those that do: out of which number, they can hardly be left, who (unprovoked) mix, with the management of their cause, injuries and ill-language, to those they differ from. This, at least, I am sure, zeal or love for truth can never permit falsehood to be used in the defence of it.

Your mind, I see, prepared for truth, by resignation of itself, not to the traditions of men, but the doctrine of the gospel, has made you more readily entertain, and more easily enter into the meaning of my book, than most I have heard speak of it. And since you seem to me to comprehend what I have laid together, with the same disposition of mind, and in the same sense that I received it from the holy scriptures, I shall, as a mark of my respect to you, give you a particular account of it.

The beginning of the year in which it was published the controversy that made so much noise and heat amongst some of the dissenters, coming one day accidentally into my mind, drew me, by degrees, into a stricter and more thorough inquiry into the question about justification. The scripture was direct and plain, that it was faith that justified: The next question then, was, What faith that was that justified; what it was which, if a man believed, it should be imputed to him for righteousness? To find out this, I thought the right way was, to search the scriptures; and thereupon betook myself seriously to the reading of the New Testament, only to that purpose. What that produced, you and the world have seen.

The first view I had of it seemed mightily to satisfy my mind, in the reasonableness and plainness of this doctrine; but yet the general silence I had in my little reading met with, concerning any such thing, awed me with the apprehension of singularity; until going on in the gospel-history, the whole tenour of it made it so clear and visible, that I more wondered that every body did not see and embrace it; than that I should assent to what was so plainly laid down, and so frequently inculcated in holy writ, though systems of divinity said nothing of it. That which added to my satisfaction was, that it led me into a discovery of the marvellous and divine wisdom of our Saviour's conduct, in all the circumstances of his promulgating this doctrine; as well as of the necessity that such a law-giver should be sent from God, for the reforming the morality of the world; two points, that, I

must confess, I had not found so fully and advantageously explained in the books of divinity I had met with, as the history of the gospel seemed to me, upon an attentive perusal, to give occasion and matter for. But the necessity and wisdom of our Saviour's opening the doctrine (which he came to publish) as he did in parables and figurative ways of speaking, carries such a thread of evidence through the whole history of the evangelists, as, I think, is impossible to be resisted; and makes it a demonstration, that the sacred historians did not write by concert, as advocates for a bad cause, or to give colour and credit to an imposture they would usher into the world: since they, every one of them, in some place or other, omit some passages of our Saviour's life, or circumstance of his actions; which show the wisdom and wariness of his conduct; and which, even those of the evangelists who have recorded, do barely and transiently mention, without laying any stress on them, or making the least remark of what consequence they are, to give us our Saviour's true character, and to prove the truth of their history. These are evidences of truth and sincerity, which result alone from the nature of things, and cannot be produced by any art or contrivance.

How much I was pleased with the growing discovery, every day, whilst I was employed in this search, I need not say. The wonderful harmony, that the farther I went disclosed itself, tending to the same points, in all the parts of the sacred history of the gospel, was of no small weight with me and another person, who every day, from the beginning to the end of my search, saw the progress of it, and knew, at my first setting out, that I was ignorant whither it would lead me; and therefore, every day asked me, What more the scripture had taught me? So far was I from the thoughts of socinianism, or an intention to write for that, or any other party, or to publish any thing at all. But, when I had gone through the whole, and saw what a plain, simple, reasonable thing christianity was, suited to all conditions and capacities; and in the morality of it now, with divine authority, established into a legible law, so far surpassing all that philosophy and human reason had attained to, or could possibly make effectual to all degrees of mankind; I was flattered to think it might be of some use in the world; especially to those, who thought either that there was no need of revelation at all, or that the revelation of our Saviour required the belief of such articles for salvation, which the settled notions, and their way of reasoning in some, and want of understanding in others, made impossible to them. Upon these two topics the objections seemed to turn, which were with most assurance

made by deists, against christianity; but against christianity misunderstood. It seemed to me, that there needed no more to show them the weakness of their exceptions, but to lay plainly before them the doctrine of our Saviour and his apostles, as delivered in the scriptures, and not as taught by the several sects of christians.

This tempted me to publish it, not thinking it deserved an opposition from any minister of the gospel; and least of all, from any one in the communion of the church of England. But so it is, that Mr. Edwards's zeal for he knows not what (for he does not yet know his own creed, nor what is required to make him a christian) could not brook so plain, simple, and intelligible a religion; but yet, not knowing what to say against it, and the evidence it has from the word of God, he thought fit to let the book alone, and fall upon the author. What great matter he has done in it, I need not tell you, who have seen and showed the weakness of his wranglings. You have here, Sir, the true history of the birth of my "Reasonableness of Christianity, as delivered in the Scriptures," and my design in publishing it, &c. What it contains, and how much it tends to peace and union among christians, if they would receive christianity as it is, you have discovered. I am,

Sir, Your most humble servant,

B.

My readers will pardon me, that, in my preface to them, I make this particular address to Mr. Bold. He hath thought it worth his while to defend my book. How well he has done it, I am too much a party to say. I think it so sufficient to Mr. Edwards, that I needed not to have troubled myself any farther about him, on the account of any argument that remained in his book to be answered. But a great part of the world judging of the contests about truth, as they do of popular elections, that the side carries it where the greatest noise is; it was necessary they should be undeceived, and be let see, that sometimes such writers may be let alone, not because they cannot, but because they deserve not to be answered.

This farther I ought to acknowledge to Mr. Bold, and own to the world, that he hath entered into the true sense of my treatise, and his notions do so perfectly agree with mine, that I shall not be afraid, by thoughts and expressions very like his, in this my second vindication, to give Mr. Edwards (who is exceedingly quick-sighted, and positive in such matters) a

handle to tell the world, that either I borrowed this my “vindication” from Mr. Bold, or writ his “animadversions” for him. The former of these I shall count no discredit, if Mr. Edwards think fit to charge me with it; and the latter, Mr. Bold’s character is answer enough to. Though the impartial reader, I doubt not, will find, that the same uniform truth considered by us, suggested the same thoughts to us both, without any other communication.

There is another author who in a civiler style hath made it necessary for me to vindicate my book from a reflection or two of his, wherein he seems to come short of that candour he professes. All that I shall say on this occasion here, is, that it is a wonder to me, that having published what I thought the scripture told me was the faith that made a christian, and desired, that if I was mistaken, any one that thought so, would have the goodness to inform me better; so many with their tongues, and some in print, should intemperately find fault with a poor man out of his way, who desires to be set right; and no one, who blames his faith, as coming short, will tell him what that faith is, which is required to make him a christian. But I hope, that amongst so many censurers, I shall at last find one, who knowing himself to be a christian upon other grounds than I am, will have so much christian charity, as to show me what more is absolutely necessary to be believed, by me, and every man, to make him a christian.

A SECOND VINDICATION OF THE REASONABLENESS OF CHRISTIANITY, &C.

A cause that stands in need of falsehoods to support it, and an adversary that will make use of them, deserve nothing but contempt; which I doubt not but every considerate reader thought answer enough to “Mr. Edwards’s Socinianism unmasked.” But, since, in his late “Socinian creed,” he says, “I would have answered him if I could,” that the interest of christianity may not suffer by my silence, nor the contemptibleness of his treatise afford him matter of triumph among those who lay any weight on such boasting, it is fit it should be shown what an arguer he is, and how well he deserves, for his performance, to be dubbed, by himself, “irrefragable.”

Those who, like Mr. Edwards, dare to publish inventions of their own, for matters of fact, deserve a name so abhorred, that it finds not room in civil conversation. This secures him from the proper answer, due to his imputations to me, in print, of matters of fact utterly false, which, without any reply of mine, fix upon him that name (which, without a profligate mind, a man cannot expose himself to) till he hath proved them. Till then, he must wear what he has put upon himself. This being a rule, which common justice hath prescribed to the private judgments of mankind, as well as to the public judicature of courts, that all allegations of facts, brought by contending parties, should be presumed to be false, till they are proved.

There are two ways of making a book unanswerable. The one is by the clearness, strength, and fairness of the argumentation. Men who know how to write thus, are above bragging what they have done, or boasting to the world that their adversaries are baffled. Another way to make a book unanswerable, is to lay a stress on matters of fact foreign to the question, as well as to truth; and to stuff it with scurrility and fiction. This hath been always so evident to common sense, that no man, who had any regard to truth, or ingenuity, ever thought matters of fact besides the argument, and stories made at pleasure, the way of managing controversies. Which showing only the want of sense and argument, could, if used on both sides, end in nothing but downright railing: and he must always have the better of the cause, who has lying and impudence on his side.

The unmasker, in the entrance of his book, sets a great distance between his and my way of writing. I am not sorry that mine differs so much as it does from his. If it were like his, I should think, like his, it wanted the author's commendations. For, in his first paragraph, which is all laid out in his own testimony of his own book, he so earnestly bespeaks an opinion of mastery in politeness, order, coherence, pertinence, strength, seriousness, temper, and all the good qualities requisite in controversy, that I think, since he pleases himself so much with his own good opinion, one in pity ought not to go about to rob him of so considerable an admirer. I shall not, therefore, contest any of those excellencies he ascribes to himself, or faults he blames in me, in the management of the dispute between us, any farther than as particular passages of his book, as I come to examine them, shall suggest unavoidable remarks to me. I think the world does not so much concern itself about him, or me, that it need be told in that inventory, he has given of his own good parts, in his first paragraph, which of us two has the better hand at "flourishes, jesting, and common-places;" if I am, as he says, , troubled with "angry fits, and passionate ferments, which, though I strive to palliate, are easily discernible, &c." and he be more laudably ingenuous in the openness of that temper, which he shows in every leaf; I shall leave to him the entire glory of boasting of it. Whatever we brag of our performances, they will be just as they are, however he may think to add to his, by his own encomium on them. The difference in style, order, coherence, good breeding, (for all those, amongst others, the unmasker mentions,) the reader will observe, whatever I say of them; and at best they are nothing to the question in hand. For though I am a "tool, pert, childish, starch'd, impertinent, incoherent, trifling, weak, passionate, &c." commendations I meet with before I get to the 4th page, besides what follows, as "upstart racovian," , "flourishing scribbler," , "dissembler," 106, "pedantic," 107: I say, although I am all this, and what else he liberally bestows on me in the rest of his book, I may have truth on my side, and that in the present case serves my turn.

Having thus placed the laurels on his own head, and sung applause to his own performance, he, , enters, as he thinks, upon his business, which ought to be, as he confesses, , "to make good his former charges." The first whereof he sets down in these words: That "I unwarrantably crowded all the necessary articles of faith into one, with a design of favouring socinianism."

If it may be permitted to the subdued, to be so bold with one, who is already conqueror, I desire to know, where that proposition is laid down in these terms, as laid to my charge. Whether it be true, or false, shall, if he pleases, be hereafter examined: but it is not, at present, the matter in question. There are certain propositions, which he having affirmed, and I denied, are under debate between us: and that the dispute may not run into an endless ramble, by multiplying of new, before the points in contest are decided, those ought first to be brought to an issue.

To go on, therefore, in the order of his “Socinianism unmasked,” (for, , he has, out of the Mishna, taught me good breeding, “to answer the first, and so in order.”) The next thing he has against me is , which that the reader may understand the force of, I must inform him, that in of his “Thoughts concerning the causes of atheism,” he said, that I “give this plausible conceit,” as he calls it, “over and over again, in these formal words,” viz. “That nothing is required to be believed by any christian man, but this, that Jesus is the Messiah.” This I denied. To make it good, “Socinianism unmasked,” , he thus argues. First, “It is observable, that this guilty man would be shifting off the indictment, by excepting against the formality of words, as if such were not to be found in his book; but when doth he do this? In the close of it, when this matter was exhausted, and he had nothing else to say,” Vind. , “then he bethinks himself of his salvo, &c.” Answ. As if a falsehood were ever the less a falsehood, because it was not opposed, or would grow into a truth, if it were not taken notice of, before the 38th page of the answer. I desire him to show me these “formal words over and over again,” in my “Reasonableness of christianity:” nor let him hope to evade, by saying, I would be “shifting, by excepting against the formality of the words.”

To say, that “I have, over and over again, those formal words,” in my book, is an assertion of a matter of fact; let him produce the words, and justify his allegation, or confess, that this is an untruth published to the world: and since he makes so bold with truth, in a matter visible to every body, let the world be judge, what credit is to be given to his allegations of matters of fact, in things foreign to what I have printed; and that are not capable of a negative proof. A sample whereof the reader has at the entrance, in his introduction, p. A. 4, and the three or four following pages. Where he affirms to the world, not only what I know to be false; but that every one must see, he could not know to be true. For he pretends to know

and deliver my thoughts. And what the character is of one that confidently affirms what he does not know, nobody need be told.

But he adds, "I had before pleaded to the indictment, and thereby owned it to be true." This is to make good his promise, , to keep at a distance from my "feeble strugglings." Here this strong arguer must prove, that what is not answered or denied, in the very beginning of a reply, or before the 11th page, "is owned to be true." In the mean time, 'till he does that, I shall desire such of my readers, as think the unmasker's veracity worth examining, to see in my Vindication, from , &c. wherein is contained, what I have said about one article, whether I have owned what he charged me with, on that subject.

This proposition then remains upon him still to be proved, viz.

I. "THAT I HAVE, OVER AND OVER AGAIN, THESE FORMAL WORDS IN MY REASONABLENESS OF CHRISTIANITY, VIZ. THAT NOTHING IS REQUIRED TO BE BELIEVED BY ANY CHRISTIAN MAN, BUT THIS, THAT JESUS IS THE MESSIAH."

He goes on, , "And indeed he could do no other, for it was the main work he set himself about, to find but one article of faith in all the chapters of the four evangelists, and the acts of the apostles;" this is to make good his promise, , "To clear his book from those sorry objections and cavils I had raised against it." Several of my "sorry objections and cavils" were to represent to the reader, that a great part of what is said was nothing but suspicious and conjectures; and such he could not but then own them to be. But now he has rid himself of all his conjectures; and has raised them up into direct, positive affirmations, which, being said with confidence without proof, who can deny but he has cleared, thoroughly cleared, that part from my "sorry objections and cavils?" He says, "it was the main work I set myself about, to find but one article of faith." This I must take the liberty to deny; and I desire him to prove it. A man may "set himself to find two," or as many as there be, and yet find but one: or a man may "set himself to find but one," and yet find two more. It is no argument, from what a man has found, to prove what was his main work to find, unless where his aim was only to find what there was, whether more or less. For a writer may find the reputation of a poor contemptible railer; nay of a downright impudent liar; and yet nobody will think it was his main work to find that. Therefore, sir, if

you will not find what it is like you did not seek, you must prove those many confident assertions you have published, which I shall give you in tale, whereof this is the second, viz.

II. "THAT THE MAIN BUSINESS I SET MYSELF ABOUT, WAS TO FIND BUT ONE ARTICLE OF FAITH."

In the following part of this sentence, he quotes my own words with the pages where they are to be found: the first time, that, in either of his two books against me, he has vouchsafed to do so, concerning one article, wherewith he has made so much noise. My words in (of) my "Reasonableness of Christianity" stand thus: "for that this is the sole doctrine pressed and required to be believed, in the whole tenour of our Saviour's and his apostles preaching, we have showed, through the whole history of the Evangelists and Acts, and I challenge them to show, that there was any other doctrine upon their assent to which, or disbelief of it, men were pronounced believers, or unbelievers, and accordingly received into the church of Christ, as members of his body, as far as mere believing could make them so; or else kept out. This was the only gospel article of faith, which was preached to them." Out of this passage, the unmasker sets down these words, "This is the sole doctrine pressed and required to be believed, in the whole tenour of our Saviour's and his apostles preaching," , "this was the only gospel article of faith, which was preached to them."

I shall pass by all other observations, that this way of citing these words would suggest, and only remark, that, if he brought these words, to prove the immediately preceding assertion of his, viz. That "to find out but one article of faith was the main work I set myself about," this argument, reduced into form, will stand thus:

He who says, that this is the sole doctrine pressed and required to be believed in the whole tenour of our Saviour's and his apostles preaching, upon their assent to which, or disbelief of it, men were pronounced believers, or unbelievers, and accordingly received into the church of Christ, as members of his body, as far as mere believing could make them so, or else kept out; sets himself to find out but one article of faith, as his main work. But the vindicator did so: ergo,

If this were the use he would make of those words of mine cited, I must desire him to prove the major. But he talks so freely, and without book

every-where, that I suppose he thought himself, by the privilege of a declaimer, exempt from being called strictly to an account, for what he loosely says, and from proving what he should be called to an account for. Rail lustily, is a good rule; something of it will stick, true or false, proved or not proved.

If he alleges these words of mine, to answer my demand, Vind. , where he found that “I contended for one single article of faith, with the exclusion and defiance of all the rest,” which he had charged me with; I say, it proves this as little as the former. For to say, “That I had showed through the whole history of the Evangelists, and the Acts, that this is the sole doctrine, or only gospel article pressed and required to be believed in the whole tenour of our Saviour and his apostles preaching; upon their assent to which, or disbelieving of it, men were pronounced believers or unbelievers, and accordingly received into the church of Christ, or kept out;” is the simple assertion of a positive matter of fact, and so carries in it no defiance, no, nor exclusion of any other doctrinal, or historical truth, contained in the scripture: and therefore it remains still on the unmasker to show, where it is I express any defiance of any other truth contained in the word of God; or where I exclude any one doctrine of the scriptures. So that if it be true, that “I contend for one article,” my contention may be without any defiance, or so much as exclusion, of any of the rest, notwithstanding any thing contained in these words. Nay, if it should happen that I am in a mistake, and that this was not the sole doctrine, which our Saviour and his apostles preached, and, upon their assent to which, men were admitted into the church: yet the unmasker’s accusation would be never the truer for that, unless it be necessary, that he that mistakes in one matter of fact, should be at defiance with all other truths; or, that he who erroneously says, that our Saviour and his apostles admitted men into the church, upon the believing him to be the Messiah, does thereby exclude all other truths published to the jews before, or to christian believers afterwards.

If these words be brought to prove that I contended “for one article,” barely “one article,” without any defiance or exclusion annexed to that contention; I say neither do they prove that, as is manifest from the words themselves, as well as from what I said elsewhere, concerning the article of one God. For here, I say, this is the only gospel article, &c. upon which men were pronounced believers; which plainly intimates some other article,

known and believed in the world before, and without the preaching of the gospel.

To this the unmasker thinks he has provided a salvo, in these words, "Socinianism unmasked," , "And when I told him of this one article, he knew well enough, that I did not exclude the article of the Deity, for that is a principle of natural religion." If it be fit for an unmasker to perceive what is in debate, he would know, that the question is not, what he excluded, or excluded not, but what articles he charged me to have excluded.

Taking it therefore to be his meaning, (which it must be, if he meant any thing to the purpose), viz. That when he charged me so often and positively, for contesting for "one article," viz. that "Jesus was the Messiah," he did not intend to accuse me for excluding "the article of the Deity." To prove that he did not so intend it, he tells me, that "I knew that he did not."

Ans. How should I know it? He never told me so, either in his book, or otherwise. This I know, that he said, , that "I contended for one article, with the exclusion of all the rest." If then the belief of the Deity be an article of faith, and be not the article of Jesus being the Messiah, it is one "of the rest;" and if "all the rest" were excluded, certainly that, being one of "all the rest," must be excluded. How then he could say, "I knew that he excluded it not," i. e. meant not that I excluded it, when he positively says, I did "exclude it," I cannot tell, unless he thought that I knew him so well, that when he said one thing, I knew that he meant another, and that the quite contrary.

He now, it seems, acknowledges that I affirmed, that the belief of the Deity, as well as of Jesus being the Messiah, was required to make a man a believer. The believing in "one God, the Father Almighty, maker of heaven and earth," is one article; and in "Jesus Christ, his only Son our Lord," is another article. These, therefore, being "two articles," and both asserted by me, to be required to make a man a christian, let us see with what truth or ingenuity the unmasker could apply, besides that above mentioned, these following expressions to me, as he does without any exception: "Why then must there be one article and no more?" . "Going to make a religion for his myrmidons, he contracts all into one article, and will trouble them with no more," . "Away with systems, away with creeds, let us have but one article, though it be with defiance to all the rest," . "Thus we see, why he reduces all belief to that one article before rehearsed," . And all this without any the least exception of the article of a Deity, as he now pretends. Nor could he,

indeed, as is evident from his own words, , 122: “To conclude, this gentleman and his fellows are resolved to be unitarians; they are for one article of faith, as well as One person in the Godhead: — But, if these learned men were not prejudiced, — they would perceive, that, when the catholic faith is thus brought down to one single article, it will soon be reduced to none; the unit will dwindle into a cypher.” By which the reader may see that his intention was, to persuade the world, that I reduced all belief, the catholic faith, (they are in his own words,) “to one single article, and no more.” For if he had given but the least hint, that I allowed of Two, all the wit and strength of argument, contained in unitarians, unit and cypher, with which he winds up all, had been utterly lost, and dwindled into palpable nonsense.

To demonstrate that this was the sense he would be understood in, we are but to observe what he says again, of his “Socinianism unmasked,” where he tells his readers, that “I and my friends have new-modelled the apostles creed; yea, indeed, have presented them with one article, instead of twelve.” And hence we may see, what sincerity there is, in the reason he brings, to prove that he did not exclude the “article of the Deity.” “For, says he, , that is a principle of natural religion.”

Answ. Ergo, he did not in positive words, without any exception, say, I reduced “all belief, the catholic faith, to one single article, and no more.” But to make good his promise, “not to resemble me in the little artifices of evading,” he wipes his mouth, and says at the bottom of this page, “But the reader sees his [the vindicator’s] shuffling.” Whilst the article of “One God” is a part of “all belief, a part of the catholic faith,” all which he affirmed I excluded, but the one article concerning the Messiah; every one will see where the shuffling is: and, if it be not clear enough from those words themselves, let those above quoted, out of , of his “Socinianism unmasked,” where he says, that “I have new modelled the apostles creed, and presented the world with one article instead of twelve,” be an interpretation of them. For, if the article of “one eternal God, maker of heaven and earth,” be one of the articles of the apostles creed, and the one article I presented them with, be not that, it is plain, he did, and would be understood to mean, that by my one article, I excluded that of the one eternal God, which branch soever of religion, either natural, or revealed, it belongs to.

I do not endeavour to “persuade the reader,” as he says, , “that he misunderstood me,” but yet every body will see that he misrepresented me.

And I challenge him to say, that those expressions above quoted out of him, concerning “one article,” in the obvious sense of the words, as they stand in his accusation of me, were true.

This flies so directly in his face, that he labours mightily to get it off, and therefore adds these words, “My discourse did not treat (neither doth his book run that way) of principles of natural religion, but of the revealed, and particularly the christian: accordingly, this was it that I taxed him with, That, of all the principles and articles of christianity, he chose out but one, as necessary to be believed to make a man a christian.”

Answ. His book was of — atheism, which one may think should make his “discourse treat of natural religion.” But I pass by that, and bid him tell me where he taxed me, “That, of all the principles and articles of christianity, I chose out but one:” let him show, in all his discourse, but such a word, or any thing said, like “one article of christianity,” and I will grant that he meant particularly, but spoke generally; misled his reader, and left himself a subterfuge. But if there be no expression to be found in him, tending that way, all this is but the covering of one falsehood with another, which thereby only becomes the grosser. Though if he had in express words taxed me, That, of all the principles and articles of the christian religion, I chose out but one, that would not at all help him, till he farther declares, that the belief of one God is not an “article of the christian religion.” For, of “all the articles of the christian religion,” he says, “I chose but one;” which not being that of a Deity, his words plainly import, that that was left out amongst the rest, unless it be possible for a man to choose but one article of the christian religion, viz. That “Jesus is the Messiah;” and at the same time, to choose two articles of the christian religion, viz. That there is one eternal God, and that Jesus is the Messiah. If he had spoken clearly, and like a fair man, he should have said, That he taxed me with choosing but one article of revealed religion. This had been plain and direct to his purpose: but then he knew the falsehood of it would be too obvious: for, in the seven pages, wherein he taxes me so much with One article, christianity is several times named, though not once to the purpose he here pretends. But revelation is not so much as once mentioned in them, nor, as I remember, in any of the pages he bestows upon me.

To conclude, the several passages above quoted out of him, concerning one sole article, are all in general terms, without any the least limitation or restriction; and, as they stand in him, fit to persuade the reader, that I

excluded all other articles whatsoever, but that one, of “Jesus the Messiah:” and if, in that sense, they are not true, they are so many falsehoods of his, repeated there, to mislead others into a wrong opinion of me. For, if he had a mind his readers should have been rightly informed, why was it not as easy once to explain himself, as so often to affirm it in general and unrestrained terms? This, all the boasted strength of the unmasker will not be able to get him out of. This very well becomes one, who so loudly charges me with shuffling. Having repeated the same thing over and over again, in as general terms as was possible, without any the least limitation, in the whole discourse, to have nothing else to plead when required to prove it, but that it was meant in a limited sense, in an unmasker, is not shuffling. For, by this way, he may have the convenience to say, and unsay, what he pleases; to vent what stuff he thinks for his turn; and, when he is called to account for it, reply, He meant no such thing. Should any one publish, that the unmasker had but “one article of faith, and no more,” viz. That the doctrines in fashion, and likely to procure preferment, are alone to be received; that all his belief was comprised in this “one single article:” and when such a talker was demanded to prove his assertion, should he say, he meant to except his belief of the apostles creed: would he not, notwithstanding such a plea, be thought a shuffling liar? And, if the unmasker can no otherwise prove those universal propositions above cited, but by saying, he meant them with a tacit restriction, (for none is expressed,) they will still, and for ever remain to be accounted for, by his veracity.

What he says in the next paragraph, , of my “splitting one article into two,” is just of the same force, and with the same ingenuity. I had said, That the belief of one God was necessary; which is not denied: I had also said, “That the belief of Jesus of Nazareth to be the Messiah, together with those concomitant articles of his resurrection, rule, and coming again to judge the world, was necessary, . And again, , That God had declared, whoever would believe Jesus to be the Saviour promised, and take him now raised from the dead, and constituted the Lord and Judge of all men, to be their King and Ruler, should be saved.” This made me say, “These, and those articles” (in words of the plural number) more than once; evidence enough to any but a caviller, that I “contend not for one single article, and no more.” And to mind him of it, I, in my Vindication, reprinted one of those places, where I had done so; and, that he might not, according to his manner, overlook what

does not please him, the words, these are articles, were printed in great characters. Whereupon he makes this remark, , “And though since he has tried to split this one into two, , yet he labours in vain: for to believe Jesus to be the Messiah, amounts to the same with believing him to be King and Ruler; his being anointed, (i. e. being the Messiah,) including that in it: yet he has the vanity to add in great characters, these are articles; as if the putting them into these great letters, would make one article two.”

Ans. Though no letters will make one article two; yet that there is one God, and Jesus Christ his only Son our Lord, who rose again from the dead, ascended into heaven, and sitteth at the right hand of God, shall come to judge the quick and the dead, are, in the apostles creed, set down as more than one article, and therefore may, very properly, be called these articles, without splitting one into two.

What, in my “Reasonableness of christianity,” I have said of one article, I shall always own; and in what sense I have said it, is easy to be understood; and with a man of the least candour, whose aim was truth, and not wrangling, it would not have occasioned one word of dispute. But as for this unmasker, who makes it his business, not to convince me of any mistakes in my opinion, but barely to misrepresent me; my business at present with him is, to show the world, that what he has captiously and scurrilously said of me, relating to one article, is false; and that he neither has, nor can prove one of those assertions concerning it, above cited out of him, in his own words. Nor let him pretend a meaning against his direct words: such a caviller as he, who would shelter himself under the pretence of a meaning, whereof there are no footsteps; whose disputes are only calumnies directed against the author, without examining the truth or falsehood of what I had published; is not to expect the allowances one would make to a fair and ingenuous adversary, who showed so much concern for truth, that he treated of it with a seriousness due to the weightiness of the matter, and used other arguments, besides obloquy, clamour and falsehoods, against what he thought error. And therefore I again positively demand of him to prove these words of his to be true, or confess that he cannot; viz.

III. “THAT I CONTEND FOR ONE ARTICLE OF FAITH, WITH THE EXCLUSION AND DEFIANCE OF ALL THE REST.”

Two other instances of this sort of arguments, I gave in the 175th page of my Vindication, out of the 115th and 119th pages of his “Thoughts concerning the causes of atheism;” and I here demand of him again to show, since he has not thought fit hitherto to give any answer to it,

IV. “WHERE I URGE, THAT THERE MUST BE NOTHING IN CHRISTIANITY, THAT IS NOT PLAIN, AND EXACTLY LEVELLED TO ALL MEN’S MOTHER-WIT, AND EVERY COMMON APPREHENSION.”

Or, where he finds, in my “Reasonableness of christianity,” this other proposition:

V. “THAT THE VERY MANNER OF EVERY THING IN CHRISTIANITY, MUST BE CLEAR AND INTELLIGIBLE; EVERY THING MUST IMMEDIATELY BE COMPREHENDED BY THE WEAKEST NODDLE; OR ELSE IT IS NO PART OF RELIGION, ESPECIALLY OF CHRISTIANITY.”

These things he must prove that I have said; I put it again upon him to show where I said them, or else to confess the forgery: for till he does one or the other, he shall be sure to have these, with a large catalogue of other falsehoods, laid before him.

Page 26, of his “Socinianism unmasked,” he endeavours to make good his saying, that “I set up one article, with defiance to all the rest,” in these words: “for what is excluding them wholly, but defying them? Wherefore, seeing he utterly excludes all the rest, by representing them as useless to the making a man a christian, which is the design of his whole undertaking, it is manifest that he defies them.”

Answ. This at least is manifest from hence, that the unmasker knows not, or cares not what he says. For whoever, but he, thought, that a bare exclusion, or passing by was defiance? If he understands so, I would advise him not to seek preferment. For exclusions will happen; and if every exclusion be defiance, a man had need be well assured of his own good temper, who shall not think his peace and charity in danger, amongst so many enemies that are at defiance with him. Defiance, if, with any propriety, it can be spoken of an article of faith, must signify a professed enmity to it. For, in its proper use, which is to persons, it signifies an open

and declared enmity, raised to that height, that he, in whom it is, challenges the party defied to battle, that he may there wreak his hatred on his enemy, in his destruction. So that “my defiance of all the rest” remains still to be proved.

But, secondly, There is another thing manifest from these words of his, viz. that, notwithstanding his great brags in his first paragraph, his main skill lies in fancying what would be for his turn, and then confidently fathering it upon me. It never entered into my thoughts, nor, I think, into any body’s else, (I must always except the acute unmasker, who makes no difference between useful and necessary,) that all but the fundamental articles of the christian faith were useless to make a man a christian; though, if it be true, that the belief of the fundamentals alone (be they few, or many) is all that is necessary to his being made a christian, all that may any way persuade him to believe them, may certainly be useful towards the making him a christian: and therefore here again, I must propose to him, and leave it with him to be showed where it is.

VI. “I HAVE REPRESENTED ALL THE REST AS USELESS TO THE MAKING A MAN A CHRISTIAN?” AND HOW IT APPEARS, THAT “THIS IS THE DESIGN OF MY WHOLE UNDERTAKING?”

In his “Thoughts concerning the causes of atheism,” he says, page 115, “What makes him contend for one single article, with the exclusion of all the rest? He pretends it is this, that all men ought to understand their religion.” This reasoning I disowned, , of my Vindication, and intimated, that he should have quoted the page where I so pretended.

To this, , he tells me with great confidence, and in abundance of words, as we shall see by and by, that I had done so; as if repetition were a proof. He had done better to have quoted one place, where I so pretend. Indeed, , for want of something better, he quotes these words of mine out of , of the Reasonableness of christianity: “The all-merciful God seems herein to have consulted the poor of this world, and the bulk of mankind. These are articles that the labouring and illiterate man may comprehend.” I ask, whether it be possible for one to bring any thing more direct against himself? The thing he was to prove was, that “I contended for one single article, with the exclusion of all the rest, because I pretended, that all men ought to understand their religion:” i. e. the reason I gave, why there was to be “but

one single article in religion, with the exclusion of all the rest," was, because men ought to understand their religion. And the place he brings, to prove my contending upon that ground, "for one single article, with the exclusion of all the rest," is a passage wherein I speak of more than one article, and say, "these articles." Whether I said, "these articles," properly or improperly, it matters not, in the present case (and that we have examined in another place) it is plain, I meant more than one article, when I said, "these articles;" and did not think, that the labouring and illiterate man could not understand them, if they were more than one: and therefore, I pretended not, that there must be but one, because by illiterate men more than one could not be understood. The rest of this paragraph is nothing but a repetition of the same assertion, without proof, which, with the unmasker, often passes for a way of proving, but with nobody else.

But, that I may keep that distance, which he boasts, there is betwixt his and my way of writing, I shall not say this without proof. One instance of his repetition, of which there is such plenty in his book, pray take here. His business, , is to prove, that "I pretended that I contended for one single article, with the exclusion of all the rest, because all men ought to understand their religion:" , of my Vindication, I denied that I had so pretended. To convince me that I had, thus he proceeds:

Unmasker. "He founds his conceit" of one article, "partly upon this, that a multitude of doctrines is obscure, and hard to be understood."

Answer. You say it, and had said it before: but I ask you, as I did before, Where I did so?

Unm. "And therefore he trusses all up in one article, that the poor people and bulk of mankind may bear it."

Answ. I desire again to know where I made that inference, and argued so, for "one article?"

Unm. "This is the scope of a great part of his book."

Answ. This is saying again, show it once.

Unm. "But his memory does not keep pace with his invention, and thence he says, he remembers nothing of this in his book," Vind. .

Answ. This is to say that it is in my book. You have said it more than once already; I demand of you to show me where.

Unm. "This worthy writer does not know his own reasoning, that he uses."

Answ. I ask, Where does he use that reasoning?

Unm. "As particularly thus, that he troubles christian men with no more, but one article: because that is intelligible, and all people, high and low, may comprehend it."

Answ. We have heard it affirmed by you, over and over again, but the question still is, "Where is that way of arguing to be found in my book?"

Unm. "For he has chosen out, as he thinks, a plain and easy article. Whereas the others, which are commonly propounded, are not generally agreed on, (he saith,) and are dubious and uncertain. But the believing that Jesus is the Messiah, has nothing of doubtfulness or obscurity in it."

Answ. The word "For," in the beginning of this sentence, makes it stand for one of your reasons; though it be but a repetition of the same thing in other words.

Unm. "This the reader will find to be the drift and design of several of his pages."

Answ. This must signify "that I trouble men with no more but one article, because only one is intelligible," and then it is but a repetition. If any thing else be meant by the word This, it is nothing to the purpose. For that I said, that all things necessary to be believed are plain in scripture, and easy to be understood, I never denied; and should be very sorry, and recant it, if I had.

Unm. "And the reason why I did not quote any single one of them, was, because he insists on it, so long together: and spins it out after his way, in of his "Reasonableness of Christianity," where he sets down the short, plain, easy, and intelligible summary (as he calls it) of religion," couched in a single article: he immediately adds: "the all-merciful God seems herein to have consulted the poor of this world, and the bulk of mankind: these are articles" (whereas he had set down but one) "that the labouring and illiterate man may comprehend."

Answ. If "my insisting on it so long together" was the cause why, in your thoughts of the causes of "atheism," you did not quote any single passage; methinks here, in your "Socinianism unmasked," where you knew it was expected of you, my "insisting on it," as you say, "so long together," might have afforded, at least, one quotation to your purpose.

Unm. "He assigns this, as a ground, why it was God's pleasure, that there should be but one point of faith, because thereby religion may be understood the better; the generality of people may comprehend it."

Answ. I hear you say it again, but want a proof still, and ask, “where I assign that ground?”

Unm. “This he represents as a great kindness done by God to man; whereas the variety of articles would be hard to be understood.”

Answ. Again the same cabbage; an affirmation, but no proof.

Unm. “This he enlarges upon, and flourishes it over, after his fashion: and yet desires to know, When he said so?” Vind.

Answ. And if I did, let the world here take a sample of the unmasker’s ability, or truth, who spends above two whole pages, 26, 27, in repetitions of the same assertion, without the producing any but one place for proof; and that too against him, as I have shown. But he has not yet done with confounding me by dint of repetition; he goes on.

Unm. “Good sir, let me be permitted to acquaint you, that your memory is as defective as your judgment.”

Answ. I thank you for the regard you have had to it; for often repetition is a good help to a bad memory. In requital, I advise you to have some eye to your own memory and judgment too. For one, or both of them, seem a little to blame, in the reason you subjoin to the foregoing words, viz.

Unm. “For in the very Vindication, you attribute it to the goodness and condescension of the Almighty, that he requires nothing, as absolutely necessary to be believed, but what is suited to vulgar capacities, and the comprehension of illiterate men.”

Answ. I will, for the unmasker’s sake, put this argument of his into a syllogism. If the vindicator, in his vindication, attributes it to the goodness and condescension of the Almighty, that he requires nothing to be believed, but what is suited to vulgar capacities, and the comprehension of illiterate men; then he did, in his “Reasonableness of christianity,” pretend, that the reason, why he contended for One article, with the exclusion of all the rest, was because all men ought to understand their religion.

But the vindicator, in his vindication, attributes it to the goodness and condescension of Almighty God, that he requires nothing to be believed, but what is suited to vulgar capacities, and the comprehension of illiterate men.

“Ergo,” in his “Reasonableness of christianity,” he pretended, that the reason why he contended for one article, with the exclusion of all the rest, was, because all men ought to understand their religion.

This was the proposition to be proved, and which, as he confesses here, , I denied to remember to be in my “Reasonableness of christianity.” Who can but admire his logic!

But, besides the strength of judgment, which you have showed in this clear and cogent reasoning, Does not your memory too deserve its due applause? You tell me, in your “Socinianism unmasked,” that in of my Vindication, I desired to know when I said so. To which desire of mine, you reply in these words before cited: “Good sir, let me be permitted to acquaint you, that your memory is as defective as your judgment; for, in the very Vindication, you attribute it to the goodness and condescension of the Almighty, that he requires nothing, as absolutely necessary to be believed, but what is suited to vulgar capacities, and the comprehension of illiterate men,” .

Sure the unmasker thinks himself at cross questions. I ask him, in the 29th page of my Vindication, When I said so? And he answers, that I had said so in the 30th page of my Vindication; i. e. when I writ the 29th page, I asked the question, When I had said, what he charged me with saying? And I am answered, I had said in the 30th page; which was not yet written: i. e. I asked the question to-day, When I had said so? And I am answered, I had said it to-morrow. As opposite and convincing an answer, to make good his charge, as if he had said, To-morrow I found a horse-shoe. But, perhaps this judicious disputant will ease himself of this difficulty, by looking again into the 175th page of my Vindication, out of which he cites these words for mine: “I desire to know, When I said so?” But my words in that place are, “I desire to know, Where I said so?” A mark of his exactness in quoting, when he vouchsafes to do it. For unmaskers, when they turn disputants, think it the best way to talk at large, and charge home in generals: but do not often find it convenient to quote pages, set down words, and come to particulars. But, if he had quoted my words right, his answer had been just as pertinent. For I ask him, Where, in my “Reasonableness of christianity,” I had said so? And he answers, I had said so in my Vindication. For where, in my question, refers to my “Reasonableness of christianity,” which the unmasker had seen, and charged with this saying; and could not refer to my Vindication, which he had not yet seen, nor to a passage in it, which was not then written. But this is nothing with an unmasker; therefore, what is yet worse, those words of mine, Vindication, , relate not to the passage he is here proving, I had said, but to another different from it; as different as it is

to say, "That, because all men are to understand their religion, therefore there is to be but one article in it;" and to say, "that there must be nothing in christianity that is not plain, and exactly levelled to all men's mother-wit:" both which he falsely charges on me; but it is only to the latter of them, that my words, "I desire to know, where I said so?" are applied.

Perhaps the well-meaning man sees no difference between these propositions, yet I shall take the liberty to ask him again, Where I said either of them, as if they were two? Although he should accuse me again, of "excepting against the formality of words," and doing so foolish a thing, as to expect, that a disputing unmasker should account for his words, or any proposition he advances. It is his privilege to plead, he did not mean as his words import, and without any more ado he is assoiled; and he is the same unmasker he was before. But let us hear him out on the argument he was upon, for his repetitions on it are not yet done. His next words are,

Unm. "It is clear then, that you found your one article on this, that it is suited to the vulgar capacities: whereas the other articles mentioned by me, are obscure and ambiguous, and therefore surpass the comprehension of the illiterate."

Answ. The latter part, indeed, is now the first time imputed to me; but all the rest is nothing but an unproved repetition, though ushered in with "it is clear then;" words that should have a proof going before them.

Unm. "But yet you pretend, that you have forgot that any such thing was said by you."

Answ. I have indeed forgot, and notwithstanding all your pains, by so many repetitions, to beat it into my head, I fear I shall never remember it.

Unm. "Which shows that you are careless of your words, and that you forget what you write."

Answ. So you told me before, and this repeating of it does no more convince me than that did.

Unm. "What shall we say to such an oblivious author?"

Answ. Show it him in his book, or else he will never be able to remember that it is there, nor any body else be able to find it.

Unm. "He takes no notice of what falls from his own pen."

Answ. So you have told him more than once. Try him once with showing it him, amongst other things which fell from his own pen, and see what then he will say: that perhaps may refresh his memory.

Unm. "And therefore, within a page or two, he confutes himself, and gives himself the lye."

Answ. It is a fault he deserves to be told of, over and over again. But he says, he shall not be able to find the two pages wherein he "gives himself the lye," unless you set down their numbers, and the words in them, which confute, and which are confuted.

I beg my reader's pardon, for laying before him so large a pattern of our unmasker's new-fashioned stuff; his fine tissue of argumentation not easily to be matched, but by the same hand. But it lay all together in , 27, 28; and it was fit the reader should have this one instance of the excellencies he promises in his first paragraph, in opposition to my "impertinencies, incoherences, weak and feeble strugglings." Other excellencies he there promised, upon the same ground, which I shall give my reader a taste of in fit places: not but that the whole is of a piece, and one cannot miss some of them in every page; but to transcribe them all, would be more than they are worth. If any one desires more plenty, I send him to his book itself. But saying a thousand times, not being proved once, it remains upon him still to show,

VII. WHERE, IN MY "REASONABLENESS OF CHRISTIANITY," "I PRETEND THAT I CONTEND FOR ONE SINGLE ARTICLE, WITH THE EXCLUSION OF ALL THE REST, BECAUSE ALL MEN OUGHT TO UNDERSTAND THEIR RELIGION."

And in the next place, where it is that I say,

VIII. "THAT THERE MUST BE NOTHING IN CHRISTIANITY THAT IS NOT PLAIN AND EXACTLY LEVEL TO ALL MEN'S MOTHER-WIT."

Let us now return to his 8th page: for the bundling together, as was fit, all that he has said, in distant places, upon the subject of One article, has made me trespass a little, against the jewish character of a well bred man, recommended by him to me, out of the Mishna. Though I propose to myself to follow him, as near as I can, step by step as he proceeds.

In the 110th and 111th pages of his "Thoughts concerning the causes of atheism," he gave us a list of his "fundamental articles:" upon which, I thus applied myself to him, Vind. , &c. "Give me leave now to ask you seriously,

Whether these you have here set down under the title of “fundamental doctrines,” are such (when reduced to propositions) that every one of them is required to make a man a christian, and such as, without the actual belief thereof, he cannot be saved? If they are not so, every one of them, you may call them “fundamental doctrines,” as much as you please, they are not of those doctrines of faith I was speaking of; which are only such as are required to be actually believed, to make a man a christian.” And again, Vind. , I asked him, “Whether just these, neither more nor less,” were those necessary articles?

To which we have his answer, “Socinianism unmasked,” , &c. From to 20, he has quoted near forty texts of scripture, of which he saith, , “Thus I have briefly set before the reader, those evangelical truths, those christian principles, which belong to the very essence of christianity: I have proved them to be such, and I have reduced most of them to certain propositions, which is a thing the vindicator called for.”

Answ. Yes: but that was not all the vindicator called for, and had reason to expect. For I asked, “Whether those the unmasker gave us, in his Thoughts concerning the causes of atheism,” were the fundamental articles, “without an actual belief whereof, a man could not be a christian; just all, neither more nor less?” This I had reason to demand from him, or from any one, who questions that part of my book; and I shall insist upon it, until he does it, or confesses he cannot. For having set down the articles, which the scripture, upon a diligent search, seemed to me to require as necessary, and only necessary; I shall not lose my time in examining what another says against those fundamentals, which I have gathered out of the preachings of our Saviour and his apostles, until he gives me a list of his fundamentals, which he will abide by; that so, by comparing them together, I may see which is the true catalogue of necessities. For after so serious and diligent a search, which has given me light and satisfaction in this great point, I shall not quit it, and set myself on float again, at the demand of any one, who would have me be of his faith, without telling me what it is. Those fundamentals the scripture has so plainly given, and so evidently determined, that it would be the greatest folly imaginable, to part with this rule for asking; and give up myself blindly to the conduct of one, who either knows not, or will not tell me, what are the points necessary to be believed to make me a christian. He that shall find fault with my collection of fundamentals, only to unsettle me, and not give me a better of his own, I

shall not think worth minding, until, like a fair man, he puts himself upon equal terms, and makes up the defects of mine, by a complete one of his own. For a deficiency, or error, in one necessary, is as fatal, and as certainly excludes a man from being a christian, as in an hundred. When any one offers me a complete catalogue of his fundamentals, he does not unreasonably demand me to quit mine for nothing: I have then one, that being set by mine, I may compare them; and so be able to choose the true and perfect one, and relinquish the other.

He that does not do this, plainly declares, that, (without showing me the certain way to salvation) he expects, that I should depend on him with an implicit faith, whilst he reserves to himself the liberty to require of me to believe, what he shall think fit, as he sees occasion; and in effect says thus, "Distrust those fundamentals, which the preachings of Our Saviour and his apostles have showed to be all that is necessary to be believed to make a man a christian; and, though I cannot tell you, what are those other articles which are necessary and sufficient to make a man a christian, yet take me for your guide, and that is as good as if I made up, in a complete list, the defects of your fundamentals?" To which this is a sufficient answer, *Si quid novisti rectius, imperti; si non, his utere mecum.*"

The unmasker, of his own accord, of his "Thoughts concerning the causes of atheism," sets down several, which he calls "fundamental doctrines." I ask him, whether those be all? For answer, he adds more to them in his "Socinianism unmasked:" but in a great pet refuses to tell me, whether this second list of fundamentals be complete: and, instead of answering so reasonable a demand, pays me with ill language, in these words, , subjoined to those last quoted, "If what I have said will not content him, I am sure I can do nothing that will; and therefore, if he should capriciously require any thing more, it would be as great folly in me to comply with it, as it is in him to move it." If I did ask a question, which troubles you, be not so angry; you yourself were the occasion of it. I proposed my collection of fundamentals, which I had, with great care, sought; and thought I had found clear in the scripture; you tell me no, it is imperfect, and offer me one of your own. I ask, whether that be perfect? Thereupon you grow into choler, and tell me it is a foolish question. Why! then I think it was not very wise in you so forwardly to offer one, unless you had one ready, not liable to the same exception. Would you have me so foolish, to take a list of fundamentals from you, who have not yet one for

yourself; nor are yet resolved with yourself, what doctrines are to be put in, or left out of it? Farther, pray tell me, if you had a settled collection of fundamentals, that you would stand to, why should I take them from you, upon your word, rather than from an anabaptist, or a quaker, or an arminian, or a socinian, or a lutheran, or a papist; who, I think, are not perfectly agreed with you, or one another in fundamentals? And yet, there is none amongst them, that I have not as much reason to believe, upon his bare word, as an unmasker, who, to my certain knowledge, will make bold with truth. If you set up for infallibility, you may have some claim to have your bare word taken, before any other but the pope. But yet, if you demand to be an unquestionable proposer, of what is absolutely necessary to be believed to make a man a christian, you must perform it a little better, than hitherto you have done. For it is not enough, sometimes to give us texts of scripture; sometimes propositions of your own framing, and sometimes texts of scripture, out of which they are to be framed; as , you say, “These and the like places afford us such fundamental and necessary doctrines as these:” and again, , after the naming several other texts of scripture, you add, “which places yield us such propositions as these;” and then in both places set down what you think fit to draw out of them. And , you have these words: “and here, likewise, it were easy to show, that adoption, justification, pardon of sins, &c. which are privileges and benefits bestowed upon us by the Messiah, are necessary matters of our belief.” By all which, as well as the whole frame, wherein you make show of giving us your fundamental articles, it is plain, that what you have given us there, is nothing less than a complete collection of fundamentals, even in your own opinion of it.

But, good sir, Why is it a foolish question in me? You have found fault with my summary for being short; the defect in my collection of necessary articles, has raised your zeal into so severe censures, and drawn upon me, from you, so heavy a condemnation, that, if half you have said of me be true, I am in a very ill case, for having so curtailed the fundamental doctrines of christianity. Is it folly, then, for me to ask from you a complete creed? If it be so dangerous (as certainly it is) to fail in any necessary article of faith, Why is it folly in me, to be instant with you, to give me them all? Or why is it folly in you, to grant so reasonable a demand? A short faith, defective in necessities, is no more tolerable in you, than in me; nay, much more inexcusable, if it were for no other reason but this, that you rest in it

yourself, and would impose it on others; and yet do not yourself know, or believe it to be complete. For if you do, why dare you not say so, and give it us all entire, in plain propositions; and not, as you have in a great measure done here, give only the texts of scripture, from whence, you say, necessary articles are to be drawn? Which is too great an uncertainty for doctrines absolutely necessary. For, possibly, all men do not understand those texts alike, and some may draw articles out of them quite different from your system; and so, though they agree in the same texts, may not agree in the same fundamentals; and till you have set down plainly and distinctly your articles, that you think contained in them, cannot tell whether you will allow them to be christians, or no. For you know, sir, several inferences are often drawn from the same text: and the different systems of dissenting (I was going to say christians, but that none must be so, but those who receive your collection of fundamentals, when you please to give it them) professors are all founded on the scripture.

Why, I beseech you, is mine a foolish question to ask, “What are the necessary articles of faith?” It is of no less consequence than, nor much different from the jailer’s question in the sixteenth of the Acts, “What shall I do to be saved?” And that was not, that ever I heard, counted by any one a foolish question. You grant, there are articles necessary to be believed for salvation: Would it not then be wisdom to know them? Nay, is it not our duty to know and believe them? If not, why do you, with so much outcry, reprehend me, for not knowing them? Why do you fill your books with such variety of invectives, as if you could never say enough, nor bad enough against me, for having left out some of them? And, if it be so dangerous, so criminal to miss any of them, Why is it a folly in me, to move you to give me a complete list?

If fundamentals are to be known, easy to be known, (as without doubt, they are,) then a catalogue may be given of them. But, if they are not, if it cannot certainly be determined, which are they; but the doubtful knowledge of them depends upon guesses; Why may not I be permitted to follow my guesses, as well as you yours? Or why, of all others, must you prescribe your guesses to me, when there are so many that are as ready to prescribe as you, and of as good authority? The pretence, indeed, and clamour is religion, and the saving of souls: but your business, it is plain, is nothing but to over-rule and prescribe, and be hearkened to as a dictator: and not to inform, teach, and instruct in the sure way to salvation. Why else do you so

start and fling, when I desire to know of you, what is necessary to be believed to make a man a christian, when this is the only material thing in controversy between us; and my mistake in it has made you begin a quarrel with me, and let loose your pen against me in no ordinary way of reprehension?

Besides, in this way which you take, you will be in no better a case than I. For, another having as good a claim to have his guesses give the rule, as you yours; or to have his system received, as well as you yours; he will complain of you as well, and upon as good grounds, as you do of me; and (if he have but as much zeal for his orthodoxy, as you show for yours) in as civil, well-bred, and christian-like language.

In the next place, pray tell me, Why would it be folly in you, to comply with what I require of you? Would it not be useful to me, to be set right in this matter? If so, Why is it folly in you to set me right? Consider me, if you please, as one of your parishioners, who (after you have resolved which catalogue of fundamentals to give him, either that in your “Thoughts of the Causes of Atheism,” or this other here, in your “Socinianism unmasked;” for they are not both the same, nor either of them perfect) asked you, “Are these all fundamental articles necessary to be believed to make a man a christian; and are there no more but these?” Would you answer him, that it was folly in you to comply with him, in what he desired? Is it of no moment to know, what is required of men to be believed; without a belief of which, they are not christians, nor can be saved? And is it folly in a minister of the gospel, to inform one committed to his instruction, in so material a point as this, which distinguishes believers from unbelievers? Is it folly in one, whose business it is to bring men to be christians, and to salvation, to resolve a question, by which they may know, whether they are christians or no; and, without a resolution of which, they cannot certainly know their condition, and the state they are in? Is it besides your commission and business, and therefore a folly, to extend your care of souls so far as this, to those who are committed to your charge?

Sir, I have a title to demand this of you, as if I were your parishioner: you have forced yourself upon me for a teacher, in this very point, as if you wanted a parishioner to instruct: and therefore I demand it of you, and shall insist upon it, till you either do it, or confess you cannot. Nor shall it excuse you, to say it is capriciously required. For this is no otherwise capricious, than all questions are capricious to a man, that cannot answer them; and

such an one, I think, this is to you. For, if you could answer it, nobody can doubt, but that you would, and that with confidence: for nobody will suspect it is the want of that makes you so reserved. This is, indeed, a frequent way of answering questions, by men, that cannot otherwise cover the absurdities of their opinions, and their insolence of expecting to be believed upon their bare words, by saying they are capriciously asked, and deserve no other answer.

But how far soever capriciousness (when proved, for saying is not enough) may excuse from answering a material question, yet your own words here will clear this from this being a capricious question in me. For that those texts of scripture which you have set down, do not, upon your own grounds, contain all the fundamental doctrines of religion, all that is necessary to be believed to make a man a christian; what you say a little lower, in this very page, as well as in other places, does demonstrate. Your words are, “I think I have sufficiently proved, that there are other doctrines besides that [Jesus is the Messiah] which are required to be believed to make a man a christian; Why did the apostles write these doctrines? Was it not, that those they writ to, might give their assent to them?” This argument, for the necessity of believing the texts you cite from their being set down in the “New Testament,” you urged thus, , “Is this set down to no purpose in these inspired epistles? Is it not requisite that we should know it and believe?” And again, , “they are in our bibles to that very purpose, to be believed.” If then it be necessary to know and believe those texts of scripture you have collected, because the apostles writ them, and they were not “set down to no purpose: and they are set down in our bibles on purpose to be believed:” I have reason to demand of you other texts, besides those you have enumerated, as containing points necessary to be believed; because there are other texts which the apostles writ, and were not “set down to no purpose, and are in our bibles, on purpose to be believed,” as well as those which you have cited.

Another reason of doubting, and consequently of demanding, whether those propositions you have set down for fundamental doctrines, be every one of them necessary to be believed, and all that are necessary to be believed to make a man a christian, I have from your next argument; which, joined to the former, stands thus, : “Why did the apostles write these doctrines? Was it not that those they writ to, might give their assent to them? Nay, did they not require assent to them? Yes verily; for this is to be

proved from the nature of the things contained in these doctrines, which are such as had immediate respect to the occasion, author, way, means and issue, of their redemption and salvation.” If therefore all “things which have an immediate respect to the occasion, author, way, means and issue of men’s redemption and salvation,” are those and those only, which are necessary to be believed to make a man a christian; may a man not justly doubt, whether those propositions, which the unmasker has set down, contain all those things, and whether there be not other things contained in other texts of scripture, or in some of those cited by him, but otherwise understood, that have as immediate a “respect to the occasion, author, way, means and issue, of men’s redemption and salvation,” as those he has set down? and therefore I have reason to demand a completer list. For at best, to tell us of “all things that have an immediate respect to the occasion, author, way, means and issue, of men’s redemption and salvation,” is but a general description of fundamentals, with which some may think some articles agree, and others, others: and the terms, “immediate respect,” may give ground enough for difference about them, to those who agree that the rest of your description is right. My demand therefore is not a general description of fundamentals, but, for the reasons above mentioned, the particular articles themselves, which are necessary to be believed to make a man a christian.

It is not my business at present, to examine the validity of these arguments of his, to prove all the propositions to be necessary to be believed, which he has here, in his “Socinianism unmasked,” set down as such. The use I make of them now, is to show the reason they afford me to doubt, that those propositions, which he has given us, for doctrines necessary to be believed, are either not all such, or more than all, by his own rule: and therefore, I must desire him to give us a completer creed, that we may know, what in his sense, is necessary, and enough to make a man a christian.

Nor will it be sufficient, in this case, to do what he tells us he has done, in these words, , “I have briefly set before the reader those evangelical truths, those christian principles, which belong to the very essence of christianity;” — and “I have reduced most of them to certain propositions, which is a thing the vindicator called for,” . With submission, I think he mistakes the vindicator. What I called for, was, not that, “most of them should be reduced to certain propositions,” but that all of them should: and

the reason of my demanding that was plain, viz. that then, having the unmasker's creed in clear and distinct propositions, I might be able to examine whether it was what God in the scriptures indispensably required of every man to make him a christian, that so I might thereby correct the errors or defects of what I at present apprehend the scripture taught me in the case.

The unmasker endeavours to excuse himself from answering my question by another exception against it, , in these words: "Surely none, but this upstart racovian, will have the confidence to deny, that these articles of faith are such as are necessary to constitute a christian, as to the intellectual and doctrinal part of christianity; such as must, in some measure, be known and assented to by him. Not that a man is supposed, every moment, actually to exert his assent and belief; for none of the moral virtues, none of the evangelical graces, are exerted thus always. Wherefore that question," in , "though he says he asks it" (seriously) "might have been spared," "Whether every one of these fundamentals is required to be believed to make a man a christian, and such as, without the actual belief thereof, he cannot be saved?" Here is seriousness pretended where there is none; for the design is only to cavil, and (if he can) to expose my assertion. But he is not able to do it; for all his critical demands are answered in these few words, viz. That the intellectual (as well as moral endowments) are never supposed to be always in act: they are exerted upon occasion, not all of them at a time. And therefore he mistakes, if he thinks, or rather as he objects without thinking, that these doctrines, if they be fundamental and necessary, must be always actually believed. No man, besides himself, ever started such a thing."

This terrible long combat has the unmasker managed with his own shadow, to confound the seriousness of my question; and, as he says himself, is come off, not only safe and sound, but triumphant. But for all that, sir, may not a man's question be serious, though he should chance to express it ill? I think you and I were not best to set up for critics in language, and nicety of expression, for fear we should set the world a laughing. Yet for this once, I shall take the liberty to defend mine here. For I demand in what expression of mine, I said or supposed, that a man should, every moment, actually exert his assent to any proposition required to be believed? Cannot a man say, that the unmasker cannot be admitted to any preferment in the church of England, without an actual assent to, or subscribing of the thirty-nine articles; unless it be supposed, that he must

every moment, from the time he first read, assented to, and subscribed those articles, until he received institution and induction, “actually exert his assent” to every one of them, and repeat his subscription? In the same sense it is literally true, that a man cannot be admitted into the church of Christ, or into heaven, without actually believing all the articles necessary to make a man a christian, without supposing that he must “actually exert that assent every moment,” from the time that he first gave it, until the moment that he is admitted into heaven. He may eat, drink, make bargains, study Euclid, and think of other things between; nay, sometimes sleep, and neither think of those articles, nor any thing else; and yet it be true, that he shall not be admitted into the church, or heaven, without an actual assent to them: that condition of an actual assent, he has performed, and until he recall that assent, by actual unbelief, it stands good: and though a lunacy, or lethargy, should seize on him presently after, and he should never think of it again as long as he lived, yet it is literally true, he is not saved without an actual assent. You might therefore have spared your pains, in saying, “that none of the moral virtues, none of the evangelical graces, are exerted thus always,” until you had met with somebody who said thus. That I did so, I think, would have entered into no body’s thoughts but yours, it being evident from , of my book, that by actual, I meant explicit. You should rather have given a direct answer to my question, which I here again seriously ask you, viz. Whether

IX. THOSE YOU CALLED “FUNDAMENTAL DOCTRINES,” IN YOUR “THOUGHTS CONCERNING THE CAUSES OF ATHEISM,” OR THOSE CHRISTIAN PRINCIPLES, WHICH BELONG TO THE VERY ESSENCE OF CHRISTIANITY,” SO MANY AS YOU HAVE GIVEN US OF THEM IN YOUR “SOCINIANISM UNMASKED,” (FOR YOU MAY TAKE WHICH OF YOUR TWO CREEDS YOU PLEASE,) ARE JUST THOSE, NEITHER MORE OR LESS, THAT ARE EVERY ONE OF THEM REQUIRED TO BE BELIEVED TO MAKE A MAN A CHRISTIAN, AND SUCH AS, WITHOUT THE ACTUAL, OR (SINCE THAT WORD DISPLEASES YOU) THE EXPLICIT BELIEF WHEREOF, HE CANNOT BE SAVED?

When you have answered this question, we shall then see which of us two is nearest the right: but if you shall forbear railing, which, I fear, you take for

arguing, against that summary of faith, which our Saviour and his apostles taught, and which only they proposed to their hearers to be believed, to make them christians, until you have found another perfect creed, of only necessary articles, that you dare own for such; you are like to have a large time of silence. Before I leave the passage above cited, I must desire the reader to take notice of what he says, concerning his list of fundamentals, viz. That “these his articles of faith,” necessary to constitute a christian, are such as must, in some measure, be known and assented to by him: a very wary expression concerning fundamentals! The question is about articles necessary to be explicitly believed to make a man a christian. These, in his list, the unmasker tells us, are “necessary to constitute a christian, and must, in some measure, be known and assented to.” I would now fain know of the reader, Whether he understands thereby, that the masker means, that these his necessary articles must be explicitly believed or not? If he means an explicit knowledge and belief, why does he puzzle his reader, by so improper a way of speaking? For what is as complete and perfect as it ought to be, cannot properly be said to be “in some measure.” If his, “in some measure,” falls short of explicitly knowing and believing his fundamentals, his necessary articles are such as a man may be a christian, without explicitly knowing and believing, i. e. are no fundamentals, no necessary articles at all. Thus men, uncertain what to say, betray themselves by their great caution.

Having pronounced it folly in himself to make up the defects of my short, and therefore so much blamed collection of fundamentals, by a full one of his own, though his attempt shows he would if he could; he goes on thus, , “From what I [the unmasker] have said, it is evident, that the vindicator is grossly mistaken, when he saith, ‘Whatever doctrines the apostles required to be believed to make a man a christian, are to be found in those places of scripture which he has quoted in his book.’ “ And a little lower, “I think I have sufficiently proved, that there are other doctrines besides that, which are required to be believed to make a man a christian.”

Answ. Whatever you have proved, or (as you never fail to do) boast you have proved, will signify nothing, until you have proved one of these propositions; and have shown either,

X. THAT WHAT OUR SAVIOUR AND HIS APOSTLES PREACHED,
AND ADMITTED MEN INTO THE CHURCH FOR BELIEVING, IS

NOT ALL THAT IS ABSOLUTELY REQUIRED TO MAKE A MAN A CHRISTIAN. OR, THAT THE BELIEVING HIM TO BE THE MESSIAH, WAS NOT THE ONLY ARTICLE THEY INSISTED ON, TO THOSE WHO ACKNOWLEDGED ONE GOD; AND, UPON THE BELIEF WHEREOF THEY ADMITTED CONVERTS INTO THE CHURCH, IN ANY ONE OF THOSE MANY PLACES QUOTED BY ME OUT OF THE HISTORY OF THE NEW TESTAMENT.

I say, any one: for though it be evident, throughout the whole gospel, and the Acts, that this was the one doctrine of faith, which, in all their preachings everywhere, they principally drive at: yet, if it were not so, but that in other places they taught other things, that would not prove that those other things were articles of faith, absolutely necessarily required to be believed to make a man a christian, unless it had been so said. Because, if it appears that ever any one was admitted into the church, by our Saviour or his apostles, without having that article explicitly laid before him, and without his explicit assent to it, you must grant, that an explicit assent to that article is not necessary to make a man a christian: unless you will say, that our Saviour and his apostles admitted men into the church that were not qualified with such a faith as was absolutely necessary to make a man a christian; which is as much as to say, that they allowed and pronounced men to be christians, who were not christians. For he that wants what is necessary to make a man a christian, can no more be a christian, than he that wants what is necessary to make him a man, can be a man. For what is necessary to the being of any thing, is essential to its being; and any thing may be as well without its essence, as without any thing that is necessary to its being: and so a man be a man, without being a man; and a christian a christian, without being a christian; and an unmasker may prove this, without proving it. You may, therefore, set up, by your unquestionable authority, what articles you please, as necessary to be believed to make a man a christian: if our Saviour and his apostles admitted converts into the church, without preaching those your articles to them, or requiring an explicit assent to what they did not preach and explicitly lay down, I shall prefer their authority to yours, and think it was rather by them, than by you, that God promulgated the law of faith, and manifested what that faith was, upon which he would receive penitent converts.

And though, by his apostles, our Saviour taught a great many other truths, for the explaining this fundamental article of the law of faith, that Jesus is the Messiah; some whereof have a nearer, and some a more remote connexion with it, and so cannot be denied by any christian, who sees that connexion, or knows they are so taught: yet an explicit belief of any one of them, is no more necessarily required to make a man a christian, than an explicit belief of all those truths, which have a connexion with the being of a God, or are revealed by him, is necessarily required to make a man not to be an atheist: though none of them can be denied by any one who sees that connexion, or acknowledges that revelation, without his being an atheist. All these truths, taught us from God, either by reason or revelation, are of great use, to enlighten our minds, confirm our faith, stir up our affections, &c. And the more we see of them, the more we shall see, admire, and magnify the wisdom, goodness, mercy, and love of God, in the work of our redemption. This will oblige us to search and study the scripture, wherein it is contained and laid open to us.

All that we find in the revelation of the “New Testament,” being the declared will and mind of our Lord and Master, the Messiah, whom we have taken to be our king, we are bound to receive as right and truth, or else we are not his subjects, we do not believe him to be the Messiah, our King, but cast him off, and with the jews say, “We will not have this man reign over us.” But it is still what we find in the scripture, not in this or that system; what we, sincerely seeking to know the will of our Lord, discover to be his mind. Where it is spoken plainly, we cannot miss it; and it is evident he requires our assent: where there is obscurity, either in the expressions themselves, or by reason of the seeming contrariety of other passages, there a fair endeavour, as much as our circumstances will permit, secures us from a guilty disobedience of his will, or a sinful error in faith, which way soever our inquiry resolves the doubt, or perhaps leaves it unresolved. If he had required more of us in those points, he would have declared his will plainer to us, and discovered the truth contained in those obscure, or seemingly contradictory places, as clearly, and as uniformly as he did that fundamental article, that we were to believe him to be the Messiah, our King.

As men, we have God for our King, and are under the law of reason: as christians, we have Jesus the Messiah for our King, and are under the law revealed by him in the gospel. And though every christian, both as a deist

and a christian, be obliged to study both the law of nature and the revealed law, that in them he may know the will of God, and of Jesus Christ, whom he hath sent; yet, in neither of these laws, is there to be found a select set of fundamentals, distinct from the rest, which are to make him a deist, or a christian. But he that believes one eternal, invisible God, his Lord and King, ceases thereby to be an atheist; and he that believes Jesus to be the Messiah, his king, ordained by God, thereby becomes a christian, is delivered from the power of darkness, and is translated into the kingdom of the Son of God; is actually within the covenant of grace, and has that faith, which shall be imputed to him for righteousness; and, if he continues in his allegiance to this his King, shall receive the reward, eternal life.

He that considers this, will not be so hot as the unmasker, to contend for a number of fundamental articles, all necessary, every one of them, to be explicitly believed by every one for salvation, without knowing them himself, or being able to enumerate them to another. Can there be any thing more absurd than to say, there are several fundamental articles, each of which every man must explicitly believe, upon pain of damnation, and yet not be able to say, which they be? The unmasker has set down no small number; but yet dares not say, these are all. On the contrary, he has plainly confessed there are more; but will not, i. e. cannot tell what they are, that remain behind; nay, has given a general description of his fundamental articles, by which it is not evident, but there may be ten times as many as those he had named; and amongst them (if he durst, or could name them) probably several that many a good christian, who died in the faith, and is now in heaven, never once thought of; and others, which many, of as good authority as he, would, from their different systems, certainly deny and contradict.

This, as great an absurdity as it is, cannot be otherwise, whilst men will take upon them to alter the terms of the gospel; and when it is evident, that our Saviour and his apostles received men into the church, and pronounced them believers, for taking him to be the Messiah, their King and deliverer, sent by God, have a boldness to say, “this is not enough.” But, when you would know of them, what then is enough, they cannot tell you: the reason whereof is visible, viz. because they being able to produce no other reason for their collection of fundamental articles, to prove them necessary to be believed, but because they are of divine authority, and contained in the holy scriptures; and are, as the unmasker says, “writ there on purpose to be

believed;" they know not where to stop, when they have once begun: those texts that they leave out, or from which they deduce none of their fundamentals, being of the same divine authority, and so upon that account equally fundamental with what they culled out, though not so well suited to their particular systems.

Hence come those endless and unreasonable contentions about fundamentals, whilst each censures the defect, redundancy, or falsehood of what others require, as necessary to be believed: and yet he himself gives not a catalogue of his own fundamentals, which he will say is sufficient and complete. Nor is it to be wondered; since, in this way, it is impossible to stop short of putting every proposition, divinely revealed, into the list of fundamentals; all of them being of divine, and so of equal authority; and, upon that account, equally necessary to be believed by every one that is a christian, though they are not all necessary to be believed, to make any one a christian. For the New Testament containing the laws of the Messiah's kingdom, in regard of all the actions, both of mind and body, of all his subjects; every christian is bound, by his allegiance to him, to believe all that he says in it to be true; as well as to assent, that all he commands in it is just and good: and what negligence, perverseness, or guilt there is, in his mistaking in the one, or failing in his obedience to the other, that this righteous judge of all men, who cannot be deceived, will at the last day lay open, and reward accordingly.

It is no wonder, therefore, there have been such fierce contests, and such cruel havock made amongst christians about fundamentals; whilst every one would set up his system, upon pain of fire and faggot in this, and hellfire in the other world. Though, at the same time, whilst he is exercising the utmost barbarities against others, to prove himself a true christian, he professes himself so ignorant, that he cannot tell, or so uncharitable, that he will not tell, what articles are absolutely necessary and sufficient to make a man a christian. If there be any such fundamentals, as it is certain there are, it is as certain they must be very plain. Why then does every one urge and make a stir about fundamentals, and no body give a list of them? but because (as I have said) upon the usual grounds, they cannot: for I will be bold to say, that every one who considers the matter, will see, that either only the article of his being the Messiah their King, which alone our Saviour and his apostles preached to the unconverted world, and received those that believed it into the church, is the only necessary article to be

believed by an atheist, to make him a christian; or else, that all the truths contained in the New Testament, are necessary articles to be believed to make a man a christian: and that between these two, it is impossible anywhere to stand; the reason whereof is plain. Because, either the believing Jesus to be the Messiah, i. e. the taking him to be our King, makes us subjects and denizens of his kingdom, that is, christians: or else an explicit knowledge of, and actual obedience to the laws of his kingdom, is what is required to make us subjects; which, I think, it was never said of any other kingdom. For a man must be a subject before he is bound to obey.

Let us suppose it will be said here, that an obedience to the laws of Christ's kingdom, is what is necessary to make us subjects of it, without which we cannot be admitted into it, i. e. be christians: and, if so, this obedience must be universal; I mean, it must be the same sort of obedience to all the laws of this kingdom: which, since no body says is in any one such as is wholly free from error, or frailty, this obedience can only lie in a sincere disposition and purpose of mind, to obey every one of the laws of the Messiah, delivered in the New Testament, to the utmost of our power. Now, believing right being one part of that obedience, as well as acting right is the other part, the obedience of assent must be implicitly to all that is delivered there, that it is true. But for as much as the particular acts of an explicit assent cannot go any farther than his understanding, who is to assent; what he understands to be truth, delivered by our Saviour, or the apostles commissioned by him, and assisted by his Spirit, that he must necessarily believe: it becomes a fundamental article to him, and he cannot refuse his assent to it, without renouncing his allegiance. For he that denies any of the doctrines that Christ has delivered, to be true, denies him to be sent from God, and consequently to be the Messiah; and so ceases to be a christian. From whence it is evident, that if any more be necessary to be believed to make a man a christian, than the believing Jesus to be the Messiah, and thereby taking him for our King, it cannot be any set bundle of fundamentals, culled out of the scripture, with an omission of the rest, according as best suits any one's fancy, system, or interest: but it must be an explicit belief of all those propositions, which he, according to the best of his understanding, really apprehends to be contained and meant in the scripture; and an implicit belief of all the rest, which he is ready to believe, as soon as it shall please God, upon his use of the means, to enlighten him, and make them clear to his understanding. So that in effect, almost every

particular man in this sense has, or may have, a distinct catalogue of fundamentals, each whereof it is necessary for him explicitly to believe, now that he is a christian; whereof if he should disbelieve or deny any one, he would cast off his allegiance, disfranchise himself, and be no longer a subject of Christ's kingdom. But, in this sense, no body can tell what is fundamental to another, what is necessary for another man to believe. This catalogue of fundamentals, every one alone can make for himself: no body can fix it for him; no body can collect or prescribe it to another: but this is, according as God has dealt to every one the measure of light and faith; and has opened each man's understanding, that he may understand the scriptures. Whoever has used what means he is capable of, for the informing of himself, with a readiness to believe and obey what shall be taught and prescribed by Jesus, his Lord and King, is a true and faithful subject of Christ's kingdom; and cannot be thought to fail in any thing necessary to salvation.

Supposing a man and his wife, barely by seeing the wonderful things that Moses did, should have been persuaded to put themselves under his government; or by reading his law, and liking it; or by any other motive, had been prevailed on sincerely to take him for their ruler and law-giver; and accordingly (renouncing their former idolatry and heathenish pollutions) in token thereof had, by baptism and circumcision, the initiating ceremonies, solemnly entered themselves into that communion, under the law of Moses; had they not, thereby, been made denizens of the commonwealth of Israel, and invested with all the privileges and prerogatives of true children of Abraham, leaving to their posterity a right to their share in the promised land, though they had died before they had performed any other act of obedience to that law; nay, though they had not known whose son Moses was, nor how he had delivered the children of Israel out of Egypt, nor whither he was leading them? I do not say, it is likely they should be so far ignorant. But, whether they were or no, it was enough that they took him for their prince and ruler, with a purpose to obey him, to submit themselves entirely to his commands and conduct; and did nothing afterwards, whereby they disowned or rejected his authority over them. In that respect, none of his laws were greater or more necessary to be submitted to, one than another, though the matter of one might be of much greater consequence than of another. But a disobedience to any law of the least consequence, if it carry with it a disowning of the authority that made

it, forfeits all, and cuts off such an offender from that commonwealth, and all the privileges of it.

This is the case, in respect of other matters of faith, to those who believe Jesus to be the Messiah, and take him to be their King, sent from God, and so are already christians. It is not the opinion, that any one may have of the weightiness of the matter, (if they are, without their own fault, ignorant that our Saviour hath revealed it,) that shall disfranchise them, and make them forfeit their interest in his kingdom: they may still be good subjects, though they do not believe a great many things, which creed-makers may think necessary to be believed. That which is required of them is a sincere endeavour to know his mind, declared in the gospel, and an explicit belief of all that they understand to be so. Not to believe what he has revealed, whether in a lighter, or more weighty matter, calls his veracity into question, destroys his mission, denies his authority, and is a flat disowning him to be the Messiah, and so overturns that fundamental and necessary article whereby a man is a christian. But this cannot be done by a man's ignorance or unwilful mistake of any of the truths published by our Saviour himself, or his authorized and inspired ministers, in the New Testament. Whilst a man knows not that it was his will or meaning, his allegiance is safe, though he believe the contrary.

If this were not so, it is impossible that any one should be a christian. For in some things we are ignorant, and err all, not knowing the scriptures. For the holy inspired writings, being all of the same divine authority, must all equally in every article be fundamental, and necessary to be believed; if that be a reason, that makes any one proposition in it necessary to be believed. But the law of faith, the covenant of the gospel, being a covenant of grace, and not of natural right, or debt; nothing can be absolutely necessary to be believed, but what, by this new law of faith, God of his good pleasure hath made to be so. And this, it is plain, by the preaching of our Saviour and his apostles, to all that believed not already in him, was only the believing the only true God, and Jesus to be the Messiah, whom he hath sent. The performance of this puts a man within the covenant, and is that, which God will impute to him for righteousness. All the other acts of assent to other truths, taught by our Saviour, and his apostles, are not what make a man a christian; but are necessary acts of obedience to be performed by one, who is a christian; and therefore, being a christian, ought to live by the laws of Christ's kingdom.

Nor are we without some glimpse of light, why it hath pleased God of his grace, that the believing Jesus to be the Messiah should be that faith which he would impute to men for righteousness. It is evident from scripture, that our Saviour despised the shame and endured the cross for the joy set before him; which joy, it is also plain, was a kingdom. But, in this kingdom, which his Father had appointed to him, he could have none but voluntary subjects; such as leaving the kingdom of darkness, and of the prince of this world, with all the pleasures, pomps, and vanities thereof would put themselves under his dominion, and translate themselves into his kingdom; which they did, by believing and owning him to be the Messiah their King, and thereby taking him to rule over them. For the faith for which God justifieth, is not an empty speculation, but a faith joined with repentance, and working by love. And for this, which was, in effect, to return to God himself, and to their natural allegiance due to him, and to advance as much as lay in them, the glory of the kingdom, which he had promised his Son; God was pleased to declare, he would accept them, receive them to grace, and blot out all their former transgressions.

This is evidently the covenant of grace, as delivered in the scriptures: and if this be not, I desire any one to tell me what it is, and what are the terms of it. It is a law of faith, whereby God has promised to forgive all our sins, upon our repentance and believing something; and to impute that faith to us for righteousness. Now I ask, what it is by the law of faith, we are required to believe? For until that be known, the law of faith is not distinctly known; nor the terms of the covenant upon which the all-merciful God graciously offers us salvation. And, if any one will say, this is not known, nay, is not easily and certainly to be known under the gospel, I desire him to tell me, what the greatest enemies of christianity can say worse against it? For a way proposed to salvation, that does not certainly lead thither, or is proposed, so as not to be known, are very little different as to their consequence; and mankind would be left to wander in darkness and uncertainty, with the one as well as the other.

I do not write this for controversy's sake; for had I minded victory, I would not have given the unmasker this new matter of exception. I know whatever is said, he must be bawling for his fashionable and profitable orthodoxy, and cry out against this too, which I have here added, as socinianism; and cast that name upon all that differs from what is held by those he would recommend his zeal to in writing. I call it bawling, for

whether what he has said be reasoning, I shall refer to those of his own brotherhood, if he be of any brotherhood, and there be any that will join with him in his set of fundamentals, when his creed is made.

Had I minded nothing but how to deal with him, I had tied him up short to his list of fundamentals, without affording him topics of declaiming, against what I have here said. But I have enlarged on this point, for the sake of such readers, who, with the love of truth, read books of this kind, and endeavour to inform themselves in the things of their everlasting concernment: it being of greater consideration with me to give any light and satisfaction to one single person, who is really concerned to understand, and be convinced of the religion he professes, than what a thousand fashionable, or titular professors of any sort of orthodoxy shall say, or think of me, for not doing as they do; i. e. for not saying after others, without understanding what is said, or upon what grounds, or caring to understand it.

Let us now consider his argument, to prove the articles he has given us to be fundamentals. In his “Thoughts concerning the causes of atheism,” , he argues from 1 Tim. iii. 16, where he says “Christianity is called a mystery; that all things in christianity are not plain, and exactly level to every common apprehension; and that every thing in christianity is not clear, and intelligible and comprehensible by the weakest noddle.” Let us take this for proved as much as he pleases; and then let us see the force of this subtile disputant’s argument, for the necessity there is, that every christian man should believe those, which he has given us for fundamental articles, out of the epistles. The reason of that obligation, and the necessity of every man’s and woman’s believing in them, he has laid in this, that they are to be found in the epistles, or in the bible. This argument for them we have, over and over again, in his “Socinianism unmasked,” as here, , thus: “Are they set down to no purpose, in these inspired epistles? Why did the apostles write these doctrines, was it not, that those they writ to, might give their assent to them?” . “They are in our bibles, for that very purpose, to be believed,” . Now I ask, Can any one more directly invalidate all he says here, for the necessity of believing his articles? Can any one more apparently write booty, than by saying, that “these his doctrines, these his fundamental articles” (which are, after his fashion, set down between the 8th and 20th pages of this his first chapter) are of necessity to be believed by every one, before he can be a christian, because they are in the epistles and in the bible; and yet affirm, that in christianity, i. e. in the epistles and in the bible, there

are mysteries, there are things “not plain, not clear, not intelligible to common apprehensions?” If his articles, some of which contain mysteries, are necessary to be believed to make a man a christian, because they are in the bible; then, according to this rule, it is necessary for many men to believe what is not intelligible to them; what their noddles cannot apprehend, (as the unmasker is pleased to turn the supposition of vulgar people’s understanding the fundamentals of their religion into ridicule,) i. e. it is necessary for many men to do, what is impossible for them to do, before they can be christians. But if there be several things in the bible, and in the epistles, that are not necessary for men to believe, to make them christians: then all the unmasker’s arguments, upon their being in the epistles, are no proofs, that all his articles are necessary to be believed to make a man a christian, because they are set down in the epistles; much less, because he thinks they may be drawn, according to his system, out of what is set down in the epistles. Let him, therefore, either confess these and the like questions, “Why did the apostles write these? Was it not, that those they write to, might give their assent to them? Why should not every one of these evangelical truths be believed and embraced? They are in our bibles, for that very purpose;” and the like; to be impertinent and ridiculous. Let him cease to propose them with so much ostentation, for they can serve only to mislead unwary readers: or let him unsay what he has said, of things “not plain to common apprehensions, not clear and intelligible.” Let him recant what he has said of mysteries in christianity. For I ask with him, , “where can we be informed, but in the sacred and inspired writings?” It is ridiculous to urge, that any thing is necessary to be explicitly believed, to make a man a christian, because it is writ in the epistles, and in the bible; unless he confess that there is no mystery, nothing not plain, or unintelligible to vulgar understandings, in the epistles, or in the bible.

This is so evident, that the unmasker himself, who, , of his “Thoughts concerning the Causes of Atheism,” thought it ridiculous to suppose, that the vulgar should understand christianity, is here of another mind: and, , says of his evangelical doctrines and articles, necessary to be assented to, that they are intelligible and plain; there is no “ambiguity and doubtfulness in them; they shine with their own light, and to an unprejudiced eye are plain, evident, and illustrious.”

To draw the unmasker out of the clouds, and prevent his hiding himself in the doubtfulness of his expressions, I shall desire him to say directly,

whether the articles, which are necessary to be believed, to make a man a christian, and particularly those he has set down for such, are all plain and intelligible, and such as may be understood and comprehended (I will not say in the unmasker's ridiculous way, by the weakest noddles, but) by every illiterate country man and woman, capable of church-communion?

If he says, Yes; then all mysteries are excluded out of his articles necessary to be believed to make a man a christian. For that which can be comprehended by every day-labourer, every poor spinster, that is a member of the church, cannot be a mystery. And, if what such illiterate people cannot understand be required to be believed, to make them christians, the greatest part of mankind are shut out from being christians.

But the unmasker has provided an answer, in these words, , "There is" says he, "a difficulty in the doctrine of the trinity, and several truths of the gospel, as to the exact manner of the things themselves, which we shall never be able to comprehend, at least on this side of heaven: but there is no difficulty as to the reality and certainty of them, because we know they are revealed to us by God in the holy scriptures."

Which answer of "difficulty in the manner," and "no difficulty in the reality," having the appearance of a distinction, looks like learning; but when it comes to be applied to the case in hand, will scarce afford us sense.

The question is about a proposition to be believed, which must first necessarily be understood. For a man cannot possibly give his assent to any affirmation or negation, unless he understand the terms as they are joined in that proposition, and has a conception of the thing affirmed or denied, and also a conception of the thing, concerning which it is affirmed or denied, as they are there put together. But let the proposition be what it will, there is no more to be understood than is expressed in the terms of that proposition. If it be a proposition concerning a matter of fact, it is enough to conceive, and believe the matter of fact. If it be a proposition concerning the manner of the fact, the manner of the fact must also be believed, as it is intelligibly expressed in that proposition; v. g. should this proposition νεκροὶ ἐγείρονται be offered as an article of faith, to an illiterate countryman of England, he could not believe it: because, though a true proposition, yet it being proposed in words, whose meaning he understood not, he could not give any assent to it. Put it into English, he understands what is meant by the "dead shall rise." For he can conceive, that the same man, who was dead and senseless, should be alive again; as well as he can, that the same man,

who is now in a lethargy, should awake again; or the same man that is now out of his sight, and he knows not whether he be alive or dead, should return and be with him again; and so he is capable of believing it, though he conceives nothing of the manner, how a man revives, wakes or moves. But none of these manners of those actions being included in those propositions, the proposition concerning the matter of fact (if it imply no contradiction in it) may be believed; and so all that is required may be done, whatever difficulty may be, as to the exact manner, how it is brought about.

But where the proposition is about the manner, the belief too must be of the manner, v. g. the article is, “The dead shall be raised with spiritual bodies:” and then the belief must be as well of this manner of the fact, as of the fact itself. So that what is said here, by the unmasker, about the manner, signifies nothing at all in the case. What is understood to be expressed in each proposition, whether it be of the manner, or not of the manner, is (by its being a revelation from God) to be believed, as far as it is understood: but no more is required to be believed concerning any article, than is contained in that article.

What the unmasker, for the removing of difficulties, adds farther, in these words, “But there is no difficulty as to the reality and certainty of the truths of the gospel; because we know, they are revealed to us by God in the holy scripture;” is yet farther from signifying any thing to the purpose, than the former. The question is about understanding, and in what sense they are understood; not believing several propositions, or articles of faith, which are to be found in the scripture. To this the unmasker says, there can be “no difficulty at all as to their reality and certainty; because they are revealed by God.” Which amounts to no more but this, that there is no difficulty at all in the understanding and believing this proposition, “that whatever is revealed by God, is really and certainly true.” But is the understanding and believing this single proposition, the understanding and believing all the articles of faith necessary to be believed? Is this all the explicit faith a christian need have? If so, then a christian need explicitly believe no more, but this one proposition, viz. That all the propositions between the two covers of his bible, are certainly true. But I imagine the unmasker will not think the believing this one proposition, is a sufficient belief of all those fundamental articles, which he has given us, as necessary to be believed to make a man a christian. For, if that will serve the turn, I conclude he may make his set of fundamentals as large and express to his system as he pleases: calvinists,

arminians, anabaptists, socinians, will all thus own the belief of them, viz. that all that God has revealed in the scripture, is really and certainly true.

But if believing this proposition, that all that is revealed by God in the scripture is true, be not all the faith which the unmasker requires, what he says about the reality and certainty of all truths revealed by God, removes nothing of the difficulty. A proposition of divine authority is found in the scripture: it is agreed presently between him and me, that it contains a real, certain truth: but the difficulty is, what is the truth it contains, to which he and I must assent; v. g. the profession of faith made by the eunuch, in these words, “Jesus Christ is the son of God,” upon which he was admitted into the church, as a christian, I believe, contains a “real and certain truth.” Is that enough? No, says the unmasker, , it “includes in it, that Christ was God;” and therefore it is not enough for me to believe; that these words contain a real certain truth: but I must believe, they contain this truth, that Jesus Christ is God; that the eunuch spoke them in that sense, and in that sense I must assent to them: whereas they appear to me to be spoken, and meant here, as well as in several other places of the “New Testament,” in this sense, viz. “That Jesus Christ is the Messiah,” and in that sense, in this place, I assent to them. The meaning then of these words, as spoken by the eunuch, is the difficulty: and I desire the unmasker, by the application of what he has said here, to remove that difficulty. For granting all revelation from God to be really and certainly true, (as certainly it is,) how does the believing that general truth remove any difficulty about the sense and interpretation of any particular proposition, found in any passage of the holy scriptures? Or is it possible for any man to understand it in one sense, and believe it in another; because it is a divine revelation, that has reality and certainty in it? Thus much, as to what the unmasker says of the fundamentals, he has given us, , viz. That “no true lover of God and truth need doubt of any of them: for there is no ambiguity and doubtfulness in them.” If the distinction he has used, “of difficulty as to the exact manner, and no difficulty as to the reality and certainty of gospeltruths,” will remove all ambiguity and doubtfulness from all those texts of scripture, from whence he and others deduce fundamental articles, so that they will be “plain and intelligible” to every man, in the sense he understands them; he has done great service to christianity.

But he seems to distrust that himself, in the following words: “They shine,” says he, “with their own light, and to an unprejudiced eye, are plain,

evident, and illustrious; and they would always continue so, if some ill-minded men did not perplex and entangle them." I see the matter would go very smooth, if the unmasker might be the sole, authentic interpreter of scripture. He is wisely of that judge's mind, who was against hearing the counsel on the other side, because they always perplexed the cause.

But if those who differ from the unmasker, shall in their turns call him the "prejudiced and ill-minded man," who perplexes these matters (as they may, with as much authority as he), we are but where we were; each must understand for himself, the best he can, until the unmasker be received, as the only unprejudiced man, to whose dictates every one, without examination, is with an implicit faith to submit.

Here again, , the unmasker puts upon me, what I never said: and therefore I must desire him to show, where it is, that I pretend,

XI. THAT THIS "PROPOSITION," THAT JESUS IS THE MESSIAH, "IS MORE INTELLIGIBLE, THAN ANY OF THOSE HE HAS NAMED."

In his "Thoughts concerning the causes of atheism," , he argues, that this proposition [Jesus is the Messiah] has more difficulty in it, than the article of the holy Trinity. And his proofs are worthy of an unmasker. "For," says he, "here is an Hebrew word first to be explained;" or, (as he has this strong argument again, "Socinianism unmasked," .) "Here first the name Jesus, which is of Hebrew extraction, though since grecized, must be expounded."

Ans. Jesus being a proper name, only denoting a certain person, needs not to be expounded, of what extraction soever it be. Is this proposition, Jonathan, was the son of Saul, king of Israel, any thing the harder, because the three proper names in it, Jonathan, Saul, and Israel, are of Hebrew extraction? And is it not as easy, and as "level to the understanding of the vulgar," as this, Arthur was the son of Henry, king of England; though neither of these names be of Hebrew extraction? Or cannot any vulgar capacity understand this proposition, John Edwards writ a book, intituled, "Socinianism unmasked;" until the name of John, which is of Hebrew extraction, be explained to him? If this be so, parents were best beware, how hereafter they give their children scripture-names, if they cannot understand what they say to one another about them, until these names of Hebrew extraction are expounded to them; and every proposition, that is in writings and contracts, made concerning persons, that have names of

Hebrew extraction, become thereby as hard to be understood, as the doctrine of the holy trinity.

His next argument is just of the same size. The word *Messias* must, he says, be explained too. Of what extraction soever it be, there needs no more explication of it, than what our English bible gives of it, where it is plain to any vulgar capacity, that it was used to denote that King and Deliverer, whom God had promised. So that this proposition, “*Jesus is the Messiah,*” has no more difficulty in it than this, *Jesus is the promised King and Deliverer*; or than this, *Cyrus was king and deliverer of Persia*; which, I think, requires not much depth of Hebrew to be understood. He that understood this proposition, and took *Cyrus* for his king, was a subject, and a member of his kingdom; and he that understands the other, and takes *Jesus* to be his king, is his subject, and a member of his kingdom. But if this be as hard as it is to some men, to understand the doctrine of the trinity, I fear many of the kings in the world have but few true subjects. To believe *Jesus* to be the *Messiah*, is (as he has been told, over and over again) to take him for our King and Ruler, promised, and sent by God. This is that which will make any one from a jew, or heathen, to be a christian. In this sense it is very intelligible to vulgar capacities. Those who so understand and believe it, are so far from “pronouncing these words as a spell,” (as the unmasker ridiculously suggests,) that they thereby become christians.

But what if I tell the unmasker, that there is one Mr. Edwards, who (when he speaks his mind without considering how it will make for, or against him) in another place, thinks this proposition, “*Jesus is the Messiah,*” very easy and intelligible? To convince him of it, I shall desire him to turn to the 74th page of his “*Socinianism unmasked,*” where he will find that Mr. Edwards, without any great search into Hebrew extractions, interprets “*Jesus the Messiah,*” to signify this, “*That Jesus of Nazareth was that eminent and extraordinary person prophesied of long before, and that he was sent and commissioned by God:*” which, I think, is no very hard proposition to be understood. But it is no strange thing, that that which was very easy to an unmasker in one place, should be terribly hard in another, where want of something better requires to have it so.

Another argument that he uses to prove the articles he has given us to be necessary to salvation, , is, because they are doctrines which contain things, that in their nature have an “immediate respect to the occasion, author, way,

end, means, and issue of men's redemption and salvation." And here I desire him to prove,

XII. THAT EVERY ONE OF HIS ARTICLES CONTAINS THINGS SO IMMEDIATELY RELATING TO THE "OCCASION, AUTHOR, WAY, MEANS, AND ISSUE OF OUR REDEMPTION AND SALVATION, THAT NO-BODY CAN BE SAVED, WITHOUT UNDERSTANDING THE TEXTS FROM WHENCE HE DRAWS THEM, IN THE VERY SAME SENSE THAT HE DOES; AND EXPLICITLY BELIEVING ALL THESE PROPOSITIONS THAT HE HAS DEDUCED, AND ALL THAT HE WILL DEDUCE FROM SCRIPTURE, WHEN HE SHALL PLEASE TO COMPLETE HIS CREED."

Page 23, he says of his fundamentals, "Not without good reason, therefore, I called them essential and integral parts of our christian and evangelical faith: and why the Vindicator fleers at these terms, I know no reason, but that he cannot confute the application of them."

Answ. One would think by the word, Therefore, which he uses here, that in the preceding paragraph, he had produced some reason to justify his ridiculous use of those terms, in his "Thoughts concerning atheism," . But nothing therein will be found tending to it. Indeed, the foregoing paragraph begins with these words, "Thus I have briefly set before the reader those evangelical truths, those christian principles, which belong to the very essence of christianity." Amongst these, there is the word Essence: but that from thence, or any thing else in that paragraph, the unmasked could, with good sense, or any sense at all, infer, as he does, "not without good reason, therefore I called them the essential and integral parts of our christian and evangelical faith;" requires an extraordinary sort of logic to make out. What, I beseech you, is your good reason too, here, upon which you infer, "Therefore," &c.? For it is impossible for any one, but an unmasker, to find one word, justifying his use of the terms essential and integral. But it would be a great restraint to the running of the unmasker's pen, if you should not allow him the free use of illative particles, where there are no premises to support them: and if you should not take affirmations without proof, for reasoning, you at once strike off above three quarters of his book; and he will often, for several pages together, have nothing to say. As for example, from to .

But to show that I did not, without reason, say, his use of the terms essential and integral, in the place before quoted, was ridiculous; I must mind my reader, that, of his “Thoughts concerning the causes of atheism,” he having said that “the epistolary writings are fraught with other fundamentals, besides that one which I mention;” and then having set them down, he closes his catalogue of them thus: “These are matters of faith contained in the epistles, and they are essential and integral parts of the gospel itself,” . Now what could be more ridiculous, than, where the question is about fundamental doctrines, which are essentials of the christian religion, without an assent to which a man cannot be a christian; and so he himself calls them, , of his “Socinianism unmasked;” that he should close the list he had made of fundamental doctrines, i. e. essential points of the christian religion, with telling his reader, “These are essential and integral parts of the gospel itself?” i. e. These, which I have given you for fundamental, for essential doctrines of the gospel, are the fundamental and not fundamental, essential and not essential, parts of the gospel mixed together. For integral parts, in all the writers I have met with, besides the unmasker, are contradistinguished to essential; and signify such parts as the thing can be without, but without them will not be so complete and entire as with them. Just such an acuteness, as our unmasker, would any one show, who taking upon him to set down the parts essential to a man, without the having of which he could not be a man, should name the soul, the head, the heart, lungs, stomach, liver, spleen, eyes, ears, tongue, arms, legs, hair, and nails; and, to make all sure, should conclude with these words; “These are parts contained” in a man, “and are essential and integral parts of a man himself;” i. e. they are parts, without some of which he cannot be a man; and others, which though they make the man entire, yet he may be a man without them; as a man ceases not to be a man, though he wants a nail, a finger, or an arm, which are integral parts of a man: “Risum teneatis!” If the unmasker can make any better sense of his “essential and integral parts of the gospel itself,” I will ask his pardon for my laughing: until then he must not be angry, if the reader and I laugh too. Besides, I must tell him, that those, which he has set down, are not the “integral parts of the christian faith,” any more than the head, the trunk, and the arms, hands, and thighs, are the integral parts of a man: for a man is not entire without the legs and feet too. They are some of the integral parts indeed; but cannot be called the integral parts, where any, that go to make up the whole man, are left out;

nor those the integral, but some of the integral parts of the christian faith, out of which any of the doctrines, proposed in the “New Testament,” are omitted: for whatever is there proposed, is proposed to be believed, and so is a part of the christian faith.

Before I leave his catalogue of the “essential and integral parts” of the gospel, which he has given us, instead of one, containing the articles necessary to be believed to make a man a christian, I must take notice of what he says, whilst he is making it, : “Why then is there a treatise published, to tell the world, that the bare belief of a Messiah, is all that is required of a christian?” As if there were no difference between believing a Messiah, and believing Jesus to be the Messiah; no difference between “required of a christian,” and required to make a man a christian. As if you should say, renouncing his former idolatry, and being circumcised and baptized into Moses, was all that was required to make a man an israelite; therefore it was all that was required of an israelite. For these two falsehoods has he, in this one short sentence, thought fit slily to father upon me, the “humble imitator of the jesuits,” as he is pleased to call me. And, therefore, I must desire him to show,

XIII. WHERE THE “WORLD IS TOLD, IN THE TREATISE THAT I PUBLISHED, THAT THE BARE BELIEF OF A MESSIAH IS ALL THAT IS REQUIRED OF A CHRISTIAN.”

The six next pages, i. e. from the twenty-eighth to the end of his second chapter, being taken up with nothing but pulpit oratory, out of its place; and without any reply, applied, or applicable to any thing I have said, in my Vindication; I shall pass by, until he shows any thing in them that is so.

In page 36, this giant in argument falls on me, and mauls me unmercifully, about the epistles. He begins thus: “The gentleman is not without his evasions, and he sees it is high time to make use of them. This puts him in some disorder. For, when he comes to speak of my mentioning his ill treatment of the epistles, — you may observe, that he begins to grow warmer than before. Now this meek man is nettled, and one may perceive he is sensible of the scandal that he hath given to good people, by his slighting the epistolary writings of the holy apostles; yet he is so cunning as to disguise his passion as well as he can.” Let all this impertinent and inconsistent stuff be so. I am angry and cannot disguise it, I am cunning and

would disguise it, but yet, the quick-sighted unmasker has found me out, that I am nettled. What does all this notable prologue of “hictius doctius,” of a cunning man, and in effect “no cunning man, in disorder, warmed, nettled, in a passion,” tend to? but to show, that these following words of mine, , of my Vindication, viz. “I require you to publish to the world those passages which show my contempt of the epistles,” are so full of heat and disorder, that they need no other answer: “But what need I, good sir, do this, when you have done it yourself?” A reply I own, very soft; and whether I may not say, very silly, let the reader judge. The unmasker having accused me of contemning the epistles, my reply, in my Vindication, *ibid.* was thus: “Sir, when your angry fit is over, and the abatement of your passion has given way to the return of your sincerity, I shall beg you to read this passage in the 154th page of my book: These holy writers (*viz.* the penmen of the epistles) inspired from above, writ nothing but truth; and in most places very weighty truths to us now; for the expounding, clearing and confirming of the christian doctrine, and establishing those in it, who had embraced it.” And again, , “The other parts [*i. e.* besides the gospels and the Acts] of divine revelation are objects of faith, and are so to be received; they are truths, of which none that is once known to be such, *i. e.* revealed, may, or ought to be disbelieved. And if this does not satisfy you, that I have as high a veneration for the epistles as you, or any one can have, I require you to publish to the world those passages which show my contempt of them.” After such direct words of mine, expressing my veneration for that part of divine revelation, which is contained in the epistles, any one, but an unmasker, would blush to charge me with contempt of them; without alleging, when summoned to it, any word in my book to justify that charge.

If hardness of forehead were strength of brains, it were two to one of his side against any man I ever yet heard of. I require him to publish to the world, those passages, that show my contempt of the epistles; and he answers me, “He need not do it, for I have done it myself.” Whoever had common sense, would understand, that what I demanded was, that he should show the world where, amongst all I had published, there were any passages that expressed contempt of the epistles: for it was not expected he should quote passages of mine, that I had never published. And this acute unmasker (to this) says, I had published them myself. So that the reason why he cannot find them, is, because I had published them myself. But, says he, “I appeal to the reader, whether (after your tedious collection out of

the four evangelists) your passing by the epistles, and neglecting wholly what the apostles say in them;" be not publishing to the "world your contempt of them?" I demand of him to publish to the world those passages, which show my contempt of the epistles: and he answers, "He need not, I have done it myself." How does that appear? I have passed by the epistles, says he. My passing them by then, are passages published against the epistles? For "publishing of passages" is what you said, you "need not do," and what "I had done." So that the passages I have published containing a contempt of the epistles, are extant in my saying nothing of them? Surely this same passing by has done some very shrewd displeasure to our poor unmasker, that he so starts whenever it is but named, and cannot think it contains less than exclusion, defiance, and contempt. Here therefore the proposition remaining to be proved by you, is,

XIV. "THAT ONE CANNOT PASS BY ANY THING, WITHOUT CONTEMPT OF IT."

And when you have proved it, I shall then ask you, what will become of all those parts of scripture, all those chapters and verses, that you have passed by, in your collection of fundamental articles? Those that you have vouchsafed to set down, you tell us, "are in the bible, on purpose to be believed." What must become of all the rest, which you have omitted? Are they there not to be believed? And must the reader understand your passing them by, to be a publishing to the world your contempt of them? If so, you have unmasked yourself: If not, but you may pass by some parts of scripture, nay, whole epistles, as you have those of St. James and St. Jude, without contempt; why may not I, without contempt, pass by others; but because you have a liberty to do what you will, and I must do but what you, in your good pleasure, will allow me? But if I ask you, whence you have this privilege above others; you will have nothing to say, except it be, according to your usual skill in divining, that you know my heart, and the thoughts that are in it, which you find not like yours, right orthodox, and good; but always evil and perverse, such as I dare not own? but hypocritically either say nothing of or declare against: but yet, with all my cunning, I cannot hide them from you; your all-knowing penetration always finds them out: you know them, or you guess at them, as is best for your turn, and that is as good: and then presently I am confounded. I doubt,

whether the world has ever had any two-eyed man your equal, for penetration and a quick sight. The telling by the spectator's looks, what card he guesses, is nothing to what you can do. You take the height of an author's parts, by numbering the pages of his book; you can spy an heresy in him, by his saying not a syllable of it; distinguish him from the orthodox, by his understanding places of scripture, just as several of the orthodox do; you can repeat by heart whole leaves of what is in his mind to say, before he speaks a word of it; you can discover designs before they are hatched, and all the intrigues of carrying them on, by those who never thought of them. All this and more you can do, by the spirit of orthodoxy; or, which is as certain, by your own good spirit of invention informing you. Is not this to be an errant conjurer?

But to your reply. You say, "After my tedious collection out of the four evangelists, my passing by the epistles, and neglecting wholly what the apostles say," &c. I wondered at first why you mentioned not the Acts here, as well as the four evangelists: for I have not, as you have in other places observed, been sparing of collections out of the Acts too. But there was, it seems, a necessity here for your omitting it: for that would have stood too near what followed, in these words; and "neglecting wholly what the apostles say." For if it appeared to the reader, out of your own confession, that I allowed and built upon the divine authority of what the apostles say in the Acts, he could not so easily be misled into an opinion, that I contemned what they say in their epistles. But this is but a slight touch of your leger-de-main.

And now I ask the reader, what he will think of a minister of the gospel, who cannot bear the texts of scripture I have produced, nor my quotations out of the four evangelists? This, which in his "Thoughts of the causes of atheism," was want of "vivacity and elevation of mind," want of "a vein of sense and reason, yea, and of elocution too;" is here, in his "Socinianism unmasked," a "tedious collection out of the four evangelists." Those places I have quoted lie heavy, it seems, upon his stomach, and are too many to be got off. But it was my business not to omit one of them, that the reader might have a full view of the whole tenour of the preaching of our Saviour and his apostles, to the unconverted jews and gentiles; and might therein see, what faith they were converted to, and upon their assent to which, they were pronounced believers, and admitted into the christian church. But the unmasker complains, there are too many of them: he thinks the gospel, the

good news of salvation, tedious from the mouth of our Saviour and his apostles: he is of opinion, that before the epistles were writ, and without believing precisely what he thinks fit to cull out of them, there could be no christians; and if we had nothing but the four evangelists, we could not be saved. And yet it is plain, that every single one of the four contains the gospel of Jesus Christ; and, at least, they altogether contain all that is necessary to salvation. If any one doubt of this, I refer him to Mr. Chillingworth for satisfaction, who hath abundantly proved it.

His following words (were he not the same unmasker all through) would be beyond parallel: “But let us hear why the vindicator did not attempt to collect any articles out of these writings; he assigns this as one reason: “The epistles being writ to those who were already believers, it could not be supposed that they were writ to them, to teach them fundamentals,” , Vindic. “Certainly no man would have conjectured, that he would have used such an evasion as this. I will say that for him, he goes beyond all surmises, he is above all conjectures, he hath a faculty which no creature on earth can ever fathom.” Thus far the unmasker, in his oratorical strain. In what follows, he comes to his closer reasoning, against what I have said. His words are, “do we not know, that the four gospels were writ to, and for believers, as well as unbelievers?” Answ. I grant it. Now let us see your inference; therefore what these holy historians recorded, that our Saviour and his apostles said and preached to unbelievers, was said and preached to believers. The discourse which our Saviour had with the woman of Samaria, and her townsmen, was addressed to believers; because St. John writ his gospel (wherein it is recorded as a part of our Saviour’s history) for believers, as well as unbelievers. St. Peter’s preaching to Cornelius, and St. Paul’s preaching at Antioch, at Thessalonica, at Corinth, &c. was not to unbelievers, for their conversion: because St. Luke dedicates his history of the Acts of the apostles to Theophilus, who was a christian, as the unmasker strenuously proves in this paragraph. Just as if he should say, that the discourses, which Cæsar records he had upon several occasions with the Gauls, were not addressed to the Gauls alone, but to the Romans also; because his commentaries were writ for the Romans, as well as others; or that the sayings of the ancient Greeks and Romans in Plutarch, were not spoken by them to their contemporaries only, because they are recorded by him for the benefit of posterity.

I perused the preachings of our Saviour and his apostles to the unconverted world, to see what they taught and required to be believed, to make men christians: and all these I set down, and leave the world to judge what they contained. The epistles, which were all written to those who had embraced the faith and were all christians already, I thought would not so distinctly show, what were those doctrines which were absolutely necessary to make men christians; they being not writ to convert unbelievers, but to build up those who were already believers, in their most holy faith. This is plainly expressed in the epistle to the Hebrews, chap. v. 11, &c. “Of whom (i. e. Christ) we have many things to say, and hard to be uttered, seeing ye are all dull of hearing. For when for the time ye ought to be teachers, ye have need that one teach you again, which be the first principles of the oracles of God; and are become such as have need of milk, and not of strong meat. For every one that useth milk is unskilful in the word of righteousness; for he is a babe: but strong meat belongeth to him that is full of age, even those who by reason of use have their senses exercised, to discern both good and bad. Therefore leaving the principles of the doctrine of Christ, let us go on unto perfection, not laying again the foundation of repentance from dead works, and of faith towards God, and of the doctrine of baptism, and of laying on of hands, and of the resurrection of the dead, and of eternal judgment.” Here the apostle shows, what was his design in writing this epistle, not to teach them the fundamental doctrines of the christian religion, but to lead them on to more perfection; that is, to greater degrees of knowledge, of the wise design, and wonderful contrivance, and carrying on of the gospel, and the evidence of it; which he makes out in this epistle, by showing its correspondence with the Old Testament, and particularly with the œconomy of the mosaical constitution. Here I might ask the unmasker, Whether those many things which St. Paul tells the Hebrews, he had to say of Christ, (hard to be uttered to them, because they were dull of hearing,) had not an “immediate respect to the occasion, author, way, means, or issue of their redemption and salvation?” And therefore, “whether they were such things, without the knowledge of which they could not be saved?” as the unmasker says of such things, . And the like I might ask him, concerning those things which the apostle tells the Corinthians, 1 epist. chap. iii. 2, that they “were not able to bear.” For much to the same purpose he speaks to the Corinthians, epist. 1. chap. iii. as in the above-cited places he did to the Hebrews: “That he, as a wise master-

builder, had laid the foundation:" and that foundation he himself tells us, is, "Jesus the Messiah;" and that there is no other foundation to be laid. And that in this he laid the foundation of christianity at Corinth, St. Luke records, Acts xviii. 4, in these words, "Paul, at Corinth, reasoned in the synagogue every sabbath-day, and testified to the jews, that Jesus was the Messiah." Upon which foundation, he tells them, there might be a superstructure. But that, what is built on the foundation, is not the foundation, I think I need not prove. He further tells them, that he had desired to build upon this foundation; but withal says, he had fed them until then "with milk, and not with meat; because they were babes, and had not been able to bear it, neither were they yet able." And therefore this epistle, we see, is almost wholly spent in reproofs of their miscarriages, and in exhortations and instructions relating to practice; and very little said in it, for the explaining any part of the great mystery of salvation, contained in the gospel.

By these passages we may see (were it not evident to common sense itself, from the nature of things) that the design of these epistles was not to lay the foundations, or teach the principles of the christian religion; they being writ to those who received them, and were christians already. The same holds in all the other epistles; and therefore the epistles seemed not to me the properest parts of scripture to give us that foundation, distinct from all the superstructures built on it; because in the epistles, the latter was the thing proposed, rather than the former. For the main intention of the apostles, in writing their epistles, could not be to do what was done already; to lay down barely the foundations of christianity, to those who were christians already: but to build upon it some farther explication of it, which either their particular circumstances, or a general evidencing of the truth, wisdom, excellencies, and privileges, &c. of the gospel required. This was the reason that persuaded me to take the articles of faith, absolutely necessary to be received to make a man a christian, only from the preachings of our Saviour and his apostles to the unconverted world, as laid down in the historical part of the New Testament: and I thought it a good reason, it being past doubt, that they in their preachings proposed to the unconverted, all that was necessary to be believed, to make them christians; and also, that that faith, upon a profession whereof any one was admitted into the church, as a believer, had all that was necessary in it to make him a christian; because, if it wanted any thing necessary, he had necessarily not

been admitted: unless we can suppose, that any one was admitted into the christian church by our Saviour and his apostles, who was not yet a christian; or pronounced a believer, who yet wanted something necessary to make him a believer, i. e. was a believer and not a believer, at the same time. But what those articles were which had been preached to those, to whom the epistles were writ, and upon the belief whereof they had been admitted into the christian church, and became as they are called “believers, saints, faithful, elect,” &c. could not be collected out of the epistles. This, though it were my reason, and must be a reason to every one, who would make this inquiry; and the unmasker quotes the place where I told him it was my reason; yet he, according to his nevererring illumination, flatly tells me, , that it was not; and adds, “Here then is want of sincerity,” &c. I must desire him, therefore, to prove what he says, , viz.

XV. THAT, “BY THE SAME ARGUMENT, THAT I WOULD PERSUADE, THAT THE FUNDAMENTALS ARE NOT TO BE SOUGHT FOR IN THE EPISTLES, HE CAN PROVE THAT THEY ARE NOT TO BE SOUGHT FOR IN THE GOSPELS AND IN THE ACTS; BECAUSE EVEN THESE WERE WRIT TO THOSE THAT BELIEVED.”

And next I desire him to prove, what he also says in the same page, viz.

XVI. THAT “THE EPISTLES BEING WRIT TO THOSE THAT BELIEVED, WAS NOT AN ARGUMENT THAT I DID MAKE USE OF.”

He tells us, , that it is the argument whereby I would persuade: and in the very same page, a few lines lower, says, “That it is not the argument I did make use of.” Who, but an errant unmasker, would contradict himself so flatly in the same breath? And yet, upon that, he raises a complaint of my “want of sincerity.”

For “want of sincerity” in one of us, we need not go far for an instance. The next paragraph, — 40, affords us a gross one of it: wherein the unmasker argues strongly, not against any thing I had said, but against an untruth of his own setting up. Towards the latter end of the paragraph, , he has these words: “It is manifest, that the apostles in their epistles; taught fundamentals: which is contrary to what this gentleman says, that such a thing could not be supposed.” And therefore the unmasker has taken a great deal of pains to show, that there are fundamental doctrines to be found in

the epistles; as if I had denied it. And to lead the reader into an opinion that I had said so, he set down these words, “could not be supposed;” as if they were my words. And so they are, but not to that purpose. And therefore he did well not to quote the page, lest the reader, by barely turning to the place, should have a clear sight of falsehood, instead of that sincerity, which he would make the reader believe is wanting in me. My words, , of “The reasonableness of christianity,” are, nor can it be supposed, that the sending of such fundamentals was the reason of the apostles writing to any of them.” And a little lower: “The epistles therefore being all written to those that were already believers and christians, the occasion and end of writing them could not be, to instruct them in that which was necessary to make them christians.” The thing then, that I denied, was not, that there were any fundamentals in the epistles. For in the next page I have these express words; “I do not deny, but the great doctrines of the christian faith are dropt here and there, and scattered up and down in most of them.” And therefore he might have spared his endeavours, in the next paragraph, to prove, that there may be fundamentals found in the epistles, until he finds somebody that denies it. And here again, I must repeat my usual question, that with this sincere writer is so often necessary, viz.

XVII. WHERE IT IS THAT I SAY, “THAT IT CANNOT BE SUPPOSED, THAT THERE ARE FUNDAMENTAL ARTICLES IN THE EPISTLES?”

If he hopes to shift it off by the word Taught, which seems fallaciously put in; as if he meant, that there were some fundamental articles taught, necessary to be believed to make them christians, in the epistles, which those whom they were writ to, knew not before: in this sense I do deny it: and then this will be the

XVIIIITH: PROPOSITION REMAINING UPON HIM TO PROVE, VIZ.

“THAT THERE ARE FUNDAMENTAL ARTICLES NECESSARY TO BE BELIEVED TO MAKE A MAN A CHRISTIAN TAUGHT IN THE EPISTLES, WHICH THOSE, WHOM THEY WERE WRIT TO, KNEW NOT BEFORE.”

The former part of his next paragraph, , runs thus: “Hear another feigned ground of his omitting the epistles, viz. because the fundamental articles are here promiscuously, and without distinction, mixed with other truths,” .

“But who sees not, that this is a mere elusion? For on the same account he might have forborn to search for fundamental articles in the gospels; for they do not lie there together, but are dispersed up and down. The doctrinal and historical parts are mixed with one another, but he pretends to sever them. Why then did he not make a separation between the doctrines in the epistles, and those other matters that are treated of there? He has nothing to reply to this, and therefore we must again look upon what he has suggested, as a cast of his shuffling faculty.”

The argument contained in these words is this: A man cannot well distinguish fundamental from non-fundamental doctrines in the epistles, where they are promiscuously mixed with non-fundamental doctrines: therefore he cannot well distinguish fundamental doctrines from others in the gospels, and the Acts, where they are mixed with matters of fact. As if he should say, one cannot well distinguish a bachelor of divinity from other divines, where several of them stand together promiscuously in the same habit; therefore one cannot distinguish a bachelor of divinity from a Billingsgate orator, where they stand together in their distinct habits: or that it is as easy to distinguish fine gold from that of a little lower alloy, where several pieces of each are mixed together; as it is to distinguish pieces of fine gold from pieces of silver, which they are mixed amongst.

But it seems, the unmasker thinks it as easy to distinguish between fundamental and not fundamental doctrines, in a writing of the same author, where they are promiscuously mixt together, as it is to distinguish between a fundamental doctrine of faith, and a relation of a matter of fact, where they are intermixedly reported in the same history. When he has proved this, the unmasker will have more reason to tax me with elusion, shuffling, and feigning, in the reason I gave for not collecting fundamentals out of the epistles. Until then, all that noise must stand amongst those ridiculous airs of triumph and victory which he so often gives himself, without the least advantage to his cause, or edification of his reader, though he should a thousand times say, “That I have nothing to reply.”

In the latter part of his paragraph, he says, “That necessary truths, fundamental principles, may be distinguished from those that are not such, in the epistolary writings, by the nature and importance of them, by their immediate respect to the author and the means of our salvation.” Answ. If this be so, I desire him to give me a definitive collection of fundamentals out of the Epistles, as I have given one out of the Gospels and the Acts. If

he cannot do that, it is plain, he hath here given a distinguishing mark of fundamentals, by which he himself cannot distinguish them. But yet I am the shuffler.

The argument in the next paragraph, , is this:

“Necessary doctrines of faith, such as God absolutely demands to be believed for justification, may be distinguished from rules of holy living, with which they are mixed in the epistles: therefore doctrines of faith necessary, and not necessary to be believed to make a man a christian, may be distinguished, as they stand mixed in the epistles.” Which is as good sense as to say, lambs and kids may easily be distinguished in the same pen, where they are together, by their different natures: therefore the lambs I absolutely demand of you, as necessary to satisfy me, may be distinguished from others in the same pen, where they are mixed without any distinction. Doctrines of faith, and precepts of practice, are as distinguishable as doing and believing; and those as easily discernible one from another, as thinking and walking: but doctrinal propositions, all of them of divine revelation, are of the same authority, and of the same species, in respect of the necessity of believing them; and will be eternally undistinguishable into necessary, and not necessary to be believed, until there be some other way found to distinguish them, than that they are in a book, which is all of divine revelation. Though therefore doctrines of faith and rules of practice are very distinguishable in the epistles, yet it does not follow from thence, that fundamental and not fundamental doctrines, points necessary and not necessary to be believed to make men christians, are easily distinguishable in the epistles. Which, therefore, remains to be proved: and it remains incumbent upon him,

XVIII. “TO SET DOWN THE MARKS, WHEREBY THE DOCTRINES,
DELIVERED IN THE EPISTLES, MAY EASILY AND EXACTLY BE
DISTINGUISHED INTO FUNDAMENTAL, AND NOT
FUNDAMENTAL ARTICLES OF FAITH.”

All the rest of that paragraph containing nothing against me, must be bound up with a great deal of the like stuff, which the unmasker has put into his book, to show the world he does not “imitate me in impertinencies, incoherences, and trifling excursions,” as he boasts in his first paragraph. Only I shall desire the reader to take the whole passage concerning this

matter, as it stands in my “Reasonableness of christianity,” . “I do not deny but the great doctrines of the christian faith are dropt here and there, and scattered up and down in most of them. But it is not in the epistles we are to learn what are the fundamental articles of faith, where they are promiscuously, and without distinction, mixed with other truths and discourses, which were (though for edification indeed, yet) only occasional. We shall find and discern those great and necessary points best, in the preaching of our Saviour and his apostles, to those who were yet strangers and ignorant of the faith, to bring them in and convert them to it.” And then let him read these words, which the unmasker has quoted out of them: “It is not in the epistles that we are to learn what are the fundamental articles of faith; they were written for the resolving of doubts, and reforming of mistakes;” with his introduction of them in these words: “he commands the reader not to stir a jot further than the Acts.” If I should ask him where that command appears, he must have recourse to his old shift, that he did not mean as he said, or else stand convicted of a malicious untruth. An orator is not bound to speak strict truth, though a disputant be. But this unmasker’s writing against me will excuse him from being of the latter: and then why may not falsehoods pass for rhetorical flourishes, in one who has been used to popular haranguing; to which men are not generally so severe, as strictly to examine them, and expect that they should always be found to contain nothing but precise truth and strict reasoning? But yet I must not forget to put upon his score this other proposition of his, which he has, , and ask him to show,

XIX. “WHERE IT IS THAT I COMMAND MY READER NOT TO STIR
A JOT FARTHER THAN THE ACTS?”

In the next two paragraphs, — 46, the unmasker is at his natural play, of declaiming without proving. It is pity the Mishna, out of which he takes his good breeding, as it told him, that “a well-bred and well-taught man answers to the first, in the first place,” had not given him this rule too, about order, viz. That proving should go before condemning; else all the fierce exaggerations ill language can heap up, are but empty scurrility. But it is no wonder that the jewish doctors should not provide rules for a christian divine, turned unmasker. For where a cause is to be maintained, and a book to be writ, and arguments are not at hand, yet something must be found to

fill it; railing in such cases is much easier than reasoning, especially where a man's parts lie that way.

The first of these paragraphs, , he begins thus: "But let us hear further what this vindicator saith to excuse his rejection of the doctrines contained in the epistles, and his putting us off with one article of faith." And then he quotes these following words of mine: "What if the author designed his treatise, as the title shows, chiefly for those who were not yet thoroughly and firmly christians: purposing to work those, who either wholly disbelieved, or doubted of the truth of the christian religion?"

Ans. This, as he has put it, is a downright falsehood. For the words he quotes were not used by me, "to excuse my rejection of the doctrines contained in the epistles," or to prove there was but one article; but as a reason why I omitted the mention of satisfaction.

To demonstrate this, I shall set down the whole passage, as it is, , 164, of my Vindication, where it runs thus:

"But what will become of me that I have not mentioned satisfaction?"

"Possibly this reverend gentleman would have had charity enough for a known writer of the brotherhood, to have found it by an innuendo in those words above quoted, of laying down his life for another. But every thing is to be strained here the other way. For the author of the "Reasonableness of christianity, &c." is of necessity to be represented as a socinian; or else his book may be read, and the truths in it, which Mr. Edwards likes not, be received; and people put upon examining. Thus one, as full of happy conjectures and suspicions as this gentleman, might be apt to argue. But what if the author designed his treatise, as the title shows, chiefly for those who were not yet thoroughly or firmly christians; proposing to work on those, who either wholly disbelieved, or doubted of the truth of the christian religion?"

To this he tells me, , that my "title says nothing for me," i. e. shows not that I designed my book for those that disbelieved, or doubted of the christian religion.

Answ. I thought that a title that professed the reasonableness of any doctrine, showed it was intended for those that were not fully satisfied of the reasonableness of it; unless books are to be writ to convince those of any thing, who are convinced already. But possibly this may be the unmasker's way: and if one should judge by his manner of treating this subject, with declamation instead of argument, one would think that he

meant it for nobody but those who were of his mind already. I thought therefore, “the Reasonableness of Christianity, as delivered in the Scripture,” a proper title to signify whom it was chiefly meant for: and, I thank God, I can with satisfaction say, it has not wanted its effect upon some of them. But the unmasker proves for all that, that I could not design it chiefly for disbelievers or doubters of the christian religion. “For, says, he, , how those that wholly disregard and disbelieve the scriptures of the New Testament, as gentiles, jews, mahometans, and atheists do,” (I crave leave to put in theists, instead of atheists, for a reason presently to be mentioned) “are like to attend to the Reasonableness of Christianity, as delivered in the Scripture, is not to be conceived: and therefore we look upon this as all mere sham and sophistry.” Answ. Though the unmasker teaches good breeding out of the Mishna, yet I thought he had been a minister of the gospel, and had taught christianity out of the scripture. Why! good sir, would you teach jews and mahometans christianity out of the talmud and alcoran; because they are the books that at present they attend to, and believe? Or would you, laying by the authority of all books, preach religion to infidels, in your own name, and by your own authority, laying aside the scripture? “Is it not to be conceived,” no not by a christian divine, that the way to make unbelievers christians, is to show them the reasonableness of the religion contained in the scriptures? But it seems the unmasker has a peculiar way of preaching and propagating christianity without the scripture; as some men have a peculiar way of disputing without reason.

In the beginning of this paragraph, , the unmasker, that is always a fair interpreter of my meaning, and never fails to know it better than I do, tells me, That by those that wholly disbelieve, “I must mean atheists, turks, jews, and pagans; and by those that are not firmly christians, a few weak christians.” But did our unmasker never hear of unbelievers, under a denomination distinct from that of atheists, turks, jews, and pagans? Whilst the pulpit and the press have so often had up the name of theists or deists, has that name wholly escaped him? It was these I chiefly designed, and I believe, nobody of all that read my Vindication, but the unmasker, mistook me, if he did. But, there at least, , he might have found the name, as of a sort of unbelievers not unknown amongst us. But, whatever he thought, it was convenient, and a sort of prudence in him (when he would persuade others that I had not a design, which I say I had) to lessen as much as he could, and

cover the need of any such design; and so make it, that I could not intend my book to work upon those that disbelieved, or did not firmly believe; by insinuating, there were few or none such amongst us. Hence he says, that by those that are not thoroughly and firmly christians, “I mean a few weak christians;” as well, as under those who wholly disbelieve, he left the theist out of my meaning. I am very glad to hear from the unmasker, that there are but few weak christians, few that have doubts about the truth of christianity amongst us. But if there be not a great number of deists, and that the preventing their increase be not worth every true christian’s care and endeavours, those who have been so loud against them, have been much to blame; and I wish to God there were no reason for their complaints. For these, therefore, I take the liberty to say, as I did before, that I chiefly designed my book; and shall not be ashamed of this sophistry, as you call it, if it can be sophistry to allege a matter of fact that I know; until you have arguments to convince me, that you know my intention in publishing it, better than I do myself. And I shall think it still no blameable prudence, however you exclaim against prudence, (as perhaps you have some reason,) that “I mentioned only those advantages, that all christians are agreed in; and that I observed that command of the apostle, Rom. xiv. 1, “Him that is weak in the faith receive ye, but not to doubtful disputations;” without being a socinian. I think I did not amiss, that I offered to the belief of those that stood off, that, and only that, which our Saviour and his apostles preached for the reducing the unconverted world. And would any one think, he in earnest went about to persuade men to be christians, who should use that as an argument to recommend the gospel, which he has observed men to lay hold on as an objection against it? To urge such points of controversy as necessary articles of faith, when we see our Saviour and the apostles urged them not as necessary to be believed to make men christians, is (by our own authority) to add prejudices to prejudices, and to block up our own way to those men, whom we would have access to and prevail upon.”

I have repeated this again out of the 164th page of my Vindication, where there is more to the same purpose; that the reader may see how fully the unmasker has answered it.

Because, I said “Would any one blame my prudence, if I mentioned only those advantages which all christians are agreed in?” the unmasker adds, , “socinian christians:” and then, as if the naming of that had gained him his point, he goes on victoriously thus: “He has bethought himself better, since

he first published his notions, and (as the result of that) he now begins to resolve what he writ into prudence. I know whence he had this method, (and it is likely he has taken more than this from the same hands,) viz. from the missionary jesuits, that went to preach the gospel to the people of China. We are told, that they instructed them in some matters relating to our Saviour; they let them know that Jesus was the Messias, the person promised to be sent into the world: but they concealed his sufferings and death, and they would not let them know any thing of his passion and crucifixion. So our author (their humble imitator) undertakes to instruct the world in christianity, with an omission of its principal articles; and more especially that of the advantage we have by Christ's death, which was the prime thing designed in his coming into the world. This he calls prudence: so that to hide from the people the main articles of the christian religion, to disguise the faith of the gospel, to betray christianity itself, is, according to this excellent writer, the cardinal virtue of prudence. May we be delivered then, say I, from a prudential racovian." And there ends the rattling for this time; not to be outdone by any piece of clock-work in the town. When he is once set a going, he runs on like an alarum, always in the same strain of noisy, empty declamation, (wherein every thing is supposed, and nothing proved,) till his own weight has brought him to the ground: and then, being wound up with some new topic, takes another run, whether it makes for or against him, it matters not; he has laid about him with ill language, let it light where it will, and the vindicator is paid off.

That I may keep the due distance in our different ways of writing, I shall show the reader, that I say not this at random; but that the place affords me occasion to say so. He begins this paragraph with these words, , "Let us hear farther, what this vindicator says to excuse his rejection of the doctrines contained in the epistles." This rejection of the doctrines contained in the epistles, was the not mentioning the satisfaction of Christ, amongst those advantages I showed that the world received by his coming. This appears by the words he here quotes, as my excuse for that omission. In which place I also produced some passages in my book, which sounded like it, some words of scripture, that are used to prove it; but this will not content him: I am for all that, a "betrayers of christianity, and contemner of the epistles." Why? because I did not, out of them, make satisfaction. If you will have the truth of it, sir, there is not any such word in any one of the epistles, or other books of the New Testament, in my bible, as satisfying, or

satisfaction made by our Saviour; and so I could not put it into my “Christianity as delivered in the Scripture.” If mine be not a true bible, I desire you to furnish me with one that is more orthodox; or, if the translators have “hid that main article of the christian religion,” they are the “betrayers of christianity, and contemnners of the epistles,” who did not put it there; and not I who did not take a word from thence, which they did not put there. For truly I am not a maker of creeds; nor dare add either to the scripture, or to the fundamental articles of the christian religion.

But you will say, satisfaction, though not named in the epistles, yet may plainly be collected out of them. Answ. And so it may out of several places in my “Reasonableness of christianity,” some whereof, which I took out of the gospels, I mentioned in my vindication, , 164, and others of them, which I took out of the epistles, I shall point out to you now: as , I say, the design of our Saviour’s coming was to be offered up; and , I speak of the work of our redemption: words, which in the epistles, are taken to imply satisfaction. And therefore if that be enough, I see not, but I may be free from betraying christianity; but if it be necessary to name the word Satisfaction, and he that does not so is a betrayer of christianity, you will do well to consider, how you will acquit the holy apostles from that bold imputation; which if it be extended as far as it will go, will scarce come short of blasphemy: for I do not remember, that our Saviour has any-where named satisfaction, or implied it plainer in any words, than those I have quoted from him; and he, I hope, will escape the intemperance of your tongue.

You tell me, I had my “prudence from the missionary jesuits in China, who concealed our Saviour’s sufferings and death, because I undertake to instruct the world in christianity, with an omission of its principal articles.” And I pray, sir, from whom did you learn your prudence, when, taking upon you to teach the fundamental doctrines of christianity, in your “Thoughts concerning the causes of atheism,” you left out several, that you have been pleased since to add in your “Socinianism unmasked?” Or, if I, as you say here, betray christianity by this omission of this principal article; what do you, who are a professed teacher of it, if you omit any principal article, which your prudence is so wary in, that you will not say you have given us all that are necessary to salvation, in that list you have last published? I pray, who acts best the jesuit, (whose humble imitator, you say, I am,) you or I? when, pretending to give a catalogue of fundamentals, you have not

reduced them to direct propositions, but have left some of them indefinite, to be collected as every one pleases: and instead of telling us it is a perfect catalogue of fundamentals, plainly shuffle it off, and tell me, , “If that will not content me, you are sure you can do nothing that will: if I require more, it is folly in you to comply with me?” One part of what you here say, I own to you, savours not much of the skill of a jesuit. You confess your inability, and I believe it to be perfectly true: that if what you have done already (which is nothing at all) “will not content me,” you are sure “you can do nothing that will content me,” or any reasonable man that shall demand of you a complete catalogue of fundamentals. But you make it up pretty well, with a confidence becoming one of that order. For he must have rubbed his forehead hard, who in the same treatise, where he so severely condemns the imperfection of my list of fundamentals, confesses that he cannot give a complete catalogue of his own.

You publish to the world in this 44th, and the next page, that, “I hide from the people the main articles of the christian religion; I disguise the faith of the gospel, betray christianity itself, and imitate the jesuits that went to preach the gospel to the people of China, by my omission of its principal or main articles.”

Answ. I know not how I disguise the faith of the gospel, &c. in imitation of the jesuits in China; unless taking men off from the inventions of men, and recommending to them the reading and study of the holy scripture, to find what the gospel is, and requires, be “a disguising the faith of the gospel, a betraying of christianity, and imitating the jesuits.” Besides, sir, if one may ask you, In what school did you learn that prudent wariness and reserve, which so eminently appears, , of your “Socinianism unmasked,” in these words: “These articles” (meaning those which you had before enumerated as fundamental articles) “of faith, are such as must in some measure be known and assented to by a christian, such as must generally be received and embraced by him?” You will do well the next time, to set down, how far your fundamentals must be known, assented to, and received; to avoid the suspicion, that there is a little more of jesuitism in these expressions, “in some measure known and assented to, and generally received and embraced;” than what becomes a sincere protestant preacher of the gospel. For your speaking so doubtfully of knowing and assenting to those, which you give us for fundamental doctrines, which belong (as you say) to the very essence of christianity, will hardly escape being imputed to

your want of knowledge, or want of sincerity. And indeed, the word “general,” is in familiar use with you, and stands you in good stead, when you would say something, you know not what; as I shall have occasion to remark to you, when I come to your 91st page.

Further, I do not remember where it was, that I mentioned or undertook to set down all the “principal or main articles of christianity.” To change the terms of the question, from articles necessary to be believed to make a man a christian, into principal or main articles, looks a little jesuitical. But to pass by that: the apostles, when they “went to preach the gospel to people,” as much strangers to it as the Chinese were, when the Europeans came first amongst them, “Did they hide from the people the main articles of the christian religion, disguise the faith of the gospel, and betray christianity itself?” If they did not, I am sure I have not: for I have not omitted any of the main articles, which they preached to the unbelieving world. Those I have set down, with so much care, not to omit any of them, that you blame me for it more than once, and call it tedious. However you are pleased to acquit or condemn the apostles in the case, by your supreme determination, I am very indifferent. If you think fit to condemn them for “disguising or betraying the christian religion,” because they said no more of satisfaction, than I have done, in their preaching at first, to their unbelieving auditors, jews or heathens, to make them, as I think, christians, (for that I am now speaking of,) I shall not be sorry to be found in their company, under what censure soever. If you are pleased graciously to take off this your censure from them, for this omission, I shall claim a share in the same indulgence.

But to come to what, perhaps, you will think yourself a little more concerned not to censure, and what the apostles did so long since; for you have given instances of being very apt to make bold with the dead: pray tell me, does the church of England admit people into the church of Christ at hap-hazard? Or without proposing and requiring a profession of all that is necessary to be believed to make a man a christian? If she does not, I desire you to turn to the baptism of those of riper years in our liturgy: where the priest, asking the convert particularly, whether he believes the apostles creed, which he repeats to him; upon his profession that he does, and that he desires to be baptized into that faith, without one word of any other articles, baptizes him; and then declares him a christian in these words: “We receive this person into the congregation of Christ’s flock, and sign him with the sign of the cross, in token that he shall not be ashamed — to continue

Christ's faithful soldier and servant." In all this there is not one word of satisfaction, no more than in my book, nor so much neither. And here I ask you, Whether for this omission you will pronounce that the church of England disguises the faith of the gospel? However you think fit to treat me, yet methinks you should not let yourself loose so freely against our first reformers and the fathers of our church ever since, as to call them "Betrayers of christianity itself;" because they think not so much necessary to be believed to make a man a christian, as you are pleased to put down in your articles; but omit, as well as I, your "main article of satisfaction."

Having thus notably harangued upon the occasion of my saying, "Would any one blame my prudence?" and thereby make me a "socinian, a jesuit, and a betrayer of christianity itself," he has in that answered all that such a miscreant as I do, or can say; and so passes by all the reasons I gave for what I did; without any other notice or answer, but only denying a matter of fact, which I only can know, and he cannot, viz. my design in printing my "Reasonableness of christianity."

In the next paragraph, , in answer to the words of St. Paul, Rom. xiv. 1, "Him that is weak in the faith receive ye, but not to doubtful disputations;" which I brought as a reason why I mentioned not satisfaction amongst the benefits received by the coming of our Saviour; because, as I tell him in my Vindication, , "my reasonableness of christianity," as the title shows, "was designed chiefly for those who were not yet thoroughly or firmly christians." He replies, and I desire him to prove it,

XX. "THAT I PRETEND A DESIGN OF MY BOOK, WHICH WAS
NEVER SO MUCH AS THOUGHT OF, UNTIL I WAS SOLICITED BY
MY BRETHREN TO VINDICATE IT."

All the rest in this paragraph, being either nothing to this place of the Romans, or what I have answered elsewhere, needs no farther answer.

The next two paragraphs, — 49, are meant for an answer to something I had said concerning the apostles creed, upon the occasion of his charging my book with socinianism. They begin thus:

This "author of the new christianity" [Answ. This new christianity is as old as the preaching of our Saviour and his apostles, and a little older than the unmasker's system] "wisely objects, that the apostles creed hath none of those articles which I mention," , &c. Answ. If that author wisely objects,

the unmasker would have done well to have replied wisely. But for a man wisely to reply, it is in the first place requisite that the objection be truly and fairly set down in its full force, and not represented short, and as will best serve the answerer's turn to reply to. This is neither wise nor honest: and this first part of a wise reply the unmasker has failed in. This will appear from my words, and the occasion of them. The unmasker had accused my book of socinianism, for omitting some points, which he urged as necessary articles of faith. To which I answered, That he had done so only, "to give it an ill name, not because it was socinian; for he had no more reason to charge it with socinianism, for the omissions he mentions, than the apostles creed." These are my words, which he should have either set down out of , which he quotes, or at least given the objection, as I put it, if he had meant to have cleared it by a fair answer. But he, instead thereof, contents himself that "I object that the apostles creed hath none of those articles and doctrines which the unmasker mentioned." Answ. This at best is but a part of my objection, and not to the purpose which I there meant, without the rest joined to it; which it has pleased the unmasker, according to his laudable way, to conceal. My objection, therefore, stands thus:

That the same articles, for the omission whereof the unmasker charges my book with socinianism, being also omitted in the apostles creed, he has no more reason to charge my book with socinianism, for the omissions mentioned, than he hath to charge the apostles creed with socinianism.

To this objection of mine, let us now see how he answers, .

"Nor does any considerate man wonder at it," [i. e. that the apostles creed had none of those articles and doctrines which he had mentioned,] "for the creed is a form of outward profession, which is chiefly to be made in the public assemblies, when prayers are put up in the church, and the holy scriptures are read: then this abridgment of faith is properly used, or when there is not time or opportunity to make any enlargement. But we are not to think it expressly contains in it all the necessary and weighty points, all the important doctrines of belief; it being only designed to be an abstract."

Answ. Another indispensable requisite in a wise reply is, that it should be pertinent. Now what can there be more impertinent, than to confess the matter of fact upon which the objection is grounded; but instead of destroying the inference drawn from that matter of fact, only amuse the reader with wrong reasons, why that matter of fact was so?

No considerate man, he says, doth wonder, that the articles and doctrines he mentioned, are omitted in the apostles creed: because “that creed is a form of outward profession.” Answ. A profession! of what, I beseech you? Is it a form to be used for form’s sake? I thought it had been a profession of something, even of the christian faith: and if it be so, any considerate man may wonder necessary articles of the christian faith should be left out of it. For how it can be an outward profession of the christian faith, without containing the christian faith, I do not see; unless a man can outwardly profess the christian faith in words, that do not contain or express it, i. e. profess the christian faith, when he does not profess it. But he says, “It is a profession chiefly to be made use of in assemblies.” Answ. Do those solemn assemblies privilege it from containing the necessary articles of the christian religion? This proves not that it does not, or was not designed to contain all the articles necessary to be believed to make a man a christian; unless the unmasker can prove that a “form of outward profession” of the christian faith, that contains all such necessary articles, cannot be made use of, in the public assemblies. “In the public assemblies,” says he, “when prayers are put up by the church, and the holy scriptures are read, then this abridgment of faith is properly used; or when there is not generally time or opportunity to make an enlargement.” Answ. But that which contains not what is absolutely necessary to be believed to make a man a christian, can no-where be properly used as a form of outward profession of the christian faith, and least of all, in the solemn public assemblies. All the sense I can make of this is, that this abridgment of the christian faith, i. e. imperfect collection (as the unmasker will have it) of some of the fundamental articles of christianity in the apostles creed, which omits the greatest part of them, is made use of as a form of outward profession of but part of the christian faith in the public assemblies; when, by reason of reading of the scripture and prayers, there is not time or opportunity for a full and perfect profession of it.

It is strange the christian church should not find time nor opportunity, in sixteen hundred years, to make, in any of her public assemblies, a profession of so much of her faith, as is necessary to make a man a christian. But pray tell me, has the church any such full and complete form of faith, that hath in it all those propositions, you have given us for necessary articles, (not to say any thing of those which you have reserved to yourself, in your own breast, and will not communicate,) of which the

apostles creed is only a scanty form, a brief imperfect abstract, used only to save time in the crowd of other pressing occasions, that are always in haste to be dispatched? If she has, the unmasker will do well to produce it. If the church has no such complete form, besides the apostles creed, any-where, of fundamental articles; he will do well to leave talking idly of this abstract, as he goes on to do in the following words:

“But,” says he, “we are not to think that it expressly contains in it all the necessary and weighty points, all the important doctrines of our belief; it being only designed to be an abstract.” Answ. Of what, I beseech you, is it an abstract? For here the unmasker stops short, and, as one that knows not well what to say, speaks not out what it is an abstract of; but provides himself a subterfuge in the generality of the preceding terms, of “necessary and weighty points, and important doctrines,” jumbled together; which can be there of no other use, but to cover his ignorance or sophistry. But the question being only about necessary points, to what purpose are weighty and important doctrines joined to them; unless he will say, that there is no difference between necessary and weighty points, fundamental and important doctrines; and if so, then the distinction of points into necessary and not necessary, will be foolish and impertinent; and all the doctrines contained in the bible, will be absolutely necessary to be explicitly believed by every man to make him a christian. But taking it for granted, that the distinction of truths contained in the gospel, into points absolutely necessary, and not absolutely necessary, to be believed to make a man a christian, is good; I desire the unmasker to tell us, what the apostles creed is an abstract of? He will, perhaps, answer, that he has told us already in this very page, where he says, it is an abridgment of faith: and he has said true in words, but saying those words by rote, after others, without understanding them, he has said so in a sense that is not true. For he supposes it an abridgment of faith, by containing only a few of the necessary articles of faith, and leaving out the far greater part of them; and so takes a part of a thing for an abridgment of it; whereas an abridgment or abstract of any thing, is the whole in little; and if it be of a science or doctrine, the abridgment consists in the essential or necessary parts of it contracted into a narrower compass than where it lies diffused in the ordinary way of delivery, amongst a great number of transitions, explanations, illustrations, proofs, reasonings, corollaries, &c. All which, though they make a part of the discourse, wherein that doctrine is delivered,

are left out in the abridgment of it, wherein all the necessary parts of it are drawn together into a less room. But though an abridgment need to contain none but the essential and necessary parts, yet all those it ought to contain; or else it will not be an abridgment or abstract of that thing, but an abridgment only of a part of it. I think it could not be said to be an abridgment of the law contained in an act of parliament, wherein any of the things required by that act were omitted; which yet commonly may be reduced into a very narrow compass, when stripped of all the motives, ends, enacting forms, &c. expressed in the act itself. If this does not satisfy the unmasker what is properly an abridgment, I shall refer him to Mr. Chillingworth, who, I think, will be allowed to understand sense, and to speak it properly, at least as well as the unmasker. And what he says happens to be in the very same question, between Knot, the jesuit, and him, that is here between the unmasker and me: it is but putting the unmasker in the jesuit's place, and myself (if it may be allowed me, without vanity) in Mr. Chillingworth, the protestant's; and Mr. Chillingworth's very words, chap. iv. § 65, will exactly serve for my answer: "You trifle affectedly, confounding the apostles belief of the whole religion of Christ, as it comprehends both what we are to do, and what we are to believe, with that part of it which contains not duties of obedience, but only the necessary articles of simple faith. Now, though the apostles belief be, in the former sense, a larger thing than that which we call the apostles creed: yet, in the latter sense of the word, the creed (I say) is a full comprehension of their belief, which you yourself have formerly confessed, though somewhat fearfully and inconsistently. And here again, unwillingness to speak the truth makes you speak that which is hardly sense, and call it an abridgment of some articles of faith. For I demand, those some articles which you speak of, which are they? Those that are out of the creed, or those that are in it? Those that are in it, it comprehends at large, and therefore it is not an abridgment of them. Those that are out of it, it comprehends not at all, and therefore it is not an abridgment of them. If you would call it now an abridgment of faith; this would be sense; and signify thus much, that all the necessary articles of the christian faith are comprized in it. For this is the proper duty of abridgments, to leave out nothing necessary." So that in Mr. Chillingworth's judgment of an abridgment, it is not sense to say, as you do, , That "we are not to think, that the apostles creed expressly contains in it all the necessary points of our belief, it being only designed to be an

abstract, or an abridgment of faith:" but on the contrary, we must conclude, it contains in it all the necessary articles of faith, for that very reason; because it is an abridgment of faith, as the unmasker calls it. But whether this that Mr. Chillingworth has given us here, be the nature of an abridgment or no; this is certain, that the apostles creed cannot be a form of profession of the christian faith, if any part of the faith necessary to make a man a christian, be left out of it: and yet such a profession of faith would the unmasker have this abridgment of faith to be. For a little lower, in the 47th page, he says in express terms, That "if a man believe no more than is, in express terms, in the apostles creed, his faith will not be the faith of a christian." Wherein he does great honour to the primitive church, and particularly to the church of England. The primitive church admitted converted heathens to baptism, upon the faith contained in the apostles creed: a bare profession of that faith, and no more, was required of them to be received into the church, and made members of Christ's body. How little different the faith of the ancient church was, from the faith I have mentioned, may be seen in these words of Tertullian: "*Regula fidei una omnino est, sola, immobilis, irreformabilis, credendi, scilicet, in unicum Deum omnipotentem, mundi conditorem, & filium ejus Jesum Christum, natum ex virgine, Maria, crucifixum sub Pontio Pilato, tertia die resuscitatum à mortuis, receptum in cœlis, sedentem nunc ad dextram Patris, venturum judicare vivos & mortuos, per carnis etiam resurrectionem. Hâc lege fidei manente, cætera jam disciplinæ & conversationis admittunt novitatem correctionis:*" Tert. de virg. velan. in principio. This was the faith, that in Tertullian's time sufficed to make a christian. And the church of England, as I have remarked already, only proposed the articles of the apostles creed to the convert to be baptized; and upon his professing a belief of them, asks, Whether he will be baptized in this faith; which (if we will believe the unmasker) "is not the faith of a christian." However, the church, without any more ado, upon the profession of this faith, and no other, baptizes him into it. So that the ancient church, if the unmasker may be believed, baptized converts into that faith, which "is not the faith of a christian." And the church of England, when she baptizes any one, makes him not a christian. For he that is baptized only into a faith, that "is not the faith of a christian," I would fain know how he can thereby be made a christian? So that if the omissions, which he so much blames in my book, make me a socinian, I see not how the church of England will escape that

censure; since those omissions are in that very confession of faith which she proposes, and upon a profession whereof, she baptizes those whom she designs to make christians. But it seems that the unmasker (who has made bold to unmask her too) reasons right, that the church of England is mistaken, and makes none but socinians christians; or (as he is pleased now to declare) no christians at all. Which, if true, the unmasker had best look to it, whether he himself be a christian, or no; for it is to be feared, he was baptized only into that faith, which he himself confesses “is not the faith of a christian.”

But he brings himself off, in these following words: “all matters of faith, in some manner, may be reduced to this brief platform of belief.” Answ. If that be enough to make him a true and an orthodox christian, he does not consider whom, in this way, he brings off with him; for I think he cannot deny, that all matters of faith, in some manner, may be reduced to that abstract of faith which I have given, as well as to that brief platform in the apostles creed. So that, for aught I see, by this rule, we are christians or not christians, orthodox or not orthodox, equally together.

But yet he says, in the next words; when he calls it an “abstract, or abbreviature, it is implied, that there are more truths to be known and assented to by a christian, in order to making him really so, than what we meet with here.” The quite contrary whereof (as has been shown) is implied, by its being called an abstract. But what is that to the purpose? It is not fit abstracts and abbreviations should stand in an unmasker’s way. They are sounds men have used for what they pleased; and why may not the unmasker do so too, and use them in a sense, that may make the apostles creed be only a broken scrap of the christian faith? However, in great condescension, being willing to do the apostles creed what honour he could, he says, That “all matters of faith, in some manner, may be reduced to this brief platform of belief.” But yet, when it is set in competition with the creed, which he himself is making, (for it is not yet finished,) it is by no means to be allowed as sufficient to make a man a christian: “There are more truths to be known and assented to, in order to make a man really a christian.” Which, what they are, the church of England shall know, when this new reformer thinks fit; and then she may be able to propose to those who are not yet so, a collection of articles of belief, and baptize them a-new into a faith, which will really make them christians: but hitherto, if the unmasker may be credited, she has failed in it.

“Yet he craves leave to tell me,” in the following words, , “That the apostles creed hath more in it than I, or my brethren, will subscribe to.” Were it not the undoubted privilege of the unmasker to know me better than I do myself, (for he is always telling me something of myself, which I did not know,) I would, in my turn, crave leave to tell him, that this is the faith I was baptized into, no one title whereof I have renounced, that I know; and that I heretofore thought, that gave me title to be a christian. But the unmasker hath otherwise determined: and I know not now where to find a christian. For the belief of the apostles creed will not, it seems, make a man one: and what other belief will, it does not yet please the unmasker to tell us. But yet, as to the subscribing to the apostles creed, I must take leave to say, however the unmasker may be right in the faith, he is out in the morals of a christian; it being against the charity of one, that is really so, to pronounce, as he does, peremptorily in a thing that he cannot know; and to affirm positively what I know to be a downright falsehood. But what others will do, it is not my talent to determine; that belongs to the unmasker; though, as to all that are my brethren in the christian faith, I may answer for them too, that they will also with me, do that, without which, in that sense, they cannot be my brethren.

Page 49, The unmasker smartly convinces me of no small blunder, in these words: “But was it not judiciously said by this writer, that, “it is well for the compilers of the creed, that they lived not in my days?” P. 12, “I tell you, friend, it was impossible they should; for the learned Usher and Vossius, and others have proved, that that symbol was drawn up, not at once, but that some articles of it were adjoined many years after, far beyond the extent of any man’s life; and therefore the compilers of the creed could not live in my days, nor could I live in theirs.” Answ. But it seems that, had they lived all together, you could have lived in their days. “But,” says he, “I let this pass, as one of the blunders of our thoughtful and musing author.” Answ. And I tell you, friend, that unless it were to show your reading in Usher and Vossius, you had better have let this blunder of mine alone. Does not the unmasker here give a clear proof, that he is no changeling? Whatever argument he takes in hand, weighty or trivial, material or not material to the thing in question, he brings it to the same sort of sense and force. He would show me guilty of an absurdity, in saying, “It is well for the compilers of the creed, that they lived not in his days.” This he proves to be a blunder, because they all lived not in one another’s days; therefore it was

an absurdity to suppose, they might all live in his days. As if there were any greater absurdity to bring the compilers, who lived, possibly, within a few centuries of one another, by a supposition, into one time; than it is to bring the unmasker, and any one of them who lived a thousand years distant one from another, by a supposition, to be contemporaries; for it is by reason of the compilers living at a distance one from another, that he proves it impossible for him to be their contemporary. As if it were not as impossible in fact, for him who was not born until above a thousand years after, to live in any of their days, as it is for any one of them to live in either of those compilers days, that died before him. The supposition of their living together, is as easy of one as the other, at what distance soever they lived, and how many soever there were of them. This being so, I think it had been better for the unmasker to have let alone the blunder, and showed (which was his business) that he does not accuse the compilers of the creed of being all over socinianized, as well as he does me, since they were as guilty as I, of the omission of those articles, (viz. “that Christ is the word of God: that Christ was God incarnate: the eternal and ineffable generation of the Son of God: that the Son is in the Father, and the Father in the Son, which expresses their unity;”) for the omission whereof, the unmasker laid socinianism to my charge. So that it remains still upon his score to show,

XXI. “WHY THESE OMISSIONS IN THE APOSTLES CREED DO NOT AS WELL MAKE THAT ABSTRACT, AS MY ABRIDGMENT OF FAITH, TO BE SOCINIAN?”

Page 57, The unmasker “desires the reader to observe, that this lank faith of mine is in a manner no other than the faith of a Turk.” And I desire the reader to observe, that this faith of mine was all that our Saviour and his apostles preached to the unbelieving world. And this our unmasker cannot deny, as I think, will appear to any one, who observes what he says, , 77, of his Socinianism unmasked. And that they preached nothing but “a faith, that was in a manner no other than the faith of a Turk,” I think none amongst christians, but this bold unmasker, will have the irreverence profanely to say.

He tells us, , that “the musselmen” (or, as he has, for the information of his reader, very pertinently proved, it should be writ, moslemim; without which, perhaps, we should not have known his skill in Arabic, or, in plain English, the mahometans) “believe that Christ is a good man, and not above

the nature of a man, and sent of God to give instruction to the world: and my faith,” he says, “is of the very same scantling.” This I shall desire him to prove; or, which in other words he insinuates in this and the neighbouring pages, viz.

XXII. THAT THAT FAITH, WHICH I HAVE AFFIRMED TO BE THE FAITH, WHICH IS REQUIRED TO MAKE A MAN A CHRISTIAN, IS NO OTHER THAN WHAT TURKS BELIEVE, AND IS CONTAINED IN THE ALCORAN.

Or, as he expresses it himself, ,

“That a Turk, according to me, is a christian; for I make the same faith serve them both.”

And particularly to show where it is I say,

XXIII. THAT “CHRIST IS NOT ABOVE THE NATURE OF A MAN,” OR HAVE MADE THAT A NECESSARY ARTICLE OF THE CHRISTIAN FAITH.

And next, where it is,

XXIV. “THAT I SPEAK AS MEANLY OF CHRIST’S SUFFERING ON THE CROSS, AND DEATH, AS IF THERE WERE NO SUCH THING.”

For thus he says of me, , “I seem to have consulted the mahometan bible, which did say, Christ did not suffer on the cross, did not die. For I, and my allies, speak as meanly of these articles, as if there were no such thing.”

To show our unmasker’s veracity in this case, I shall trouble my reader with some passages out of my “Reasonableness of christianity,” : “When we consider, that he was to fill out the time foretold of his ministry, and after a life illustrious in miracles and good works, attended with humility, meekness, patience, and suffering, and every way conformable to the prophecies of him, should be led as a sheep to the slaughter, and, with all quiet and submission, be brought to the cross, though there were no guilt or fault found in him.” And, , “contrary to the design of his coming, which was to be offered up a lamb, blameless and void of offence.” And, , “laying down his life, both for jews and gentiles.” P. 96, “given up to contempt, torment, and death.” But, say what I will, when the unmasker thinks fit to

have it so, it is speaking out of the mahometan bible, that “Christ did not suffer on the cross, did not die; or at least, is speaking as meanly of these articles, as if no such thing had been.”

His next slander is, , in these words: “this gentleman presents the world with a very ill notion of faith; for the very devils are capable of all that faith, which, he says, makes a christian.” It is not strange, that the unmasker should misrepresent the faith, which, I say, makes a christian; when it seems to be his whole design to misrepresent my meaning every-where. The frequency of his doing it, I have showed in abundance of instances, to which I shall add an eminent one here; which shows what a fair champion he is for truth and religion.

Page 104, of my “Reasonableness of christianity,” I give this account of the faith which makes a christian; that it is “men’s entering themselves in the kingdom of God; owning and professing themselves the subjects of Jesus, whom they believe to be the Messiah, and receive for their Lord and King: for that was to be baptized in his name.” This sense of believing Christ to be the Messiah, that is, to take him for our King and Lord, who is to be obeyed, I have expressed over and over again; as, , 111, my words are, “that as many of them as would believe Jesus the son of God (whom he sent into the world) to be the Messiah, the promised Deliverer, and would receive him for their king and ruler, should have all their past sins, disobedience, and rebellion, forgiven them. And if, for the future, they lived in sincere obedience to his law, to the utmost of their power, the sins of human frailty for the time to come, as well as those of their past lives, should for his son’s sake, because they gave themselves up to him to be his subjects, be forgiven them: and so their faith, which made them to be baptized into his name, (i. e. inroll themselves in the kingdom of Jesus, the Messiah, and profess themselves his subjects, and consequently live by the laws of his kingdom,) should be accounted to them for righteousness.” Which account of what is necessary, I close with these words: “this is the faith for which God of his free grace justifies sinful man.” And is this the faith of devils?

To the same purpose, , are these words: “the chief end of his coming was to be a king; and, as such, to be received by those who would be his subjects in the kingdom which he came to erect.” And again, , “only those who have believed Jesus to be the Messiah, and taken him for their king, with a sincere endeavour after righteousness in obeying his law, shall have

their past sins not imputed to them.” And so again and 120, and in several other places; of which I shall add but this one more, , “it is not enough to believe him to be the Messiah, unless we obey his laws, and take him to be our king to reign over us.” Can the devils thus believe him to be the Messiah? Yet this is that, which, by these and abundance of other places, I have showed to be the meaning of believing him to be the Messiah.

Besides, I have expressly distinguished the faith which makes a christian, from that which the devils have, by proving, that, to the believing Jesus to be the Messiah, must be joined repentance, or else it will not make them true christians: and what this repentance is, may be seen at large in , &c. some expressions whereof I shall here set down; as , “repentance does not consist in one single act of sorrow, (though that being first, and leading, gives denomination to the whole,) but in doing works meet for repentance; in a sincere obedience to the law of Christ, the remainder of our lives.” Again; to distinguish the faith of a christian from that of devils, I say expressly, out of St. Paul’s epistle to the Galatians, “that which availeth is faith, but faith working by love; and that faith, without works, i. e. the works of sincere obedience to the law and will of Christ, is not sufficient for our justification.” And, , “That to inherit eternal life, we must love the Lord our God, with all our heart, with all our soul, with all our strength, and with all our mind.” And , “Love Christ, in keeping his commandments.”

This, and a great deal more to this purpose, may be seen in my “Reasonableness of Christianity;” particularly, where I answer that objection, about the faith of devils, which I made in , &c. and therein at large show, wherein the faith of devils comes short of the justifying faith, which makes a christian. And yet the good, the sincere, the candid unmasker, with his becoming confidence, tells his readers here, , “That I present the world with a very ill notion of faith: for the very devils are capable of all that faith, which I say, makes a christian man.”

To prevent this calumny, I, in more places than one, distinguished between faith, in a strict sense, as it is a bare assent to any proposition, and that which is called evangelical faith, in a larger sense of the word; which comprehends under it something more than a bare simple assent; as, , “I mean, this is all that is required to be believed by those who acknowledge but one eternal, invisible God, the maker of heaven and earth: for that there is something more required to salvation, besides believing, we shall see hereafter.” P. 28, “All I say that was to be believed for justification. For that

this was not all that was required to be done for justification, we shall see hereafter.” P. 51, “Obeying the law of the Messiah, their king, being no less required, than their believing that Jesus was the Messiah, the King and Deliverer, that was promised them.” P. 102, “As far as their believing could make them members of Christ’s body.” By these, and more, the like passages in my book, my meaning is so evident, that no-body, but an unmasker, would have said, that when I spoke of believing, as a bare speculative assent to any proposition, as true, I affirmed that was all that was required of a christian for justification: though that in the strict sense of the word, is all that is done in believing. And therefore, I say, As far as mere believing could make them members of Christ’s body; plainly signifying, as much as words can, that the faith, for which they were justified, included something more than a bare assent. This appears, not only from these words of mine, , “St. Paul often, in his epistles, puts faith for the whole duty of a christian:” but from my so often, and almost every-where, interpreting “believing him to be the Messiah, by taking him to be our King,” whereby is meant not a bare idle speculation, a bare notional persuasion of any truth whatsoever, floating in our brains; but an active principle of life, a faith working by love and obedience. “To make him to be our King,” carries with it a right disposition of the will to honour and obey him, joined to that assent wherewith believers embrace this fundamental truth, that Jesus was the person who was by God sent to be their King; he that was promised to be their Prince and Saviour.

But, for all this, the unmasker, , confidently tells his reader, that I say no such thing. His words are: “But besides this historical faith, (as it is generally called by divines,) which is giving credit to evangelical truths, is barely revealed, there must be something else added to make up the true substantial faith of a christian. With the assent of the understanding, must be joined the consent or approbation of the will. All those divine truths which the intellect assents to, must be allowed of by this elective power of the soul. True evangelical faith is a hearty acceptance of the Messias, as he is offered in the gospel. It is a sincere and impartial submission to all things required by the evangelical law, which is contained in the epistles, as well as the other writings. And to this practical assent and choice, there must be added, likewise, a firm trust and reliance in the blessed author of our salvation. But this late undertaker, who attempted to give us a more perfect account, than ever was before of christianity, as it is delivered in the

scriptures, brings us no tidings of any such faith belonging to christianity, or discovered to us in the scriptures. Which gives us to understand, that he verily believes there is no such christian faith; for in some of his numerous pages, (especially , &c.) where he speaks so much of belief and faith, he might have taken occasion to insert one word about his complete faith of the gospel.”

Though the places above quoted, out of my “Reasonableness of Christianity,” and the whole tenour of the latter part of it, show the falsehood of what the unmasker here says; yet I will set down one passage more out of it; and then ask our unmasker, when he hath read them, Whether he hath the brow to say again, that “I bring no tidings of any such faith?” My words are, “Reasonableness of Christianity,” , “Faith in the promises of God, relying and acquiescing in his word and faithfulness, the Almighty takes well at our hands as a great mark of homage paid by us, poor frail creatures, to his goodness and truth, as well as to his power and wisdom; and accepts it as an acknowledgment of his peculiar providence and benignity to us. And, therefore, our Saviour tells us, John xii. 44, “He that believes on me, believes not on me, but on him that sent me.” The works “of nature show his wisdom and power: but it is his peculiar care of mankind, most eminently discovered in his promises to them, that shows his bounty and goodness; and consequently engages their hearts in love and affection to him. This oblation of an heart fixed with dependance and affection on him, is the most acceptable tribute we can pay him, the foundation of true devotion, and life of all religion. What a value he puts on this depending on his word, and resting satisfied on his promises, we have an example in Abraham; whose faith was counted to him for righteousness, as we have before remarked out of Rom. iv. And his relying firmly on the promise of God, without any doubt of its performance, gave him the name of the father of the faithful; and gained him so much favour with the Almighty, that he was called the friend of God, the highest and most glorious title that can be bestowed on a creature!”

The great out-cry he makes against me in his two next sections, — 60, as if I intended to introduce ignorance and popery, is to be entertained rather as the noise of a petulant scold, saying the worst things she could think of, than as the arguing of a man of sense or sincerity. All this mighty accusation is grounded upon these falsehoods: That “I make it my great business to beat men off from divine truths; that I cry down all articles of the christian

faith, but one; that I will not suffer men to look into christianity; that I blast the epistolary writings.” I shall add no more to what I have already said, about the epistles, but those few words out of my “Reasonableness of christianity,” page 154, “The epistles, resolving doubts, and reforming mistakes, are of great advantage to our knowledge and practice.” And, , 156, “An explicit belief of what God requires of those, who will enter into, and receive the benefits of the new covenant, is absolutely required. The other parts of divine revelation are objects of faith, and are so to be received. They are truths, whereof none, that is once known to be such, i. e. of divine revelation,] may, or ought to be disbelieved.”

And as for that other saying of his, “That I will not suffer men to look into christianity:” I desire to know where that christianity is locked up, which “I will not suffer men to look into.” My christianity, I confess, is contained in the written word of God; and that I am so far from hindering any one to look into, that I every-where appeal to it, and have quoted so much of it, that the unmasker complains of being overlaid with it, and tells me it is tedious. “All divine revelation, I say, , requires the obedience of faith; and that every one is to receive all the parts of it, with a docility and disposition prepared to embrace and assent to all truths coming from God; and submit his mind to whatever shall appear to him to bear that character.” I speak, in the same page, of men’s endeavouring to understand it, and of their interpreting one place by another. This, and the whole design of my book, shows that I think it every christian’s duty to read, search and study the holy scriptures: and make this their great business: and yet the good unmasker, in a fit of zeal, displays his throat, and cries out, , “Hear, O ye heavens, and give ear, O earth; judge whether this be not the way to introduce darkness and ignorance into Christendom; whether this be not blinding of men’s eyes,” &c. for this mighty pathos ends not there. And all things considered, I know not whether he had not reason, in his want of arguments, this way to pour out his concern. For neither the preaching of our Saviour and his apostles, nor the apostles creed, nor any thing else, being with him the faith of a christian, i. e. sufficient to make a christian, but just his set of fundamental articles, (when he himself knows what they be;) in fine, nothing being christianity but just his system, it is time to cry out, Help, neighbours! hold fast, friends! Knowledge, religion, christianity is gone, if this be once permitted, that the people should read and understand the scripture for themselves, as God shall enlighten their

understandings in the use of the means; and not be forced to depend upon me, and upon my choosing, and my interpretation, for the necessary points they are to believe to make them christians: if I, the great unmasker, have not the sole power to decree what is, or is not fundamental, and people be not bound to receive it for such, faith and the gospel are given up; darkness and barbarism will be brought in upon us by this writer's contrivance. For "he is an underhand factor for that communion, which cries up ignorance for the mother of devotion and religion:" i. e. in plain English, for popery. For to this, and nothing else, tends all that sputter he makes in the section before mentioned.

I do not think there was ever a more thorough-paced declaimer, than our unmasker. He leaves out nothing that he thinks will make an affrighting noise in the ears of his orthodox hearers, though all the blame and censure he pours out upon others light only on himself. For let me ask this zealous upholder of light and knowledge: does he think it reasonable, that any one, who is not a christian, should be suffered to be undisturbed in his parish? Nay, does he think fit that any such should live free from the lash of the magistrate, or from the persecution of the ecclesiastical power? He seems to talk with another air, . In the next place I ask, Whether any one is a christian, who has not the faith of a christian? Thirdly, I ask, Whether he has the faith of a christian, who does not explicitly believe all the fundamental articles of christianity? And to conclude, I ask him, Whether all those that he has set down, are not fundamental necessary articles? When the unmasker has fairly answered these questions, it will be seen who is for popery, and the ignorance and tyranny that accompany it.

The unmasker is for making and imposing articles of faith; but he is for this power in himself. He likes not popery (which is nothing but the tyranny and imposing upon men's understandings, faith and consciences) in the hands of the old gentleman at Rome: but it would, he thinks, do admirably well in his own hands. And who can blame him for it? Would not that be an excellent way to propagate light and knowledge, by tying up all men to a bundle of articles of his own culling? Or rather, to the authority of Christ and his apostles residing in him? For he does not, nor ever will, give us a full view of fundamentals of his christianity: but like the church of Rome, to secure our dependence, reserves to himself a power of declaring others, and defining what is matter of faith as he shall see occasion.

Now, therefore, veil your bonnets to the unmasker, all you that have a mind to be christians: break not your heads about the scriptures, to examine what they require of you: submit your faith implicitly to the unmasker; he will understand and find out the necessary points for you to believe. Take them, just so many as he thinks fit to deliver them to you; this is the way to be knowing christians. But be sure, ask not, Whether those he is pleased to deliver, be every one of them fundamental, and all the fundamental articles, necessary to be believed to make a man a christian? Such a capricious question spoils all, overturns christianity, which is intrusted to the unmasker's sole keeping, to be dispensed out as he thinks fit. If you refuse an implicit faith to him, he will presently find you have it for the whore of Babylon; he will smell out popery in it immediately: for he has a very shrewd scent, and you will be discovered to be an underhand factor for the church of Rome.

But if the unmasker were such an enemy, as he pretends, to those factors, I wonder he should, in what he has said concerning the apostles creed, so exactly jump with Knot the jesuit. If any one doubt of this, I desire him to look into the fourth chapter of "Knot's charity maintained," and there he will see how well our unmasker and that jesuit agree in argument; nay, and expressions too. But yet I do not think him so far guilty, as to be employed as an underhand factor for popery. Every body will, I suppose, be ready to pronounce him so far an innocent, as to clear him from that. The cunning of this design goes not beyond the laying out of his preaching oratory, for the setting up his own system, and making that the sole christianity. To that end, he would be glad to have the power of interpreting scripture, of defining and declaring articles of faith, and imposing them. This, which makes the absolute power of the pope, he would not, I think, establish at Rome; but it is plain he would have it himself if he could get it, for the support of the christianity of his system. An implicit faith, if he might have the management of it, and the taking fundamentals upon trust from his authority, would be of excellent use. Such a power, in his hands, would spread truth and knowledge in the world, i. e. his own orthodoxy and set of opinions. But if a man differs, nay, questions any thing of that, whether it be absolutely necessary to make one a christian, it is immediately a contrivance to let in popery, and to bring "darkness and barbarism into the christian world." But I must tell the innocent unmasker, whether he designs or no, that if his calling his system the only christianity, can bring the world

to receive from him articles of faith of his own choosing, as fundamentals necessary to be believed by all men to make them christians, which Christ and his apostles did not propose to all men to make them christians; he does only set up popery in another guise, and lay the foundations of ignorance, darkness, and barbarism, in the christian world; for all the ignorance and blindness, that popery introduced, was only upon this foundation. And if he does not see this, (as there is reason to excuse his innocence,) it would be no hard matter to demonstrate it, if that were at present the question between us. But there are a great many other propositions to be proved by him, before we come to that new matter of debate.

But before I quit these paragraphs. I must go on with our unmasker's account, and desire him to show where it is,

XXV. "THAT I MAKE IT MY BUSINESS TO BEAT MEN OFF FROM
TAKING NOTICE OF ANY DIVINE TRUTHS?"

Next, where it is,

XXVI. THAT "I CRY DOWN ALL ARTICLES OF CHRISTIAN FAITH
BUT ONE?"

Next, how it appears,

XXVII. THAT "I WILL NOT SUFFER MANKIND TO LOOK INTO
CHRISTIANITY?"

Again, where it is,

XXVIII. THAT "I LABOUR INDUSTRIOUSLY TO KEEP PEOPLE IN
IGNORANCE;" OR TELL THEM, THAT "THERE IS NO NECESSITY
OF KNOWING ANY OTHER DOCTRINES OF THE BIBLE?"

These, and several others of the like strain, particularly concerning one article, and the epistles, (which are his common-places,) are to be found in his 59th and 60th pages. And all this out of a presumption, that his system is the only christianity; and that if men were not pressed and persuaded to receive that, just every article of it, upon pain of damnation, christianity would be lost: and not to do this, is to promote ignorance, and condemn the

bible. But he fears where no fear is. If his orthodoxy be the truth, and conformable to the scriptures, the laying the foundation only where our Saviour and his Apostles have laid it, will not overturn it. And to show him, that it is so, I desire him again to consider what I said in my Vindication, , 165, which, because I do not remember he anywhere takes notice of, in his reply, I will here offer again to his consideration: “Convince but men of the mission of Jesus Christ; make them but see the truth, simplicity and reasonableness of what he himself hath taught, and required to be believed by his followers; and you need not doubt, but being once fully persuaded of his doctrine, and the advantages which, all christians agree, are received by him, such converts will not lay by the scriptures; but, by a constant reading and study of them, will get all the light they can from this divine revelation, and nourish themselves up in the words of faith and good doctrine, as St. Paul speaks to Timothy.”

If the reading and study of the scripture were more pressed than it is, and men were fairly sent to the bible to find their religion; and not the bible put into their hands, only to find the opinions of their peculiar sect or party; Christendom would have more christians, and those that are, would be more knowing, and more in the right, than they now are. That which hinders this, is that select bundle of doctrines, which it has pleased every sect to draw out of the scriptures, or their own inventions, with an omission (and, as our unmasker would say, a contempt) of all the rest. These choice truths (as the unmasker calls his) are to be the standing orthodoxy of that party, from which none of that church must recede, without the forfeiture of their christianity, and the loss of eternal life. But, whilst the people keep firm to these, they are in the church, and the way to salvation: which, in effect, what is it but to encourage ignorance, laziness, and neglect of the scriptures? For what need they be at the pains of constantly reading the bible, or perplex their heads with considering and weighing what is there delivered; when believing as the church believes, or saying, after, or not contradicting their domine, or teacher, serves the turn?

Further, I desire it may be considered, what name that mere mock-show, of recommending to men the study of the scripture, deserves; if, when they read it, they must understand it just as he (that would be, and they are too apt, contrary to the command of Christ, to call, their master) tells them. If they find any thing in the word of God, that leads them into opinions he does not allow; if any thing they meet with in holy writ, seems to them to

thwart, or shake the received doctrines, the very proposing of their doubts renders them suspected. Reasoning about them, and not acquiescing in whatever is said to them, is interpreted want of due respect and deference to the authority of their spiritual guides; disrepute and censures follow: and if, in pursuance of their own light, they persist in what they think the scripture teaches them, they are turned out of the church, delivered to Satan, and no longer allowed to be christians. And is thus a sincere and rightly directed study of the scriptures, that men may understand and profit thereby, encouraged? This is the consequence of men's assuming to themselves a power of declaring fundamentals, i. e. of setting up a christianity of their own making. For how else can they turn men of as unblameable lives as others of their members out of the church of Christ (for so they count their communion) for opinions, unless those opinions were concluded inconsistent with christianity? Thus systems, the invention of men, are turned into so many opposite gospels; and nothing is truth in each sect, but what suits with them. So that the scripture serves but, like a nose of wax, to be turned and bent, just as may fit the contrary orthodoxies of different societies. For it is these several systems, that to each party are the just standards of truth, and the meaning of the scripture is to be measured only by them. Whoever relinquishes any of those distinguishing points, immediately ceases to be a christian.

This is the way that the unmasker would have truth and religion preserved, light and knowledge propagated. But here too the different sects, giving equal authority to their own orthodoxies, will be quits with him. For as far as I can observe, the same genius seems to influence them all, even those who pretend most to freedom, the socinians themselves. For when it is observed, how positive and eager they are in their disputes; how forward to have their interpretations of scripture received for authentic, though to others, in several places, they seem very much strained; how impatient they are of contradiction; and with what disrespect and roughness they often treat their opposers: may it not be suspected, that this so visible a warmth in their present circumstances, and zeal for their orthodoxy, would (had they the power) work in them as it does in others? They in their turns would, I fear, be ready with their set of fundamentals; which they would be as forward to impose on others, as others have been to impose contrary fundamentals on them.

This is, and always will be, the unavoidable effect of intruding on our Saviour's authority, and requiring more now, as necessary to be believed to make a man a christian, than was at first required by our Saviour and his apostles. What else can be expected among christians, but their tearing, and being torn in pieces, by one another; whilst every sect assumes to itself a power of declaring fundamentals, and severally thus narrow christianity to their distinct systems? He that has a mind to see how fundamentals come to be framed and fashioned, and upon what motives and considerations they are often taken up, or laid down according to the humours, interests, or designs of the heads of parties, as if they were things depending on men's pleasure and to be suited to their convenience; may find an example worth his notice, in the life of Mr. Baxter, part II. — 205.

Whenever men take upon them to go beyond those fundamental articles of christianity, which are to be found in the preachings of our Saviour and his apostles, where will they stop? Whenever any set of men will require more, as necessary to be believed, to make men of their church, i. e. in their sense, christians, than what our Saviour and his apostles proposed to those whom they made christians, and admitted into the church of Christ; however they may pretend to recommend the scripture to their people, in effect, no more of it is recommended to them, than just comports with what the leaders of that sect have resolved christianity shall consist in.

It is no wonder, therefore, there is so much ignorance amongst christians, and so much vain outcry against it; whilst almost every distinct society of christians magisterially ascribes orthodoxy to a select set of fundamentals, distinct from those proposed in the preaching of our Saviour and his apostles; which, in no one point, must be questioned by any of its communion. By this means their people are never sent to the holy scriptures, that true fountain of light, but hood-winked: a veil is cast over their eyes, and then they are bid to read their bible. They must make it all chime to their church's fundamentals, or else they were better let it alone. For if they find any thing there against the received doctrines, though they hold it and express it in the very terms the Holy Ghost has delivered it in, that will not excuse them. Heresy will be their lot, and they shall be treated accordingly. And thus we see how, amongst other good effects, creed-making always has, and always will necessarily produce and propagate ignorance in the world, however each party blame others for it. And therefore I have often wondered to hear men of several churches so heartily

exclaim against the implicit faith of the church of Rome; when the same implicit faith is as much practised and required in their own, though not so openly professed, and ingenuously owned there.

In the next section, the unmasker questions the sincerity of mine, and professes the greatness of his concern for the salvation of men's souls. And tells me of my reflection on him, upon that account, in my Vindication, . Answ. I wish he would, for the right information of the reader, every-where set down, what he has any thing to say to, in my book, or my defence of it, and save me the labour of repeating it. My words in that place are, "Some men will not bear, that any one should speak of religion, but according to the model that they themselves have made of it. Nay, though he proposes it upon the very terms, and in the very words, which our Saviour and his apostles preached it in; yet he shall not escape censures and the severest insinuations. To deviate in the least, or to omit any thing contained in their articles, is heresy, under the most invidious names in fashion; and it is well if he escapes being a downright atheist. Whether this be the way for teachers to make themselves hearkened to, as men in earnest in religion, and really concerned for the salvation of men's souls, I leave them to consider. What success it has had, towards persuading men of the truth of christianity, their own complaints of the prevalency of atheism, on the one hand, and the number of deists on the other, sufficiently show."

I have set down this passage at large, both as a confirmation of what I said but just now: and also to show, that the reflection I there made needed some other answer, than a bare profession of his "regard to the salvation of men's souls." The assuming an undue authority to his own opinions, and using manifest untruths in the defence of them, I am sure is no mark, that the directing men right in the way to salvation is his chief aim. And I wish that the greater liberties of that sort, which he has again taken in his Socinianism unmasked, and which I have so often laid open, had not confirmed that reflection. I should have been glad, that any thing in my book had been fairly controverted and brought to the touch, whether it had or had not been confuted. The matter of it would have deserved a serious debate (if any had been necessary) in the words of sobriety, and the charitable temper of the gospel, as I desired in my preface: and that would not have misbecome the unmasker's function. But it did not consist, it seems, with his design. Christian charity would not have allowed those ill-meant conjectures, and groundless censures, which were necessary to his

purpose: and therefore he took a shorter course, than to confute my book, and thereby convince me and others. He makes it his business to rail at it and the author of it, that that might be taken for a confutation. For by what he has hitherto done, arguing seems not to be his talent. And thus far, who can but allow his wisdom? But whether it be that “wisdom that is from above; first pure, then peaceable, gentle, easy to be intreated, full of mercy, and good fruits, without partiality, and without hypocrisy;” I shall leave to other readers to judge.

His saying nothing to that other reflection, which his manner of expressing himself drew from me, would make one suspect, it savoured not altogether of the wisdom of the gospel; nor showed an over-great care of the salvation of souls. My words, Vindication, , are: “I know not how better to show my care of his credit, than by entreating him, that when he takes next in hand such a subject as this, wherein the salvation of souls is concerned, he would treat it a little more seriously, and with a little more candour, lest men should find in his writings another cause of atheism, which in this treatise he has not thought fit to mention. Ostentation of wit in general, he has made a cause of atheism, . But the world will tell him, that frothy light discourses, concerning the serious matters of religion, and ostentation of trifling misbecoming wit, in those who come as ambassadors from God, under the title of successors of the apostles, in the great commission of the gospel, are none of the least causes of atheism.” But this advice I am now satisfied (by his second part of the same strain) was very improper for him; and no more reasonable, than if one should advise a buffoon to talk gravely, who has nothing left to draw attention, if he should lay by his scurrility.

The remainder of this fourth chapter, — 67, being spent in showing, why the socinians are for a few articles of faith, being a matter that I am not concerned in; I leave to that forward gentleman to examine, who examined Mr. Edwards’s exceptions against the “Reasonableness of Christianity;” and who, as the unmasker informs me, page 64, was chosen to vindicate my attempt, &c.

If the unmasker knows that he was so chosen, it is well. If I had known of such a choice, I should have desired that somebody should have been chosen to vindicate my attempt, who had understood it better. The unmasker and examiner are each of them so full of themselves, and their own systems, that I think they may be a fit match one for another; and so I leave these cocks of the game to try it out in an endless battle of wrangling

(‘till death them part) which of them has made the true and exact collection of fundamentals; and whose system of the two ought to be the prevailing orthodoxy, and be received for scripture. Only I warn the examiner to look to himself: for the unmasker has the whip hand of him, and gives him to understand, , that if he cannot do it himself by the strength of his lungs, the vehemency of his oratory, and endless attacks of his repetitions; the ecclesiastical power, and the civil magistrate’s lash, have, in store, demonstrative arguments to convince him that his [the unmasker’s] system is the only true christianity.

By the way, I must not forget to mind the unmasker here again, that he hath a very unlucky hand at guessing. For whereas he names Socinus, as one from whom I received my platform, and says that “Crellius gave me my cue;” it so falls out, that they are two authors of whom I never read a page. I say not this, as if I thought it a fault if I had; for I think I should have much better spent my time in them, than in the writings of our learned unmasker.

I was sure there was no offending the unmasker, without the guilt of atheism; only he here, , very mercifully lays it upon my book, and not upon my design. The “tendency of it to irreligion and atheism,” he has proved in an eloquent harangue, for he is such an orator he cannot stir a foot without a speech (made) as he bids us suppose, by the atheistical rabble. And who can deny, but he has chosen a fit employment for himself? Where could there be found a better speechmaker for the atheistical rabble? But let us hear him: for though he would give the atheistical rabble the credit of it, yet it is the unmasker speaks. And because it is a pity such a pattern of rhetoric and reason should be lost, I have, for my reader’s edification, set it all down verbatim.

“We are beholden to this worthy adventurer for ridding the world of so great an incumbrance, viz. that huge mass and unwieldy body of christianity, which took up so much room. Now we see that it was this bulk, and not that of mankind, which he had an eye to, when he so often mentioned this latter. This is a physician for our turn, indeed; we like this chymical operator, that doth not trouble us with a parcel of heavy drugs of no value, but contracts it all into a few spirits, nay doth his business with a single drop. We have been in bondage a long time to creeds and catechisms, systems and confessions; we have been plagued with a tedious bead-roll of articles, which our reverend divines have told us, we must make the matter of our faith. Yea, so it is, both conformists and nonconformists (though

disagreeing in some other things) have agreed in this, to molest and crucify us. But this noble writer (we thank him) hath set us free, and eased us, by bringing down all the christian faith into one point. We have heard some men talk of epistolary composures of the New Testament, as if great matters were contained in them, as if the great mysteries of christianity (as they call them) were unfolded there: but we could never make any thing of them; and now we find that this writer is partly of our opinion. He tells us that these are letters sent upon occasion; but we are not to look for our religion (for now, for this gentleman's sake, we begin to talk of religion) in these places. We believe it, and we believe that there is no religion but in those very chapters and verses, which he has set down in his treatise. What need we have any other part of the New Testament? That is bible enough, if not too much. Happy, thrice happy shall this author be perpetually esteemed by us; we will chronicle him as our friend and benefactor. It is not our way to saint people, otherwise we would certainly canonize this gentleman; and when our hand is in, his pair of booksellers, for their being so beneficial to the world in publishing so rich a treasure. It was a blessed day, when this hopeful birth saw the light; for hereby all the orthodox creed-makers and systematic men are ruined for ever. In brief, if we be for any christianity, it shall be this author's: for that agrees with us singularly well, it being so short, all couched in four words, neither more nor less. It is a very fine compendium, and we are infinitely obliged to this great reformer for it. We are glad at heart, that christianity is brought so low by this worthy penman; for this is a good presage, that it will dwindle into nothing. What! but one article, and that so brief too! We like such a faith, and such a religion, because it is nearer to none."

He hath no sooner done, but, as it deserved, he cries out, "Euge, sophos! and is not the reader," quoth he, "satisfied that such language as this hath real truth in it? Does not he perceive, that the discarding all the articles but one, makes way for the casting off that too?" Answ. It is but supposing that the reader is a civil gentleman, and answers, Yes, to these two questions; and then it is demonstration, that by this speech he has irrefragably proved the tendency of my book to irreligion and atheism.

I remember Chillingworth somewhere puts up this request to his adversary Knot: "Sir, I beseech you, when you write again, do us the favour to write nothing but syllogisms. For I find it still an extreme trouble to find out the concealed propositions, which are to connect the parts of your

enthymems. As now, for example, I profess to you I have done my best endeavour to find some glue, or solder, or cement, or thread, or any thing to tie the antecedent and this consequent together." The unmasker agrees so much in a great part of his opinion with that jesuit, (as I have shown already,) and does so infinitely out-do him in spinning ropes of sand, and a coarse thread of inconsistencies, which runs quite through his book; that it is with great justice I put him here in the jesuit's place, and address the same request to him.

His very next words give me a fresh reason to do it: for thus he argues, , “May we not expect, that those who deal thus with the creed, i. e. discard all the articles of it but one, will use the same method in reducing the ten commandments and the Lord’s prayer, abbreviate the former into one precept, and the latter into one petition?” Answ. If he will tell me where this creed he speaks of is, it will be much more easy to answer his demand. Whilst his creed, which he here speaks of, is yet no-where, it is ridiculous for him to ask questions about it. The ten commandments, and the Lord’s prayer, I know where to find in express words, set down by themselves, with peculiar marks of distinction. Which is the Lord’s prayer, we are plainly taught by this command of our Saviour, Luke xi. 2, “when ye pray, say, Our father,” &c. In the same manner and words, we are taught what we should believe, to make us his disciples, by his command to the apostles what they should preach, Matt. x. 7, “As ye go, preach, saying,” (What were they to say? Only this) “The kingdom of heaven is at hand.” Or, as St. Luke expresses it, chap. ix. 2, They were sent “to preach the kingdom of God, and to heal the sick:” which, what it was, we have sufficiently explained. But this creed of the unmasker, which he talks of, where is it? Let him show it us distinctly set out from the rest of the scripture. If he knows where it is, let him produce it, or leave talking of it, until he can. It is not the apostles creed, that is evident; for that creed he has discarded from being the standard of christian faith, and has told the world in words at length, That “if a man believes no more than is in express terms in the apostles creed, his faith will not be the faith of a christian.” Nay, it is plain, that creed has, in the unmasker’s opinion, the same tendency to atheism and irreligion, that my summary has. For the apostles creed, reducing the forty, or, perhaps, the four hundred fundamental articles of his christian creed to twelve; and leaving out the greatest part of those necessary ones, which he has already, and will hereafter, in good time, give us; does as much dispose men to serve the decalogue, and the Lord’s prayer, just so, as my reducing those twelve to two. For so many, at least, he has granted to be in my summary, viz. the article of one God, maker of heaven and earth; and the other, of Jesus the Messiah; though he every-where calls them but one; which, whether it be to show, with what love and regard to truth he continues, and consequently began this controversy; or whether it be to beguile and startle unwary, or confirm prejudiced readers; I shall leave others to judge. It is evident, he thinks his cause would be mightily maimed, if he were forced to leave out

the charge of one article; and he would not know what to do for wit or argument, if he should call them two: for then the whole weight and edge of his strong and sharp reasoning, in his “Thoughts concerning the causes of atheism,” , would be lost. There you have it in these words: “When the catholic faith is thus brought down to one single article, it will soon be reduced to none; the unit will dwindle into a cypher.” And here again, it makes the whole argument of his atheistical speech, which he winds up with these convincing words: “We are glad to hear, that christianity is brought so low by this worthy penman; for this is a good presage, that it will dwindle into nothing. What! one article, and that so brief too! We like such a faith, and such a religion, because it is so near none.” But I must tell this writer, of equal wit, sense, and modesty, that this religion, which he thus makes a dull farce of, and calls “near none,” is that very religion which our Saviour Jesus Christ and his apostles preached, for the conversion and salvation of mankind; no one article whereof, which they proposed as necessary to be received by unbelievers, to make them christians, is omitted. And I ask him, Whether it be his errand, as one of our Saviour’s ambassadors, to turn it thus into ridicule? For until he has shown, that they preached otherwise, and more than what the Spirit of truth has recorded of their preaching in their histories, which I have faithfully collected, and set down; all that he shall say, reflecting upon the plainness and simplicity of their doctrine, however directed against me, will by his atheistical rabble of all kinds, now they are so well entered and instructed in it by him, be all turned upon our Saviour and his apostles.

What tendency this, and all his other trifling, in so serious a cause as this is, has to the propagating of atheism and irreligion in this age, he were best to consider. This I am sure, the doctrine of but one article (if the author and finisher of our faith, and those he guided by his Spirit, had preached but one article) has no more tendency to atheism, than their doctrine of one God. But the unmasker every-where talks, as if the strength of our religion lay in the number of its articles; and would be presently routed, if it had been but a few; and therefore he has mustered up a pretty full band of them, and has a reserve of the Lord knows how many more, which shall be forth-coming upon occasion. But I shall desire to remind this learned divine, who is so afraid of what will become of his religion, if it should propose but one or a few articles, as necessary to be believed to make a man a christian; that the strength and security of our religion lies in the divine authority of those who

first promulgated the terms of admittance into the church, and not in the multitude of articles, supposed by some necessary to be believed to make a man a christian: and I would have him remember, when he goes next to make use of this strong argument of “one dwindling into a cypher,” that one is as remote as a million from none. And if this be not so, I desire to know whether his way of arguing will not prove pagan polytheism to be more remote from atheism than christianity. He will do well to try the force of his speech in the mouth of an heathen, complaining of the tendency of christianity to atheism, by reducing his great number of gods to but one, which was so near none, and would, therefore, soon be reduced to none.

The unmasker seems to be upon the same topic, where he so pathetically complains of the socinians, , in these words; “It is enough to rob us of our God, by denying Christ to be so; but must they spoil us of all the other articles of christian faith but one?” Have a better heart, good sir, for I assure you nobody can rob you of your God, but by your own consent, nor spoil you of any of the articles of your faith. If you look for them, where God has placed them, in the holy scripture, and take them as he has framed and fashioned them there; there you will always find them safe and sound. But if they come out of an artificer’s shop, and be of human invention, I cannot answer for them: they may, for aught I know, be nothing but an idol of your own setting up, which may be pulled down, should you cry out ever so much, “Great is Diana of the Ephesians!”

He, who considers this argument of one and none, as managed by the unmasker, and observes his pathetical way of reasoning all through his book, must confess, that he has got the very philosopher’s stone in disputing. That which would be worthless lead in others, he turns into pure gold; his oratory changes its nature, and gives it the noble tincture: so that what, in plain reasoning, would be nonsense, let him but put it into a speech, or an exclamation, and there it becomes strong argument. Whether this be not so, I desire mode and figure may decide. And to those I shall desire he would reduce the proofs, which, , he says he has given of these following propositions, viz.

XXIX. “THAT I HAVE CORRUPTED MEN’S MINDS.”

XXX. “THAT I HAVE DEPRAVED THE GOSPEL.”

XXXI. "THAT I HAVE ABUSED CHRISTIANITY."

For all these three, , he affirms of me without proof and without honesty.

Whether it be from confusion of thought, or unfairness of design; either because he has not clear distinct notions of what he would say, or finds it not to his purpose to speak them clearly out, or both together; so it is, that the unmasker very seldom, but when he rails, delivers himself so that one can certainly tell what he would have.

The question is, What is absolutely necessary to be believed by every one to make him a christian? It has been clearly made out, from an exact survey of the history of our Saviour and his apostles, that the whole aim of all their preaching every-where was, to convince the unbelieving world of these two great truths; first, That there was one, eternal, invisible God, maker of heaven and earth: and next, that Jesus of Nazareth was the Messiah, the promised King and Saviour: and that, upon men's believing these two articles, they were baptized and admitted into the church, i. e. received as subjects of Christ's kingdom, and pronounced believers. From whence it unavoidably follows, that these two are the only truths necessary to be believed to make a man a christian.

This matter of fact is so evident from the whole tenour of the four Gospels and the Acts; and presses so hard, that the unmasker, who contends for a great number of other points necessary to be believed to make a man a christian, thinks himself concerned to give some answer to it; but, in his usual way, full of uncertainty and confusion. To clear this matter, he lays down four particulars; the first is, , "That the believing Jesus to be the promised Messiah, was the first step to christianity."

The second, , "That though this one proposition, (viz. of Jesus the Messiah) be mentioned alone in some places, yet there is reason to think, and be persuaded, that at the same time other matters of faith were proposed."

The third, , "That though there are several parts and members of the christian faith, yet they do not all occur in any one place of scripture."

The fourth, , "That christianity was erected by degrees."

These particulars he tells us, , "he offers to clear an objection." To see, therefore, whether they are pertinent or no, we must examine what the objection is, as he puts it. I think it might have been put in a few words: this I am sure, it ought to have been put very clear and distinct. But the

unmasker has been pleased to give it us, , as followeth, “Because I designed these papers for the satisfying of the reader’s doubts, about any thing occurring, concerning the matter before us, and for the establishing of his wavering mind; I will here (before I pass to the second general head of my discourse) answer a query, or objection, which some, and not without some show of ground, may be apt to start: how comes it to pass, they will say, that this article of faith, viz. that Jesus is the Messiah, or Christ, is so often repeated in the New Testament? Why is this sometimes urged, without the mentioning of any other article of belief? Doth not this plainly show, that this is all that is required to be believed, as necessary to make a man a christian? May we not infer, from the frequent and sole repetition of this article in several places of the evangelists and the Acts, that there is no other point of faith of absolute necessity; but that this alone is sufficient to constitute a man a true member of Christ?”

By which he shows, that he is uncertain which way to put the objection, so as may be easiest to get rid of it: and therefore he has turned it several ways, and put several questions about it. As first,

“Why this article of faith,” viz. that Jesus is the Messiah, “is often so repeated in the New Testament?”

His next question is, “Why is this sometimes urged without the mentioning any other article of belief?” which supposes, that sometimes other articles of belief are mentioned with it.

The third question is, “May we not infer, from the frequent and sole repetition of this article, in several places of the evangelists and Acts?”

Which last question is in effect, Why is this so frequently and alone repeated in the evangelists and the Acts? i. e. in the preachings of our Saviour and his apostles to unbelievers. For of that he must give an account, if he will remove the difficulty. Which three, though put as one, yet are three as distinct questions, and demand a reason for three as distinct matters of fact, as these three are, viz. frequently proposed: sometimes proposed alone; and always proposed alone, in the preachings of our Saviour and his apostles: for so in truth it was all through the Gospels and the Acts, to the unconverted believers of one God alone.

These three questions being thus jumbled together in one objection, let us see how the four particulars, he mentions, will account for them.

The first of them is this: “That believing Jesus to be the promised Messias,” was, says he, “the first step to christianity.” Let it be so: What do

you infer from thence? The next words show: “therefore this, rather than any other article, was propounded to be believed by all those, whom either our Saviour or his apostles invited to embrace christianity.” Let your premises be ever so true, and your deduction of this proposition be ever so regular from them, it is all lost labour. This conclusion is not the proposition you were to prove. Your questions were, “Why this article is so often proposed?” And in those frequent repetitions, “Why sometimes urged alone, and why always proposed alone, viz. to those whom either our Saviour or his apostles invited to embrace christianity?” And your answer is, Because the believing “Jesus to be the Messias, was the first step to christianity.” This therefore remains upon you to be proved,

XXXII. “THAT, BECAUSE THE BELIEVING JESUS TO BE THE MESSIAS IS THE FIRST STEP TO CHRISTIANITY, THEREFORE THIS ARTICLE IS FREQUENTLY PROPOSED IN THE NEW TESTAMENT, IS SOMETIMES PROPOSED WITHOUT THE MENTIONING ANY OTHER ARTICLE, AND ALWAYS ALONE TO UNBELIEVERS.”

And when you have proved this, I shall desire you to apply it to our present controversy.

His next answer to those questions is in these words, , “That though this one proposition, or article, be mentioned alone in some places, yet there is reason to think, and be persuaded, that at the same time other matters of faith were proposed.” From whence it lies upon him to make out this reasoning, viz.

XXXIII. “THAT BECAUSE THERE IS REASON TO THINK, AND BE PERSUADED, THAT AT THE SAME TIME THAT THIS ONE ARTICLE WAS MENTIONED ALONE, (AS IT WAS SOMETIMES,) OTHER MATTERS OF FAITH WERE PROPOSED: THEREFORE THIS ARTICLE WAS OFTEN PROPOSED IN THE NEW TESTAMENT; SOMETIMES PROPOSED ALONE; AND ALWAYS PROPOSED ALONE, IN THE PREACHINGS OF OUR SAVIOUR AND HIS APOSTLES TO UNBELIEVERS.”

This I set down to show the force of his answer to his questions: supposing it to be true, not that I grant it to be true, that where “this one article is mentioned alone, we have reason to think, and be persuaded, that at the

same time other matters of faith [i. e. articles of faith necessary to be believed to make a man a christian] were proposed:” and I doubt not but to show the contrary.

His third particular, in answer to the question proposed in his objection, stands thus, , “That though there are several parts and members of the christian faith, yet they do not all occur in any one place of the scripture;” which answer lays it upon him to prove,

XXXIV. THAT BECAUSE “THE SEVERAL PARTS OF THE MEMBERS OF THE CHRISTIAN FAITH DO NOT ALL OCCUR IN ANY ONE PLACE OF SCRIPTURE,” THEREFORE THIS ARTICLE, THAT JESUS WAS THE “MESSIAS, WAS OFTEN PROPOSED IN THE NEW TESTAMENT, SOMETIMES PROPOSED ALONE, AND ALWAYS PROPOSED ALONE,” IN THE PREACHINGS OF OUR SAVIOUR AND HIS APOSTLES, THROUGH THE HISTORY OF THE EVANGELISTS AND THE ACTS.

The fourth and last particular, which he tell us is the main answer to the objection, is in these words, page 78,

“That christianity was erected by degrees.”

Which requires him to make out his argument, viz.

XXXV. “THAT BECAUSE CHRISTIANITY WAS ERECTED BY DEGREES, THEREFORE THIS ARTICLE, THAT JESUS WAS THE MESSIAS, WAS OFTEN PROPOSED IN THE NEW TESTAMENT, SOMETIMES PROPOSED ALONE, AND ALWAYS PROPOSED ALONE IN THE PREACHINGS OF OUR SAVIOUR AND HIS APOSTLES TO UNBELIEVERS, RECORDED IN THE HISTORY OF THE EVANGELISTS AND ACTS.”

For, as I said before, in these three questions he has put his objection; to which he tells us, this is the main answer.

Of these four particulars it is, that he says, , to “clear this objection, and to give a full and satisfactory answer to all doubts in this affair, I offer these ensuing particulars, which will lead the reader to the right understanding of the whole case.”

How well they have cleared the objection, may be seen by barely setting them down as answers to the questions, wherein he puts the objection.

This is all I have hitherto done; whereby is very visible, how well (supposing them true) they clear the objection: and how pertinently they are brought to answer those questions wherein his objection is contained. Perhaps it will be said, that neither these, nor any thing else, can be an apposite answer to those questions put so together. I answer, I am of the same mind. But if the unmasker through ignorance or shuffling, will talk thus confusedly, he must answer for it. He calls all his three questions, one objection, over and over again: and therefore, which of those questions it does or does not lie in, I shall not trouble myself to divine; since I think he himself cannot tell: for whichever he takes of them, it will involve him in equal difficulties. I now proceed to examine his particulars themselves, and the truth contained in them. The first, , stands thus:

“The believing of Jesus to be the promised Messiah was the first step to christianity. It was that which made way for the embracing of all the other articles, a passage to all the rest.” Answ. If this be, as he would have it, only the leading article, amongst a great many others, equally necessary to be believed, to make a man a christian; this is a reason why it should be constantly preached in the first place: but this is no reason why this alone should be so often repeated, and the other necessary points not be once mentioned. For I desire to know what those other articles are that, in the preaching of our Saviour and his apostles, are repeated or urged besides this?

In the next place, if it be true, that this article, viz. that Jesus is the Messiah, was only the first in order amongst a great many articles, as necessary to be believed; how comes it to pass, that barely upon the proposal and believing of this, men were admitted into the church as believers? The history of the New Testament is full of instances of this, as Acts viii. 5, 12, 13. ix. and in other places.

Though it be true, what the unmasker says here, “That if they did not give credit to this in the first place, that Jesus of Nazareth was that eminent and extraordinary person prophesied of long before, and that he was sent and commissioned by God; there could be no hope that they would attend to any other proposals, relating to the christian religion;” yet what he subjoins, “that this is the true reason, why that article was constantly propounded to be believed by all that looked towards christianity, and why it is mentioned so often in the evangelical writings,” is not true. For, first, this supposes that there were other articles joined with it. This he should have first proved,

and then given the reason for it; and not, as he does here, suppose what is in question, and then give a reason why it is so; and such a reason that is inconsistent with the matter of fact, that is every-where recorded in holy writ. For if the true reason why the preaching of this article, “that Jesus was the Messiah,” as it is recorded in the history of the New Testament, were only to make way for the other articles, one must needs think, that either our Saviour and his apostles (with reverence be it spoken) were very strange preachers; or, that the evangelists, and author of the Acts, were very strange historians. The first were to instruct the world in a new religion, consisting of a great number of articles, says the unmasker, necessary to be believed to make a man a christian, i. e. a great number of propositions, making a large system, every one whereof is so necessary for a man to understand and believe, that if any one be omitted, he cannot be of that religion. What now did our Saviour and his apostles do? Why, if the unmasker may be believed, they went up and down with danger of their lives, and preached to the world. What did they preach? Even this single proposition to make way for the rest, viz. “This is the eminent man sent from God,” to teach you other things: which amounts to no more but this, that Jesus was the person which was to teach them the true religion, but the true religion itself is not to be found in all their preaching; nay, scarce a word of it. Can there be any thing more ridiculous than this? And yet this was all they preached, if it be true, that this was all they meant by the preaching every-where, Jesus to be the Messiah, and if it were only an introduction, and a making way for the doctrines of the gospel. But it is plain, it was called the gospel itself. Let the unmasker, as a true successor of the apostles, go and preach the gospel, as the apostles did, to some part of the heathen world, where the name of Christ is not known: would not he himself, and every body think, he was very foolishly employed, if he should tell them nothing but this, that Jesus was the person promised and sent from God to reveal the true religion; but should teach them nothing of that true religion, but this preliminary article? Such the unmasker makes all the preaching, recorded in the New Testament, for the conversion of the unbelieving world. He makes the preaching of our Saviour and his apostles to be no more but this, that the great prophet promised to the world was come, and that Jesus was he: but what his doctrine was, that they were silent in, and taught not one article of it. But the unmasker misrepresents it: for as to his accusing the historians, the evangelists, and writers of the Acts of the apostles, for their shameful

omission of the whole doctrine of the christian religion, to save his hypothesis, as he does under his next head, in these words: “that though this one proposition be mentioned alone in some places, yet there is reason to think, and be persuaded, that at the same time other matters of faith were proposed;” I shall show how bold he makes with those inspired historians, when I come to consider that particular.

How ridiculous, how senseless, this bold unmasker, and reformer of the history of the New Testament, makes the preaching of our Saviour and his apostles, as it stands recorded of them by infallible writers, is visible. But taking it, as in truth it is there, we shall have a quite other view of it. Our Saviour preached everywhere the kingdom of God; and by his miracles declared himself to be the king of that kingdom. The apostles preached the same, and after his ascension, openly avowed him to be the Prince and Saviour promised: but preached not this as a bare speculative article of simple belief; but that men might receive him for their King, and become his subjects. When they told the world that he was the Christ, it was not as the unmasker will have it: believe this man to be a prophet, and then he will teach you his new religion; which when you have received and embraced all and every article thereof, which are a great number, you will then be christians, if you be not ignorant or incredulous of any of them. But it was, believe this man to be your King sent from God; take him for such, with a resolution to observe the laws he has given you; and you are his subjects, you are christians. For those that truly did so, made themselves his subjects; and to continue so, there was no more required, than a sincere endeavour to know his will in all things, and to obey it. Such a preaching as this, of Jesus to be the Messiah, the King and Deliverer, that God almighty had promised to mankind, and now had effectually sent, to be their Prince and Ruler, was not a simple preparation to the gospel: but, when received with the obedience of faith, was the very receiving of the gospel, and had all that was requisite to make men christians. And without it be so understood, nobody can clear the preaching of our Saviour and his apostles from that incredible imperfection, or their historians from that unpardonable negligence, and not doing either what they ought, or what they undertook, which our unmasker hath so impiously charged upon them; as will appear yet plainer, in what I have to say to the unmasker’s next particular. For, as to the remainder of this paragraph, it contains nothing but his censure and contempt of me, for not being of his mind, for not seeing as he sees, i. e. in

effect not laying that blame which he does, either on the preaching of our Saviour and his apostles, or on the inspired writings of their historians, to make them comply with his system, and the christianity he would make.

The unmasker's second particular, , tells us, "That though this one proposition or article be mentioned alone in some places, yet there is reason to think and be persuaded, that at the same time other matters of faith were proposed. For it is confessed, by all intelligent and observing men, that the history of the scripture is concise; and that in relating matter of fact, many passages are omitted by the sacred penmen. Wherefore, though but this one article of belief (because it is a leading one, and makes way for the rest) be expressly mentioned in some of the gospels, yet we must not conclude thence, that no other matter of faith was required to be admitted of. For things are briefly set down in the evangelical records, and we must suppose many things which are not in direct terms related."

Answ. The unmasker here keeps to his usual custom of speaking in doubtful terms. He says, that where this one article that Jesus is the Messiah, is alone recorded in the preaching of our Saviour and his apostles; "We have reason to be persuaded, that at the same time other matters of faith were proposed." If this be to his purpose, by matters of faith, must be meant fundamental articles of faith, absolutely necessary to be believed by every man to make him a christian. That such matters of faith are omitted, in the history of the preaching of our Saviour and his apostles, by the sacred historians; this, he says, "we have reason to be persuaded of."

Answ. They need be good reasons to persuade a rational man, that the evangelists, in their history of our Saviour and his apostles, (if they were but ordinarily fair and prudent men,) did, in an history published to instruct the world in a new religion, leave out the necessary and fundamental parts of that religion. But let them be considered as inspired writers, under the conduct of the infallible Spirit of God, putting them upon, and directing them in, the writing of this history of the gospel: and then it is impossible for any christian, but the unmasker, to think, that they made any such gross omissions, contrary to the design of their writing, without a demonstration to convince him of it. Now all the reason that our unmasker gives is this: "That it is confessed by all intelligent and observing men, that the history of the scripture is concise; and that in relating matters of fact, many passages are omitted by the sacred penmen."

Answ. The unmasker might have spared the confession of intelligent and observing men, after so plain a declaration of St. John himself, chap. xx. 31, "Many other things did Jesus in the presence of his disciples, which are not written in this book." And again, xxi. 25, "There are also many other things that Jesus did, the which if they should be written every one, I suppose the world could not contain the books that should be written." There needs, therefore, no opinion of intelligent and observing men to convince us, that the history of the gospel is so far concise, that a great many matters of fact are omitted, and a great many less material circumstances, even of those that are set down. But will any intelligent or observing man, any one that bears the name of a christian, have the impudence to say, that the inspired writers, in the relation they give us of what Christ and his apostles preached to unbelievers to convert them to the faith, omitted the fundamental articles, which those preachers proposed to make men christians; and without a belief of which, they could not be christians?

The unmasker talks after his wonted fashion; i. e. seems to say something, which, when examined, proves nothing to his purpose. He tells us, "That in some places," where the article of "Jesus the Messiah is mentioned alone, at the same time other matters of faith were proposed." I ask, were these other matters of faith all the unmasker's necessary articles? If not, what are those other matters of faith to the unmasker's purpose? As for example, in St. Peter's sermon, Acts ii. "Other matters of faith were proposed with the article of Jesus the Messiah." But what does this make for his fundamental articles: were they all proposed with the article of Jesus the Messiah? If not, unbelievers were converted, and brought into the church, without the unmasker's necessary articles. Three thousand were added to the church by this one sermon. I pass by, now, St. Luke's not mentioning a syllable of the greatest part of the unmasker's necessary articles; and shall consider only, how long that sermon may have been. It is plain from ver. 15, that it began not until about nine in the morning; and from ver. 41, that before night three thousand were converted and baptized. Now I ask the unmasker, Whether so small a number of hours, as Peter must necessarily employ in preaching to them, were sufficient to instruct such a mixed multitude so fully in all those articles, which he has proposed as necessary to be believed to make a man a christian; as that every one of those three thousand, that were that day baptized, did understand, and explicitly believe every one of those his articles, just in the sense of our

unmasker's system? Not to mention those remaining articles, which the unmasker will not be able, in twice as many months, to find and declare to us.

He says, "That in some places," where the article of "Jesus the Messiah is mentioned alone, at the same time other matters of faith were proposed:" Let us take this to be so at present, yet this helps not the unmasker's case. The fundamental articles, that were proposed by our Saviour and his apostles, necessary to be believed to make men christians, are not set down; but only this single one, of "Jesus the Messiah:" therefore, will any one dare to say they are omitted everywhere by the evangelists? Did the historians of the gospel make their relation so concise and short, that giving an account in so many places of the preaching of our Saviour and his apostles, for the conversion of the unbelieving world, they did not in any one place, nor in all of them together, set down the necessary points of that faith, which their unbelieving hearers were converted to? If they did not, how can their histories be called the Gospels of Jesus Christ? Or how can they serve to the end for which they were written? Which was to publish to the world the doctrine of Jesus Christ, that men might be brought into his religion. Now I challenge the unmasker to show me, not out of any one place, but out of all the preachings of our Saviour and his apostles, recorded in the four Gospels, and in the Acts, all those propositions which he has reckoned up as fundamental articles of faith. If they are not to be found there, it is plain, that either they are not articles of faith, necessary to be believed to make a man a christian; or else, that those inspired writers have given us an account of the gospel, or christian religion, wherein the greatest part of the doctrines necessary to be believed to make a man a christian, are wholly omitted. Which in short is to say, that the christianity, which is recorded in the Gospels and the Acts, is not that christianity which is sufficient to make a man a christian. This (as absurd and impious as it is) is what our unmasker charges upon the conciseness (as he is pleased to call it) of the evangelical history. And this we must take upon his word, though these inspired writers tell us the direct contrary: for St. Luke, in his preface to his gospel, tells Theophilus, that having a perfect knowledge of all things, the design of his writing was to set them in order, that he might know the certainty of those things that were believed amongst christians. And his history of the Acts begins thus: "The former treatise [i. e. his gospel] have I made, O Theophilus, of all that Jesus began to do and to teach." So that, how concise

soever the unmasker will have his history to be, he professes it to contain all that Jesus taught. Which all must, in the narrowest sense that can be given it, contain at least all things necessary to make a man a christian. It would else be a very lame and imperfect history of all that Jesus taught, if the faith contained in it were not sufficient to make a man a christian. This indeed, as the unmasker hath been pleased to term it, would be a very lank faith, a very lank gospel.

St. John also says thus, of his history of the gospel, chap. xx. 30, 31, "Many other signs truly did Jesus, in the presence of his disciples, which are not written in this book:" so far his history is, by his own confession, concise. "But these," says he, "are written that ye might believe that Jesus is the Messiah, the Son of God; and that, believing, ye might have life through his name." As concise as it was, there was yet (if the apostle's word may be taken for it against the unmasker's) enough contained in his gospel, for the procuring of eternal life, to those who believed it. And, whether it was that one article that he here sets down, viz. That Jesus was the Messiah, or that set of articles which the unmasker gives us, I shall leave to this modern divine to resolve. And, if he thinks still, that all the articles he has set down in his roll, are necessary to be believed to make a man a christian, I must desire him to show them to me in St. John's gospel, or else to convince the world, that St. John was mistaken, when he said, that he had written his gospel, that men might believe that "Jesus was the Messiah, the Son of God; and that, believing, they might have life through his name."

So that, granting the history of the scripture to be so concise, as the unmasker would have it, viz. that in some places the infallible writers, recording the discourses of our Saviour and his apostles, omitted all the other fundamental articles proposed by them to be believed to make men christians, but this one, that Jesus was the Messiah; yet this will not remove the objection that lies against his other fundamentals, which are not to be found in the histories of the four evangelists; nay, not to be found in any one of them. If every one of them contains the gospel of Jesus Christ, and consequently all things necessary to salvation, whether this will not be a new ground of accusation against me, and give the unmasker a right to charge me with laying by three of the gospels with contempt, as well as he did before charge me with a contempt of the epistles; must be left to his sovereign authority to determine.

Having showed that, allowing all he says here to be as he would have it, yet it clears not the objection that lies against his fundamentals; I shall now examine what truth there is in what he here pretends, viz. that though the one article, That Jesus is the Messiah, be mentioned “alone in some places, yet we have reason to be persuaded, from the conciseness of the” scripture history, that there were, at the same time, joined with it other necessary articles of faith, in the preaching of our Saviour and his apostles.

It is to be observed, that the unmasker builds upon this false supposition, that in some places, other necessary articles of faith, joined with that of Jesus the Messiah, are by the evangelists mentioned to be proposed by our Saviour and his apostles, as necessary to be believed to make those they preached to christians. For his saying, that in some places, that “one necessary article is mentioned alone,” implies, that in other places it is not mentioned alone, but joined with other necessary articles. But when it will remain upon him to show,

XXXVI. “IN WHAT PLACE, EITHER OF THE GOSPELS OR OF THE ACTS, OTHER ARTICLES OF FAITH ARE JOINED WITH THIS, AND PROPOSED AS NECESSARY TO BE BELIEVED TO MAKE MEN CHRISTIANS.”

The unmasker, it is probable, will tell us, that the article of Christ’s resurrection is sometimes joined with this of the Messiah, as particularly in that first sermon of St. Peter, Acts ii. by which there were three thousand added to the church at one time. Answ. This sermon, well considered, will explain to us both the preaching of the apostles; what it was that they proposed to their unbelieving auditors, to make them christians; and also the manner of St. Luke’s recording their sermons. It is true, that here are delivered by St. Peter many other matters of faith, besides that of Jesus being the Messiah; for all that he said, being of divine authority, is matter of faith, and may not be disbelieved. The first part of his discourse is to prove to the Jews, that what they had observed of extraordinary at that time, amongst the disciples, who spake variety of tongues, did not proceed from wine, but from the Holy Ghost; and that this was the pouring out of the Spirit, prophesied of by the prophet Joel. This is all matter of faith, and is written, that it might be believed: but yet I think, that neither the unmasker, nor any body else will say, that this is such a necessary article of faith, that

no man could, without an explicit belief of it, be a christian; though, being a declaration of the Holy Ghost by St. Peter, it is so much a matter of faith, that no-body to whom it is now proposed, can deny it, and be a christian. And thus all the scripture of the New Testament, given by divine inspiration, is matter of faith, and necessary to be believed by all christians, to whom it is proposed. But yet I do not think any one so unreasonable as to say, that every proposition in the New Testament is a fundamental article of faith, which is required explicitly to be believed to make a man a christian.

Here now is a matter of faith joined, in the same sermon, with this fundamental article, that “Jesus is the Messiah;” and reported by the sacred historian so at large, that it takes up a third part of St. Peter’s sermon, recorded by St. Luke: and yet it is such a matter of faith, as is not contained in the unmasker’s catalogue of necessary articles. I must ask him then, whether St. Luke were so concise an historian, that he would so at large set down a matter of faith, proposed by St. Peter, that was not necessary to be believed to make a man a christian, and wholly leave out the very mention of all the unmasker’s additional necessary articles, if indeed they were necessary to be believed to make men christians? I know not how any one could charge the historian with greater unfaithfulness, or greater folly. But this the unmasker sticks not at, to preserve to himself the power of appointing what shall, and what shall not, be necessary articles: and of making his system the christianity necessary, and only necessary to be received.

The next thing that St. Peter proceeds to, in this his sermon, is, to declare to the unbelieving jews that Jesus of Nazareth, who had done miracles amongst them, whom they had crucified, and put to death, and whom God had raised again from the dead, was the Messiah.

Here indeed our Saviour’s crucifixion, death, and resurrection, are mentioned: and if they were no-where else recorded, are matters of faith; which, with all the rest of the New Testament, ought to be believed by every christian, to whom it is thus proposed, as a part of divine revelation. But that these were not here proposed to the unbelieving jews, as the fundamental articles, which St. Peter principally aimed at, and endeavoured to convince them of, is evident from hence, that they are made use of, as arguments to persuade them of this fundamental truth, viz. that Jesus was the Messiah, whom they ought to take for their Lord and Ruler. For whatsoever is brought as an argument, to prove another truth, cannot be

thought to be the principal thing aimed at, in that argumentation; though it may have so strong and immediate a connection with the conclusion, that you cannot deny it, without denying even what is inferred from it, and is therefore the fitter to be an argument to prove it. But that our Saviour's crucifixion, death, and resurrection, were used here as arguments to persuade them into a belief of this fundamental article, that Jesus was the Messiah, and not as propositions of a new faith they were to receive, is evident from hence, that St. Peter preached here to those who knew the death and crucifixion of Jesus as well as he; and therefore these could not be proposed to them, as new articles of faith to be believed; but those matters of fact being what the jews knew already, were a good argument, joined with his resurrection, to convince them of that truth, which he endeavoured to give them a belief of. And therefore he rightly inferred, from these facts joined together, this conclusion, the believing whereof would make them christians: "Therefore let all the house of Israel know assuredly, that God hath made that same Jesus, whom ye have crucified, Lord and Christ." To the making good this sole proposition, his whole discourse tended: this was the sole truth he laboured to convince them of; this the faith he endeavoured to bring them into; which as soon as they had received with repentance, they were by baptism admitted into the church, and three thousand at once were made christians.

Here St. Luke's own confession, without that "of intelligent and observing men," which the unmasker has recourse to, might have satisfied him again, "that in relating matters of fact, many passages were omitted by the sacred penmen." For, says St. Luke here, ver. 40, "And with many other words," which are not set down.

One would, at first sight, wonder why the unmasker neglects these demonstrative authorities of the holy penmen themselves, where they own their omissions, to tell us, that it is "confessed by all intelligent and observing men, that in relating matters of fact, many passages were omitted by the sacred penmen." St. John, in what he says of his gospel, directly professes large omissions, and so does St. Luke here. But these omissions would not serve the unmasker's turn; for they are directly against him, and what he would have: and therefore he had reason to pass them by. For St. John, in that passage above cited, chap. xx. 30, 31, tells us, that how much soever he had left out of his history, he had inserted that which was enough to be believed to eternal life: "but these are written, that ye might believe,

and believing, ye might have life.” But this is not all he assures us of, viz. that he had recorded all that was necessary to be believed to eternal life; but he, in express words, tells us what is that all, that is necessary to be believed to eternal life: and for the proof of which proposition alone, he writ all the rest of his gospel, viz. that we might believe. What? even this: “That Jesus is the Christ, the Son of God,” and that, believing this, we “might have life through his name.”

This may serve as a key to us, in reading the history of the New Testament; and show us why this article, that Jesus was the Messiah, is nowhere omitted, though a great part of the arguments used to convince men of it, nay, very often the whole discourse, made to lead men into the belief of it, be intirely omitted. The Spirit of God directed them every-where to set down the article, which was absolutely necessary to be believed to make men christians; so that that could no ways be doubted of, nor mistaken: but the arguments and evidences, which were to lead men into this faith, would be sufficient, if they were once found anywhere, though scattered here and there, in those writings, whereof that infallible Spirit was the author. This preserved the decorum used in all histories, and avoided those continual, large, and unnecessary repetitions, which our critical unmasker might have called tedious, with juster reason than he does the repetition of this short proposition, that Jesus is the Messiah; which I set down no oftener in my book, than the Holy Ghost thought fit to insert it in the history of the New Testament, as concise as it is. But this, it seems to our nice unmasker, is “tedious, tedious and offensive.” And if a christian, and a successor of the apostles, cannot bear the being so often told, what it was that our Saviour and his apostles every-where preached to the believers of one God, though it be contained in one short proposition; what cause of exception and disgust would it have been to heathen readers, some whereof might, perhaps, have been as critical as the unmasker, if this sacred history had, in every page, been filled with the repeated discourses of the apostles, all of them everywhere to the same purpose, viz. to persuade men to believe, that Jesus was the Messiah? It was necessary, even by the laws of history, as often as their preaching anywhere was mentioned, to tell to what purpose they spoke; which being always to convince men of this one fundamental truth, it is no wonder we find it so often repeated. But the arguments and reasonings with which this one point is urged, are, as they ought to be, in most places, left out. A constant repetition of them had been superfluous,

and consequently might justly have been blamed as “tedious.” But there is enough recorded abundantly to convince any rational man, any one not wilfully blind, that he is that promised Saviour. And, in this, we have a reason of the omissions in the history of the New Testament; which were no other than such as became prudent, as well as faithful writers. Much less did that conciseness (with which the unmasker would cover his bold censure of the Gospels and the Acts, and, as it seems, lay them by with contempt) make the holy writers omit any thing, in the preaching of our Saviour and his apostles, absolutely necessary to be known and believed to make men christians.

Conformable hereunto, we shall find St. Luke writes his history of the Acts of the Apostles. In the beginning of it, he sets down at large some of the discourses made to the unbelieving jews. But in most other places, unless it be where there was something particular in the circumstances of the matter, he contents himself to tell to what purpose they spoke: which was everywhere only this, that Jesus was the Messiah. Nay, St. Luke, in the first speech of St. Peter, Acts ii. which he thought fit to give us a great part of, yet owns the omission of several things that the apostle said. For, having expressed this fundamental doctrine, that Jesus was the Messiah, and recorded several of the arguments wherewith St. Peter urged it, for the conversion of the unbelieving jews, his auditors, he adds, ver. 40, “And with many other words did he testify and exhort, saying, Save yourselves from this untoward generation.” Here he confesses, that he omitted a great deal which St. Peter had said to persuade them, To what? To that which, in other words, he had just said before, ver. 38, “Repent and be baptized every one of you in the name of Jesus Christ,” i. e. Believe Jesus to be the Messiah, take him as such for your Lord and King, and reform your lives by a sincere resolution of obedience to his laws.

Thus we have an account of the omissions in the records of matters of fact in the New Testament. But will the unmasker say, That the preaching of those articles that he has given us, as necessary to be believed to make a man a christian, was part of those matters of fact, which have been omitted in the history of the New Testament? Can any one think, that “the corruption and degeneracy of human nature, with the true original of it, (the defection of our first parents,) the propagation of sin and mortality, our restoration and reconciliation by Christ’s blood, the eminency and excellency of his priesthood, the efficacy of his death, the full satisfaction

thereby made to divine justice, and his being made an all-sufficient sacrifice for sin, our justification by Christ's righteousness, election, adoption," &c. were all proposed, and that too, in the sense of our author's system, by our Saviour and his apostles, as fundamental articles of faith, necessary to be explicitly believed by every man, to make him a christian, in all their discourses to unbelievers; and yet that the inspired penmen of those histories every-where left the mention of these fundamental articles wholly out? This would have been to have writ, not a concise, but an imperfect history of all that Jesus and his apostles taught.

What an account would it have been of the gospel, as it was first preached and propagated, if the greatest part of the necessary doctrines of it were wholly left out, and a man could not find, from one end to the other of this whole history, that religion which is necessary to be believed to make a man a christian? And yet this is that, which, under the notion of their being concise, the unmasker would persuade us to have been done by St. Luke and the other evangelists, in their histories. And it is no less than what he plainly says, in his "Thoughts concerning the causes of atheism," , where, to aggravate my fault, in passing by the epistles, and to show the necessity of searching in them for fundamentals, he in words blames me; but in effect condemns the sacred history contained in the Gospels and the Acts. "It is most evident," says he, "to any thinking man, that the author of the Reasonableness of christianity, purposely omits the epistolary writings of the apostles, because they are fraught with other fundamental doctrines, besides that one which he mentions. There we are instructed concerning these grand heads of christian divinity." Here, i. e. in the epistles, says he, "there are discoveries concerning satisfaction," &c. And, in the close of his list of grand heads, as he calls them, some whereof I have above set down out of him, he adds, "These are the matters of faith contained in the epistles." By all which expressions he plainly signifies, that these, which he calls fundamental doctrines, are none of those we are instructed in, in the Gospels and the Acts; that they are not discovered nor contained in the historical writings of the evangelists: whereby he confesses, that either our Saviour and his apostles did not propose them in their preachings to their unbelieving hearers; or else, that the several faithful writers of their history, wilfully, i. e. unfaithfully, every-where omitted them in the account they have left us of those preachings; which could scarce possibly be done by them all, and every-where, without an actual combination amongst them, to

smother the greatest and most material parts of our Saviour's and his apostles discourses. For what else did they, if all that the unmasker has set down in his list be fundamental doctrines; every one of them absolutely necessary to be believed to make a man a christian, which our Saviour and his apostles every-where preached, to make men christians? but yet St. Luke, and the other evangelists, by a very guilty and unpardonable conciseness, every-where omitted them, and throughout their whole history, never once tell us, they were so much as proposed, much less, that they were those articles which the apostles laboured to establish and convince men of every-where, before they admitted them to baptism? Nay the far greatest part of them, the history they writ does not any-where so much as once mention? How, after such an imputation as this, the unmasker will clear himself from laying by the four Gospels and the Acts with contempt, let him look; if my not collecting fundamentals out of the epistles had that guilt in it. For I never denied all the fundamental doctrines to be there, but only said, that there they were not easy to be found out, and distinguished from doctrines not fundamental. Whereas our good unmasker charges the historical books of the New Testament with a total omission of the far greatest part of those fundamental doctrines of christianity, which he says, are absolutely necessary to be believed to make a man a christian.

To convince the reader what was absolutely required to be believed to make a man a christian, and thereby clear the holy writers from the unmasker's slander, any one need but look a little farther into the history of the Acts, and observe St. Luke's method in the writing of it. In the beginning (as we observed before), and in some few other places, he sets down at large the discourses made by the preachers of christianity, to their unbelieving auditors. But in the process of his history, he generally contents himself to relate, what it was their discourses drive at; what was the doctrine they endeavoured to convince their unbelieving hearers of, to make them believers. This we may observe, is never omitted. This is every-where set down. Thus, Acts v. 42, he tells us, that "daily in the temple, and in every house, the apostles ceased not to teach, and to preach Jesus the Messiah." The particulars of their discourses he omits, and the arguments they used to induce men to believe, he omits; but never fails to inform us carefully, what it was the apostles taught and preached, and would have men believe. The account he gives us of St. Paul's preaching at Thessalonica, is this: That "three sabbath-days he reasoned with the jews

out of the scriptures, opening and alleging, that the Messiah must needs have suffered, and risen again from the dead; and that Jesus was the Messiah; Acts xvii. 2, 3. At Corinth, that he reasoned in the synagogue every sabbath, and persuaded the jews and the Greeks, and testified that Jesus was the Messiah;" xviii. 4, 5. That "Apollos mightily convinced the jews, showing by the Scriptures, that Jesus was the Messiah;" xviii. 28.

By these, and the like places, we may be satisfied what it was, that the apostles taught and preached, even this one proposition, That Jesus was the Messiah: for this was the sole proposition they reasoned about; this alone they testified, and they showed out of the scriptures; and of this alone they endeavoured to convince the jews and the Greeks, that believed one God. So that it is plain from hence, that St. Luke omitted nothing, that the apostles taught and preached; none of those doctrines that it was necessary to convince unbelievers of, to make them christians; though he, in most places, omitted, as was fit, the passages of scripture which they alleged, and the arguments those inspired preachers used to persuade men to believe and embrace that doctrine.

Another convincing argument, to show that St. Luke omitted none of those fundamental doctrines, which the apostles any-where proposed as necessary to be believed, is from that different account he gives us of their preaching in other places, and to auditors otherwise disposed. Where the apostles had to do with idolatrous heathens, who were not yet come to the knowledge of the only true God, there, he tells us, they proposed also the article of the one invisible God, maker of heaven and earth: and this we find recorded in him out of their preaching to the Lystrians, Acts xiv. and to the Athenians, Acts xvii. In the latter of which St. Luke, to convince his reader, that he, out of conciseness, omits none of those fundamental articles, that were any-where proposed by the preachers of the gospel, as necessary to be believed to make men christians, sets down not only the article of Jesus the Messiah, but that also of the one invisible God, creator of all things; which, if any necessary one might, this of all other fundamental articles might, by an author that affected brevity, with the fairest excuse, have been omitted, as being implied in that other, of the Messiah ordained by God. Indeed in the story of what Paul and Barnabas said at Lystra, the article of the Messiah is not mentioned. Not that St. Luke omitted that fundamental article, where the apostles taught it: but, they having here begun their preaching with that of the one living God, they had not, as appears, time to

proceed farther, and propose to them what yet remained to make them christians: all that they could do, at that time, was, to hinder the people from sacrificing to them. And, before we hear any more of their preaching, they were, by the instigation of the jews, fallen upon, and Paul stoned.

This, by the way, shows the unmasker's mistake in his first particular, , where he says (as he does here again, in the second particular, which we are now examining) that "believing Jesus to be the Messiah is the first step to christianity; and therefore this, rather than any other, was propounded to be believed by all those, whom either our Saviour, or the apostles, invited to embrace christianity." The contrary whereof appears here; where the article of one God is proposed in the first place, to those whose unbelief made such a proposal necessary. And therefore, if his reason (which he uses again here,) were good, viz. That the article of the Messiah is expressly mentioned alone, "because it is a leading article, and makes way for the rest," this reason would rather conclude for the article of one God; and that alone should be expressly mentioned, instead of the other. Since, as he argues for the other, , "If they did not believe this, in the first place," viz. that there was one God, "there could be no hopes that they would attend unto any other proposal, relating to the christian religion. The vanity and falsehood of which reasoning, viz. that "the article of Jesus the Messiah was everywhere propounded, rather than any other, because it was the leading article," we see in the history of St. Paul's preaching to the Athenians. St. Luke mentions more than one article, where more than one was proposed by St. Paul; though the first of them was that leading article of one God, which if not received, "in the first place, there could be no hope they would attend to the rest."

Something the unmasker would make of this argument, of a leading article, for want of a better, though he knows not what. In his first particular, , he makes use of it to show, why there was but that one article proposed by the first preachers of the gospel; and how well that succeeds with him, we have seen. For this is demonstration, that if there were but that one proposed by our Saviour and the apostles, there was but that one necessary to be believed to make men christians; unless he will impiously say, that our Saviour and the apostles went about preaching to no purpose: for if they proposed not all that was necessary to make men christians, it was in vain for them to preach, and others to hear; if when they heard and believed all that was proposed to them, they were not yet christians: for if

any article was omitted in the proposal, which was necessary to make a man a christian, though they believed all that was proposed to them, they could not yet be christians; unless a man can, from an infidel, become a christian, without doing what was necessary to make him a christian.

Further, if his argument, of its being a leading article, proves, that that alone was proposed, it is a contradiction to give it as a reason, why it was set down alone by the historian, where it was not proposed alone by the preacher, but other necessary “matters of faith were proposed with it;” unless it can be true, that this article, of “Jesus is the Messiah,” was proposed alone by our Saviour and his apostles, because it was a leading article, and was mentioned alone in the history of what they preached, because it was a leading article, though it were not proposed alone, but jointly with other necessary matters of faith. For this is the use he makes here again, , of his leading article, under his second particular, viz. to show why the historians mentioned this necessary article of Jesus the Messiah alone, in places where the preachers of the gospel proposed it not alone, but with other necessary articles. But, in this latter case, it has no show of a reason at all. It may be granted as reasonable for the teachers of any religion not to go any farther, where they see the first article which they propose is rejected; where the leading truth, on which all the rest depends, is not received. But it can be no reason at all for an historian, who writes the history of these first preachers, to set down only the first and leading article, and omit all the rest, in instances where more were not only proposed, but believed and embraced, and upon that the hearers and believers admitted into the church. It is not for historians to put any distinction between leading, or not leading articles; but, if they will give a true and useful account of the religion, whose original they are writing, and of the converts made to it, they must tell, not one, but all those necessary articles, upon assent to which, converts were baptized into that religion, and admitted into the church. Whoever says otherwise, accuses them of falsifying the story, misleading the readers, and giving a wrong account of the religion which they pretend to teach the world, and to preserve and propagate to future ages. This (if it were so) no pretence of conciseness could excuse or palliate.

There is yet remaining one consideration, which were sufficient of itself to convince us, that it was the sole article of faith which was preached; and that if there had been other articles necessary to be known and believed by

converts, they could not, upon any pretence of conciseness, be supposed to be omitted: and that is the commissions of those, that were sent to preach the gospel. Which since the sacred historians mention, they cannot be supposed to leave out any of the material and main heads of those commissions.

St. Luke records it, chap. iv. 43, that our Saviour says of himself, “I must go into the other towns to tell the good news of the kingdom; for (εἰς τ[Editor: illegible character]to) upon this errand am I sent.” This St. Mark calls simply preaching. This preaching, what it contained, St. Matthew tells us, chap. iv. 23, “And Jesus went about all Galilee, teaching in their synagogues, and preaching the good news of the kingdom, and healing all manner of sickness and all manner of diseases among the people.” Here we have his commission, or end of his being sent, and the execution of it; both terminating in this, that he declared the good news, that the kingdom of the Messiah was come; and gave them to understand by the miracles he did, that he himself was he. Nor does St. Matthew seem to affect such conciseness, that he would have left it out, if the gospel had contained any other fundamental parts necessary to be believed to make men christians. For he here says, “All manner of sickness, and all manner of diseases,” when either of them might have been better left out, than any necessary article of the gospel, to make his history concise.

We see what our Saviour was sent for. In the next place, let us look into the commission he gave the apostles, when he sent them to preach the gospel. We have it in the tenth of St. Matthew, in these words: “Go not into the way of the gentiles, and into any city of the Samaritans enter ye not. But go rather to the lost sheep of the house of Israel. And as ye go, preach, saying, The kingdom of heaven is at hand. Heal the sick, cleanse the lepers, raise the dead, cast out devils: freely have ye received, freely give. Provide neither gold, nor silver, nor brass in your purses, nor scrip in your journey; neither two coats, neither shoes, nor yet staves, (for the workman is worthy of his meat.) And into whatsoever city, or town, ye shall enter, inquire who in it is worthy, and there abide until ye go thence. And when ye come into any house salute it. And if the house be worthy, let your peace come upon it; and if it be not worthy, let your peace return to you. And whosoever shall not receive you, nor hear your words; when ye depart out of that house, or city, shake off the dust of your feet. Verily I say unto you, it shall be more tolerable for the land of Sodom and Gomorrha, in the day of judgment, than

for that city. Behold I send you forth as sheep, in the midst of wolves: be ye therefore wise as serpents, and harmless as doves. But beware of men; for they will deliver you up to the councils, and they will scourge you in their synagogues. And ye shall be brought before governors and kings for my sake, for a testimony against them and the gentiles. But when they deliver you up, take no thought, how or what ye shall speak: for it shall be given you in that same hour, what ye shall speak. For it is not ye that speak, but the spirit of your Father, which speaketh in you. And the brother shall deliver up the brother to death, and the father the child, and the children shall rise up against the parents, and cause them to be put to death. And ye shall be hated of all men, for my name's sake: but he that endureth to the end shall be saved. But when they persecute you in this city, flee ye into another; for verily I say unto you, ye shall not have gone over the cities of Israel until the Son of man be come. The disciple is not above his master, nor the servant above his lord. It is enough for the disciple, that he be as his master, and the servant as his lord. If they have called the master of the house Beelzebub, how much more shall they call them of his household? Fear them not therefore; for there is nothing covered, which shall not be revealed; and hid, that shall not be known. What I tell you in darkness, that speak ye in light; and what ye hear in the ear, that preach ye upon the house-tops. And fear not them which kill the body, but are not able to kill the soul: but rather fear him, which is able to destroy both soul and body in hell. Are not two sparrows sold for a farthing? And one of them shall not fall to the ground without your Father. But the very hairs of your head are all numbered. Fear ye not therefore; ye are of more value than many sparrows. Whosoever therefore shall confess me before men, him will I confess also before my Father, which is in heaven. But whosoever shall deny me before men, him will I also deny before my Father, which is in heaven. Think not that I am come to send peace on earth: I came not to send peace, but a sword. For I am come to set a man at variance against his father, and the daughter against her mother, and the daughter-in-law against her mother-in-law. And a man's foes shall be they of his own household. He that loveth father and mother more than me, is not worthy of me; and he that loveth son or daughter more than me, is not worthy of me. And he that taketh not his cross, and followeth after me, is not worthy of me. He that findeth his life shall lose it: and he that loseth his life for my sake, shall find it. He that receiveth you, receiveth me: and he that receiveth me, receiveth

him that sent me. He that receiveth a prophet in the name of a prophet, shall receive a prophet's reward; and he that receiveth a righteous man in the name of a righteous man, shall receive a righteous man's reward. And whosoever shall give to drink unto one of these little ones, a cup of cold water only, in the name of a disciple, verily I say unto you, he shall in no wise lose his reward. And it came to pass, when Jesus had made an end of commanding his twelve disciples" —

This is the commission our Saviour gave his apostles, when he sent them abroad to recover and save "the lost sheep of the house of Israel." And will any of the unmasker's intelligent and observing men say, that the history of the "scripture is so concise, that any passages," any essential, any material, nay, any parts at all of the apostles commission, "are here omitted by the sacred penman?" This commission is set down so at full, and so particularly, that St. Matthew, who was one of them to whom it was given, seems not to have left out one word of all that our Saviour gave him in charge. And it is so large, even to every particular article of their instructions, that I doubt not, but my citing so much, "verbatim," out of the sacred text, will here again be troublesome to the unmasker. But whether he will venture again to call it tedious, must be as nature or caution happen to have the better on it. Can any one, who reads this commission, unless he hath the brains, as well as the brow of an unmasker, allege, that the conciseness of the history of the scripture has concealed from us those fundamental doctrines, which our Saviour and his apostles preached; but the sacred historians thought fit by consent, for unconceivable reasons, to leave out in the narrative they give us of those preachings? This passage here, wholly confuteth that. They could preach nothing but what they were sent to preach: and that we see is contained in these few words, "preach, saying, The kingdom of heaven is at hand. Heal the sick, cleanse the lepers, raise the dead, cast out devils;" i. e. acquaint them, that the kingdom of the Messiah is come, and let them know, by the miracles that you do in my name, that I am that King and Deliverer they expect. If there were any other necessary articles that were to be believed, for the saving of the lost sheep they were sent to, can one think that St. Matthew, who sets down so minutely every circumstance of their commission, would have omitted the most important and material of it? He was an ear-witness, and one that was sent: and so (without supposing him inspired) could not be misled by the short account he might receive from others, who by their own, or others

forgetfulness, might have dropped those other fundamental articles, that the apostles were ordered to preach.

The very like account St. Luke gives of our Saviour's commission to the seventy, chap. x. 1 — 16, "After these things the Lord appointed other seventy also, and sent them two and two before his face, into every city and place, whither he himself would come. Therefore said he unto them, The harvest truly is great, but the labourers are few: pray ye therefore the Lord of the harvest, that he would send forth labourers into his harvest. Go your ways: behold I send you forth as lambs among wolves. Carry neither purse, nor scrip, nor shoes: and salute no man by the way. And into whatsoever house ye enter, first say, Peace be to this house. And if the Son of peace be there, your peace shall rest upon it; if not, it shall return to you again. And in the same house remain, eating and drinking such things as they give: for the labourer is worthy of his hire. Go not from house to house. And into whatsoever city ye enter, and they receive you, eat such things as are set before you. And heal the sick that are therein, and say unto them, The kingdom of God is come nigh unto you. But into whatsoever city ye enter, and they receive you not, go your ways out into the streets of the same, and say, even the very dust of your city, which cleaveth on us, we do wipe off against you; notwithstanding, be ye sure of this, that the kingdom of God is come nigh unto you. But I say unto you, that it shall be more tolerable, in that day, for Sodom, than for that city. Woe unto thee, Chorazin! Woe unto thee, Bethsaida! For if the mighty works had been done in Tyre and Sidon, which have been done in you, they had a great while ago repented sitting in sackcloth and ashes. But it shall be more tolerable for Tyre and Sidon, at the day of judgment, than for you. And thou Capernaum, which art exalted to heaven, shalt be thrust down to hell. He that heareth you, heareth me: and he that despiseth you, despiseth me: and he that despiseth me, despiseth him that sent me."

Our Saviour's commission here to the seventy, whom he sent to preach, is so exactly conformable to that which he had before given to the twelve apostles, that there needs but this one thing more to be observed, to convince any one that they were sent to convert their hearers to this sole belief, That the kingdom of the Messiah was come, and that Jesus was the Messiah: and that the historians of the New Testament are not so concise in their account of this matter, that they would have omitted any other necessary articles of belief, that had been given to the seventy in

commission. That which I mean is, the kingdom of the Messiah is twice mentioned in it to be come, verse 9 and 11. If there were other articles given them by our Saviour, to propose to their hearers, St. Luke must be very fond of this one article, when, for conciseness sake, leaving out the other fundamental articles, that our Saviour gave them in charge to preach, he repeats this more than once.

The unmasker's third particular, , begins thus: "This also must be thought of, that though there are several parts and members of the christian faith, yet they do not all occur in any one place of scripture." Something is in it, (whether owing to his will or understanding, I shall not inquire,) that the unmasker always delivers himself in doubtful and ambiguous terms. It had been as easy for him to have said, "There are several articles of the christian faith necessary to be believed to make a man a christian," as to say, (as he does here,) "There are several parts and members of the christian faith." But as an evidence of the clearness of his notions, or the fairness of his arguing, he always rests in generals. There are, I grant, several parts and members of the christian faith, which do no more occur in any one place of scripture, than the whole New Testament can be said to occur in any one place of scripture. For every proposition, delivered in the New Testament for divine revelation, is "a part and member of the christian faith." But it is not those "parts and members of the christian faith" we are speaking of; but only such "parts and members of the christian faith," as are absolutely necessary to be believed by every man, before he can be a christian. And in that sense I deny his assertion to be true, viz. that they do not occur in any one place of the scripture: for they do all occur in that first sermon of St. Peter, Acts ii. 36, by which three thousand were at that time brought into the church, and that in these words: "therefore let all the house of Israel know assuredly, that God hath made that same Jesus, whom you have crucified, Lord and Christ. Repent, and be baptized every one of you in the name of Jesus Christ." Here is the doctrine of Jesus the Messiah, the Lord, and of repentance, proposed to those, who already believe one God: which, I say, are all the parts of the christian faith necessary to be believed to make a man a christian. To suppose, as the unmasker does here, that more is required, is to beg, not to prove the question.

If he disputes this collection of mine out of that sermon of St. Peter, I will give him a more authentic collection of the necessary parts of the christian faith, from an author that he will not question. Let him look into

Acts xx. 20, &c. and there he will find St. Paul saying thus to the elders of Ephesus, whom he was taking his last leave of, with an assurance that he should never see them again: "I have kept back nothing that was profitable unto you; but have showed you, and have taught you publicly, and from house to house, testifying both to the jews, and also to the Greeks, repentance towards God, and faith towards our Lord Jesus Christ." If St. Paul knew what was necessary to make a christian, here it is: here he (if he knew how to do it, for it is plain from his words he designed to do it) has put it together. But there is a greater yet than St. Paul, who has brought all the parts of faith necessary to salvation into one place; I mean our Saviour himself, John xvii. 13, in these words: "This is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent."

But the unmasker goes on: "Therefore, when, in some places, only one single part of the christian faith is made mention of, as necessary to be embraced in order to salvation, we must be careful not to take it alone, but to supply it from several other places, which make mention of other necessary and indispensable points of belief. I will give the reader a plain instance of this, Rom. x. 9, "if thou shalt believe in thine heart, that God hath raised him (i. e. the Lord Jesus) from the dead, thou shalt be saved." Here one article of faith, viz. the belief of Christ's resurrection (because it is of so great importance in christianity) is only mentioned: but all the rest must be supposed, because they are mentioned in other places."

Answ. One would wonder that any one conversant in holy writ, with ever so little attention, much more that an expounder of the scriptures, should so mistake the sense and style of the scripture. Believing Jesus to be the Messiah, with a lively faith, i. e. as I have showed, taking him to be our King, with a sincere submission to the laws of his kingdom, is all that is required to make a man a christian; for this includes repentance too. The believing him therefore to be the Messiah is very often, and with great reason, put both for faith and repentance too: which are sometimes set down singly, where one is put for both, as implying the other; and sometimes they are both mentioned; and then faith, as contradistinguished to repentance, is taken for a simple assent of the mind to this truth, that Jesus is the Messiah. Now this faith is variously expressed in scripture.

There are some particulars in the history of our Saviour, allowed to be so peculiarly appropriated to the Messiah, such incommunicable marks of him, that to believe them of Jesus of Nazareth, was in effect the same, as to

believe him to be the Messiah, and so are put to express it. The principal of these is his resurrection from the dead; which being the great and demonstrative proof of his being the Messiah, it is not at all strange, that the believing his resurrection should be put for believing him to be the Messiah; since the declaring his resurrection, was declaring him to be the Messiah. For thus St. Paul argues, Acts xiii. 32, 33, "We declare unto you good tidings, or we preach the gospel to you [for so the word signifies], how that the promise, that was made unto the fathers, God hath fulfilled the same unto us their children, in that he hath raised up Jesus again." The force of which argument lies in this, that, if Jesus was raised from the dead, then he was certainly the Messiah: and thus the promise of the Messiah was fulfilled, in raising Jesus from the dead. The like argument St. Paul useth, 1 Cor. xv. 17, "If Christ be not raised, your faith is vain, you are yet in your sins;" i. e. if Jesus be not risen from the dead, he is not the Messiah, your believing it is in vain, and you will receive no benefit by that faith. And so, likewise, from the same argument of his resurrection, he at Thessalonica proves him to be the Messiah, Acts xvii. 2, 3. "And Paul, as his manner was, went into the synagogue, and three sabbath-days reasoned with the jews out of the scriptures, opening and alleging, that the Messiah must needs have suffered and risen again from the dead; and that this Jesus, whom I preach unto you, is the Messiah."

The necessary connection of these two, that if he rose from the dead, he was the Messiah; and if he rose not from the dead, he was not the Messiah; the chief priest and pharisees, that had prosecuted him to death, understood very well: who therefore "came together unto Pilate, saying, Sir, we remember that that deceiver said, whilst he was yet alive, After three days I will rise again. Command, therefore, that the sepulchre be made sure unto the third day, lest his disciples come by night, and steal him away, and say unto the people, "He is risen from the dead:" "so the last error shall be worse than the first." The error they here speak of, it is plain, was the opinion, that he was the Messiah. To stop that belief, which his miracles had procured him amongst the people, they had got him put to death; but if, after that, it should be believed, that he rose again from the dead, this demonstration, that he was the Messiah, would but establish what they had laboured to destroy by his death; since no one, who believed his resurrection, could doubt of his being the Messiah.

It is not at all therefore to be wondered, that his resurrection, his ascension, his rule and dominion, and his coming to judge the quick and the dead, which are characteristical marks of the Messiah, and belong peculiarly to him, should sometimes in scripture be put alone, as sufficient descriptions of the Messiah; and the believing them of him put for believing him to be the Messiah. Thus, Acts x. our Saviour, in Peter's discourse to Cornelius, when he brought him the gospel, is described to be the Messiah, by his miracles, death, resurrection, dominion, and coming to judge the quick and the dead.

These, (which in my "Reasonableness of christianity," I have upon this ground taken the liberty to call concomitant articles,) where they are set alone for the faith to which salvation is promised, plainly signify the believing Jesus to be the Messiah, that fundamental article, which has the promise of life; and so give no foundation at all for what the unmasker says, in these words: "Here one article of faith, viz. the belief of Christ's resurrection (because it is of so great importance in christianity) is only mentioned; but all the rest must be supposed, because they are mentioned in other places."

Ans. If all the rest be of absolute and indispensable necessity to be believed to make a man a christian, all the rest are, every one of them, of equal importance. For things of equal necessity, to any end, are of equal importance to that end. But here the truth forced its way unawares from the unmasker: Our Saviour's resurrection, for the reason I have given, is truly of great importance in christianity; so great, that his being, or not being the Messiah, stands or falls with it: so that these two important articles are inseparable, and in effect make but one. For, since that time, believe one, and you believe both; deny one of them, and you can believe neither. If the unmasker can show me any one of the articles in his list, which is not of this great importance, mentioned alone, with a promise of salvation for believing it, I will grant him to have some colour for what he says here. But where is to be found in the scripture any such expression as this: if thou shalt believe with thy heart "the corruption and degeneracy of human nature," thou shalt be saved? or the like. This place, therefore, out of the Romans, makes not for, but against his list of necessary articles. One of them, alone, he cannot show me any-where set down, with a supposition of the rest, as having salvation promised to it: though it be true, that that one,

which alone is absolutely necessary to be superadded to the belief of one God, is, in divers places, differently expressed.

That which he subjoins, as a consequence of what he had said, is a farther proof of this: “And consequently, says he, if we would give an impartial account of our belief, we must consult those places: and they are not altogether, but dispersed here and there. Wherefore we must look them out, and acquaint ourselves with the several particulars, which make up our belief, and render it intire and consummate.”

Ans. Never was a man constanter to a loose way of talking. The question is only about articles necessary to be believed to make a man a christian: and here he talks of the “several particulars which make up our belief, and render it intire and consummate;” confounding, as he did before, essential and integral parts, which, it seems, he cannot distinguish. Our faith is true and saving, when it is such as God, by the new covenant, requires it to be: but it is not intire and consummate, until we explicitly believe all the truths contained in the word of God. For the whole revelation of truth in the scripture being the proper and intire object of faith, our faith cannot be intire and consummate, until it be adequate to its proper object, which is the whole divine revelation contained in the scripture: and so, to make our faith intire and consummate, we must not look out those places, which, he says, are not altogether. To talk of looking out, and culling of places, is nonsense, where the whole scripture alone can “make up our belief, and render it intire and consummate:” which no one, I think, can hope for, in this frail state of ignorance and error. To make the unmasker speak sense and to the purpose here, we must understand him thus: “That if we will give an impartial account” of the articles, that are necessary to be believed to make a man a christian, “we must consult those places where they are; for they are not all together, but dispersed here and there; wherefore we must look them out,” and acquaint ourselves with the several particulars, which make up the fundamental articles of our belief, and will render a catalogue of them intire and consummate. If his supposition be true, I grant his method to be reasonable, and upon that I join issue with him. Let him thus “give an impartial account of our belief; let him acquaint us with the several particulars which make up a christian’s belief, and render it intire and consummate.” Until he has done this, let him not talk thus in the air of a method, that will not do: let him not reproach me, as he does, for not taking a course, by which he himself cannot do, what he reviles me for failing in.

“But our hasty author,” says he, “took another course, and thereby deceived himself, and unhappily deceived others.” If it be so, I desire the unmasker to take the course he proposes, and thereby undeceive me and others; and “acquaint us with the several particulars which make up a christian’s belief, and render it intire and consummate;” for I am willing to be undeceived: but until he has done that, and shown us by the success of it, that his course is better, he cannot blame us for following that course we have done.

I come now to his fourth and last particular, , which, he says, is the main answer to the objection; and therefore I shall set it down in his own words, intire, as it stands together. “This,” says he, “must be born in our minds, that christianity was erected by degrees, according to that prediction and promise of our Saviour, that “the Spirit should teach them all things.” John xiv. 26. and that “he should guide them into all truth.” John xvi. 13. viz. “after his departure and ascension, when the Holy Ghost was to be sent in a special manner, to enlighten men’s minds, and to discover to them the great mysteries of christianity. This is to be noted by us, as that which gives great light in the present case. The discovery of the doctrines of the gospel was gradual. It was by certain steps that christianity climbed to its height. We are not to think then, that all the necessary doctrines of the christian religion were clearly published to the world in our Saviour’s time. Not but that all that were necessary for that time were published, but some which were necessary for the succeeding one, were not then discovered, or, at least, not fully. They had ordinarily no belief, before Christ’s death and resurrection, of those substantial articles, i. e. that he should die and rise again: but we read in the Acts, and in the epistles, that these were formal articles of faith afterwards, and are ever since necessary to complete the christian belief. So as to other great verities, the gospel increased by degrees, and was not perfect at once. Which furnishes us with a reason why most of the choicest and sublimest truths of christianity are to be met with in the epistles of the apostles, they being such doctrines as were not clearly discovered and opened in the Gospels and the Acts.” Thus far the unmasker.

I thought hitherto, that the covenant of grace in Christ Jesus had been but one, immutably the same: but our unmasker here makes two, or I know not how many. For I cannot tell how to conceive, that the conditions of any covenant should be changed, and the covenant remain the same; every change of conditions, in my apprehension, makes a new and another covenant. We are not to think, says the unmasker, “That all the necessary

doctrines of the christian religion were clearly published to the world in our Saviour's time; not but that all that were necessary for that time were published: but some, which were necessary for the succeeding one, were not then discovered, or, at least, not fully." Answ. The unmasker, constant to himself, speaks here doubtfully, and cannot tell whether he should say, that the articles necessary to succeeding times, were discovered in our Saviour's time, or no; and therefore, that he may provide himself a retreat, in the doubt he is in, he says, "They were not clearly published; they were not then discovered, or, at least, not fully." But we must desire him to pull off his mask, and to that purpose,

I ask him how he can tell, that all the necessary doctrines were obscurely published, or in part discovered? For an obscure publishing, a discovery in part, is opposed to, and intimated in, "not clearly published, not fully discovered." And, if a clear and full discovery be all that he denies to them, I ask,

XXXVII. WHICH THOSE FUNDAMENTAL ARTICLES ARE, "WHICH WERE OBSCURELY PUBLISHED," BUT NOT FULLY DISCOVERED IN OUR SAVIOUR'S TIME?

And next I shall desire him to tell me,

XXXVIII. WHETHER THERE ARE ANY ARTICLES NECESSARY TO BE BELIEVED TO MAKE A MAN A CHRISTIAN, THAT WERE NOT DISCOVERED AT ALL IN OUR SAVIOUR'S TIME: AND WHICH THEY ARE?

If he cannot show these distinctly, it is plain he talks at random about them; but has no clear and distinct conception of those that were published, or not published, clearly or obscurely discovered in our Saviour's time. It was necessary for him to say something for those his pretended necessary articles, which are not to be found any-where proposed in the preaching of our Saviour and his apostles, to their yet unbelieving auditors; and therefore, he says, "We are not to think all the necessary doctrines of the christian religion were clearly published to the world in our Saviour's time." But he barely says it, without giving any reason, why "we are not to think so." It is enough that it is necessary to his hypothesis. He says, "we are not to think so," and we are presently bound not to think so. Else, from

another man, that did not usurp an authority over our thoughts, it would have required some reason to make them think, that something more was required to make a man a christian after, than in our Saviour's time. For, as I take it, it is not a very probable, much less a self-evident proposition, to be received without proof, that there was something necessary for that time to make a man a christian, and something more, that was necessary to make a christian in the succeeding time.

However, since this great master says, "we ought to think so," let us in obedience think so as well as we can; until he vouchsafes to give us some reason to think, that there was more required to be believed to make a man a christian, in the succeeding time, than in our Saviour's. This, instead of removing, does but increase the difficulty: for if more were necessary to be believed to make a man a christian after our Saviour's time, than was during his life; how comes it, that no more was proposed by the apostles, in their preaching to unbelievers, for the making them christians, after our Saviour's death, than there was before; even this one article, "that he was the Messiah?" For I desire the unmasker to show me any of those articles mentioned in his list, (except the resurrection and ascension of our Saviour, which were intervening matters of fact, evidencing him to be the Messiah,) that were proposed by the apostles, after our Saviour's time, to their unbelieving hearers, to make them christians. This one doctrine, "That Jesus was the Messiah," was that which was proposed in our Saviour's time to be believed, as necessary to make a man a christian: the same doctrine was, likewise, what was proposed afterwards, in the preaching of the apostles to unbelievers, to make them christians.

I grant this was more clearly proposed after, than in our Saviour's time: but in both of them it was all that was proposed to the believers of one God, to make them christians. Let him show, that there were any other proposed in, or after our Saviour's time, to be believed to make unbelievers christians. If he means, by "necessary articles published to the world," the other doctrines contained in the epistles; I grant, they are all of them necessary articles, to be believed by every christian, as far as he understands them. But I deny, that they were proposed to those they were writ to, as necessary to make them christians, for this demonstrative reason; because they were christians already. For example, Many doctrines proving, and explaining, and giving a farther light into the gospel, are published in the epistles to the Corinthians and Thessalonians. These are all of divine

authority, and none of them may be disbelieved by any one who is a christian; but yet what was proposed or published to both the Corinthians and Thessalonians, to make them christians was only this doctrine, "That Jesus was the Messiah:" as may be seen, Acts xvii. xviii. This, then, was the doctrine necessary to make men christians, in our Saviour's time; and this the only doctrine necessary to make unbelievers christians, after our Saviour's time. The only difference was, that it was more clearly proposed after, than before his ascension: the reason whereof has been sufficiently explained. But any other doctrine but this, proposed clearly or obscurely, in or after our Saviour's time, as necessary to be believed to make unbelievers christians, that remains yet to be shown.

When the unmasker speaks of the doctrines that were necessary for the succeeding time after our Saviour, he is in doubt, whether he should say they were, or were not discovered, in our Saviour's time; and how far they were then discovered: and therefore he says, "Some of them were not then discovered, or at least, not fully." We must here excuse the doubtfulness of his talking, concerning the discovery of his other necessary articles. For how could he say, they were discovered, or not discovered, clearly or obscurely, fully or not fully; when he does not yet know them all, nor can tell us, what those necessary articles are? If he does know them, let him give us a list of them, and then we shall see easily, whether they were at all published or discovered in our Saviour's time. If there are some of them that were not at all discovered in our Saviour's time, let him speak it out, and leave shifting: and if some of those that were "not necessary for our Saviour's time, but for the succeeding one only," were yet discovered in our Saviour's time, why were they not necessary to be believed in that time? But the truth is, he knows not what these doctrines, necessary for succeeding times, are: and therefore can say nothing positively about their discovery. And for those that he has set down, as soon as he shall name any one of them to be of the number of those, "not necessary for our Saviour's time, but necessary for the succeeding one," it will presently appear, either that it was discovered in our Saviour's time; and then it was as necessary for his time as the succeeding; or else, that it was not discovered in his time, nor to several converts after his time, before they were made christians; and therefore it was no more necessary to be believed to make a man a christian in the succeeding, than it was in our Saviour's time. However, general

positions and distinctions without a foundation serve for show, and to beguile unwary and inattentive readers.

Having thus minded him, that the question is about articles of faith, necessary to be explicitly and distinctly believed to make a man a christian; I then, in the next place, demand of him to tell me,

XXXIX. WHETHER OR NO ALL THE ARTICLES, NECESSARY NOW TO BE DISTINCTLY AND EXPLICITLY BELIEVED, TO MAKE ANY MAN A CHRISTIAN, WERE DISTINCTLY AND EXPLICITLY PUBLISHED OR DISCOVERED IN OUR SAVIOUR'S TIME?

And then I shall desire to know of him,

XL. A REASON WHY THEY WERE NOT.

Those that he instances in, of Christ's death and resurrection, will not help him one jot; for they are not new doctrines revealed, new mysteries discovered; but matters of fact, which happen to our Saviour in their due time, to complete in him the character and predictions of the Messiah, and demonstrate him to be the Deliverer promised. These are recorded of him by the Spirit of God in holy writ, but are no more necessary to be believed to make a man a christian, than any other part of divine revelation, but as far as they have an immediate connexion with his being the Messiah, and cannot be denied without denying him to be the Messiah; and therefore this article of his resurrection, (which supposes his death,) and such other propositions as are convertible with his being the Messiah, are, as they very well may be, put for his being the Messiah; and, as I have showed, proposed to be believed in the place of it.

All that is revealed in scripture has a consequential necessity of being believed by all those, to whom it is proposed; because it is of divine authority, one part as much as another. And, in this sense, all the divine truths in the inspired writings are fundamental, and necessary to be believed. But then this will destroy our unmasker's select number of fundamental articles; and "the choicest and sublimest truths of christianity," which, he tells us, "are to be met with in the Epistles," will not be more necessary to be believed than any, which he may think the commonest or meanest truths in any of the Epistles or the Gospels. Whatsoever part of divine revelation, whether revealed before, or in, or after our Saviour's

time; whether it contains (according to the distinction of our unmasker's nice palate) choice or common, sublime or not sublime truths, is necessary to be believed by every one to whom it is proposed, as far as he understands what is proposed. But God, by Jesus Christ, has entered into a covenant of grace with mankind; a covenant of faith; instead of that of works, wherein some truths are absolutely necessary to be explicitly believed by them to make men christians; and therefore those truths are necessary to be known and consequently necessary to be proposed to them to make men christians. This is peculiar to them to make men christians. For all men, as men, are under a necessary obligation to believe what God proposes to them to be believed; but there being certain distinguishing truths, which belong to the covenant of the gospel, which if men know not, they cannot be christians; and they being, some of them, such as cannot be known without being proposed; those, and those only, are the necessary doctrines of christianity I speak of; without a knowledge of, and assent to which, no man can be a christian.

To come therefore to a clear decision of this controversy, I desire the unmasker to tell me,

XLI. WHAT THOSE DOCTRINES ARE, WHICH ARE ABSOLUTELY NECESSARY TO BE PROPOSED TO EVERY MAN TO MAKE HIM A CHRISTIAN?

XLII. 1. WHETHER THEY ARE ALL THE TRUTHS OF DIVINE REVELATION CONTAINED IN THE BIBLE?

For I grant his argument, (which in another place he uses for some of them, and truly belongs to them all,) viz. that they were revealed and written there, on purpose to be believed, and that it is indispensably necessary for christians to believe them.

XLIII. 2. OR, WHETHER IT BE ONLY THAT ONE ARTICLE, OF JESUS BEING THE MESSIAH, WHICH THE HISTORY OF OUR SAVIOUR AND HIS APOSTLES PREACHING HAS, WITH SUCH A PECULIAR DISTINCTION, EVERY-WHERE PROPOSED?

XLIV. 3. OR, WHETHER THE DOCTRINES NECESSARY TO BE PROPOSED TO EVERY ONE TO MAKE HIM A CHRISTIAN, BE ANY

SET OF TRUTHS BETWEEN THE TWO?

And if he says this latter, then I must ask him,

XLV. WHAT THEY ARE? THAT WE MAY SEE, WHY THOSE, RATHER THAN ANY OTHER, CONTAINED IN THE NEW TESTAMENT, ARE NECESSARY TO BE PROPOSED TO EVERY MAN TO MAKE HIM A CHRISTIAN; AND, IF THEY ARE NOT EVERY ONE PROPOSED TO HIM, AND ASSENTED TO BY HIM, HE CANNOT BE A CHRISTIAN.

The unmasker makes a great noise, and hopes to give his unwary, though well-meaning readers, odd thoughts, and strong impressions against my book, by declaiming against my lank faith, and my narrowing of christianity to one article; which, as he says, is the next way to reduce it to none. But when it is considered, it will be found, that it is he that narrows christianity. The unmasker, as if he were arbiter and dispenser of the oracles of God, takes upon him to single out some texts of scripture; and, where the words of scripture will not serve his turn, to impose on us his interpretations and deductions, as necessary articles of faith; which is, in effect, to make them of equal authority with the unquestionable word of God. And thus, partly in the words of scripture, and partly in words of his own, he makes a set of fundamentals, with an exclusion of all the other truths delivered by the Spirit of God, in the Bible; though all the rest be of the same divine authority and original, and ought therefore all equally, as far as they are understood by every christian, to be believed. I tell him, and I desire him to take notice of it, God has no-where given him an authority thus to garble the inspired writings of the holy scriptures. Every part of it is his word, and ought, every part of it, to be believed by every christian man, according as God shall enable him to understand it. It ought not to be narrowed to the cut of the unmasker's peculiar system; it is a presumption of the highest nature, for him thus to pretend, according to his own fancy, to establish a set of fundamental articles. This is to diminish the authority of the word of God, to set up his own; and create a reverence to his system, from which the several parts of divine revelation are to receive their weight, dignity, and authority. Those passages of holy writ which suit with that, are fundamental, choice, sublime, and necessary: the rest of the scripture (as of

no great moment) is not fundamental, is not necessary to be believed, may be neglected, or must be tortured, to comply with an analogy of faith of his own making. But though he pretends to a certain set of fundamentals, yet to show the vanity and impudence of that pretence, he cannot tell us what they are; and therefore in vain contends for a creed he knows not, and is yet nowhere. He neither does, and which is more, I tell him, he never can, give us a collection of his fundamentals gathered upon his principles, out of the scripture, with the rejection of all the rest, as not fundamental. He does not observe the difference there is between what is necessary to be believed by every man to make him a christian, and what is required to be believed by every christian. The first of these is what, by the covenant of the gospel, is necessary to be known, and consequently to be proposed to every man, to make him a christian: the latter is no less than the whole revelation of God, all the divine truths contained in holy scripture: which every christian man is under a necessity to believe, so far as it shall please God, upon his serious and constant endeavours, to enlighten his mind to understand them.

The preaching of our Saviour, and his apostles, has sufficiently taught us what is necessary to be proposed to every man, to make him a christian. He that believes him to be the promised Messiah, takes Jesus for his King, and repenting of his former sins, sincerely resolves to live, for the future, in obedience to his laws, is a subject of his kingdom, is a christian. If he be not, I desire the unmasker to tell me, what more is requisite to make him so. Until he does that, I rest satisfied, that this is all that was at first, and is still, necessary to make a man a christian.

This, though it be contained in a few words, and those not hard to be understood; though it be in one voluntary act of the mind, relinquishing all irregular courses, and submitting itself to the rule of him, whom God hath sent to be our King, and promised to be our Saviour; yet it having relation to the race of mankind, from the first man Adam to the end of the world; it being a contrivance, wherein God has displayed so much of his wisdom and goodness to the corrupt and lost sons of men; and it being a design, to which the Almighty had a peculiar regard in the whole constitution and œconomy of the jews, as well as in the prophecies and history of the Old Testament; this was a foundation capable of large superstructures: 1. In explaining the occasion, necessity, use, and end of his coming. 2. Next in proving him to be the person promised, by a correspondence of his birth, life, sufferings, death, and resurrection, to all those prophecies and types of

him, which had given the expectation of such a Deliverer; and to those descriptions of him, whereby he might be known, when he did come. 3. In the discovery of the sort, constitution, extent, and management of his kingdom. 4. In showing from what we are delivered by him, and how that deliverance is wrought out, and what are the consequences of it.

These, and a great many more the like, afford great numbers of truths delivered both in the historical, epistolary, and prophetic writings of the New Testament, wherein the mysteries of the gospel, hidden from former ages, were discovered; and that more fully, I grant, after the pouring out of the Holy Ghost upon the apostles. But could nobody take Christ for their promised King, and resolve to obey him, unless he understood all the truths that concerned his kingdom, or, as I may say, mysteries of state of it? The truth of the contrary is manifest, out of the plain and uniform preaching of the apostles, after they had received the Holy Ghost, that was to guide them into all truth. Nay, after the writing of those epistles, wherein were contained the unmasker's sublimest truths; they every-where proposed to unbelievers Jesus the Messiah, to be their King, ordained of God; and to this joined repentance: and this alone they preached for the conversion of their unbelieving hearers. As soon as any one assented to this he was pronounced a believer; and these inspired rulers of the church, these infallible preachers of the gospel, admitted into Christ's kingdom by baptism. And this after, long "after our Saviour's ascension, when (as our unmasker expresses it) the Holy Ghost was to be sent in an especial manner to enlighten men's minds, and to discover to them the great mysteries of christianity," even as long as the apostles lived: and what others were to do, who afterwards were to preach the gospel, St. Paul tells us, 1 Cor. iii. 11, "Other foundation can no man lay than that is laid, even Jesus the Messiah." Though upon this foundation men might build variously things that would, or would not hold the touch, yet however as long as they kept firm to this foundation, they should be saved, as appears in the following verses.

And indeed, if all the doctrines of the gospel, which are contained in the writings of the apostles and evangelists, were necessary to be understood, and explicitly believed in the true sense of those that delivered them, to make a man a christian; I doubt, whether ever any one, even to this day, was a true christian; though I believe the unmasker will not deny, but that, ere this, christianity (as he expresses it) "is by certain steps climbed to its height."

But for this the unmasker has found a convenient and wise remedy. It is but for him to have the power to declare, which of the doctrines delivered in holy writ are, and which are not necessary to be believed, with an additional power to add others of his own, that he cannot find there; and the business is done. For unless this be allowed him, his system cannot stand; unless his interpretations be received for authentic revelation, we cannot have all the doctrines necessary for our time; in truth, we cannot be christians. For to this only what he says, concerning the “gradual discovery of the doctrines of the gospel,” tends. “We are not to think,” says he, “that all the necessary doctrines of the christian religion were clearly published to the world in our Saviour’s time: not but that all that were necessary for that time were published; but some that were necessary for the succeeding one, were not then discovered, or, at least, not fully.”

I must ask the unmasker a short question or two; as, first,

XLVI. ARE NOT ALL THE DOCTRINES, NECESSARY FOR OUR TIME, CONTAINED IN HIS SYSTEM?

Next,

XLVII. CAN ALL THE DOCTRINES, NECESSARY FOR OUR TIME, BE PROPOSED IN THE EXPRESS WORDS OF THE SCRIPTURE?

When he has answered these two plain questions, (and an answer to them I shall expect,) the world will then see, what he designs by “doctrines necessary for our Saviour’s time, and doctrines necessary for succeeding times;” whether he means any thing else by it, but the setting up his system, as the exact standard of the gospel, and the true and unalterable measure of christianity, in which “it has climbed to its height.”

Let not good and sincere christians be deceived, nor perplexed, by this maker of another christianity, than what the infallible Spirit of God has left us in the scriptures. It is evident from thence, that whoever takes Jesus the Messiah for his King, with a resolution to live by his laws, and does sincerely repent, as often as he transgresses any of them, is his subject; all such are christians. What they are to know, or believe more concerning him and his kingdom, when they are his subjects, he has left upon record in the great and sacred code and constitutions of his kingdom; I mean in the holy scriptures. All that is contained therein, as coming from the God of truth,

they are to receive as truth, and embrace as such. But since it is impossible explicitly to believe any proposition of the christian doctrine, but what we understand, or in any other sense, than we understand it to have been delivered in; an explicit belief is, or can be required in no man, of more than what he understands of that doctrine. And thus, whatsoever upon fair endeavours he understands to be contained in that doctrine, is necessary to him to be believed: nor can he continue a subject of Christ upon other terms.

What he is persuaded is the meaning of Christ his King in any expression he finds in the sacred code; that, by his allegiance, he is bound to submit his mind to receive for true, or else he denies the authority of Christ, and refuses to believe him; nor can be excused, by calling any one on earth master. And hence it is evidently impossible for a christian to understand any text, in one sense, and believe it in another, by whomsoever dictated.

All that is contained in the inspired writings, is all of divine authority, must all be allowed for such, and received for divine and infallible truth, by every subject of Christ's kingdom, i. e. every christian. How comes then the unmasker to distinguish these dictates of the Holy Spirit, into necessary and not necessary truths? I desire him to produce his commission, whereby he hath the power given him to tell, which of the divine truths, contained in the holy scripture, are of necessity to be believed, and which not. Who made him a judge or divider between them? Who gave him this power over the oracles of God, to set up one and debase another, at his pleasure? Some, as he thinks fit, are the choicest truths: and what, I beseech him, are the other? Who made him a chooser, where nobody can pick and choose? Every proposition there, as far as any christian can understand it, is indispensably necessary to be believed: and farther than he does understand it, it is impossible for him to believe it. The laws of Christ's kingdom do not require impossibilities; for they are all reasonable, and good.

Some of the truths delivered in the holy writ are very plain: it is impossible, I think, to mistake their meaning; and those certainly are all necessary to be explicitly believed. Others have more difficulty in them, and are not easy to be understood. Is the unmasker appointed Christ's vicegerent here, or the Holy Ghost's interpreter, with authority to pronounce which of these are necessary to be believed, and in what sense, and which not? The obscurity, that is to be found in several passages of the scripture, the difficulties that cover and perplex the meaning of several texts, demand of

every christian study, diligence, and attention, in reading and hearing the scriptures; in comparing and examining them; and receiving what light he can from all manner of helps, to understand these books, wherein are contained the words of life. This the unmasker, and every one, is to do for himself; and thereby find out what is necessary for him to believe. But I do not know that the unmasker is to understand and interpret for me, more than I for him. If he has such a power, I desire him to produce it. Until then, I can acknowledge no other infallible, but that guide, which he directs me to himself, here in these words: “according to our Saviour’s promise, the Holy Ghost was to be sent in a special manner to enlighten men’s minds, and to discover to them the great mysteries of christianity.” For whether by men, he here means those on whom the Holy Ghost was so eminently poured out, Acts ii. or whether he means by these words, that special assistance of the Holy Ghost, whereby particular men, to the end of the world, are to be led into the truth, by opening their understandings, that they may understand the scriptures, (for he always loves to speak doubtfully and indefinitely,) I know no other infallible guide, but the Spirit of God in the scriptures. Nor has God left it in my choice to take any man for such. If he had, I should think the unmasker the unlikeliest to be he, and the last man in the world to be chosen for that guide: and herein I appeal to any sober christian, who hath read what the unmasker has, with so little truth and decency, (for it is not always men’s fault if they have not sense,) writ upon this question, whether he would not be of the same mind?

But yet, as very an unmasker as he is, he will be extremely apt to call you names, nay, to declare you no christian; and boldly affirm, you have no christianity, if you will not swallow it just as it is of his cooking. You must take it just as he has been pleased to dose it no more, nor no less, than what is in his system. He hath put himself into the throne of Christ, and pretends to tell you which are, and which are not the indispensable laws of his kingdom: which parts of his divine revelation you must necessarily know, understand, and believe, and in what sense; and which you need not trouble your head about, but may pass by, as not necessary to be believed. He will tell you, that some of his necessary articles are mysteries, and yet (as he does, , of his “Thoughts concerning the causes of atheism”) that they are easy to be understood by any man, when explained to him. In answer to that I demanded of him, “Who was to explain them? The papists, I told him, would explain some of them one way, and the reformed another; the

remonstrants and anti-remonstrants give them different senses; and probably the trinitarians and unitarians will profess, that they understand not each other's explications." But to this, in his reply, he has not vouchsafed to give me any answer; which yet I expect, and I will tell him why; because, as there are different explainers, there will be different fundamentals. And therefore unless he can show his authority to be the sole explainer of fundamentals, he will in vain make such a pother about his fundamentals. Another explainer, of as good authority as he, will set up others against them. And what then shall we be the better for all this stir and noise of fundamentals? All the effect of it will be just the same it has been these thousand years and upwards; schisms, separations, contentions, animosities, quarrels, blood and butchery, and all that train of mischiefs, which have so long harassed and defamed christianity, and are so contrary to the doctrines, spirit, and end of the gospel; and which must still continue as long as any such unmasker shall take upon him to be the dispenser and dictator to others of fundamentals; and peremptorily to define which parts of divine revelation are necessary to be believed, and which christians may with safety dispense with, and not believe.

To conclude, what was sufficient to make a man a christian in our Saviour's time, is sufficient still, viz. the taking him for our King and Lord, ordained so by God. What was necessary to be believed by all christians in our Saviour's time, as an indispensable duty, which they owed to their lord and master, was the believing all divine revelation, as far as every one could understand it: and just so it is still, neither more nor less. This being so, the unmasker may make what use he pleases of his notion, "that christianity was erected by degrees," it will no way (in that sense, in which it is true) turn to the advantage of his select, fundamental, necessary doctrines.

The next chapter has nothing in it but his great bugbear, whereby he hopes to fright people from reading my book, by crying out Socinianism, Socinianism! Whereas I challenge him again, to show one word of socinianism in it. But, however, it is worth while to write a book to prove me a socinian. Truly, I did not think myself so considerable, that the world need be troubled about me, whether I were a follower of Socinus, Arminius, Calvin, or any other leader of a sect among christians. A christian I am sure I am, because I believe "Jesus to be the Messiah," the King and Saviour promised and sent by God: and, as a subject of his kingdom, I take the rule of my faith and life from his will, declared and left upon record in the

inspired writings of the apostles and evangelists in the New Testament; which I endeavoured to the utmost of my power, as is my duty, to understand in their true sense and meaning. To lead me into their true meaning, I know (as I have above declared) no infallible guide, but the same Holy Spirit, from whom these writings at first came. If the unmasker knows any other infallible interpreter of scripture, I desire him to direct me to him: until then, I shall think it according to my master's rule, not to be called, nor to call any man on earth, Master. No man, I think, has a right to prescribe to me my faith, or magisterially to impose his interpretations or opinions on me: nor is it material to any one what mine are any farther than they carry their own evidence with them. If this, which I think makes me of no sect, entitles me to the name of a papist, or a socinian, because the unmasker thinks these the worst and most invidious he can give me: and labours to fix them on me for no other reason, but because I will not take him for my master on earth, and his system for my gospel: I shall leave him to recommend himself to the world by this skill, who, no doubt, will have reason to thank him for the rareness and subtilty of his discovery. For I think, I am the first man that ever was found to be at the same time a socinian, and a factor for Rome. But what is too hard for such an unmasker? I must be what he thinks fit; when he pleases, a papist; and when he pleases, a socinian; and when he pleases, a mahometan: and probably, when he has considered a little better, an atheist; for I hardly escaped it when he writ last. My book, he says, had a tendency to it; and if he can but go on, as he has done hitherto, from surmises to certainties, by that time he writes next, his discovery will be advanced, and he will certainly find me an atheist. Only one thing I dare assure him of, that he shall never find, that I treat the things of God or religion so, as if I made only a trade or a jest of them. But let us now see, how at present he proves me a socinian.

His first argument is, my not answering for my leaving out Matt. xxviii. 19, and John i. 1, page 82, of his Socinianism unmasked. This he takes to be a confession, that I am a socinian. I hope he means fairly, and that if it be so on my side, it must be taken for a standing rule between us, that where any thing is not answered, it must be taken for granted. And upon that score I must desire him to remember some passages of my Vindication, which I have already, and others, which I shall mind him of hereafter, which he passed over in silence, and had nothing to say to: which therefore, by his own rule, I shall desire the reader to observe, that he has granted.

This being premised, I must tell the unmasker, that I perceive he reads my book with the same understanding that he writes his own. If he had done otherwise, he might have seen, that I had given him a reason for my omission of those two, and other “plain and obvious passages, and famous testimonies in the evangelists,” as he calls them; where I say, , “That if I have left out none of those passages or testimonies, which contain what our Saviour and his apostles preached and required assent to, to make men believers, I shall think my omissions (let them be what they will) no faults in the present case. Whatever doctrines Mr. Edwards would have to be believed, to make a man a christian, he will be sure to find them in those preachings, and famous testimonies, of our Saviour and his apostles, I have quoted. And if they are not there, he may rest satisfied, that they were not proposed, by our Saviour and his apostles, as necessary to be believed to make men Christ’s disciples.” From which words, any one, but an unmasker, could have understood my answer to be, that all that was necessary to be believed to make men christians, might be found in what our Saviour and his apostles proposed to unbelievers for their conversion: but the two passages above mentioned, as well as a great many others in the evangelists, being none of those, I had no reason to take notice of them. But the unmasker having, out of his good pleasure, put it once upon me, as he does in his “Thoughts of the causes of atheism,” , that I was an “epitomiser of the evangelical writings,” though every one may see I make not that my business; yet it is no matter for that, I must be always accountable to that fancy of his. But when he has proved,

XLVIII. THAT THIS IS NOT AS JUST A REASONING FOR MY OMITTING THEM, AS SEVERAL OTHER OBVIOUS PASSAGES AND FAMOUS TESTIMONIES IN THE EVANGELISTS, WHICH I THERE MENTION, FOR WHOSE OMISSION HE DOES NOT BLAME ME;

I will undertake to give him another reason, which I know not whether he were not better let alone.

The next proof of my being a socinian, is, that I take the Son of God to be an expression used to signify the Messiah. Slichtingius and Socinus understood it so; and therefore I am, the unmasker says, a socinian. Just as good an argument, as that I believe Jesus to be a prophet, and so do the mahometans; therefore I am a mahometan: or thus, the unmasker holds, that

the apostles creed does not contain all things necessary to salvation; and so says Knot the jesuit; therefore the unmasker is a papist. Let me turn the tables, and by the same argument I am orthodox again. For two orthodox, pious, and very eminent prelates of our church, whom, when I follow authorities, I shall prefer to Slichtingius and Socinus, understand it as I do; and therefore I am orthodox. Nay, it so falls out, that if it were of force either way, the argument would weigh most on this side; since I am not wholly a stranger to the writings of those two orthodox bishops; but I never read a page in either of those socinians. The never sufficiently admired and valued archbishop Tillotson's words, which I quoted, the unmasker says, "do not necessarily import any such thing." I know no words that necessarily import any thing to a caviller. But he was known to have such clear thoughts, and so clear a style, so far from having any thing doubtful or fallacious in what he said, that I shall only set down his words as they are in his sermon of sincerity, , to show his meaning: "Nathanael," says he, "being satisfied, that he [our Saviour] was the Messiah, he presently owned him for such, calling him the Son of God, and the King of Israel."

The words of the other eminent prelate, the bishop of Ely, whom our church is still happy in, are these: "To be the Son of God, and to be Christ, being but different expressions of the same thing:" witness . And , "It is the very same thing to believe that Jesus is the Christ," and to believe, "that Jesus is the Son of God, express it how you please." "This alone is the faith which can regenerate a man, and put a divine Spirit into him, that it makes him a conqueror over the world, as Jesus was." Of this the unmasker says, that this reverend author, "speaking only in a general way, represents these two as the same thing," viz. that Jesus is the Christ, and that Jesus is the Son of God, because these expressions are applied to the same person, and because they are both comprehended in one general name, viz. Jesus. Answ. The question is, Whether these two expressions, "the Son of God," and "the Messiah," in the learned bishop's opinion, signify the same thing? If his opinion had been asked in the point, I know not how he could have declared it more clearly. For he says, they are "Expressions of the same thing;" and that it is the very same thing to believe, "that Jesus is the Messiah," and to believe, "that he is the Son of God;" which cannot be so, if Messiah and Son of God have different significations: for then they will make two distinct propositions in different senses, which it can be no more the same thing to believe, than it is the same thing to believe that Mr. Edwards is a

notable preacher, and a notable railer; or than it is to believe one truth, and all truths. For by the same reason, that it is the same thing to believe two distinct truths, it will be the same thing to believe two thousand distinct truths, and consequently all truths. The unmasker, that he might seem to say something, says, that “the reverend author represents these as the same thing.” Answ. The unmasker never fails, like Midas, to turn every thing he touches into his own metal. The learned bishop says, very directly and plainly, that “to be the Son of God, and to be the Messiah, are expressions of the same thing:” and the unmasker says, he “represents these expressions as one thing:” for it is of expressions that both the bishop and he speak. Now, expressions can be one thing, but one of these two ways: either in sound, and so these two expressions are not one; or in signification, and so they are. And then the unmasker says, but in other words, what the bishop had said before, viz. That these two, “to be the Son of God, and to be the Messiah, are expressions of the same thing.” Only the unmasker has put in the word represents, to amuse his reader, as if he had said something; and so indeed he does, after his fashion, i. e. obscurely and fallaciously; which, when it comes to be examined, is but the same thing under show of a difference; or else, if it has a different meaning, it is demonstratively false. But so it be obscure enough to deceive a willing reader, who will not be at the pains to examine what he says, it serves his turn.

But yet, as if he had said something of weight, he gives reasons for putting “represents these two expressions as one thing,” instead of saying “these two are but different expressions of the same thing.”

The first of his reasons is, Because the reverend author is here “speaking only in a general way.” Answ. What does the unmasker mean by a general way? The learned bishop speaks of two particular expressions applied to our Saviour. But was his discourse ever so general how could that alter the plain signification of his words, viz. that those two are but “different expressions of the same thing?”

Secondly, “Because these expressions are applied to the same person.” Answ. A very demonstrative reason, is it not? that therefore they cannot be different expressions of the same thing.

Thirdly, “And because they are both comprehended in one general name, viz. Jesus.” Answ. It requires some skill to put so many falsehoods in so few words; for neither both nor either of these expressions are comprehended in the name Jesus; and that Jesus, the name of a particular

person, should be a general name, is a discovery reserved to be found out by this new logician. However, general, is a learned word, which when a man of learning has used twice, as a reason of the same thing, he is covered with generals. He need not trouble himself any farther about sense; he may safely talk what stuff he pleases without the least suspicion of his reader.

Having thus strongly proved just nothing, he proceeds and tells us, , “Yet it does not follow thence, but that if we will speak strictly and closely, we must be forced to confess, they are of different significations.” By which words (if his words have any signification) he plainly allows, that the bishop meant as he says, that these two are but “different expressions of the same thing;” but withal tells him, that, if he will “speak closely and strictly,” he must say, “they are of different significations.” My concernment in the case being only that in the passage alleged, the reverend author said, that the Son of God, and the Messiah, were “different expressions of the same thing.” I have no more to demand after these words of the unmasker; he has in them granted all I would have: and I shall not meddle with his “speaking closely and strictly,” but shall leave it to the decisive authority of this superlative critic to determine whether this learned bishop, or any one living, besides himself, can understand the phrases of the New Testament, and “speak strictly and closely” concerning them. Perhaps, his being yet alive, may preserve this eminent prelate from the malicious drivelling of this unmasker’s pen, which has bespattered the ashes of two of the same order, who were no mean ornaments of the English church; and if they had been now alive, nobody will doubt but the unmasker would have treated them after another fashion.

But let me ask the unmasker, whether if either of these pious prelates, whose words I have above quoted, did understand that phrase of the Son of God to stand for the Messiah, (which they might do without holding any one socinian tenet;) he will dare to pronounce him a socinian? This is so ridiculous an inference, that I could not but laugh at it. But withal tell him, Vindic. , “That if the sense wherein I understand those texts, be a mistake, I shall be beholden to him to set me right: but they are not popular authorities, or frightful names, whereby I judge of truth or falsehood.” To which I subjoin these words: “You will now, no doubt, applaud your conjectures; the point is gained, and I am openly a socinian; since I will not disown, that I think the Son of God was a phrase, that, among the jews, in our Saviour’s time, was used for the Messiah, though the socinians

understood it in the same sense. And therefore I must certainly be of their persuasion in every thing else. I admire the acuteness, force, and fairness of your reasoning; and so I leave you to triumph in your conjectures.” Nor has he failed my expectation: “for here, , of his Socinianism unmasked, he upon this erects his comb, and crows most mightily. We may,” says he, “from hence, as well as other reasons, pronounce him the same with those gentlemen, (i. e. as he is pleased to call them, my good patrons and friends, the racovians;) which you may perceive he is very apprehensive of, and thinks that this will be reckoned a good evidence of his being, what he denied himself to be before.” “The point is gained, saith he, and I am openly a socinian.” “He never uttered truer words in his life, and they are the confutation of all his pretences to the contrary. This truth, which unwarily dropped from his pen, confirms what I have laid to his charge.” Now you have sung your song of triumph, it is fit you should gain your victory, by showing,

XLIX. HOW MY UNDERSTANDING THE SON OF GOD TO BE A
PHRASE USED AMONGST THE JEWS, IN OUR SAVIOUR’S TIME,
TO SIGNIFY THE MESSIAH, PROVES ME TO BE A SOCINIAN?

Or, if you think you have proved it already, I desire you to put your proof into a syllogism: for I confess myself so dull, as not to see any such conclusion deducible from my understanding that phrase as I do, even when you have proved that I am mistaken in it.

The places, which in the New Testament show that the Son of God stands for the Messiah, are so many and so clear, that I imagine nobody that ever considered and compared them together, could doubt of their meaning, unless he were an unmasker. Several of them I have collected and set down in my “Reasonableness of christianity,” , 18, 19, 21, 28, 52.

First, John the Baptist, John i. 20, when the jews sent to know who he was, confessed he himself was not the Messiah. But of Jesus he says, ver. 34, after having several ways, in the foregoing verses, declared him to be the Messiah: “And I saw and bare record, that this is the Son of God.” And again, chap. iii. 26 — 36, he declaring Jesus to be, and himself not to be the Messiah, he does it in these synonymous terms, of the Messiah, and the Son of God; as appears by comparing ver. 28, 35, 36.

Nathanael owns him to be the Messiah, in these words, John i. 50, "Thou art the Son of God, thou art the King of Israel:" which our Saviour, in the next verse, calls believing; a term, all through the history of our Saviour, used for owning Jesus to be the Messiah. And for confirming that faith of his, that he was the Messiah, our Saviour further adds, that he should see greater things, i. e. should see him do greater miracles, to evidence that he was the Messiah.

Luke iv. 41, "And devils also came out of many, crying, Thou art the Messiah, the Son of God; and he, rebuking them, suffered them not to speak." And so again, St. Mark tells us, chap. iii. 11, 12, "That unclean spirits, when they saw him, fell down before him, and cried, saying, Thou art the Son of God. And he strictly charged them, that they should not make him known." In both these places, which relate to different times, and different occasions, the devils declare Jesus to be the Son of God. It is certain, whatever they meant by it, they used a phrase of a known signification in that country: and what may we reasonably think they designed to make known to the people by it? Can we imagine these unclean spirits were promoters of the gospel, and had a mind to acknowledge and publish to the people the deity of our Saviour, which the unmasker would have to be the signification of the Son of God? Who can entertain such a thought? No, they were no friends to our Saviour: and therefore desired to spread a belief of him, that he was the Messiah, that so he might, by the envy of the scribes and pharisees, be disturbed in his ministry, and be cut off before he had completed it. And therefore we see, our Saviour in both places forbids them to make him known; as he did his disciples themselves, for the same reason. For when St. Peter, Matt. xvi. 16, had owned Jesus to be the Messiah, in these words: "Thou art the Messiah, the Son of the living God;" it follows, ver. 20, "Then charged he his disciples, that they should tell no man that he was Jesus the Messiah;" just as he had forbid the devils to make him known, i. e. to be the Messiah. Besides, these words here of St. Peter, can be taken in no other sense, but barely to signify, that Jesus was the Messiah, to make them a proper answer to our Saviour's question. His first question here to his disciples, ver. 13, is, "Whom do men say, that I, the Son of man," am? The question is not, Of what original do you think the Messiah, when he comes, will be? For then this question would have been as it is, Matt. xxii. 42, "What think ye of the Messiah, whose Son is he?" if he had inquired about the common opinion, concerning the nature and

descent of the Messiah. But this question is concerning himself: Whom, of all the extraordinary persons known to the jews, or mentioned in their sacred writing, the people thought him to be? That this was the meaning of his question, is evident from the answer the apostles gave to it, and his further demand, ver. 14, 15, "They said, Some say thou art John the Baptist, some Elias, and others Jeremias, or one of the prophets. He saith unto them, But whom say ye that I am? The people take me, some for one of the prophets or extraordinary messengers from God, and some for another: but which of them do you take me to be? Simon Peter answered and said, Thou art the Messiah, the Son of the living God." In all which discourse, it is evident there was not the least inquiry made by our Saviour concerning the person, nature, or qualifications of the Messiah; but whether the people or his apostles thought him, i. e. Jesus of Nazareth, to be the Messiah. To which St. Peter gave him a direct and plain answer in the foregoing words, declaring their belief of him to be the Messiah: which is all that, with any manner of congruity, could be made the sense of St. Peter's answer. This alone of itself were enough to justify my interpretation of St. Peter's words, without the authority of St. Mark, and St. Luke, both whose words confirm it. For St. Mark, chap. viii. 29, renders it, "Thou art the Messiah; and St. Luke, chap. ix. 20, The Messiah of God." To the like question, "Who art thou?" John the Baptist gives a like answer, John i. 19, 20, "I am not the Christ." By which answer, as well as by the foregoing verses, it is plain, nothing was understood to be meant by that question, but, Which of the extraordinary persons, promised to, or expected by, the jews art thou?

John xi. 27, the phrase of the Son of God is made use of by Martha; and that it was used by her to signify the Messiah, and nothing else, is evident out of the context. Martha tells our Saviour, that if he had been there before her brother died, he, by that divine power which he had manifested in so many miracles which he had done, could have saved his life; and that now, if our Saviour would ask it of God, he might obtain the restoration of his life. Jesus tells her, he shall rise again: which words, Martha taking to mean, at the general resurrection, at the last day; Jesus thereupon takes occasion to intimate to her, that he was the Messiah, by telling her, that he was "the resurrection and the life;" i. e. that the life, which mankind should receive at the general resurrection, was by and through him. This was a description of the Messiah, it being a received opinion among the jews, that when the Messiah came, the just should rise, and live with him for ever. And having

made this declaration of himself to be the Messiah, he asks Martha, "Believest thou this?" What? Not whose son the Messiah should be; but whether he himself was the Messiah, by whom believers should have eternal life at the last day. And to this she gives this direct and apposite answer: "Yea, Lord, I believe that thou art the Christ, the Son of God, which should come into the world." The question was only, Whether she was persuaded, that those, who believed in him, should be raised to eternal life; that was in effect, "Whether he was the Messiah?" And to this she answers, Yea, Lord, I believe this of thee: and then she explains what was contained in that faith of hers; even this, that he was the Messiah, that was promised to come, by whom alone men were to receive eternal life.

What the jews also understood by the Son of God, is likewise clear from that passage at the latter end of Luke xxii. They having taken our Saviour, and being very desirous to get a confession from his own mouth, that he was the Messiah, that they might be from thence able to raise a formal and prevalent accusation against him before Pilate; the only thing the council asked him, was, Whether he was the Messiah? v. 67. To which he answers so, in the following words, that he lets them see he understood, that the design of their question was to entrap him, and not to believe in him, whatever he should declare of himself. But yet he tells them, "Hereafter shall the Son of man sit on the right hand of the power of God:" Words that to the jews plainly enough owned him to be the Messiah; but yet such as could not have any force against him with Pilate. He having confessed so much, they hope to draw yet a clearer confession from him. "Then said they all, Art thou then the Son of God? And he said unto them, Ye say that I am. And they said, What need we any further witness? For we ourselves have heard of his own mouth." Can any one think, that the doctrine of his deity (which is that which the unmasker accuses me for waving) was that which the jews designed to accuse our Saviour of, before Pilate; or that they needed witnesses for? Common sense, as well as the current of the whole history, shows the contrary. No, it was to accuse him, that he owned himself to be the Messiah, and thereby claimed a title to be king of the jews. The Son of God was so known a name amongst the jews, to stand for the Messiah; that having got that from his mouth, they thought they had proof enough for treason against him. This carries with it a clear and easy meaning. But if the Son of God be to be taken, as the unmasker would have

it, for a declaration of his deity, I desire him to make common and coherent sense of it.

I shall add one consideration more to show that the Son of God was a form of speech then used among the jews, to signify the Messiah, from the persons that used it, viz. John the Baptist, Nathanael, St. Peter, Martha, the sanhedrim, and the centurion, Matt. xxvii. 54. Here are jews, heathens, friends, enemies, men, women, believers and unbelievers, all indifferently use this phrase of the Son of God, and apply it to Jesus. The question between the unmasker and me, is, Whether it was used by these several persons, as an appellation of the Messiah, or (as the unmasker would have it) in a quite different sense? as such an application of divinity to our Saviour, that he that shall deny that to be the meaning of it in the minds of these speakers, denies the divinity of Jesus Christ. For if they did speak it without that meaning, it is plain it was a phrase known to have another meaning; or else they had talked unintelligible jargon. Now I will ask the unmasker, “Whether he thinks, that the eternal generation, or, as the unmasker calls it, filiation of Jesus the Son of God, was a doctrine that had entered into the thoughts of all the persons above mentioned, even of the Roman centurion, and the soldiers that were with him watching Jesus?” If he says he does, I suppose he thinks so only for this time, and for this occasion: and then it will lie upon him to give the world convincing reasons for his opinion, that they may think so too; or if he does not think so, he must give up his argument, and allow that this phrase, in these places, does not necessarily import the deity of our Saviour, and the doctrine of his eternal generation: and so a man may take it to be an expression standing for the Messiah, without being a socinian, any more than he himself is one.

“There is one place the unmasker tells us, , that confutes all the surmises about the identity of these terms. It is, says he, that famous confession of faith which the Ethiopian eunuch made, when Philip told him, he might be baptized, if he believed. This, without doubt, was said, according to that apprehension, which he had of Christ, from Philip’s instructing him; for he said he preached unto him Jesus, ver. 35. He had acquainted him, that Jesus was the Christ, the anointed of God, and also that he was the Son of God; which includes in it, that he was God. And accordingly, this noble proselyte gives this account of his faith, in order to his being baptized, in order to his being admitted a member of Christ’s church: “I believe that Jesus is the Son

of God:" or you may read it according to the Greek, "I believe the Son of God to be Jesus Christ." Where there are these two distinct propositions:

"1st, That Jesus is the Christ, the Messiah.

"2dly, That he is not only the Messiah, but the Son of God."

The unmasker is every-where steadily the same subtle arguer. Whether he has proved that the Son of God, in this confession of the eunuch, signifies what he would have, we shall examine by and by. This at least is demonstration, that this passage of his overturns his principles; and reduces his long list of fundamentals to two propositions, the belief whereof is sufficient to make a man a christian. "This noble proselyte, says the unmasker, gives this account of his faith, in order to his being baptized, in order to his being admitted a member of Christ's church." And what is that faith, according to the unmasker? he tells you, "there are in it these two distinct propositions, viz. I believe, 1st, That Jesus is the Christ, the Messiah; 2dly, That he is not only the Messiah, but the Son of God." If this famous confession, containing but these two articles, were enough to his being baptized; if this faith were sufficient to make this noble proselyte a christian; what is become of all those other articles of the unmasker's system, without the belief whereof, he, in other places, tells us, a man cannot be a christian? If he had here told us, that "Philip had not time nor opportunity," during his short stay with the eunuch, to explain to him all the unmasker's system, and make him understand all his fundamentals; he had had reason on his side: and he might have urged it as a reason why Philip taught him no more. But nevertheless he had, by allowing the eunuch's confession of faith sufficient for his admittance as a member of Christ's church, given up his other fundamentals, as necessary to be believed to make a man a christian; even that of the Holy Trinity; and he has at last reduced his necessary articles to these two, viz. "That Jesus is the Messiah;" and that "Jesus is the Son of God." So that, after his ridiculous calling mine a lank faith, I desire him to consider what he will now call his own. Mine is next to none, because, as he says, it is but one article. If that reasoning be good, his is not far from none; it consists but in two articles, which is next to one, and very little more remote from none than one is. If any one had but as much wit as the unmasker, and could be but as smart upon the number two, as he has been upon an unit, here were a brave opportunity for him to lay out his parts; and he might make vehement complaints against one, that has thus "cramped our faith, corrupted men's minds, depraved the

gospel, and abused christianity.” But if it should fall out, as I think it will, that the unmasker’s two articles should prove to be but one; he has saved another that labour, and he stands painted to himself with his own charcoal.

The unmasker would have the Son of God, in the confession of the eunuch, to signify something different from the Messiah: and his reason is, because else it would be an absurd tautology. Ans. There are many exegetical expressions put together in scripture, which, though they signify the same thing, yet are not absurd tautologies. The unmasker here inverts the proposition, and would have it to signify thus: “The Son of God is Jesus the Messiah;” which is a proposition so different from what the apostles proposed, every-where else, that he ought to have given a reason why, when, every-where else, they made the proposition to be, of something affirmed of Jesus of Nazareth, the eunuch should make the affirmation to be of something concerning the Son of God: as if the eunuch knew very well, what the Son of God signified, viz. as the unmasker tells us here, that it included or signified God; and that Philip (who, we read, at Samaria preached τὸν Χριστὸν, the Messiah, i. e. instructed them who the Messiah was) had here taken pains only to instruct him that this God was Jesus the Messiah, and to bring him to assent to that proposition. Whether this be natural to conceive, I leave to the reader.

The tautology, on which the unmasker builds his whole objection, will be quite removed if we take Christ here for a proper name, in which way it is used by the evangelists and apostles in other places, and particularly by St. Luke, in Acts ii. 38, iii. 6, 20, iv. 10, xxiv. 24, &c. In two of these places it cannot, with any good sense, be taken otherwise; for, if it be not in Acts iii. 6, and iv. 10, used as a proper name, we must read those places thus, “Jesus the Messiah of Nazareth.” And I think it plain in those others cited, as well as in several other places of the New Testament, that the word Christ is used as a proper name. We may easily conceive, that long before the Acts were writ, the name of Christ was grown, by a familiar use, to denote the person of our Saviour, as much as Jesus. This is so manifest, that it gave a name to his followers; who, as St. Luke tells us, xi. 26, were called christians; and that, if chronologists mistake not, twenty years before St. Luke writ his history of the apostles: and this so generally, that Agrippa, a jew, uses it, Acts xxvi. 28. And that Christ, as the proper name of our Saviour, was got as far as Rome, before St. Luke writ the Acts, appears out of Suetonius, l. 5; and by that name he is called in Tacitus, Ann. l. 15. It is no wonder then,

that St. Luke, in writing this history, should sometimes set it down alone, sometimes joined with that of Jesus, as a proper name: which is much easier to conceive he did here, than that Philip proposed more to the eunuch to be believed to make him a christian, than what, in other places, was proposed for the conversion of others, or than what he himself proposed at Samaria.

His 7th chapter is to prove, that I am a socinian, because I omitted Christ's satisfaction. That matter having been answered, , where it came properly under consideration, I shall only observe here, that the great stress of his argument lies as it did before, not upon my total omission of it out of my book, but on this, that "I have no such thing in the place where the advantages of Christ's coming are purposely treated of;" from whence he will have this to be an unavoidable inference, viz. "That I was of opinion, that Christ came not to satisfy for us." The reason of my omission of it in that place, I told him, was because my book was chiefly designed for deists: and therefore I mentioned only those advantages, which all christians must agree in; and, in omitting of that, complied with the apostle's rule, Rom. xiv. To this he tells me flatly, that was not the design of my book. Whether the unmasker knows with what design I published it better than myself, must be left to the reader to judge: for as for his veracity in what he knows, or knows not, he has given so many instances of it, that I may safely refer that to any body. One instance more of it may be found in this very chapter, where he says, "I pretend indeed, page 163, that in another place of my book, I mention Christ's restoring all mankind from the state of death, and restoring them to life: and his laying down his life for another, as our Saviour professes he did. These few words this vindicator has picked up in his book since he wrote it. This is all, through his whole treatise, that he hath dropped concerning that advantage of Christ's incarnation; i. e. Christ's satisfaction." Answ. But that this is not all that I have dropped through my whole treatise, concerning that advantage, may appear by those places above mentioned, , where I say, that the design of Christ's coming was to be offered up, and speak of the work of redemption; which are expressions taken to imply our Saviour's satisfaction. But the unmasker thinking I should have quoted them, if there had been any more, besides those mentioned in my vindication, upon that presumption sticks not boldly to affirm, that there were no more; and so goes on with the veracity of an unmasker. If affirming would do it, nothing could be wanting in his cause, that might be for his purpose. Whether he be as good at proving, this

consequence (among other propositions, which remain upon him to be proved) will try, viz.

L. THAT IF THE SATISFACTION OF CHRIST BE NOT MENTIONED
IN THE PLACE WHERE THE ADVANTAGES OF CHRIST'S COMING
ARE PURPOSELY TREATED OF, THEN I AM OF OPINION, THAT
CHRIST CAME NOT TO SATISFY FOR US:

Which is all the argument of his 7th chapter.

His last chapter, as his first, begins with a commendation of himself; particularly, it boasts his freedom from bigotry, dogmatizing, censoriousness, and uncharitableness. I think he hath drawn himself so well with his own pen, that I shall need refer the reader only to what he himself has wrote in this controversy, for his character.

In the next paragraph, , he tells me, "I laugh at orthodoxy." Answ. There is nothing that I think deserves a more serious esteem than right opinion, (as the word signifies,) if taken up with the sense and love of truth. But this way of becoming orthodox has always modesty accompanying it, and a fair acknowledgment of fallibility in ourselves, as well as a supposition of error in others. On the other side there is nothing more ridiculous, than for any man, or company of men, to assume the title of orthodoxy to their own set of opinions, as if infallibility were annexed to their systems, and those were to be the standing measure of truth to all the world; from whence they erect to themselves a power to censure and condemn others, for differing at all from the tenets they have pitched upon. The consideration of human frailty ought to check this vanity; but since it does not, but that, with a sort of allowance, it shows itself in almost all religious societies, the playing the trick round sufficiently turns it into ridicule. For each society having an equal right to a good opinion of themselves, a man by passing but a river, or a hill, loses that orthodoxy in one company, which puffed him up with such assurance and insolence in another; and is there, with equal justice, himself exposed to the like censures of error and heresy, which he was so forward to lay on others at home. When it shall appear, that infallibility is intailed upon one set of men of any denomination, or truth confined to any spot of ground, the name and use of orthodoxy, as now it is in fashion every-where, will in that one place be reasonable. Until then, this ridiculous cant will be a foundation too weak to sustain that usurpation that is raised upon it. It is not

that I do not think every one should be persuaded of the truth of those opinions he professes. It is that I contend for; and it is that which I fear the great sticklers for orthodoxy often fail in. For we see generally that numbers of them exactly jump in a whole large collection of doctrines, consisting of abundance of particulars; as if their notions were, by one common stamp, printed on their minds, even to the least lineament. This is very hard, if not impossible, to be conceived of those who take up their opinions only from conviction. But, how fully soever I am persuaded of the truth of what I hold, I am in common justice to allow the same sincerity to him that differs from me; and so we are upon equal terms. This persuasion of truth on each side, invests neither of us with a right to censure or condemn the other. I have no more reason to treat him ill for differing from me, than he has to treat me ill for the same cause. Pity him, I may; inform him fairly, I ought; but contemn, malign, revile, or any otherwise prejudice him for not thinking just as I do, that I ought not. My orthodoxy gives me no more authority over him, than his (for every one is orthodox to himself) gives him over me. When the word orthodoxy (which in effect signifies no more but the opinions of my party) is made use of as a pretence to domineer (as ordinarily it is,) it is, and always will be, ridiculous.

He says, “I hate, even with a deadly hatred, all catechisms and confessions, all systems and models.” I do not remember, that I have once mentioned the word catechism, either in my Reasonableness of christianity, or Vindication; but he knows “I hate them deadly,” and I know I do not. And as for systems and models, all that I say of them, in the pages he quotes to prove my hatred of them, is only this, viz. in my Vindication, , 165, “Some had rather you should write booty, and cross your own design of removing men’s prejudices to christianity, than leave out one tittle of what they put into their systems. — Some men will not bear it, that any one should speak of religion, but according to the model that they themselves have made of it.” In neither of which places do I speak against systems or models, but the ill use that some men make of them.

He tells me also in the same place, , that I deride mysteries. But for this he hath quoted neither words nor place: and where he does not do that, I have reason, from the frequent liberties he takes to impute to me what nowhere appears in my books, to desire the reader to take what he says not to be true. For did he mean fairly, he might, by quoting my words, put all such

matters of fact out of doubt; and not force me, so often as he does, to demand where it is: as I do now here again,

LI. WHERE IT IS THAT I DERIDE MYSTERIES?

His next words, , are very remarkable: they are, “O how he [the vindicator] grins at the spirit of creed-making! , Vindic. The very thoughts of which do so haunt him, so plague and torment him, that he cannot rest until it be conjured down. And here, by the way, seeing I have mentioned his rancour against systematic books and writings, I might represent the misery that is coming upon all booksellers, if this gentleman and his correspondence go on successfully. Here is an effectual plot to undermine Stationers-hall; for all systems and bodies of divinity, philosophy, &c. must be cashiered; whatsoever looks like system must not be bought or sold. This will fall heavy on the gentlemen of St. Paul’s church-yard and other places.” Here the politic unmasker seems to threaten me with the posse of Paul’s church-yard, because my book might lessen their gain in the sale of theological systems. I remember that “Demetrius the shrine-maker, which brought no small gain to the craftsmen, whom he called together, with the workmen of like occupation, and said to this purpose: Sirs, ye know, that by this craft we have our wealth: moreover ye see and hear, that this Paul hath persuaded, and turned away much people, saying, that they be no gods that are made with hands; so that this our craft is in danger to be set at nought. And when they heard these sayings, they were full of wrath, and cried out, saying, Great is Diana of the Ephesians.” Have you, sir, who are so good at speechmaking, as a worthy successor of the silver-smith, regulating your zeal for the truth, and your writing divinity by the profit it will bring, made a speech to this purpose to the craftsmen, and told them, that I say, articles of faith, and creeds, and systems in religion, cannot be made by men’s hands or fancies; but must be just such, and no other, than what God hath given us in the scriptures? And are they ready to cry out to your content, “Great is Diana of the Ephesians?” If you have well warmed them with your oratory, it is to be hoped they will heartily join with you, and bestir themselves, and choose you for their champion, to prevent the misery, you tell them, is coming upon them, in the loss of the sale of systems and bodies of divinity: for, as for philosophy, which you name too, I think you went a little too far; nothing of that kind, as I remember, hath been so much as

mentioned. But, however, some sort of orators, when their hands are in, omit nothing, true or false, that may move those they would work upon. Is not this a worthy employment, and becoming a preacher of the gospel, to be a solicitor for Stationers-hall? And make the gain of the gentlemen of Paul's church-yard, a consideration for or against any book writ concerning religion? This, if it were ever thought on before, nobody but an unmasker, who lays all open, was ever so foolish as to publish. But here you have an account of his zeal: the views of gain are to measure the truths of divinity. Had his zeal, as he pretends in the next paragraph, no other aims, but the "defence of the gospel;" it is probable this controversy would have been managed after another fashion.

Whether what he says in the next, , to excuse his so often pretending to "know my heart and thoughts," will satisfy the reader, I shall not trouble myself. By his so often doing it again, in his Socinianism unmasked, I see he cannot write without it. And so I leave it to the judgment of the readers, whether he can be allowed to know other men's thoughts, who, on many occasions, seems not well to know his own. The railing in the remainder of this chapter I shall pass by, as I have done a great deal of the same strain in his book: only to show how well he understands or represents my sense, I shall set down my words, as they are in the pages he quotes, and his inferences from them.

VINDICATION, P. 171.

I know not but it may be true that the anti-trinitarians and racovians understand those places as I do; but it is more than I know, that they do so. I took not my sense of those texts from those writers, but from the scripture itself, giving light to its own meaning, by one place compared with another. What, in this way, appears to me its true meaning, I shall not decline, because I am told, that it is so understood by the racovians, whom I never yet read; nor embrace the contrary, though the generality of divines I more converse with, should declare for it. If the sense wherein I understand those texts be a mistake, I shall be beholden to you, if you will set me right. But they are not popular authorities, or frightful names, whereby I judge of truth or falsehood.

SOCINIANISM UNMASKED, P. 108.

“The professed divines of England, you must know, are but a pitiful sort of folks with this great racovian rabbi. He tells us plainly, that he is not mindful of what the generality of divines declare for, . He labours so concernedly to ingratiate himself with the mob, the multitude (which he so often talks of) that he has no regard to these. The generality of the rabble are more considerable with him than the generality of divines.”

He tells me here of the generality of divines. If he had aid of the church of England, I could have understood him: but he says, “The professed divines of England;” and there being several sorts of divines in England, who, I think, do not every-where agree in their interpretations of scripture; which of them is it I must have regard to, where they differ? If he cannot tell me that, he complains here of me for a fault, which he himself knows not how to mend.

VINDICATION, P. 169.

The list of materials for his creed, (for the articles are not yet formed,) Mr. Edwards closes, , with these words: “These are the matters of faith contained in the epistles; and they are essential and integral parts of the gospel itself.” What! just these, neither more nor less? If you are sure of it, pray let us have them speedily, for the reconciling of differences in the christian church, which has been so cruelly torn about the articles of the christian faith, to the great reproach of christian charity, and scandal of our true religion.

SOCINIANISM UNMASKED, P. 109.

“This author, as demure and grave as he would sometimes seem to be, can scoff at the matters of faith contained in the apostles epistles, .”

Does the vindicator here “scoff at the matters of faith contained in the epistles?” or show the vain pretences of the unmasker: who undertakes to give us, out of the epistles, a collection of fundamentals, without being able to say, whether those he sets down be all or no?

VINDICATION, P. 176.

I hope you do not think, how contemptibly soever you speak of the venerable mob, as you are pleased to dignify them, , that the bulk of mankind, or, in your phrase, the rabble, are not concerned in religion; or

ought not to understand it, in order to their salvation. I remember the pharisees treated the common people with contempt; and said, "Have any of the rulers, or of the pharisees, believed in him? But this people, who know not the law, are cursed." But yet these, who in the censure of the pharisees, were cursed, were some of the poor, or, if you please to have it so, the mob, to whom the gospel was preached by our Saviour, as he tells John's disciples, Matt. xi. 5.

SOCINIANISM UNMASKED, P. 110.

"To coax the mob, he profanely brings in that place of scripture; Have any of the rulers believed in him?"

Where the profaneness of this is, I do not see; unless some unknown sacredness of the unmasker's person make it profaneness to show, that he, like the pharisees of old, has a great contempt for the common people, i. e. the far greater part of mankind; as if they and their salvation were below the regard of this elevated rabbi. But this, of profaneness, may be well born from him, since in the next words my mentioning another part of his carriage is no less than irreligion.

VINDICATION, P. 173.

He prefers what I say to him myself, to what is offered to him, from the word of God, and makes me this compliment, that I begin to mend about the close, i. e. when I leave off quoting of scripture, and the dull work was done "of going through the history of the Evangelists and the Acts," which he computes, , to take up three quarters of my book.

SOCINIANISM UNMASKED, P. 110.

"Ridiculously and irreligiously he pretends," that I prefer what he saith to me to what is offered to me from the word of God, .

The matter of fact is as I relate it, and so is beyond pretence; and for this I refer the reader to the 105th and 114th pages of his "Thoughts concerning the causes of atheism." But had I mistaken, I know not how he could have called it irreligiously. Make the worst of it that can be, how comes it to be irreligious? What is there divine in an unmasker, that one cannot pretend (true or false) that he prefers what I say, to what is offered him from the

word of God, without doing it irreligiously? Does the very assuming the power to define articles, and determine who are, and who are not christians, by a creed not yet made, erect an unmasker presently into God's throne, and bestow on him the title of Dominus Deusque noster, whereby offences against him come to be irreligious acts? I have misrepresented his meaning; let it be so: Where is the irreligion of it? Thus it is: the power of making a religion for others (and those that make creeds do that) being once got into any one's fancy, must at last make all oppositions to those creeds and creed-makers irreligion. Thus we see, in process of time, it did in the church of Rome: but it was in length of time, and by gentle degrees. The unmasker, it seems, cannot stay, is in haste, and at one jump leaps into the chair. He has given us yet but a piece of his creed, and yet that's enough to set him above the state of human mistakes or frailties; and to mention any such thing in him, is to do irreligiously.

"We may further see," says the unmasker, , "how counterfeit the vindicator's gravity is, whilst he condemns frothy and light discourses," , Vindic. And "yet, in many pages together, most irreverently treats a great part of the apostolical writings, and throws aside the main articles of religion as unnecessary." Answ. in my Vindic. , you may remember these words: "I require you to publish to the world those passages, which show my contempt of the epistles." Why do you not (especially having been so called upon to do it) set down those words, wherein "I most irreverently treat a great part of the apostolical writings?" At least, why do you not quote those many pages wherein I do it? This looks a little suspiciously, that you cannot: and the more because you have, in this very page, not been sparing to quote places which you thought to your purpose. I must take leave, therefore, (if it may be done without irreligion) to assure the reader, that this is another of your many mistakes in matters of fact, for which you have not so much as the excuse of inadvertency: for, as he sees, you have been minded of it before. But an unmasker, say what you will to him, will be an unmasker still.

He closes what he has to say to me, in his Socinianism unmasked, as if he were in the pulpit, with an use of exhortation. The false insinuations it is filled with make the conclusion of a piece with the introduction. As he sets out, so he ends, and therein shows wherein he places his strength. A custom of making bold with truth is so seldom curable in a grown man, and the unmasker shows so little sense of shame, where it is charged upon him,

beyond a possibility of clearing himself, that nobody is to trouble themselves any farther about that part of his established character. Letting therefore that alone to nature and custom, two sure guides, I shall only intreat him, to prevent his taking railing for argument, (which I fear he too often does,) that upon his entrance, every-where, upon any new argument, he would set it down in syllogism; and when he has done that (that I may know what is to be answered) let him then give vent, as he pleases, to his noble vein of wit and oratory.

The lifting a man's self up in his own opinion, has had the credit, in former ages, to be thought the lowest degradation that human nature could well sink itself to. Hence, says the wise man, Prov. xxvi. 5, "Answer a fool according to his folly, lest he be wise in his own conceit:" hereby showing, that self-conceitedness is a degree beneath ordinary folly. And therefore he there provides a fence against it, to keep even fools from sinking yet lower, by falling into it. Whether what was not so in Solomon's days be now, by length of time, in ours, grown into a mark of wisdom and parts, and an evidence of great performances, I shall not inquire. Mr. Edwards, who goes beyond all that ever I yet met with, in the commendation of his own, best knows why he so extols what he has done in this controversy. For fear the praises he has not been sparing of, in his Socinianism unmasked, should not sufficiently trumpet out his worth, or might be forgotten; he, in a new piece, intitled, "the Socinian creed," proclaims again his mighty deeds, and the victory he has established to himself by them, in these words: "But he and his friends (the one-article men) seem to have made satisfaction, by their profound silence lately, whereby they acknowledge to the world, that they have nothing to say in reply to what I laid to their charge, and fully proved against them, &c." Socinian creed, . This fresh testimony of no ordinary conceit, which Mr. Edwards hath, of the excellency and strength of his reasoning, in his Socinianism unmasked, I leave with him and his friends, to be considered of at their leisure: and, if they think I have misapplied the term of conceitedness, to so wise, understanding, and every way accomplished a disputant, (if we may believe himself), I will teach them a way how he, or any body else, may fully convince me of it. There remains on his score, marked in this reply of mine, several propositions to be proved by him. If he can find but arguments to prove them, that will bear the setting down in form, and will so publish them, I will allow myself to be mistaken. Nay, which is more, if he, or any body, in the 112 pages of his Socinianism

unmasked, can find but ten arguments that will bear the test of syllogism, the true touchstone of right arguing; I will grant, that that treatise deserves all those commendations he has bestowed upon it, though it be made up more of his own panegyric, than a confutation of me.

In his socinian creed, (for a creed-maker he will be; and whether he has been as lucky for the socinians as for the orthodox, I know not,) , he begins with me, and that with the same conquering hand and skill, which can never fail of victory; if a man has but wit enough to know what proposition he is able to confute, and then make that his adversary's tenet. But the repetitions of his old song concerning one article, the epistles, &c. which occur here again, I shall only set down, that none of these excellent things may be lost, whereby this acute and unanswerable writer has so well deserved his own commendations: viz. "That I say, there is but one single article of the christian truth necessary to be believed and assented to by us, . That I slight the christian principles, curtail the articles of our faith, and ravish christianity itself from him, . And that I turn the epistles of the apostles into waste paper," .

These and the like slanders I have already given an answer to, in my reply to his former book. Only one new one here I cannot pass over in silence, because of the remarkable profaneness which seems to me to be in it; which, I think, deserves public notice. In my "Reasonableness of christianity," I have laid together those passages of our Saviour's life, which seemed to me most eminently to show his wisdom, in that conduct of himself, with that reserve and caution which was necessary to preserve him, and carry him through the appointed time of his ministry. Some have thought I had herein done considerable service to the christian religion, by removing those objections which some were apt to make from our Saviour's carriage, not rightly understood. This creed-maker tells me, , "That I make our Saviour a coward:" a word not to be applied to the Saviour of the world by a pious or discrete christian, upon any pretence, without great necessity, and sure grounds! If he had set down my words, and quoted the page, (which was the least could have been done to excuse such a phrase,) we should then have seen which of us two this impious and irreligious epithet, given to the holy Jesus, has for its author. In the mean time, I leave it with him, to be accounted for, by his piety, to those, who by his example shall be encouraged to entertain so vile a thought, or use so profane an expression of the Captain of our salvation, who freely gave himself up to death for us.

He also says in the same page, 127, "That I everywhere strike at systems, the design of which is to establish one of my own, or to foster scepticism, by beating down all others."

For clear reason, or good sense, I do not think our creed-maker ever had his fellow. In the immediately preceding words of the same sentence he charges me with "a great antipathy against systems;" and, before he comes to the end of it, finds out my design to be the "establishing one of my own." So that this, "my antipathy against systems" makes me in love with one. "My design," he says, is to establish a system of "my own, or to foster scepticism, in beating down all others." Let my book, if he pleases, be my system of christianity. Now is it in me any more fostering scepticism to say my system is true, and others not, than it is in the creed-maker to say so of all other systems but his own? For I hope he does not allow any system of christianity to be true, that differs from his, any more than I do.

But I have spoken against all systems. Answ. And always shall, so far as they are set up by particular men, or parties, as the just measure of every man's faith; wherein every thing that is contained, is required and imposed to be believed to make a man a christian: such an opinion and use of systems I shall always be against, until the creed-maker shall tell me, amongst the variety of them, which alone is to be received and rested in, in the absence of his creed; which is not yet finished, and, I fear, will not, as long as I live. That every man should receive from others, or make to himself such a system of christianity, as he found most comformable to the word of God, according to the best of his understanding, is what I never spoke against: but think it every one's duty to labour for, and to take all opportunities, as long as he lives, by studying the scriptures every day, to perfect.

But this, I fear, will not go easily down with our author; for then he cannot be a creed-maker for others: a thing he shows himself very forward to be; how able to perform it, we shall see when his creed is made. In the mean time, talking loudly and at random, about fundamentals, without knowing what is so, may stand him in some stead.

This being all that is new, which I think myself concerned in, in this socinian creed, I pass on to his Postscript. In the first page whereof, I find these words: "I found that the manager of the Reasonableness of christianity had prevailed with a gentleman to make a sermon upon my refutation of that treatise, and the vindication of it." Such a piece of impertinency, as this,

might have been born from a fair adversary: but the sample Mr. Edwards has given of himself, in his Socinianism unmasked, persuades me this ought to be bound up with what he says of me in his introduction to that book, in these words: “Among others, they thought and made choice of a gentleman, who, they knew, would be extraordinary useful to them. And he, it is probable, was as forward to be made use of by them, and presently accepted of the office that was assigned him:” and more there to the same purpose. All which I know to be utterly false.

It is a pity that one who relies so intirely upon it, should have no better an invention. The socinians set the author of the “Reasonableness of christianity,” &c. on work to write that book: by which discovery the world being (as Mr. Edwards says) let into the project, that book is confounded, baffled, blown off, and by this skilful artifice there is an end of it. Mr. Bold preaches and publishes a sermon without this irrefragable gentleman’s good leave and liking. What now must be done to discredit it, and keep it from being read? Why Mr. Bold too was set on work, by “the manager of the Reasonableness of christianity,” &c. In your whole storehouse of stratagems, you that are so great a conqueror, have you but this one way to destroy a book, which you set your mightiness against, but to tell the world it was a job of journey-work for somebody you do not like? Some other would have done better in this new case, had your happy invention been ready with it: for you are not so bashful or reserved, but that you may be allowed to be as great a wit as he who professed himself “ready at any time to say a good or a new thing, if he could but think of it.” But in good earnest, sir, if one should ask you, Do you think no books contain truth in them, which were undertaken by the procurement of a bookseller? I desire you to be a little tender in the point, not knowing how far it may reach. Aye, but such booksellers live not at the lower end of Pater-noster-row, but in Paul’s church-yard, and are the managers of other guise-books, than the “Reasonableness of christianity.” And therefore you very rightly subjoin, “Indeed it was a great masterpiece of procurement, and we can’t but think that man must speak truth, and defend it very impartially and substantially, who is thus brought on to undertake the cause.” And so Mr. Bold’s sermon is found to have neither truth nor sense in it, because it was printed by a bookseller at the lower end of Pater-noster-row: for that, I dare say, is all you know of the matter. But that is hint enough for a happy diviner, to be

sure of the rest, and with confidence to report that for certain matter of fact, which had never any being but in the fore-casting side of his politic brain.

But whatever were the reasons that moved Mr. B — to preach that sermon, of which I know nothing; this I am sure, it shows only the weakness and malice (I will not say, and ill breeding, for that concerns not one of Mr. Edwards's pitch) of any one who excepts against it, to take notice of any thing more than what the author has published. Therein alone consists the error, if there be any; and that alone those meddle with, who write for the sake of truth. But poor cavillers have other purposes, and therefore must use other shifts, and make a bustle about something besides the argument, to prejudice and beguile unwary readers.

The only exception the creed-maker makes to Mr. Bold's sermon, is the contradiction he imputes to him, in saying: "That there is but one point or article necessary to be believed for the making a man a christian: and that there are many points besides this, which Jesus Christ hath taught and revealed, which every sincere christian is indispensably obliged to endeavour to understand:" and "that there are particular points and articles, which being known to be revealed by Christ, christians must indispensably assent to." And where, now, is there any thing like a contradiction in this? Let it be granted, for example, that the creed-maker's set of articles (let their number be what they will, when he has found them all out) are necessary to be believed, for the making a man a christian. Is there any contradiction in it to say, there are many points besides these, which Jesus Christ hath taught and revealed, which every sincere christian is indispensably obliged to endeavour to understand? If this be not so, it is but for any one to be perfect in Mr. Edwards's creed, and then he may lay by the bible, and from thenceforth he is absolutely dispensed with from studying or understanding any thing more of the scripture.

But Mr. Edwards's supremacy is not yet so far established, that he will dare to say, that christians are not obliged to endeavour to understand any other points revealed in the scripture, but what are contained in his creed. He cannot yet well discard all the rest of the scripture, because he has yet need of it for the completing of his creed, which is like to secure the bible to us for some time yet. For I will be answerable for it, he will not quickly be able to resolve what texts of the scripture do, and what do not, contain points necessary to be believed. So that I am apt to imagine, that the creed-maker, upon second thoughts, will allow that saying, that there is but one, or

there are but twelve, or there are but as many as shall be set down, (when he has resolved which they shall be,) necessary to the making a man a christian; and the saying, there are other points besides, contained in the scripture, which every sincere christian is indispensably obliged to endeavour to understand, and must believe, when he knows them to be revealed by Jesus Christ, are two propositions that may consist together without a contradiction.

Every christian is to partake of that bread, and that cup, which is the communion of the body and blood of Christ. And is not every sincere christian indispensably obliged to endeavour to understand these words of our Saviour's institution, "This is my body, and this is my blood?" And if, upon his serious endeavour to do it, he understands them in a literal sense, that Christ meant, that that was really his body and blood, and nothing else; must he not necessarily believe that the bread and wine, in the Lord's supper, is changed really into his body and blood, though he doth not know how? Or, if having his mind set otherwise, he understands the bread and wine to be really the body and blood of Christ, without ceasing to be the true bread and wine: or else, if he understands them, that the body and blood of Christ are verily and indeed given and received, in the sacrament, in a spiritual manner: or, lastly, if he understands our Saviour to mean, by those words, the bread and wine to be only a representation of his body and blood; in which way soever of these four, a christian understands these words of our Saviour to be meant by him, is he not obliged in that sense to believe them to be true, and assent to them? Or can he be a christian, and understand these words to be meant by our Saviour, in one sense, and deny his assent to them as true, in that sense? Would not this be to deny our Saviour's veracity, and consequently his being the Messiah, sent from God? And yet this is put upon a christian, where he understands the scripture in one sense, and is required to believe it in another. From all which it is evident, that to say there is one, or any number of articles necessary to be known and believed to make a man a christian, and that there are others contained in the scripture, which a man is obliged to endeavour to understand, and obliged also to assent to, as he does understand them, is no contradiction.

To believe Jesus to be the Messiah, and to take him to be his Lord and King, let us suppose to be that only which is necessary to make a man a christian: may it not yet be necessary for him, being a christian, to study the

doctrine and law of this his Lord and King, and believe that all that he delivered is true? Is there any contradiction in holding of this? But this creed-maker, to make sure work, and not to fail of a contradiction in Mr. Bold's words, mis-repeats them, , and quite contrary, both to what they are in the sermon, and what they are, as set down by the creed-maker himself, in the immediately preceding page. Mr. Bold says, "There are other points that Jesus Christ hath taught and revealed, which every sincere christian is indispensably obliged to understand; and which being known to be revealed by Christ, he must indispensably assent to. From which the creed-maker argues thus, , Now, if there be other points, and particular articles, and those many, which a sincere christian is obliged, and that necessarily and indispensably, to understand, believe, and assent to: then this writer hath, in effect, yielded to that proposition I maintained, viz. that the belief of one article is not sufficient to make a man a christian; and consequently he runs counter to the proposition he had laid down."

Is there no difference, I beseech you, between being "indispensably obliged to endeavour to understand, and being indispensably obliged to understand any point?" It is the first of these Mr. Bold says, and it is the latter of these you argue from, and so conclude nothing against him: nor can you to your purpose. For until Mr. Bold says (which he is far from saying,) that every sincere christian is necessarily and indispensably obliged to understand all those texts of scripture, from whence you should have drawn your necessary articles, (when you have perfected your creed,) in the same sense that you do; you can conclude nothing against what he had said, concerning that one article, or any thing that looks like running counter to it. For it may be enough to constitute a man a christian, and one of Christ's subjects, to take Jesus to be the Messiah, his appointed King, and yet, without a contradiction, so that it may be his indispensable duty, as a subject of that kingdom, to endeavour to understand all the dictates of his sovereign, and to assent to the truth of them, as far as he understands them.

But that which the good creed-maker aims at, without which all his necessary articles fall, is, that it should be granted him, that every sincere christian was necessarily and indispensably obliged to understand all those parts of divine revelation, from whence he pretends to draw his articles, in their true meaning, i. e. just as he does. But his infallibility is not yet so established, but that there will need some proof of that proposition. And when he has proved, that every sincere christian is necessarily and

indispensably obliged to understand those texts in their true meaning; and that his interpretation of them is that true meaning; I shall then ask him, Whether “every sincere christian is not as necessarily and indispensably obliged” to understand other texts of scripture in their true meaning, though they have no place in his system?

For example, To make use of the instance abovementioned, is not every sincere christian necessarily and indispensably obliged to endeavour to understand these words of our Saviour, “This is my body, and this is my blood,” that he may know what he receives in the sacrament? Does he cease to be a christian, who happens not to understand them just as the creed-maker does? Or may not the old gentleman at Rome (who has somewhat the ancients title to infallibility) make transubstantiation a fundamental article necessary to be believed there, as well as the creed-maker here make his sense of any disputed text of scripture a fundamental article necessary to be believed?

Let us suppose Mr. Bold had said, that instead of one point, the right knowledge of the creed-maker’s one hundred points (when he has resolved on them) doth constitute and make a person a christian; yet there are many other points Jesus Christ hath taught and revealed, which every sincere christian is indispensably obliged to endeavour to understand, and to make a due use of; for this, I think, the creed-maker will not deny. From whence, in the creed-maker’s words, I will thus argue: “Now if there be other points, and particular articles, and those many, which a sincere christian is obliged, and that necessarily and indispensably, to understand, and believe, and assent to; then this writer doth, in effect, yield to that proposition which I maintained, viz. That the belief of those one hundred articles is not sufficient to make a man a christian:” for this is that which I maintain, that upon this ground the belief of the articles, which he has set down in his list, are not sufficient to make a man a christian; and that upon Mr. Bold’s reason, which the creed-maker insists on against one article, viz. because there are many other points Jesus Christ hath taught and revealed, which every sincere christian is as necessarily and indispensably obliged to endeavour to understand, and make a due use of.

But this creed-maker is cautious, beyond any of his predecessors: He will not be so caught by his own argument; and therefore is very shy to give you the precise articles that every sincere christian is necessarily and indispensably obliged to understand and give his assent to. Something he is

sure there is, that he is indispensably obliged to understand and assent to, to make him a christian; but what that is he cannot yet tell. So that whether he be a christian or no, he does not know; and what other people will think of him, from his treating of the serious things of christianity, in so trifling and scandalous a way, must be left to them.

In the next paragraph, , the creed-maker tells us, Mr. Bold goes on to confute himself, in saying, “A true christian must assent unto this, that Christ Jesus is God.” But this is just such another confutation of himself as the before-mentioned, i. e. as much as a falsehood, substituted by another man, can be a confutation of a man’s self, who has spoken truth all of a piece. For the creed-maker, according to his sure way of baffling his opponents, so as to leave them nothing to answer, hath here, as he did before, changed Mr. Bold’s words, which in the 35th page, quoted by the creed-maker, stand thus: “When a true christian understands, that Christ Jesus hath taught, that he is God, he must assent unto it:” which is true, and conformable to what he had said before, that every sincere christian must endeavour to understand the points taught and revealed by Jesus Christ; which being known to be revealed by him, he must assent unto.

The like piece of honesty the creed-maker shows in the next paragraph, , where he charges Mr. Bold with saying, “That a true christian is as much obliged to believe, that the Holy Spirit is God, as to believe that Jesus is the Christ,” . In which place, Mr. Bold’s words are: “When a true christian understands, that Christ Jesus hath given this account of the Holy Spirit, viz. that he is God; he is as much obliged to believe it, as he is to believe, that Jesus is the Christ:” which is an incontestable truth, but such an one as the creed-maker himself saw would do him no service; and therefore he mangles it, and leaves out half to serve his turn. But he that should give a testimony in the slight affairs of men, and their temporal concerns, before a court of judicature, as the creed-maker does here, and almost every-where, in the great affairs of religion, and the everlasting concern of souls, before all mankind, would lose his ears for it. What, therefore, this worthy gentleman alleges out of Mr. Bold, as a contradiction to himself, being only the creed-maker’s contradiction to truth, and clear matter of fact, needs no other answer.

The rest of what he calls “Reflections on Mr. Bold’s sermon” being nothing but either rude and misbecoming language of him; or pitiful childish application to him, to change his persuasion at the creed-maker’s

entreaty, and give up the truth he hath owned, in courtesy to this doughty combatant; shows the ability of the man. Leave off begging the question, and superciliously presuming, that you are in the right; and, instead of that, show by argument: and I dare answer for Mr. Bold you will have him, and I promise you, with him, one convert more. But arguing is not, it seems, this notable disputant's way. If boasting of himself, and contemning of others, false quotations, and feigned matters of fact, which the reader neither can know, nor is the question concerned in, if he did know, will not do; there is an end of him: he has shown his excellency in scurrilous declamation; and there you have the whole of this unanswerable writer. And for this, I appeal to his own writings in this controversy, if any judicious reader can have the patience to look them over.

In the beginning of his "Reflections on Mr. Bold's sermon," he confidently tells the world, "that he had found that the manager of the Reasonableness of christianity had prevailed on Mr. Bold to preach a sermon upon his Reflections," &c. And adds, "And we cannot but think, that that man must speak the truth, and defend it very impartially and substantially, who is thus brought on to undertake the cause." And at the latter end he addresses himself to Mr. Bold, as one that is drawn off, to be an under journeyman-worker in socinianism. In his gracious allowance, "Mr. Bold is, seemingly, a man of some relish of religion and piety," . He is forced also to own him to be a man of sobriety and temper, . A very good rise, to give him out to the world, in the very next words, as a man of a profligate conscience: for so he must be, who can be drawn off to preach, or write for socinianism, when he thinks it a most dangerous error; who can "dissemble with himself, and choke his inward persuasions," (as the creed-maker insinuates that Mr. Bold does, in the same address to him, ,) and write contrary to his light. Had the creed-maker had reason to think in earnest, that Mr. Bold was going off to socinianism, he might have reasoned with him fairly, as with a man running into a dangerous error; or if he had certainly known, that he was by any by-ends prevailed on to undertake a cause contrary to his conscience, he might have some reason to tell the world, as he does, , "That we cannot think he should speak truth, who is thus brought to undertake the cause." If he does not certainly know, that "Mr. Bold was thus brought to undertake the cause," he could not have shown a more villanous and unchristian mind, than in publishing such a character of a minister of the gospel, and a worthy man, upon no other

grounds, but because it might be subservient to his ends. He is engaged in a controversy, that by argument he cannot maintain; nor knew any other way, from the beginning, to attack the book he pretends to write against, but by crying out socinianism; a name he knows in great disgrace with all other sects of christians, and therefore sufficient to deter all those who approve and condemn books by hearsay, without examining their truth themselves, from perusing a treatise, to which he could affix that imputation. Mr. Bold's name, (who is publicly known to be no socinian) he foresees, will wipe off that false imputation, with a great many of those who are led by names more than things. This seems exceedingly to trouble him, and he labours might and main, to get Mr. Bold to quit a book as socinian, which Mr. Bold knows is not socinian, because he has read and considered it.

But though our creed-maker be mightily concerned, that Mr. B — d should not appear in the defence of it; yet this concern cannot raise him one jot above that honesty, skill, and good breeding, which appears towards others. He manages this matter with Mr. B — d, as he has done the rest of the controversy; just in the same strain of invention, civility, wit, and good sense. He tells him, besides what I have above set down, "That he is drawn off to debase himself, and the post, i. e. the ministry he is in, . That he hath said very ill things, to the lessening and impairing, yea, to the defaming of that knowledge and belief of our Saviour, and of the articles of christianity, which are necessarily required of us, . That the devout and pious," (whereby he means himself: for one, and none, is his own beloved wit and argument,) "observing that Mr. Bold is come to the necessity of but one article of faith, they expect that he may in time hold that none is necessary, . That if he writes again in the same strain, he will write rather like a Turkish spy, than a christian preacher; and that he is a backslider, and sailing to Racovia with a side wind:" than which, what can there be more scurrilous, or more malicious? And yet at the same time that he outrages him thus, beyond not only what christian charity, but common civility, would allow in an ingenuous adversary, he makes some awkward attempts to sooth him with some ill-timed commendations; and would have his undervaluing Mr. Bold's animadversions pass for a compliment to him; because he, for that reason, pretends not to believe so crude and shallow a thing (as he is pleased to call it) to be his. A notable contrivance to gain the greater liberty of railing at him under another name, when Mr. B — d's, it seems, is too well known to serve him so well to that purpose. Besides, it is of good use

to fill up three or four pages of his Reflections; a great convenience to a writer, who knows all the ways of baffling his opponents, but argument; and who always makes a great deal of stir about matters foreign to his subject; which, whether they are granted or denied, make nothing at all to the truth of the question on either side. For what is it to the shallowness or depth of the animadversions, who writ them? Or to the truth or falsehood of Mr. B — d's defence of the "Reasonableness of christianity," whether a layman, or a churchman, a socinian, or one of the church of England, answered the creed-maker as well as he? Yet this is urged as a matter of great weight; but yet, in reality, it amounts to no more but this, that a man of any denomination, who wishes well to the peace of christianity, and has observed the horrible effects the christian religion has felt from the impositions of men, in matters of faith, may have reason to defend a book, wherein the simplicity of the gospel, and the doctrine proposed by our Saviour and his apostles, for the conversion of unbelievers, is made out, though there be not one word of the distinguishing tenets of his sect in it. But that all those, who, under any name, are for imposing their own orthodoxy, as necessary to be believed, and persecuting those who dissent from them, should be all against it, is not perhaps very strange.

One thing more I must observe of the creed-maker on this occasion: in his socinian creed, chap. vi. the author of the "Reasonableness of christianity," &c. and his book, must be judged of, by the characters and writings of those who entertain or commend his notions. "A professed unitarian has defended it;" therefore he is a socinian. The author of A letter to the deists speaks well of it; therefore he is a deist. Another, as an abetter of the Reasonableness of christianity, he mentions, , whose letters I have never seen: and his opinions too are, I suppose, set down there as belonging to me. Whatever is bad in the tenets or writings of these men, infects me. But the mischief is, Mr. Bold's orthodoxy will do me no good: but because he has defended my book against Mr. Edwards, all my faults are become his, and he has a mighty load of accusations laid upon him. Thus contrary causes serve so good a natured, so charitable, and candid a writer as the creed-maker, to the same purpose of censure and railing. But I shall desire him to figure to himself the loveliness of that creature, which turns every thing into venom. What others are, or hold, who have expressed favourable thoughts of my book, I think myself not concerned in. What opinions others have published, make those in my book neither true nor false; and he that,

for the sake of truth, would confute the errors in it, should show their falsehood and weakness, as they are: but they who write for other ends than truth, are always busy with other matters; and where they can do nothing by reason and argument, hope to prevail with some by borrowed prejudices and party.

Taking therefore the Animadversions, as well as the sermon, to be his, whose name they bear, I shall leave to Mr. B — d himself to take what notice he thinks fit of the little sense, as well as great impudence, of putting his name in print to what is not his, or taking it away from what he hath set it to, whether it belongs to his bookseller or answerer. Only I cannot pass by the palpable falsifying of Mr. B — d's words, in the beginning of his epistle to the reader, without mention. Mr. B — d's words are: "whereby I came to be furnished with a truer and more just notion of the main design of that treatise." And the good creed-maker sets them down thus: "The main design of my own treatise or sermon:" a sure way for such a champion for truth to secure to himself the laurel or the whetstone!

This irresistible disputant, (who silences all that come in his way, so that those that would cannot answer him) to make good the mighty encomiums he has given himself, ought (one would think) to clear all as he goes, and leave nothing by the way unanswered, for fear he should fall into the number of those poor baffled wretches, whom he with so much scorn reproaches, that they would answer, if they could.

Mr. B — d begins his Animadversions with this remark, that our creed-maker had said, That "I give it over and over again in these formal words, viz. That nothing is required to be believed by any christian man but this, That Jesus is the Messiah." To which Mr. B — d replies, , in these words: "Though I have read over the Reasonableness of christianity, &c. with some attention, I have not observed those formal words in any part of that book, nor any words that are capable of that construction; provided they be considered with the relation they have to, and the manifest dependence they have on, what goes before, or what follows after them."

But to this Mr. Edwards answers not.

Whether it was because he would not, or because he could not, let the reader judge. But this is down upon his score already, and it is expected he should answer to it, or else confess that he cannot. And that there may be a fair decision of this dispute, I expect the same usage from him, that he

should set down any proposition of his I have not answered to, and call on me for an answer, if I can; and if I cannot, I promise him to own it in print.

The creed-maker had said, “That it is most evident to any thinking and considerate person, that I purposely omit the epistolary writings of the apostles because they are fraught with other fundamental doctrines, besides that which I mention.”

To this Mr. B — d answers, , That if by “fundamental articles, Mr. Edwards means here, all the propositions delivered in the epistles, concerning just those particular heads, he [Mr. Edwards] had here mentioned; it lies upon him to prove, that Jesus Christ hath made it necessary, that every person must have an explicit knowledge and belief of all those before he can be a christian.”

But to this Mr. Edwards answers not.

And yet, without an answer to it, all his talk about fundamentals, and those which he pretended to set down in that place, under the name of fundamentals, will signify nothing in the present case; wherein, by fundamentals, were meant such propositions which every person must necessarily have an explicit knowledge and belief of, before he can be a christian.

Mr. B — d, in the same place, , 7, very truly and pertinently adds, “That it did not pertain to [my] undertaking to inquire what doctrines, either in the Epistles, or the Evangelists and the Acts, were of greatest moment to be understood by them who are christians; but what was necessary to be known and believed to a person’s being a christian. For there are many important doctrines, both in the Gospels, and in the Acts, besides this, ‘That Jesus is the Messiah.’ But how many soever the doctrines be, which are taught in the epistles, if there be no doctrine besides this, ‘That Jesus is the Messiah,’ taught there as necessary to be believed to make a man a christian; all the doctrines taught there will not make any thing against what this author has asserted, nor against the method he hath observed; especially, considering we have an account, in the Acts of the apostles, of what those persons, by whom the epistles were writ, did teach, as necessary to be believed to people’s being christians.”

This, and what Mr. B — d subjoins, “That it was not my design to give an abstract of any of the inspired books,” is so true, and has so clear reason in it, that any, but this writer, would have thought himself concerned to have answered something to it.

But to this Mr. Edwards answers not.

It not being, it seems, a creed-maker's business to convince men's understanding by reason; but to impose on their belief by authority; or, where that is wanting, by falsehood and bawling. And to such Mr. Bold observes well, , "That if I had given the like account of the epistles, that would have been as little satisfactory as what I have done already, to those who are resolved not to distinguish 'betwixt what is necessary to be believed to make a man a christian, and those articles which are to be believed by those who are christians,' as they can attain to know that Christ hath taught them."

This distinction the creed-maker, no-where that I remember, takes any notice of: unless it be , where he has something relating hereunto, which we shall consider, when we come to that place. I shall now go on to show what Mr. Bold has said, to which he answers not.

Mr. Bold farther tells him, , that if he will prove any thing in opposition to the Reasonableness of christianity, &c. it must be this: "That Jesus Christ and his apostles have taught, that the belief of some one article, or certain number of articles distinct from this, 'That Jesus is the Messiah,' either as exclusive of, or in conjunction with, the belief of this article, doth constitute and make a person a christian: but that the belief of this, that Jesus is the Messiah alone, doth not make a man a christian."

But to this Mr. Edwards irrefragably answers nothing.

Mr. Bold also, , charges him with his falsely accusing me in these words: "He pretends to contend for one single article, with the exclusion of all the rest, for this reason; because all men ought to understand their religion." And again, where he says, I am at this, viz. "That we must not have any point of doctrine in our religion, that the mob doth not, at the very first naming of it, perfectly understand and agree to:" Mr. Bold has quoted my express words to the contrary.

But to this this unanswerable gentleman answers nothing.

But if he be such a mighty disputant, that nothing can stand in his way; I shall expect his direct answer to it among those other propositions which I have set down to his score, and I require him to prove, if he can.

The creed-maker spends above four pages of his Reflections, in a great stir who is the author of those animadversions he is reflecting on. To which I tell him, it matters not to a lover of truth, or a confuter of errors, who was the author; but what they contain. He who makes such a deal to do about

that which is nothing to the question, shows he has but little mind to the argument; that his hopes are more in the recommendation of names, and prejudice of parties, than in the strength of his reasons, and the goodness of his cause. A lover of truth follows that, whoever be for or against it; and can suffer himself to pass by no argument of his adversary, without taking notice of it, either in allowing its force, or giving it a fair answer. Were the creedmaker capable of giving such an evidence as this of his love of truth, he would not have passed over the twenty first pages of Mr. Bold's Animadversions in silence. The falsehoods that are therein charged upon him, would have required an answer of him, if he could have given any; and I tell him, he must give an answer, or confess the falsehoods.

In his 255th page, he comes to take notice of these words of Mr. Bold, in the 21st page of his Animadversions, viz. "That a convert to christianity, or a christian, must necessarily believe as many articles as he shall attain to know, that Christ Jesus hath taught." Which, says the creed-maker, wholly invalidates what he had said before, in these words," viz. "That Jesus Christ and his apostles did not teach any thing as necessary to be believed to make a man a christian, but only this one proposition, That Jesus of Nazareth was the Messiah." The reason he gives to show that the former of these propositions (in Mr. Bold) invalidates the latter, and that the animadverter contradicts himself, stands thus: "For, says he, if a christian must give assent to all the articles taught by our Saviour in the gospel, and that necessarily; then all those propositions reckoned up in my late discourse, being taught by Christ, or his apostles, are necessary to be believed." Ans. And what, I beseech you, becomes of the rest of the propositions taught by Christ, or his apostles, which you have not reckoned up in your late discourse? Are not they necessary to be believed, "if a christian must give an assent to all the articles taught by our Saviour and his apostles?"

Sir, if you will argue right from that antecedent, it must stand thus: "If a christian must give an assent to all the articles taught by our Saviour and his apostles, and that necessarily;" then all the propositions in the New Testament, taught by Christ, or his apostles, are necessary to be believed. This consequence I grant to be true, and necessarily to follow from that antecedent, and pray make your best of it: but withal remember, that it puts an utter end to your select number of fundamentals, and makes all the truths delivered in the New Testament necessary to be explicitly believed by every christian.

But, sir, I must take notice to you, that if it be uncertain, whether he that writ the Animadversions, be the same person that preached the sermon, yet it is very visible, that it is the very same person that reflects on both; because he here again uses the same trick, in answering in the Animadversions the same thing that had been said in the sermon, viz. by pretending to argue from words as Mr. Bold's, when Mr. Bold has said no such thing. The proposition you argue from here is this: "If a christian must give his assent to all the articles taught by our Saviour, and that necessarily." But Mr. Bold says no such thing. His words, as set down by yourself, are: "A christian must necessarily believe as many articles as he shall attain to know that Christ Jesus hath taught." And is there no difference between "all that Christ Jesus hath taught," and "as many as any one shall attain to know that Christ Jesus hath taught?" There is so great a difference between these two, that one can scarce think even such a creed-maker could mistake it. For one of them admits all those to be christians, who, taking Jesus for the Messiah, their Lord and King, sincerely apply themselves to understand and obey his doctrine and law, and to believe all that they understand to be taught by him: the other shuts out, if not all mankind, yet nine hundred ninety-nine of a thousand, of those who profess themselves christians, from being really so. For he speaks within compass, who says there is not one of a thousand, if there be any one man at all, who explicitly knows and believes all that our Saviour and his apostles taught, i. e. all that is delivered in the New Testament, in the true sense that it is there intended. For if giving assent to it, in any sense, will serve the turn, our creed-maker can have no exception against socinians, papists, lutherans, or any other, who, acknowledging the scripture to be the word of God, do yet oppose his system.

But the creed-maker goes on, , and endeavours to prove that what is necessary to be believed by every christian, is necessary to be believed to make a man a christian, in these words: "But he will say, the belief of those propositions makes not a man a christian. Then, I say, they are not necessary and indispensable; for what is absolutely necessary in christianity, is absolutely requisite to make a man a christian."

Ignorance, or something worse, makes our creed-maker always speak doubtfully or obscurely, whenever he pretends to argue; for here "absolutely necessary in christianity," either signifies nothing, but absolutely necessary to make a man a christian; and then it is proving the same proposition, by

the same proposition: or else has a very obscure and doubtful signification. For, if I ask him, Whether it be absolutely necessary in christianity, to obey every one of our Saviour's commands, What will he answer me? If he answers, No; I ask him, Which of our Saviour's commands is it not, in christianity, absolutely necessary to obey? If he answers, Yes; then I tell him, by this rule, there are no christians: because there is no one that does in all things obey all our Saviour's commands, and therein fails to perform what is absolutely necessary in christianity; and so, by his rule, is no christian. If he answers, Sincere endeavour to obey, is all that is absolutely necessary; I reply, And so sincere endeavour to understand, is all that is absolutely necessary: neither perfect obedience, nor perfect understanding, is absolutely necessary in christianity.

But his proposition, being put in terms clear, and not loose and fallacious, should stand thus, viz. "What is absolutely necessary to every christian, is absolutely requisite to make a man a christian." But then I deny, that he can infer from Mr. Bold's words, that those propositions (i. e. which he has set down as fundamental, or necessary to be believed) are absolutely necessary to be believed by every christian. For that indispensable necessity Mr. Bold speaks of, is not absolute, but conditional. His words are, "A christian must believe as many articles, as he shall attain to know that Jesus Christ hath taught." So that he places the indispensable necessity of believing, upon the condition of attaining to know that Christ taught so. An endeavour to know what Jesus Christ taught, Mr. B — d says truly, is absolutely necessary to every one who is a christian: and to believe what he has attained to know that Jesus Christ taught, that also, he says, is absolutely necessary to every christian. But all this granted, (as true it is,) it still remains (and eternally will remain) to be proved from this, (which is all that Mr. Bold says,) that something else is absolutely required to make a man a christian, besides the unfeigned taking Jesus to be the Messiah, his King and Lord; and accordingly, a sincere resolution to obey and believe all that he commanded and taught.

The gaoler, Acts xvi. 30, in answer to his question, "What he should do to be saved?" was answered, "That he should believe in the Lord Jesus Christ." And the text says, that the gaoler "took them the same hour of the night and washed their stripes, and was baptized, he and all his, straightway." Now, I will ask our creed-maker, whether St. Paul, in speaking to him the word of the Lord, proposed and explained to him all

those propositions, and fundamental heads of doctrine, which our creed-maker has set down as necessary to be believed to make a man a christian? Let it be considered the gaoler was a heathen, and one that seems to have no more sense of religion or humanity, than those of that calling use to have: for he had let them alone under the pain of their stripes, without any remedy, or so much as the ease of washing them, from the day before, until after his conversion; which was not until after midnight. And can any one think, that between his asking what he should do to be saved, and his being baptized, which, the text says, was the same hour, and straightway; there was time enough for St. Paul and Silas, to explain to him all the creed-maker's articles, and make such a man as that, and all his house, understand the creed-maker's whole system; especially, since we hear nothing of it in the conversion of these, or any others, who were brought into the faith, in the whole history of the preaching of our Saviour and the apostles? Now let me ask the creed-maker, whether the gaoler was not a christian, when he was baptized; and whether, if he had then immediately died, he had not been saved, without the belief of any one article more, than what Paul and Silas had then taught him? Whence it follows, that what was then proposed to him to be believed, (which appears to be nothing, but that Jesus was the Messiah,) was all that was absolutely necessary to be believed to make him a christian: though this hinders not, but that afterwards it might be necessary for him, indispensably necessary, to believe other articles, when he attained to the knowledge that Christ had taught them. And the reason of it is plain: because the knowing that Christ hath taught any thing, and the not receiving it for true (which is believing it,) is inconsistent with the believing him to be the Messiah, sent from God to enlighten and save the world. Every word of divine revelation is absolutely and indispensably necessary to be believed by every christian, as soon as he comes to know it to be taught by our Saviour, or his apostles, or to be of divine revelation. But yet this is far enough from making it absolutely necessary to every christian, to know every text in the scripture, much less to understand every text in the scripture; and least of all, to understand it as the creed-maker is pleased to put his sense upon it.

This the good creed-maker either will not, or cannot understand; but gives us a list of articles culled out of the scripture by his own authority, and tells us, those are absolutely necessary to be believed by every one, to make him a christian. For what is of absolute necessity in christianity, as those, he

says, are, he tells us, is absolutely requisite to make a man a christian. But when he is asked, Whether these are all the articles of absolute necessity to be believed to make a man a christian? this worthy divine, that takes upon himself to be a successor of the apostles, cannot tell. And yet, having taken upon himself also to be a creed-maker, he must suffer himself to be called upon for it again and again, until he tells us what is of absolute necessity to be believed to make a man a christian, or confess that he cannot.

In the mean time, I take the liberty to say, that every proposition delivered in the New Testament by our Saviour, or his apostles, and so received by any christian as of divine revelation, is of as absolute necessity to be assented to by him, in the sense he understands it to be taught by them, as any one of those propositions enumerated by the creed-maker: and if he thinks otherwise I shall desire him to prove it. The reason whereof is this, that in divine revelation, the ground of faith being the only authority of the proposer: where that is the same, there is no difference in the obligation or measure of believing. Whatever the Messiah, that came from God, taught, is equally to be believed by every one who receives him as the Messiah, as soon as he understands what it was he taught. There is no such thing as garbling his doctrine, and making one part of it more necessary to be believed than another, when it is understood. His saying is, and must be, of unquestionable authority to all that receive him as their heavenly King; and carries with it an equal obligation of assent to all that he says as true. But since nobody can explicitly assent to any proposition of our Saviour's as true, but in the sense he understands our Saviour to have spoken it in; the same authority of the Messiah, his King, obliges every one absolutely and indispensably to believe every part of the New Testament in that sense he understands it: for else he rejects the authority of the deliverer, if he refuses his assent to it in that sense which he is persuaded it was delivered in. But the taking him for the Messiah, his King and Lord, laying upon every one who is his subject, an obligation to endeavour to know his will in all things; every true christian is under an absolute and indispensable necessity, by being his subject, to study the scriptures with an unprejudiced mind, according to that measure of time, opportunity, and helps, which he has; that in these sacred writings, he may find what his Lord and Master hath by himself, or by the mouths of his apostles, required of him, either to be believed or done.

The creed-maker, in the following page, 256, hath these words: "It is worth the reader's observing, that notwithstanding I had in twelve pages together (viz. from the eighth to the twentieth) proved, that several propositions are necessary to be believed by us, in order to our being christians; yet this sham-animadverter attends not to any one of the particulars which I had mentioned, nor offers any thing against them; but only, in a lumping way, dooms them all in those magisterial words: "I do not see any proof he produces," . This is his wonderful way of confuting me, by pretending that he cannot see any proof in what I allege: and all the world must be led by his eyes."

Answ. "It is worth the reader's observing," that the creed-maker does not reply to what Mr. Bold has said to him, as we have already seen, and shall see more as we go on; and therefore he has little reason to complain of him, for not having answered enough. Mr. Bold did well to leave that which was an insignificant lump, so as it was, together; for it is no wonderful thing not to see any proof, where there is no proof. There is indeed, in those pages the creed-maker mentions, much confidence, much assertion, a great many questions asked, and a great deal said after his fashion: but for a proof, I deny there is any one. And if what I have said in another place already, does not convince him of it, I challenge him, with all his eyes, and those of the world to boot, to find out, in those twelve renowned pages, one proof. Let him set down the proposition, and his proof of its being absolutely and indispensably necessary to be believed to make a man a christian; and I too will join with him in his testimonial of himself, that he is irrefragable. But I must tell him before-hand, talking a great deal loosely will not do it.

Mr. Bold and I say we cannot see any proof in those twelve pages: the way to make us see, or to convince the world that we are blind, is to single out one proof out of that wood of words there, which you seem to take for arguments, and set it down in a syllogism, which is the fair trial of a proof or no proof. You have, indeed, a syllogism in the 23d page; but that is not in those twelve pages you mention. Besides, I have showed in another place, what that proves; to which I refer you.

In answer to the creed-maker's question, about his other fundamentals found in the epistles: "Why did the apostles write these doctrines? Was it not, that those they writ to, might give their assent to them?" Mr. Bold. , replies: "But then it may be asked again, Were not those persons christians to whom the apostles writ these doctrines, and whom they required to assent

to them? Yes, verily. And if so, What was it that made them christians before their assent to these doctrines was required? If it were any thing besides their believing Jesus to be the Messiah, it ought to be instanced in, and made out.”

But to this Mr. Edwards answers not.

The next thing in controversy between Mr. Bold and the creed-maker, (for I follow Mr. B — d’s order,) is about a matter of fact, viz. Whether the creed-maker has proved, “that Jesus Christ and his apostles have taught, that no man can be a christian, or shall be saved, unless he has an explicit knowledge of all those things, which have an immediate respect to the occasion, author, way, means, and issue of our salvation, and which are necessary for the knowing the true nature and design of it?” This, Mr. Bold, tells him, “he has not done.” To this the creedmaker replies, .

“And yet the reader may satisfy himself, that this is the very thing that I had been proving just before, and, indeed, all along in the foregoing chapter.” Answ. There have been those who have been seven years proving a thing, which at last they could not do; and I give you seven years to prove this proposition, which you should there have proved; and I must add to your score here, viz.

LII. THAT JESUS CHRIST, OR HIS APOSTLES, HAVE TAUGHT, THAT
NO MAN CAN BE A CHRISTIAN, OR CAN BE SAVED, UNLESS HE
HATH AN EXPLICIT KNOWLEDGE OF ALL THESE THINGS WHICH
HAVE AN IMMEDIATE RESPECT TO THE OCCASION, AUTHOR,
WAY, MEANS, AND ISSUE OF OUR SALVATION, AND WHICH ARE
NECESSARY FOR OUR KNOWING THE TRUE NATURE AND
DESIGN OF IT.

Nor must the poor excuse, of saying, it was not necessary “to add any farther medium, and proceed to another syllogism, because you had secured that proposition before;” go for payment. If you had secured it, as you say, it had been quite as easy, and much for your credit, to have produced the proof whereby you had secured it, than to say you had done it; and thereupon to reproach Mr. Bold with heedlessness; and to tell the world, that “he cares not what he saith.” The rule of fair dispute is, indispensably to prove, where any thing is denied. To evade this is shuffling: and he that,

instead of it, answers with ill language, in my country, is called a foulmouthed wrangler.

To the creed-maker's exception to my demand, about the actual belief of all his fundamentals in his new creed, Mr. Bold asks, , "Whether a man can believe particular propositions, and not actually believe them?"

But to this Mr. Edwards answers not.

Mr. Bold, , farther acknowledges the creed-maker's fundamental propositions to "be in the bible; and that they are for this purpose there, that they might be believed:" and so, he saith, "is every other proposition which is taught in our bibles." But asks, How will it thence follow, that no man can be a christian, until he particularly know, and actually assent to every proposition in our bibles?"

But to this Mr. Edwards answers not.

From to 30, Mr. Bold shows, that the creed-maker's reply concerning my not gathering of fundamentals out of the epistles is nothing to the purpose: and this he demonstratively proves.

And to this Mr. Edwards answers not.

The creed-maker had falsely said, That "I bring no tidings of an evangelical faith;" and thence very readily and charitably infers: "Which gives us to understand, that he verily believes there is no such christian faith." To this Mr. Bold thus softly replies, , "I think Mr. Edwards is much mistaken, both in his assertion and inference:" and to show that he could not so infer, adds: "If the author of the Reasonableness of christianity, &c. had not brought any tidings of such a faith, I think it could not be thence justly inferred, that he verily believes there is no such christian faith: because his inquiry and search was not concerning christian faith, considered subjectively but objectively; what the articles be, which must be believed to make a man a christian; and not, with what sort of faith these articles are to be believed."

To this the creed-maker answers indeed: but it is something as much worse than nothing, as falsehood is worse than silence. His words are, , "It may be questioned, from what he [the animadverter] hath the confidence to say, , viz. There is no inquiry in the Reasonableness of christianity, concerning faith subjectively considered, but only objectively," &c. And thus having set down Mr. B — d's words, otherwise than they are; for Mr. Bold does not say, there is no inquiry, i. e. no mention, (for so the creed-maker explains inquiries here. For to convince Mr. Bold that there is an

inquiry, i. e. mention, of subjective faith, he alleges, that subjective faith is spoken of in the 296th and 297th pages of my book.) But Mr. Bold says not, that faith, considered subjectively, is not spoken of any-where in the Reasonableness of christianity, &c. but “that the author’s inquiry and search (i. e. the author’s search, or design of his search) was not concerning christian faith considered subjectively.” And thus the creed-maker, imposing on his reader, by perverting Mr. Bold’s sense, from what was the intention of my inquiry and search, to what I had said in it, he goes on, after his scurrilous fashion, to insult, in these words which follow: “I say it may be guessed from this, what a liberty this writer takes, to assert what he pleases.” Answ. “To assert what one pleases,” without truth and without certainty, is the worst character can be given a writer; and with falsehood to charge it another, is no mean slander and injury to a man’s neighbour. And yet to these shameful arts must he be driven, who finding his strength of managing a cause to lie only in fiction and falsehood, has no other but the dull Billingsgate way of covering it, by endeavouring to divert the reader’s observation and censure from himself, by a confident repeated imputation of that to his adversary, which he himself is so frequent in the commission of. And of this the instances I have given, are a sufficient proof; in which I have been at the pains to set down the words on both sides, and the pages where they are to be found, for the reader’s full satisfaction.

The cause in debate between us is of great weight, and concerns every christian. That any evidence in the proposal, or defence of it, can be sufficient to conquer all men’s prejudices, is vanity to imagine. But this, I think, I may justly demand of every reader, that since there are great and visible falsehoods on one side or the other, (for the accusations of this kind are positive and frequent,) he would examine on which side they are: and upon that I will venture the cause in my reader’s judgment, who will but be at the pains of turning to the pages marked out to him; and as for him that will not do that, I care not much what he says.

The creed-maker’s following words, , have the natural mark of their author. They are these: “How can this animadverter come off with peremptorily declaring, that subjective faith is not inquired into, in the treatise of the Reasonableness of christianity, &c. when in another place, , and 36, he avers, That christian faith and christianity, considered subjectively, are the same?” Answ. In which words there are two manifest untruths: the one is, “That Mr. Bold peremptorily declares, that subjective

faith is not inquired into, i. e. spoken of, in the Reasonableness of christianity,” &c. Whereas Mr. Bold says in that place, , “If he, [i. e. the author,] had not said one word concerning faith subjectively considered.” The creed-maker’s other untruth is his saying, “That the animadverter avers, , 36, that christian faith and christianity, considered subjectively, are the same.” Whereas it is evident, that Mr. Bold, arguing against these words of the creed-maker (“The belief of Jesus being the Messiah, was one of the first and leading acts of christian faith,”) speaks in that place of an act of faith, as these words of his demonstrate: “Now, I apprehend that christian faith and christianity, considered subjectively, (and an act of christian faith, I think, cannot be understood in any other sense,) are the very same.” I must therefore desire him to set down the words wherein the animadverter peremptorily declares,

LIII. THAT SUBJECTIVE FAITH IS NOT INQUIRED INTO, OR
SPOKEN OF, IN THE TREATISE OF THE REASONABLENESS OF
CHRISTIANITY, &C.

And next, to produce the words wherein the animadverter avers,

LIV. THAT CHRISTIAN FAITH AND CHRISTIANITY, CONSIDERED
SUBJECTIVELY, ARE THE SAME.

To the creed-maker’s saying, “That the author of the Reasonableness of christianity, &c. brings us no tidings of evangelical faith belonging to christianity,” Mr. Bold replies: That I have done it in all those pages where I speak of taking and accepting Jesus to be our King and Ruler; and particularly he sets down my words out of pages 119, &c.

But to this Mr. Edwards answers not.

The creed-maker says, , of his Socinianism unmasked, that the author of the Reasonableness of christianity “tells men again and again, that a christian man, or member of Christ, needs not know or believe any more than that one individual point.” To which Mr. Bold thus replies, , “If any man will show me those words in any part of the Reasonableness, &c. I shall suspect I was not awake all the time I was reading that book: and I am as certain as one awake can be, that there are several passages in that book directly contrary to these words. And there are some expressions in the Vindication of the Reasonableness, &c. one would think, if Mr. Edwards had observed them, they would have prevented that mistake.”

But to this Mr. Edwards answers not.

Mr. Bold, , takes notice, that the creed-maker had not put the query, or objection, right, which, he says, “Some, and not without some show of ground, may be apt to start; and therefore Mr. Bold puts the query right, viz. ‘Why did Jesus Christ and his apostles require assent to, and belief of, this one article alone, viz. That Jesus is the Messiah, to constitute and make a man a christian, or true member of Christ, (as it is abundantly evident they did, from the Reasonableness of christianity,) if the belief of more articles is absolutely necessary to make and constitute a man a christian?’”

But to this Mr. Edwards answers not.

And therefore I put the objection, or query, to him again in Mr. Bold’s words, and expect an answer to it, viz.

LV. WHY DID JESUS CHRIST, AND HIS APOSTLES, REQUIRE
ASSENT TO, AND BELIEF OF, THIS ONE ARTICLE ALONE, VIZ.
THAT JESUS IS THE MESSIAH, TO MAKE A MAN A CHRISTIAN,
(AS IT IS ABUNDANTLY EVIDENT THEY DID, FROM ALL THEIR
PREACHING, RECORDED THROUGHOUT ALL THE WHOLE
HISTORY OF THE EVANGELISTS AND THE ACTS,) IF THE BELIEF
OF MORE ARTICLES BE ABSOLUTELY NECESSARY TO MAKE A
MAN A CHRISTIAN?

The creed-maker having made believing Jesus to be the Messiah, only one of the first and leading acts of christian faith; Mr. Bold, , rightly tells him, That “christian faith must be the belief of something or other: and if it be the belief of any thing besides this, that Jesus is the Christ, or Messiah, that other thing should be specified; and it should be made appear, that the belief

that Jesus is the Messiah, without the belief of that other proposition, is not christian faith.”

But to this Mr. Edwards answers not.

Mr. B — d, in the four following pages, 36 — 39, has excellently explained the difference between that faith which constitutes a man a christian, and that faith whereby one that is a christian, believes the doctrines taught by our Saviour; and the ground of that difference: and therein has fully overturned this proposition, “That believing Jesus to be the Messiah, is but a step, or the first step to christianity.”

But to this Mr. Edwards answers not.

To the creed-maker’s supposing that other matters of faith were proposed with this, that Jesus is the Messiah; Mr. Bold replies, That this should be proved, viz. that other articles were proposed, as requisite to be believed to make men christians. And, , he gives a reason why he is of another mind, viz. “Because there is nothing but this recorded, which was insisted on for that purpose.”

But to this Mr. Edwards answers not.

Mr. Bold, , shows that Rom. x. 9, which the creed-maker brought against it, confirms the assertion of the author of the Reasonableness, &c. concerning the faith that makes a man a christian.

But to this Mr. Edwards answers not.

The creed-maker says, , “This is the main answer to the objection, (or query above proposed,) viz. That Christianity was erected by degrees.” This Mr. Bold, , proves to be nothing to the purpose, by this reason, viz. “Because what makes one man a christian, or ever did make any man a christian, will at any time, to the end of the world, make another man a christian:” and asks, “Will not that make a christian now, which made the apostles themselves christians?”

But to this Mr. Edwards answers not.

In answer to his sixth chapter, Mr. Bold, , tells him, “It was not my business to discourse of the Trinity, or any other particular doctrines, proposed to be believed by them who are christians; and that it is no fair and just ground to accuse a man, with rejecting the doctrines of the Trinity, and that Jesus is God, because he does not interpret some particular texts to the same purpose others do.”

But to this Mr. Edwards answers not.

Indeed he takes notice of these words of Mr. Bold, in this paragraph, viz. "Hence Mr. Edwards takes occasion to write many pages about these terms [viz. Messiah and Son of God]; but I do not perceive that he pretends to offer any proof, that these were not synonymous terms amongst the jews at that time, which is the point he should have proved, if he designed to invalidate what this author says about that matter." To this the creed maker replies, , "The animadverter doth not so much as offer one syllable to disprove what I delivered, and closely urged on that head." Answ. What need any answer to disprove where there is no proof brought that reaches the proposition in question? If there had been any such proof, the producing of it, in short, had been a more convincing argument to the reader, than so much bragging of what has been done. For here are more words spent, (for I have not set them all down,) than would have served to have expressed the proof of this proposition, viz. that the terms above mentioned were not synonymous among the jews, if there had been any proof of it. But having already examined what the creed-maker brags he has closely urged, I shall say no more of it here.

To the creed-maker's making me a socinian, in his eighth chapter, for not naming Christ's satisfaction among the advantages and benefits of Christ's coming into the world; Mr. Bold replies, "1. That it is no proof, because I promised not to name every one of them. And the mention of some is no denial of others." 2. He replies, That, "satisfaction is not so strictly to be termed an advantage, as the effects and fruits of it are; and that the doctrine of satisfaction instructs us the way how Christ did, by divine appointment, obtain those advantages for us." And this was an answer that deserved some reply from the creed-maker.

But to this he answers not.

Mr. Bold says right, that this is a doctrine that is of mighty importance for a christian to be well acquainted with. And I will add to it, that it is very hard for a christian, who reads the scripture with attention, and an unprejudiced mind, to deny the satisfaction of Christ: but it being a term not used by the Holy Ghost in the scripture, and very variously explained by those that do use it, and very much stumbled at by those I was there speaking to, who were such, as I there say, "Who will not take a blessing, unless they be instructed what need they had of it, and why it was bestowed upon them;" I left it with the other disputed doctrines of christianity, to be looked into (to see what it was Christ had taught concerning it) by those

who were christians, and believed Jesus to be the Saviour promised, and sent from God. And to those who yet doubted that he was so, and made this objection, "What need was there of a Saviour?" I thought it most reasonable to offer such particulars only as were agreed on by all christians, and were capable of no dispute, but must be acknowledged by every body to be needful. This, though the words above quoted out of the Reasonableness of christianity, &c. , show to be my design; yet the creed-maker plainly gives me the lye, and tells me it was not my design. "All the world are faithless, false, treacherous, hypocritical strainers upon their reason and conscience, dissemblers, journeymen, mercenary hirelings, except Mr. Edwards:" I mean all the world that opposes him. And must not one think he is mightily beholden to the excellency and readiness of his own nature, who is no sooner engaged in controversy, but he immediately finds out in his adversaries these arts of equivocation, lying, and effrontery, in managing of it? Reason and learning, and acquired improvements, might else have let him gone on with others, in the dull and ordinary way of fair arguing; wherein, possibly, he might have done no great feats. Must not a rich and fertile soil within, and a prompt genius, wherein a man may readily spy the propensities of base and corrupt nature, be acknowledged to be an excellent qualification for a disputant, to help him to the quick discovery and laying open of the faults of his opponents; which a mind otherwise disposed would not so much as suspect? But Mr. Bold, without this, could not have been so soon found out to be a journeyman, a dissembler, an hired mercenary, and stored with all those good qualities, wherein he hath his full share with me. But why would he then venture upon Mr. Edwards, who is so very quick-sighted in these matters, and knows so well what villainous man is capable of?

I should not here, in this my Vindication, have given the reader so much of Mr. Bold's reasoning, which, though clear and strong, yet has more beauty and force, as it stands in the whole piece in his book; nor should I have so often repeated this remark upon each passage, viz. "To this Mr. Edwards answers not;" had it not been the shortest and properest comment could be made on that triumphant paragraph of his, which begins in the 128th page of his Socinian creed; wherein, among a great deal of no small strutting, are these words: "By their profound silence they acknowledge they have nothing to reply." He that desires to see more of the same noble strain, may have recourse to that eminent place. Besides, it was fit the

reader should have this one taste more of the creed-maker's genius, who passing by in silence all these clear and apposite replies of Mr. Bold, loudly complains of him, , "That where he [Mr. Bold] finds something that he dares not object against, he shifts it off." And again, , "That he does not make any offer at reason; there is not the least shadow of an argument — As if he were only hired to say something against me, [the creed-maker,] though not at all to the purpose: and truly, any man may discern a mercenary stroke all along;" with a great deal more to the same purpose. For such language as this, mixed with scurrility, neither fit to be spoken by, nor of, a minister of the gospel, make up the remainder of his postscript. But to prevent this for the future; I demand of him, that if in either of his treatises, there be any thing against what I have said, in my Reasonableness of christianity, which he thinks not fully answered, he will set down the proposition in direct words, and note the page of his book where it is to be found: and I promise him to answer it. For as for his railing, and other stuff besides the matter, I shall hereafter no more trouble myself to take notice of it. And so much for Mr. Edwards.

THERE is another gentleman, and of another sort of make, parts, and breeding, who, (as it seems, ashamed of Mr. Edwards's way of handling controversies in religion) has had something to say of my "Reasonableness of christianity," &c. and so has made it necessary for me to say a word to him, before I let those papers go out of my hand. It is the author of "The Occasional Paper," numb. 1. The second, third, and fourth pages of that paper, gave me great hopes to meet with a man, who would examine all the mistakes which came abroad in print, with that temper and indifferency, that might set an exact pattern for controversy, to those who would approve themselves to be sincere contenders for truth and knowledge, and nothing else, in the disputes they engaged in. Making him allowance for the mistakes that self-indulgence is apt to impose upon human frailty, I am apt to believe he thought his performance had been such: but I crave leave to observe, that good and candid men are often misled, from a fair unbiassed pursuit of truth, by an over-great zeal for something, that they, upon wrong grounds, take to be so; and that it is not so easy to be a fair and unprejudiced champion for truth, as some, who profess it, think it to be. To acquaint him with the occasion of this remark, I must desire him to read and consider his nineteenth page; and then to tell me,

Whether he knows, that the doctrine proposed in the “Reasonableness of christianity, &c.” was borrowed, as he says, from Hobbes’s Leviathan? For I tell him, I borrowed it only from the writers of the four Gospels and the Acts; and did not know those words, he quoted out of the Leviathan, were there, or any thing like them. Nor do I know yet, any farther than as I believe them to be there, from his quotation.

Whether affirming, as he does positively, this, which he could not know to be true, and is in itself perfectly false, were meant to increase or lessen the credit of the author of the “Reasonableness of christianity,” &c. in the opinion of the world? Or is consonant with his own rule, , “of putting candid constructions on what adversaries say?” Or with what follows, in these words? “The more divine the cause is, still the greater should be the caution. The very discoursing about Almighty God, or our holy religion, should compose our passions, and inspire us with candour and love. It is very indecent to handle such subjects, in a manner that betrays rancour and spite. These are fiends that ought to vanish, and should never mix, either with a search after truth, or the defence of religion.”

Whether the propositions which he has, out of my book, inserted into his nineteenth page, and says, “are consonant to the words of the Leviathan,” were those of all my books, which were likeliest to give the reader a true and fair notion of the doctrine contained in it? If they were not, I must desire him to remember and beware of his fiends. Not but that he will find those propositions there to be true. But that neither he nor others may mistake my book, this is that, in short which it says:

That there is a faith that makes men christians.

That this faith is the believing “Jesus of Nazareth to be the Messiah.”

That the believing Jesus to be the Messiah, includes in it a receiving him for our Lord and King, promised and sent from God: and so lays upon all his subjects an absolute and indispensable necessity of assenting to all that they can attain the knowledge that he taught; and of a sincere obedience to all that he commanded.

This, whether it be the doctrine of the Leviathan, I know not. This appears to me out of the New Testament, from whence (as I told him in the preface) I took it, to be the doctrine of our Saviour and his apostles; and I would not willingly be mistaken in it. If therefore there be any other faith besides this, absolutely requisite to make a man a christian, I shall here again desire this gentleman to inform me what it is, i. e. to set down all

those propositions which are so indispensably to be believed, (for it is of simple believing I perceive the controversy runs,) that no man can be a believer, i. e. a christian, without an actual knowledge of, and an explicit assent to them. If he shall do this with that candour and fairness he declares to be necessary in such matters, I shall own myself obliged to him: for I am in earnest, and I would not be mistaken in it.

If he shall decline it, I, and the world too, must conclude, that upon a review of my doctrine, he is convinced of the truth of it, and is satisfied, that I am in the right. For it is impossible to think, that a man of that fairness and candour, which he solemnly prefaces his discourse with, should continue to condemn the account I have given of the faith which I am persuaded makes a christian; and yet he himself will not tell me (when I earnestly demand it of him, as desirous to be rid of my error, if it be one) what is that more, which is absolutely required to be believed by every one, before he can be a believer, i. e. what is indispensably necessary to be known, and explicitly believed to make a man a christian.

Another thing which I must desire this author to examine, by those his own rules, is, what he says of me, , where he makes me to have a prejudice against the ministry of the gospel, and their office, from what I have said in my Reasonableness, &c. , 136, concerning the priests of the world, in our Saviour's time: which he calls bitter reflections.

If he will tell me what is so bitter, in any one of those passages which he has set down, that is not true, or ought not to be said there, and give me the reason why he is offended at it; I promise him to make what reparation he shall think fit, to the memory of those priests whom he, with so much good nature, patronizes, near seventeen hundred years after they had been out of the world; and is so tenderly concerned for their reputation, that he excepts against that, as said against them, which was not. For one of the three places he sets down, was not spoken of priests. But his making my mentioning the faults of the priests of old, in our Saviour's time, to be an "exposing the office of the ministers of the gospel now, and a vilifying those who are employed in it;" I must desire him to examine, by his own rules of love and candour; and to tell me, "Whether I have not reason, here again, to mind him of his fiends, and to advise him to beware of them?" And to show him how I think I have, I crave leave to ask him these questions:

Whether I do not all along plainly, and in express words, speak of the priests of the world, preceding, and in our Saviour's time? Nor can my

argument bear any other sense.

Whether all I have said of them be not true?

Whether the representing truly the carriage of the jewish, and more especially of the heathen priests, in our Saviour's time, as my argument required, can expose the office of the ministers of the gospel now? Or ought to have such an interpretation put upon it?

Whether what he says of the "air and language I use, reaching farther," carry any thing else in it, but a declaration, that he thinks some men's carriage now, had some affinity with what I have truly said, of the priests of the world, before christianity; and that therefore the faults of those should have been let alone, or touched more gently, for fear some should think these now concerned it?

Whether, in truth, this be not to accuse them, with a design to draw the envy of it on me? Whether out of good will to them, or to me, or both, let him look. This I am sure, I have spoken of none but the priests before christianity, both jewish and heathen. And for those of the jews, what our Saviour has pronounced of them, justifies my reflections from being bitter; and that the idolatrous heathen priests were better than they, I believe our author will not say: and if he were preaching against them, as opposing the ministers of the gospel, I suppose he will give as ill a character of them. But if any one extends my words farther, than to those they were spoke of, I ask whether that agrees with his rules of love and candour?

I shall impatiently expect from this author of the occasional paper, an answer to these questions; and hope to find them such as becomes that temper, and love of truth, which he professes. I long to meet with a man, who, laying aside party, and interest, and prejudice, appears in controversy so as to make good the character of a champion of truth for truth's sake; a character not so hard to be known whom it belongs to, as to be deserved. Whoever is truly such an one, his opposition to me will be an obligation. For he that proposes to himself the convincing me of an error, only for truth's sake, cannot, I know, mix any rancour, or spite, or ill-will, with it. He will keep himself at a distance from those fiends, and be as ready to hear, as offer reason. And two so disposed can hardly miss truth between them, in a fair inquiry after it; at least they will not lose good-breeding, and especially charity, a virtue much more necessary than the attaining of the knowledge of obscure truths, that are not easy to be found; and probably, therefore, not necessary to be known.

The unbiassed design of the writer, purely to defend and propagate truth, seems to me to be that alone which legitimates controversies. I am sure it plainly distinguishes such from all others, in their success and usefulness. If a man, as a sincere friend to the person, and to the truth, labours to bring another out of error, there can be nothing more beautiful, nor more beneficial. If party, passion, or vanity direct his pen, and have a hand in the controversy; there can be nothing more unbecoming, more prejudicial, nor more odious. What thoughts I shall have of a man that shall, as a christian, go about to inform me what is necessary to be believed to make a man a christian, I have declared, in the preface to my "Reasonableness of christianity," &c. nor do I find myself yet altered. He that, in print, finds fault with my imperfect discovery of that, wherein the faith, which makes a man a christian, consists, and will not tell me what more is required, will do well to satisfy the world what they ought to think of him.

THE EPHESIANS.

**A PARAPHRASE AND NOTES ON THE
EPISTLES OF ST. PAUL TO THE GALATIANS,
CORINTHIANS, ROMANS, EPHESIANS.**

TO WHICH IS PREFIXED AN ESSAY FOR THE UNDERSTANDING
OF ST. PAUL'S EPISTLES, BY CONSULTING ST. PAUL HIMSELF.

THE PREFACE.

To go about to explain any of St. Paul's epistles, after so great a train of expositors and commentators, might seem an attempt of vanity, censurable for its needlessness, did not the daily and approved examples of pious and learned men justify it. This may be some excuse for me to the public, if ever these following papers should chance to come abroad: but to myself, for whose use this work was undertaken, I need make no apology. Though I had been conversant in these epistles, as well as in other parts of sacred scripture, yet I found that I understood them not; I mean the doctrinal and discursive parts of them: though the practical directions, which are usually dropped in the latter part of each epistle, appeared to me very plain, intelligible, and instructive.

I did not, when I reflected on it, very much wonder, that this part of sacred scripture had difficulties in it: many causes of obscurity did readily occur to me. The nature of epistolary writings in general, disposes the writer to pass by the mentioning of many things, as well known to him, to whom his letter is addressed, which are necessary to be laid open to a stranger, to make him comprehend what is said: and it not seldom falls out, that a well-penned letter, which is very easy and intelligible to the receiver, is very obscure to a stranger, who hardly knows what to make of it. The matters that St. Paul writ about, were certainly things well known to those he writ to, and which they had some peculiar concern in; which made them easily apprehend his meaning, and see the tendency and force of his discourse. But we having now, at this distance, no information of the occasion of his writing, little or no knowledge of the temper and circumstances those he writ to were in, but what is to be gathered out of the epistles themselves; it is not strange, that many things in them lie concealed to us, which, no doubt, they who were concerned in the letter, understood at first sight. Add to this, that in many places it is manifest he answers letters sent, and questions proposed to him, which, if we had, would much better clear those passages that relate to them, than all the learned notes of critics and commentators, who in after times fill us with their conjectures; for very often, as to the matter in hand, they are nothing else.

The language wherein these epistles are writ, is another, and that no small occasion of their obscurity to us now: the words are Greek; a language dead many ages since: a language of a very witty, volatile people,

seekers after novelty, and abounding with variety of notions and sects, to which they applied the terms of their common tongue, with great liberty and variety: and yet this makes but one small part of the difficulty in the language of these epistles; there is a peculiarity in it, that much more obscures and perplexes the meaning of these writings, than what can be occasioned by the looseness and variety of the Greek tongue. The terms are Greek, but the idiom, or turn of the phrases, may be truly said to be Hebrew or Syriack. The custom and familiarity of which tongues do sometimes so far influence the expressions in these epistles, that one may observe the force of the Hebrew conjugations, particularly that of Hiphil, given to Greek verbs, in a way unknown to the Grecians themselves. Nor is this all; the subject treated of in these epistles is so wholly new, and the doctrines contained in them so perfectly remote from the notions that mankind were acquainted with, that most of the important terms in it have quite another signification from what they have in other discourses. So that putting all together, we may truly say, that the New Testament is a book written in a language peculiar to itself.

To these causes of obscurity, common to St. Paul, with most of the other penmen of the several books of the New Testament, we may add those that are peculiarly his, and owing to his style and temper. He was, as it is visible, a man of quick thought, and warm temper, mighty well versed in the writings of the Old Testament, and full of the doctrine of the New. All this put together, suggested matter to him in abundance, on those subjects which came in his way: so that one may consider him, when he was writing, as beset with a croud of thoughts, all striving for utterance. In this posture of mind it was almost impossible for him to keep that slow pace, and observe minutely that order and method of ranging all he said, from which results an easy and obvious perspicuity. To this plenty and vehemence of his, may be imputed those many large parentheses, which a careful reader may observe in his epistles. Upon this account also it is, that he often breaks off in the middle of an argument, to let in some new thought suggested by his own words; which having pursued and explained, as far as conduced to his present purpose, he re-assumes again the thread of his discourse, and goes on with it, without taking any notice, that he returns again to what he had been before saying; though sometimes it be so far off, that it may well have slipt out of his mind, and requires a very attentive reader to observe, and so bring the disjointed members together, as to make up the connexion, and

see how the scattered parts of the discourse hang together in a coherent, well-agreeing sense, that makes it all of a piece.

Besides the disturbance in perusing St. Paul's epistles, from the plenty and vivacity of his thoughts, which may obscure his method, and often hide his sense from an unwary, or over-hasty reader; the frequent changing of the personage he speaks in, renders the sense very uncertain, and is apt to mislead one that has not some clue to guide him; sometimes by the pronoun I, he means himself; sometimes any christian; sometimes a Jew, and sometimes any man, &c. If speaking of himself, in the first person singular, has so various meanings; his use of the first person plural is with a far greater latitude, sometimes designing himself alone, sometimes those with himself, whom he makes partners to the epistles; sometimes with himself, comprehending the other apostles, or preachers of the gospel, or christians: nay, sometimes he in that way speaks of the converted Jews, other times of the converted Gentiles, and sometimes of others, in a more or less extended sense, every one of which varies the meaning of the place, and makes it to be differently understood. I have forbore to trouble the reader with examples of them here. If his own observation hath not already furnished him with them, the following paraphrase and notes, I suppose, will satisfy him in the point.

In the current also of his discourse, he sometimes drops in the objections of others, and his answers to them, without any change in the scheme of his language, that might give notice of any other speaking, besides himself. This requires great attention to observe; and yet, if it be neglected or overlooked, will make the reader very much mistake and misunderstand his meaning, and render the sense very perplexed.

These are intrinsic difficulties arising from the text itself, whereof there might be a great many other named, as the uncertainty, sometimes, who are the persons he speaks to, or the opinions, or practices, which he has in his eye, sometimes in alluding to them, sometimes in his exhortations and reproofs. But, those above-mentioned being the chief, it may suffice to have opened our eyes a little upon them, which, well examined, may contribute towards our discovery of the rest.

To these we may subjoin two external causes, that have made no small increase of the native and original difficulties, that keep us from an easy and assured discovery of St. Paul's sense, in many parts of his epistles: and those are,

First, The dividing of them into chapters, and verses, as we have done; whereby they are so chopped and minced, and, as they are now printed, stand so broken and divided, that not only the common people take the verses usually for distinct aphorisms; but even men of more advanced knowledge, in reading them, lose very much of the strength and force of the coherence, and the light that depends on it. Our minds are so weak and narrow, that they have need of all the helps and assistances that can be procured, to lay before them undisturbedly the thread and coherence of any discourse; by which alone they are truly improved, and led into the genuine sense of the author. When the eye is constantly disturbed in loose sentences, that by their standing and separation appear as so many distinct fragments: the mind will have much ado to take in, and carry on in its memory, an uniform discourse of dependent reasonings; especially having from the cradle been used to wrong impressions concerning them, and constantly accustomed to hear them quoted as distinct sentences, without any limitation or explication of their precise meaning, from the place they stand in, and the relation they bear to what goes before, or follows. These divisions also have given occasion to the reading these epistles by parcels, and in scraps, which has farther confirmed the evil arising from such partitions. And I doubt not but every one will confess it to be a very unlikely way, to come to the understanding of any other letters, to read them piece-meal, a bit to-day, and another scrap to-morrow, and so on by broken intervals: especially if the pause and cessation should be made, as the chapters the apostle's epistles are divided into, do end sometimes in the middle of a discourse, and sometimes in the middle of a sentence. It cannot therefore but be wondered, that that should be permitted to be done to holy writ, which would visibly disturb the sense, and hinder the understanding of any other book whatsoever. If Tully's epistles were so printed, and so used, I ask, Whether they would not be much harder to be understood, less easy, and less pleasant to be read, by much, than now they are?

How plain soever this abuse is, and what prejudice soever it does to the understanding of the sacred scripture, yet if a bible was printed as it should be, and as the several parts of it were writ, in continued discourses, where the argument is continued, I doubt not but the several parties would complain of it, as an innovation, and a dangerous change in the publishing those holy books. And indeed, those who are for maintaining their opinions, and the systems of parties, by sound of words, with a neglect of the true

sense of scripture, would have reason to make and foment the outcry. They would most of them be immediately disarmed of their great magazine of artillery, wherewith they defend themselves and fall upon others. If the holy scriptures were but laid before the eyes of christians, in its connexion and consistency, it would not then be so easy to snatch out a few words, as if they were separate from the rest, to serve a purpose, to which they do not at all belong, and with which they have nothing to do. But, as the matter now stands, he that has a mind to it, may at a cheap rate be a notable champion for the truth, that is, for the doctrines of the sect, that chance or interest has cast him into. He need but be furnished with verses of sacred scripture, containing words and expressions that are but flexible, (as all general obscure and doubtful ones are) and his system, that has appropriated them to the orthodoxy of his church, makes them immediately strong and irrefragable arguments for his opinion. This is the benefit of loose sentences, and scripture crumbled into verses, which quickly turn into independent aphorisms. But if the quotation in the verse produced were considered as a part of a continued coherent discourse, and so its sense were limited by the tenour of the context, most of these forward and warm disputants would be quite stripped of those, which they doubt not now to call spiritual weapons; and they would have often nothing to say, that would not show their weakness, and manifestly fly in their faces. I crave leave to set down a saying of the learned and judicious Mr. Selden: "In interpreting the scripture, says he, many do as if a man should see one have ten pounds, which he reckoned by 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, meaning four was but four units, and five five units, &c. and that he had in all but ten pounds: the other that sees him, takes not the figures together as he doth, but picks here and there; and thereupon reports that he had five pounds in one bag, and six pounds in another bag, and nine pounds in another bag, &c. when as, in truth, he has but ten pounds in all. So we pick out a text here and there, to make it serve our turn; whereas if we take it altogether, and consider what went before, and what followed after, we should find it meant no such thing."

I have heard sober christians very much admire, why ordinary illiterate people, who were professors, that showed a concern for religion, seemed much more conversant in St. Paul's epistles, than in the plainer, and (as it seemed to them) much more intelligible parts of the New Testament; they confessed, that, though they read St. Paul's epistles with their best attention,

yet they generally found them too hard to be mastered, and they laboured in vain so far to reach the apostle's meaning, all along in the train of what he said, as to read them with that satisfaction that arises from a feeling, that we understand and fully comprehend the force and reasoning of an author; and therefore they could not imagine what those saw in them whose eyes they thought not much better than their own. But the case was plain, these sober inquisitive readers had a mind to see nothing in St. Paul's epistles, but just what he meant; whereas those others, of a quicker and gayer sight, could see in them what they pleased. Nothing is more acceptable to fancy, than pliant terms, and expressions that are not obstinate; in such it can find its account with delight, and with them be illuminated, orthodox, infallible at pleasure, and in its own way. But where the sense of the author goes visibly in its own train, and the words, receiving a determined sense from their companions and adjacents, will not consent to give countenance and colour to what is agreed to be right, and must be supported at any rate, there men of established orthodoxy do not so well find their satisfaction. And perhaps, if it were well examined, it would be no very extravagant paradox to say, that there are fewer that bring their opinions to the sacred scripture, to be tried by that infallible rule, than bring the sacred scripture to their opinions, to bend it to them, to make it, as they can, a cover and guard to them. And to this purpose, its being divided into verses, and brought, as much as may be, into loose and general aphorisms, makes it most useful and serviceable. And in this lies the other great cause of obscurity and perplexedness, which has been cast upon St. Paul's epistles from without.

St. Paul's epistles, as they stand translated in our English Bibles, are now, by long and constant use, become a part of the English language, and common phraseology, especially in matters of religion: this every one uses familiarly, and thinks he understands; but it must be observed, that if he has a distinct meaning, when he uses those words and phrases, and knows himself, what he intends by them, it is always according to the sense of his own system, and the articles, or interpretations, of the society he is engaged in. So that all this knowledge and understanding, which he has in the use of these passages of sacred scripture, reaches no farther than this, that he knows (and that is very well) what he himself says, but thereby knows nothing at all what St. Paul said in them. The apostle writ not by that man's system, and so his meaning cannot be known by it. This being the ordinary way of understanding the epistles, and every sect being perfectly orthodox

in his own judgment; what a great and invincible darkness must this cast upon St. Paul's meaning, to all those of that way, in all those places where his thoughts and sense run counter to what any party has espoused for orthodox; as it must, unavoidably, to all but one of the different systems, in all those passages that any way relate to the points in controversy between them?

This is a mischief, which however frequent, and almost natural, reaches so far, that it would justly make all those who depend upon them wholly diffident of commentators, and let them see how little help was to be expected from them, in relying on them for the true sense of the sacred scripture, did they not take care to help to cozen themselves, by choosing to use, and pin their faith on, such expositors as explain the sacred scripture, in favour of those opinions, that they beforehand have voted orthodox, and bring to the sacred scripture, not for trial but confirmation. No-body can think that any text of St. Paul's epistles has two contrary meanings; and yet so it must have, to two different men, who taking two commentators of different sects, for their respective guides into the sense of any one of the epistles, shall build upon their respective expositions. We need go no further for a proof of it, than the notes of the two celebrated commentators on the New Testament, Dr. Hammond and Beza, both men of parts and learning, and both thought, by their followers, men mighty in the sacred scriptures. So that here we see the hopes of great benefit and light, from expositors and commentators, is in a great part abated; and those, who have most need of their help, can receive but little from them, and can have very little assurance of reaching the apostle's sense, by what they find in them, whilst matters remain in the same state they are in at present. For those who find they need help, and would borrow light from expositors, either consult only those who have the good luck to be thought sound and orthodox, avoiding those of different sentiments from themselves, in the great and approved points of their systems, as dangerous and not fit to be meddled with; or else with indifferency look into the notes of all commentators promiscuously. The first of these take pains only to confirm themselves in the opinion and tenets they have already, which, whether it be the way to get the true meaning of what St. Paul delivered, is easy to determine. The others, with much more fairness to themselves, though with reaping little more advantage, (unless they have something else to guide them into the apostle's meaning, than the comments themselves) seek help on all hands, and refuse

not to be taught by any one, who offers to enlighten them in any of the dark passages. But here, though they avoid the mischief, which the others fall into, of being confined in their sense, and seeing nothing but that in St. Paul's writings, be it right or wrong; yet they run into as great on the other side, and instead of being confirmed in the meaning, that they thought they saw in the text, are distracted with an hundred, suggested by those they advised with; and so, instead of that one sense of the scripture, which they carried with them to their commentators, return from them with none at all.

This, indeed, seems to make the case desperate: for if the comments and expositions of pious and learned men cannot be depended on, whither shall we go for help? To which I answer, I would not be mistaken, as if I thought the labours of the learned in this case wholly lost and fruitless. There is great use and benefit to be made of them, when we have once got a rule, to know which of their expositions, in the great variety there is of them, explains the words and phrases according to the apostle's meaning. Until then it is evident, from what is above said, they serve for the most part to no other use, but either to make us find our own sense, and not his, in St. Paul's words; or else to find in them no settled sense at all.

Here it will be asked, "How shall we come by this rule you mention? Where is that touchstone to be had, that will show us, whether the meaning we ourselves put, or take as put by others, upon St. Paul's words, in his epistles, be truly his meaning or no?" I will not say the way which I propose, and have in the following paraphrase followed, will make us infallible in our interpretations of the apostle's text: but this I will own, that till I took this way, St. Paul's epistles, to me, in the ordinary way of reading and studying them, were very obscure parts of scripture, that left me almost everywhere at a loss; and I was at a great uncertainty, in which of the contrary senses, that were to be found in his commentators, he was to be taken. Whether what I have done has made it any clearer, and more visible, now, I must leave others to judge. This I beg leave to say for myself, that if some very sober, judicious christians, no strangers to the sacred scriptures, nay, learned divines of the church of England, had not professed, that by the perusal of these following papers, they understood the epistles much better than they did before, and had not, with repeated instances, pressed me to publish them, I should not have consented they should have gone beyond my own private use, for which they were at first designed, and where they made me not repent my pains.

If any one be so far pleased with my endeavours, as to think it worth while to be informed, what was the clue I guided myself by, through all the dark passages of these epistles, I shall minutely tell him the steps by which I was brought into this way, that he may judge whether I proceed rationally, upon right grounds, or no; if so be any thing, in so mean an example as mine, may be worth his notice.

After I had found by long experience, that the reading of the text and comments in the ordinary way, proved not so successful as I wished, to the end proposed, I began to suspect, that in reading a chapter as was usual, and thereupon sometimes consulting expositors upon some hard places of it, which at that time most affected me, as relating to points then under consideration in my own mind, or in debate amongst others, was not a right method to get into the true sense of these epistles. I saw plainly, after I began once to reflect on it, that if any one now should write me a letter, as long as St. Paul's to the Romans, concerning such a matter as that is, in a style as foreign, and expressions as dubious, as his seem to be, if I should divide it into fifteen or sixteen chapters, and read of them one to-day, and another to-morrow, &c. it was ten to one, I should never come to a full and clear comprehension of it. The way to understand the mind of him that writ it, every one would agree, was to read the whole letter through, from one end to the other, all at once, to see what was the main subject and tendency of it: or if it had several views and purposes in it, not dependent one of another, nor in a subordination to one chief aim and end, to discover what those different matters were, and where the author concluded one, and began another; and if there were any necessity of dividing the epistle into parts, to make these the boundaries of them.

In prosecution of this thought, I concluded it necessary, for the understanding of any one of St. Paul's epistles, to read it all through at one sitting; and to observe, as well as I could, the drift and design of his writing it. If the first reading gave me some light, the second gave me more; and so I persisted on, reading constantly the whole epistle over at once, till I came to have a good general view of the apostle's main purpose in writing the epistle, the chief branches of his discourse wherein he prosecuted it, the arguments he used, and the disposition of the whole.

This, I confess, is not to be obtained by one or two hasty readings; it must be repeated again and again, with a close attention to the tenour of the discourse, and a perfect neglect of the divisions into chapters and verses. On

the contrary, the safest way is to suppose, that the epistle has but one business and one aim, until, by a frequent perusal of it, you are forced to see there are distinct independent matters in it, which will forwardly enough show themselves.

It requires so much more pains, judgment, and application, to find the coherence of obscure and abstruse writings, and makes them so much the more unfit to serve prejudice and pre-occupation, when found; that it is not to be wondered, that St. Paul's epistles have, with many, passed rather for disjointed, loose, pious discourses, full of warmth and zeal and overflows of light, rather than for calm, strong, coherent reasonings, that carried a thread of argument and consistency all through them.

But this muttering of lazy or ill-disposed readers hindered me not from persisting in the course I had begun: I continued to read the same epistle over and over, and over again, until I came to discover as appeared to me, what was the drift and aim of it, and by what steps and arguments St. Paul prosecuted his purpose. I remembered that St. Paul was miraculously called to the ministry of the gospel, and declared to be a chosen vessel; that he had the whole doctrine of the gospel from God, by immediate revelation; and was appointed to be the apostle of the Gentiles, for the propagating of it in the heathen world. This was enough to persuade me, that he was not a man of loose and shattered parts, incapable to argue, and unfit to convince those he had to deal with. God knows how to choose fit instruments for the business he employs them in. A large stock of jewish learning he had taken in, at the feet of Gamaliel; and for his information in christian knowledge, and the mysteries and depths of the dispensation of grace by Jesus Christ, God himself had condescended to be his instructor and teacher. The light of the gospel he had received from the Fountain and Father of light himself, who, I concluded, had not furnished him in this extraordinary manner, if all this plentiful stock of learning and illumination had been in danger to have been lost, or proved useless, in a jumbled and confused head; nor have laid up such a store of admirable and useful knowledge in a man, who, for want of method and order, clearness of conception, or pertinency in discourse, could not draw it out into use with the greatest advantages of force and coherence. That he knew how to prosecute this purpose with strength of argument, and close reasoning, without incoherent sallies, or the intermixing of things foreign to his business, was evident to me, from several speeches of his, recorded in the Acts: and it was hard to think, that a

man that could talk with so much consistency, and clearness of conviction, should not be able to write without confusion, inextricable obscurity, and perpetual rambling. The force, order, and perspicuity of those discourses, could not be denied to be very visible. How, then, came it, that the like was thought much wanting in his epistles? And of this there appeared to me this plain reason: the particularities of the history, in which these speeches are inserted, show St. Paul's end in speaking; which, being seen, casts a light on the whole, and shows the pertinency of all that he says. But his epistles not being so circumstantiated; there being no concurring history, that plainly declares the disposition St. Paul was in; what the actions, expectations, or demands of those to whom he writ, required him to speak to, we are nowhere told. All this, and a great deal more, necessary to guide us into the true meaning of the epistles, is to be had only from the epistles themselves, and to be gathered from thence with stubborn attention, and more than common application.

This being the only safe guide (under the Spirit of God, that dictated these sacred writings) that can be relied on, I hope I may be excused, if I venture to say, that the utmost ought to be done to observe and trace out St. Paul's reasonings; to follow the thread of his discourse in each of his epistles; to show how it goes on, still directed with the same view, and pertinently drawing the several incidents towards the same point. To understand him right, his inferences should be strictly observed; and it should be carefully examined, from what they are drawn, and what they tend to. He is certainly a coherent, argumentative, pertinent writer; and care, I think, should be taken, in expounding of him, to show that he is so. But though I say, he has weighty aims in his epistles, which he steadily keeps in his eye, and drives at, in all he says; yet I do not say, that he puts his discourses into an artificial method, or leads his reader into a distinction of his arguments, or gives them notice of new matter, by rhetorical or studied transitions. He has no ornaments borrowed from the Greek eloquence; no notions of their philosophy mixed with his doctrine, to set it off. The enticing words of man's wisdom, whereby he means all the studied rules of the Grecian schools, which made them such masters in the art of speaking, he, as he says himself, 1 Cor. ii. 4, wholly neglected. The reason whereof he gives in the next verse, and in other places. But though politeness of language, delicacy of style, fineness of expression, laboured periods, artificial transitions, and a very methodical ranging of the parts, with such

other embellishments as make a discourse enter the mind smoothly, and strike the fancy at first hearing, have little or no place in his style; yet coherence of discourse, and a direct tendency of all the parts of it to the argument in hand, are most eminently to be found in him. This I take to be his character, and doubt not but it will be found to be so upon diligent examination. And in this, if it be so, we have a clue, if we will take the pains to find it, that will conduct us with surety, through those seemingly dark places, and imagined intricacies, in which christians have wandered so far one from another, as to find quite contrary senses.

Whether a superficial reading, accompanied with the common opinion of his invincible obscurity, has kept off some from seeking in him, the coherence of a discourse, tending with close, strong reasoning to a point; or a seemingly more honourable opinion of one that had been rapped up into the third heaven, as if from a man so warmed and illuminated as he had been, nothing could be expected but flashes of light, and raptures of zeal, hindered others to look for a train of reasoning, proceeding on regular and cogent argumentation, from a man raised above the ordinary pitch of humanity, to a higher and brighter way of illumination; or else, whether others were loth to beat their heads about the tenour and coherence in St. Paul's discourses; which, if found out, possibly might set them at a manifest and irreconcilable difference with their systems: it is certain that, whatever hath been the cause, this way of getting the true sense of St. Paul's epistles, seems not to have been much made use of, or at least so thoroughly pursued, as I am apt to think it deserves.

For, granting that he was full-stored with the knowledge of the things he treated of; for he had light from heaven, it was God himself furnished him, and he could not want: allowing also that he had ability to make use of the knowledge had been given him, for the end for which it was given him, viz. the information, conviction, and conversion of others; and accordingly, that he knew how to direct his discourse to the point in hand; we cannot widely mistake the parts of his discourse employed about it, when we have any where found out the point he drives at: wherever we have got a view of his design, and the aim he proposed to himself in writing, we may be sure, that such or such an interpretation does not give us his genuine sense, it being nothing at all to his present purpose. Nay, among various meanings given a text, it fails not to direct us to the best, and very often to assure us of the true. For it is no presumption, when one sees a man arguing from this or

that proposition, if he be a sober man, master of reason, or common-sense, and takes any care of what he says, to pronounce with confidence, in several cases, that he could not talk thus or thus.

I do not yet so magnify this method of studying St. Paul's epistles, as well as other parts of sacred scripture, as to think it will perfectly clear every hard place, and leave no doubt unresolved. I know, expressions now out of use, opinions of those times not heard of in our days, allusions to customs lost to us, and various circumstances and particularities of the parties, which we cannot come at, &c. must needs continue several passages in the dark, now to us, at this distance, which shone with full light to those they were directed to. But for all that, the studying of St. Paul's epistles, in the way I have proposed, will, I humbly conceive, carry us a great length in the right understanding of them, and make us rejoice in the light we receive from those most useful parts of divine revelation, by furnishing us with visible grounds, that we are not mistaken, whilst the consistency of the discourse, and the pertinency of it to the design he is upon, vouches it worthy of our great apostle. At least I hope it may be my excuse, for having endeavoured to make St. Paul an interpreter to me of his own epistles.

To this may be added another help, which St. Paul himself affords us, towards the attaining the true meaning contained in his epistles. He that reads him with the attention I propose, will easily observe, that as he was full of the doctrine of the gospel; so it lay all clear and in order, open to his view. When he gave his thoughts utterance upon any point, the matter flowed like a torrent; but it is plain, it was a matter he was perfectly master of: he fully possessed the entire revelation he had received from God; had thoroughly digested it; all the parts were formed together in his mind, into one well-contracted harmonious body. So that he was no way at an uncertainty, nor ever, in the least, at a loss concerning any branch of it. One may see his thoughts were all of a piece in all his epistles, his notions were at all times uniform, and constantly the same, though his expressions very various. In them he seems to take great liberty. This at least is certain, that no one seems less tied up to a form of words. If then, having, by the method before proposed, got into the sense of the several epistles, we will but compare what he says, in the places where he treats of the same subject, we can hardly be mistaken in his sense, nor doubt what it was that he believed and taught, concerning those points of the christian religion. I know it is not unusual to find a multitude of texts heaped up, for the maintaining of an

espoused proposition; but in a sense often so remote from their true meaning, that one can hardly avoid thinking, that those who so used them, either sought not, or valued not the sense; and were satisfied with the sound, where they could but get that to favour them. But a verbal concordance leads not always to texts of the same meaning; trusting too much thereto will furnish us but with slight proofs in many cases, and any one may observe, how apt that is to jumble together passages of scripture, not relating to the same matter, and thereby to disturb and unsettle the true meaning of holy scripture. I have therefore said, that we should compare together places of scripture treating of the same point. Thus, indeed, one part of the sacred text could not fail to give light unto another. And since the providence of God hath so ordered it, that St. Paul has writ a great number of epistles; which, though upon different occasions, and to several purposes, yet all confined within the business of his apostleship, and so contain nothing but points of christian instruction, amongst which he seldom fails to drop in, and often to enlarge on, the great and distinguishing doctrines of our holy religion; which, if quitting our own infallibility in that analogy of faith, which we have made to ourselves, or have implicitly adopted from some other, we would carefully lay together, and diligently compare and study, I am apt to think, would give us St. Paul's system in a clear and indisputable sense; which every one must acknowledge to be a better standard to interpret his meaning by, in any obscure and doubtful parts of his epistles, if any such should still remain, than the system, confession, or articles of any church, or society of christians, yet known; which, however pretended to be founded on scripture, are visibly the contrivances of men, fallible both in their opinions and interpretations; and, as is visible in most of them, made with partial views, and adapted to what the occasions of that time, and the present circumstances they were then in, were thought to require, for the support or justification of themselves. Their philosophy, also, has its part in misleading men from the true sense of the sacred scripture. He that shall attentively read the christian writers, after the age of the apostles, will easily find how much the philosophy, they were tinctured with, influenced them in their understanding of the books of the old and new testament. In the ages wherein Platonism prevailed, the converts to christianity of that school, on all occasions, interpreted holy writ, according to the notions they had imbibed from that philosophy. Aristotle's doctrine had the same effect in its turn, and when it degenerated into the

peripateticism of the schools, that, too, brought its notions and distinctions into divinity, and affixed them to the terms of the sacred scripture. And we may see still how, at this day, every one's philosophy regulates every one's interpretation of the word of God. Those who are possessed with the doctrine of aerial and æthereal vehicles, have thence borrowed an interpretation of the four first verses of 2 Cor. v. without having any ground to think, that St. Paul had the least notion of any such vehicle. It is plain, that the teaching of men philosophy, was no part of the design of divine revelation; but that the expressions of scripture are commonly suited, in those matters, to the vulgar apprehensions and conceptions of the place and people, where they were delivered. And, as to the doctrine therein directly taught by the apostles, that tends wholly to the setting up the kingdom of Jesus Christ in this world, and the salvation of men's souls: and in this it is plain their expressions were conformed to the ideas and notions which they had received from revelation, or were consequent from it. We shall, therefore, in vain go about to interpret their words by the notions of our philosophy, and the doctrines of men delivered in our schools. This is to explain the apostles' meaning, by what they never thought of, whilst they were writing; which is not the way to find their sense, in what they delivered, but our own, and to take up, from their writings, not what they left there for us, but what we bring along with us in ourselves. He that would understand St. Paul right, must understand his terms, in the sense he uses them, and not as they are appropriated by each man's particular philosophy to conceptions that never entered the mind of the apostle. For example, he that shall bring the philosophy now taught and received, to the explaining of spirit, soul, and body, mentioned 1 Thess. v. 23, will, I fear, hardly reach St. Paul's sense, or represent to himself the notions St. Paul then had in his mind. That is what we should aim at, in reading him, or any other author; and until we, from his words, paint his very ideas and thoughts in our minds, we do not understand him.

In the divisions I have made, I have endeavoured, the best I could, to govern myself by the diversity of matter. But in a writer like St. Paul, it is not so easy always to find precisely, where one subject ends, and another begins. He is full of the matter he treats, and writes with warmth, which usually neglects method, and those partitions and pauses, which men, educated in the schools of rhetoricians, usually observe. Those arts of writings, St. Paul, as well out of design as temper, wholly laid by: the

subject he had in hand, and the grounds upon which it stood firm, and by which he enforced it, were what alone he minded; and without solemnly winding up one argument, and intimating any way, that he began another, let his thoughts, which were fully possessed of the matter, run in one continued train, wherein the parts of his discourse were wove, one into another: so that it is seldom that the scheme of his discourse makes any gap; and therefore, without breaking in upon the connexion of his language, it is hardly possible to separate his discourse, and give a distinct view of his several arguments, in distinct sections.

I am far from pretending infallibility, in the sense I have any where given in my paraphrase, or notes: that would be to erect myself into an apostle; a presumption of the highest nature in any one, that cannot confirm what he says by miracles. I have, for my own information, sought the true meaning, as far as my poor abilities would reach. And I have unbiassedly embraced, what, upon a fair inquiry, appeared so to me. This I thought my duty and interest, in a matter of so great concernment to me. If I must believe for myself, it is unavoidable, that I must understand for myself. For if I blindly, and with an implicit faith, take the pope's interpretation of the sacred scripture, without examining whether it be Christ's meaning; it is the pope I believe in, and not in Christ; it is his authority I rest upon; it is what he says, I embrace: for what it is Christ says, I neither know nor concern myself. It is the same thing, when I set up any other man in Christ's place, and make him the authentic interpreter of sacred scripture to myself. He may possibly understand the sacred scripture as right as any man: but I shall do well to examine myself, whether that, which I do not know, nay, which (in the way I take) I can never know, can justify me, in making myself his disciple, instead of Jesus Christ's, who of right is alone, and ought to be, my only Lord and Master: and it will be no less sacrilege in me, to substitute to myself any other in his room, to be a prophet to me, than to be my king, or priest.

The same reasons that put me upon doing what I have in these papers done, will exempt me from all suspicion of imposing my interpretation on others. The reasons that led me into the meaning, which prevailed on my mind, are set down with it: as far as they carry light and conviction to any other man's understanding, so far, I hope, my labour may be of some use to him; beyond the evidence it carries with it, I advise him not to follow mine, nor any man's interpretation. We are all men, liable to errors, and infected

with them; but have this sure way to preserve ourselves, every one, from danger by them, if, laying aside sloth, carelessness, prejudice, party, and a reverence of men, we betake ourselves, in earnest, to the study of the way to salvation, in those holy writings, wherein God has revealed it from heaven, and proposed it to the world, seeking our religion, where we are sure it is in truth to be found, comparing spiritual things with spiritual things.

A PARAPHRASE AND NOTES ON THE EPISTLE OF ST. PAUL TO THE GALATIANS.

THE PUBLISHER TO THE READER.

There is nothing, certainly, of greater encouragement to the peace of the church in general, nor to the direction and edification of all christians in particular, than a right understanding of the holy scripture. This consideration has set so many learned and pious men amongst us, of late years, upon expositions, paraphrases, and notes on the sacred writings, that the author of these hopes the fashion may excuse him from endeavouring to add his mite; believing, that after all that has been done by those great labourers in the harvest, there may be some gleanings left, whereof he presumes he has an instance, chap. iii. ver. 20, and some other places of this epistle to the Galatians, which he looks upon not to be the hardest of St. Paul's. If he has given a light to any obscure passage, he shall think his pains well employed; if there be nothing else worth notice in him, accept of his good intention.

THE EPISTLE OF ST. PAUL TO THE GALATIANS; WRIT FROM EPHESUS, THE YEAR OF OUR LORD 57, OF NERO III.

SYNOPSIS.

The subject and design of this epistle of St. Paul is much the same with that of his epistle to the Romans, but treated in somewhat a different manner. The business of it is to dehort and hinder the Galatians from bringing themselves under the bondage of the Mosaical law.

St. Paul himself had planted the churches of Galatia, and therefore referring (as he does, chap. i. 8, 9,) to what he had before taught them, does not, in this epistle lay down at large to them the doctrine of the gospel, as he does in that to the Romans, who having been converted to the christian faith by others, he did not know how far they were instructed in all those particulars, which, on the occasion whereon he writ to them, it might be necessary for them to understand: and therefore, writing to the Romans, he sets before them a large and comprehensive view of the chief heads of the christian religion.

He also deals more roundly with his disciples the Galatians than, we may observe, he does with the Romans, to whom he, being a stranger, writes not in so familiar a style, nor in his reproofs and exhortations uses so much the tone of a master, as he does to the Galatians.

St. Paul had converted the Galatians to the faith, and erected several churches among them in the year of our Lord 51; between which, and the year 57, wherein this epistle was writ, the disorders following were got into those churches:

First, Some zealots for the jewish constitution had very near persuaded them out of their christian liberty, and made them willing to submit to circumcision, and all the ritual observances of the jewish church, as necessary under the gospel, chap. i. 7; iii. 3; iv. 9, 10, 21; v. 1, 2, 6, 9, 10.

Secondly, Their dissensions and disputes in this matter had raised great animosities amongst them, to the disturbance of their peace, and the setting them at strife with one another, chap. v. 6, 13 — 15.

The reforming them in these two points, seems to be the main business of this epistle, wherein he endeavours to establish them in a resolution to stand firm in the freedom of the gospel, which exempts them from the bondage of the Mosaical law: and labours to reduce them to a sincere love and affection one to another; which he concludes with an exhortation to liberality, and general beneficence, especially to their teachers, chap. vi. 6, 10. These being the matters he had in his mind to write to them about, he seems here as if he had done. But, upon mentioning ver. 11, what a long letter he had writ to them with his own hand, the former argument concerning circumcision, which filled and warmed his mind, broke out again into what we find, ver. 12 — 17, of the sixth chapter.

SECT. I.

CHAPTER I. 1 — 5. INTRODUCTION.

CONTENTS.

The general view of this epistle plainly shows St. Paul's chief design in it to be, to keep the Galatians from hearkening to those judaizing seducers, who had almost persuaded them to be circumcised. These perverters of the gospel of Christ, as St. Paul himself calls them, ver. 7, had, as may be gathered from ver. 8, and 10, and from chap. v. 11, and other passages of this epistle, made the Galatians believe, that St. Paul himself was for circumcision. Until St. Paul himself had set them right in this matter, and convinced them of the falsehood of this aspersion, it was in vain for him, by other arguments, to attempt the re-establishing the Galatians in the christian liberty, and in that truth which he had preached to them. The removing therefore of this calumny, was his first endeavour: and to that purpose, this introduction, different from what we find in any other of his epistles, is marvellously well adapted. He declares, here at the entrance, very expressly and emphatically, that he was not sent by men on their errands; nay, that Christ, in sending him, did not so much as convey his apostolic power to him by the ministry, or intervention of any man; but that his commission and instructions were all entirely from God, and Christ himself, by immediate revelation. This, of itself, was an argument sufficient to induce them to believe, 1. That what he taught them, when he first preached the

gospel to them, was the truth, and that they ought to stick firm to that. 2. That he changed not his doctrine, whatever might be reported of him. He was Christ's chosen officer, and had no dependence on men's opinions, nor regard to their authority or favour, in what he preached; and therefore it was not likely he should preach one thing at one time, and another thing at another.

Thus this preface is very proper in this place, to introduce what he is going to say concerning himself, and adds force to his discourse, and the account he gives of himself in the next section.

TEXT.

¹ Paul an apostle (not of men, neither by man, but by Jesus Christ, and God the Father, who raised him from the dead.)

² And all the brethren, which are with me, unto the churches of Galatia.

³ Grace be to you, and peace, from God the Father, and from our Lord Jesus Christ.

⁴ Who gave himself for our sins, that he might deliver us from this present evil world, according to the will of God and our Father.

⁵ To whom be glory for ever and ever. Amen.

PARAPHRASE.

¹ Paul (an apostle not of men, to serve their ends, or carry on their designs, nor receiving his call, or commission, by the intervention of any man, to whom he might be thought to owe any respect or deference upon that account: but immediately from Jesus Christ, and from God the Father, who raised him up from the² dead); And all the brethren that are with me, unto³ the churches of Galatia: Favour be to you, and peace from God the Father, and from our Lord Jesus Christ, ⁴ Who gave himself for our sins, that he might take us out of this present evil world, according to the⁵ will and good pleasure of God and our Father, To whom be glory for ever and ever. Amen.

SECT. II.

CHAPTER I. 6. — II. 21.

CONTENTS.

We have observed, that St. Paul's first endeavour in this epistle, was to satisfy the Galatians, that the report spread of him, that he preached circumcision, was false. Until this obstruction, that lay in his way was removed, it was to no purpose for him to go about to dissuade them from circumcision, though that be what he principally aims, in this epistle. To show them, that he promoted not circumcision, he calls their hearkening to those who persuaded them to be circumcised, their being removed from him; and those that so persuaded them, "perverters of the gospel of Christ," ver. 6, 7. He farther assures them, that the gospel which he preached everywhere was that, and that only, which he had received by immediate revelation from Christ, and no contrivance of man, nor did he vary it to please men: that would not consist with his being a servant of Christ, ver. 10. And he expresses such a firm adherence to what he had received from Christ, and had preached to them, that he pronounces an anathema upon himself, ver. 8, 9, or any other man, or angel that should preach any thing else to them. To make out this to have been all along his conduct, he gives an account of himself for many years backwards, even from the time before his conversion. Wherein he shows, that from a zealous persecuting jew he was made a christian, and an apostle, by immediate revelation; and that, having no communication with the apostles, or with the churches of Judea, or any man, for some years, he had nothing to preach, but what he had received by immediate revelation. Nay, when, fourteen years after, he went up to Jerusalem, it was by revelation; and when he there communicated the gospel, which he preached among the gentiles, Peter, James, and John, approved of it, without adding any thing, but admitted him, as their fellow-apostle. So that, in all this, he was guided by nothing but divine revelation, which he inflexibly stuck to so far, that he openly opposed St. Peter for his judaizing at Antioch. All which account of himself tends clearly to show, that St. Paul made not the least step towards complying with the jews, in favour of the law, nor did, out of regard to man, deviate from the doctrine he had received by revelation from God.

All the parts of this section, and the narrative contained in it, manifestly concenter in this, as will more fully appear, as we go through them, and take a closer view of them; which will show us, that the whole is so skilfully managed, and the parts so gently slid into, that it is a strong, but not seemingly laboured justification of himself, from the imputation of preaching up circumcision.

TEXT.

⁶ I marvel that ye are so soon removed from him, that called you into the grace of Christ, unto another gospel:

⁷ Which is not another; but there be some that trouble you, and would pervert the gospel of Christ.

⁸ But though we, or an angel from heaven, preach any other gospel unto you, than that which we have preached unto you, let him be accursed.

⁹ As we said before, so say I now again, if any man preach any other gospel unto you than that ye have received, let him be accursed.

¹⁰ For do I now persuade men, or God? Or do I seek to please men? For, if I yet pleased men I should not be the servant of Christ.

¹¹ But I certify to you, brethren, that the gospel which was preached of me, is not after man.

¹² For I neither received it of man, neither was I taught it, but by the revelation of Jesus Christ.

¹³ For ye have heard of my conversation in time past, in the Jews religion, how that beyond measure I persecuted the Church of God, and wasted it.

¹⁴ And profited in the jews religion above many my equals in mine own nation, being more exceedingly zealous of the traditions of my fathers.

¹⁵ But when it pleased God, who separated me from my mother's womb, and called me by his grace,

¹⁶ To reveal his son in me, that I might preach him among the heathen: immediately I conferred not with flesh and blood:

¹⁷ Neither went I up to Jerusalem, to them which were apostles before me, but I went into Arabia, and returned again unto Damascus.

¹⁸ Then after three years, I went up to Jerusalem, to see Peter, and abode with him fifteen days.

¹⁹ But other of the apostles saw I none, save James the Lord's brother.

²⁰ Now the things which I write unto you, behold, before God, I lye not.

²¹ Afterwards I came into the regions of Syria and Cilicia:

²² And was unknown by face unto the churches of Judea, which were in Christ.

²³ But they had heard only, that he, which persecuted us in times past, now preacheth the faith which once he destroyed.

²⁴ And they glorified God in me.

PARAPHRASE.

⁶ I cannot but wonder that you are soon removed from me, (who called you into the covenant of grace, which is in Christ) unto another sort of gospel; ⁷ Which is not owing to any thing else, but only this, that ye are troubled by a certain sort of men, who would overturn the gospel of Christ by making circumcision, and the keeping of the law, necessary⁸ under the gospel. But if even I myself, or an angel from heaven, should preach any thing to you for gospel, different from the gospel I have preached unto⁹ you, let him be accursed. I say it again to you, if any one, under pretence of the gospel, preach any other thing to you, than what ye have received¹⁰ from me, let him be accursed. For can it be doubted of me, after having done and suffered so much for the gospel of Christ, whether I do now, at this time of day, make my court to men, or seek the favour of God? If I had hitherto made it my business to please men, I should not have been the servant of Christ, nor taken up the profession of the¹¹ gospel. But I certify you, brethren, that the gospel, which has been every where preached by me, is not such as is pliant to human interest, or can be accommodated¹² to the pleasing of men (For I neither received it from man, nor was I taught it by any one, as his scholar;) but it is the pure and unmixed immediate¹³ revelation of Jesus Christ to me. To satisfy you of this, my behaviour whilst I was of the jewish religion is so well known, that I need not tell you, how excessive violent I was in persecuting the church¹⁴ of God, and destroying it all I could; And that being carried on by an extraordinary zeal for the traditions of my forefathers, I out-stripped many¹⁵ students of my own age and nation, in judaism. But when it pleased God (who separated me from my mother's womb, and by his especial favour called me to be a christian, and a preacher of the gospel,)¹⁶ To reveal his son to me, that I might preach him among the gentiles, I thereupon applied not myself¹⁷ to any man, for advice what to do. Neither went I up to Jerusalem to those who were apostles before me, to see whether they approved my doctrine, or to have farther instructions from them: but I went immediately unto Arabia, and from ¹⁸ thence returned again to Damascus. Then after three years, I went up to Jerusalem, to see Peter,¹⁹ and abode with him fifteen days. But other of the apostles saw I none, but James, the brother of our²⁰ Lord. These things, that I write to you, I call God to witness, are all true; there is no falsehood in²¹ them. Afterwards I came into the regions of Syria²² and Cilicia. But

with the churches of Christ in Judea, I had had no communication: they had not²³ so much as seen my face; Only they had heard, that I, who formerly persecuted the churches of Christ, did now preach the gospel, which I once²⁴ endeavoured to suppress and extirpate. And they glorified God upon my account.

CHAPTER II.

TEXT.

¹ Then fourteen years after, I went up again to Jerusalem, with Barnabas, and took Titus with me also.

² And I went up by revelation, and communicated unto them that gospel, which I preach among the gentiles, but privately to them which were of reputation, lest by any means I should run or had run in vain.

³ But neither Titus, who was with me, being a greek, was compelled to be circumcised:

⁴ And that, because of false brethren, unawares brought in, who came in privily to spy out our liberty, which we have in Christ Jesus, that they might bring us into bondage.

⁵ To whom we gave place by subjection, no not for an hour; that the truth of the gospel might continue with you.

⁶ But of these, who seemed to be somewhat (whatsoever they were, it maketh no matter to me; God accepteth no man's person;) for they, who seemed to be somewhat, in conference added nothing to me.

⁷ But contrariwise, when they saw that the gospel of the uncircumcision was committed unto me, as the gospel of the circumcision was unto Peter;

⁸ (For he that wrought effectually in Peter, to the apostleship of the circumcision, the same was mighty in me towards the Gentiles)

⁹ And when James, Cephas, and John, who seemed to be pillars, perceived the grace that was given unto me, they gave to me and Barnabas the right hands of fellowship; that we should go unto the heathen, and they unto the circumcision.

¹⁰ Only they would that we should remember the poor; the same which I also was forward to do.

¹¹ But when Peter was come to Antioch, I withstood him to the face, because he was to be blamed.

¹² For, before that certain came from James, he did eat with the gentiles: but, when they were come, he withdrew and separated himself, fearing them which were of the circumcision.

¹³ And the other jews dissembled likewise with him; insomuch that Barnabas also was carried away with their dissimulation.

¹⁴ But when I saw that they walked not uprightly, according to the truth of the gospel, I said unto Peter before them all: If thou, being a jew, livest after the manner of gentiles, and not as do the jews, why compellest thou the gentiles to live as do the jews?

¹⁵ We who are jews by nature, and not sinners of the gentiles,

¹⁶ Knowing that a man is not justified by the works of the law, but by the faith of Jesus Christ, even we have believed in Jesus Christ, that we might be justified by the faith of Christ, and not by the works of the law: for by the works of the law shall no flesh be justified.

¹⁷ But if, while we seek to be justified by Christ, we ourselves also are found sinners, is therefore Christ the minister of sin? God forbid.

¹⁸ For if I build again the things which I destroyed, I make myself a transgressor.

¹⁹ For I, through the law, am dead to the law, that I might live unto God.

²⁰ I am crucified with Christ; nevertheless I live; yet not I, but Christ liveth in me: and the life which I now live in the flesh, I live by the faith of the Son of God, who loved me, and gave himself for me.

²¹ I do not frustrate the grace of God; for if righteousness come by the law, then Christ is dead in vain.

PARAPHRASE.

¹ Then fourteen years after, I went up again to Jerusalem, with Barnabas, and took Titus also with me.² And I went up by revelation, and there laid before them the gospel which I preached to the gentiles, but privately to those who were of note and reputation amongst them; lest the pains that I have already taken, or should take in the gospel, should be in vain.³ But though I communicated the gospel which I preached to the gentiles, to the eminent men of the church at Jerusalem, yet neither Titus who was with⁴ me, being a greek, was forced to be circumcised: Nor did I yield any thing, one moment, by way of subjection to the law, to those false brethren, who, by an unwary admittance, were slyly crept in, to spy out our liberty from the

law, which we have under the gospel: that they might bring us into bondage to⁵ the law. But I stood my ground against it, that the⁶ truth of the gospel might remain among you. But as for those, who were really men of eminency and value, what they were heretofore, it matters not at all to me: God accepts not the person of any man, but communicates the gospel to whom he pleases, as he has done to me by revelation, without their help; for, in their conference with me, they added nothing to me, they taught me nothing new, nor that Christ had not taught me before, nor had they any thing to⁷ object against what I preached to the gentiles. But on the contrary, James, Peter, and John, who were of reputation, and justly esteemed to be pillars, perceiving that the gospel which was to be preached to the gentiles, was committed to me; as that which was to be preached to the Jews was committed to⁸ Peter; (For he that had wrought powerfully in Peter, to his executing the office of an apostle to the Jews, had also wrought powerfully in me, in my application⁹ and apostleship, to the gentiles;) And, knowing the favour that was bestowed on me, gave me and Barnabas the right hand of fellowship, that we should preach the gospel to the gentiles, and they¹⁰ to the children of Israel. All that they proposed, was, that we should remember to make collections among the gentiles, for the poor christians of Judea, which¹¹ was a thing that of myself I was forward to do. But when Peter came to Antioch, I openly opposed him¹² to his face: for, indeed, he was to be blamed. For he conversed there familiarly with the gentiles, and eat with them, until some jews came thither from James: then he withdrew, and separated from the gentiles, for fear of those who were of the circumcision.¹³ And the rest of the jews joined also with him in this hypocrisy, insomuch that Barnabas himself was carried away with the stream, and dissembled as¹⁴ they did. But when I saw they conformed not their conduct to the truth of the gospel, I said unto Peter before them all: If thou, being a Jew, takest the liberty sometimes to live after the manner of the gentiles, not keeping to those rules which the jews observe, why dost thou constrain the gentiles to conform themselves to the rites and manner of living of the jews?¹⁵ We, who are by nature jews, born under the instruction and guidance of the law, God's peculiar people, and not of the unclean and profligate race of¹⁶ the gentiles, abandoned to sin and death, Knowing that a man cannot be justified by the deeds of the law, but solely by faith in Jesus Christ, even we have put ourselves upon believing on him, and embraced the profession of the gospel, for the attainment of justification by faith in

Christ, and not by the works¹⁷ of the law: But if we seek to be justified in Christ, even we ourselves also are found unjustified sinners (for such are all those who are under the law, which admits of no remission or justification:) is Christ, therefore, the minister of sin? Is the dispensation by him, a dispensation of sin, and not of righteousness? Did he come into the world, that those who believe in him, should still remain sinners, i. e. under the guilt of their sins, without the benefit of justification?¹⁸ By no means. And yet certain it is, if I, who quitted the law, to put myself under the gospel, put myself again under the law, I make myself a transgressor; I re-assume again the guilt of all my transgressions; which, by the terms of that covenant¹⁹ of works, I cannot be justified from. For by the tenour of the law itself, I, by faith in Christ, am discharged from the law, that I might be appropriated to God, and live acceptably to him in his kingdom, which he has now set up under his Son.²⁰ I, a member of Christ's body, am crucified with him, but though I am thereby dead to the law, I nevertheless live; yet not I, but Christ liveth in me, i. e. the life which I now live in the flesh, is upon no other principle, nor under any other law, but that of faith in the Son of God, who loved me, and gave²¹ himself for me. And in so doing, I avoid frustrating the grace of God, I accept of the grace and forgiveness of God, as it is offered through faith in Christ, in the gospel: but if I subject myself to the law as still in force under the gospel, I do in effect frustrate grace. For if righteousness be to be had by the law, then Christ died to no purpose, there was no need of it.

SECT. III.

CHAPTER III. 1 — 5.

CONTENTS.

By the account St. Paul has given of himself in the foregoing section, the galatians being furnished with evidence, sufficient to clear him, in their minds, from the report of his preaching circumcision, he comes now, the way being thus opened, directly to oppose their being circumcised, and subjecting themselves to the law. The first argument he uses, is, that they received the Holy Ghost, and the gifts of miracles, by the gospel, and not by the law.

TEXT.

¹ O foolish galatians, who hath bewitched you, that you should not obey the truth, before whose eyes Jesus Christ hath been evidently set forth, crucified among you?

² This only would I learn of you: Received ye the spirit by the works of the law, or by the hearing of faith?

³ Are ye so foolish? Having begun in the Spirit, are ye now made perfect by the flesh?

⁴ Have ye suffered so many things in vain? if it be yet in vain.

⁵ He, therefore, that ministereth to you the Spirit, and worketh miracles among you, doth he it by the works of the law, or by the hearing of faith?

PARAPHRASE.

¹ O ye foolish galatians, who hath cast a mist before your eyes, that you should not keep to the truth of the gospel, you to whom the sufferings and death of Christ upon the cross, hath been by me so lively represented, as if it had been actually done in your sight?² This is one thing I desire to know of you: Did you receive the miraculous gifts of the Spirit, by the works³ of the law, or by the gospel preached to you? Have you so little understanding, that, having begun in the reception of the spiritual doctrine of the gospel, you hope to be advanced to higher degrees of perfection,⁴ and to be completed by the law? Have you suffered so many things in vain, if at least you will render it in vain, by falling off from the profession of the pure and uncorrupted doctrine of the gospel, and apostatizing⁵ to judaism? The gifts of the Holy Ghost, that have been conferred upon you, have they not been conferred on you as Christians, professing faith in Jesus Christ, and not as observers of the law? And hath not he, who hath conveyed these gifts to you, and done miracles amongst you, done it as a preacher and professor of the gospel, the jews, who stick in the law of Moses, being not able, by virtue of that, to do any such thing?

SECT. IV.

CHAPTER III. 6 — 17.

CONTENTS.

His next argument against circumcision, and subjection to the law, is, that the children of Abraham, intitled to the inheritance and blessing promised to Abraham and his seed, are so by faith, and not by being under the law, which brings a curse upon those who are under it.

TEXT.

⁶ Even as Abraham believed God, and it was accounted to him for righteousness:

⁷ Know ye, therefore, that they which are of faith, the same are the children of Abraham.

⁸ And the scripture, foreseeing that God would justify the heathen through faith, preached before the gospel unto Abraham, saying, “In thee shall all nations be blessed.”

⁹ So then they which be of faith, are blessed with faithful Abraham.

¹⁰ For as many as are of the works of the law, are under the curse; for it is written, “Cursed is every one that continueth not in all things, which are written in the book of the law, to do them.”

¹¹ But that no man is justified by the law in the sight of God, it is evident: for the “just shall live by faith.”

¹² And the law is not of faith: but, “The man that doth them, shall live in them.”

¹³ Christ hath redeemed us from the curse of the law, being made a curse for us; for it is written, “Cursed is every one that hangeth on a tree.”

¹⁴ That the blessing of Abraham might come on the gentiles through Jesus Christ; that we might receive the promise of the Spirit through faith.

¹⁵ Brethren, I speak after the manner of men; though it be but a man’s covenant, yet if it be confirmed, no man disannulleth, or addeth thereto.

¹⁶ Now to Abraham and his seed were the promises made. He saith not, “and to seeds,” as of many; but as of one, “and to thy seed,” which is Christ.

¹⁷ And this I say, that the covenant that was confirmed before of God in Christ, the law, which was four hundred and thirty years after, cannot disannul, that it should make the promise of none effect.

PARAPHRASE.

⁶ But to proceed: As Abraham believed in God, and⁷ it was accounted to him for righteousness; So know ye, that those who are of faith, i. e. who

rely upon God, and his promises of grace, and not upon their own performances, they are the children of Abraham, who shall inherit; and this is plain in the scripture.⁸ For it being in the purpose of God, to justify the gentiles by faith, he gave Abraham a fore-knowledge of the gospel in these words: “In thee all the⁹ nations of the earth shall be blessed.” So that they who are of faith, are blessed with Abraham,¹⁰ who believed. But as many as are of the works of the law, are under the curse: for it is written, “Cursed is every one, who remaineth not in all things, which are written in the book of the law,¹¹ to do them.” But that no man is justified by the law, in the sight of God, is evident; “for the just¹² shall live by faith.” But the law says not so, the law gives not life to those who believe: but the rule of the law is, “He that doth them,¹³ shall live in them.” Christ hath redeemed us from the curse of the law, being made a curse for us; for it is written, “Cursed is every one¹⁴ that hangeth on a tree.” That the blessing, promised to Abraham, might come on the gentiles, through Jesus Christ; that we who are Christians might, believing, receive the Spirit that was promised¶.¹⁵ Brethren, this is a known and allowed rule in human affairs, that a promise, or compact, though it be barely a man’s covenant, yet if it be once ratified, so it must stand, nobody can render it void,¹⁶ or make any alteration in it. Now to Abraham and his seed were the promises made. God doth not say, “and to seeds,” as if he spoke of more seeds than one, that were intitled to the promise upon different accounts; but only of one sort of men, who, upon one sole account, were that seed of Abraham, which was alone meant and concerned in the promise; so that “unto thy seed,” designed Christ, and his mystical body, i. e. those, that become¹⁷ members of him by faith. This, therefore, I say, that the law, which was not till 430 years after, cannot disannul the covenant that was long before made, and ratified to Christ by God, so as to set aside the promise. For if the right to the inheritance be from the works of the law, it is plain that it is not founded in the promise of Abraham, as certainly it is. For the inheritance was a donation and free gift of God, settled on Abraham and his seed, by promise.

SECT. V.

CHAPTER III. 18 — 25.

CONTENTS.

In answer to this objection, “To what, then, serveth the law?” He shows, that the law was not contrary to the promise: but since all men were guilty of transgression, ver. 22, the law was added, to show the Israelites the fruit and inevitable consequence of their sin, and thereby the necessity of betaking themselves to Christ: but as soon as men have received Christ, they have attained the end of the law, and so are no longer under it. This is a farther argument against circumcision.

TEXT.

¹⁸ For if the inheritance be of the law, it is no more of promise: but God gave it to Abraham by promise.

¹⁹ Wherefore, then, serveth the law? It was added because of transgressions, until the seed should come to whom the promise was made; and it was ordained by angels, in the hand of a mediator.

²⁰ Now a mediator is not a mediator of one; but God is one.

²¹ Is the law, then, against the promises of God? God forbid! for if there had been a law given, which could have given life, verily righteousness should have been by the law.

²² But the scripture hath concluded all under sin, that the promise, by faith of Jesus Christ, might be given to them that believe.

²³ But before faith came, we were kept under the law, shut up unto the faith, which should afterwards be revealed.

²⁴ Wherefore the law was our schoolmaster, to bring us unto Christ, that we might be justified by faith.

²⁵ But, after that faith is come, we are no longer under a schoolmaster.

PARAPHRASE.

¹⁸ If the blessing and inheritance be settled on Abraham and believers, as a free gift by promise, and¹⁹ was not to be obtained by the deeds of the law; To what purpose then was the law? It was added, because the Israelites, the posterity of Abraham, were transgressors, as well as other men, to show them their sins, and the punishment and death they incurred by them, until Christ should come, who was the seed, into whom both jews and gentiles, ingrafted by believing, become the people of God, and children of Abraham, that seed to which the promise was made. And the law was ordained by angels, in the hand of a mediator, whereby it is manifest, that

the law could not disannul the promise;²⁰ Because a mediator is a mediator between two parties concerned, but God is but one of those²¹ concerned in the promise. If, then, the promised inheritance come not to the seed of Abraham, by the law, is the law opposite, by the curse it denounces against transgressors, to the promises that God made of the blessing to Abraham? No, by no means! For if there had been a law given, which could have put us in a state of life, certainly²² righteousness should have been by law. But we find the quite contrary by the scripture, which makes no distinction betwixt jew and gentile, in this respect, but has shut up together all mankind, jews and gentiles, under sin and guilt, that the blessing which was promised, to that which is Abraham's true and intended seed, by faith in Christ,²³ might be given to those who believe. But, before Christ, and the doctrine of justification by faith¶ in him, came, we jews were shut up as a company of prisoners together, under the custody and inflexible rigour of the law, unto the coming of the Messiah, when the doctrine of justification by faith²⁴ in him should be revealed. So that the law, by its severity, served as a schoolmaster to bring us to²⁵ Christ, that we might be justified by faith. But Christ being come, and with him the doctrine of justification by faith, we are set free from this schoolmaster, there is no longer any need of him.

SECT. VI.

CHAPTER III. 26 — 29.

CONTENTS.

As a further argument to dissuade them from circumcision, he tells the galatians, that by faith in Christ, all, whether jews or gentiles, are made the children of God; and so they stood in no need of circumcision.

TEXT.

²⁶ For ye are all the children of God, by faith in Christ Jesus.

²⁷ For as many of you, as have been baptized into Christ, have put on Christ.

²⁸ There is neither jew nor greek, there is neither bond nor free, there is neither male nor female: for ye are all one in Christ Jesus.

²⁹ And if ye be Christ's, then are ye Abraham's seed, and heirs according to the promise.

PARAPHRASE.

²⁶ For ye are all the children of God, by faith in²⁷ Christ Jesus. For as many of you, as have been²⁸ baptized in Christ, have put on Christ. There is no distinction of jew or gentile, or bond or free, of male or female. For ye are all one body, making²⁹ up one person in Christ Jesus. And if ye are all one in Christ Jesus, ye are the true ones, seed of Abraham, and heirs according to the propose.

SECT. VII.

CHAPTER IV. 1 — 11.

CONTENTS.

In the first part of this section he further shows, that the law was not against the promise, in that the child is not disinherited, by being under tutors. But the chief design of this section is to show, that though both jews and gentiles were intended to be the children of God, and heirs of the promise by faith in Christ, yet they both of them were left in bondage, the jews to the law, ver. 3, and the gentiles to false gods, ver 8, until Christ in due time came to redeem them both; and, therefore, it was folly in the galatians, being redeemed from one bondage, to go backwards, and put themselves again in a state of bondage, though under a new master.

TEXT.

¹ Now I say, that the heir, as long as he is a child, differeth nothing from a servant, though he be lord of all;

² But he is under tutors and governors, until the time appointed of the father.

³ Even so we, when we were children, were in bondage under the elements of the world:

⁴ But when the fulness of the time was come, God sent forth his son made of a woman, made under the law;

⁵ To redeem them that were under the law, that we might receive the adoption of sons.

⁶ And, because ye are sons, God has sent forth the Spirit of his son into your hearts, crying, Abba, Father.

⁷ Wherefore thou art no more a servant, but a son; and if a son, then an heir of God, through Christ.

⁸ Howbeit, then, when ye knew not God, ye did service unto them, which by nature are no gods.

⁹ But now, after that ye have known God, or rather are known of God, how turn ye again to the weak and beggarly elements, whereunto ye desire again to be in bondage?

¹⁰ Ye observe days, and months, and times, and years.

¹¹ I am afraid of you, lest I have bestowed upon you labour in vain.

PARAPHRASE.

¹ Now I say, that the heir, as long as he is a child, differeth nothing from a bondman, though he be ² lord of all; But is under tutors and guardians, until ³ the time prefixed by his father. So we jews, whilst we were children, were in bondage under the law. ⁴ But when the time appointed for the coming of the Messias was accomplished, God sent forth his Son, ⁵ made of a woman, and subjected to the law; That he might redeem those who were under the law, and set them free from it, that we, who believe, might be put out of the state of bondmen, into that of sons. ⁶ Into which state of sons, it is evident that you, galatians, who were heretofore gentiles, are put; forasmuch as God hath sent forth his Spirit into your ⁷ hearts, which enables you to cry Abba, Father. So that thou art no longer a bondman, but a son: and if a son, then an heir of God, or of the promise of ⁸ God, through Christ. But then, i. e. before ye were made the sons of God, by faith in Christ, now under the gospel, ye, not knowing God, were in bondage to ⁹ those, who were in truth no gods. But now, that ye know God, yea rather, that ye are known and taken into favour by him, how can it be that you, who have been put out of a state of bondage, into the freedom of sons, should go backwards, and be willing to put yourselves under the weak and beggarly elements ¹⁰ of the world into a state of bondage again? Ye observe days, and months, and times, and years, in ¹¹ compliance with the Mosaical institution. I begin to be afraid of you,

and to be in doubt, whether all the pains I have taken about you, to set you at liberty, in the freedom of the gospel, will not prove lost labour.

SECT. VIII.

CHAPTER IV. 12 — 20.

CONTENTS.

He presses them with the remembrance of the great kindness they had for him, when he was amongst them; and assures them that they have no reason to be alienated from him, though that be it, which the judaizing seducers aim at.

TEXT.

¹² Brethren, I beseech you, be as I am; for I am as ye are: ye have not injured me at all.

¹³ Ye know how, through infirmity of the flesh, I preached the gospel unto you at the first.

¹⁴ And my temptation, which was in my flesh, ye despised not, nor rejected; but received me, as an angel of God, even as Christ Jesus.

¹⁵ Where then is the blessedness you spake of; for I bear you record, that if it had been possible, ye would have plucked out your own eyes, and given them to me.

¹⁶ And I therefore become your enemy, because I tell you the truth?

¹⁷ They zealously affect you, but not well; yea, they would exclude you, that you might affect them.

¹⁸ But it is good to be zealously affected always in a good thing, and not only when I am present with you.

¹⁹ My little children, of whom I travail in birth again, until Christ be formed in you.

²⁰ I desire to be present with you now, and to change my voice; for I stand in doubt of you.

PARAPHRASE.

¹² I beseech you, brethren, let you and I be as if we were all one. Think yourselves to be very me; as I, in my own mind, put no difference at all

between you and myself; you have done me no manner of¹³ injury: On the contrary, ye know, that through infirmity of the flesh, I heretofore preached the gospel¹⁴ to you. And yet ye despised me not, for the trial I underwent in the flesh, you treated me not with contempt and scorn: but you received me, as an¹⁵ angel of God, yea, as Jesus Christ himself. What benedictions did you then pour out upon me? For I bear you witness, had it been practicable, you would have pulled out your very eyes, and given them¹⁶ me. But is it so, that I am become your enemy¹⁷ in continuing to tell you the truth? They, who would make you of that mind, show a warmth of affection to you; but it is not well: for their business is to exclude me, that they may get into your affection.¹⁸ It is good to be well and warmly affected towards a good man, at all times, and not barely¹⁹ when I am present with you, My little children, for whom I have again the pains of a woman in childbirth, until Christ be formed in you, i. e. till the true doctrine of christianity be settled in your²⁰ minds. But I would willingly be this very moment with you, and change my discourse, as I should find occasion; for I am at a stand about you, and know not what to think of you.

SECT. IX.

CHAPTER IV. 21. — V. 1.

CONTENTS.

He exhorts them to stand fast in the liberty, with which Christ hath made them free, showing those, who are so zealous for the law, that, if they mind what they read in the law, they will there find, that the children of the promise, or of the new Jerusalem, were to be free; but the children after the flesh, of the earthly Jerusalem, were to be in bondage, and to be cast out, and not to have the inheritance.

TEXT.

²¹ Tell me, ye that desire to be under the law, do ye not hear the law?

²² For it is written, that Abraham had two sons; the one by a bond-maid, the other by a free-woman.

²³ But he, who was of the bond-woman, was born after the flesh: but he of the free-woman was by promise.

²⁴ Which things are an allegory; for these are the two covenants; the one from the Mount Sinai, which gendereth to bondage, which is Agar.

²⁵ For this Agar is Mount Sinai in Arabia, and answereth to Jerusalem, which now is, and is in bondage with her children.

²⁶ But Jerusalem which is above, is free, which is the mother of us all.

²⁷ For it is written, Rejoice, thou barren, that bearest not; break forth and cry, that thou travailest not: for the desolate hath many more children than she which hath an husband.

²⁸ Now we, brethren, as Isaac was, are the children of promise.

²⁹ But as, then, he that was born after the flesh, persecuted him that was born after the spirit, even so it is now.

³⁰ Nevertheless, what saith the scripture? Cast out the bond-woman and her son: for the son of the bond-woman shall not be heir with the son of the free woman.

³¹ So then, brethren, we are not children of the bond-woman, but of the free.

V. 1. Stand fast, therefore, in the liberty wherewith Christ hath made us free, and be not entangled again with the yoke of bondage.

PARAPHRASE.

²¹ Tell me, you that would so fain be under the law, do you not acquaint yourselves with what is in the law, either by reading it, or having it read in your assemblies?²² For it is there written, Abraham had two sons, one by a bond-maid the other by a free woman.²³ But he that was of the bond-woman, was born according to the flesh, in the ordinary course of nature; but he that was of the free woman, Abraham had by virtue of the promise, after he and his wife were past²⁴ the hopes of another child. These things have an allegorical meaning: for the two women are the two covenants, the one of them delivered from mount Sinai, and is represented by Agar, who produces her²⁵ issue into bondage. (For Agar is mount Sinai in Arabia, and answers to Jerusalem, that now is, and²⁶ is in bondage with her children.) But the heavenly Jerusalem, which is above, and answers to Sarah, the mother of the promised seed, is free, the mother²⁷ of us all, both jews and gentiles, who believe. For it was of her, that it is written, “Rejoice, thou barren, that bearest not; break out into loud acclamations of joy, thou that hast not the travails of child-birth; for more are the children of the²⁸

desolate, than of her that hath an husband.” And it is we, my brethren, who, as Isaac was, are the²⁹ children of promise. But as, then, Ishmael, who was born in the ordinary course of nature, persecuted Isaac, who was born by an extraordinary power, from heaven, working miraculously; so is it³⁰ now. But what saith the scripture? “Cast out the bond-woman and her son: for the son of the bond-woman shall not share the inheritance with³¹ the son of the free-woman.” So then, brethren, we, who believe in Christ, are not the children of the bond-woman, V. 1. but of the free. Stand fast, therefore, in the liberty, wherewith Christ hath made you free, and do not put on again a yoke of bondage, by putting yourselves under the law.

SECT. X.

CHAPTER V. 2 — 13.

CONTENTS.

It is evident from ver. 11, that, the better to prevail, with the galatians to be circumcised, it had been reported, that St. Paul himself preached up circumcision. St. Paul, without taking express notice of this calumny, chap. i. 6, and ii. 21, gives an account of his past life, in a large train of particulars, which all concur to make such a character of him, as renders it very incredible, that he should ever declare for the circumcision of the gentile converts, or for their submission to the law. Having thus prepared the minds of the galatians to give him a fair hearing, as a fair man ζηλῶσθαι ἐν καλῷ, he goes on to argue against their subjecting themselves to the law. And having established their freedom from the law, by many strong arguments, he comes here at last openly to take notice of the report which had been raised of him, [that he preached circumcision] and directly confutes it.

By positively denouncing to them himself, very solemnly; that they, who suffer themselves to be circumcised, put themselves into a perfect legal state, out of the covenant of grace, and could receive no benefit by Jesus Christ, ver. 2 — 4.

By assuring them, that he, and those that followed him, expected justification only by faith, ver. 5, 6.

By telling them, that he had put them in the right way, and that this new persuasion came not from him, that converted them to christianity, ver. 7, 8.

By insinuating to them, that they should agree to pass judgment on him, that troubled them with this doctrine, ver. 9, 10.

By his being persecuted, for opposing the circumcision of the christians. For this was the great offence, which stuck with the jews, even after their conversion, ver. 11.

By wishing those cut off, that trouble them with this doctrine, ver. 12.

This will, I doubt not, by whoever weighs it, be found a very skilful management of the argumentative part of this epistle, which ends here. For, though he begins with sapping the foundation, on which the judaizing seducers seemed to have laid their main stress, viz. the report of his preaching circumcision; yet he reserves the direct and open confutation of it to the end, and so leaves it with them, that it may have the more forcible and lasting impression on their minds.

TEXT.

² Behold; I, Paul, say unto you, that if ye be circumcised, Christ shall profit you nothing.

³ For I testify, again, to every man that is circumcised, that he is a debtor to do the whole law.

⁴ Christ is become of no effect unto you; whosoever of you are justified by the law, ye are fallen from grace.

⁵ For we, through the Spirit, wait for the hope of righteousness by faith.

⁶ For in Jesus Christ, neither circumcision availeth any thing, nor uncircumcision; but faith, which worketh by love.

⁷ Ye did run well: who did hinder you, that ye should not obey the truth?

⁸ This persuasion cometh not of him that calleth you.

⁹ A little leaven leaveneth the whole lump.

¹⁰ I have confidence in you, through the Lord, that you will be none otherwise minded: but he that troubleth you, shall bear his judgment, whosoever he be.

¹¹ And I, brethren, if I yet preach circumcision, why do I yet suffer persecution? then is the offence of the cross ceased.

¹² I would they were even cut off, which trouble you.

¹³ For, brethren, ye have been called unto liberty.

PARAPHRASE.

² Take notice that I, Paul, who am falsely reported to preach up circumcision in other places, say unto you, that if you are circumcised, Christ shall be of no advantage³ to you. For I repeat here again, what I have always preached, and solemnly testify to every one, who yields to be circumcised, in compliance with those who say, That now, under the gospel, he cannot be saved without it, that he is under an obligation to the whole law, and bound to observe and perform⁴ every tittle of it. Christ is of no use to you, who seek justification by the law: whosoever do so, be ye what ye will, ye are fallen from the covenant of⁵ grace. But I, and those, who with me are true christians, we, who follow the truth of the gospel, and the doctrine of the Spirit of God, have no other⁶ hope of justification, but by faith in Christ. For in the state of the gospel, under Jesus, the Messiah, it is neither circumcision nor uncircumcision, that is of any moment; all that is available is faith alone,⁷ working by love. When you first entered into the profession of the gospel, you were in a good way, and went on well: who has put a stop to you, and hindereth you, that you keep no longer to the⁸ truth of the christian doctrine? This persuasion, that it is necessary for you to be circumcised, cometh not from him, by whose preaching you were called⁹ to the profession of the gospel. Remember that a little leaven leaveneth the whole lump; the influence of one man entertained among you, may¹⁰ mislead you all. I have confidence in you, that, by the help of the Lord, you will be all of this same mind with me; and consequently he that troubles you, shall fall under the censure he deserves for it,¹¹ whoever he be. But as for me, brethren, if I, at last, am become a preacher of circumcision, why am I yet persecuted? If it be so, that the gentile converts are to be circumcised, and so subjected to the law, the great offence of the gospel, in relying solely on a crucified Saviour for salvation, is removed.¹² But I am of another mind, and wish that they may be cut off, who trouble you about this¹³ matter, and they shall be cut off. For, brethren, ye have been called by me unto liberty.

SECT. XI.

CHAPTER V. 13 — 26.

CONTENTS.

From the mention of liberty, which he tells them they are called to, under the gospel, he takes a rise to caution them in the use of it, and so exhorts them to a spiritual, or true christian life, showing the difference and contrariety between that and a carnal life, or a life after the flesh.

TEXT.

Only use not liberty for an occasion to the flesh, but by love serve one another.

¹⁴ For all the law is fulfilled in one word: even in this; thou shalt love thy neighbour as thyself.

¹⁵ But if ye bite and devour one another, take heed that ye be not consumed one of another.

¹⁶ This I say then, Walk in the spirit, and ye shall not fulfil the lust of the flesh.

¹⁷ For the flesh lusteth against the spirit, and the spirit against the flesh: and these are contrary the one to the other; so that ye cannot do the things that ye would.

¹⁸ But if ye be led by the spirit, ye are not under the law.

¹⁹ Now the works of the flesh are manifest, which are these: adultery, fornication, uncleanness, lasciviousness,

²⁰ Idolatry, witchcraft, hatred, variance, emulations, wrath, strife, seditions, heresies,

²¹ Envyings, murders, drunkenness, revellings, and such-like: of the which I tell you before, as I have also told you in time past, that they, which do such things, shall not inherit the kingdom of God.

²² But the fruit of the Spirit is love, joy, peace, long-suffering, gentleness, goodness, faith,

²³ Meekness, temperance: against such there is no law.

²⁴ And they that are Christ's, have crucified the flesh, with the affections and lusts.

²⁵ If we live in the Spirit, let us also walk in the Spirit.

²⁶ Let us not be desirous of vain-glory, provoking one another, envying one another.

PARAPHRASE.

Though the gospel, to which you are called, be a state of liberty from the bondage of the law, yet pray take great care you do not mistake that liberty, nor think it affords you an opportunity, in the abuse of it, to satisfy the lust of the flesh, but serve one¹⁴ another in love. For the whole law, concerning our duty to others, is fulfilled in observing this one precept; “Thou shalt love thy neighbour as thyself.”¹⁵ But, if you bite and tear one another, take heed that you be not destroyed and consumed¹⁶ by one another. This I say to you, conduct yourselves by the light that is in your minds, and do not give yourselves up to the lusts of the flesh, to¹⁷ obey them, in what they put upon you. For the inclinations and desires of the flesh, are contrary to those of the spirit: and the dictates and inclinations of the spirit are contrary to those of the flesh; so that, under these contrary impulses, you do not do¹⁸ the things that you purpose to yourselves. But if you give yourselves up to the conduct of the gospel,¹⁹ by faith in Christ, ye are not under the law. Now the works of the flesh, as is manifest, are these: adultery, fornication, uncleanness, lasciviousness,²⁰ Idolatry, witchcraft, enmities, quarrels, emulations,²¹ animosities, strife, seditions, sects, Envyings, murders, drunkenness, revellings, and such-like: concerning which I forewarn you now, as heretofore I have done, that they, who do such things, shall not inherit²² the kingdom of God. But, on the other side, the fruit of the Spirit is love, joy, peace, long-suffering, sweetness of disposition, beneficence, faithfulness,²³ Meekness, temperance: against these and²⁴ the like there is no law. Now they who belong to Christ, and are his members, have crucified the²⁵ flesh, with the affections and lusts thereof. If our life then (our flesh having been crucified) be, as we profess, by the Spirit, whereby we are alive from that state of sin, we were dead in before, let us regulate our lives and actions by the light and dictates²⁶ of the Spirit. Let us not be led, by an itch of vain-glory, to provoke one another, or to envy one another.

SECT. XII.

CHAPTER VI. 1 — 5.

CONTENTS.

He here exhorts the stronger to gentleness and meekness towards the weak.

TEXT.

¹ Brethren, if a man be overtaken in a fault, ye which are spiritual, restore such an one in the spirit of meekness; considering thyself, lest thou also be tempted.

² Bear ye one another's burdens, and so fulfil the law of Christ.

³ For if a man think himself to be something, when he is nothing, he deceiveth himself.

⁴ But let every man prove his own work, and then shall he have rejoicing in himself alone, and not in another.

⁵ For every man shall bear his own burden.

PARAPHRASE.

¹ Brethren, if a man, by frailty or surprise, fall into a fault, do you, who are eminent in the church for knowledge, practice, and gifts, raise him up again, and set him right, with gentleness and meekness, considering that you yourselves are not out of the reach² of temptations. Bear with one another's infirmities, and help to support each other under your burdens,³ and so fulfil the law of Christ. For if any one be conceited of himself, as if he were something, a man of weight, fit to prescribe to others, when indeed he is⁴ not, he deceiveth himself. But let him take care that what he himself doth be right, and such as will bear the test, and then he will have matter of glorying⁵ in himself, and not in another. For every one shall be accountable only for his own actions.

SECT. XIII.

CHAPTER VI. 6 — 10.

CONTENTS.

St. Paul having laid some restraint upon the authority and forwardness of the teachers, and leading men amongst them, who were, as it seems, more ready to impose on the galatians what they should not, than to help them forward in the practice of gospel-obedience; he here takes care of them, in respect of their maintenance, and exhorts the galatians to liberality towards them, and, in general, towards all men, especially christians.

TEXT.

⁶ Let him, that is taught in the word, communicate unto him that teacheth in all good things.

⁷ Be not deceived; God is not mocked; for whatsoever a man soweth, that shall he also reap.

⁸ For he that soweth to his flesh, shall of the flesh reap corruption; but he that soweth to the Spirit, shall of the Spirit reap life everlasting.

⁹ And let us not be weary in well-doing; for in due season we shall reap, if we faint not.

¹⁰ As we have, therefore, opportunity, let us do good unto all men, especially unto them who are of the household of faith.

PARAPHRASE.

⁶ Let him, that is taught the doctrine of the gospel, freely communicate the good things of this world to⁷ him that teaches him. Be not deceived, God will not be mocked; for, as a man soweth, so also shall⁸ he reap. He, that lays out the stock of good things he has, only for the satisfaction of his own bodily necessities, conveniences, or pleasures, shall, at the harvest, find the fruit and product of such husbandry to be corruption and perishing. But he, that lays out his worldly substance, according to the rules dictated by the Spirit of God in the gospel, shall, of⁹ the Spirit, reap life everlasting. In doing thus, what is good and right, let us not wax weary; for in due season, when the time of harvest comes, we shall reap, if we continue on to do good, and flag not.¹⁰ Therefore, as we have opportunities, let us do good unto all men, especially to those who profess faith in Jesus Christ, i. e. the christian religion.

SECT. XIV.

CHAPTER VI. 11 — 18.

CONTENTS.

One may see what lay upon St. Paul's mind, in writing to the galatians, by what he inculcates to them here, even after he had finished his letter. The like we have in the last chapter to the romans. He here winds up all with admonitions to the galatians, of a different end and aim they had, to get the galatians circumcised, from what he had in preaching the gospel.

TEXT.

¹¹ You see how large a letter I have written unto you, with mine own hand,

¹² As many as desire to make a fair show in the flesh, they constrain you to be circumcised; only lest they should suffer persecution for the cross of Christ.

¹³ For neither they themselves, who are circumcised, keep the law; but desire to have you circumcised, that they may glory in your flesh.

¹⁴ But God forbid that I should glory, save in the cross of our Lord Jesus Christ, by whom the world is crucified unto me, and I unto the world.

¹⁵ For, in Christ Jesus, neither circumcision availeth any thing, nor uncircumcision, but a new creature.

¹⁶ And as many as walk according to this rule, peace be on them, and mercy, and upon the Israel of God.

¹⁷ From henceforth let no man trouble me; for I bear in my body the marks of the Lord Jesus.

¹⁸ Brethren, the grace of our Lord Jesus Christ be with your spirit. Amen.
Unto the galatians, written from Rome.

PARAPHRASE.

¹¹ You see how long a letter I have writ to you with¹² my own hand. They, who are willing to carry it so fairly in the ritual part of the law, and to make ostentation of their compliance therein, constrain you to be circumcised, only to avoid persecution, for owning their dependence for salvation solely on a crucified Messiah, and not on the observance of the law.¹³ For even they themselves, who are circumcised, do not keep the law. But they will have you to be circumcised, that this mark in your flesh may afford them matter of glorying, and of recommending themselves¹⁴ to the good opinion of the jews. But as for me, whatever may be said of me, God forbid that I should glory in any thing, but in having Jesus Christ, who was crucified, for my sole Lord and Master, whom I am to obey and depend on; which I so entirely do, without regard to any thing else, that I am wholly dead to the world, and the world dead to me, and it has no more influence on me, than¹⁵ if it were not. For, as to the obtaining a share in the kingdom of Jesus Christ, and the privileges and advantages of it, neither circumcision nor uncircumcision, such outward differences in the flesh, avail any thing, but

the new creation, wherein by a thorough change a man is disposed to righteousness, and¹⁶ true holiness, in good works. And on all those, who walk by this rule, viz. that it is the new creation alone, and not circumcision, that availeth under the gospel, peace and mercy shall be on them, they being that Israel, which are truly the people of God.¹⁷ From henceforth, let no man give me trouble by questions, or doubt whether I preach circumcision or no. It is true, I am circumcised. But yet the marks I now bear in my body, are the marks of Jesus Christ, that I am his. The marks of the stripes, which I have received from the jews, and which I still bear in my body for preaching Jesus Christ, are¹⁸ an evidence that I am not for circumcision. “Brethren, the favour of our Lord Jesus Christ be with your spirit.” Amen.

**A PARAPHRASE AND NOTES ON THE FIRST
EPISTLE OF ST. PAUL TO THE
CORINTHIANS.**

THE FIRST EPISTLE OF ST. PAUL TO THE CORINTHIANS; WRIT IN THE YEAR OF OUR LORD 57, OF NERO III.

SYNOPSIS.

Saint Paul's first coming to Corinth was anno Christi 52, where he first applied himself to the synagogue, Acts xviii. 4. But finding them obstinate in their opposition to the gospel, he turned to the gentiles, ver. 6, out of whom this church at Corinth seems chiefly to be gathered, as appears, Acts xviii. and 1 Cor. xii. 2.

His stay here was about two years, as appears from Acts xviii. 11, 18, compared: in which time it may be concluded he made many converts; for he was not idle there, nor did he use to stay long in a place, where he was not encouraged by the success of his ministry. Besides what his so long abode in this one city, and his indefatigable labour every where, might induce one to presume, of the number of converts he made in that city; the scripture itself, Acts xviii. 10, gives sufficient evidence of a numerous church gathered there.

Corinth itself was a rich merchant-town, the inhabitants greeks, a people of quick parts, and inquisitive, 1 Cor. i. 22, but naturally vain and conceited of themselves.

These things considered may help us, in some measure, the better to understand St. Paul's epistles to this church, which seems to be in greater disorder, than any other of the churches which he writ to.

This epistle was writ to the corinthians, anno Christi 57, between two and three years after St. Paul had left them. In this interval, there was got in amongst them a new instructor, a jew by nation, who had raised a faction against St. Paul. With this party, whereof he was the leader, this false apostle had gained great authority, so that they admired and gloried in him, with an apparent disesteem and diminishing of St. Paul.

Why I suppose the opposition to be made to St. Paul, in this church, by one party, under one leader, I shall give the reasons, that make it probable to me, as they come in my way, going through these two epistles; which I shall leave to the reader to judge, without positively determining on either side;

and therefore shall, as it happens, speak of these opposers of St. Paul, sometimes in the singular, and sometimes in the plural number.

This at least is evident, that the main design of St. Paul, in this epistle, is to support his own authority, dignity, and credit, with that part of the church which stuck to him; to vindicate himself from the aspersions and calumnies of the opposite party; to lessen the credit of the chief and leading men in it, by intimating their miscarriages, and showing their no cause of glorying, or being gloried in: that so withdrawing their party from the admiration and esteem of those their leaders, he might break the faction; and putting an end to the division, might re-unite them with the uncorrupted part of the church, that they might all unanimously submit to the authority of his divine mission, and with one accord receive and keep the doctrine and directions he had delivered to them.

This is the whole subject from chap. i. 10, to the end of chap. vi. In the remaining part of this epistle, he answers some questions they had proposed to him, and resolves some doubts; not without a mixture, on all occasions, of reflections on his opposers, and of other things, that might tend to the breaking of their faction.

SECT. I.

CHAPTER I. 1 — 9.

TEXT.

¹ Paul, called to be an apostle of Jesus Christ through the will of God, and Sosthenes our brother:

² Unto the church of God, which is at Corinth, to them that are sanctified in Christ Jesus, called to be saints, with all that in every place call upon the name of Jesus Christ, our Lord, both theirs and ours.

³ Grace be unto you, and peace from God our Father, and from the Lord Jesus Christ.

⁴ I thank my God always, on your behalf, for the grace of God, which is given you, by Jesus Christ;

⁵ That, in every thing, ye are enriched by him, in all utterance, and in all knowledge:

⁶ Even as the testimony of Christ was confirmed in you.

⁷ So that ye come behind in no gift, waiting for the coming of our Lord Jesus Christ:

⁸ Who also shall confirm you unto the end, that ye may be blameless in the day of our Lord Jesus Christ.

⁹ God is faithful, by whom ye were called unto the fellowship of his Son, Jesus Christ, our Lord.

PARAPHRASE.

¹ Paul an apostle of Jesus Christ, called to be so by the will of God, and Sosthenes our brother in the² christian faith; To the church of God, which is at Corinth, to them that are separated from the rest of the world, by faith in Jesus Christ, called to be saints, with all, that are every-where called by the name³ of Jesus Christ, their Lord, and ours. Favour and peace be unto you, from God our Father, and from ⁴ the Lord Jesus Christ. I thank God always, on your behalf, for the favour of God, which is bestowed on⁵ you, through Jesus Christ; So that, by him, you are enriched with all knowledge and utterance, and⁶ all extraordinary gift: As at first, by those miraculous gifts, the gospel of Christ was confirmed⁷ among you. So that in no spiritual gift are any of you short, or deficient, waiting for the⁸ coming of our Lord Jesus Christ; Who shall also confirm you unto the end, that in the day of the Lord⁹ Jesus Christ, there may be no charge against you. For God, who has called you unto the fellowship of his Son Jesus Christ, our Lord, may be relied on for what is to be done on his side.

SECT. II.

CHAPTER I. 10. — VI. 20.

CONTENTS.

There were great disorders in the church of Corinth, caused chiefly by a faction raised there, against St. Paul: the partisans of the faction mightily cried up, and gloried in their leaders, who did all they could to disparage St. Paul, and lessen him in the esteem of the corinthians. St. Paul makes it his business, in this section, to take off the corinthians from siding with, and glorying in, this pretended apostle, whose followers and scholars they professed themselves to be; and to reduce them into one body, as the

scholars of Christ, united in a belief of the gospel, which he had preached to them, and in an obedience to it, without any such distinction of masters, or leaders, from whom they denominated themselves. He also, here and there, intermixes a justification of himself, against the aspersions which were cast upon him, by his opposers. How much St. Paul was set against their leaders, may be seen, 2 Cor. xi. 13 — 15.

The arguments used by St. Paul, to break the opposite faction, and put an end to all divisions amongst them, being various, we shall take notice of them, under their several heads, as they come in the order of this discourse.

SECT. II. N. 1.

CHAPTER I. 10 — 16.

CONTENTS.

Saint Paul's first argument is, That, in christianity, they all had but one master, viz. Christ; and therefore were not to fall into parties, denominated from distinct teachers, as they did in their schools of philosophy.

TEXT.

¹⁰ Now I beseech you, brethren, by the name of our Lord Jesus Christ, that ye all speak the same thing, and that there be no divisions among you; but that ye be perfectly joined together, in the same mind, and in the same judgment.

¹¹ For it hath been declared unto me, of you, my brethren, by them which are of the house of Chloe, that there are contentions among you.

¹² Now, this I say, that every one of you saith, "I am of Paul, and I of Apollos, and I of Cephas, and I of Christ."

¹³ Is Christ divided? was Paul crucified for you? or were ye baptized in the name of Paul?

¹⁴ I thank God that I baptized none of you, but Crispas and Gaius:

¹⁵ Lest any should say, that I had baptized in my own name.

¹⁶ And I baptized also the houshold of Stephanus: besides, I know not whether I baptized any other.

PARAPHRASE.

¹⁰ Now I beseech you, brethren, by the name of our Lord Jesus Christ, that ye hold the same doctrine, and that there be no divisions among you; but that ye be framed together into one intire body, with one¹¹ mind, and one affection. For I understand, my brethren, by some of the house of Chloe, that there¹² are quarrels and dissensions amongst you; So that ye are fallen into parties, ranking yourselves under different leaders or masters, one saying, “I am of Paul;” another, “I of Apollos, I of Cephas, I of¹³ Christ.” Is Christ, who is our only Head and Master, divided? Was Paul crucified for you? Or¹⁴ were you baptized into the name of Paul? I thank God I baptized none of you, but Crispus and Gaius;¹⁵ Lest any one should say, I had baptized into my¹⁶ own name. I baptized also the household of Stephanas; farther, I know not whether I baptized any other.

SECT. II. N. 2.

CHAPTER 1. 17 — 31.

CONTENTS.

The next argument of St. Paul, to stop their followers from glorying in these false apostles, is, that neither any advantage of extraction, nor skill in the learning of the jews, nor in the philosophy and eloquence of the greeks, was that, for which God chose men to be preachers of the gospel. Those, whom he made choice of, for overturning the mighty and the learned, were mean, plain, illiterate men.

TEXT.

¹⁷ For Christ sent me not to baptize, but to preach the gospel: not with wisdom of words, lest the cross of Christ should be made of none effect.

¹⁸ For the preaching of the cross is to them that perish foolishness: but unto us, which are saved, it is the power of God.

¹⁹ For it is written, I will destroy the wisdom of the wise, and will bring to nothing the understanding of the prudent.

²⁰ Where is the wise? where is the scribe? where is the disputer of this world? hath not God made foolish the wisdom of this world?

²¹ For after that, in the wisdom of God, the world, by wisdom, knew not God, it pleased God, by the foolishness of preaching, to save them that believe.

²² For the jews require a sign, and the greeks seek after wisdom:

²³ But we preach Christ crucified, unto the jews a stumbling block, and unto the greeks foolishness.

²⁴ But unto them which are called, both jews and greeks, Christ, the power of God, and the wisdom of God:

²⁵ Because the foolishness of God is wiser than men; and the weakness of God is stronger than men.

²⁶ For ye see your calling, brethren, how that not many wise men after the flesh, not many mighty, not many noble, are called.

²⁷ But God hath chosen the foolish things of the world, to confound the wise; and God hath chosen the weak things of the world, to confound the things which are mighty:

²⁸ And base things of the world, and things which are despised, hath God chosen, yea, and things which are not, to bring to nought things that are:

²⁹ That no flesh should glory in his presence.

³⁰ But of him are ye, in Christ Jesus, who, of God, is made unto us wisdom, and righteousness, and sanctification, and redemption:

³¹ That, according as it is written, "He that glorieth, let him glory in the Lord."

PARAPHRASE.

¹⁷ For Christ sent me not to baptize, but to preach the gospel; not with learned and eloquent harangues, lest thereby the virtue and efficacy of Christ's sufferings and death should be overlooked and neglected, if the stress of our persuasion should be laid on the learning¹⁸ and quaintness of our preaching. For the plain insisting on the death of a crucified Saviour is, by those, who perish, received as a foolish, contemptible thing; though to us, who are saved, it be the power¹⁹ of God, Conformable to what is prophesied by Isaiah: "I will destroy the wisdom of the wise, and I will bring to nothing the understanding of the²⁰ prudent." Where is the philosopher, skilled in the wisdom of the greek? Where the scribes, studied in the learning of the jews? Where the professor of human arts and sciences? Hath not God rendered all the learning and wisdom of this world foolish, and useless for the discovery of the truths of²¹ the gospel? For since the world, by their natural parts, and improvements in what, with them, passed for wisdom, acknowledged not the one, only, true God, though he

had manifested himself to them, in the wise contrivance and admirable frame of the visible works of the creation; it pleased God, by the plain, and (as the world esteems it) foolish doctrine of the gospel, to save those who receive and believe²² it. Since both the jews demand extraordinary signs and miracles, and the greeks seek wisdom:²³ But I have nothing else to preach to them, but Christ crucified, a doctrine offensive to the hopes and expectations of the jews; and foolish to the acute men²⁴ of learning, the greeks: But yet it is to these, both jews and greeks, (when they are converted) Christ, the power of God, and Christ, the wisdom of God:²⁵ Because that, which seems foolishness in those, who came from God, surpasses the wisdom of man; and that, which seems weakness in those sent by God,²⁶ surpasses the power of men. For reflect upon your selves, brethren, and you may observe, that there are not many of the wise and learned men, not many men of power, or of birth, among you, that²⁷ are called. But God hath chosen the foolish men, in the account of the world, to confound the wise; and God hath chosen the weak men of the world,²⁸ to confound the mighty: The mean men of the world, and contemptible, has God chosen, and those that are of no account, are nothing, to displace²⁹ those that are: That so there might be no room, or pretence, for any one to glory in his presence.³⁰ Natural, human abilities, parts or wisdom, could never have reached this way to happiness: it is to his wisdom alone, that ye owe the contrivance of it; to his revealing of it, that ye owe the knowledge of it; and it is from him alone, that you are in Christ Jesus, whom God has made to us, Christians, wisdom, and righteousness, and sanctification, and redemption, which is all the dignity and preeminence, all that is of any value, amongst us Christians:³¹ That as it is written, He that glorieth, should glory only in the Lord.

SECT. II. N. 3.

CHAPTER II. 1 — 5.

CONTENTS.

Farther to keep them from glorying in their leaders, he tells them, that as the preachers of the gospel, of God's choosing, were mean and illiterate men, so the gospel was not to be propagated, nor men to be established in the faith, by human learning and eloquence, but by the evidence it had, from the

revelation contained in the old Testament, and from the power of God accompanying and confirming it with miracles.

TEXT.

¹ And I, brethren, when I came to you, came not with excellency of speech, or of wisdom, declaring unto you the testimony of God.

² For I determined not to know any thing among you, save Jesus Christ, and him crucified.

³ And I was with you in weakness, and in fear, and in much trembling.

⁴ And my speech, and my preaching, was not with enticing words of man's wisdom, but in demonstration of the Spirit, and of power:

⁵ That your faith should not stand in the wisdom of men, but in the power of God.

PARAPHRASE.

¹ And I, brethren, when I came and preached the gospel to you, I did not endeavour to set it off with any ornaments of rhetoric, or the mixture of human learning, or philosophy; but plainly declared it to you, as a doctrine coming from God, revealed and attested ² by him. For I resolved to own, or show, no other knowledge among you, but the knowledge, or doctrine³ of Jesus Christ, and of him crucified. All my carriage among you had nothing in it, but the appearance of weakness and humility, and fear of offending⁴ you. Neither did I in my discourses, or preaching, make use of any human art of persuasion, to inveigle you. But the doctrine of the gospel, which I proposed, I confirmed and enforced by what the Spirit had revealed and demonstrated of it, in the Old Testament, and by the power of God, accompanying⁵ it with miraculous operations: That your faith might have its foundation, not in the wisdom and endowments of men, but in the power of God.

SECT. II. N. 4.

CHAPTER II. 6 — 16.

CONTENTS.

The next argument the apostle uses to show them, that they had no reason to glory in their teachers, is, that the knowledge of the gospel was not attainable by our natural parts, however they were improved by arts and philosophy, but was wholly owing to revelation.

TEXT.

⁶ Howbeit we speak wisdom amongst them that are perfect: yet not the wisdom of this world, nor of the princes of this world, that come to nought.

⁷ But we speak the wisdom of God in a mystery, even the hidden wisdom, which God ordained, before the world, unto our glory.

⁸ Which none of the princes of this world knew; for had they known it, they would not have crucified the Lord of glory.

⁹ But, as it is written, “Eye hath not seen, nor ear heard, neither have entered into the heart of man, the things which God hath prepared for them that love him.”

¹⁰ But God hath revealed them unto us, by his Spirit; for the Spirit searcheth all things: yea, the deep things of God.

¹¹ For what man knoweth the things of a man, save the spirit of a man, which is in him? even so, the things of God knoweth no man, but the Spirit of God.

¹² Now we have received, not the spirit of the world, but the Spirit which is of God; that we might know the things, that are freely given to us of God.

¹³ Which things also we speak, not in the words, which man’s wisdom teacheth, but which the Holy Ghost teacheth; comparing spiritual things with spiritual.

¹⁴ But the natural man receiveth not the things of the Spirit of God: for they are foolishness unto him; neither can he know them; because they are spiritually discerned.

¹⁵ But he, that is spiritual, judgeth all things, yet he himself is judged of no man.

¹⁶ For who hath known the mind of the Lord, that he may instruct him? but we have the mind of Christ.

PARAPHRASE.

⁶ Howbeit, that which we preach is wisdom, and known to be so, among those who are thoroughly instructed in the christian religion, and take it

upon its true principles: but not the wisdom of this world, nor of the princes, or great men of this world, who will⁷ quickly be brought to nought. But we speak the wisdom of God, contained in the mysterious and the obscure prophecies of the Old Testament, which has been therein concealed and hid: though it be what God predetermined, in his own purpose, before the jewish constitution, to the glory of ⁸ us, who understand, receive, and preach it: Which none of the rulers among the jews understood; for, if they had, they would not have crucified the Lord Christ, who has in his hands the disposing of all⁹ true glory. But they knew it not, as it is written, “Eye hath not seen, nor ear heard, nor have the things, that God hath prepared for them that love him, entered into the heart or thoughts of¹⁰ man.” But these things, which are not discoverable by man’s natural faculties and powers, God hath revealed to us, by his Spirit, which searcheth out all things, even the deep counsels of God, which are beyond the reach of our abilities to discover. ¹¹ For, as no man knoweth what is in the mind of another man, but only the spirit of the man himself that is in him: so, much less doth any man know, or can discover, the thoughts and counsels of¹² God, but only the Spirit of God. But we have received, not the spirit of the world, but the Spirit, which is of God, that we might know what things are in the purpose of God, out of his free bounty¹³ to bestow upon us. Which things we not only know, but declare also; not in the language and learning, taught by human eloquence and philosophy, but in the language and expressions, which the Holy Ghost teacheth, in the revelations contained in the holy scriptures, comparing one¹⁴ part of the revelation with another. But a man, who hath no other help but his own natural faculties, how much soever improved by human arts and sciences, cannot receive the truths of the gospel, which are made known by another principle only, viz. the Spirit of God revealing them; and therefore seem foolish and absurd to such a man: nor can he, by the bare use of his natural faculties, and the principles of human reason, ever come to the knowledge of them; because it is, by the studying of divine revelation alone, that we can attain the¹⁵ knowledge of them. But he that lays his foundation in divine revelation, can judge what is, and what is not, the doctrine of the gospel, and of salvation; he can judge who is, and who is not, a good minister and preacher of the word of God: but others, who are bare animal men, that go not beyond the discoveries made by the natural faculties of human understanding, without the help and study of revelation, cannot judge of such an one, whether¹⁶ he preacheth

right and well, or not. For who, by the bare use of his natural parts, can come to know the mind of the Lord, in the design of the gospel, so as to be able to instruct him [the spiritual man] in it? But I who, renouncing all human learning and knowledge in the case, take all, that I preach, from divine revelation alone, I am sure, that therein I have the mind of Christ; and therefore, there is no reason why any of you should prefer other teachers to me; glory in them who oppose and villify me; and count it an honour to go for their scholars, and be of their party.

SECT. II. N. 5.

CHAPTER III. I — IV. 20.

CONTENTS.

The next matter of boasting, which the faction made use of, to give the pre-eminence and preference to their leader, above St. Paul, seems to have been this, that their new teacher had led them farther, and given them a deeper insight into the mysteries of the gospel, than St. Paul had done. To take away their glorying on this account, St. Paul tells them, that they were carnal, and not capable of those more advanced truths, or any thing, beyond the first principles of christianity, which he had taught them; and, though another had come and watered what he had planted, yet neither planter, nor waterer, could assume to himself any glory from thence, because it was God alone, that gave the increase. But, whatever new doctrines they might pretend to receive, from their magnified, new apostle, yet no man could lay any other foundation, in a christian church, but what he St. Paul, had laid, viz. that “Jesus is the Christ;” and, therefore, there was no reason to glory in their teachers: because, upon this foundation, they, possibly, might build false, or unsound doctrines, for which they should receive no thanks from God; though, continuing in the faith, they might be saved. Some of the particular hay and stubble, which this leader brought into the church at Corinth, he seems particularly to point at, chap. iii. 16, 17, viz. their defiling the church, by retaining, and, as it may be supposed, patronizing the fornicator, who should have been turned out, chap. v. 7 — 13. He further adds, that these extolled heads of their party were, at best, but men; and none of the church ought to glory in men; for even Paul, and Apollos, and

Peter, and all the other preachers of the gospel, were for the use and benefit, and glory of the church, as the church was for the glory of Christ.

Moreover, he shows them, that they ought not to be puffed up, upon the account of these their new teachers, to the undervaluing of him, though it should be true, that they had learned more from them, than from himself, for these reasons:

Because all the preachers of the gospel are but stewards of the mysteries of God; and whether they have been faithful in their stewardship, cannot be now known: and, therefore, they ought not to be some of them magnified and extolled, and others depressed and blamed, by their hearers here, until Christ their Lord come; and then he, knowing how they have behaved themselves in their ministry, will give them their due praises. Besides, these stewards have nothing, but what they have received; and, therefore, no glory belongs to them for it.

Because, if these leaders were (as was pretended) apostles, glory, and honour, and outward affluence here, was not their portion, the apostles being destined to want, contempt, and persecution.

They ought not to be honoured, followed, and gloried in, as apostles, because they had not the power of miracles, which he intended shortly to come, and show they had not.

TEXT.

¹ And I, brethren, could not speak unto you as unto spiritual, but as unto carnal, even as unto babes in Christ.

² I have fed you with milk, and not with meat: for hitherto ye were not able to bear it, neither yet now are ye able.

³ For ye are yet carnal: for whereas there is among you envying, and strife, and divisions, are ye not carnal, and walk as men?

⁴ For while one saith, I am of Paul, and another, I am of Apollos, are ye not carnal?

⁵ Who then is Paul, and who is Apollos, but ministers, by whom ye believed, even as the Lord gave to every man?

⁶ I have planted, Apollos watered; but God gave the increase.

⁷ So then, neither is he that planteth any thing, neither he that watereth; but God, that giveth the increase.

⁸ Now he that planteth, and he that watereth, are one; and every man shall receive his own reward, according to his own labour.

⁹ For we are labourers together with God: ye are God's husbandry, ye are God's building.

¹⁰ According to the grace of God, which is given unto me, as a wise master-builder, I have laid the foundation, and another buildeth thereon. But let every man take heed how he buildeth thereupon.

¹¹ For other foundation can no man lay, than that is laid, which is Jesus Christ.

¹² Now, if any man build upon this foundation gold, silver, precious stones, wood, hay, stubble;

¹³ Every man's work shall be made manifest. For the day shall declare it, because it shall be revealed by fire; and the fire shall try every man's work, of what sort it is.

¹⁴ If any man's work abide, which he hath built thereupon, he shall receive a reward.

¹⁵ If any man's work shall be burnt, he shall suffer loss: but he himself shall be saved; yet so, as by fire.

¹⁶ Know ye not that ye are the temple of God, and that the Spirit of God dwelleth in you?

¹⁷ If any man defile the temple of God, him shall God destroy: for the temple of God is holy, which temple ye are.

¹⁸ Let no man deceive himself: if any man among you seemeth to be wise in this world, let him become a fool, that he may be wise.

¹⁹ For the wisdom of this world is foolishness with God: for it is written, He taketh the wise in their own craftiness.

²⁰ And again, The Lord knoweth the thoughts of the wise, that they are vain.

²¹ Therefore let no man glory in men: for all things are yours:

²² Whether Paul, or Apollos, or Cephas, or the world, or life, or death, or things present, or things to come: all are yours:

²³ And ye are Christ's: and Christ is God's.

IV. 1 Let a man so account of us, as of the ministers of Christ, and stewards of the mysteries of God.

² Moreover, it is required in stewards, that a man be found faithful.

³ But with me it is a very small thing, that I should be judged of you, or of man's judgment: yea, I judge not mine ownself.

⁴ For I know nothing by myself, yet am I not hereby justified; but he that judgeth me is the Lord.

⁵ Therefore judge nothing before the time, until the Lord come, who both will bring to light the hidden things of darkness, and will make manifest the counsels of the hearts: and then shall every man have praise of God.

⁶ And these things, brethren, I have in a figure transferred to myself, and to Apollos, for your sakes; that ye might learn in us, not to think of men above that which is written, that no one of you be puffed up, for one against another.

⁷ For who maketh thee to differ from another? and what hast thou that thou didst not receive? Now, if thou didst receive it, why dost thou glory, as if thou hadst not received it?

⁸ Now ye are full, now ye are rich, ye have reigned as kings without us: and I would to God ye did reign, that we also might reign with you.

⁹ For I think that God hath set forth us the apostles last, as it were, appointed to death. For we are made a spectacle unto the world, and to angels, and to men.

¹⁰ We are fools for Christ's sake, but ye are wise in Christ: we are weak, but ye are strong: ye are honourable, but we are despised.

¹¹ Even unto this present hour, we both hunger and thirst, and are naked, and are buffeted, and have no certain dwelling-place.

¹² And labour, working with our own hands: being reviled, we bless; being persecuted, we suffer it:

¹³ Being defamed, we intreat: we are made as the filth of the world, and are the off-scouring of all things unto this day.

¹⁴ I write not these things to shame you; but, as my beloved sons, I warn you.

¹⁵ For, though you have ten thousand instructors in Christ, yet have ye not many fathers: for, in Christ Jesus, I have begotten you, through the gospel.

¹⁶ Wherefore I beseech you, be ye followers of me.

¹⁷ For this cause have I sent unto you Timotheus, who is my beloved son, and faithful in the Lord, who shall bring you into remembrance of my ways, which be in Christ, as I teach every where in every church.

¹⁸ Now some are puffed up, as though I would not come to you.

¹⁹ But I will come to you shortly, if the Lord will, and will know, not the speech of them which are puffed up, but the power.

²⁰ For the kingdom of God is not in word, but in power.

PARAPHRASE.

¹ And I, brethren, found you so given up to pride and vain-glory, in affectation of learning and philosophical knowledge, that I could not speak to you as spiritual, i. e. as to men not wholly depending on philosophy, and the discoveries of natural reason; as to men, who had resigned themselves up, in matters of religion, to revelation, and the knowledge which comes only from the Spirit of God; but as to carnal, even as to babes, who yet retained a great many childish and wrong notions about it: this hindered me, that I could not go so far, as I desired, in the mysteries of the christian religion; but was fain to content myself with instructing you in the first principles, and more² obvious and easy doctrines of it. I could not apply myself to you, as to spiritual men, that could compare spiritual things with spiritual, one part of scripture with another, and thereby understand the truths revealed by the Spirit of God, discerning true from false doctrines, good and useful, from evil and vain opinions. A further discovery of the truths and mysteries of christianity, depending wholly on revelation, you were not able to bear, then; nor are you yet able³ to bear; Because you are carnal, full of envyings, and strife, and factions, upon the account of your knowledge, and the orthodoxy of your particular⁴ parties. For, whilst you say, one, "I am of Paul;" and another, "I am of Apollos," are ye not carnal, and manage yourselves in the conduct, both of your minds and actions, according to barely human principles, and not, as spiritual men, acknowledge all that information, and all those gifts, wherewith the ministers of Jesus Christ are furnished, from the propagation of the gospel, to come wholly from the Spirit of God. What, then, are any of the preachers of the gospel, that you should glory in them, and divide into parties, under their⁵ names? Who, for example, is Paul, or who Apollos? What are they else, but bare ministers, by whose ministry, according to those several abilities and gifts, which God has besowed upon each of them, ye have received the gospel? They are only servants, employed to bring unto you a religion, derived entirely from divine revelation, wherein human abilities, or wisdom, had nothing to do. The preachers of it are only instruments, by whom this doctrine is conveyed to you, which, whether you look on it in its original, it is not a thing of human invention or discovery; or whether you look upon the gifts of the teachers who instruct you in it, all is entirely from God alone, and affords you not the least ground to attribute any thing to

your⁶ teachers. For example I planted it amongst you, and Apollos watered it: but nothing can from thence be ascribed to either of us: there is no reason for your calling yourselves, some of Paul, and others of Apollos.⁷ For neither the planter, nor the waterer, have any power to make it take root, and grow in your hearts; they are as nothing, in that respect; the growth and⁸ success is owing to God alone. The planter and the waterer, on this account, are all one, neither of them to be magnified, or preferred, before the other; they are but instruments, concurring to the same end, and therefore ought not to be distinguished, and set in opposition one to another, or cried up, as more deserving⁹ one than another. We, the preachers of the gospel, are but labourers, employed by God, about that which is his work, and from him shall receive reward hereafter, every one according to his own labour; and not from men here, who are liable to make a wrong estimate of the labours of their teachers, preferring those, who do not labour together with God, who do not carry on the design, or work of God, in the gospel, or perhaps do not carry it on, equally with others, who are undervalued by them.¹⁰ Ye who are the church of God, are God's building, in which I, according to the skill and knowledge which God, of his free bounty, has been pleased to give me, and therefore ought not to be to me, or any other, matter of glorying, as a skilful architect, have laid a sure foundation, which is Jesus, the Messiah,¹¹ the sole and only foundation of christianity. Besides which, no man can lay any other. But, though no man, who pretends to be a preacher of the gospel, can build upon any other foundation, yet you ought not to cry up your new instructor (who has come and built upon the foundation, that I laid) for the doctrines, he builds thereon, as if there were no other minister¹² of the gospel but he. For it is possible a man may build, upon that true foundation, wood, hay, and stubble, things that will not bear the test, when¹³ the trial by fire, at the last day, shall come. At that day, every man's work shall be tried and discovered,¹⁴ of what sort it is. If what he hath taught be sound and good, and will stand the trial, as silver and gold, and precious stones abide in the fire, he¹⁵ shall be rewarded for his labour in the gospel. But, if he hath introduced false and unsound doctrines into christianity, he shall be like a man, whose building, being of wood, hay, and stubble, is consumed by the fire, all his pains in building is lost, and his works destroyed and gone, though he himself should escape¹⁶ and be saved. I told you, that ye are God's building; yea, more than that, ye are the temple of¹⁷ God, in which his Spirit dwelleth. If any man, by corrupt doctrine or

discipline, defileth the temple of God, he shall not be saved with loss, as by fire; but him will God destroy: for the temple of God is¹⁸ holy, which temple ye are. Let no man deceive himself, by his success in carrying his point: if any one seemeth to himself, or others, wise, in worldly wisdom, so as to pride himself in his parts and dexterity, in compassing his ends; let him renounce all his natural and acquired parts, all his knowledge and ability, that he may become truly wise, in embracing and owning no other knowledge, but the simplicity¹⁹ of the gospel. For all other wisdom, all the wisdom of the world, is foolishness with God: for it is written, “He taketh the wise in their own craftiness.”²⁰ And again, “The Lord knoweth the thoughts of²¹ the wise, that they are vain.” Therefore, let none of you glory in any of your teachers; for they are²² but men. For all your teachers, whether Paul, or Apollos, or Peter, even the apostles themselves, nay, all the world, and even the world to come, all things are yours, for your sake and use:

²³ As you are Christ’s, subjects of his kingdom, for his glory; and Christ, and his kingdom, for the glory of God. Therefore, if all your teachers, and so many other greater things, are for you, and for your sakes, you can have no reason to make it a glory to you, that you belong to this, or that, particular teacher amongst you: your true glory is, that you are Christ’s, and Christ and all his are God’s; and not, that you are this, or that man’s scholar or follower.

¹ As for me I pretend not to set up a school amongst you, and as a master to have my scholars denominated from me; no, let no man have higher thoughts of me, than as a minister of Christ, employed as his steward, to dispense the truths and doctrines of the gospel, which are the mysteries which God wrapped up, in types and obscure predictions, where they have lain hid, till by us, his apostles, he now reveals them.² Now that, which is principally required and regarded in a steward, is, that he be faithful in dispensing³ what is committed to his charge. But as for me, I value it not, if I am censured by some of you, or by any man, as not being a faithful steward: nay, as to⁴ this, I pass no judgment on myself. For though I can truly say, that I know nothing by myself, yet am I not hereby justified to you: but the Lord, whose steward I am, at the last day will pronounce sentence on my behaviour in my stewardship, and⁵ then you will know what to think of me. Then judge not either me, or others, before the time, until the Lord come, who will bring to light the dark and secret counsels of men’s

hearts, in preaching the gospel: and then shall every one have that praise, that estimate set upon him, by God himself, which he truly deserves. But praise ought not to be given them, before the time, by their hearers, who are ignorant,⁶ fallible men. On this occasion, I have named Apollos and myself, as the magnified and opposed heads of distinct factions amongst you; not that we are so, but out of respect to you, that I might offend nobody, by naming them; and that you might learn by us, of whom I have written, that we are but planters, waterers, and stewards, not to think of the ministers of the gospel, above what I have written to you of them, that you be not puffed up, each party, in the vain-glory of their own extolled leader, to the crying down and contempt of any other, who is well esteemed⁷ of by others. For what maketh one to differ from another? or what gifts of the Spirit, what knowledge of the gospel has any leader amongst you, which he received not, as intrusted to him of God, and not acquired by his own abilities? And if he received it as a steward, why does he glory in that, which is not⁸ his own? However, you are mightily satisfied with your present state; you now are full, you now are rich, and abound in every thing you desire; you have not need of me, but have reigned like princes without me; and I wish truly you did reign, that I might come and share in the protection and prosperity you enjoy,⁹ now you are in your kingdom. For I being made an apostle last of all, it seems to me as if I were brought last upon the stage, to be, in my sufferings and death, a spectacle to the world, and to angels,¹⁰ and to men. I am a fool for Christ's sake, but you manage your christian concerns with wisdom. I am weak, and in a suffering condition; you are strong and flourishing; you are honourable, but I am despised.¹¹ Even to this present hour, I both hunger and thirst, and want clothes, and am buffeted,¹² wandering without house or home; And maintain myself with the labour of my hands. Being reviled,¹³ I bless: being persecuted, I suffer patiently: Being defamed, I intreat: I am made as the filth of the world, and the off-scouring of all things unto this¹⁴ day. I write not these things to shame you; but as a father to warn you, my children, that ye be not the devoted zealous partisans and followers of such, whose carriage is not like this; under whom, however you may flatter yourselves, in truth, you do not reign: but, on the contrary, ye are domineered over, and fleeced by them. I warn you, I say, as¹⁵ your father: For how many teachers soever you may have, you can have but one father; it was I, that begot you in Christ, i. e. I converted you to¹⁶ christianity. Wherefore I beseech you, be ye followers¹⁷ of me. To this

purpose I have sent my beloved son Timothy to you, who may be relied upon: he shall put you in mind, and inform you, how I behave myself everywhere in the ministry of¹⁸ the gospel. Some, indeed, are puffed up, and make¹⁹ their boasts, as if I would not come to you. But I intend, God willing, to come shortly; and then will make trial, not of the rhetoric, or talking of those boasters, but of what miraculous power of the Holy²⁰ Ghost is in them. For the doctrine and prevalency of the gospel, the propagation and support of Christ's kingdom, by the conversion and establishment of believers, does not consist in talking, nor in the fluency of a glib tongue, and a fine discourse, but in the miraculous operations of the Holy Ghost.

SECT. II. N. 6.

CHAPTER IV. 21. — VI. 20.

CONTENTS.

Another means, which St. Paul makes use of, to bring off the corinthians from their false apostle, and to stop their veneration of him, and their glorying in him, is by representing to them the fault and disorder, which was committed in that church, by not judging and expelling the fornicator; which neglect, as may be guessed, was owing to that faction.

Because it is natural for a faction to support and protect an offender, that is of their side.

From the great fear St. Paul was in, whether they would obey him, in censuring the offender, as appears by the second epistle; which he could not fear, but from the opposite faction; they, who had preserved their respect to him, being sure to follow his orders.

From what he says, ch. iv. 16, after he had told them, ver. 6, of that chapter, that they should not be puffed up, for any other, against him, (for so the whole scope of his discourse here imports,) he beseeches them to be his followers, i. e. leaving their other guides, to follow him, in punishing the offender. For that we may conclude, from his immediately insisting on it so earnestly, he had in his view, when he beseeches them to be followers of him, and consequently that they might join with him, and take him for their leader, ch. v. 3, 4, he makes himself, by his spirit, as his proxy, the president of their assembly, to be convened for the punishing that criminal.

It may further be suspected, from what St. Paul says, ch. vi. 1, that the opposite party, to stop the church-censure, pretended that this was a matter to be judged by the civil magistrate: nay, possibly, from what is said, ver. 6, of that chapter, it may be gathered, that they had got it brought before the heathen judge; or at least from ver. 12, that they pleaded, that what he had done was lawful, and might be justified before the magistrate. For the judging spoken of, chap. vi. must be understood to relate to the same matter it does, chap. v. it being a continuation of the same discourse and argument: as is easy to be observed by any one, who will read it without regarding the divisions into chapters and verses, whereby ordinary people (not to say others) are often disturbed in reading the holy scripture, and hindered from observing the true sense and coherence of it. The whole 6th chapter is spent in prosecuting the business of the fornicator, begun in the 5th. That this is so, is evident from the latter end, as well as beginning of the 6th chapter. And therefore, what St. Paul says of lawful, chap. vi. 12, may, without any violence, be supposed to be said, in answer to some, who might have alleged in favour of the fornicator, that what he had done was lawful, and might be justified by the laws of the country, which he was under: why else should St. Paul subjoin so many arguments (wherewith he concludes this 6th chapter, and this subject) to prove the fornication, in question, to be by the law of the gospel, a great sin, and consequently fit for a christian church to censure, in one of its members, however it might pass for lawful, in the esteem, and by the laws of gentiles?

There is one objection, which, at first sight, seems to be a strong argument against this supposition; that the fornication, here spoken of, was held lawful by the gentiles of Corinth, and that, possibly, this very case had been brought before the magistrate there, and not condemned. The objection seems to lie in these words, ch. v. 1, "There is fornication heard of amongst you, and such fornication, as is not heard of amongst the gentiles, that one should have his father's wife." But yet I conceive the words, duly considered, have nothing in them contrary to my supposition.

To clear this, I take the liberty to say, it cannot be thought that this man had his father's wife; whilst, by the laws of the place, she actually was his father's wife; for then it had been *μοιχεία* and adultery, and so the apostle would have called it, which was a crime in Greece; nor could it be tolerated in any civil society, that one man should have the use of a woman, whilst she was another man's wife, i. e. another man's right and possession.

The case, therefore, here seems to be this; the woman had parted from her husband; which it is plain, from chap. vii. 10, 11, 13, at Corinth, women could do. For if, by the law of that country, a woman could not divorce herself from her husband, the apostle had there, in vain, bid her not leave her husband.

But, however known and allowed a practice it might be, amongst the corinthians, for a woman to part from her husband; yet this was the first time it was ever known that her husband's own son should marry her. This is that, which the apostle takes notice of in these words, "Such a fornication, as is not named amongst the gentiles." Such a fornication this was, so little known in practice amongst them, that it was not so much as heard, named, or spoken of, by any of them. But, whether they held it unlawful, that a woman, so separated, should marry her husband's son, when she was looked upon to be at liberty from her former husband, and free to marry whom she pleased; that the apostle says not. This, indeed, he declares, that, by the law of Christ, a woman's leaving her husband, and marrying another, is unlawful, ch. vii. 11, and this woman's marrying her husband's son, he declares, ch. v. 1, (the place before us,) to be fornication, a peculiar sort of fornication, whatever the corinthians, or their law, might determine in the case: and, therefore, a christian church might and ought to have censured it, within themselves, it being an offence against the rule of the gospel; which is the law of their society: and they might, and should, have expelled this fornicator, out of their society, for not submitting to the laws of it; notwithstanding that the civil laws of the country, and the judgment of the heathen magistrate, might acquit him. Suitably hereunto, it is very remarkable, that the arguments, that St. Paul uses, in the close of this discourse, chap. vi. 13 — 20, to prove fornication unlawful, are all drawn solely from the christian institution, ver. 9. That our bodies are made for the Lord, ver. 13. That our bodies are members of Christ, ver. 15. That our bodies are the temples of the Holy Ghost, ver. 19. That we are not our own, but bought with a price, ver. 20. All which arguments concern christians only; and there is not, in all this discourse against fornication, one word to declare it to be unlawful, by the law of nature, to mankind in general. That was altogether needless, and beside the apostle's purpose here, where he was teaching and exhorting christians what they were to do, as christians, within their own society, by the law of Christ, which was to be their rule, and was sufficient to oblige them, whatever other laws the rest of mankind

observed, or were under. Those he professes, ch. v. 12, 13, not to meddle with, nor to judge: for, having no authority amongst them, he leaves them to the judgment of God, under whose government they are.

These considerations afford ground to conjecture, that the faction, which opposed St. Paul, had hindered the church of Corinth from censuring the fornicator, and that St. Paul showing them their miscarriage herein, aims thereby to lessen the credit of their leader, by whose influence they were drawn into it. For, as soon as they had unanimously shown their obedience to St. Paul, in this matter, we see his severity ceases, and he is all softness and gentleness to the offender, 2 Cor. ii. 5 — 8. And he tells them in express words, ver. 9, that his end, in writing to them of it, was to try their obedience: to which let me add, that this supposition, though it had not all the evidence for it, which it has, yet being suited to St. Paul's principal design in this epistle, and helping us the better to understand these two chapters, may deserve to be mentioned.

TEXT.

²¹ What will ye? shall I come unto you, with a rod, or in love, and in the spirit of meekness?

V. 1 It is reported commonly, that there is fornication among you, and such fornication, as is not so much as named amongst the gentiles, that one should have his father's wife.

² And ye are puffed up, and have not rather mourned, that he that hath done this deed, might be taken away from among you.

³ For I verily, as absent in body, but present in spirit, have judged already, as though I were present, concerning him, that hath so done this deed.

⁴ In the name of our Lord Jesus Christ, when ye are gathered together, and my spirit, with the power of our Lord Jesus Christ,

⁵ To deliver such an one unto satan, for the destruction of the flesh, that the spirit may be saved in the day of the Lord Jesus.

⁶ Your glorying is not good: know ye not that a little leaven leaveneth the whole lump?

⁷ Purge out, therefore, the old leaven, that ye may be a new lump, as ye are unleavened. For even Christ, our passover, is sacrificed for us.

⁸ Therefore, let us keep the feast, not with old leaven, neither with the leaven of malice and wickedness; but with the unleavened bread of sincerity and truth.

⁹ I wrote unto you, in an epistle, not to company with fornicators.

¹⁰ Yet not altogether with the fornicators of this world, or with the covetous, or extortioners, or with idolaters: for then must ye needs go out of the world.

¹¹ But now I have written unto you, not to keep company, if any man that is called a brother, be a fornicator, or covetous, or an idolater, or a railer, or a drunkard, or an extortioner, with such an one, no not to eat.

¹² For what have I to do to judge them also that are without? do not ye judge them that are within?

¹³ But them that are without God judgeth. Therefore put away from among yourselves that wicked person.

VI. 1 Dare any of you, having a matter against another, go to law before the unjust, and not before the saints?

² Do ye not know that the saints shall judge the world? and, if the world shall be judged by you, ye are unworthy to judge the smallest matters?

³ Know ye not that we shall judge angels? how much more things that pertain to this life?

⁴ If then ye have judgments of things pertaining to this life, set them to judge, who are least esteemed in the church.

⁵ I speak to your shame. Is it so, that there is not a wise man amongst you? no, not one, that shall be able to judge between his brethren?

⁶ But brother goeth to law with brother, and that before the unbelievers.

⁷ Now, therefore, there is utterly a fault among you, because ye go to law one with another: why do ye not rather take wrong? why do ye not rather suffer yourselves to be defrauded?

⁸ Nay, you do wrong and defraud, and that your brethren.

⁹ Know ye not, that the unrighteous shall not inherit the kingdom of God? Be not deceived: neither fornicators, nor idolaters, nor adulterers, nor effeminate, nor abusers of themselves with mankind,

¹⁰ Nor thieves, nor covetous, nor drunkards, nor revilers, nor extortioners, shall inherit the kingdom of God.

¹¹ And such were some of you: but ye are washed, but ye are sanctified, but ye are justified in the name of the Lord Jesus, and by the Spirit of our God.

¹² All things are lawful unto me; but all things are not expedient: all things are lawful for me; but I will not be brought under the power of any.

¹³ Meats for the belly, and the belly for meats: but God shall destroy both it and them. Now the body is not for fornication, but for the Lord; and the Lord for the body.

¹⁴ And God hath both raised up the Lord, and will also raise up us, by his own power.

¹⁵ Know ye not, that your bodies are the members of Christ? Shall I then take the members of Christ, and make them the members of an harlot? God forbid.

¹⁶ What, know ye not, that he, which is joined to an harlot, is one body? For two (saith he) shall be one flesh.

¹⁷ But he, that is joined unto the Lord, is one spirit.

¹⁸ Flee fornication. Every sin that a man doth, is without the body: but he that committeth fornication, sinneth against his own body.

¹⁹ What! know ye not, that your body is the temple of the Holy Ghost, which is in you, which ye have of God, and ye are not your own?

²⁰ For ye are bought with a price; therefore, glorify God in your body, and in your spirit, which are God's.

PARAPHRASE.

²¹ I purposed to come unto you: But what would ye have me do? Shall I come to you, with a rod, to chastise you? Or with kindness, and a peaceable disposition¹ of mind? In short, it is commonly reported, that there is fornication among you, and such fornication, as is not known ordinarily among the² heathen, that one should have his father's wife. And yet ye remain puffed up, though it would better have become you to have been dejected, for this scandalous fact amongst you; and in a mournful sense of it, to have removed the offender out of the church.³ For I truly, though absent in body, yet as present in spirit, have thus already judged, as if I were personally with you, him that committed this fact;⁴ When in the name of the Lord Jesus, ye are assembled, and my spirit, i. e. my vote, as if I were present, making one, by the power of the Lord Jesus⁵ Christ, Deliver the offender up to satan, that, being put thus into the hands and power of the devil, his body may be afflicted, and brought down, that his soul may be saved, when the Lord Jesus comes to judge⁶ the world. Your glorying, as

you do, in a leader, who drew you into this scandalous indulgence in this case, is a fault in you: ye that are knowing, know you not that a little leaven leaveneth the whole lump?⁷ Therefore, laying by that deference and veneration ye had for those leaders you gloried in, turn out from among you that fornicator, that the church may receive no taint from him, that you may be a pure, new lump, or society, free from such a dangerous mixture, which may corrupt you. For Christ, our passover, is⁸ slain for us. Therefore let us, in commemoration of his death, and our deliverance by him, be a holy⁹ eople to him. I wrote to you before, that you¹⁰ should not keep company with fornicators. You are not to understand by it, as if I meant, that you are to avoid all unconverted heathens, that are fornicators, or covetous, or rapacious, or idolaters, for,¹¹ then, you must go out of the world. But that which I now write unto you, is, that you should not keep company, no, nor eat, with a christian by profession, who is lascivious, covetous, idolatrous, a¹² railer, drunkard, or rapacious. For what have I to do to judge those, who are out of the church? Have ye not a power to judge those, who are members of¹³ your church? But, as for those who are out of the church, leave them to God; to judge them belongs to him. Therefore do ye what is your part, remove that wicked one, the fornicator, out of the church.¹ Dare any of you, having a controversy with another, bring it before an heathen judge, to be tried, and not² let it be decided by christians? Know ye not that christians shall judge the world? And if the world shall be judged by you, are ye unworthy to judge³ ordinary small matters? Know ye not, that we, christians, have power over evil spirits? how much more over the little things relating to this animal⁴ life? If, then, ye have at any time controversies amongst you, concerning things pertaining to this life, let the parties contending choose arbitrators in⁵ the church, i. e. out of church-members. Is there not among you, I speak it to your shame, who stand so much upon your wisdom, one wise man, whom ye can think able enough to refer your controversies to?⁶ But one christian goeth to law with another, and that before the unbelievers, in the heathen courts⁷ of justice. Nay, verily, it is a failure and defect in you, that you so far contest matters of right, one with another, as to bring them to trial, or judgment:⁸ why do ye not rather suffer loss and wrong? But it is plain, by the man's having his father's wife, that ye are guilty of doing wrong, one to another, and stick not to do injustice, even to your christian⁹ brethren. Know ye not, that the transgressors of the law of Christ shall not inherit the kingdom of of God?

Deceive not yourselves, neither fornicators, nor idolaters, nor adulterers, nor effeminate, nor¹⁰ abusers of themselves with mankind, Nor thieves, nor covetous, nor drunkards, nor revilers, nor extortioners,¹¹ shall inherit the kingdom of God. And such were some of you: but your past sins are washed away, and forgiven you, upon your receiving of the gospel by baptism: but ye are sanctified, i. e. ye are members of Christ's church, which consists of saints, and have made some advances in the reformation of your lives by the doctrine of Christ, confirmed to you by the extraordinary operations of¹² the Holy Ghost. But supposing fornication were in itself as lawful, as eating promiscuously all sorts of meat, that are made for the belly, on purpose to be eaten: yet I would not so far indulge either custom, or my appetite, as to bring my body, thereby,¹³ into any disadvantageous state of subjection. As in eating and drinking, though meat be made purposely for the belly, and the belly for the meat; yet, because it may not be expedient for me, I will not, in so evidently a lawful thing as that, go to the utmost bounds of my liberty; though there be no danger, that I should thereby bring any lasting damage upon my belly, since God will speedily put an end both to belly and food. But the case of the body in reference to women, is far different from that of the belly, in reference to meat. For the body is not made to be joined to a woman, much less to be joined to an harlot in fornication, as the belly is made for meat, and then to be put an end to, when that use ceases. But the body is for a much nobler purpose, and shall subsist, when the belly and food shall be destroyed. The body is for our Lord Christ, to be a member of him, as our Lord Christ has taken a body, that he might partake of our¹⁴ nature, and be our head. So that, as God has already raised him up, and given him all power, so he will raise us up likewise, who are his members, to the partaking in the nature of his glorious body,¹⁵ and the power he is vested with in it. Know ye not, ye who are so knowing, that our bodies are the members of Christ? Will ye, then, take the members of Christ, and make them the members of¹⁶ an harlot? What! know ye not, that he who is joined to an harlot is one body with her? For two,¹⁷ saith God, shall be united into one flesh. But he, who is joined to the Lord, is one with him, by that one Spirit, that unites the members to the head, which is a nearer and stricter union, whereby what indignity is done to the one, equally affects the other.¹⁸ Flee fornication: all other sins, that a man commits, debase only the soul; but are in that respect, as if they were done out of the body; the body is not debased, suffers no loss of its dignity

by them: but he, who committeth fornication, sinneth against the end, for which his body was made, degrading his body from the dignity and honour it was designed to; making that the member of an harlot, which¹⁹ was made to be a member of Christ. What! know ye not, that your body is the temple of the Holy Ghost, that is in you, which body you have from God, and so it is not your own, to bestow on harlots?²⁰ Besides, ye are bought with a price, viz. the precious blood of Christ; and therefore, are not at your own disposal: but are bound to glorify God with both body and soul. For both body and soul are from him, and are God's.

SECT. III.

CHAPTER VII. 1 — 40.

CONTENTS.

The chief business of the foregoing chapters, we have seen to be the lessening the false apostle's credit, and the extinguishing that faction. What follows is in answer to some questions they had proposed to St. Paul. This section contains conjugal matters, wherein he dissuades from marriage those, who have the gift of continence. But, marriage being appointed as a remedy against fornication, those, who cannot forbear, should marry, and render to each other due benevolence. Next, he teaches that converts ought not to forsake their unconverted mates, insomuch as christianity changes nothing in men's civil estate, but leaves them under the same obligations they were tied by before. And, last of all, he gives directions about marrying, or not marrying, their daughters.

TEXT.

¹ Now concerning the things, whereof ye wrote unto me: it is good for a man not to touch a woman.

² Nevertheless, to avoid fornication, let every man have his own wife, and let every woman have her own husband.

³ Let the husband render unto the wife due benevolence: and likewise, also, the wife unto the husband.

⁴ The wife hath not power of her own body, but the husband: and likewise, also, the husband hath not power of his own body, but the wife.

⁵ Defraud you not one the other, except it be with consent, for a time, that ye may give yourselves to fasting and prayer: and come together again, that Satan tempt you not for your incontinency.

⁶ But I speak this by permission, and not of commandment.

⁷ For I would that all men were, even as I myself: but every man hath his proper gift of God, one after this manner, and another after that.

⁸ I say, therefore, to the unmarried and widows, It is good for them, if they abide, even as I.

⁹ But if they cannot contain, let them marry: for it is better to marry than to burn.

¹⁰ And unto the married I command; yet not I, but the Lord; let not the wife depart from her husband:

¹¹ But, and if she depart, let her remain unmarried, or be reconciled to her husband: and let not the husband put away his wife.

¹² But to the rest speak I, not the Lord, If any brother hath a wife, that believeth not, and she be pleased to dwell with him, let him not put her away.

¹³ And the woman, which hath an husband, that believeth not, and if he be pleased to dwell with-her, let her not leave him.

¹⁴ For the unbelieving husband is sanctified by the wife, and the unbelieving wife is sanctified by the husband: else were your children unclean; but now are they holy.

¹⁵ But if the unbelieving depart, let him depart. A brother or a sister is not under bondage in such cases: but God hath called us to peace.

¹⁶ For what knowest thou, O wife, whether thou shalt save thy husband? or how knowest thou, O man, whether thou shalt save thy wife?

¹⁷ But, as God hath distributed to every man, as the Lord hath called every one, so let him walk: and so ordain I, in all churches.

¹⁸ Is any man called, being circumcised? let him not become uncircumcised: is any called, in uncircumcision? let him not become circumcised.

¹⁹ Circumcision is nothing, and uncircumcision is nothing, but the keeping of the commandments of God.

²⁰ Let every man abide in the same calling, wherein he was called.

²¹ Art thou called, being a servant? Care not for it; but, if thou mayest be made free, use it rather.

²² For he that is called in the Lord, being a servant, is the Lord's free-man: likewise also he, that is called being free, is Christ's servant.

²³ Ye are bought with a price; be not ye the servants of men.

²⁴ Brethren, let every man, wherein he is called, therein abide with God.

²⁵ Now, concerning virgins, I have no commandment of the Lord, yet I give my judgment, as one that hath obtained mercy of the Lord to be faithful.

²⁶ I suppose, therefore, that this is good for the present distress; I say, that it is good for a man so to be.

²⁷ Art thou bound unto a wife? Seek not to be loosed. Art thou loosed from a wife? Seek not a wife.

²⁸ But and if thou marry, thou hast not sinned; and if a virgin marry, she hath not sinned; nevertheless, such shall have trouble in the flesh; but I spare you.

²⁹ But this I say, brethren, the time is short. It remaineth, that both they that have wives, be as though they had none;

³⁰ And they that weep, as though they wept not; and they that rejoice, as though they rejoiced not; and they that buy, as though they possessed not.

³¹ And they that use this world, as not abusing it: for the fashion of this world passeth away.

³² But I would have you without carefulness. He, that is unmarried, careth for the things that belong to the Lord, how he may please the Lord:

³³ But he that is married, careth for the things that are of the world, how he may please his wife.

³⁴ There is difference also between a wife and a virgin: the unmarried woman careth for the things of the Lord, that she may be holy, both in body and in spirit: but she that is married, careth for the things of the world, how she may please her husband.

³⁵ And this I speak for your own profit, not that I may cast a snare upon you, but for that which is comely, and that you may attend upon the Lord without distraction.

³⁶ But if any man think he behaveth himself uncomely towards his virgin, if she pass the flower of her age, and need so require, let him do what he will: he sinneth not: let them marry.

³⁷ Nevertheless, he that standeth stedfast in his heart, having no necessity, but hath power over his own will, and hath so decreed in his heart, that he will keep his virgin, doth well.

³⁸ So then, he that giveth her in marriage, doth well: but he that giveth her not in marriage, doth better.

³⁹ The wife is bound by the law, as long as her husband liveth: but, if her husband be dead, she is at liberty to be married to whom she will; only in the Lord.

⁴⁰ But she is happier, if she so abide, after my judgment: and I think also that I have the Spirit of God.

PARAPHRASE.

¹ Concerning those things that ye have writ to me about, I answer, it is most convenient not to have to² do with a woman. But because every one cannot forbear, therefore, they that cannot contain should, both men and women, each have their own peculiar husband³ and wife, to avoid fornication. And those that are married, for the same reason, are to regulate themselves by the disposition and exigency of their respective mates; and, therefore, let the husband render to the wife that benevolence, which is her due; and so, likewise, the wife to the husband, “vice⁴ versâ.” For the wife has not the power or dominion over her own body, to refuse the husband, when he desires; but this power and right to her body is in the husband. And, on the other side, the husband has not the power and dominion over his own body, to refuse his wife, when she shows an inclination; but this power and right to his body, when she has occasion,⁵ is in the wife. Do not, in this matter, be wanting, one to another, unless it be by mutual consent, for a short time, that you may wholly attend to acts of devotion, when ye fast, upon some solemn occasion: and when this time of solemn devotion is over, return to your former freedom, and conjugal society, lest the devil taking advantage of your inability to contain, should tempt you to a violation of⁶ your marriage-bed. As to marrying in general, I wish that you were all unmarried, as I am; but this I say⁷ to you, by way of advice, not of command. Every one has from God his own proper gift, some one way, and some another, whereby he must govern himself. ⁸ To the unmarried and widows, I say it as my opinion, that it is best for them to remain unmarried, as I am.⁹ But if they have not the gift of continency, let them marry, for the inconveniences of marriage are to be¹⁰ preferred to the flames of lust. But to the married, I say not by way of counsel from myself, but of command from the Lord, that a woman should not¹¹ leave her husband: But, if she has

separated herself from him, let her return, and be reconciled to him again; or, at least, let her remain unmarried: and¹² let not the husband put away his wife. But, as to others, it is my advice, not a commandment from the Lord, That, if a christian man hath an heathen wife, that is content to live with him, let him not break company with her, and dissolve the marriage.¹³ And, if a christian woman hath an heathen husband, that is content to live with her, let her not break¹⁴ company with him, and dissolve the marriage. You need have no scruple concerning this matter, for the heathen husband or wife, in respect of conjugal duty, can be no more refused, than if they were christian. For in this case, the unbelieving husband is sanctified, or made a christian, as to his issue, in his wife, and the wife sanctified in her husband. If it were not so, the children of such parents would be unclean, i. e. in the state of heathens, but now are they holy, i. e. born members¹⁵ of the christian church. But if the unbelieving party will separate, let them separate. A christian man, or woman, is not enslaved in such a case: only it is to be remembered, that it is incumbent on us, whom God, in the gospel, has called to be christians, to live peaceably with all men, as much as in us lieth; and, therefore, the christian husband, or wife, is not to make a breach in the family, by leaving the unbelieving party, who is content to stay.¹⁶ For what knowest thou, O woman, but thou mayest be the means of converting, and so saving thy unbelieving husband, if thou continuest peaceably as a loving wife, with him? or what knowest thou, O man, but, after the same manner, thou mayest save¹⁷ thy wife? On this occasion, let me give you this general rule: whatever condition God has allotted to any of you, let him continue and go on contentedly in the same state, wherein he was called; not looking on himself as set free from it by his conversion to christianity. And this is no more, than¹⁸ what I order in all the churches. For example, Was any one converted to christianity, being circumcised? Let him not become uncircumcised: was¹⁹ any one called, being uncircumcised? Let him not be circumcised. Circumsion or uncircumcision are nothing in the sight of God, but that which he has²⁰ a regard to, is in obedience to his commands. Christianity gives not any one any new privilege to change the state, or put off the obligations of civil life,²¹ which he was in before. Wert thou called, being a slave? Think thyself not the less a christian, for being a slave; but yet prefer freedom to slavery, if²² thou canst obtain it. For he that is converted to christianity, being a bond-man, is Christ's freedman. And he that is converted, being a free-man, is Christ's bondman, under his

command and dominion.²³ Ye are bought with a price, and so belong to Christ; be not, if you can avoid it, slaves to any²⁴ body. In whatsoever state a man is called, in the same he is to remain, notwithstanding any privileges of the gospel, which gives him no dispensation, or exemption, from any obligation he was in before,²⁵ to the laws of his country. Now concerning virgins I have no express command from Christ to give you: but I tell you my opinion, as one whom the Lord has been graciously pleased to make credible, and²⁶ so you may trust and rely on, in this matter. I tell you, therefore, that I judge a single life to be convenient, because of the present straits of the church;²⁷ and that it is best for a man to be unmarried. Art thou in the bonds of wedlock? Seek not to be loosed:²⁸ art thou loosed from a wife? Seek not a wife. But if thou marriest, thou sinnest not; or, if a virgin marry, she sins not: but those that are married, shall have worldly troubles; but I spare you by not representing to you how little enjoyment christians are like to have from a married life, in the present state of things, and so I leave you the liberty of marrying.²⁹ But give me leave to tell you, that the time for enjoying husbands and wives is but short. But be that as it will, this is certain, that those who have wives, should be, as if they had them not, and not set their³⁰ hearts upon them: And they that weep, as if they wept not; and they that rejoice, as if they rejoiced not; and they that buy, as if they possessed not: all these things should be done with resignation and a³¹ christian indifferency. And those who use this world, should use it without an over-relish of it, without giving themselves up to the enjoyment of it. For the scene of things is always changing in this world,³² and nothing can be relied on in it. All the reason why I dissuade you from marriage is, that I would have you free from anxious cares. He that is unmarried, has time and liberty to mind things of³³ religion, how he may please the Lord: But he that is married, is taken up with the cares of the world,³⁴ how he may please his wife. The like difference there is, between a married woman and a maid; she that is unmarried, has opportunity to mind the things of religion, that she may be holy in mind and body; but the married woman is taken up with the cares³⁵ of the world, how to please her husband. This I say to you, for your particular advantage, not to lay any constraint upon you, but to put you in a way, wherein you may most suitably, and as best becomes christianity, apply yourselves to the study and duties³⁶ of the gospel, without distraction. But, if any one thinks that he carries not himself as becomes him, to his virgin, if he lets her pass the flower of her age unmarried, and need so

requires, let him do, as he³⁷ thinks fit; he sins not, if he marry her. But whoever is settled in a firm resolution of mind, and finds himself under no necessity of marrying, and is master of his own will, or is at his own disposal, and has so determined in his thoughts, that he will keep his virginity, he chooses the better ³⁸ side. So then he that marrieth, doth well; but he³⁹ that marrieth not, doth better. It is unlawful for a woman to leave her husband, as long as he lives: but, when he is dead, she is at liberty to marry, or not to marry, as she pleases, and to whom she pleases; which virgins cannot do, being under the disposal of their parents; only she must take care to⁴⁰ marry, as a christian, fearing God. But, in my opinion, she is happier, if she remain a widow; and permit me to say, that whatever any among you may think, or say, of me, “I have the Spirit of God, so that I may be relied on in this my advice, that I do not mislead you.”

SECT. IV.

CHAPTER VIII. 1 — 13.

CONTENTS.

This section is concerning the eating things offered to idols; wherein one may guess, by St. Paul’s answer, that they had writ to him, that they knew their christian liberty herein, that they knew that an idol was nothing; and, therefore, that they did well to show their knowledge of the nullity of the heathen gods, and their disregard of them, by eating promiscuously, and without scruple, things offered to them. Upon which, the design of the apostle here seems to be, to take down their opinion of their knowledge, by showing them, that, notwithstanding all the knowledge they presumed on, and were puffed up with, yet the eating of those sacrifices did not recommend them to God; vid. ver. 8, and that they might sin in their want of charity, by offending their weak brother. This seems plainly, from ver. 1 — 3, and 11, 12, to be the design of the apostle’s answer here, and not to resolve the case, of eating things offered to idols, in its full latitude. For then he would have prosecuted it more at large here, and not have deferred the doing of it to chap. x. where, under another head, he treats of it more particularly.

TEXT.

¹ Now as touching things offered unto idols, we know that we all have knowledge. Knowledge puffeth up, but charity edifieth.

² (And if any man think, that he knoweth any thing, he knoweth nothing yet, as he ought to know.

³ But if any man love God, the same is known of him.

⁴ As concerning, therefore, the eating of those things, that are offered, in sacrifice unto idols, we know that an idol is nothing in the world, and that there is none other God but one.

⁵ For though there be that are called gods, whether in heaven, or in earth, as there be gods many, and lords many.

⁶ But to us there is but one God, the Father, of whom are all things, and we in him; and one Lord Jesus Christ, by whom are all things, and we by him.)

⁷ Howbeit there is not in every man that knowledge; for some, with conscience of the idol, unto this hour, eat it as a thing offered unto an idol; and their conscience, being weak, is defiled.

⁸ But meat commendeth us not to God: for neither, if we eat, are we the better; neither, if we eat not, are we the worse.

⁹ But take heed, lest, by any means, this liberty of yours become a stumbling-block to them that are weak.

¹⁰ For, if any man see thee, which hast knowledge, sit at meat in the idol's temple, shall not the conscience of him, which is weak, be emboldened to eat those things, which are offered to idols?

¹¹ And, through thy knowledge, shall the weak brother perish, for whom Christ died?

¹² But, when ye sin so against the brethren, and wound their weak conscience, ye sin against Christ.

¹³ Wherefore, if meat make my brother to offend, I will eat no flesh, while the world standeth, lest I make my brother to offend.

PARAPHRASE.

¹ As for things offered up unto idols, it must not be questioned, but that every one of you, who stand so much upon your knowledge, know that the imaginary gods, to whom the gentiles sacrifice, are not in reality gods, but mere fictions; but, with this, pray remember, that such a knowledge, or opinion of their knowledge, swells men with pride and vanity. But charity it

is, that improves and advances men in christianity.² (But, if any one be conceited of his own knowledge, as if christianity were a science for speculation and dispute, he knows nothing yet of christianity, as he³ ought to know it. But if any one love God, and consequently his neighbour for God's sake, such an one is made to know, or has got true knowledge⁴ from God himself. To the question, then, of eating things offered to idols, I know, as well as you, that an idol, i.e. that the fictitious gods, whose images are in the heathen temples, are no real beings in the world:⁵ and there is in truth no other but one God. For though there be many imaginary nominal gods, both in heaven and earth, as are indeed all their many ⁶ gods, and many lords, which are merely titular; Yet to us christians, there is but one God, the Father and the Author of all things, to whom alone we address all our worship and service; and but one Lord, viz. Jesus Christ, by whom all things come from God to us, and by whom we have access to the Father.)⁷ For notwithstanding all the great pretences to knowledge, that are amongst you, every one doth not know, that the gods of the heathens are but imaginations of the fancy, mere nothing. Some, to this day, conscious to themselves, that they think those idols to be real deities, eat things sacrificed to them, as sacrificed to real deities; whereby doing that which they, in their consciences, not yet sufficiently enlightened,⁸ think to be unlawful, are guilty of sin. Food, of what kind soever, makes not God regard us. For neither, if in knowledge, and full persuasion, that an idol is nothing, we eat things offered to idols, do we thereby add any thing to christianity: or if, not being so well informed, we are scrupulous, and forbear, are⁹ we the worse christians, or are lessened by it. But this you knowing men ought to take especial care of: that the power of freedom you have to eat, be not made such an use of, as to become a stumbling-block to weaker christians, who are not convinced of that ¹⁰ liberty. For if such an one should see thee, who hast this knowledge of thy liberty, sit feasting in an idol-temple, shall not his weak conscience, not thoroughly instructed in the matter of idols, be drawn in by thy example to eat what is offered to idols, though he, in his conscience, doubt of its lawfulness?¹¹ And thus thy weak brother, for whom Christ died, is destroyed by thy knowledge, wherewith thou¹² justifiest thy eating. But when you sin thus against your brethren, and wound their weak consciences,¹³ you sin against Christ. Wherefore, if meat make my brother offend, I will never more eat flesh, to avoid making my brother offend.

SECT. V.

CHAPTER IX. 1 — 27.

CONTENTS.

St. Paul had preached the gospel at Corinth, about two years; in all which time, he had taken nothing of them, 2 Cor. xi. 7 — 9. This, by some of the opposite faction, and particularly, as we may suppose, by their leader, was made use of, to call in question his apostleship, 2 Cor. xi. 5, 6. For why, if he were an apostle, should he not use the power of an apostle, to demand maintenance, where he preached? In this section, St. Paul vindicates his apostleship; and, in answer to these enquirers, gives the reason why, though he had a right to maintenance, yet he preached gratis to the corinthians. My answer, says he, to these inquisitors, is, that though, as being an apostle, I know that I have a right to maintenance, as well as Peter, or any other of the apostles, who all have a right, as is evident from reason, and from scripture; yet I never have, nor shall make use of my privilege amongst you, for fear that, if it cost you any thing, that should hinder the effect of my preaching: I would neglect nothing, that might promote the gospel. For I do not content myself with doing barely what is my duty; for, by my extraordinary call and commission, it is now incumbent on me to preach the gospel; but I endeavour to excel in my ministry, and not to execute my commission covertly, and just enough to serve the turn. For if those, who, in the agonistic games, aiming at victory, to obtain only a corruptible crown, deny themselves in eating and drinking, and other pleasures, how much more does the eternal crown of glory deserve that we should do our utmost to obtain it? To be as careful, in not indulging our bodies, in denying our pleasures, in doing every thing we could, in order to get it, as if there were but one that should have it? Wonder not therefore, if I, having this in view, neglect my body, and those outward conveniencies, that I, as an apostle sent to preach the gospel, might claim and make use of: wonder not that I prefer the propagating of the gospel, and making of converts, to all care and regard of myself. This seems the design of the apostle, and will give light to the following discourse, which we shall now take, in the order St. Paul writ it.

TEXT.

¹ Am I not an apostle? Am I not free? Have I not seen Jesus Christ, our Lord? Are not you my work in the Lord?

² If I be not an apostle unto others, yet doubtless I am to you: for the seal of mine apostleship are ye in the Lord.

³ Mine answer to them that do examine me, is this:

⁴ Have we not power to eat and to drink?

⁵ Have we not power to lead about a sister, a wife, as well as other apostles, and as the brethren of the Lord, and Cephas?

⁶ Or I only, and Barnabas, have not we power to forbear working?

⁷ Who goeth a warfare, any time, at his own charges? who planteth a vineyard, and eateth not of the fruit thereof? or who feedeth the flock, and eateth not of the milk of the flock?

⁸ Say I these things, as a man? or saith not the law the same also?

⁹ For it is written, in the law of Moses, "Thou shalt not muzzle the mouth of the ox that treadeth out the corn." Doth God take care for oxen?

¹⁰ Or saith he it altogether for our sakes? For our sakes, no doubt, this is written: that he that plougheth, should plough in hope; and that he, that thresheth in hope, should be partaker of his hope.

¹¹ If we have sown unto you spiritual things, is it a great thing, if we shall reap your carnal things?

¹² If others be partakers of this power over you, are not we rather? Nevertheless, we have not used this power; but suffer all things, lest we should hinder the gospel of Christ.

¹³ Do ye not know, that they which minister about holy things, live of the things of the temple? And they, which wait at the altar, are partakers with the altar?

¹⁴ Even so, hath the Lord ordained, that they, which preach the gospel, should live of the gospel.

¹⁵ But I have used none of these things: neither have I written these things, that it should be so done unto me. For it were better for me to die, than that any man should make my glorying void.

¹⁶ For, though I preach the gospel, I have nothing to glory of; for necessity is laid upon me; yea, woe is unto me, if I preach not the gospel.

¹⁷ For, if I do this thing willingly, I have a reward: but if against my will, a dispensation of the gospel is committed unto me.

¹⁸ What is my reward then? Verily, that, when I preach the gospel, I may make the gospel of Christ without charge, that I abuse not my power in the

gospel.

¹⁹ For though I be free from all men, yet have I made myself servant unto all, that I might gain the more.

²⁰ And unto the jews, I became as a jew, that I might gain the jews; to them that are under the law, as under the law, that I might gain them, that are under the law;

²¹ To them, that are without law, as without law, (being not without law to God, but under the law to Christ) that I might gain them, that are without law.

²² To the weak became I as weak, that I might gain the weak: I am made all things to all men, that I might, by all means, save some.

²³ And this I do for the gospel's sake, that I might be partaker thereof with you.

²⁴ Know ye not, that they, which run in a race, run all, but one receiveth the prize? So run, that ye may obtain.

²⁵ And every man that striveth for the mastery, is temperate in all things: now they do it to obtain a corruptible crown; but we an incorruptible.

²⁶ I therefore so run, not as uncertainly: so fight I, not as one that beateth the air.

²⁷ But I keep under my body, and bring it into subjection; lest that, by any means, when I have preached to others, I myself should be a cast-away.

PARAPHRASE.

¹ Am I not an apostle? And am I not at liberty, as much as any other of the apostles, to make use of the privilege due to that office? Have I not had the favour to see Jesus Christ, our Lord, after an extraordinary manner? And are not you yourselves, whom I have converted, an evidence of the success of my² employment in the gospel? If others should question my being an apostle, you at least cannot doubt of it: your conversion to christianity is, as it were, a seal set to it, to make good the truth of my apostleship.³ This, then, is my answer to those, who set up an inquisition⁴ upon me: Have not I a right to meat and⁵ drink, where I preach? Have not I, and Barnabas, a power to take along with us, in our travelling to propagate the gospel, a christian woman, to provide our conveniencies, and be serviceable to us, as well as Peter, and the brethren of the Lord, and the rest of⁶ the apostles? Or is it I only, and Barnabas, who are excluded from the privilege of being maintained without⁷ working? Who goes to the war any where, and serves

as a soldier, at his own charges? Who planteth a vineyard, and eateth not of the fruit thereof? Who feedeth a flock, and eateth not of the milk?⁸ This is allowed to be reason, that those, who are so employed, should be maintained by their employments; and so likewise a preacher of the gospel. But I say not this, barely upon the principles of human reason; revelation teaches the same thing,⁹ in the law of Moses: Where it is said, “Thou shalt muzzle not the mouth of the ox, that treadeth out the corn.” Doth God take care to provide so particularly¹⁰ for oxen, by a law? No, certainly; it is said particularly for our sakes, and not for oxen: that he, who sows, may sow in hope of enjoying the fruits of his labour at harvest; and may then thresh¹¹ out, and eat the corn he hoped for. If we have sowed to you spiritual things, in preaching the gospel to you, is it unreasonable, that we should expect a little meat and drink from you, a little share of¹² your carnal things? If any partake of this power over you, why not we much rather? But I made no use of it; but bear with any thing, that I may avoid¹³ all hindrance to the progress of the gospel. Do ye not know, that they, who in the temple serve about holy things, live upon those holy things? And they, who wait at the altar, are partakers with the altar?¹⁴ So has the Lord ordained, that they, who preach the¹⁵ gospel, should live of the gospel. But though, as an apostle, and preacher of the gospel, I have, as you see, a right to maintenance, yet I have not taken it: neither have I written this to demand it. For I had rather perish for want, than be deprived of what I glory in, viz. preaching the gospel freely.¹⁶ For if I preach the gospel, I do barely my duty, but have nothing to glory in: for I am under an obligation and command to preach, and wo be to¹⁷ me, if I preach not the gospel. Which if I do willingly, I shall have a reward: if unwillingly, the dispensation is nevertheless intrusted to me, and ye¹⁸ ought to hear me as an apostle. How, therefore, do I make it turn to account to myself? Even thus: if I preach the gospel of Christ of free cost, so that I exact not the maintenance I have a right¹⁹ to, by the gospel. For being under no obligation to any man, I yet subject myself to every one, to the end that I may make the more converts to Christ.²⁰ To the jews, and those under the law of Moses, I became as a jew, and one under that law, that I²¹ might gain the jews, and those under the law; To those without the law of Moses, I applied myself, as one not under that law, (not, indeed, as if I were under no law to God, but as obeying and following the law of Christ) that I might gain those, who²² were without the law. To the weak I became as weak, that I might gain the weak: I became all things to all men, that I

might leave no lawful thing untried, whereby I might save people of all sorts.²³ And this I do for the gospel's sake, that I myself²⁴ may share in the benefits of the gospel. Know ye not that they, who run a race, run not lazily, but with their utmost force? They all endeavour to be first, because there is but one that gets the prize. It is not enough for you to run, but so to run, that ye may obtain: which they cannot do, who running only, because they are bid, do not run with all their²⁵ might. They, who propose to themselves the getting the garland in your games, readily submit themselves to severe rules of exercise and abstinence: and yet theirs is but a fading, transitory crown; that, which we propose to ourselves, is everlasting; and therefore deserves, that we should endure greater²⁶ hardships for it. I therefore so run, as not to leave it to uncertainty. I do what I do, not as one who²⁷ fences for exercise, or ostentation; But I really and in earnest keep under my body, and intirely enslave it to the service of the gospel, without allowing any thing to the exigencies of this animal life, which may be the least hindrance to the propagation of the gospel; lest that I, who preach to bring others into the kingdom of heaven, should be disapproved of, and rejected myself.

SECT. VI. N. I.

CHAPTER X. 1 — 22.

CONTENTS.

It seems, by what he here says, as if the corinthians had told St. Paul, that the temptations and constraints they were under, of going to their heathen neighbours feasts upon their sacrifices, were so many, and so great, that there was no avoiding it: and, therefore, they thought they might go to them without any offence to God, or danger to themselves; since they were the people of God, purged from sin by baptism, and fenced against it, by partaking of the body and blood of Christ, in the Lord's supper. To which St. Paul answers, that, notwithstanding their baptism, and partaking of that spiritual meat and drink, yet they, as well as the jews of old did, might sin, and draw on themselves destruction from the hand of God: that eating of things, that were known, and owned, to be offered to idols, was partaking in the idolatrous worship; and therefore, they were to prefer even the danger of persecution before such a compliance; for God would find a way for them to escape.

TEXT.

¹ Moreover, brethren, I would not, that ye should be ignorant, how that all our fathers were under the cloud, and all passed through the sea;

² And were all baptized, unto Moses, in the cloud, and in the sea;

³ And did all eat the same spiritual meat;

⁴ And did all drink the same spiritual drink: (for they drank of that spiritual rock, that followed them: and that rock was Christ.)

⁵ But with many of them God was not well pleased: for they were overthrown in the wilderness.

⁶ Now these things were our examples, to the intent we should not lust after evil things, as they also lusted.

⁷ Neither be ye idolaters, as were some of them; as it is written, The people sat down to eat and drink, and rose up to play.

⁸ Neither let us commit fornication, as some of them committed; and fell in one day three and twenty thousand.

⁹ Neither let us tempt Christ, as some of them also tempted, and were destroyed of serpents.

¹⁰ Neither murmur ye, as some of them also murmured, and were destroyed of the destroyer.

¹¹ Now all these things happened unto them for ensamples: and they are written for our admonition, upon whom the ends of the world are come.

¹² Wherefore, let him that thinketh he standeth, take heed lest he fall.

¹³ There hath no temptation taken you, but such as is common to man: but God is faithful, who will not suffer you to be tempted above that ye are able; but will, with the temptation, also make a way to escape, that ye may be able to bear it.

¹⁴ Wherefore, my dearly beloved, flee from idolatry.

¹⁵ I speak as to wise men: judge ye what I say.

¹⁶ The cup of blessing, which we bless, is it not the communion of the blood of Christ? The bread, which we break, is it not the communion of the body of Christ?

¹⁷ For we, being many, are one bread, and one body; for we are all partakers of that one bread.

¹⁸ Behold Israel after the flesh: are not they, which eat of the sacrifices, partakers of the altar?

¹⁹ What say I then? that the idol is any thing, or that which is offered in sacrifice to idols, is any thing?

²⁰ But I say, that the things which the gentiles sacrifice, they sacrifice to devils, and not to God: and I would not that ye should have fellowship with devils.

²¹ Ye cannot drink the cup of the Lord, and the cup of devils: ye cannot be partakers of the Lord's table, and of the table of devils.

²² Do we provoke the Lord to jealousy? Are we stronger than he?

PARAPHRASE.

¹ I would not have you ignorant, brethren, that all our fathers, the whole congregation of the children of Israel, at their coming out of Egypt, were, all to a man, under the cloud, and all passed through the sea;² And were all, by this baptism, in the cloud, and passing through the water, initiated into the mosaical institution and government, by these two miracles of³ the cloud and the sea. And they all eat the same meat, which had a typical and spiritual signification;⁴ And they all drank the same spiritual, typical drink, which came out of the rock, and followed them, which rock typified Christ: all which were typical representations of Christ, as well as the bread and wine, which we eat and drink in the Lord's supper, are typical⁵ representations of him. But yet, though every one of the children of Israel, that came out of Egypt, were thus solemnly separated from the rest of the profane, idolatrous world, and were made God's peculiar people, sanctified and holy, every one of them to himself, and members of his church: nay, though they did all partake of the same meat, and the same drink, which did typically represent Christ, yet they were not thereby privileged from sin: but great numbers of them provoked God, and were destroyed in the⁶ wilderness for their disobedience. Now these things were set as patterns to us, that we, warned by these examples, should not set our minds a-longing, as they did, after meats, that would be safer let alone.⁷ Neither be ye idolaters, as were some of them; as it is written, "The people sat down to eat and drink,⁸ and rose up to play." Neither let us commit fornication, as some of them committed, and fell in one⁹ day three and twenty thousand. Neither let us provoke Christ, as some of them provoked, and were destroyed¹⁰ of serpents. Neither murmur ye, as some of them murmured, and were destroyed of the destroyer.¹¹ Now all these things happened to the jews for

examples, and are written for our admonition,¹² upon whom the ends of the ages are come. Wherefore, taught by these examples, let him that thinks himself safe, by being in the church, and partaking of the christian sacraments, take heed lest he fall into sin, and so destruction from God overtake him.¹³ Hitherto, the temptations you have met with, have been but light and ordinary; if you should come to be pressed harder, God, who is faithful, and never forsakes those, who forsake not him, will not suffer you to be tempted above your strength; but will either enable you to bear the persecution, or¹⁴ open you a way out of it. Therefore, my beloved, take care to keep off from idolatry, and be not drawn to any approaches near it, by any temptation,¹⁵ or persecution whatsoever. You are satisfied that you want not knowledge: and therefore, as to knowing men, I appeal to you, and make you judges of what I am going to say in the case.¹⁶ They, who drink of the cup of blessing, which we bless in the Lord's supper, do they not thereby partake of the benefits, purchased by Christ's blood, shed for them upon the cross, which they here symbolically drink? And they, who eat of the bread broken there, do they not partake in the sacrifice of the body of Christ, and profess to be members¹⁷ of him? For, by eating of that bread, we, though many in number, are all united, and make but one body, as many grains of corn are united into one¹⁸ loaf. See how it is among the jews, who are outwardly, according to the flesh, by circumcision, the people of God. Among them, they, who eat of the sacrifice, are partakers of God's table, the altar, have fellowship with him, and share in the benefit of the sacrifice, as if it were offered for them.¹⁹ Do not mistake me, as if I hereby said, that the idols of the gentiles are gods in reality; or that the things, offered to them, change their nature, and are any thing really different from what they were before,²⁰ so as to affect us, in our use of them. No: but this I say, that the things which the gentiles sacrifice, they sacrifice to devils, and not to God; and I would not that you should have fellowship, and be in league with devils, as they, who by eating of the things offered to them enter into covenant, alliance,²¹ and friendship with them. You cannot eat and drink with God, as friends at his table, in the eucharist, and entertain familiarity and friendship with devils, by eating with them, and partaking of the sacrifices offered to them: you cannot be christians and idolaters too: nor, if you should endeavour to join these inconsistent rites, will it avail you any thing. For your partaking in the sacraments of the christian church, will no more exempt you from the anger of God, and punishment due to your

idolatry, than the eating of the spiritual food, and drinking of the spiritual rock, kept the baptized Israelites, who offended God by their idolatry, or other sins,²² from being destroyed in the wilderness. Dare you, then, being espoused to Christ, provoke the Lord to jealousy, by idolatry, which is spiritual whoredom? Are you stronger than he, and able to resist him, when he lets loose his fury against you?

SECT. VI. N. 2.

CHAPTER X. 23. — XI. 1.

CONTENTS.

We have, here, another of his arguments against things offered to idols, wherein he shows the danger that might be in it, from the scandal it might give: supposing it a thing lawful in itself. He had formerly treated of this subject, ch. viii. so far as to let them see, that there was no good, nor virtue in eating things offered to idols, notwithstanding they knew that idols were nothing, and they might think, that their free eating, without scruple, showed that they knew their freedom in the gospel, that they knew, that idols were in reality nothing; and, therefore, they slighted and disregarded them, and their worship, as nothing; but that there might be evil in eating, by the offence it might give to weak christians, who had not that knowledge. He here takes up the argument of scandal again, and extends it to jews and gentiles; vid. ver. 32, and shows, that it is not enough to justify them, in any action, that the thing, they do, is in itself lawful, unless they seek it in the glory of God, and the good of others.

TEXT.

²³ All things are lawful for me, but all things are not expedient: all things are lawful for me, but all things edify not.

²⁴ Let no man seek his own: but every man another's wealth.

²⁵ Whatsoever is sold in the shambles, that eat, asking no question for conscience sake.

²⁶ For the earth is the Lord's, and the fulness thereof.

²⁷ If any of them, that believe not, bid you to a feast, and ye be disposed to go; whatsoever is set before you, eat, asking no question for conscience

sake.

²⁸ But if any man say unto you, “This is offered in sacrifice unto idols,” eat not, for his sake that showed it, and for conscience sake. For the earth is the Lord’s, and the fulness thereof.

²⁹ Conscience, I say, not thine own, but of the others: for why is my liberty judged of another man’s conscience?

³⁰ For, if I, by grace, be a partaker, why am I evil spoken of, for that, for which I give thanks?

³¹ Whether, therefore, ye eat or drink, or whatsoever ye do, do all to the glory of God.

³² Give none offence, neither to the jews, nor to the gentiles, nor to the church of God:

³³ Even as I please all men in all things, not seeking mine own profit, but the profit of many, that they may be saved.

XI. 1 Be ye followers of me, even as I also am of Christ.

PARAPHRASE.

²³ Farther, supposing it lawful to eat things offered to idols, yet all things that are lawful, are not expedient: things that, in themselves, are lawful for me, may not tend to the edification of others, and so²⁴ may be fit to be forboren. No one must seek barely his own private, particular interest alone, but let every one seek the good of others also.²⁵ Eat whatever is sold in the shambles, without any inquiry, or scruple, whether it had been offered to²⁶ any idol, or no. For the earth, and all therein, are the good creatures of the true God, given by him²⁷ to men, for their use. If an heathen invite you to an entertainment, and you go, eat whatever is set before you, without making any question or scruple about it, whether it had been offered in sacrifice,²⁸ or no. But if any one say to you, “This was offered in sacrifice to an idol,” eat it not, for his sake that mentioned it, and for conscience sake.²⁹ Conscience, I say, not thine own, (for thou knowest thy liberty, and that an idol is nothing) but the conscience of the other. For why should I use my liberty so, that another man should in conscience³⁰ think I offended? And if I, with thanksgiving, partake of what is lawful for me to eat, why do I order the matter so, that I am ill-spoken of, for³¹ that which I bless God for? Whether, therefore, ye eat or drink, or whatever ye do, let your care and³² aim be the glory of God. Give no offence to the jews, by giving them

occasion to think, that christians are permitted to worship heathen idols; nor to the gentiles, by giving them occasion to think, that you allow their idolatry, by partaking of their sacrifices: nor to weak members of the church of God, by drawing them, by your examples, to eat of things offered to idols, of the lawfulness whereof they are³³ not fully satisfied. As I myself do, who abridge myself of many conveniencies of life, to comply with the different judgments of men, and gain the good opinion of others, that I may be instrumental to theXI. 1 salvation of as many as is possible. Imitate herein my example, as I do that of our Lord Christ, who neglected himself for the salvation of others.

SECT. VII.

CHAPTER XI. 2 — 16.

CONTENTS.

St. Paul commends them for observing the orders he had left with them, and uses arguments to justify the rule he had given them, that women should not pray, or prophesy, in their assemblies, uncovered; which, it seems, there was some contention about, and they had writ to him to be resolved in it.

TEXT.

² Now I praise you, brethren, that you remember me, in all things, and keep the ordinances, as I delivered them to you.

³ But I would have you know, that the head of every man is Christ; and the head of the woman is the man; and the head of Christ is God.

⁴ Every man praying, or prophesying, having his head covered, dishonoureth his head.

⁵ But every woman, that prayeth, or prophesieth, with her head uncovered, dishonoureth her head: for that is even all one, as if she were shaven:

⁶ For if the woman be not covered, let her also be shorn: but if it be a shame for a woman to be shorn, or shaven, let her be covered.

⁷ For a man, indeed, ought not to cover his head, forasmuch as he is the image and glory of God: but the woman is the glory of the man.

⁸ For the man is not of the woman: but the woman of the man.

⁹ Neither was the man created for the woman: but the woman for the man.

¹⁰ For this cause ought the woman to have power on her head, because of the angels.

¹¹ Nevertheless, neither is the man without the woman, neither the woman without the man, in the Lord.

¹² For, as the woman is of the man, even so is the man also by the woman: but all things of God.

¹³ Judge in yourselves; is it comely, that a woman pray unto God uncovered?

¹⁴ Doth not even nature itself teach you, that if a man have long hair, it is a shame unto him?

¹⁵ But if a woman have long hair, it is a glory to her; for her hair is given her for a covering.

¹⁶ But if any man seem to be contentious, we have no such custom, neither the churches of God.

PARAPHRASE.

² I commend you, brethren, for remembering all my orders, and for retaining those rules I delivered to you,³ when I was with you. But for your better understanding what concerns women, in your assemblies, you are to take notice, that Christ is the head to which every man is subjected, and the man is the head, to which every woman is subjected; and that the head,⁴ or superiour, to Christ himself, is God. Every man, that prayeth, or prophesieth, i. e. by the gift of the Spirit of God, speaketh in the church for the edifying, exhorting, and comforting of the congregation, having his head covered, dishonoureth Christ, his head, by appearing in a garb not becoming the authority and dominion, which God, through Christ, has given him over all the things of this world; the covering of the⁵ head being a mark of subjection. But, on the contrary, a woman praying, or prophesying in the church, with her head uncovered, dishonoureth the man, who is her head, by appearing in a garb, that disowns her subjection to him. For to appear bare-headed in public, is all one as to have her hair cut off, which is the garb and dress of the other sex, and⁶ not of a woman. If, therefore, it be unsuitable to the female sex to have their hair shorn, or shaved off, ⁷ let her, for the same reason, be covered. A man, indeed, ought not to be veiled;

because he is the image and representative of God, in his dominion over the rest of the world, which is one part of the glory⁸ of God: But the woman, who was made out of the man, made for him, and in subjection to him, is matter⁹ of glory to the man. But the man, not being made out of the woman, not for her, but the woman¹⁰ made out of, and for the man, She ought, for this reason, to have a veil on her head, in token of her¹¹ subjection, because of the angels. Nevertheless, the sexes have not a being, one without the other; neither the man without the woman, nor the woman¹² without the man, the Lord so ordering it. For, as the first woman was made out of the man, so the race of men, ever since, is continued and propagated by the female sex: but they, and all other things,¹³ had their being and original from God. Be you yourselves judges, whether it be decent for a woman to make a prayer to God, in the church, uncovered?¹⁴ Does not even nature, that has made, and would have the distinction of sexes preserved, teach you, that if a man wear his hair long, and dressed up after the manner of women, it is misbecoming and¹⁵ dishonourable to him? But to a woman, if she be curious about her hair, in having it long, and dressing herself with it, it is a grace and commendation;¹⁶ since her hair is given her for a covering. But, if any show himself to be a lover of contention, we, the apostles, have no such custom, nor any of the churches of God.

SECT. VIII.

CHAPTER XI. 17 — 34.

CONTENTS.

One may observe from several passages in this epistle, that several judaical customs were crept into the corinthian church. This church being of St. Paul's own planting, who spent two years at Corinth, in forming it; it is evident these abuses had their rise from some other teachers, who came to them after his leaving them, which was about five years before his writing this epistle. These disorders therefore may with reason be ascribed to the head of the faction, that opposed St. Paul, who, as has been remarked, was a jew, and probably judaized. And that, it is like, was the foundation of the great opposition between him and St. Paul, and the reason why St. Paul labours so earnestly to destroy his credit among the corinthians: this sort of men being very busy, very troublesome, and very dangerous to the gospel,

as may be seen in other of St. Paul's epistles, particularly that to the galatians.

The celebrating the passover amongst the Jews was plainly the eating of a meal distinguished from other ordinary meals, by several peculiar ceremonies. Two of these ceremonies were eating of bread solemnly broken, and drinking a cup of wine, called the cup of blessing. These two our Saviour transferred into the christian church, to be used in their assemblies, for a commemoration of his death and sufferings. In celebrating this institution of our Saviour, the judaizing corinthians followed the jewish custom of eating their passover; they eat the Lord's supper as a part of their meal, bringing their provisions into the assembly, where they eat divided into distinct companies, some feasting to excess, whilst others, ill provided, were in want. This eating thus in the public assembly, and mixing the Lord's supper with their ordinary meal, as a part of it, with other disorders and indecencies accompanying it, is the matter of this section. These innovations, he tells them here, he as much blames, as, in the beginning of this chapter, he commends them for keeping to his directions in some other things.

TEXT.

¹⁷ Now in this, that I declare unto you, I praise you not, that ye come together, not for the better, but for the worse.

¹⁸ For first of all, when ye come together in the church, I hear that there be divisions among you; and I partly believe it.

¹⁹ For there must be also heresies among you, that they, which are approved, may be made manifest among you.

²⁰ When ye come together, therefore, into one place, this is not to eat the Lord's supper.

²¹ For, in eating, every one taketh before other, his own supper: and one is hungry, and another is drunken.

²² What! have ye not houses to eat and drink in? Or despise ye the church of God? And shame them that have not? What shall I say to you? Shall I praise you in this? I praise you not.

²³ For I have received of the Lord, that, which also I delivered unto you, that the Lord Jesus, the same night, in which he was betrayed, took bread:

²⁴ And when he had given thanks, he brake it, and said, “Take, eat; this is my body, which is broken for you: this do in remembrance of me.”

²⁵ After the same manner also, he took the cup, when he had supped, saying, “This cup is the new testament in my blood: this do ye, as oft as ye drink it, in remembrance of me.”

²⁶ For as often as ye eat this bread, and drink this cup, ye do show the Lord’s death till he come.

²⁷ Wherefore, whosoever shall eat this bread, and drink this cup of the Lord unworthily, shall be guilty of the body and blood of the Lord.

²⁸ But let a man examine himself, and so let him eat of that bread, and drink of that cup.

²⁹ For he that eateth and drinketh unworthily, eateth and drinketh damnation to himself, not discerning the Lord’s body.

³⁰ For this cause, many are weak and sickly among you, and many sleep.

³¹ For if we would judge ourselves, we should not be judged.

³² But when we are judged, we are chastened of the Lord, that we should not be condemned with the world.

³³ Wherefore, my brethren, when ye come together to eat, tarry one for another.

³⁴ And if any man hunger, let him eat at home; that ye come not together unto condemnation. And the rest will I set in order, when I come.

PARAPHRASE.

¹⁷ Though what I said to you, concerning women’s behaviour in the church, was not without commendation of you; yet this, that I am now going to speak to you of, is without praising you, because you so order your meetings in your assemblies, that¹⁸ they are not to your advantage, but harm. For first I hear, that, when you come together in the church, you fall into parties, and I partly believe¹⁹ it; Because there must be divisions and factions amongst you, that those who stand firm upon trial,²⁰ may be made manifest among you. You come together, it is true, in one place, and there you eat; but yet this makes it not to be the eating of the²¹ Lord’s supper. For, in eating, you eat not together, but every one takes his own supper one before another.²² Have ye not houses to eat and drink in, at home, for satisfying your hunger and thirst? Or have ye a contempt for the church of God, and take a pleasure to put those out of countenance, who have not

wherewithal to feast there, as you do? What is it I said to you, that I praise you for retaining what I delivered to you? On this occasion,²³ indeed, I praise you not for it. For what I received, concerning this institution, from the Lord himself, that I delivered unto you, when I was with you; and it was this, viz. That the Lord Jesus, in the²⁴ night, wherein he was betrayed, took bread: And, having given thanks, brake it, and said, “Take, eat; this is my body which is broken for you: this do²⁵ in remembrance of me.” So, likewise, he took the cup also when he had supped, saying, “This cup is the new testament in my blood: this do ye, as often as ye do it, in remembrance of me.”²⁶ So that the eating of this bread, and the drinking of this cup of the Lord’s supper, is not to satisfy hunger and thirst, but to show forth the²⁷ Lord’s death, till he comes. Insomuch that he, who eats this bread, and drinks this cup of the Lord, in an unworthy manner, not suitable to that end, shall be guilty of a misuse of the body and blood²⁸ of the Lord. By this institution, therefore, of Christ, let a man examine himself; and, according to that, let him eat of this bread, and drink of²⁹ this cup. For he, who eats and drinks after an unworthy manner, without a due respect had to the Lord’s body, in a discriminating and purely sacramental use of the bread and wine, that represent it, draws punishment on himself by so doing.³⁰ And hence it is, that many among you are weak and sick, and a good number are gone to their³¹ graves. But if we would discriminate ourselves, i. e. by our discriminating use of the Lord’s supper, we³² should not be judged, i. e. punished by God. But, being punished by the Lord, we are corrected, that we may not be condemned hereafter, with the unbelieving³³ world. Wherefore, my brethren, when you have a meeting for celebrating the Lord’s supper, stay for one another, that you may eat it all together, as partakers, all in common, of the Lord’s³⁴ table, without division, or distinction. But if any one be hungry, let him eat at home to satisfy his hunger, that so the disorder in these meetings may not draw on you the punishment above mentioned. What else remains to be rectified in this matter, I will set in order when I come.

SECT. IX.

CHAPTER XII. 1. — XIV. 40.

CONTENTS.

The corinthians seem to have inquired of St. Paul, “What order of precedency and preference men were to have, in their assemblies, in regard of their spiritual gifts?” Nay, if we may guess by his answer, the question they seem more particularly to have proposed, was, “Whether those, who had the gift of tongues, ought not to take place, and speak first, and be first heard in their meetings?” Concerning this, there seems to have been some strife, maligning, and disorder among them, as may be collected from ch. xii. 21 — 25, and xiii. 4, 5, and xiv. 40.

To this St. Paul answers in these three chapters, as followeth

That they had all been heathen idolaters, and so being deniers of Christ, were in that state none of them spiritual: but that now, being christians, and owning Jesus to be the Lord (which could not be done without the Spirit of God), they were all πνευματικοὶ, spiritual, and so there was no reason for one to undervalue another, as if he were not spiritual, as well as himself, chap. xii. 1 — 3.

That though there be diversity of gifts, yet they are all by the same Spirit, from the same Lord, and the same God, working them all in every one, according to his good pleasure. So that, in this respect also, there is no difference or precedency; no occasion for any one’s being puffed up, or affecting priority, upon account of his gifts, chap. xii. 4 — 11.

That the diversity of gifts is for the use and benefit of the church, which is Christ’s body, wherein the members (as in the natural body) of meaner functions are as much parts, and as necessary in their use to the good of the whole, and therefore to be honoured, as much as any other. The union they have, as members in the same body, makes them all equally share in one another’s good and evil, gives them a mutual esteem and concern one for another, and leaves no room for contests or divisions amongst them, about their gifts, or the honour and place due to them, upon that account, chap. xii. 12 — 31.

That though gifts have their excellency and use, and those, who have them, may be zealous in the use of them; yet the true and sure way for a man to get an excellency and preference above others, is the enlarging himself in charity, and excelling in that, without which a christian, with all his spiritual gifts, is nothing, chap. xiii. 1 — 13.

In the comparison of spiritual gifts, he gives those the precedency, which edify most; and, in particular, prefers prophesying to tongues, chap. xiv. 1 — 40.

SECT. IX. N. 1.

CHAPTER XII. 1 — 3.

TEXT.

¹ Now concerning spiritual gifts, brethren, I would not have you ignorant.

² Ye know that ye were Gentiles, carried away unto these dumb idols, even as ye were led.

³ Wherefore I give you to understand, that no man, speaking by the Spirit of God, calleth Jesus accursed; and that no man can say, that Jesus is the Lord, but by the Holy Ghost.

PARAPHRASE.

¹ As to spiritual men, or men assisted and acted by the Spirit, I shall inform you; for I would not have² you be ignorant. You yourselves know, that you were heathens, engaged in the worship of stocks and stones, dumb, senseless idols, by those, who were then³ your leaders. Whereupon let me tell you, that no one, who opposes Jesus Christ, or his religion, has the Spirit of God. And whoever is brought to own Jesus to be the Messiah, the Lord, does it by the Holy Ghost. And therefore, upon account of having the Spirit, you can none of you lay any claim to superiority; or have any pretence to slight any of your brethren, as not having the Spirit of God, as well as you. For all, that own our Lord Jesus Christ, and believe in him, do it by the Spirit of God, i. e. can do it upon no other ground, but revelation, coming from the Spirit of God.

SECT. IX. N. 2.

CHAPTER XII. 4 — 11.

CONTENTS.

Another consideration, which St. Paul offers, against any contention for superiority, or pretence to precedency, upon account of any spiritual gift, is, that those distinct gifts are all of one and the same Spirit, by the same Lord; wrought in every one, by God alone, and all for the profit of the church.

TEXT.

⁴ Now there are diversities of gifts, but the same Spirit.

⁵ And there are differences of administrations, but the same Lord.

⁶ And there are diversities of operations, but it is the same God which worketh all in all.

⁷ But the manifestation of the Spirit is given to every man, to profit withal.

⁸ For to one is given, by the Spirit, the word of wisdom; to another, the word of knowledge by the same Spirit:

⁹ To another, faith by the same Spirit; to another, the gifts of healing, by the same Spirit;

¹⁰ To another, the working of miracles; to another, prophecy; to another, discerning of spirits; to another, divers kinds of tongues; to another, the interpretation of tongues.

¹¹ But all these worketh that one and the self-same Spirit, dividing to every man severally, as he will.

PARAPHRASE.

⁴ Be not mistaken, by the diversity of gifts; for, though there be diversity of gifts among christians, yet there is no diversity of spirits, they all come from one and⁵ the same Spirit. Though there be diversities of offices in the church, yet all the officers have but one⁶ Lord. And though there be various influxes, whereby christians are enabled to do extraordinary things, yet it is the same God, that works all these extraordinary⁷ gifts, in every one that has them. But the way, or gift, wherein every one, who has the Spirit, is to show it, is given him, not for his private advantage, or honour, but for the good and advantage of⁸ the church. For instance; to one is given, by the spirit, the word of wisdom, or the revelation of the gospel of Jesus Christ, in the full latitude of it: such as was given to the apostles: to another, by the same spirit, the knowledge¶ of the true sense and true meaning of the holy scriptures of the Old Testament, for the explaining and confirmation of the gospel:⁹ To another, by the same Spirit, is given an undoubting persuasion, and stedfast confidence, of performing what he is going about; to another, the gift of¹⁰ curing diseases, by the same Spirit; To another, the working of miracles; to another, prophecy; to another, the discerning by what spirit men did any extraordinary operation; to another, diversity of languages; to

another, the interpretation of languages.¹¹ All which gifts are wrought in believers, by one and the same Spirit, distributing to every one, in particular, as he thinks fit.

SECT. IX. N. 3.

CHAPTER XII. 12 — 31.

CONTENTS.

From the necessarily different functions in the body, and the strict union, nevertheless, of the members, adapted to those different functions, in a mutual sympathy and concern one for another; St. Paul here farther shows, that there ought not to be any strife, or division, amongst them, about precedency and preference, upon account of their distinct gifts.

TEXT.

¹² For, as the body is one, and hath many members, and all the members of that one body, being many, are one body: so also is Christ.

¹³ For, by one Spirit, are we all baptized into one body, whether we be jews or gentiles, whether we be bond or free; and have been all made to drink into one Spirit.

¹⁴ For the body is not one member, but many.

¹⁵ If the foot shall say, "Because I am not the hand, I am not of the body:" is it therefore not of the body?

¹⁶ And if the ear shall say, "Because I am not the eye, I am not of the body:" is it therefore not of the body?

¹⁷ If the whole body were an eye, where were the hearing? If the whole were hearing, where were the smelling?

¹⁸ But now hath God set the members, every one of them, in the body, as it hath pleased him.

¹⁹ And if they were all one member, where were the body?

²⁰ But now are they many members, yet but one body.

²¹ And the eye cannot say unto the hand, "I have no need of thee:" nor, again, the head to the feet, "I have no need of you."

²² Nay, much more those members of the body, which seem to be more feeble, are necessary.

²³ And those members of the body, which we think to be less honourable, upon these we bestow more abundant honour, and our uncomely parts have more abundant comeliness.

²⁴ For our comely parts have no need: but God hath tempered the body together, having given more abundant honour to that part which lacked:

²⁵ That there should be no schism in the body; but that the members should have the same care one for another.

²⁶ And whether one member suffer, all the members suffer with it: or one member be honoured, all the members rejoice with it.

²⁷ Now, ye are the body of Christ, and members in particular.

²⁸ And God hath set some in the church, first apostles, secondarily prophets, thirdly teachers, after that miracles, then gifts of healings, helps, governments, diversities of tongues.

²⁹ Are all apostles? Are all prophets? Are all teachers? Are all workers of miracles?

³⁰ Have all the gifts of healing? Do all speak with tongues? Do all interpret?

³¹ But covet earnestly the best gifts: and yet show I unto you a more excellent way.

PARAPHRASE.

¹² For as the body, being but one, hath many members, and all the members of the body, though many, yet make but one body; so is Christ, in respect¹³ of his mystical body, the church. For by one Spirit we are all baptized into one church, and are thereby made one body, without any pre-eminence to the jew above the gentile, to the free above the bond-man: and the blood of Christ, which we all partake of, in the Lord's supper, makes us all have one life, one spirit, as the same blood, diffused through the whole body, communicates the ¹⁴ same life and spirit to all the members. For the body is not one sole member, but consists of many members, all vitally united in one common sympathy¹⁵ and usefulness. If any one have not that function, or¹⁶ dignity, in the church, which he desires, He must not, therefore, declare that he is not of the church, he does not thereby cease to be a member of the¹⁷ church. There is as much need of several and distinct gifts and functions in the church, as there is of different senses and members in the body; and the meanest and least honourable would be missed, if it were

wanting, and the whole body would¹⁸ suffer by it. Accordingly, God hath fitted several persons, as it were so many distinct members, to several offices and functions in the church, by proper and peculiar gifts and abilities, which he has bestowed on them, according to his good pleasure.¹⁹ But if all were but one member, what would become of the body? There would be no such thing as an human body; no more could the church be edified, and framed into a growing lasting society, if the gifts²⁰ of the Spirit were all reduced to one. But now, by the various gifts of the Spirit, bestowed on its several members, it is as a well organized body, wherein the most eminent member cannot despise the meanest.²¹ The eye cannot say to the hand, “I have no need of thee;” nor the head to the feet, “I have ²² no need of you.” It is so far from being so, that the parts of the body, that seem in themselves weak,²³ are nevertheless of absolute necessity. And those parts which are thought least honourable we take care always to cover with the more respect; and our least graceful parts have thereby a more studied and adventitious²⁴ comeliness. For our comely parts have no need of any borrowed helps, or ornaments: but God hath so contrived the symmetry of the body, that he hath added honour to those parts, that might seem²⁵ naturally to want it: That there might be no disunion, no schism in the body; but that the members should all have the same care and concern one for²⁶ another; And all equally partake and share in the harm, or honour, that is done to any of them in particular.²⁷ Now, in like manner, you are, by your particular gifts, each of you, in his peculiar station and aptitude, members of the body of Christ, which is²⁸ the church: Wherein God hath set, first some apostles, secondly prophets, thirdly teachers, next workers of miracles, then those, who have the gift of healing, helpers, governors, and such as are able to speak ²⁹ diversity of tongues. Are all apostles? Are all prophets? Are all teachers? Are all workers of³⁰ miracles? Have all the gift of healing? Do all speak diversity of tongues? Are all interpreters of³¹ tongues? But ye contest one with another, whose particular gift is best, and most preferable; but I will show you a more excellent way, viz. mutual good-will, affection and charity.

SECT. IX. N. 4.

CHAPTER XIII. 1 — 13.

CONTENTS.

St. Paul having told the corinthians, in the last words of the preceding chapter, that he would show them a more excellent way, than the emulous producing of their gifts in the assembly, he, in this chapter tells them, that this more excellent way is charity, which he at large explains, and shows the excellency of.

TEXT.

¹ Though I speak with the tongues of men, and of angels, and have not charity, I am become as sounding brass, or a tinkling cymbal.

² And though I have the gift of prophecy, and understand all mysteries, and all knowledge; and though I have all faith, so that I could remove mountains, and have no charity, I am nothing.

³ And though I bestow all my goods to feed the poor, and though I give my body to be burned, and have not charity, it profiteth me nothing.

⁴ Charity suffereth long, and is kind; charity envieth not; charity vaunteth not itself, is not puffed up;

⁵ Doth not behave itself unseemly, seeketh not her own, is not easily provoked, thinketh no evil;

⁶ Rejoiceth not in iniquity, but rejoiceth in the truth:

⁷ Beareth all things, believeth all things, hopeth all things, endureth all things.

⁸ Charity never faileth: but whether there be prophecies, they shall fail; whether there be tongues, they shall cease; whether there be knowledge, it shall vanish away.

⁹ For we know in part, and we prophesy in part.

¹⁰ But when that which is perfect is come, then that which is in part shall be done away.

¹¹ When I was a child, I spake as a child, I thought as a child; but when I became a man, I put away childish things.

¹² For now we see through a glass, darkly; but then face to face: now I know in part; but then shall I know, even as also I am known.

¹³ And now abideth faith, hope, charity, these three: but the greatest of these is charity.

PARAPHRASE.

¹ If I speak all the languages of men and angels, and yet have not charity, to make use of them entirely for the good and benefit of others, I am no better than a sounding brass, or noisy cymbal, which fills the ears of others, without any advantage to itself,² by the sound it makes. And if I have the gift of prophecy, and see, in the law and the prophets, all the mysteries contained in them, and comprehend all the knowledge they teach; and if I have faith to the highest degree, and power of miracles, so as to be able to remove mountains, and have not charity,³ I am nothing: I am of no value. And if I bestow all I have, in relief of the poor, and give myself to be burnt, and have not charity, it profits me nothing.⁴ Charity is long-suffering, is gentle and benign, without⁵ emulation, insolence, or being puffed up; Is not ambitious, nor at all self-interested, is not sharp upon⁶ others failings, or inclined to ill interpretations: Charity rejoices with others, when they do well; and, when any thing is amiss, is troubled, and covers their failings:⁷ Charity believes well, hopes well of every one,⁸ and patiently bears with every thing: Charity will never cease, as a thing out of use; but the gifts of prophecy, and tongues, and the knowledge whereby men look into, and explain the meaning of the scriptures, the time will be, when they will be laid aside,⁹ as no longer of any use. For the knowledge we have now in this state, and the explication we give of scripture, ¹⁰ is short, partial, and defective. But when, hereafter, we shall be got into the state of accomplishment and perfection, wherein we are to remain in the other world, there will no longer be any need of these imperfecter ways of information, whereby¹¹ we arrive at but a partial knowledge here. Thus, when I was in the imperfect state of childhood, I talked, I understood, I reasoned after the imperfect manner of a child: but, when I came to the state and perfection of manhood, I laid aside those childish¹² ways. Now we see but by reflection, the dim, and as it were, enigmatical representation of things: but then we shall see things directly, and as they are in themselves, as a man sees another, when they are face to face. Now I have but a superficial, partial knowledge of things; but then I shall have an intuitive, comprehensive knowledge of them, as I myself am known, and lie open to the view of superiour, seraphic beings, not by the obscure and imperfect¹³ way of deductions and reasoning. But then, even in that state, faith, hope, and charity, will remain: but the greatest of the three is charity.

SECT. IX. N. 5.

CHAPTER XIV. 1 — 40.

CONTENTS.

St. Paul, in this chapter, concludes his answer to the corinthians, concerning spiritual men, and their gifts; and having told them, that those were most preferable, that tended most to edification; and particularly shown, that prophecy was to be preferred to tongues; he gives them directions for the decent, orderly, and profitable exercise of their gifts, in their assemblies.

TEXT.

¹ Follow after charity, and desire spiritual gifts, but rather that ye may prophesy.

² For he, that speaketh in an unknown tongue, speaketh not unto men, but unto God: for no man understandeth him; howbeit, in the Spirit, he speaketh mysteries.

³ But he, that prophesieth, speaketh unto men, to edification, and exhortation, and comfort.

⁴ He that speaketh in an unknown tongue edifieth himself: but he, that prophesieth, edifieth the church.

⁵ I would that ye all spake with tongues, but rather that ye prophesied: for greater is he that prophesieth, than he that speaketh with tongues, except he interpret, that the church may receive edifying.

⁶ Now, brethren, if I come unto you, speaking with tongues, what shall I profit you, except I shall speak to you, either by revelation, or by knowledge, or by prophesying, or by doctrine?

⁷ And even things without life, giving sound, whether pipe or harp, except they give a distinction in the sounds, how shall it be known what is piped, or harped?

⁸ For if the trumpet give an uncertain sound, who shall prepare himself to the battle?

⁹ So likewise you, except ye utter by the tongue words easy to be understood, how shall it be known what is spoken? For ye shall speak into the air.

¹⁰ There are, it may be, so many kinds of voices in the world, and none of them is without signification.

¹¹ Therefore, if I know not the meaning of the voice, I shall be unto him that speaketh a barbarian; and he that speaketh shall be a barbarian unto me.

¹² Even so ye, forasmuch as ye are zealous of spiritual gifts, seek that ye may excel to the edifying of the church.

¹³ Wherefore, let him, that speaketh in an unknown tongue, pray that he may interpret.

¹⁴ For if I pray in an unknown tongue, my spirit prayeth, but my understanding is unfruitful.

¹⁵ What is it then? I will pray with the Spirit, and I will pray with the understanding also: I will sing with the Spirit, and I will sing with the understanding also.

¹⁶ Else, when thou shalt bless with the Spirit, how shall he that occupieth the room of the unlearned, say Amen, at thy giving of thanks; seeing he understandeth not what thou sayest?

¹⁷ For thou verily givest thanks well, but the other is not edified.

¹⁸ I thank my God, I speak with tongues more than you all:

¹⁹ Yet in the church I had rather speak five words with my understanding, that by my voice I might teach others also, than ten thousand words in an unknown tongue.

²⁰ Brethren, be not children in understanding: howbeit, in malice be ye children, but in understanding be men.

²¹ In the law it is written, "With men of other tongues, and other lips, will I speak unto this people: and yet, for all that, will they not hear me, saith the Lord."

²² Wherefore tongues are for a sign, not to them that believe, but to them that believe not: but prophesying serveth not for them that believe not, but for them which believe.

²³ If, therefore, the whole church be come together into one place, and all speak with tongues, and there come in those, that are unlearned, or unbelievers, will they not say, that ye are mad?

²⁴ But if all prophesy, and there come in one that believeth not, or one unlearned, he is convinced of all, he is judged of all.

²⁵ And thus are the secrets of his heart made manifest! and so, falling down on his face, he will worship God, and report that God is in you of a truth.

²⁶ How is it then, brethren? When ye come together, every one of you hath a psalm, hath a doctrine, hath a tongue, hath a revelation, hath an

interpretation. Let all things be done to edifying.

²⁷ If any man speak in an unknown tongue, let it be by two, or at the most by three, and that by course; and let one interpret.

²⁸ But if there be no interpreter, let him keep silence in the church; and let him speak to himself and to God.

²⁹ Let the prophets speak, two or three, and let the other judge.

³⁰ If any thing be revealed to another, that sitteth by, let the first hold his peace.

³¹ For ye may all prophesy, one by one, that all may learn, that all may be comforted.

³² And the spirits of the prophets are subject to the prophets.

³³ For God is not the author of confusion, but of peace, as in all churches of the saints.

³⁴ Let your women keep silence in the churches: for it is not permitted unto them to speak; but they are commanded to be under obedience, as also saith the law.

³⁵ And if they will learn any thing, let them ask their husbands at home: for it is a shame for women to speak in the church.

³⁶ What! came the word of God out from you? Or came it unto you only?

³⁷ If any man think himself to be a prophet, or spiritual, let him acknowledge, that the things, that I write unto you, are the commandments of the Lord.

³⁸ But if any man be ignorant, let him be ignorant.

³⁹ Wherefore, brethren, covet to prophesy, and forbid not to speak with tongues.

⁴⁰ Let all things be done decently, and in order.

PARAPHRASE.

¹ Let your endeavours, let your pursuit, therefore, be after charity; not that you should neglect the use² of your spiritual gifts, especially the gift of prophecy: ² For he, that speaks in an unknown tongue, speaks to God alone, but not to men: for nobody understands him; the things he utters, by the Spirit, in an unknown tongue, are mysteries, things not³ understood, by those who hear them. But he, that prophesieth, speaks to men, who are exhorted and comforted thereby, and helped forwards in religion⁴ and piety. He that speaks in an unknown tongue, edifies himself alone; but he that

prophesieth, edifieth ⁵ the church. I wish that ye had all the gift of tongues, but rather that ye all prophesied; for greater is he that prophesieth, than he that speaks with tongues, unless he interprets what he delivers in an unknown tongue, that the church may be edified by it.⁶ For example, should I apply myself to you in a tongue you knew not, what good should I do you, unless I interpreted to you what I said, that you might understand the revelation, or knowledge, or prophecy,⁷ or doctrine contained in it? Even inanimate instruments of sound, as pipe or harp, are not made use of, to make an insignificant noise; but distinct notes, expressing mirth, or mourning, or the like, are played upon them, whereby the tune ⁸ and composure are understood. And if the trumpet sound not some point of war, that is understood, the⁹ soldier is not thereby instructed what to do. So likewise ye, unless with the tongue, which you use, utter words of a clear and known signification to your hearers, you talk to the wind; for your auditors¹⁰ understand nothing that you say. There is a great number of significant languages in the world, I¹¹ know not how many, every nation has its own. If then I understand not another's language, and the force of his words, I am to him, when he speaks, a barbarian; and whatever he says, is all gibberish to me; and so is it with you; ye are barbarians one to another, as far as ye speak to one another in unknown¹² tongues. But since there is emulation amongst you, concerning spiritual gifts, seek to abound in the exercise of those which tend most to the edification¹³ of the church. Wherefore, let him that speaks an unknown tongue, pray that he may interpret what¹⁴ he says. For if I pray in the congregation in an unknown tongue, my spirit, it is true, accompanies my words, which I understand, and so my spirit prays; but my meaning is unprofitable to others ¹⁵ who understand not my words. What, then, is to be done in the case? Why, I will, when moved to it by the Spirit, pray in an unknown tongue, but so that my meaning may be understood by others i. e. I will not do it but when there is somebody by, to interpret. And so will I do also in singing; I will sing by the Spirit, in an unknown tongue; but I will take care that the meaning of what I sing shall¹⁶ be understood by the assistants. And thus ye shall all do, in all like cases. For if thou, by the impulse of the Spirit, givest thanks to God, in an unknown tongue, which all understand not, how shall the hearer, who, in this respect, is unlearned, and, being ignorant in that tongue, knows not what thou sayest, how shall he say Amen? How shall he join ¹⁷ in the thanks, which he understands not? Thou, indeed, givest thanks well; but the

other is¹⁸ not at all edified by it. I thank God, I speak with¹⁹ tongues more than you all: But I had rather speak in the church five words that are understood, than in an unknown tongue, ten thousand, that others understand not.²⁰ My brethren, be not, in understanding, children, who are apt to be taken with the novelty, or strangeness of things: in temper and disposition, be as children, void of malice; but, in matters of understanding, be ye perfect men, and use your understandings.²¹ Be not so zealous for the use of unknown tongues in the church; they are not so proper there: it is written in the law, “With men of other tongues, and other lips, will I speak unto this people: and yet, for all that, will they²² not hear me, saith the Lord.” So that, you see, the speaking of strange tongues miraculously, is not for those, who are already converted, but for a sign to those, who are unbelievers: but prophecy is for believers, and not for unbelievers; and therefore,²³ fitter for your assemblies. If, therefore, when the church is all come together, you should all speak in unknown tongues, and men unlearned, or unbelievers should come in, would they not say,²⁴ “that you are mad?” But if ye all prophesy, and an unbeliever, or an ignorant man, come in, the discourse he hears from you reaching his²⁵ conscience, And the secret thoughts of his heart, he is convinced, and wrought upon; and so, falling down, worships God, and declares that God is certainly²⁶ amongst you. What then is to be done, brethren? When you come together, every one is ready, one with a psalm, another with a doctrine, another with a strange tongue, another with a revelation, another with an interpretation. Let all things be ²⁷ done to edification. Even though any one speak in an unknown tongue, which is a gift that seems least intended for edification; let but two or three at most, at any one meeting, speak in an unknown tongue; and that separately, one after another; and²⁸ let there be but one interpreter. But if there be no-body present, that can interpret, let not any one use his gift of tongues in the congregation; but let him, silently, within himself, speak to himself, and to²⁹ God. Of those, who have the gift of prophecy, let but two or three speak at the same meeting, and let³⁰ the others examine and discuss it. But if, during their debate, the meaning of it be revealed to one that sits by, let him, that was discoursing of it before,³¹ give off. For ye may all prophesy, one after another, that all may in their turns be hearers, and ³² receive exhortation and instruction. For the gifts of the Holy Ghost are not like the possession of the heathen priests, who are not masters of the Spirit that possesses them. But

christians, however filled with the Holy Ghost, are masters of their own actions, can speak, or hold their peace, as they see occasion, and are not hurried away by any compulsion.³³ It is, therefore, no reason for you to speak, more than one at once, or to interrupt one another, because you find yourselves inspired and moved by the Spirit of God. For God is not the author of confusion and disorder, but of quietness and peace. And this is what is observed in all the churches of³⁴ God. As to your women, let them keep silence in your assemblies; for it is not permitted them to discourse there, or pretend to teach; that does no way suit their state of subjection, appointed them in the law.³⁵ But, if they have a mind to have any thing explained to them, that passes in the church, let them, for their information, ask their husbands at home, for it is a shame for women to discourse and debate with³⁶ men publicly, in the congregation. What! do you pretend to give laws to the church of God, or to a right to do what you please amongst yourselves, as if the gospel began at Corinth, and issuing from you was communicated to the rest of the world; or, as if it were communicated to you alone,³⁷ of all the world? If any man amongst you think, that he hath the gift of prophecies, and would pass for a man knowing in the revealed will of God, let him acknowledge, that these rules, which I have here given, are the commandments of the Lord.³⁸ But if any man be ignorant that they are so, I have no more to say to him; I leave him to his ignorance.³⁹ To conclude, brethren, let prophecy have the preference in the exercise of it; but yet forbid⁴⁰ not the speaking unknown tongues. But whether a man prophesies, or speaks with tongues, whatever spiritual gift he exercises in your assemblies, let it be done without any indecorum, or disorder.

SECT. X.

CHAPTER XV. 1 — 58.

CONTENTS.

After St. Paul (who had taught them another doctrine) had left Corinth, some among them denied the resurrection of the dead. This he confutes by Christ's resurrection, which the number of witnesses, yet remaining, that had seen him, put past question, besides the constant inculcating of it, by all the apostles, every-where. From the resurrection of Christ, thus established,

he infers the resurrection of the dead; shows the order they shall rise in, and what sort of bodies they shall have.

TEXT.

¹ Moreover, brethren, I declare unto you the gospel which I preached unto you, which also you have received, and wherein ye stand;

² By which also ye are saved, if ye keep in memory what I preached unto you, unless ye have believed in vain.

³ For I delivered unto you, first of all, that which I also received, how that Christ died for our sins, according to the scriptures:

⁴ And that he was buried, and that he rose again the third day, according to the scriptures:

⁵ And that he was seen of Cephas, then of the twelve:

⁶ After that, he was seen of above five hundred brethren at once; of whom the greater part remained unto this present, but some are fallen asleep:

⁷ After that, he was seen of James: then, of all the apostles.

⁸ And, last of all, he was seen of me also, as of one born out of due time.

⁹ For I am the least of the apostles, that am not meet to be called an apostle, because I persecuted the church of God.

¹⁰ But by the grace of God I am what I am: and his grace, which was bestowed upon me, was not in vain; but I laboured more abundantly than they all: yet not I, but the grace of God which was with me.

¹¹ Therefore, whether it were I or they, so we preach, and so ye believed.

¹² Now, if Christ be preached, that he rose from the dead, how say some among you, that there is no resurrection of the dead?

¹³ But if there be no resurrection of the dead, then is Christ not risen.

¹⁴ And, if Christ be not risen, then is our preaching vain, and your faith is also vain.

¹⁵ Yea, and we are found false witnesses of God; because we have testified of God, that he raised up Christ: whom he raised not up, if so be that the dead rise not.

¹⁶ For if the dead rise not, then is not Christ raised.

¹⁷ And if Christ be not raised, your faith is vain; ye are yet in your sins.

¹⁸ Then they also, which are fallen asleep in Christ, are perished.

¹⁹ If in this life only we have hope in Christ, we are of all men most miserable.

²⁰ But, now, is Christ risen from the dead, and become the first-fruits of them that slept.

²¹ For since by man came death, by man came also the resurrection of the dead.

²² For, as in Adam all die, even so in Christ shall all be made alive.

²³ But every man in his own order: Christ the first-fruits, afterwards they that are Christ's, at his coming.

²⁴ Then cometh the end, when he shall have delivered up the kingdom to God, even the Father; when he shall have put down all rule, and all authority, and power.

²⁵ For he must reign, till he hath put all enemies under his feet.

²⁶ The last enemy, that shall be destroyed, is death.

²⁷ For he hath put all things under his feet. But when he saith, "All things are put under him," it is manifest that he is excepted, which did put all things under him.

²⁸ And, when all things shall be subdued unto him, then shall the Son also himself be subject unto him, that put all things under him, that God may be all in all.

²⁹ Else what shall they do which are baptized for the dead, if the dead rise not at all? Why are they, then, baptized for the dead?

³⁰ And why stand we in jeopardy every hour?

³¹ I protest, by your rejoicing, which I have in Christ Jesus our Lord, I die daily.

³² If, after the manner of men, I have fought with beasts at Ephesus, what advantageth it me, if the dead rise not? Let us eat, and drink; for to-morrow we die.

³³ Be not deceived: evil communications corrupt good manners.

³⁴ Awake to righteousness, and sin not; for some have not the knowledge of God: I speak this to your shame.

³⁵ But some man will say, "How are the dead raised up? And with what body do they come?"

³⁶ Thou fool! that, which thou sowest, is not quickened, except it die.

³⁷ And that which thou sowest, thou sowest not that body that shall be, but bare grain, it may chance of wheat, or of some other grain.

³⁸ But God giveth it a body, as it hath pleased him, and to every seed his own body.

³⁹ All flesh is not the same flesh: but there is one kind of flesh of men, another flesh of beasts, another of fishes, and another of birds.

⁴⁰ There are also celestial bodies, and bodies terrestrial: but the glory of the celestial is one, and the glory of the terrestrial is another.

⁴¹ There is one glory of the sun, and another glory of the moon, and another glory of the stars; for one star differeth from another star in glory.

⁴² So also is the resurrection of the dead. It is sown in corruption, it is raised in incorruption;

⁴³ It is sown in dishonour, it is raised in glory: it is sown in weakness, it is raised in power.

⁴⁴ It is sown a natural body, it is raised a spiritual body. There is a natural body, and there is a spiritual body.

⁴⁵ And so it is written, The first man, Adam, was made a living soul, the last Adam was made a quickening spirit.

⁴⁶ Howbeit, that was not first which is spiritual, but that which is natural; and afterward, that which is spiritual.

⁴⁷ The first man is of the earth, earthy: the second man is the Lord from heaven.

⁴⁸ As is the earthy, such are they also that are earthy: and as is the heavenly, such are they also that are heavenly.

⁴⁹ And, as we have borne the image of the earthy, we shall also bear the image of the heavenly.

⁵⁰ Now this I say, brethren, that flesh and blood cannot inherit the kingdom of God; neither doth corruption inherit incorruption.

⁵¹ Behold, I show you a mystery; we shall not all sleep, but we shall all be changed,

⁵² In a moment, in the twinkling of an eye, at the last trump, (for the trumpet shall sound;) and the dead shall be raised incorruptible, and we shall be changed.

⁵³ For this corruptible must put on incorruption, and this mortal must put on immortality.

⁵⁴ So when this corruptible shall have put on incorruption, and this mortal shall have put on immortality, then shall be brought to pass the saying that is written, "Death is swallowed up in victory."

⁵⁵ O death, where is thy sting? O grave, where is thy victory?

⁵⁶ The sting of death is sin; and the strength of sin is the law.

⁵⁷ But thanks be to God, which giveth us the victory, through our Lord Jesus Christ.

⁵⁸ Therefore, my beloved brethren, be ye stedfast, unmoveable, always abounding in the work of the Lord; forasmuch as ye know that your labour is not in vain in the Lord.

PARAPHRASE.

¹ In what I am now going to say to you, brethren, I make known to you no other gospel, than what I formerly preached to you, and you received, and have hitherto professed, and by which alone you are to be² saved. This you will find to be so, if you retain in your memories what it was that I preached to you, which you certainly do, unless you have taken up the christian name and profession to no purpose.³ For I delivered to you, and particularly insisted on this, which I had received, viz. that Christ died for our sins, according to the scriptures:⁴ And that he was buried, and that he was raised again, the third day, according to the scriptures: ⁵ And that he was seen by Peter; afterwards by the⁶ twelve apostles: And after that, by above five hundred christians at once; of whom the greatest part remain alive to this day, but some of them are deceased:⁷ Afterwards he was seen by James; and after⁸ that, by all the apostles: Last of all, he was seen⁹ by me also, as by one born before my time. For I am the least of the apostles, not worthy the name of an apostle; because I persecuted the church of¹⁰ God. But, by the free bounty of God, I am what it hath pleased him to make me: and this favour, which he hath bestowed on me, hath not been altogether fruitless; for I have laboured in preaching of the gospel, more than all the other apostles: which yet I do not ascribe to any thing of myself, but to¹¹ the favour of God, which accompanied me. But whether I, or the other apostles, preached, this was that which we preached, and this was the faith ye were baptized into, viz. that Christ died, and rose ¹² again the third day. If, therefore, this be so, if this be that, which has been preached to you, viz. that Christ has been raised from the dead; how comes it that some amongst you say, as they do, that there¹³ is no resurrection of the dead? And if there be no resurrection of the dead, then even Christ himself is¹⁴ not risen: And if Christ be not risen, our preaching is idle talk, and your believing it is to no purpose.¹⁵ And we, who pretend to be witnesses for God, and his truth, shall

be found lyars, bearing witness against God, and his truth, affirming, that he raised Christ, whom in truth he did not raise, if it be so, that the¹⁶ dead are not raised. For if the dead shall not be¹⁷ raised, neither is Christ raised. And if Christ be not risen, your faith is to no purpose; your sins are not forgiven, but you are still liable to the punishment¹⁸ due to them. And they also, who died in the¹⁹ belief of the gospel, are perished and lost. If the advantages we expect from Christ, are confined to this life, and we have no hope of any benefit from him, in another life hereafter, we christians are the²⁰ most miserable of all men. But, in truth, Christ is actually risen from the dead, and become the first-fruits²¹ of those who were dead. For, since by man came death, by man came also the resurrection of²² the dead, or restoration to life. For, as the death that all men suffer, is owing to Adam, so the life, that all shall be restored to again, is procured them²³ by Christ. But they shall return to life again not all at once, but in their proper order: Christ, the first-fruits, is already risen; next after him shall rise those, who are his people, his church, and this²⁴ shall be at his second coming. After that shall be the day of judgment, which shall bring to a conclusion and finish the whole dispensation to the race and posterity of Adam, in this world: when Christ shall have delivered up the kingdom to God, the Father; which he shall not do, till he hath destroyed all empire, power, and authority, that²⁵ shall be in the world besides. For he must reign, till he has totally subdued and brought all his enemies²⁶ into subjection to his kingdom. The last enemy,²⁷ that shall be destroyed, is death. For God hath subjected all things to Christ: but when it is said, “All things are subjected,” it is plain that he is to be excepted, who did subject all things to him.²⁸ But when all things shall be actually reduced under subjection to him, then, even the Son himself, i. e. Christ and his whole kingdom, he and all his subjects and members, shall be subjected to him, that gave him this kingdom, and universal dominion, that God may immediately govern and influence all.²⁹ Else, what shall they do, who are baptized for the³⁰ dead? And, why do we venture our lives continually?³¹ As to myself, I am exposed, vilified, treated so, that I die daily. And for this I call to witness your glorying against me, in which I really glory, as coming on me for our Lord Jesus Christ’s sake.³² And particularly, to what purpose did I suffer myself to be exposed to wild beasts at Ephesus, if the dead rise not? If there be no resurrection, it is wiser a great deal to preserve ourselves, as long as we can, in a free enjoyment of all the pleasures of this life; for when death comes, as it shortly will,³³ there

is an end of us for ever. Take heed that you be not misled by such discourses: for evil communication³⁴ is apt to corrupt even good minds. Awake from such dreams, as it is fit you should, and give not yourselves up sinfully to the enjoyments of this life. For there are some atheistical people among³⁵ you: this I say to make you ashamed. But possibly it will be asked, “How comes it to pass, that dead men are raised, and with what kind of bodies do they come? Shall they have, at the resurrection, ³⁶ “such bodies as they have now?” Thou fool! does not daily experience teach thee, that the seed, which thou sowest, corrupts and dies, before it³⁷ springs up and lives again! That, which thou sowest, is the bare grain, of wheat, or barley, or the like; but the body, which it has, when it rises up, is different³⁸ from the seed that is sown. For it is not the seed that rises up again, but a quite different body, such as God has thought fit to give it, viz. a plant, of a particular shape and size, which God has appointed³⁹ to each sort of seed. And so, likewise, it is in animals; there are different kinds of flesh: for the flesh of men is of one kind: the flesh of cattle is of another kind; that of fish is different from them both; and the flesh of birds is of a peculiar sort, different⁴⁰ from them all. To look yet farther into the difference of bodies, there be both heavenly and earthly bodies; but the beauty and excellency of the heavenly bodies is of one kind, and that of earthly⁴¹ bodies of another. The sun, moon, and stars, have each of them their particular beauty and brightness, and one star differs from another in⁴² glory. And so shall the resurrection of the dead be: that, which is sown in this world, and comes to die, is a poor, weak, contemptible, corruptible⁴³ thing: When it is raised again, it shall be powerful,⁴⁴ glorious, and incorruptible. The body, we have here, surpasses not the animal nature. At the resurrection, it shall be spiritual. There are both⁴⁵ animal and spiritual bodies. And so it is written, “The first man Adam was made a living soul,” i. e. made of an animal constitution, endowed with an animal life; the second Adam was made of a spiritual constitution, with a power to give life⁴⁶ to others. Howbeit, the spiritual was not first, but the animal; and afterwards the spiritual. ⁴⁷ The first man was of the earth, made up of dust, or earthy particles: the second man is the Lord from⁴⁸ heaven. Those who have no higher an extraction, than barely from the earthy man, they, like him, have barely an animal life and constitution: but those, who are regenerate, and born of the heavenly seed, are, as⁴⁹ he that is heavenly, spiritual and immortal. And as in the animal, corruptible, mortal state, we were born in, we have been like him,

that was earthy; so also shall we, who, at the resurrection, partake of a spiritual life from Christ, be made like him, the Lord from heaven, heavenly, i. e. live, as the spirits in heaven do, without the need of food, or nourishment, to support it, and without infirmities, decay and⁵⁰ death, enjoying a fixed, stable, unfleeting life. This I say to you, brethren, to satisfy those that ask, “with what bodies the dead shall come?” that we shall not at the resurrection have such bodies as we have now: for flesh and blood cannot enter into the kingdom, which the saints shall inherit in heaven; nor are such fleeting, corruptible things as our present bodies are, fitted to that state of immutable incorruptibility.⁵¹ To which let me add, what has not been hitherto discovered, viz. that we shall not all⁵² die, but we shall all be changed, In a moment, in the twinkling of an eye, at the sounding of the last trumpet; for the trumpet shall sound, and the dead shall rise: and as many of us, believers, as are then⁵³ alive, shall be changed. For this corruptible frame and constitution of ours, must put on incorruption,⁵⁴ and from mortal become immortal. And, when we are got into that state of incorruptibility and immortality, then shall be fulfilled what was foretold in these words, “Death is swallowed up of victory;” i. e. death is perfectly subdued and exterminated, by a complete victory over it, so that ⁵⁵ there shall be no death any more. Where, O death, is now that power, whereby thou deprivest men of life? What is become of the dominion of the grave, whereby they were detained prisoners there?⁵⁶ That, which gives death the power of men is sin,⁵⁷ and it is the law, by which sin has this power. But thanks be to God, who gives us deliverance and victory over death, the punishment of sin, by the law, through our Lord Jesus Christ, who has delivered⁵⁸ us from the rigour of the law. Wherefore, my beloved brethren, continue stedfast and unmoveable in the christian faith, always abounding in your obedience to the precepts of Christ, and in those duties which are required of us, by our Lord and Saviour, knowing that your labour will not be lost. Whatsoever you shall do, or suffer for him, will be abundantly rewarded, by eternal life.

SECT. XI.

CHAPTER XVI. 1 — 4.

CONTENTS.

He gives directions concerning their contribution to the poor christians at Jerusalem.

TEXT.

¹ Now concerning the collection for the saints, as I have given order to the churches of Galatia, even so do ye.

² Upon the first day of the week, let every one of you lay by him in store, as God hath prospered him, that there be no gatherings when I come.

³ And when I come, whomsoever you shall approve by your letters, them will I send to bring your liberality unto Jerusalem.

⁴ And if it be meet that I go also, they shall go with me.

PARAPHRASE.

¹ As to the collection for the converts to christianity, who are at Jerusalem, I would have you do, as I² have directed the churches of Galatia. Let every one of you, according as he thrives in his calling, lay aside some part of his gain by itself, which, the first day of the week, let him put into the common treasury of the church, that there may be no need of³ any gathering, when I come. And when I come, those, whom you shall approve of, will I send with letters to Jerusalem, to carry thither your benevolence.⁴ Which if it deserves, that I also should go, they shall go along with me.

SECT. XII.

CHAPTER XVI. 5 — 12.

CONTENTS.

He gives them an account of his own, Timothy's, and Apollos's intention of coming to them.

TEXT.

⁵ Now I will come unto you, when I shall pass through Macedonia (for I do pass through Macedonia:)

⁶ And it may be, that I will abide, yea, and winter with you, that ye may bring me on my journey, whithersoever I go.

⁷ For I will not see you now, by the way; but I trust to tarry awhile with you, if the Lord permit.

⁸ But I will tarry at Ephesus until Pentecost.

⁹ For a great door, and effectual is opened unto me, and there are many adversaries.

¹⁰ Now if Timotheus come, see that he may be with you without fear: for he worketh the work of the Lord, as I also do.

¹¹ Let no man, therefore, despise him; but conduct him forth in peace, that he may come unto me: for I look for him with the brethren.

¹² As touching our brother Apollos, I greatly desired him to come unto you, with the brethren: but his will was not at all to come at this time; but he will come, when he shall have convenient time.

PARAPHRASE.

⁵ I will come unto you, when I have been in Macedonia;⁶ for I intend to take that in my way: And perhaps I shall make some stay, nay, winter with you, that you may bring me going on my way,⁷ whithersoever I go. For I do not intend just to call in upon you, as I pass by; but I hope to spend⁸ some time with you, if the Lord permit. But I shall stay at Ephesus till Pentecost, i. e. Whitsuntide.⁹ For now I have a very fair and promising opportunity given me of propagating the gospel, though¹⁰ there be many opposers. If Timothy come to you, pray take care, that he be easy, and without fear amongst you: for he promotes the work of the¹¹ Lord, in preaching the gospel, even as I do. Let no-body, therefore, despise him; but treat him kindly, and bring him going, that he may come unto me: for I expect him with the brethren.¹² As to brother Apollos, I have earnestly endeavoured to prevail with him to come to you with the brethren: but he has no mind to it at all, at present. He will come, however, when there shall be a fit occasion.

SECT. XIII.

CHAPTER XVI. 13. — 24.

CONTENTS.

The conclusion, wherein St. Paul, according to his custom, leaves with them some, which he thinks most necessary, exhortations, and sends particular

greetings.

TEXT.

¹³ Watch ye, stand fast in the faith, quit you like men, be strong.

¹⁴ Let all your things be done with charity.

¹⁵ I beseech you, brethren, (ye know the house of Stephanas, that it is the first-fruits of Achaia, and that they have addicted themselves to the ministry of the saints)

¹⁶ That ye submit yourselves unto such, and to every one that helpeth with us, and laboureth.

¹⁷ I am glad of the coming of Stephanas, and Fortunatus, and Achaicus: for that, which was lacking on your part, they have supplied.

¹⁸ For they have refreshed my spirit and yours: therefore, acknowledge ye them that are such.

¹⁹ The churches of Asia salute you. Aquila and Priscilla salute you much in the Lord, with the church that is in their house.

²⁰ All the brethren greet you. Greet you one another with an holy kiss.

²¹ The salutation of me, Paul, with mine own hand.

²² If any man love not the Lord Jesus Christ, let him be anathema, maranatha.

²³ The grace of our Lord Jesus Christ be with you.

²⁴ My love be with you all in Christ Jesus. Amen.

PARAPHRASE.

¹³ Be upon your guard, stand firm in the faith, behave yourselves like men, with courage and resolution:¹⁴ And whatever is done amongst you, either in public assemblies, or elsewhere, let it all be done with ¹⁵ affection, and good-will, one to another. You know the house of Stephanas, that they were the first converts of Achaia, and have all along made it¹⁶ their business to minister to the saints: To such, I beseech you to submit yourselves: let such as, with¹⁷ us, labour to promote the gospel, be your leaders. I am glad, that Stephanas, Fortunatus, and Achaicus came to me; because they have supplied what was¹⁸ deficient on your side. For, by the account they have given me of you, they have quieted my mind, and yours too: therefore have a regard to such¹⁹ men as these. The churches of Asia salute you, and so do Aquila and Priscilla, with much christian²⁰ affection; with the church that is

in their house. All the brethren here salute you: salute one another²¹ with an holy kiss. That, which followeth, is the²² salutation of me, Paul, with my own hand. If any one be an enemy to the Lord Jesus Christ, and his gospel, let him be accursed, or devoted to destruction. The Lord cometh to execute vengeance²³ on him. The favour of our Lord Jesus Christ be with you. My love be with you all in Christ²⁴ Jesus. Amen.

A PARAPHRASE AND NOTES ON THE SECOND EPISTLE OF ST. PAUL TO THE CORINTHIANS.

THE SECOND EPISTLE OF ST. PAUL TO THE CORINTHIANS;
WRITTEN FROM ROME IN THE YEAR OF OUR LORD 57, OF NERO
III.

SYNOPSIS.

Saint Paul having writ his first epistle to the corinthians, to try, as he says himself, chap. ii. 9, what power he had still with that church, wherein there was a great faction against him, which he was attempting to break, was in pain, till he found what success it had; chap. ii. 12, 13, and vii. 5. But when he had, by Titus, received an account of their repentance, upon his former letter, of their submission to his orders, and of their good disposition of mind towards him, he takes courage, speaks of himself more freely, and justifies himself more boldly; as may be seen, chap. i. 12, and ii. 14, and vi. 10, and x. 1, and xiii. 10. And, as to his opposers, he deals more roundly and sharply with them, than he had done in his former epistle; as appears from chap. ii. 17, and iv. 2 — 5, and v. 12, and vi. 11 — 16, and xi. 11, and xii. 15.

The observation of these particulars may possibly be of use to give us some light, for the better understanding of his second epistle, especially if we add, that the main business of this, as of his former epistle, is to take off the people from the new leader they had got, who was St. Paul's opposer; and wholly to put an end to the faction and disorder, which that false apostle had caused in the church of Corinth. He also, in this epistle, stirs them up again to a liberal contribution to the poor saints at Jerusalem.

This epistle was writ in the same year, not long after the former.

SECT. I.

CHAPTER I. 1, 2.
INTRODUCTION.

TEXT.

¹ Paul an apostle of Jesus Christ, by the will of God, and Timothy, our brother, unto the church of God, which is at Corinth, with all the saints, which are in all Achaia:

² Grace be to you, and peace, from God our Father, and from the Lord Jesus Christ.

PARAPHRASE.

¹ Paul, an apostle of Jesus Christ, by the will of God, and Timothy, our brother, to the church of God, which is in Corinth, with all the christians, that² are in all Achaia: Favour and peace be to you, from God our Father, and from the Lord Jesus Christ.

SECT. II.

CHAPTER I. 3 — VII. 16.

CONTENTS.

This first part of this second epistle, of St. Paul to the corinthians, is spent in justifying himself, against several imputations, from the opposite faction; and setting himself right, in the opinion of the corinthians. The particulars whereof we shall take notice of, in the following numbers.

SECT. II. N. 1.

CHAPTER I. — 3 — 14.

CONTENTS.

He begins with justifying his former letter to them, which had afflicted them, (vid. chap. vii. 7, 8,) by telling them, that he thanks God for his deliverance out of his afflictions, because it enables him to comfort them, by the example, both of his affliction and deliverance; acknowledging the obligation he had to them, and others, for their prayers and thanks for his deliverance, which, he presumes, they could not but put up for him, since his conscience bears him witness (which was his comfort) that, in his

carriage to all men, and to them more especially, he had been direct and sincere, without any self, or carnal interest; and that what he writ to them had no other design but what lay open, and they read in his words, and did also acknowledge; and he doubted not, but they should always acknowledge; part of them acknowledging also, that he was the man they gloried in, as they shall be his glory in the day of the Lord. From what St. Paul says, in this section, (which, if read with attention, will appear to be writ with a turn of great insinuation) it may be gathered, that the opposite faction endeavoured to evade the force of the former epistle, by suggesting, that, whatever he might pretend, St. Paul was a cunning, artificial, self-interested man, and had some hidden design in it, which accusation appears in other parts of this epistle: as chap. iv. 2, 5.

TEXT.

³ Blessed be God, even the Father of our Lord Jesus Christ, the Father of mercies, and the God of all comfort;

⁴ Who comforteth us, in all our tribulation, that we may be able to comfort them, which are in any trouble, by the comfort wherewith we ourselves are comforted of God.

⁵ For as the sufferings of Christ abound in us, so our consolation also aboundeth by Christ.

⁶ And, whether we be afflicted, it is for your consolation and salvation, which is effectual, in the enduring of the same sufferings, which we also suffer: or, whether we be comforted, it is for your consolation and salvation.

⁷ And our hope of you is stedfast, knowing that, as you are partakers of the sufferings, so shall ye be also of the consolation.

⁸ For we would not, brethren, have you ignorant of our trouble, which came to us in Asia, that we were pressed out of measure, above strength; insomuch that we despaired even of life.

⁹ But we had the sentence of death in ourselves, that we should not trust in ourselves, but in God, which raised the dead:

¹⁰ Who delivered us from so great a death, and doth deliver; in whom we trust, that he will yet deliver us:

¹¹ You also helping together by prayer for us: that, for the gift bestowed upon us, by the means of many persons, thanks may be given by many on our behalf.

¹² For our rejoicing is this, the testimony of our conscience, that in simplicity, and godly sincerity, not with fleshly wisdom, but by the grace of God, we have had our conversation in the world, and more abundantly to you-wards.

¹³ For we write none other things unto you, than what you read, or acknowledge, and I trust you shall acknowledge even to the end.

¹⁴ As also you have acknowledged us in part, that we are your rejoicing, even as ye also are ours, in the day of the Lord Jesus.

PARAPHRASE.

³ Blessed be the God and Father of our Lord Jesus Christ, the Father of mercies, and God of all consolation;⁴ Who comforteth me, in all my tribulations, that I may be able to comfort them, who are in any trouble,⁵ by the comfort, which I receive from him. Because, as I have suffered abundantly for Christ, so through Christ, I have been abundantly comforted; and both⁶ these, for your advantage. For my affliction is for your consolation and relief, which is effected by a patient enduring those sufferings whereof you see an example in me. And again, when I am comforted, it is for your consolation and relief, who may expect the like, from the same compassionate⁷ God and Father. Upon which ground, I have firm hopes, as concerning you; being assured, that as you have had your share of sufferings, so ye shall, likewise,⁸ have of consolation. For I would not have you ignorant, brethren, of the load of afflictions in Asia that were beyond measure heavy upon me, and beyond my strength: so that I could see no way⁹ of escaping with life. But I had the sentence of death in myself, that I might not trust in myself, but in God, who can restore to life even those who¹⁰ are actually dead: Who delivered me from so imminent a danger of death, who doth deliver, and in¹¹ whom I trust, he will yet deliver me: You also joining the assistance of your prayers for me; so that thanks may be returned by many, for the deliverance procured me, by the prayers of many persons.¹² For I cannot doubt of the prayers and concern of you, and many others for me; since my glorying in this, viz. the testimony of my own conscience, that, in plainness of heart, and sincerity before God, not in fleshly wisdom, but by the favour of God directing me, I have behaved myself towards all men, but more particularly towards you.¹³ For I have no design, no meaning, in what I write to you, but what lies open, and is

legible, in what you read: and you yourselves cannot but acknowledge it to be so; and I hope you shall always acknowledge¹⁴ it to the end. As part of you have already acknowledged that I am your glory; as you will be mine, at the day of judgment, when, being my scholars and converts, ye shall be saved.

SECT. II. N. 2.

CHAPTER I. 15. — II. 17.

CONTENTS.

The next thing St. Paul justifies is, his not coming to them. St. Paul had promised to call on the corinthians, in his way to Macedonia; but failed. This his opposers would have to be from levity in him; or a mind, that regulated itself wholly by carnal interest; vid. ver. 17. To which he answers, that God himself, having confirmed him amongst them, by the unction and earnest of his Spirit, in the ministry of the gospel of his Son, whom he, Paul, had preached to them steadily the same, without any the least variation, or unsaying any thing, he had at any time delivered; they could have no ground to suspect him to be an unstable, uncertain man, that would play fast and loose with them, and could not be depended on, in what he said to them. This is what he says, ch. i. 15 — 22.

In the next place, he, with a solemn asseveration, professes, that it was to spare them, that he came not to them. This he explains, ch. i. 23, and ii. 2, 3.

He gives another reason, chap. ii. 12, 13, why he went on to Macedonia, without coming to Corinth, as he had purposed; and that was the uncertainty he was in, by the not coming of Titus, what temper they were in, at Corinth. Having mentioned his journey to Macedonia, he takes notice of the success, which God gave to him there, and every where, declaring of what consequence his preaching was, both to the salvation, and condemnation, of those, who received, or rejected it; professing again his sincerity and disinterestedness, not without a severe reflection on their false apostle. All which we find in the following verses, viz. ch. ii. 14 — 17, and is all very suitable, and pursuant to his design in this epistle, which was to establish his authority and credit amongst the corinthians.

TEXT.

¹⁵ And, in this confidence, I was minded to come unto you before, that you might have a second benefit;

¹⁶ And to pass by you into Macedonia, and to come again, out of Macedonia, unto you; and, of you, to be brought on my way towards Judea.

¹⁷ When I, therefore, was thus minded, did I use lightness? Or the things that I purpose, do I purpose according to the flesh, that with me there should be yea, yea, and nay, nay?

¹⁸ But, as God is true, our word toward you was not yea and nay.

¹⁹ For the Son of God, Jesus Christ, who was preached among you, by us, even by me, and Silvanus, and Timotheus, was not yea and nay; but in him was yea.

²⁰ For all the promises of God in him are yea, and in him amen, unto the glory of God, by us.

²¹ Now he, which establisheth us with you, in Christ, and hath anointed us, is God:

²² Who hath also sealed us, and given the earnest of the Spirit, in our hearts.

²³ Moreover, I call God for a record upon my soul, that to spare you, I came not as yet unto Corinth.

²⁴ Not for that we have dominion over your faith, but are helpers of your joy; for, by faith, ye stand.

II. 1But I determined this with myself, that I would not come again to you in heaviness.

² For if I make you sorry, who is he, then, that maketh me glad, but the same which is made sorry by me?

³ And I wrote this same unto you, lest, when I came, I should have sorrow from them, of whom I ought to rejoice; having confidence in you all, that my joy is the joy of you all.

⁴ For, out of much affliction and anguish of heart, I wrote unto you with many tears; not that you should be grieved, but that ye might know the love, which I have more abundantly unto you.

⁵ But, if any have caused grief, he hath not grieved me, but in part; that I may not overcharge you all.

⁶ Sufficient to such a man is this punishment, which was inflicted of many.

⁷ So that, contrariwise, ye ought rather to forgive him, and comfort him; lest perhaps such an one should be swallowed up with over-much sorrow.

⁸ Wherefore, I beseech you, that ye would confirm your love towards him.

⁹ For to this end, also, did I write, that I might know the proof of you, whether ye be obedient in all things.

¹⁰ To whom ye forgive any thing, I forgive also: for, if I forgive any thing, to whom I forgave it, for your sakes forgave I it, in the person of Christ.

¹¹ Lest Satan should get an advantage of us: for we are not ignorant of his devices.

¹² Furthermore, when I came to Troas, to preach Christ's gospel, and a door was opened unto me of the Lord,

¹³ I had no rest in my spirit, because I found not Titus, my brother: but, taking my leave of them, I went from thence, into Macedonia.

¹⁴ Now thanks be unto God, which always causeth us to triumph in Christ, and maketh manifest the savour of his knowledge, by us, in every place.

¹⁵ For we are, unto God, a sweet savour of Christ, in them that are saved, and in them that perish.

¹⁶ To the one, we are the savour of death unto death; and to the other, the savour of life unto life; and who is sufficient for these things?

¹⁷ For we are not as many, which corrupt the word of God: but as of sincerity, but as of God, in the sight of God, speak we in Christ.

PARAPHRASE.

¹⁵ Having this persuasion, (viz.) of your love and esteem of me, I purposed to come unto you ere this, that you¹⁶ might have a second gratification; And to take you in my way to Macedonia, and from thence return to you again, and, by you, be brought on in¹⁷ my way to Judea. If this fell not out so, as I purposed, am I, therefore, to be condemned of fickleness? Or am I to be thought an uncertain man, that talks forwards and backwards, one that has no regard to his word, any farther than may suit his¹⁸ carnal interest? But God is my witness, that what you have heard from me, has not been uncertain,¹⁹ deceitful, or variable. For Jesus Christ, the Son of God, who was preached among you, by me, and Silvanus, and Timotheus, was not sometimes one thing and sometimes another; but has been shown to be uniformly one and the same, in the counsel,²⁰ or revelation of God. (For the

promises of God do all consent, and stand firm, in him) to the glory of²¹ God, by my preaching. Now it is God, who establishes me with you, for the preaching of the gospel,²² who has anointed, And also sealed me, and given me the earnest of his Spirit, in my heart. ²³ Moreover, I call God to witness, and may I die if it is not so, that it was to spare you, that I came not²⁴ yet to Corinth. Not that I pretend to such a dominion over your faith, as to require you to believe what I have taught you, without coming to you, when I am expected there, to maintain and make it good; for it is by that faith you stand: but I forbore to come, as one concerned to preserve and help forward your joy, which I am tender of, and therefore declined coming to you, whilst I thought you in an estate, that would require severity from me, that II. 1. would trouble you. I purposed in myself, it is true, to come to you again, but I resolved too, it should ² be, without bringing sorrow with me. For if I grieve you, who is there, when I am with you, to comfort me, but those very persons, whom I have discomposed³ with grief? And this very thing, which made you sad, I writ to you, not coming myself; on purpose that, when I came, I might not have sorrow from those, from whom I ought to receive comfort: having this belief and confidence in you all, that you, all of you, make my joy and satisfaction so much your own, that you would remove all cause of disturbance,⁴ before I came. For I writ unto you with great sadness of heart and many tears; not with an intention to grieve you, but that you might know the overflow⁵ of tenderness and affection, which I have for you. But if the fornicator has been the cause of grief, I do not say, he has been so to me, but in some degree to you ⁶ all; that I may not lay a load on him. The correction he hath received from the majority of you, is⁷ sufficient in the case. So that, on the contrary, it is fit rather that you forgive and comfort him, lest he should be swallowed up, by an excess of sorrow.⁸ Wherefore, I beseech you to confirm your love to⁹ him, which I doubt not of. For this, also, was one end of my writing to you, viz. To have a trial of you, and to know whether you are ready to obey me in¹⁰ all things. To whom you forgive any thing, I also forgive. For if I have forgiven any thing, I have forgiven it to him for your sakes, by the authority,¹¹ and in the name of Christ; That we may not be over-reached by Satan: for we are not ignorant of his wiles. ¹² Furthermore, being arrived at Troas, because Titus, whom I expected from Corinth, with news of you, was not come, I was very uneasy there; insomuch that I made not use of the opportunity, which was put into my hands by the Lord, of preaching the¹³ gospel of Christ, for which I came

thither. I hastily left those of Troas, and departed thence to Macedonia.¹⁴ But thanks be to God, in that he always makes me triumph every-where, through Christ, who gives me success in preaching the gospel, and¹⁵ spreads the knowledge of Christ by me. For my ministry, and labour in the gospel, is a service, or sweet-smelling sacrifice to God, through Christ, both in regard of those that are saved, and those that perish.¹⁶ To the one my preaching is of ill savour, unacceptable and offensive, by their rejecting whereof they draw death on themselves; and to the other, being as a sweet savour, acceptable, they thereby receive eternal life. And who is sufficient for these things? And yet, as I said, my service in the gospel is well-pleasing¹⁷ to God. For I am not, as several are, who are hucksters of the word of God, preaching it for gain; but I preach the gospel of Jesus Christ, in sincerity. I speak, as from God himself, and I deliver it, as in the presence of God.

SECT. II. N. 3.

CHAPTER III. 1. — VII. 16.

CONTENTS.

His speaking well of himself (as he did sometimes in his first epistle, and, with much more freedom, in this, which, as it seems, had been objected to him, amongst the corinthians) his plainness of speech, and his sincerity in preaching the gospel, are the things, which he chiefly justifies, in this section, many ways. We shall observe his arguments, as they come in the order of St. Paul's discourse, in which are mingled, with great insinuation, many expressions of an overflowing kindness to the corinthians, not without some exhortations to them.

TEXT.

¹ Do we begin, again, to commend ourselves? or need we as some others, epistles of commendation, to you, or letters of commendation, from you?

² Ye are our epistle, written in our hearts, known and read of all men:

³ Forasmuch as ye are manifestly declared to be the epistle of Christ, ministered by us, written, not with ink, but with the Spirit of the living God; not in tables of stone, but in fleshly tables of the heart.

⁴ And such trust have we, through Christ to Godward.

⁵ Not that we are sufficient of ourselves, to think any thing, as of ourselves; but our sufficiency is of God:

⁶ Who also hath made us able ministers of the New Testament, not of the letter, but of the spirit; for the letter killeth, but the spirit giveth life.

⁷ But if the ministration of death written and ingraven in stones, was glorious, so that the children of Israel could not stedfastly behold the face of Moses, for the glory of his countenance, which glory was to be done away;

⁸ How shall not the ministration of the Spirit be rather glorious?

⁹ For if the ministration of condemnation be glory, much more doth the ministration of righteousness exceed in glory.

¹⁰ For even that, which was made glorious, had no glory, in this respect, by reason of the glory that excelleth.

¹¹ For, if that which is done away was glorious, much more that, which remaineth, is glorious.

¹² Seeing then, that we have such hope, we use great plainness of speech.

¹³ And not as Moses, which put a veil over his face, that the children of Israel could not stedfastly look to the end of that which is abolished.

¹⁴ But their minds were blinded; for until this day remaineth the same veil untaken away, in the reading of the Old Testament; which veil is done away in Christ.

¹⁵ But even unto this day, when Moses is read, the veil is upon their heart.

¹⁶ Nevertheless, when it shall turn to the Lord, the veil shall be taken away.

¹⁷ Now the Lord is that Spirit: and where the Spirit of the Lord is, there is liberty.

¹⁸ But we all, with open face, beholding, as in a glass, the glory of the Lord, are changed into the same image, from glory to glory, even as by the Spirit of the Lord.

IV. 1. Therefore, seeing we have this ministry, as we have received mercy, we faint not:

² But have renounced the hidden things of dishonesty, not walking in craftiness, nor handling the word of God deceitfully; but, by manifestation of the truth, commending ourselves to every man's conscience, in the sight of God.

³ But, if our gospel be hid, it is hid to them that are lost:

⁴ In whom the god of this world hath blinded the minds of them which believe not, lest the light of the glorious gospel of Christ, who is the image of God, should shine unto them.

⁵ For we preach not ourselves, but Christ Jesus the Lord; and ourselves your servants for Jesus' sake.

⁶ For God, who commanded the light to shine out of darkness, hath shined in our hearts, to give the light of the knowledge of the glory of God, in the face of Jesus Christ.

⁷ But we have this treasure in earthen vessels, that the excellency of the power may be of God, and not of us.

⁸ We are troubled, on every side, yet not distressed; we are perplexed, but not in despair;

⁹ Persecuted, but not forsaken; cast down, but not destroyed;

¹⁰ Always bearing about in the body the dying of the Lord Jesus, that the life also of Jesus might be made manifest in our body.

¹¹ For we, which live, are alway delivered unto death for Jesus sake, that the life also of Jesus might be made manifest in our mortal flesh.

¹² So then death worketh in us; but life in you.

¹³ We having the same Spirit of faith according as it is written, "I believed, and therefore have I spoken:" we also believe, and therefore speak;

¹⁴ Knowing that he, which raised up the Lord Jesus, shall raise up us also, by Jesus, and shall present us with you.

¹⁵ For all things are for your sakes, that the abundant grace might, through the thanksgiving of many, redound to the glory of God.

¹⁶ For which cause we faint not; but, though our outward man perish, yet the inward man is renewed day by day.

¹⁷ For our light affliction, which is but for a moment, worketh for us a far more exceeding and eternal weight of glory.

¹⁸ While we look not at the things which are seen, but at the things which are not seen: for the things which are seen, are temporal, but the things which are not seen, are eternal.

V. 1 For we know, that if our earthly house of this tabernacle were dissolved, we have a building of God, an house not made with hands, eternal in the heavens.

² For in this we groan earnestly, desiring to be cloathed upon, with our house, which is from heaven:

³ If so be, that being cloathed we shall not be found naked.

⁴ For we, that are in this tabernacle, do groan, being burdened: not for that we would be unclothed, but clothed upon, that mortality might be swallowed up of life.

⁵ Now he, that hath wrought us for the self-same thing, is God; who also hath given unto us the earnest of the Spirit.

⁶ Therefore, we are always confident, knowing that whilst we are at home in the body we are absent from the Lord:

⁷ (For we walk by faith, not by sight.)

⁸ We are confident, I say, and willing rather to be absent from the body, and to be present with the Lord.

⁹ Wherefore we labour, that, whether present or absent, we may be accepted of him.

¹⁰ For we must all appear before the judgment-seat of Christ, that every one may receive the things done in his body, according to that he hath done, whether it be good or bad.

¹¹ Knowing, therefore, the terrour of the Lord, we persuade men; but we are made manifest unto God, and I trust, also, are made manifest in your consciences.

¹² For we commend not ourselves again unto you, but give you occasion to glory on our behalf, that you may have somewhat to answer them, which glory in appearance, and not in heart.

¹³ For, whether we be beside ourselves, it is to God: or, whether we be sober, it is for your cause.

¹⁴ For the love of Christ constraineth us, because we thus judge, that, if one died for all, then were all dead:

¹⁵ And that he died for all, that they, which live, should not henceforth live unto themselves, but unto him, which died for them, and rose again.

¹⁶ Wherefore, henceforth, know we no man after the flesh: yea, though we have known Christ after the flesh, yet now henceforth know we him no more.

¹⁷ Therefore, if any man be in Christ, he is a new creature: old things are past away, behold, all things are become new.

¹⁸ And all things are of God, who hath reconciled us to himself by Jesus Christ, and hath given to us the ministry of reconciliation;

¹⁹ To wit, that God was in Christ, reconciling the world unto himself, not imputing their trespasses unto them; and hath committed unto us the word

of reconciliation.

²⁰ Now then we are ambassadors for Christ, as though God did beseech you by us: we pray you, in Christ's stead, be ye reconciled to God.

²¹ For he hath made him to be sin for us, who knew no sin; that we might be made the righteousness of God in him.

VI. 1. We then as workers together with him, beseech you also, that ye receive not the grace of God in vain:

² (For he saith, "I have heard thee in a time accepted, and in the day of salvation have I succoured thee:" behold, now is the accepted time; behold, now is the day of salvation!)

³ Giving no offence, in any thing, that the ministry be not blamed:

⁴ But, in all things, approving ourselves, as the ministers of God, in much patience, in afflictions, in necessities, in distresses,

⁵ In stripes, in imprisonments, in tumults, in labours, in watchings, in fastings.

⁶ By pureness, by knowledge, by long-suffering, by kindness, by the Holy Ghost, by love, unfeigned.

⁷ By the word of truth, by the power of God, by the armour of righteousness, on the right hand, and on the left.

⁸ By honour and dishonour, by evil report and good report: as deceivers, and yet true;

⁹ As unknown, and yet well known; as dying, and behold we live; as chastened, and not killed;

¹⁰ As sorrowful, yet always rejoicing; as poor, yet making many rich; as having nothing, and yet possessing all things.

¹¹ O ye corinthians, our mouth is open unto you, our heart is enlarged.

¹² Ye are not straitened in us, but ye are straitened in your own bowels.

¹³ Now, for a recompence in the same, (I speak as unto my children) be ye also enlarged.

¹⁴ Be ye not unequally yoked together with unbelievers: for what fellowship hath righteousness with unrighteousness? And what communion hath light with darkness?

¹⁵ And what concord hath Christ with Belial? Or what part hath he that believeth with an infidel?

¹⁶ And what agreement hath the temple of God with idols? For ye are the temple of the living God; as God hath said, "I will dwell in them, and walk in them; and I will be their God, and they shall be my people."

¹⁷ Wherefore, “Come out from among them, and be ye separate, saith the Lord, and touch not the unclean thing; and I will receive you.

¹⁸ “And will be a Father unto you, and ye shall be my sons and daughters,” saith the Lord Almighty.

VII. ¹ Having therefore these promises, (dearly beloved) let us cleanse ourselves from all filthiness of the flesh and spirit, perfecting holiness in the fear of God.

² Receive us: we have wronged no man, we have corrupted no man, we have defrauded no man.

³ I speak not this to condemn you: for I have said before, that you are in our hearts, to die and live with you.

⁴ Great is my boldness of speech toward you, great is my glorying of you: I am filled with comfort, I am exceeding joyful, in all our tribulation.

⁵ For, when we were come into Macedonia, our flesh had no rest, but we were troubled on every side; without were fightings, within were fears.

⁶ Nevertheless, God, that comforteth those that are cast down, comforted us, by the coming of Titus:

⁷ And not by his coming only, but by the consolation, wherewith he was comforted in you, when he told us your earnest desire, your mourning, your fervent mind toward me; so that I rejoiced the more.

⁸ For, though I made you sorry with a letter, I do not repent; though I did repent; for I perceive that the same epistle made you sorry, though it were but for a season.

⁹ Now I rejoice, not that ye were made sorry, but that ye sorrowed to repentance: for ye were made sorry, after a godly manner, that ye might receive damage by us in nothing.

¹⁰ For godly sorrow worketh repentance to salvation, not to be repented of: but the sorrow of the world worketh death.

¹¹ For, behold, this self-same thing that ye sorrowed, after a godly sort, what carefulness it wrought in you: yea, what clearing of yourselves; yea, what indignation; yea, what fear; yea, what vehement desire; yea, what zeal; yea, what revenge! in all things ye have approved yourselves to be clear in this matter.

¹² Wherefore, though I wrote unto you, I did it not for his cause, that had done the wrong, nor for his cause, that suffered wrong, but that our care for you, in the sight of God, might appear unto you.

¹³ Therefore, we were comforted in your comfort: yea, and exceedingly the more joyed we, for the joy of Titus, because his spirit was refreshed by you all.

¹⁴ For if I have boasted any thing to him of you, I am not ashamed; but as we spake all things to you in truth, even so our boasting, which I made before Titus, is found a truth.

¹⁵ And his inward affection is more abundant toward you, whilst he remembereth the obedience of you all, how with fear and trembling you received him.

¹⁶ I rejoyce, therefore, that I have confidence in you, in all things.

PARAPHRASE.

¹ Do I begin again to commend myself; or need I, as² some, commendatory letters to, or from you? You are my commendatory epistle, written in my heart,³ known and read by all men. I need no other commendatory letter, but that you being manifested to be the commendatory epistle of Christ, written on my behalf; not with ink, but with the Spirit of the living God; not on tables of stone, but of the heart, whereof I was the amanuensis; i. e. your conversation⁴ was the effect of my ministry. And this so great confidence have I, through Christ, in God. ⁵ Not as if I were sufficient of myself to reckon upon any thing, as of myself; but my sufficiency, my ability,⁶ to perform any thing, is wholly from God: Who has fitted and enabled me to be a minister of the New Testament, not of the letter, but of the spirit; for⁷ the letter kills, but the spirit gives life. But, if the ministry of the law written in stone, which condemns to death, were so glorious to Moses, that his face shone so, that the children of Israel could not steadily behold the brightness of it, which was but temporary,⁸ and was quickly to vanish; How can it be otherwise, but that the ministry of the Spirit which giveth life should confer more glory and lustre on the ministers⁹ of the gospel? For, if the ministration of condemnation were glory, the ministry of justification, in the gospel, doth certainly much more exceed in¹⁰ glory. Though even the glory, that Moses's ministration had, was no glory, in comparison of the far more¹¹ excelling glory of the gospel-ministry. Farther, if that which is temporary, and to be done away, were delivered with glory, how much rather is that, which remains, without being done away, to appear¹² in glory? Wherefore, having such hope, we¹³ use great freedom and plainness of speech. And not

as Moses, who put a veil over his face, do we veil the light; so that the obscurity of what we deliver should hinder the children of Israel from seeing, in the law, which was to be done away, Christ,¹⁴ who was the end of the law. But their not seeing it, is from the blindness of their own minds: for, unto this day, the same veil remains upon their understandings, in reading of the Old Testament; which veil is done away in Christ; i. e. Christ, now he is come, so exactly answers all the types, prefigurations, and predictions of him, in the Old Testament, that presently, upon turning our eyes upon him, he visibly appears to be the person designed, and all the obscurity of those passages concerning him, which before were not understood, is taken¹⁵ away, and ceases. Nevertheless, even until now, when the writings of Moses are read, the veil remains upon their hearts, they see not the spiritual and¹⁶ evangelical truths contained in them. But, when their heart shall turn to the Lord, and, laying by prejudice and aversion, shall be willing to receive the truth, the veil shall be taken away, and they shall plainly see him to be the person spoken of, and intended.¹⁷ But the Lord is the Spirit, whereof we are ministers; and they, who have this Spirit, they have liberty, so that they speak openly and freely.¹⁸ But we, all the faithful ministers of the New Testament, not veiled, but with open countenances, as mirrors, reflecting the glory of the Lord, are changed into his very image, by a continued succession of glory, as it were, streaming upon us from the Lord, who is the Spirit, who gives us this IV. 1. clearness and freedom. Seeing, therefore, I am intrusted with such a ministry, as this, according as I have received great mercy, being extraordinarily and miraculously called, when I was a persecutor, I do not fail, nor flag: I do not behave myself unworthily in it, nor misbecoming the honour² and dignity of such an employment: But, having renounced all unworthy and indirect designs, which will not bear the light, free from craft, and from playing any deceitful tricks, in my preaching the word of God; I recommend myself to every one's conscience, only by making plain the truth which I deliver, as³ in the presence of God. But if the gospel, which I preach, be obscure and hidden, it is so, only to those⁴ who are lost: In whom, being unbelievers, the God of this world has blinded their minds, so that the glorious brightness of the light of the gospel of Christ, who is the image of God, cannot enlighten them.⁵ For I seek not my own glory, or secular advantage, in preaching, but only the propagating of the gospel of the Lord Jesus Christ; professing myself your servant⁶ for Jesus' sake. For God, who made light to shine out

of darkness, hath enlightened also my dark heart, who before saw not the end of the law, that I might communicate the knowledge and light of the glory of God, which shines in the face of Jesus ⁷ Christ. But yet we, to whom this treasure of knowledge, the gospel of Jesus Christ, is committed, to be propagated in the world, are but frail men: that so the exceeding great power, that accompanies it, may⁸ appear to be from God and not from us. I am pressed on every side, but do not shrink; I am perplexed,⁹ but yet not so as to despond; Persecuted, but yet not left to sink under it; thrown down, but¹⁰ not slain; Carrying about every-where, in my body, the mortification, i. e. a representation of the sufferings of the Lord Jesus, that also the life of Jesus, risen from the dead, may be made manifest by the energy, that accompanies my preaching in this frail¹¹ body. For, as long as I live, I shall be exposed to the danger of death, for the sake of Jesus, that the life of Jesus, risen from the dead, may be made manifest by my preaching, and sufferings, in this mortal¹² flesh of mine. So that the preaching of the gospel procures sufferings and danger of death to me; but to you it procures life, i. e. the energy of the Spirit of Christ, whereby he lives in, and gives life to those¹³ who believe in him. Nevertheless, though suffering and death accompany the preaching of the gospel; yet, having the same Spirit of faith that David had, when he said, "I believe, therefore have I¹⁴ spoken," I also, believing, therefore speak; Knowing that he, who raised up the Lord Jesus, shall raise me up also, by Jesus, and present me, with you,¹⁵ to God. For I do, and suffer, all things, for your sakes, that the exuberant favour of God may abound, by the thanksgiving of a greater number, to the glory of God; i. e. I endeavour, by my sufferings and preaching, to make as many converts as I can, that so the more partaking of the mercy and favour of God, of which there is a plentiful and inexhaustible store, the more may give thanks unto him, it being more for the glory of God, that a greater¹⁶ number should give thanks and pray to him. For which reason I faint not, I flag not; but though my bodily strength decay, yet the vigour of my mind¹⁷ is daily renewed. For the more my sufferings are here in propagating the gospel, which at worst are but transient and light, the more will they procure me an exceedingly far greater addition of that glory¹⁸ in heaven, which is solid and eternal; I having no regard to the visible things of this world, but to the invisible things of the other: for the things, that are seen, are temporal; but those, that are not seen, eternal.

V. 1 For I know, that if this my body, which is but as a tent for my sojourning here upon earth, for a short time, were

dissolved, I shall have another, of a divine original, which shall not, like buildings made with men's hands, be subject to decay, but shall be² eternal in the heavens. For in this tabernacle, I groan earnestly, desiring, without putting off this mortal, earthly body, by death, to have that celestial³ body superinduced; If so be the coming of Christ shall overtake me, in this life, before I put off⁴ this body. For we, that are in the body, groan under the pressures and inconveniencies, that attend us in it; which yet we are not, therefore, willing to put off, but had rather, without dying, have it changed into a celestial, immortal body, that so this mortal state may be put an end to, by an immediate entrance⁵ into an immortal life. Now it is God, who prepares and fits us for this immortal state, who also⁶ gives us the Spirit as a pledge of it. Wherefore, being always undaunted, and knowing, that whilst I dwell, or sojourn, in this body, I am absent from my⁷ proper home, which is with the Lord, (For I regulate my conduct, not by the enjoyment of the visible things of this world, but by my hope and expectation of the⁸ invisible things of the world to come) I, with boldness, preach the gospel, preferring, in my choice, the quitting this habitation to get home to the Lord.⁹ Wherefore, I make this my only aim, whether staying here in this body, or departing out of it, so to¹⁰ acquit myself, as to be acceptable to him. For we must all appear before the judgment-seat of Christ, that every one may receive according to what he has done in the body, whether it be good,¹¹ or bad. Knowing, therefore, this terrible judgment of the Lord, I preach the gospel, persuading men to be christians. And with what integrity I discharge that duty, is manifest to God, and I trust, you also are convinced of it, in your consciences.¹² And this I say, not that I commend myself again: but that I may give you an occasion not to be ashamed of me, but to glory on my behalf, having wherewithal to reply to those, who make a show of glorying in outward appearance, without doing so¹³ inwardly in their hearts. For if I am besides myself, in speaking, as I do of myself, it is between God and me; he must judge: men are not concerned in it, nor hurt by it. Or, if I do it soberly, and upon good ground; if what I profess of myself be in reality true, it is for your sake and advantage.¹⁴ For it is the love of Christ constraineth me, judging as I do, that, if Christ died for all, then¹⁵ all were dead: And that, if he died for all, his intention was, that they who by him have attained to a state of life, should not any longer live to themselves alone, seeking only their own private advantage; but should employ their lives in promoting the gospel and kingdom of Christ, who for

them died,¹⁶ and rose again: So that, from henceforth, I have no regard to any one, according to the flesh, i. e. for being circumcised, or a jew. For, if I myself have gloried in this, that Christ himself was circumcised, as I am, and was of my blood and nation, I do so¹⁷ now no more any longer. So that if any one be in Christ, it is, as if he were in a new creation, wherein all former, mundane relations, considerations, and interests, are ceased, and at an end; all things in¹⁸ that state are new to him: And he owes his very being in it, and the advantages he therein enjoys, not, in the least measure, to his birth, extraction, or any legal observances, or privileges, but wholly¹⁹ and solely to God alone; Reconciling the world to himself by Jesus Christ, and not imputing their trespasses to them. And therefore I, whom God hath reconciled to himself, and to whom he hath given the ministry, and committed the word of his reconciliation;²⁰ As an ambassador for Christ, as though God did by me beseech you, I pray you in Christ's²¹ stead, be ye reconciled to God. For God hath made him subject to sufferings and death, the punishment and consequence of sin, as if he had been a sinner, though he were guilty of no sin; that we, in and by him, might be made righteous, by a righteousness VI. 1 imputed to us by God. I therefore, working together with him, beseech you also, that you receive not the favour of God, in the gospel,² preached to you, in vain. (For he saith, "I have heard thee in a time accepted, and in the day of salvation have I succoured thee:" behold, now is the accepted time; behold, now is the day of salvation!)³ Giving no offence to any one, in any thing, that the⁴ ministry be not blamed: But, in every thing, approving myself, as becomes the minister of God, by much⁵ patience, in afflictions, in necessities, in straits, In stripes, in imprisonments, in being tossed up and⁶ down, in labours, in watchings, in fastings; By a life undefiled; by knowledge; by long-sufferings; by the⁷ gifts of the Holy Ghost; by love unfeigned; By preaching the gospel of truth sincerely; by the power of God, assisting my ministry; by uprightness of mind, wherewith I am armed at all points, both to do⁸ and to suffer; By honour and disgrace; by good and⁹ bad report: as a deceiver, and yet faithful; As an obscure, unknown man, but yet known and owned; as one often in danger of death, and yet, behold, I¹⁰ live; as chastened, but yet not killed; As sorrowful, but yet always rejoicing; as poor, yet making many rich; as having nothing, and yet possessing¹¹ all things. O ye corinthians, my mouth is opened to you, my heart is enlarged to you; my affection, my tenderness, my compliance for you is not strait,¹² or narrow. It is your own narrowness makes you¹³

uneasy. Let me speak to you, as a father to his children; in return, do you, likewise, enlarge your¹⁴ affections and deference to me. Be ye not associated with unbelievers, having nothing to do with them in their vices, or worship: for what fellowship hath righteousness with unrighteousness? What¹⁵ communion hath light with darkness? What concord hath Christ with Belial? Or what part¹⁶ hath a believer with an unbeliever? What agreement hath the temple of God with idols? For ye are the temple of the living God; as God hath said, “I will dwell in them, among them will I walk; and I will be their God, and they shall be my people.”¹⁷ Wherefore, “Come out from among them, and be separate, saith the Lord, and touch not the¹⁸ unclean thing, and I will receive you to me; And I will be a Father, and ye shall be my sons and VII. 1 daughters,” saith the Lord Almighty. Having therefore, these promises, (dearly beloved) let us cleanse ourselves from the defilement of all sorts of sins, whether of body or mind, endeavouring after² perfect holiness, in the fear of God. Receive me, as one to be hearkened to, as one to be followed, as one that hath done nothing to forfeit your esteem. I have wronged no man: I have corrupted no man:³ I have defrauded no man. I say not this to reflect on your carriage towards me: for I have already assured you, that I have so great an affection⁴ for you, that I could live and die with you. But, in the transport of my joy, I use great liberty of speech towards you. But let it not be thought to be of ill-will, for I boast much of you: I am filled with comfort, and my joy abounds exceedingly in all my⁵ afflictions. For when I came to Macedonia, I had no respite from continual trouble, that beset me on every side. From without, I met with strife and opposition, in preaching the gospel: and within, I was filled with fear, upon your account; lest the false apostle, continuing his credit and faction amongst you, should pervert you from the simplicity of the⁶ gospel. But God, who comforteth those who are cast down, comforted me, by the coming of Titus.⁷ Not barely by his presence, but by the comfort I received from you, by him, when he acquainted me with your great desire of conforming yourselves to my orders; your trouble for any neglects, you have been guilty of, towards me; the great warmth of your affection and concern for me; so that I rejoiced⁸ the more, for my past fears; Having writ to you a letter, which I repented of, but now do not repent of, perceiving, that, though that letter grieved you,⁹ it made you sad but for a short time: But now I rejoice, not that you were made sorry, but that you were made sorry to repentance. For this proved a beneficial sorrow, acceptable to God,

that, in nothing, you might have cause to complain, that you were¹⁰ damaged by me. For godly sorrow worketh repentance to salvation, not to be repented of: but sorrow arising from worldly interest, worketh death.¹¹ In the present case, mark it, that godly sorrow, which you had, what carefulness it wrought in you, to conform yourselves to my orders; yea, what clearing yourselves from your former miscarriages; yea, what indignation against those who led you into them; yea, what fear to offend me; yea, what vehement desire of satisfying me; yea, what zeal for me; yea, what revenge against yourselves, for having been so misled! You have shown yourselves to be set right, and be, as you should be, in every¹² thing, by this carriage of yours. If, therefore, I wrote unto you, concerning the fornicator, it was not for his sake, that had done, nor his that had suffered the wrong; but principally, that my care and concern for you might be made known to you,¹³ as in the presence of God. Therefore, I was comforted in your comfort: but much more exceedingly rejoiced I, in the joy of Titus; because his mind was set at ease, by the good disposition he found you all¹⁴ in towards me. So that I am not ashamed of having boasted of you to him. For all that I have said to you, is truth; so, what I said to Titus, in your commendation, he has found to be true; ¹⁵ Whereby his affection to you is abundantly increased, he carrying in his mind the universal obedience of you all, unanimously to me, and the manner of your receiving him with fear and trembling.¹⁶ I rejoice, therefore, that I have confidence in you in all things.

SECT. III.

CHAPTER VIII. 1. — IX. 15.

CONTENTS.

The apostle having employed the seven foregoing chapters, in his own justification, in the close whereof he expresses the great satisfaction he had, in their being all united again, in their affection, and obedience to him; he, in the two next chapters, exhorts them, especially by the example of the churches of Macedonia, to a liberal contribution to the poor christians in Judea.

TEXT.

¹ Moreover, brethren, we do you to wit of the grace of God, bestowed on the churches of Macedonia.

² How that, in a great trial of affliction, the abundance of their joy, and their deep poverty, abounded unto the riches of their liberality.

³ For to their power, (I bear record) yea, and beyond their power, they were willing of themselves;

⁴ Praying us, with much intreaty, that we would receive the gift, and take upon us the fellowship of the ministering to the saints.

⁵ And this they did, not as we hoped; but first gave their own selves to the Lord, and unto us by the will of God.

⁶ Insomuch that we desired Titus, that, as he had begun, so he would also finish in you the same grace also.

⁷ Therefore, as ye abound in every thing, in faith, in utterance, and knowledge, and in all diligence, and in your love to us; see that you abound in this grace also.

⁸ I speak not by commandment, but by occasion of the forwardness of others, and to prove the sincerity of your love.

⁹ For ye know the grace of our Lord Jesus Christ, that though he was rich, yet, for your sakes, he became poor, that ye, through his poverty, might be rich.

¹⁰ And herein I give my advice: for this is expedient for you, who have begun before, not only to do, but also to be forward a year ago.

¹¹ Now, therefore, perform the doing of it; that, as there was a readiness to will, so there may be a performance also, out of that which you have.

¹² For, if there be first a willing mind, it is accepted according to that a man hath, and not according to that he hath not.

¹³ For I mean not, that other men may be eased, and you burdened:

¹⁴ But, by an equality, that now, at this time, your abundance may be a supply for their want; that their abundance also may be a supply for your want, that there may be equality;

¹⁵ As it is written, "He that hath gathered much, had nothing over; and he that had gathered little, had no lack."

¹⁶ But thanks be to God, which put the same earnest care into the heart of Titus, for you.

¹⁷ For, indeed, he accepted the exhortation; but being more forward, of his own accord, he went unto you.

¹⁸ And we have sent with him the brother, whose praise is in the gospel, throughout all the churches:

¹⁹ (And not that only, but who was also chosen of the churches to travel with us, with this grace, which is administered by us to the glory of the same Lord, and declaration of your ready mind)

²⁰ Avoiding this, that no man should blame us in this abundance, which is administered by us:

²¹ Providing for honest things, not only in the sight of the Lord, but also in the sight of men.

²² And we have sent with them our brother, whom we have oftentimes proved diligent in many things; but now much more diligent, upon the great confidence which I have in you.

²³ Whether any do inquire of Titus, he is my partner, and fellow-helper concerning you: or our brethren be inquired of, they are the messengers of the churches, and the glory of Christ.

²⁴ Wherefore show ye to them, and before the churches, the proof of your love, and of our boasting on your behalf.

IX. 1. For, as touching the ministering to the saints, it is superfluous for me to write to you.

² For I know the forwardness of your mind, for which I boast of you to them of Macedonia, that Achaia was ready a year ago, and your zeal hath provoked very many.

³ Yet have I sent the brethren, lest our boasting of you should be in vain, in this behalf; that, as I said, ye may be ready:

⁴ Lest haply, if they of Macedonia come with me, and find you unprepared, we (that we say not you) should be ashamed in this same confident boasting.

⁵ Therefore, I thought it necessary to exhort the brethren, that they would go before unto you, and make up before-hand your bounty, whereof ye had notice before, that the same might be ready as a matter of bounty, and not as of covetousness.

⁶ But this I say, He, which soweth sparingly, shall reap also sparingly: and he, which soweth bountifully, shall reap also bountifully.

⁷ Every man, according as he purposeth in his heart, so let him give; not grudgingly, or of necessity: for God loveth a cheerful giver.

⁸ And God is able to make all grace abound towards you; that ye, always having all-sufficiency, in all things, may abound to every good work:

⁹ (As it is written, “He hath dispersed abroad; he hath given to the poor: his righteousness remaineth for ever.”

¹⁰ Now he that ministereth seed to the sower, both minister bread for your food, and multiply your seed sown, and increase the fruits of your righteousness:)

¹¹ Being enriched in every thing to all bountifulness, which causeth, through us, thanksgiving to God.

¹² For the administration of this service, not only supplieth the want of the saints, but is abundant also, by many thanksgivings unto God.

¹³ (Whilst, by the experiment of this ministration, they glorify God, for your professed subjection unto the gospel of Christ, and for your liberal distribution unto them, and unto all men;)

¹⁴ And, by their prayer for you, which long after you, for the exceeding grace of God in you.

¹⁵ Thanks be unto God for his unspeakable gift.

PARAPHRASE.

¹ Moreover, brethren, I make known to you the gift, which, by the grace of God, is given in the churches ² of Macedonia: viz. That amidst the afflictions they have been much tried with, they have, with exceeding chearfulness and joy, made their very low estate of poverty yield a rich contribution of liberality:³ Being forward of themselves (as I must bear them witness) to the utmost of their power; nay, and beyond⁴ their power: Earnestly intreating me to receive their contribution, and be a partner with others, in the charge of conveying and distributing it to the⁵ saints. And in this they out-did my expectation, who could not hope for so large a collection from them. But they gave themselves first to the Lord, and to me, to dispose of what they had, according as the good⁶ pleasure of God should direct. Insomuch that I was moved to persuade Titus, that, as he had begun, so he would also see this charitable contribution carried⁷ on among you, till it was perfected: That, as you excel in every thing, abounding in faith, in well-speaking, in knowledge, in every good quality, and in your affection to me; ye might abound in this act of⁸ charitable liberality also. This I say to you, not as a command from God, but on occasion of the great liberality of the churches of Macedonia, and to show the world a proof of the genuine, noble temper of your⁹ love. For ye know the munificence of our Lord Jesus

Christ, who, being rich, made himself poor for your sakes, that you, by his poverty, might become¹⁰ rich. I give you my opinion in the case, because it becomes you so to do, as having begun not only to do something in it, but to show a willingness to it,¹¹ above a year ago. Now, therefore, apply yourselves to the doing of it in earnest; so that, as you undertook it readily, you would as readily perform it, out¹² of what you have: For every man's charity is accepted by God, according to the largeness and willingness of his heart, in giving, and not according¹³ to the narrowness of his fortune. For my meaning is not, that you should be burthened to ease others:¹⁴ But that, at this time, your abundance should make up, what they, through want, come short in; that, on another occasion, their abundance may supply¹⁵ your deficiency, that there may be an equality: As it is written, "He that had much, had nothing¹⁶ over, and he that had little, had no lack." But thanks be to God, who put into the heart of Titus the¹⁷ same concern for you, Who not only yielded to my exhortation: but, being more than ordinary concerned for you, of his own accord went unto you:¹⁸ With whom I have sent the brother, who has praise through all the churches, for his labour in the ¹⁹ gospel: (And not that only, but who was also chosen of the churches, to accompany me, in the carrying this collection, which service I undertook for the glory of our Lord, and for your encouragement to²⁰ a liberal contribution:) To prevent any aspersion might be cast on me, by any one, on occasion of my meddling with the management of so great a sum;²¹ And to take care, by having such men joined with me, in the same trust, that my integrity and credit should be preserved, not only in the sight of the²² Lord, but also in the sight of men. With them I have sent our brother, of whom I have had frequent experience, in sundry affairs, to be a forward, active man; but now much more earnestly intent, by reason of the strong persuation he has, of your contributing²³ liberally. Now, whether I speak of Titus, he is my partner, and one, who, with me, promotes your interest; or the two other brethren sent with him, they are the messengers of the churches of Macedonia, by whom their collection is sent, and are²⁴ promoters of the glory of Christ. Give, therefore, to them, and, by them, to those churches, a demonstration of your love, and a justification of my boasting.

IX. 1 of you. For, as touching the relief of the poor christians in Jerusalem, it is needless for me to write² to you. For I know the forwardness of your minds, which I boasted of on your behalf, to the macedonians, that Achaia was ready a year ago, and your zeal in³ this matter hath been a spur to many others. Yet I have sent these brethren, that

my boasting of you may not appear to be vain and groundless, in this part; but that you may, as I said, have your collection⁴ ready: Lest, if perchance the macedonians should come with me, and find it not ready, I (not to say, you) should be ashamed in this matter, whereof I⁵ have boasted. I thought it, therefore, necessary to put the brethren upon going before unto you, to prepare things, by a timely notice before-hand, that your contribution may be ready, as a free benevolence of yours, and not as a niggardly gift, extorted from⁶ you. This I say, “He who soweth sparingly, shall reap also sparingly; and he who soweth plentifully,⁷ shall also reap plentifully.” So give, as you find yourselves disposed, every one, in his own heart, not grudgingly, as if it were wrung from you; for⁸ God loves a chearful giver. For God is able to make every charitable gift of yours redound to your advantage; that, you having in every thing, always, a fulness of plenty, ye may abound in every⁹ good work: (As it is written, “He hath scattered, he hath given to the poor, and his liberality remaineth¹⁰ for ever.” Now he, that supplies seed to the sower, and bread for food, supply and multiply your stock of seed, and increase the fruit of¹¹ your liberality:) Enriched in every thing to all beneficence, which, by me, as instrumental in it,¹² procureth thanksgiving to God. For the performance of this service doth not only bring supply to the wants of the saints, but reacheth farther, even¹³ to God himself, by many thanksgivings (Whilst they, having such a proof of you, in this your supply, glorify God for your professed subjection to the gospel of Christ, and for your liberality, in communicating¹⁴ to them, and to all men;) And to the procuring their prayers for you, they having a great inclination towards you, because of that gracious gift of God bestowed on them, by your liberality.¹⁵ Thanks be to God for this his unspeakable gift.

SECT. IV.

CHAPTER X. 1. — XIII. 10.

CONTENTS.

St. Paul having finished his exhortation to liberality, in their collection for the christians at Jerusalem, he here resumes his former argument, and prosecutes the main purpose of this epistle, which was totally to reduce and put a final end to the adverse faction, (which seems not yet to be entirely extinct,) by bringing the corinthians wholly off from the false apostle they

had adhered to: and to re-establish himself and his authority in the minds of all the members of that church. And this he does, by the steps contained in the following numbers.

SECT. IV. N. 1.

CHAPTER X. 1 — 6.

CONTENTS.

He declares the extraordinary power he hath in preaching the gospel, and to punish his opposers amongst them.

TEXT.

¹ Now I Paul, myself, beseech you, by the meekness and gentleness of Christ, who in presence am base among you, but being absent am bold toward you.

² But I beseech you, that I may not be bold, when I am present, with that confidence wherewith I think to be bold against some, which think of us, as if we walked according to the flesh.

³ For though we walk in the flesh, we do not war after the flesh:

⁴ (For the weapons of our warfare are not carnal, but mighty through God, to the pulling down of strong holds:)

⁵ Casting down imaginations, and every high thing, that exalteth itself against the knowledge of God; and bringing into captivity every thought to the obedience of Christ:

⁶ And having in a readiness to revenge all disobedience, when your obedience is fulfilled.

PARAPHRASE.

¹ Now I, the same Paul, who am (as it is said amongst you) base and mean, when present with you, but bold towards you, when absent, beseech you, by the² meekness and gentleness of Christ; I beseech you, I say, that I may not, when present among you, be bold, after that manner I have resolved to be bold towards some, who account that, in my conduct and ministry, I regulate myself wholly by carnal considerations.³ For, though I live in the flesh, yet I do not carry on the work of the gospel (which is a warfare)⁴

according to the flesh: (For the weapons of my warfare are not fleshly, but such, as God hath made mighty, to the pulling down of strong holds, i. e.⁵ whatever is made use of in opposition:) Beating down human reasonings, and all the towering and most elevated superstructures raised thereon, by the wit of men, against the knowledge of God, as held forth in the gospel; captivating all their notions, and bringing⁶ them into subjection to Christ: And having by me, in a readiness, power wherewithal to punish and chastise all disobedience, when you, who have been misled by your false apostle, withdrawing yourselves from him, shall return to a perfect obedience.

SECT. IV. N. 2.

CHAPTER X. 7 — 18.

CONTENTS.

St. Paul examines the false apostle's pretensions, and compares his own with his performances.

TEXT.

⁷ Do ye look on things after the outward appearance? If any man trust to himself, that he is Christ's, let him of himself think this again, that, as he is Christ's, even so are we Christ's.

⁸ For though I should boast somewhat more of our authority, (which the Lord hath given us for edification, and not for your destruction,) I should not be ashamed.

⁹ That I may not seem, as if I would terrify you by letters.

¹⁰ "For his letters," say they, "are weighty and powerful, but his bodily presence is weak, and his speech contemptible."

¹¹ Let such an one think this, that such as we are in word by letters when we are absent, such will we be also in deed, when we are present.

¹² For we dare not make ourselves of the number, or compare ourselves with some, that commend themselves: but they, measuring themselves by themselves, and comparing themselves amongst themselves, are not wise.

¹³ But we will not boast of things without our measure, but according to the measure of the rule, which God hath distributed to us, a measure to

reach even unto you.

¹⁴ For we stretch not ourselves beyond our measure, as though we reached not unto you: for we are come as far as to you also, in preaching the gospel of Christ:

¹⁵ Not boasting of things without our measure, that is, of other men's labours: but having hope, when your faith is increased, that we shall be enlarged by you, according to our rule, abundantly:

¹⁶ To preach the gospel in the regions beyond you, and not to boast, in another man's line, of things made ready to our hand.

¹⁷ But he, that glorieth, let him glory in the Lord.

¹⁸ For not he, that commendeth himself, is approved, but whom the Lord commendeth.

PARAPHRASE.

⁷ Do ye judge of men, by the outward appearance of things? Is it by such measures you take an estimate of me and my adversaries? If he has confidence in himself, that he is Christ's, i. e. assumes to himself the authority of one employed and commissioned by Christ, let him, on the other side, count thus with himself, that, as he is Christ's, so⁸ I also am Christ's. Nay, if I should boastingly say something more, of the authority and power, which the Lord has given me for your edification, and not for your destruction, I should not be put⁹ to shame: But that I may not seem to terrify¹⁰ you by letters, as is objected to me by some, Who say that my letters are weighty and powerful, but my bodily presence weak, and my discourse contemptible.¹¹ Let him, that says so, reckon upon this, that such as I am in word, by letters, when I am absent, such shall I be also in deed, when present.¹² For I dare not be so bold, as to rank or compare myself with some, who vaunt themselves: but they measuring themselves within themselves, and comparing themselves with themselves, do not understand.¹³ But I, for my part, will not boast of myself in what has not been measured out, or allotted to me; i. e. I will not go out of my own province, to seek matter of commendation; but proceeding orderly, in the province, which God hath measured out, and allotted to me, I have reached even unto you; i. e. I preached the gospel in every¹⁴ country, as I went, till I came as far as you. For I do not extend myself farther than I should, as if I had skipped over other countries in my way, without proceeding gradually

to you; no, for I have reached even unto you, in preaching of the gospel in¹⁵ all countries, as I passed along: Not extending my boasting, beyond my own bounds, into provinces not allotted to me, nor vaunting myself of any thing, I have done, in another's labour, i. e. in a church planted by another man's pains: but having hope, that, your faith increasing, my province will¹⁶ be enlarged by you yet farther: So that I may preach the gospel to the yet unconverted countries beyond you, and not take glory to myself, from another man's province, where all things are made¹⁷ ready to my hand. But he that will glory, let him glory, or seek praise, from that which is committed to him by the Lord, or in that which is acceptable¹⁸ to the Lord. For not he, who commends himself, does thereby give a proof of his authority, or mission; but he, whom the Lord commends by the gifts of the Holy Ghost.

SECT. IV. N. 3.

CHAPTER XI. 1 — 6.

CONTENTS.

He shows that their pretended apostle, bringing to them no other Saviour or gospel, nor conferring greater power of miracles, than he [St. Paul] had done, was not to be preferred before him.

TEXT.

¹ Would to God ye could bear with me a little, in my folly; and, indeed, bear with me.

² For I am jealous over you with godly jealousy: for I have espoused you to one husband, that I may present you as a chaste virgin to Christ.

³ But I fear lest, by any means, as the serpent beguiled Eve, through his subtilty, so your minds should be corrupted from the simplicity that is in Christ.

⁴ For if he, that cometh, preacheth another Jesus, whom we have not preached; or if ye receive another Spirit, which ye have not received; or another gospel, which ye have not accepted, ye might well bear with him.

⁵ For, I suppose, I was not a whit behind the very chiefest apostles.

⁶ But, though I be rude in speech, yet not in knowledge; but we have been thoroughly made manifest, among you, in all things.

PARAPHRASE.

¹ Would you could bear me a little, in my folly;² and, indeed, to bear with me. For I am jealous over you, with a jealousy, that is for God: for I have fitted and prepared you for one alone, to be your husband, viz. that I might deliver you up a pure³ virgin, to Christ. But, I fear, lest, some way or other, as the serpent beguiled Eve by his cunning; so your minds should be debauched from that singleness⁴ which is due to Christ. For if this intruder, who has been a leader amongst you, can preach to you another Saviour, whom I have not preached; or if you receive from him other, or greater gifts of the Spirit, than those you received from me; or another gospel than what you accepted from me; you might well bear with him, and allow his pretensions of being⁵ a new and greater apostle. For, as to the apostles of Christ, I suppose I am not a whit behind the⁶ chiefest of them. For though I am but a mean speaker, yet I am not without knowledge; but in every thing have been made manifest unto you, i. e. to be an apostle.

SECT. IV. N. 4.

CHAPTER XI. 7 — 15.

CONTENTS.

He justifies himself to them, in his having taken nothing of them. There had been great talk about this, and objections raised against St. Paul thereupon; vid. 1 Cor. ix. 1 — 3. As if, by this, he had discovered himself not to be an apostle: to which he there answers, and here toucheth it again, and answers another objection, which it seems was made, viz. that he refused to receive maintenance from them out of unkindness to them.

TEXT.

⁷ Have I committed an offence, in abasing myself, that you might be exalted, because I have preached to you the gospel of God freely?

⁸ I robbed other churches, taking wages of them, to do you service.

⁹ And, when I was present with you, and wanted, I was chargeable to no man; for that, which was lacking to me, the brethren which came from Macedonia, supplied: and in all things I have kept myself from being burdensome unto you, and so will I keep myself.

¹⁰ As the truth of Christ is in me, no man shall stop me of this boasting, in the regions of Achaia.

¹¹ Wherefore? because I love you not? God knoweth.

¹² But what I do, that I will do, that I may cut off occasion from them, which desire occasion, that, wherein they glory, they may be found even as we.

¹³ For such are false apostles, deceitful workers, transforming themselves into the apostles of Christ.

¹⁴ And no marvel; for Satan himself is transformed into an angel of light.

¹⁵ Therefore it is no great thing, if his ministers also be transformed, as the ministers of righteousness: whose end shall be according to their works.

PARAPHRASE.

⁷ Have I committed an offence in abasing myself, to work with my hands, neglecting my right of maintenance, due to me, as an apostle, that you might be exalted in christianity, because I preached the gospel⁸ of God to you gratis? I robbed other churches, taking⁹ wages of them, to do you service. And, being with you and in want, I was chargeable to not a man of you: for the brethren, who came from Macedonia, supplied me with what I needed: and, in all things, I have kept myself from being burdensome¹⁰ to you, and so I will continue to do. The truth and sincerity I owe to Christ is, in what I say to you, viz. This boasting of mine shall not in the¹¹ regions of Achaia be stopped in me. Why so? Is it, because I love you not? For that God can be¹² my witness, he knoweth. But what I do, and shall do, is, that I may cut off all occasion from those, who, if I took any thing of you, would be glad of that occasion to boast, that in it they had me for a pattern, and did nothing but what even I myself¹³ had done. For these are false apostles, deceitful labourers in the gospel, having put on the counterfeit¹⁴ shape and outside of apostles of Christ: And no marvel; for Satan himself is sometimes transformed¹⁵ into an angel of light. Therefore it is not strange, if so be his ministers are disguised so, as to appear ministers of the gospel: whose end shall be according to their works.

SECT. IV. N. 5.

CHAPTER XI. 16 — 33.

CONTENTS.

He goes on, in his justification, reflecting upon the carriage of the false apostle towards the corinthians, ver. 16 — 21. He compares himself with the false apostle, in what he boasts of, as being a Hebrew, ver. 21, 22, or minister of Christ, ver. 23, and here St. Paul enlarges upon his labours and sufferings.

TEXT.

¹⁶ I say again, Let no man think me a fool; if otherwise, yet as a fool receive me, that I may boast myself a little.

¹⁷ That which I speak, I speak it not after the Lord, but, as it were foolishly, in this confidence of boasting.

¹⁸ Seeing that many glory after the flesh, I will glory also.

¹⁹ For ye suffer fools gladly, seeing ye yourselves are wise.

²⁰ For ye suffer, if a man bring you into bondage, if a man devour you, if a man take of you, if a man exalt himself, if a man smite you on the face.

²¹ I speak, as concerning reproach, as though we had been weak: howbeit, whereinsoever any are bold, (I speak foolishly) I am bold also.

²² Are they Hebrews? So am I. Are they Israelites? So am I. Are they the seed of Abraham? So am I.

²³ Are they ministers of Christ? (I speak as a fool) I am more: in labours more abundant, in stripes above measure, in prisons more frequent, in deaths oft.

²⁴ Of the jews five times received I forty stripes save one.

²⁵ Thrice was I beaten with rods, once was I stoned, thrice I suffered shipwreck; a night and a day I have been in the deep:

²⁶ In journeyings often, in perils of waters, in perils of robbers, in perils by mine own countrymen, in perils by the heathen, in perils in the city, in perils in the wilderness, in perils in the sea, in perils among false brethren;

²⁷ In weariness and painfulness, in watchings often, in hunger and thirst, in fastings often, in cold and nakedness.

²⁸ Besides those things that are without, that which cometh upon me daily, the care of all the churches.

²⁹ Who is weak, and I am not weak; who is offended, and I burn not?

³⁰ If I must needs glory, I will glory of the things which concern mine infirmities.

³¹ The God and Father of our Lord Jesus Christ, which is blessed for evermore, knoweth that I lye not.

³² In Damascus, the governor under Aretas the king kept the city of the damascenes, with a garrison, desirous to apprehend me:

³³ And, through a window, in a basket, was I let down by the wall, and escaped his hands.

PARAPHRASE.

¹⁶ I say again, Let no man think me a fool, that I speak so much of myself: or, at least, if it be a folly in me, bear with me as a fool, that I too, as well as¹⁷ others, may boast myself a little. That, which I say on this occasion, is not by command from Christ, but, as it were, foolishly, in this matter of boasting.¹⁸ Since many glory in their circumcision, or extraction,¹⁹ I will glory also. For ye bear with fools²⁰ easily, being yourselves wise. For you bear with it, if a man bring you into bondage, i. e. domineer over you, and use you like his bondmen; if he make a prey of you; if he take, or extort presents, or a salary, from you; if he be elevated, and high, amongst you; if he smite you on the face, i. e. treat you contumeliously.²¹ I speak, according to the reproach has been cast upon me, as if I were weak, i. e. destitute of what might support me in dignity and authority, equal to this false apostle, as if I had not as fair pretences²² to power and profit amongst you, as he. Is he an hebrew, i. e. by language an hebrew? So am I. Is he an israelite, truly of the jewish nation, and bred up in that religion? So am I. Is he of the seed of Abraham, really descended from him? And not a proselyte, of a foreign extraction? So am I.²³ Is he a minister of Jesus Christ? (I speak in my foolish way of boasting) I am more so: in toilsome labours I surpass him: in stripes I am exceedingly beyond him: in prisons I have been oftener; and ²⁴ in the very jaws of death, more than once: Of the jews I have, five times, received forty stripes save²⁵ one. Thrice was I whipped with rods: once was I stoned: thrice shipwrecked: I have passed a night²⁶ and a day in the sea: In journeyings often: in perils by water; in perils by robbers; in perils by mine

own countrymen; in perils from the heathen; in perils in the city; in perils in the country; in perils²⁷ at sea; in perils among false brethren; In toil and trouble, and sleepless nights, often; in hunger and thirst; in fastings, often; in cold and nakedness.²⁸ Besides these troubles from without the disturbance that comes daily upon me, from my concern for all²⁹ the churches. Who is a weak christian, in danger, through frailty or ignorance, to be misled, whose weakness I do not feel and suffer in, as if it were my own? Who is actually misled, for whom my zeal and concern do not make me uneasy, as if I had a fire³⁰ in me? If I must be compelled to glory, I will glory of those things which are of my weak and suffering³¹ side. The God and Father of our Lord Jesus Christ, who is blessed for ever, knoweth that I lye³² not. In Damascus, the governor, under Aretas the king, who kept the town with a garrison, being desirous³³ to apprehend me; I was, through a window, let down in a basket, and escaped his hands.

SECT. IV. N. 6.

CHAPTER XII. 1 — 11.

CONTENTS.

He makes good his apostleship, by the extraordinary visions and revelations, which he had received.

TEXT.

¹ It is not expedient for me, doubtless, to glory: I will come to visions and revelations of the Lord.

² I knew a man in Christ, above fourteen years ago, (whether in the body, I cannot tell; or whether out of the body, I cannot tell; God knoweth,) such an one caught up to the third heaven.

³ And I knew such a man, (whether in the body, or out of the body, I cannot tell: God knoweth)

⁴ How that he was caught up into paradise, and heard unspeakable words, which it is not lawful for a man to utter.

⁵ Of such an one will I glory: yet of myself I will not glory, but in mine infirmities.

⁶ For, though I would desire to glory, I shall not be a fool; for I will say the truth: but now I forbear, lest any man should think of me above that which he seeth me to be, or that he heareth of me.

⁷ And, lest I should be exalted above measure, through the abundance of the revelations, there was given to me a thorn in the flesh, the messenger of Satan to buffet me, lest I should be exalted above measure.

⁸ For this thing I besought the Lord thrice, that it might depart from me.

⁹ And he said unto me, “My grace is sufficient for thee: for my strength is made perfect in weakness.” Most gladly, therefore, will I rather glory in my infirmities, that the power of Christ may rest upon me.

¹⁰ Therefore, I take pleasure in infirmities, in reproaches, in necessities, in persecutions, in distresses for Christ’s sake: for when I am weak, then am I strong.

¹¹ I am become a fool in glorying: ye have compelled me; for I ought to have been commended of you; for in nothing am I behind the very chiefest apostles, though I be nothing.

PARAPHRASE.

¹ If I must be forced to glory for your sakes; (for me it is not expedient) I will come to visions and revelations ² of the Lord. I knew a man, by the power of Christ, above fourteen years ago, caught up into the third heaven, whether the intire man, body and all, or out of the body in an ecstasy, I know not; God knows.³ And I knew such an one, whether in the body, or out⁴ of the body, I know not, God knows, That he was caught up into paradise, and there heard what is not in⁵ the power of man to utter. Of such an one, I will glory; but myself I will not mention, with any boasting, unless in things that carry the marks of weakness,⁶ and show my sufferings. But if I should have a mind to glory in other things, I might do it, without being a fool; for I would speak nothing but what is true, having matter in abundance, but I forbear, lest any one should think of me beyond what he sees me, or⁷ hears commonly reported of me. And that I might not be exalted above measure, by reason of the abundance of revelations that I had, there was given me a thorn in the flesh, the messenger of Satan to buffet ⁸ me, that I might not be over-much elevated. Concerning this thing, I besought the Lord thrice, that⁹ it might depart from me. And he said, My favour is sufficient for thee: for my power exerts itself, and its sufficiency is

seen the more perfectly, the weaker thou thyself art. I, therefore, most willingly choose to glory, rather in things that show my weakness, than in my abundance of glorious revelations, that the power of Christ may the more visibly be¹⁰ seen to dwell in me. Wherefore, I have satisfaction in weaknesses, in reproaches, in necessities, in persecutions, in distresses, for Christ's sake. For when I, looked upon in my outward state, appear weak, then by the power of Christ, which dwelleth in me,¹¹ I am found to be strong. I am become foolish in glorying thus: but it is you, who have forced me to it. For I ought to have been commended by you; since in nothing came I behind the chiefest of the apostles, though in myself I am nothing.

SECT. IV. N. 7.

CHAPTER XII. 12, 13.

CONTENTS.

He continues to justify himself to be an apostle, by the miracles he did, and the supernatural gifts he bestowed amongst the corinthians.

TEXT.

¹² Truly the signs of an apostle were wrought among you, in all patience, in signs and wonders and mighty deeds.

¹³ For what is it wherein ye were inferiour to other churches, except it be that I myself was not burdensome to you? Forgive me this wrong.

PARAPHRASE.

¹² Truly the signs whereby an apostle might be known, were wrought among you, by me, in all patience and submission, under the difficulties I there met with, in miraculous, wonderful and mighty works,¹³ performed by me. For what is there, which you were any way shortened in, and had not equally with other churches, except it be that I myself was not burdensome to you? Forgive me this injury.

SECT. IV. N. 8.

CHAPTER XII. 14 — 21.

CONTENTS.

He farther justifies himself, to the corinthians, by his past disinterestedness, and his continued kind intentions to them.

TEXT.

¹⁴ Behold, the third time, I am ready to come to you; and will not be burdensome to you: for I seek not yours, but you: for the children ought not to lay up for the parents, but the parents for the children.

¹⁵ And I will very gladly spend, and be spent, for you, though, the more abundantly I love you, the less I be loved.

¹⁶ “But be it so, I did not burden you: nevertheless being crafty, I caught you with guile.”

¹⁷ Did I make a gain of you, by any of them, whom I sent unto you?

¹⁸ I desired Titus, and with him I sent a brother; did Titus make a gain of you? Walked we not in the same spirit? Walked we not in the same steps?

¹⁹ Again, think you that we excuse ourselves unto you? We speak before God, in Christ; but we do all things, dearly beloved, for your edifying.

²⁰ For I fear, lest, when I come, I shall not find you such as I would, and that I shall be found unto you, such as ye would not: lest there be debates, envyings, wraths, strifes, backbitings, whisperings, swellings, tumults:

²¹ And lest, when I come again, my God will humble me among you, and that I shall bewail many, which have sinned already, and have not repented of the uncleanness, and fornication, and lasciviousness, which they have committed.

PARAPHRASE.

¹⁴ Behold, this is the third time I am ready to come unto you; but I will not be burdensome to you; for I seek not what is yours, but you: for it is not expected, nor usual, that children should lay up for¹⁵ their parents, but parents for their children. I will gladly lay out whatever is in my possession, or power; nay, even wear out and hazard myself for your souls, though it should so fall out that the more I love you, the less I should be beloved by¹⁶ you. “Be it so, as some suggest, that I was not burdensome to you; but it was in truth out of cunning, with a design to catch you, with that trick, drawing from you, by others, what I refused¹⁷ in person.” In answer to

which, I ask, Did I, by any of those, I sent unto you, make a¹⁸ gain of you? I desired Titus to go to you, and with him I sent a brother: did Titus make a gain of you? Did not they behave themselves with the same temper, that I did, amongst you? Did we not walk in the same steps? i. e. neither they, nor¹⁹ I, received any thing from you. Again, do not, upon my mentioning my sending of Titus to you, think that I apologize for my not coming myself: I speak, as in the presence of God, and as a christian, there is no such thing: in all my whole carriage towards you, beloved, all that has been done, has been done only for your edification. No, there is no need of an apology for my not coming to you²⁰ sooner: For I fear, when I do come, I shall not find you such as I would, and that you will find me such as you would not: I am afraid, that among you there are disputes, envyings, animosities, strifes, backbitings, whisperings, swellings of mind, disturbances: ²¹ And that my God, when I come to you again, will humble me amongst you, and I shall bewail many, who have formerly sinned, and have not yet repented of the uncleanness, fornication, and lasciviousness, whereof they are guilty.

SECT. IV. N. 9.

CHAPTER XIII. 1 — 10.

CONTENTS.

He re-assumes what he was going to say, ch. xii. 14, and tells them, how he intends to deal with them, when he comes to them: and assures them, that, however they question it, he shall be able, by miracles, to give proof of his authority and commission from Christ.

TEXT.

¹ This is the third time I am coming to you: in the mouth of two or three witnesses shall every word be established.

² I told you before, and foretel you, as if I were present the second time; and, being absent, now I write to them, which heretofore have sinned, and to all other, that, if I come again, I will not spare:

³ Since ye seek a proof of Christ speaking in me, which to you-ward is not weak, but is mighty in you.

⁴ For though he was crucified through weakness, yet he liveth by the power of God: for we also are weak in him, but we shall live, with him, by the power of God towards you.

⁵ Examine yourselves, whether ye be in the faith; prove your own selves: know ye not your own selves, how that Jesus Christ is in you, except ye be reprobates?

⁶ But I trust that ye shall know, that we are not reprobates.

⁷ Now I pray to God, that ye do no evil; not that we should appear approved, but that ye should do that which is honest, though we be as reprobates.

⁸ For we can do nothing against the truth, but for the truth.

⁹ For we are glad, when we are weak, and ye are strong: and this also we wish, even your perfection.

¹⁰ Therefore I write these things, being absent; lest, being present, I should use sharpness, according to the power, which the Lord hath given me, to edification, and not to destruction.

PARAPHRASE.

¹ This is now, the third time, I am coming to you; and, when I come, I shall not spare you, having proceeded, according to our Saviour's rule, and endeavoured by fair means, first to reclaim you, before I² come to the last extremity. And of this my former epistle, wherein I applied myself to you, and this, wherein I now, as if I were present with you, foretel those, who have formerly sinned, and all the rest, to whom, being now absent, I write, that when I come, I will not spare you. I say, these two letters are my witnesses, according to our Saviour's rule, which says, "In the mouth of two or three witnesses every word³ shall be established:" Since you demand a proof of my mission, and of what I deliver, that it is dictated by Christ speaking in me, who must be acknowledged not to be weak to you-ward, but has given sufficient ⁴ marks of his power amongst you. For, though his crucifixion and death were with appearance of weakness; yet he liveth with the manifestation of the power of God, appearing in my punishing you.⁵ You examine me, whether I can, by any miraculous operation, give a proof, that Christ is in me. Pray, examine yourselves, whether you be in the faith; make a trial upon yourselves, whether you yourselves are not somewhat destitute of proofs. Or, are you so little acquainted with yourselves, as not⁶

to know, whether Christ be in you? But, if you do not know yourselves, whether you can give proofs or no, yet I hope, you shall know, that I am not unable⁷ to give proof of Christ in me. But I pray to God that you may do no evil, wishing not for an opportunity to show my proofs: but that you, doing what is right, I may be, as if I had no proofs, no supernatural ⁸ power. For though I have the power of punishing supernaturally, I cannot show this power upon any of you, unless it be that you are offenders, and your⁹ punishment be for the advantage of the gospel. I am, therefore, glad, when I am weak, and can inflict no punishment upon you; and you are so strong, i. e. clear of faults, that ye cannot be touched. For all the power I have is only for promoting the truth of the gospel; whoever are faithful and obedient to that, I can do nothing to; I cannot make examples of them, by all the extraordinary power I have, if I would: nay, this also I wish, even your perfection.¹⁰ These things, therefore, I write to you, being absent, that when I come, I may not use severity, according to the power which the Lord hath given me, for edification, not for destruction.

SECT. V.

CHAPTER XIII. 11 — 14.

CONCLUSION.

TEXT.

¹¹ Finally, brethren, farewell; be perfect, be of good comfort, be of one mind, live in peace; and the God of love and peace shall be with you.

¹² Greet one another with an holy kiss.

¹³ All the saints salute you.

¹⁴ The grace of our Lord Jesus Christ, and the love of God, and the communion of the Holy Ghost, be with you all. Amen.

PARAPHRASE.

¹¹ Finally, brethren, farewell: bring yourselves into one well-united, firm, unjarring society; be of good comfort; be of one mind; live in peace, and¹² the God of love and peace shall be with you. Salute¹³ one another with an holy kiss: All the saints salute¹⁴ you. The grace of our Lord Jesus Christ,

and the love of God, and the communion of the Holy Ghost, be with you all.
Amen.

A PARAPHRASE AND NOTES ON THE EPISTLE OF ST. PAUL TO THE ROMANS.

THE EPISTLE OF ST. PAUL TO THE ROMANS; WRIT IN THE YEAR
OF OUR LORD 57, OF NERO III.

SYNOPSIS.

Before we take into consideration the epistle to the Romans in particular, it may not be amiss to premise, that the miraculous birth, life, death, resurrection, and ascension of our Lord Jesus Christ, were all events, that came to pass within the confines of Judea; and that the ancient writings of the jewish nation, allowed by the christians to be of divine original, were appealed to, as witnessing the truth of his mission and doctrine; whereby it was manifest, that the jews were the depositaries of the proofs of the christian religion. This could not choose but give the jews, who were owned to be the people of God, even in the days of our Saviour, a great authority among the convert gentiles, who knew nothing of the Messiah, they were to believe in, but what they derived from that nation, out of which he and his doctrine sprung. Nor did the jews fail to make use of this advantage, several ways to the disturbance of the gentiles, that embraced christianity. The jews, even those of them that received the gospel, were for the most part, so devoted to the law of Moses and their ancient rites, that they could by no means, bring themselves to think, that they were to be laid aside. They were, every-where, stiff and zealous for them, and contended that they were necessary to be observed, even by christians, by all that pretended to be the people of God, and hoped to be accepted by him. This gave no small trouble to the newly-converted gentiles, and was a great prejudice to the gospel, and therefore we find it complained of, in more places than one; vid. Acts xv. 1; 2 Cor. xi. 3; Gal. ii. 4, and v. 1, 10, 12; Phil. iii. 2; Col. ii. 4, 8, 16; Tit. i. 10, 11, 14, &c. This remark may serve to give light, not only to this epistle to the romans, but to several other of St. Paul's epistles, written to the churches of converted gentiles.

As to this epistle to the romans, the apostle's principal aim in it seems to be, to persuade them to a steady perseverance in the profession of

christianity, by convincing them, that God is the God of the gentiles, as well as of the jews; and that now, under the gospel, there is no difference between jew and gentile. This he does several ways:

By showing, that, though the gentiles were very sinful, yet the jews, who had the law, kept it not, and so could not, upon account of their having the law (which being broken aggravated their faults, and made them as far from righteous, as the gentiles themselves) have a title to exclude the gentiles, from being the people of God, under the gospel.

That Abraham was a father of all that believe, as well uncircumcised, as circumcised; so that those, that walk in the steps of the faith of Abraham, though uncircumcised, are the seed, to which the promise is made, and shall receive the blessing.

That it was the purpose of God, from the beginning, to take the gentiles to be his people under the Messias, in the place of the jews, who had been so, till that time, but were then nationally rejected, because they nationally rejected the Messias, whom he sent to them to be their King and Deliverer, but was received by but a very small number of them, which remnant was received into the kingdom of Christ, and so continued to be his people, with the converted gentiles, who all together made now the church and people of God.

That the jewish nation had no reason to complain of any unrighteousness in God, or hardship from him, in their being cast off, for their unbelief, since they had been warned of it, and they might find it threatened in their ancient prophets. Besides, the raising or depressing of any nation is the prerogative of God's sovereignty. Preservation in the land, that God has given them, being not the right of any one race of men, above another. And God might, when he thought fit, reject the nation of the jews, by the same sovereignty, whereby he at first chose the posterity of Jacob to be his people, passing by other nations, even such as descended from Abraham and Isaac: but yet he tells them, that at last they shall be restored again.

Besides the assurance he labours to give the romans, that they are, by faith in Jesus Christ, the people of God, without circumcision, or other observances of the jews, whatever they may say, (which is the main drift of this epistle,) it is farther remarkable, that this epistle being writ to a church of gentiles, in the metropolis of the roman empire, but not planted by St. Paul himself; he, as apostle of the gentiles, out of care that they should rightly understand the gospel, has woven into his discourse the chief

doctrines of it, and given them a comprehensive view of God's dealing with mankind, from first to last, in reference to eternal life. The principal heads whereof are these:

That, by Adam's transgression, sin entered into the world, and death by sin, and so death reigned over all men, from Adam to Moses.

That, by Moses, God gave the children of Israel (who were his people, i. e. owned him for their God, and kept themselves free from the idolatry and revolt of the heathen world) a law, which if they obeyed they should have life thereby, i. e. attain to immortal life, which had been lost by Adam's transgression.

That though this law, which was righteous, just, and good, were ordained to life, yet, not being able to give strength to perform what it could not but require, it failed, by reason of the weakness of human nature, to help men to life. So that, though the israelites had statutes, which if a man did, he should live in them; yet they all transgressed, and attained not to righteousness and life, by the deeds of the law.

That, therefore, there was no way to life left to those under the law, but by the righteousness of faith in Jesus Christ, by which faith alone they were that seed of Abraham, to whom the blessing was promised.

This was the state of the israelites.

As to the gentile world, he tells them,

That, though God made himself known to them, by legible characters of his being and power, visible in the works of the creation; yet they glorified him not, nor were thankful to him; they did not own nor worship the one, only, true, invisible God, the creator of all things, but revolted from him, to gods set up by themselves, in their own vain imaginations, and worshipped stocks and stones, the corruptible images of corruptible things.

That, they having thus cast off their allegiance to him, their proper Lord, and revolted to other gods, God, therefore cast them off, and gave them up to vile affections, and to the conduct of their own darkened hearts, which led them into all sorts of vices.

That both jews and gentiles, being thus all under sin, and coming short of the glory of God; God, by sending his Son Jesus Christ, shows himself to be the God both of the jews and gentiles; since he justifieth the circumcision by faith, and the uncircumcision through faith, so that all, that believe, are freely justified by his grace.

That though justification unto eternal life be only by grace, through faith in Jesus Christ; yet we are, to the utmost of our power, sincerely to endeavour after righteousness, and from our hearts obey the precepts of the gospel, whereby we become the servants of God; for his servants we are whom we obey, whether of sin unto death, or obedience unto righteousness.

These are but some of the more general and comprehensive heads of the christian doctrine, to be found in this epistle. The design of a synopsis will not permit me to descend more minutely to particulars. But this let me say, that he, that would have an enlarged view of true christianity, will do well to study this epistle.

Several exhortations, suited to the state that the christians of Rome were then in, make up the latter part of the epistle.

This epistle was writ from Corinth, the year of our Lord, according to the common account, 57, the third year of Nero, a little after the second epistle to the corinthians.

SECT. I.

CHAPTER I. 1 — 15.

CONTENTS.

INTRODUCTION,
WITH HIS PROFESSION OF A DESIRE TO SEE THEM.

TEXT.

¹ Paul, a servant of Jesus Christ, called to be an apostle, separated unto the gospel of God,

² (Which he had promised afore, by his prophets, in the holy scriptures)

³ Concerning his son Jesus Christ our Lord, (which was made of the seed of David, according to the flesh;

⁴ And declared to be the son of God with power, according to the spirit of holiness, by the resurrection from the dead:

⁵ By whom we have received grace and apostleship, for obedience to the faith among all nations for his name;

⁶ Among whom are ye also the called of Jesus Christ.)

⁷ To all that be in Rome, beloved of God, called to be saints: grace to you, and peace from God our Father, and the Lord Jesus Christ.

⁸ First, I thank my God, through Jesus Christ, for you all, that your faith is spoken of, throughout the whole world.

⁹ For God is my witness, whom I serve with my spirit, in the gospel of his Son, that without ceasing I make mention of you always in my prayers;

¹⁰ Making request (if by any means, now at length, I might have a prosperous journey, by the will of God) to come unto you.

¹¹ For I long to see you, that I may impart unto you some spiritual gift, to the end you may be established;

¹² That is, that I may be comforted together with you, by the mutual faith both of you and me.

¹³ Now I would not have you ignorant, brethren, that oftentimes I purposed to come unto you (but was let hitherto) that I might have some fruit among you also, even as among other gentiles.

¹⁴ I am debtor both to the greeks and to the barbarians, both to the wise and to the unwise.

¹⁵ So, as much as in me is, I am ready to preach the gospel to you that are at Rome also.

PARAPHRASE.

¹ Paul, a servant of Jesus Christ, called to be an apostle, separated to the preaching of the gospel of² God (Which he had heretofore promised, by his prophets,³ in the holy scriptures) Concerning his son Jesus Christ our Lord, (who according to the flesh, i. e. as to the body, which he took in the womb of the blessed virgin, his mother, was of the posterity⁴ and lineage of David; According to the spirit of holiness, i. e. as to that more pure and spiritual part, which in him over-ruled all, and kept even his frail flesh holy and spotless from the least taint of sin, and was of another extraction, with most mighty power declared to be the son of God, by his resurrection⁵ from the dead; By whom I have received favour, and the office of an apostle, for the bringing of the gentiles, every where, to the obedience of faith,⁶ which I preach in his name; Of which number, i. e. gentiles, that I am sent to preach to, are ye who⁷ are already called¶, and become christians.) To all the beloved of God¶, and called to be saints, who are in Rome, favour and peace be to you from God⁸ our Father, and the Lord Jesus Christ. In the first

place, I thank my God, through Jesus Christ for you all, that your faith is spoken of throughout the whole⁹ world. For God is my witness, whom I serve with the whole bent of my mind, in preaching the gospel of his son, that without ceasing I constantly make¹⁰ mention of you in my prayers. Requesting (if it be God's will, that I may now at length, if possible,¹¹ have a good opportunity) to come unto you. For I long to see you, that I may communicate to you some spiritual gift, for your establishment in the¹² faith; That is, that, when I am among you, I may be comforted together with you, both with your¹³ faith and my own. This I think fit you should know, brethren, that I often purposed to come unto you, that I may have some fruit of my ministry,¹⁴ among you also, even as among other gentiles. I owe, what service I can do, to the gentiles of all kinds, whether greeks or barbarians, to both the more knowing and civilized, and the uncultivated¹⁵ and ignorant: So that, as much as in me lies, I am ready to preach the gospel to you also, who are at Rome.

SECT. II.

CHAPTER I. 16. — II. 29.

CONTENTS.

St. Paul, in this section, shows, that the jews exclude themselves from being the people of God, under the gospel, by the same reason that they would have the gentiles excluded.

It cannot be sufficiently admired how skilfully, to avoid offending those of his own nation, St. Paul here enters into an argument, so unpleasing to the jews, as this of persuading them, that the gentiles had as good a title to be taken in, to be the people of God, under the Messias, as they themselves, which is the main design of this epistle.

In this latter part of the first chapter, he gives a description of the gentile world in very black colours, but very adroitly interweaves such an apology for them, in respect of the jews, as was sufficient to beat that assuming nation out of all their pretences to a right to continue to be alone the people of God, with an exclusion of the gentiles. This may be seen, if one carefully attends to the particulars, that he mentions, relating to the jews and gentiles; and observes how, what he says of the jews, in the second chapter, answers to what he had charged on the gentiles, in the first. For there is a secret

comparison of them, one with another, runs through these two chapters, which, as soon as it comes to be minded, gives such a light and lustre to St. Paul's discourse, that one cannot but admire the skilful turn of it: and look on it as the most soft, the most beautiful, and most pressing argumentation, that one shall any where meet with, altogether: since it leaves the jews nothing to say for themselves, why they should have the privilege continued to them, under the gospel, of being alone the people of God. All the things they stood upon, and boasted in, giving them no preference, in this respect, to the gentiles; nor any ground to judge them to be incapable, or unworthy to be their fellow-subjects, in the kingdom of the Messias. This is what he says, speaking of them nationally. But as to every one's personal concerns in a future state, he assures them, both jews and gentiles, that the unrighteous of both nations, whether admitted, or not, into the visible communion of the people of God, are liable to condemnation. Those, who have sinned without law, shall perish without law; and those, who have sinned in the law, shall be judged, i. e. condemned by the law.

Perhaps some readers will not think it superfluous, if I give a short draught of St. Paul's management of himself here for allaying the sourness of the jews, against the gentiles, and their offence at the gospel, for allowing any of them place among the people of God, under the Messias.

After he had declared that the gospel is the power of God unto salvation, to those who believe; to the jew first, and also to the gentile; and that the way of this salvation is revealed to be, by the righteousness of God, which is by faith; he tells them, that the wrath of God is also now revealed against all atheism, polytheism, idolatry, and vice whatsoever, of men holding the truth in unrighteousness, because they might come to the knowledge of the true God, by the visible works of the creation; so that the gentiles were without excuse, for turning from the true God to idolatry, and the worship of false gods, whereby their hearts were darkened; so that they were without God in the world. Wherefore, God gave them up to vile affections, and all manner of vices, in which state, though, by the light of nature, they know what was right, yet understanding not that such things were worthy of death, they not only do them themselves, but abstaining from censure, live fairly and in fellowship with those that do them. Whereupon he tells the jews, that they are more inexcusable than the heathen, in that they judge, abhor, and have in aversion, the gentiles, for what they themselves do with greater provocation. Their censure and judgment in the case is unjust and

wrong: but the judgment of God is always right and just, which will certainly overtake those who judge others, for the same things they do themselves; and do not consider, that God's forbearance to them ought to bring them to repentance. For God will render to every one according to his deeds; to those that in meekness and patience continue in well-doing, everlasting life; but to those who are censorious, proud and contentious, and will not obey the gospel, condemnation and wrath, at the day of judgment, whether they be jews or gentiles: for God puts no difference between them. Thou, that art a jew, boastest that God is thy God; that he has enlightened thee by the law that he himself gave thee from heaven, and hath, by that immediate revelation, taught thee what things are excellent and tend to life, and what are evil and have death annexed to them. If, therefore, thou transgressest, dost not thou more dishonour God and provoke him, than a poor heathen, that knows not God, nor that the things he doth, deserve death, which is their reward? Shall not he, if, by the light of nature, he do what is conormable to the revealed law of God, judge thee, who hast received that law from God, by revelation, and breakest it? Shall not this, rather than circumcision, make him an israelite? For he is not a jew, i. e. one of God's people, who is one outwardly, by circumcision of the flesh; but he that is one inwardly, by the circumcision of the flesh; but he that is one inwardly, by the circumcision of the heart.

TEXT.

¹⁶ For I am not ashamed of the gospel of Christ; for it is the power of God unto salvation, to every one that believeth, to the jew first, and also to the greek.

¹⁷ For therein is the righteousness of God revealed from faith to faith: as it is written, The just shall live by faith.

¹⁸ For the wrath of God is revealed from heaven, against all ungodliness, and unrighteousness of men, who hold the truth in unrighteousness.

¹⁹ Because that, which may be known of God, is manifest in them; for God hath showed it unto them.

²⁰ For the invisible things of him, from the creation of the world, are clearly seen, being understood by the things that are made, even his eternal power and godhead; so that they are without excuse.

²¹ Because that, when they knew God, they glorified him not as God, neither were thankful, but became vain in their imaginations, and their foolish heart was darkened.

²² Professing themselves to be wise, they became fools:

²³ And changed the glory of the uncorruptible God into an image, made like to corruptible man, and to birds, and four-footed beasts, and creeping things.

²⁴ Wherefore God also gave them up to uncleanness, through the lusts of their own hearts, to dishonour their own bodies between themselves:

²⁵ Who changed the truth of God into a lye, and worshipped and served the creature more than the Creator, who is blessed for ever. Amen.

²⁶ For this cause God gave them up unto vile affections: for even their women did change the natural use into that which is against nature:

²⁷ And likewise also the men, leaving the natural use of the woman, burned in their lust, one toward another, men with men, working that which is unseemly, and receiving in themselves that recompence of their error, which was meet.

²⁸ And, even as they did not like to retain God in their knowledge, God gave them over to a reprobate mind, to do those things which are not convenient:

²⁹ Being filled with all unrighteousness, fornication, wickedness, covetousness, maliciousness; full of envy, murder, debate, deceit, malignity, whisperers,

³⁰ Backbiters, haters of God, despiteful, proud, boasters, inventors of evil things, disobedient to parents,

³¹ Without understanding, covenant-breakers, without natural affection, implacable, unmerciful;

³² Who knowing the judgment of God (that they which commit such things are worthy of death) not only do the same, but have pleasure in them that do them.

II. 1Therefore thou art inexcusable, O man, whosoever thou art that judgest: for wherein thou judgest another, thou condemnest thyself; for thou, that judgest, dost the same thing.

² But we are sure that the judgment of God is according to truth, against them which commit such things.

³ And thinkest thou this, O man, that judgest them which do such things, and dost the same, that thou shalt escape the judgment of God?

⁴ Or despisest thou the riches of his goodness, and forbearance, and long-suffering; not knowing that the goodness of God leadeth thee to repentance?

⁵ But, after thy hardness and impenitent heart, treasurest up unto thyself wrath, against the day of wrath, and revelation of the righteous judgment of God;

⁶ Who will render to every man according to his deeds:

⁷ To them who by patient continuance in well-doing, seek for glory, and honour, and immortality; eternal life:

⁸ But unto them that are contentious, and do not obey the truth, but obey unrighteousness; indignation and wrath;

⁹ Tribulation and anguish, upon every soul of man that doth evil, of the jew first, and also of the gentile.

¹⁰ But glory, honour, and peace, to every man that worketh good, to the jew first, and also to the gentile.

¹¹ For there is no respect of persons with God.

¹² For, as many as have sinned without law, shall also perish without law; and as many as have sinned in the law, shall be judged by the law;

¹³ (For not the hearers of the law are just before God, but the doers of the law shall be justified.

¹⁴ For when the gentiles, which have not the law, do by nature the things contained in the law, these, having not the law, are a law unto themselves.

¹⁵ Which show the work of the law written in their hearts, their conscience also bearing witness, and their thoughts, the mean while, accusing, or else excusing one another)

¹⁶ In the day, when God shall judge the secrets of men, by Jesus Christ, according to my gospel.

¹⁷ Behold, thou art called a jew, and retest in the law, and makest thy boast of God:

¹⁸ And knowest his will, and approvest the things that are more excellent, being instructed out of the law.

¹⁹ And art confident that thou thyself art a guide of the blind, a light of them which are in darkness,

²⁰ An instructor of the foolish, a teacher of babes, which hast the form of knowledge, and of the truth in the law.

²¹ Thou, therefore, which teachest another, teachest thou not thyself? thou that preachest a man should not steal, dost thou steal?

²² Thou, that sayest a man should not commit adultery, dost thou commit adultery? thou, that abhorrest idols, dost thou commit sacrilege?

²³ Thou, that makest thy boast of the law, through breaking the law, dishonourest thou God?

²⁴ For the name of God is blasphemed among the gentiles, through you, as it is written.

²⁵ For circumcision verily profiteth, if thou keep the law: but if thou be a breaker of the law, thy circumcision is made uncircumcision.

²⁶ Therefore, if the uncircumcision keep the righteousness of the law, shall not his uncircumcision be counted for circumcision?

²⁷ And shall not uncircumcision, which is by nature, if it fulfil the law, judge thee, who by the letter and circumcision dost transgress the law?

²⁸ For he is not a jew, which is one outwardly; neither is that circumcision, which is outward in the flesh:

²⁹ But he is a jew, which is one inwardly; and circumcision is that of the heart, in the spirit, and not in the letter, whose praise is not of men, but of God.

PARAPHRASE.

¹⁶ For I am not ashamed to preach the gospel of Christ, even at Rome itself, that mistress of the world: for, whatever it may be thought of there, by that vain and haughty people, it is that, wherein God exerts himself, and shows his power, for the salvation of those who believe, of the jews in the¹⁷ first place, and also of the gentiles. For therein is the righteousness, which is of the free grace of God, through Jesus Christ, revealed to be wholly by faith, as it is written, The just shall live by¹⁸ faith. And it is no more than need, that the gospel, wherein the righteousness of God, by faith in Jesus Christ, is revealed, should be preached to you gentiles, since the wrath of God is now revealed from heaven, by Jesus Christ, against all ungodliness and unrighteousness of men, who live not¹⁹ up to the light that God has given them. Because God, in a clear manifestation of himself amongst them, has laid before them, ever since the creation of the world, his divine nature and eternal²⁰ power; So that what is to be known, of his invisible being, might be clearly discovered and understood, from the visible beauty, order, and operations, observable in the constitution and parts of the universe, by all those, that would cast their regards, and apply their minds that way:

insomuch that²¹ they are utterly without excuse: For that, when the Deity was so plainly discovered to them, yet they glorified him not, as was suitable to the excellency of his divine nature: nor did they, with due thankfulness, acknowledge him as the author of their being, and the giver of all the good they enjoyed: but, following the vain fancies of their own vain minds, set up to themselves fictitious no-gods, and²² their foolish understandings were darkened. Assuming to themselves the opinion and name of²³ being wise, they became fools; And, quitting the incomprehensible majesty and glory of the eternal, incorruptible Deity, set up to themselves the images of corruptible men, birds, beasts, and insects, as fit²⁴ objects of their adoration and worship. Wherefore, they having forsaken God, he also left them to the lusts of their own hearts, and that uncleanness their darkened hearts led them into, to dishonour²⁵ their bodies among themselves: Who so much debased themselves, as to change the true God, who made them, for a lye of their own making, worshipping and serving the creature, and things even of a lower rank than themselves, more than the Creator, who is God over all, blessed for evermore. Amen.²⁶ (For this cause God gave them up to shameful and infamous lusts and passions, for even their women did change their natural use, into that which is²⁷ against nature: And likewise, their men, leaving also the natural use of the women, burned in their lusts one towards another, men with men practising that which is shameful, and receiving in themselves a fit reward of their error, i. e. idolatry.)²⁸ And., as they did not search out God, whom they had in the world, so as to have him with a due acknowledgment of him, God gave them up to an unsearching and unjudicious mind, to do things²⁹ incongruous, and not meet to be done; Being filled with all manner of iniquity, fornication, wickedness, covetousness, malice, full of envy, contention,³⁰ deceit, malignity even to murder, Backbiters, haters of God, insulters of men, proud, boasters, inventors of new arts of debauchery, disobedient to parents,³¹ Without understanding, covenant-breakers, without³² natural affection, implacable, unmerciful: Who, though they acknowledge the rule of right prescribed them by God, and discovered by the light of nature, did not yet understand that those, who did such things, were worthy of death, do not only do them themselves, but live well together, without any mark of disesteem, or censure, with them that do them.II. 1 Therefore, thou art inexcusable, O man, whosoever thou art, that judgest or censurest another: for wherein thou judgest another, thou

condemnest thyself: for thou, that judgest, art alike guilty, in doing² the same things. But this we are sure of, that the judgment, that God passes upon any offenders, is according³ to truth, right and just. Canst thou, who dost those things which thou condemnest in another, think that thou shalt escape the condemning sentence⁴ of God? Or slightest thou the riches of his goodness, forbearance, and long-suffering, not knowing, nor considering, that the goodness of God ought to lead thee⁵ to repentance? But layest up to thyself wrath and punishment, which thou wilt meet with, at the day of judgment, and that just retribution, which shall be awarded thee by God, in proportion to thy impenitency,⁶ and the hardness of thy heart; Who will retribute to every one according to his works, viz.⁷ Eternal life to all those who by patience and gentleness in well-doing seek glory and honour, and a⁸ state of immortality: But to them who are contentious and forward, and will not obey the truth, but subject themselves to unrighteousness;⁹ indignation and wrath; Tribulation and anguish shall be poured out upon every soul of man that worketh evil, of the jew first, and also of the gentile.¹⁰ But glory, honour, and peace, shall be bestowed on every man, that worketh good, on the jew first,¹¹ and also on the gentile. For with God there is no¹² respect of persons. For all, that have sinned without having the positive law of God, which was given the israelites, shall perish without the law; and all, who have sinned, being under the law, shall be¹³ judged by the law, (For the bare hearers of the law are not thereby just, or righteous, in the sight of God, but the doers of the law; they, who exactly perform¹⁴ all that is commanded in it, shall be justified. For, when the gentiles, who have no positive law given them by God, do, by the direction of the light of nature, observe, or keep to the moral rectitude, contained in the positive law, given by God to the israelites, they being without any positive law given them, have nevertheless a law within themselves.¹⁵ And show the rule of the law written in their hearts, their consciences also bearing witness to that law, they amongst themselves, in the reasoning of their own minds, accusing, or excusing one¹⁶ another) At the day of judgment, when, as I make known in my preaching the gospel, God shall¹⁷ judge all the actions of men, by Jesus Christ. Behold, thou art named a jew; and thou, with satisfaction, retest in the privilege of having the law, as a mark of God's peculiar favour, whom thou gloriest in, as being thy God, and thou one of his people; a people, who alone know and worship the¹⁸ true God; And thou knowest his will, and hast the touch-stone of things excellent, having been educated¹⁹ in the law,

And takest upon thee as one, who art a guide to the blind, a light to the ignorant²⁰ gentiles, who are in darkness, An instructor of the foolish, a teacher of babes, having an exact draught, and a complete system of knowledge and²¹ truth in the law. Thou, therefore, who art a master in this knowledge, and teachest others, teachest thou not thyself? Thou, that preachest that a man should²² not steal, dost thou steal? Thou, that declarest adultery to be unlawful, dost thou commit it? Thou, that abhorrest idols, dost thou commit sacrilege?²³ Thou, who gloriest in the law, dost thou, by breaking of the law, dishonour God? For the name of God is blasphemed amongst the gentiles, by reason²⁵ of your miscarriages, as it is written, Circumcision indeed, and thy being a jew, profiteth, if thou keep the law: but, if thou be a transgressor of the law, thy circumcision is made uncircumcision;²⁶ thou art no way better than an heathen. If, therefore, an uncircumcised gentile keep the moral rectitudes of the law, shall he not be reckoned and accounted of, as if he were circumcised, and every²⁷ way a jew? And shall not a gentile, who, in his natural state of uncircumcision, fulfils the law, condemn thee, who, notwithstanding the advantage of having the law and circumcision, art a transgressor²⁸ of the law? For he is not a jew, who is one in outward appearance and conformity, nor is that the circumcision, which renders a man acceptable to²⁹ God, which is outwardly in the flesh. But he is a jew, and one of the people of God, who is one in an inward conformity to the law: and that is the circumcision which avails a man, which is of the heart, according to the spiritual sense of the law, which is the purging our hearts from iniquity, by faith in Jesus Christ, and not in an external observance of the letter, by which a man cannot attain life; such true israelites as these, though they are judged, condemned, and rejected by men of the jewish nation, are nevertheless honoured and accepted by God.

SECT.

CHAPTER III. 1 — 31.

CONTENTS.

In this third chapter, St. Paul goes on to show, that the national privileges the jews had over the gentiles, in being the people of God, gave them no peculiar right, or better title to the kingdom of the Messias, than what the gentiles had. Because they, as well as the gentiles, all sinned, and, not being

able to attain righteousness by the deeds of the law, more than the gentiles, justification was to be had, only by the free grace of God, through faith in Jesus Christ; so that, upon their believing, God, who is the God not of the jews alone, but also of the gentiles, accepted the gentiles, as well as the jews; and now admits all, who profess faith in Jesus Christ, to be equally his people.

To clear his way to this, he begins, with removing an objection of the jews, ready to say: “if it be so, as ye have told us in the foregoing section, that it is the circumcision of the heart alone that availeth, what advantage have the jews, who keep to the circumcision of the flesh, and the other observances of the law, by being the people of God?” To which he answers, that the jews had many advantages above the gentiles; but yet that, in respect of their acceptance with God under the gospel, they had none at all. He declares that both jews and gentiles are sinners, both equally incapable of being justified by their own performances: that God was equally the God, both of jews and gentiles, and out of his free grace justified those, and only those, who believed, whether jews, or gentiles.

TEXT.

¹ What advantage then hath the jew? or what profit is there of circumcision?

² Much every way: chiefly, because that unto them were committed the oracles of God.

³ For what if some did not believe? shall their unbelief make the faith of God without effect?

⁴ God forbid! yea, let God be true, but every man a liar; as it is written, That thou mightest be justified in thy sayings, and mightest overcome when thou art judged.

⁵ But if our unrighteousness commend the righteousness of God, what shall we say? Is God unrighteous, who taketh vengeance? (I speak as a man)

⁶ God forbid! for then, how shall God judge the world?

⁷ For, if the truth of God hath more abounded, through my lye, unto his glory; why yet am I also judged as a sinner?

⁸ And not rather (as we be slanderously reported, and as some affirm that we say) “Let us do evil, that good may come?” whose damnation is just.

⁹ What then? are we better than they? No, in no wise: for we have before proved both jews and gentiles, that they are all under sin:

¹⁰ As it is written, There is none righteous, no not one:

¹¹ There is none that understandeth, there is none that seeketh after God.

¹² They are all gone out of the way, they are together become unprofitable, there is none that doeth good, no not one.

¹³ Their throat is an open sepulchre; with their tongues they have used deceit; the poison of asps is under their lips;

¹⁴ Whose mouth is full of cursing and bitterness.

¹⁵ Their feet are swift to shed blood.

¹⁶ Destruction and misery are in their ways:

¹⁷ And the way of peace have they not known.

¹⁸ There is no fear of God before their eyes.

¹⁹ Now we know that what things soever the law saith, it saith to them who are under the law; that every mouth may be stopped, and all the world may become guilty before God.

²⁰ Therefore by the deeds of the law there shall no flesh be justified in his sight: for by the law is the knowledge of sin.

²¹ But now the righteousness of God, without the law, is manifested, being witnessed by the law and the prophets;

²² Even the righteousness of God, which is by faith of Jesus Christ, unto all, and upon all them that believe; for there is no difference:

²³ For all have sinned, and come short of the glory of God;

²⁴ Being justified freely by his grace, through the redemption that is in Jesus Christ:

²⁵ Whom God hath set forth to be a propitiation, through faith in his blood, to declare his righteousness for the remission of sins that are past, through the forbearance of God.

To declare, I say, at this time his righteousness; that he might be just, and the justifier of him which believeth in Jesus.

²⁷ Where is boasting then? it is excluded. By what law? of works? nay: but by the law of faith.

²⁸ Therefore we conclude, that a man is justified by faith, without the deeds of the law.

²⁹ Is he the God of the jews only? Is he not also of the gentiles? yes, of the gentiles also.

³⁰ Seeing it is one God, which shall justify the circumcision by faith, and uncircumcision through faith.

³¹ Do we then make void the law through faith? God forbid: yea we establish the law.

PARAPHRASE.

¹ If it be thus, that circumcision, by a failure of obedience to the law, becomes uncircumcision; and that the gentiles, who keep the righteousness, or moral part of the law, shall judge the jews, that transgress the law, what advantage have the jews? or what² profit is there of circumcision? I answer, Much every way; chiefly, that God, particularly present amongst them, revealed his mind and will, and engaged himself in promises to them, by Moses and other his prophets, which oracles they had, and kept amongst them, whilst the rest of mankind had no such communication with the Deity, had no revelation of his purposes of mercy to mankind, but were³ as it were, without God in the world. For, though some of the jews, who had the promises of the Messias, did not believe in him, when he came, and so did not receive the righteousness, which is by faith in Jesus Christ: yet their unbelief cannot render the faithfulness and truth of God of no effect, who had promised to be a God to Abraham and his seed after⁴ him, and bless them to all generations. No, by no means, God forbid that any one should entertain such a thought: yea, let God be acknowledged to be true, and every man a liar, as it is written, That thou mightest be justified in thy sayings,⁵ and mightest overcome when thou art judged. But you will say farther, if it be so, that our sinfulness commendeth the righteousness of God, shown in keeping his word given to our forefathers, what shall I say, is it not injustice in God to punish us for it, and cast us off? (I must be understood to say this, in the person of a carnal man, pleading for himself)⁶ God forbid! For if God be unrighteous, how⁷ shall he judge the world? For, if the truth and veracity of God hath the more appeared to his glory, by reason of my lye, i. e. my sin, why yet am I condemned⁸ for a sinner, and punished for it? Why rather should not this be thought a right consequence, and a just excuse? Let us do evil that good may come of it, that glory may come to God by it. This some maliciously and slanderously report us christians to say, for which they deserve, and will from God receive, punishment, as they deserve.⁹ Are we jews, then, in any whit a better

condition than the gentiles? Not at all. For I have already brought a charge of guilt and sin, both against jews and gentiles, and urged that there is not one of them clear, which I shall prove now against you¹⁰ jews; For it is written, There is none righteous, no¹¹ not one: There is none that understandeth, there¹² is none that seeketh after God. They are all gone out of the way, they are together become unprofitable, there is none that doth good, no, not one.¹³ Their throat is an open sepulchre; with their tongues they have used deceit; the poison of asps¹⁴ is under their lips; Whose mouth is full of cursing¹⁵ and bitterness. Their feet are swift to shed blood:¹⁶ 17 Destruction and misery are in their ways: And the¹⁸ way of peace have they not known. There is no¹⁹ fear of God before their eyes. This is all said in the sacred book of our law; and what is said there, we know is said to the jews, who are under the law, that the mouth of every jew, that would justify himself, might be stopped, and all the world, jews as well as gentiles, may be forced to acknowledge²⁰ themselves guilty before God. From whence it is evident, that by his own performances, in obedience a law, no man can attain to an exact conformity to the rule of right, so as to be righteous in the sight of God. For by law, which is the publishing the rule with a penalty, we are not delivered from the power of sin, nor can it help men to righteousness, but by law we come experimentally to know sin, in the force and power of it, since we find it prevail upon us, notwithstanding the punishment of²¹ death is, by the law, annexed to it. But the righteousness of God, that righteousness which he intended, and will accept, and is a righteousness not within the rule and rigour of law, is now made manifest, and confirmed by the testimony of the law and the prophets, which bear witness of this truth, that Jesus is the Messias, and that it is according ²² to his purpose and promise, That the righteousness of God, by faith in Jesus the Messias, is extended to, and bestowed on all who believe in him,²³ (for there is no difference between them. They have all, both jews and gentiles, sinned, and fail of attaining that glory which God hath appointed²⁴ for the righteous,) Being made righteous gratis, by the favour of God, through the redemption²⁵ which is by Jesus Christ; Whom God hath set forth to be the propitiatory, or mercy-seat in his own blood, for the manifestation of his [God's] righteousness, by passing over their transgressions, formerly committed, which he hath borne with hitherto, so as to withhold his hand from casting off the nation of the jews, as their past sins deserved.²⁶ For the manifesting of his righteousness at this time, that he might be just, in

keeping his promise, and be the justifier of every one, not who is of the jewish nation, or extraction, but of the faith²⁷ in Jesus Christ. What reason, then, have you jews to glory, and set yourselves so much above the gentiles, in judging them, as you do? None at all: boasting is totally excluded. By what law? By the²⁸ law of works? No, but by the law of faith. I conclude therefore, that a man is justified by faith,²⁹ and not by the works of the law. Is God the God of the jews only, and not of the gentiles also?³⁰ Yea, certainly of the gentiles also. Since the time is come that God is no longer one to the jews, and another to the gentiles, but he is now become one and the same God to them all, and will justify the jews by faith, and the gentiles also through faith, who, by the law of Moses, were heretofore shut out³¹ from being the people of God. Do we then make the law insignificant, or useless, by our doctrine of faith? By no means: but, on the contrary, we establish and confirm the law.

SECT. IV.

CHAPTER IV. 1 — 25.

CONTENTS.

St. Paul having, in the foregoing section, cut off all glorying from the jews upon the account of their having the law, and shown, that that gave them no manner of title or pretence to be the people of God, more than the gentiles under the Messias, and so they had no reason to judge, or exclude the gentiles, as they did; he comes here to prove that their lineal extraction from their father Abraham gave them no better a pretence of glorying, or of setting themselves upon that account above the gentiles, now, in the time of the gospel.

Because Abraham himself was justified by faith, and so had not whereof to glory; for as much as he that receiveth righteousness, as a boon, has no reason to glory: but he that attains it by works.

Because neither they, who had circumcision derived down to them, as the posterity of Abraham, nor they who had the law; but they only, who had faith, were the seed of Abraham, to whom the promise was made. And therefore the blessing of justification was intended for the gentiles, and bestowed on them as well as on the jews, and upon the same ground.

TEXT.

¹ What shall we say then, that Abraham our father, as pertaining to the flesh, hath found?

² For, if Abraham were justified by works, he hath whereof to glory, but not before God.

³ For what saith the scripture? Abraham believed God, and it was counted unto him for righteousness.

⁴ Now to him that worketh, is the reward not reckoned of grace, but of debt.

⁵ But to him that worketh not, but believeth on him, that justifieth the ungodly, his faith is counted for righteousness.

⁶ Even as David also describeth the blessedness of the man, unto whom God imputeth righteousness without works.

⁷ Saying, Blessed are they, whose iniquities are forgiven, and whose sins are covered.

⁸ Blessed is the man, to whom the Lord will not impute sin.

⁹ Cometh this blessedness, then, upon the circumcision only, or upon the uncircumcision also? for we say, that faith was reckoned to Abraham for righteousness.

¹⁰ How was it, then, reckoned? when he was in circumcision, or in uncircumcision? not in circumcision, but in uncircumcision.

¹¹ And he received a sign of circumcision, a seal of righteousness of the faith, which he had, being yet uncircumcised: that he might be the father of all them that believe, though they be not circumcised; that righteousness might be imputed unto them also:

¹² And the father of circumcision to them, who are not of the circumcision only, but also walk in the steps of that faith of our father Abraham, which he had being yet uncircumcised.

¹³ For the promise that he should be the heir of the world, was not to Abraham, or to his seed, through the law, but through the righteousness of faith.

¹⁴ For if they, which are of the law, be heirs, faith is made void, and the promise made of none effect.

¹⁵ Because the law worketh wrath: for where no law is, there is no transgression.

¹⁶ Therefore it is of faith, that it might be by grace; to the end the promise might be sure to all the seed, not to that only, which is of the law, but to that also, which is of the faith of Abraham, who is the father of us all.

¹⁷ (As it is written, “I have made thee a father of many nations”) before him whom he believed, even God, who quickeneth the dead, and calleth those things, which be not, as though they were;

¹⁸ Who, against hope, believed in hope, that he might become the father of many nations, according to that which was spoken, “So shall thy seed be.”

¹⁹ And being not weak in faith, he considered not his own body now dead, when he was about an hundred years old, neither yet the deadness of Sarah’s womb.

²⁰ He staggered not at the promise of God, through unbelief; but was strong in faith, giving glory to God:

²¹ And being fully persuaded, that what he had promised, he was able also to perform.

²² And, therefore, it was imputed to him for righteousness.

²³ Now it was not written for his sake alone, that it was imputed to him;

²⁴ But for us also, to whom it shall be imputed, if we believe on him that raised up Jesus our Lord from the dead,

²⁵ Who was delivered for our offences, and was raised again for our justification.

PARAPHRASE.

¹ What then shall we say of Abraham our father, according to the flesh, what has he obtained? has² not he found matter of glorying? Yes; if he were justified by works, he had matter of glorying, he might then have gloried over the rest of the gentile world, in having God for his God, and he and his family being God’s people; but he had no subject of³ glorying before God. As it is evident from sacred scripture, which telleth us, that Abraham believed God, and it was counted to him for righteousness.⁴ Now there had been no need of any such counting, any such allowance, if he had attained righteousness by works of obedience, exactly conformable, and coming up, to the rule of righteousness. For what reward a man has made himself a title to, by the performances, that he receives as a debt that is due, ⁵ and not as a gift of favour. But to him, that by his works attains not righteousness, but

only believeth on God, who justifieth him, being ungodly, to him justification is a favour of grace: because his believing is accounted to him for righteousness, or⁶ perfect obedience. Even as David speaks of the blessedness of the man to whom God reckoneth⁷ righteousness without works, Saying, “Blessed are they whose iniquities are forgiven, and whose sins⁸ are covered. Blessed is the man to whom the⁹ Lord will not reckon sin.” Is this blessedness then upon the circumcised only, or upon the uncircumcised also? for we say that faith was reckoned to¹⁰ Abraham for righteousness. When, therefore, was it reckoned to him? when he was in circumcision, or in uncircumcision? not in circumcision,¹¹ but in uncircumcision. For he received the sign of circumcision, a seal of the righteousness of the faith, which he had, being yet uncircumcised, that he might be the father of all those who believed, being uncircumcised, that righteousness might be¹² reckoned to them also; And the father of the circumcised, that righteousness might be reckoned, not to those who were barely of the circumcision, but to such of the circumcision as did also walk in the steps of the faith of our father Abraham,¹³ which he had, being uncircumcised. For the promise, that he should be possessor of the world, was not that Abraham, and those of his seed, who were under the law, should, by virtue of their having and owning the law, be possessed of it; but by the righteousness of faith, whereby those who were, without the law, scattered all over the world, beyond the borders of Canaan, became his posterity, and had him for their father, and inherited the¹⁴ blessing of justification by faith. For, if they only who had the law of Moses given them, were heirs of Abraham, faith is made void and useless, it receiving no benefit of the promise, which was made to the heirs of Abraham’s faith, and so the promise¹⁵ becomes of no effect. Because the law procures them not justification, but renders them liable to the wrath and punishment of God, who, by the law, has made known to them what is sin, and what punishment he has annexed to it. For there is no incurring wrath, or punishment, where there is no¹⁶ law that says any thing of it: Therefore the inheritance is of faith, that it might be merely of favour, to the end that the promise might be sure to all the seed of Abraham; not to that part of it only, which has faith, being under the law; but to that part also, who without the law, inherit the faith of Abraham, who is the father of us all who believe,¹⁷ whether jews or gentiles, (As it is written, “I have made thee a father of many nations.”) I say the father of us all (in the account of God, whom he believed, and who

accordingly quickened the dead, i. e. Abraham and Sarah, whose bodies were dead: and called things that are not, as if they were;)¹⁸ Who without any hope, which the natural course of things could afford, did in hope believe, that he should become the father of many nations, according to what God had spoken, by God's showing him the stars of heaven, saying, So shall thy seed be.¹⁹ And being firm and unshaken in his faith, he regarded not his own body, now dead, he being about an hundred years old; nor the deadness of Sarah's²⁰ womb; He staggered not at the promise of God, through unbelief, but was strong in faith, thereby²¹ giving glory to God; By the full persuasion he had, that God was able to perform what he had promised:²² And therefore it was accounted to him for²³ righteousness. Now this, of its being reckoned to²⁴ him, was not written for his sake alone, But for ours also, to whom faith also will be reckoned for righteousness, viz. to as many as believe in him, who²⁵ raised Jesus our Lord from the dead, Who was delivered to death for our offences, and was raised again for our justification.

SECT. V.

CHAPTER V. 1 — 11

CONTENTS.

St. Paul, in the foregoing chapters, has examined the glorying of the jews, and their valuing themselves so highly above the gentiles, and shown the vanity of their boasting in circumcision and the law, since neither they, nor their father Abraham, were justified, or found acceptance with God, by circumcision, or the deeds of the law: and therefore they had no reason so as they did to press circumcision and the law on the gentiles, or exclude those who had them not, from being the people of God, and unfit for their communion, in and under the gospel. In this section, he comes to show what the convert gentiles, by faith, without circumcision, or the law, had to glory in, viz. the hope of glory, ver. 2, their sufferings for the gospel, ver. 3. And God as their God, ver. 11. In these three it is easy to observe the thread and coherence of St. Paul's discourse here, the intermediate verses, (according to that abounding with matter and overflowing of thought, he was filled with) being taken up with an accidental train of considerations, to show the reason they had to glory in tribulations.

TEXT.

¹ Therefore being justified by faith, we have peace with God, through our Lord Jesus Christ.

² By whom also we have access, by faith, into this grace, wherein we stand, and rejoice in hope of the glory of God.

³ And not only so, but we glory in tribulations also, knowing that tribulation worketh patience;

⁴ And patience, experience; and experience, hope;

⁵ And hope maketh not ashamed, because the love of God is shed abroad in our hearts, by the Holy Ghost, which is given unto us.

⁶ For, when we were yet without strength, in due time Christ died for the ungodly.

⁷ For scarcely for a righteous man will one die: yet peradventure, for a good man some would even dare to die.

⁸ But God commendeth his love towards us, in that, while we were yet sinners, Christ died for us.

⁹ Much more then, being now justified by his blood, we shall be saved from wrath through him.

¹⁰ For if, when we were enemies, we were reconciled to God, by the death of his son; much more being reconciled, we shall be saved by his life.

¹¹ And not only so, but we also joy in God through our Lord Jesus Christ, by whom we have now received the atonement.

PARAPHRASE.

¹ Therefore, being justified by faith, we have peace² with God, through our Lord Jesus Christ, By whom we have had admittance, through faith, into that favour, in which we have stood, and glory in the hope³ of the glory, which God has in store for us. And not only so, but we glory in tribulation also, knowing⁴ that tribulation worketh patience; And patience giveth us a proof of ourselves, which furnishes us with⁵ hope; And our hope maketh not ashamed, will not deceive us, because the sense of the love of God is poured out into our hearts by the Holy Ghost, which is⁶ given unto us (a). For, when the gentiles were yet without strength (b), void of all help, or ability to deliver ourselves, Christ, in the time that God had appointed and

foretold, died for us, who lived without the acknowledgment and worship of the⁷ true God (b). Scarce is it to be found that any one will die for a just man, if peradventure one should⁸ dare to die for a good man; But God recommends, and herein shows the greatness of his love towards us, in that, whilst we gentiles were a mass of⁹ profligate sinners, Christ died for us. Much more, therefore, now being justified by his death, shall we through him be delivered from condemnation¹⁰ at the day of judgment. For if, when we were enemies, we were reconciled to God, by the death of his son, much more, being reconciled, shall we be¹¹ saved by his life. And not only do we glory in tribulation, but also in God, through our Lord Jesus Christ, by whom now we have received reconciliation.

SECT. VI.

CHAPTER V. 12. — VII. 25.

CONTENTS.

The apostle here goes on with his design, of showing that the gentiles, under the gospel, have as good a title to the favour of God, as the jews; there being no other way for either jew or gentile, to find acceptance with God, but by faith in Jesus Christ. In the foregoing section he reckoned up several subjects of glorying, which the convert gentiles had without the law, and concludes them with this chief and principal matter of glorying, even God himself, whom, now that they were, by Jesus Christ their Lord, reconciled to him, they could glory in as their God.

To give them a more full and satisfactory comprehension of this, he leads them back to the times before the giving of the law, and the very being of the jewish nation; and lays before them, in short, the whole scene of God's œconomy, and his dealing with mankind, from the beginning, in reference to life and death.

He teaches them, that by Adam's lapse all men were brought into a state of death, and by Christ's death all are restored to life. By Christ also, as many as believe are instated in eternal life.

That the law, when it came, laid the israelites faster under death, by enlarging the offence, which had death annexed to it. For, by the law, every transgression that any one under the law committed, had death for its

punishment, notwithstanding which, by Christ, those under the law, who believe, receive life.

That, though the gentiles, who believe, come not under the rigour of the law, yet the covenant of grace, which they are under, requires that they should not be servants and vassals to sin, to obey it in the lusts of it, but sincerely endeavour after righteousness, the end whereof would be everlasting life.

That the jews also, who receive the gospel, are delivered from the law; not that the law is sin; but because, though the law forbid the obeying of sin, as well as the gospel; yet not enabling them to resist their sinful lusts, but making each compliance with any sinful lust deadly, it settles upon them the dominion of sin, by death, from which they are delivered by the grace of God alone, which frees them from the condemnation of the law, for every actual transgression, and requires no more, but that they should, with the whole bent of their mind, serve the law of God, and not their carnal lusts. In all which cases the salvation of the gentiles is wholly by grace, without their being at all under the law. And the salvation of the jews is wholly by grace also, without any aid, or help from the law: from which also, by Christ, they are delivered.

Thus lies the thread of St. Paul's argument, wherein we may see how he pursues his design, of satisfying of gentile converts at Rome, that they were not required to submit to the law of Moses; and of fortifying them against the jews, who troubled them about it.

For the more distinct and easy apprehension of St. Paul's discoursing on these four heads, I shall divide this section into the four following numbers, taking them up, as they lie in the order of the text.

SECT. VI. N. I.

CHAPTER V. 12 — 19.

CONTENTS.

Here he instructs them in the state of mankind in general, before the law, and before the separation that was made thereby of the israelites from all the other nations of the earth. And here he shows, that Adam, transgressing the law, which forbade him the eating of the tree of knowledge, upon pain of death, forfeited immortality, and becoming thereby mortal, all his posterity,

descending from the loins of a mortal man, were mortal too, and all died, though none of them broke that law, but Adam himself: but, by Christ, they are all restored to life again. And, God justifying those who believe in Christ, they are restored to their primitive state of righteousness and immortality; so that the gentiles, being the descendants of Adam, as well as the jews, stand as fair for all the advantages, that accrue to the posterity of Adam, by Christ, as the jews themselves, it being all wholly and solely from grace.

TEXT.

¹² Wherefore, as by one man sin entered into the world, and death by sin: and so death passed upon all men, for that all have sinned.

¹³ For until the law sin was in the world: but sin is not imputed when there is no law.

¹⁴ Nevertheless, death reigned from Adam to Moses, even over them that had not sinned, after the similitude of Adam's transgression, who is the figure of him that was to come.

¹⁵ But not as the offence, so also is the free gift. For if, through the offence of one, many be dead, much more the grace of God, and the gift by grace, which is by one man, Jesus Christ, hath abounded unto many.

¹⁶ And not as it was by one that sinned, so is the gift: for the judgment was by one, to condemnation; but the free gift is of many offences, unto justification.

¹⁷ For if by one man's offence death reigned by one; much more they which receive abundance of grace, and of the gift of righteousness, shall reign in life by one, Jesus Christ.

¹⁸ Therefore as, by the offence of one, judgment came upon all men to condemnation: even so by the righteousness of one, the free gift came upon all men, unto justification of life.

¹⁹ For, as by one man's disobedience, many were made sinners: so, by the obedience of one, shall many be made righteous.

PARAPHRASE.

¹² Wherefore, to give you a state of the whole matter, from the beginning you must know, that, as by the act of one man, Adam, the father of us all, sin entered into the world, and death, which was the punishment annexed to

the offence of eating the forbidden fruit, entered by that sin, for that all¹³ Adam's posterity thereby became mortal. It is true, indeed, sin was universally committed in the world by all men, all the time before the positive law of God delivered by Moses: but it is as true that there is no certain, determined punishment affixed¹⁴ to sin, without a positive law declaring it. Nevertheless, we see that, in all that space of time, which was before the positive law of God by Moses, men from the beginning of the world, died, all as well as their father Adam; though none of them, but he alone, had eaten of the forbidden fruit; and thereby, as he had committed that sin, to which sin alone the punishment of death was annexed, by the positive sanction of God, denounced to Adam, who was the figure and type of Christ, who was to¹⁵ come. But yet though he were the type of Christ, yet the gift, or benefit, received by Christ, is not exactly conformed and confined to the dimensions of the damage, received by Adam's fall. For if, by the lapse of one man, the multitude, i. e. all men died, much more did the favour of God; and the free gift by the bounty or good-will which is in Jesus Christ, exceed to the multitude, i. e. to all men.¹⁶ Furthermore, neither is the gift, as was the lapse, by one sin. For the judgment or sentence was for one offence, to condemnation: but the gift of favour reaches, notwithstanding many sins, to¹⁷ justification of life. For if, by one lapse, death reigned, by reason of one offence, much more shall they who receiving the surplusage of favour, and of the gift of righteousness, reign in life by one, even¹⁸ Jesus Christ. Therefore as, by one offence, (viz.) Adam's eating the forbidden fruit, all men fell under the condemnation of death: so, by one act of righteousness, viz. Christ's obedience to death upon the¹⁹ cross, all men are restored to life. For as, by one man's disobedience, many were brought into a state of mortality, which is the state of sinners; so, by the obedience of one, shall many be made righteous, i. e. be restored to life again, as if they were not sinners.

SECT. VI. N. 2.

CHAPTER V. 20, 21.

CONTENTS.

St. Paul, pursuing his design in this epistle, of satisfying the gentiles, that there was no need of their submitting to the law, in order to their partaking

of the benefits of the gospel, having, in the foregoing eight verses taught them, that Adam's one sin had brought death upon them all, from which they were all restored by Christ's death, with addition of eternal bliss and glory, to all those who believe in him; all which being the effect of God's free grace and favour, to those who were never under the law, excludes the law from having any part in it, and so fully makes out the title of the gentiles to God's favour, through Jesus Christ, under the gospel, without the intervention of the law. Here, for the farther satisfaction of the gentile converts, he shows them, in these two verses, that the nation of the hebrews, who had the law, were not delivered from the state of death by it, but rather plunged deeper under it, by the law, and so stood more in need of favour, and indeed had a greater abundance of grace afforded them, for their recovery to life by Jesus Christ, than the gentiles themselves. Thus the jews themselves, not being saved by the law, but by an excess of grace, this is a farther proof of the point St. Paul was upon, viz. that the gentiles had no need of the law, for the obtaining of life, under the gospel.

TEXT.

²⁰ Moreover, the law entered, that the offence might abound: but where sin abounded, grace did much more abound;

²¹ That, as sin hath reigned unto death, even so might grace reign through righteousness unto eternal life, by Jesus Christ, our Lord.

PARAPHRASE.

²⁰ This was the state of all mankind, before the law, they all died for the one παράπτωμα, lapse, or offence, of one man which was the only irregularity, that had death annexed to it: but the law entered, and took place over a small part of mankind, that this παράπτωμα, lapse, or offence, to which death was annexed, might abound, i. e. the multiplied transgressions of many men, viz. all that were under the law of Moses, might have death annexed to them, by the positive sanction of that law, whereby the offence, to which death was annexed, did abound, i. e. sins that had death for their punishment, were increased. But, by the goodness of God, where sin, with death annexed to it, did abound, grace²¹ did much more abound. That as sin had reigned, or showed its mastery, in the death of the israelites, who were under the law; so grace, in its turn, might reign, or show its mastery, by

justifying them, from all those many sins, which they had committed, each whereof, by the law, brought death with it; and so bestowing on them the righteousness of faith, instate them in eternal life, through Jesus Christ our Lord.

SECT. VI. N. 3.

CHAPTER VI. 1 — 23.

CONTENTS.

St. Paul having, in the foregoing chapter, very much magnified free grace, by showing that all men, having lost their lives by Adam's sin, were, by grace, through Christ, restored to life again; and also, as many of them as believed in Christ, were re-established in immortality by grace; and that even the jews, who, by their own trespasses against the law, had forfeited their lives, over and over again, were also, by grace, restored to life, grace super-abounding, where sin abounded; he here obviates a wrong inference, which might be apt to mislead the convert gentiles, viz. "therefore, let us continue in sin, that grace may abound." The contrary whereof he shows their very taking upon them the profession of christianity required of them, by the very initiating ceremony of baptism, wherein they were typically buried with Christ, to teach them that they, as he did, ought to die to sin; and, as he rose to live to God, they should rise to a new life of obedience to God, and be no more slaves to sin, in an obedience and resignation of themselves to its commands. For, if their obedience were to sin, they were vassals of sin, and would certainly receive the wages of that master, which was nothing but death: but, if they obeyed righteousness, i. e. sincerely endeavoured after righteousness, though they did not attain it, sin should not have dominion over them, by death, i. e. should not bring death upon them. Because they were not under the law, which condemned them to death for every transgression; but under grace, which, by faith in Jesus Christ, justified them to eternal life, from their many transgressions. And thus he shows the gentiles not only the no necessity, but the advantage of their not being under the law.

TEXT.

¹ What shall we say then? shall we continue in sin, that grace may abound?

² God forbid: how shall we that are dead to sin, live any longer therein?

³ Know ye not, that so many of us as were baptized into Jesus Christ, were baptized into his death?

⁴ Therefore we are buried with him by baptism, into death; that, like as Christ was raised up from the dead by the glory of the Father, even so we also should walk in newness of life.

⁵ For, if we have been planted together in the likeness of his death, we shall be also in the likeness of his resurrection:

⁶ Knowing this, that our old man is crucified with him, that the body of sin might be destroyed, that henceforth we should not serve sin.

⁷ For he that is dead, is freed from sin.

⁸ Now if we be dead with Christ, we believe that we shall also live with him.

⁹ Knowing that Christ, being raised from the dead, dieth no more; death hath no more dominion over him.

¹⁰ For in that he died, he died unto sin once: but in that he liveth, he liveth unto God.

¹¹ Likewise, reckon ye also yourselves to be dead indeed unto sin; but alive unto God, through Jesus Christ our Lord.

¹² Let not sin, therefore, reign in your mortal body, that ye should obey it, in the lusts thereof.

¹³ Neither yield ye your members, as instruments of unrighteousness unto sin: but yield yourselves unto God, as those that are alive from the dead; and your members, as instruments of righteousness, unto God.

¹⁴ For sin shall not have dominion over you: for ye are not under the law, but under grace.

¹⁵ What then? shall we sin, because we are not under the law, but under grace? God forbid!

¹⁶ Know ye not, that, to whom ye yield yourselves servants to obey, his servants ye are, to whom ye obey; whether of sin unto death, or of obedience unto righteousness.

¹⁷ But God be thanked, that ye were the servants of sin: but ye have obeyed from the heart that form of doctrine, which was delivered you.

¹⁸ Being then made free from sin, ye became the servants of righteousness.

¹⁹ I speak after the manner of men, because of the infirmity of your flesh: for as ye have yielded your members servants to uncleanness, and to iniquity unto iniquity; even so now yield your members servants to righteousness, unto holiness.

²⁰ For, when ye were the servants of sin, ye were free from righteousness.

²¹ What fruit had ye then, in those things, whereof ye are now ashamed? for the end of those things is death.

²² But now being made free from sin, and become servants to God, ye have your fruit unto holiness, and the end everlasting life.

²³ For the wages of sin is death: but the gift of God is eternal life, through Jesus Christ our Lord.

PARAPHRASE.

¹ What shall we say then? Shall we continue in sin,² that grace may abound? God forbid: how can it be that we, who, by our embracing christianity, have renounced our former sinful courses, and have professed a death to sin, should live any longer in it? ³ For this I hope you are not ignorant of, that we christians, who by baptism were admitted into the kingdom and church of Christ, were baptized into a⁴ similitude of his death: We did own some kind of death, by being buried under water, which, being buried with him, i. e. in conformity to his burial, as a confession of our being dead, was to signify, that as Christ was raised up from the dead, into a glorious life with his Father, even so we, being raised from our typical death and burial in baptism, should lead a new sort of life, wholly different from our former, in some approaches towards that heavenly life that⁵ Christ is risen to. For, if we have been ingrafted into him, in the similitude of his death, we shall be also in a conformity to the life, which he is entered⁶ into, by his resurrection: Knowing this, that we are to live so, as if our old man, our wicked and corrupt fleshly self which we were before, were crucified with him, that the prevalency of our carnal sinful propensities, which are from our bodies, might be destroyed, that henceforth we should not serve sin, ⁷ as vassals to it. For he, that is dead, is set free from the vassalage of sin, as a slave is from the vassalage⁸ of his master. Now, if we understand by our being buried in baptism, that we died with Christ, we cannot but think and believe, that⁹ we should live a life conformable to his; Knowing that Christ, being raised from the dead, returns no more to a mortal life, death hath no

more dominion¹⁰ over him, he is no more subject to death. For in that he died, he died unto sin, i. e. upon the account of sin, once for all: but his life, now after his resurrection, is a life wholly appropriated to God, with which sin, or death, shall never have any more to do, or come in reach of.¹¹ In like manner, do you also make your reckoning, account yourselves dead to sin, freed from that master; so as not to suffer yourselves, any more, to be commanded, or employed by it, as if it were still your master; but alive to God, i. e. that it is your business now to live wholly for his service, and to¹² his glory, through Jesus Christ our Lord. Permit not, therefore, sin to reign over you, by your mortal bodies, which you will do, if you obey¹³ your carnal lusts: Neither deliver up your members to sin, to be employed by sin, as instruments of iniquity, but deliver up yourselves unto God, as those who have got to a new life from among the dead, and choosing him for your Lord and Master, yield your members to him, as instruments of¹⁴ righteousness. For if you do so, sin shall not have dominion over you, you shall not be as its slaves, in its power, to be by it delivered over to death. For you are not under the law, in the legal state; but you are under grace, in the gospel-state of the¹⁵ covenant of grace. What then, shall we sin, because we are not under the law, but under the covenant¹⁶ of grace? God forbid! Know ye not that, to whom you subject yourselves as vassals, to be at his beck, his vassals you are whom you thus obey, whether it be of sin, which vassalage ends in death; or of Christ, in obeying the gospel, to the obtaining of¹⁷ righteousness and life. But God be thanked, that you who were the vassals of sin, have sincerely, and from your heart, obeyed, so as to receive the form, or be cast into the mould of that doctrine, under whose direction or regulation you were put, that¹⁸ you might conform yourselves to it. Being therefore set free from the vassalage of sin, you became¹⁹ the servants or vassals of righteousness. (I make use of this metaphor, of the passing of slaves from one master to another, well known to you romans, the better to let my meaning into your understandings, that are yet weak in these matters, being more accustomed to fleshly than spiritual things.) For as you yielded your natural faculties obedient, slavish instruments to uncleanness, to be wholly employed in all manner of iniquity; so now ye ought to yield up your natural faculties to a perfect²⁰ and ready obedience to righteousness. For, when you were the vassals of sin, you were not at all subject to, nor paid any obedience to righteousness: therefore, by a parity of reason, now righteousness is your master, you ought to pay no obedience to²¹ sin. What

fruit, or benefit, had you then in those things, in that course of things, whereof you are now ashamed? For the end of those things, which²² are done in obedience to sin, is death. But now, being set free from sin, being no longer vassals to that master, but having God now for your lord and master, to whom you are become subjects or vassals, your course of life tends to holiness, and will end in²³ everlasting life. For the wages that sin pays, is death: but that which God's servants receive, from his bounty, is the gift of eternal life, through Jesus Christ our Lord.

SECT. VI. N. 4.

CHAPTER VII. 1 — 25.

CONTENTS.

St. Paul, in the foregoing chapter, addressing himself to the convert gentiles, shows them, that, not being under the law, they were obliged only to keep themselves free from the vassalage of sin, by a sincere endeavour after righteousness, forasmuch as God gave eternal life to all those who, being under grace, i. e. being converted to christianity, did so.

In this chapter, addressing himself to those of his own nation in the roman church, he tells them, that, the death of Christ having put an end to the obligation of the law, they were at their liberty to quit the observances of the law, and were guilty of no disloyalty, in putting themselves under the gospel. And here St. Paul shows the deficiency of the law, which rendered it necessary to be laid aside, by the coming and reception of the gospel. Not that it allowed any sin, but, on the contrary, forbad even concupiscence, which was not known to be sin, without the law. Nor was it the law that brought death upon those who were under it, but sin, that herein it might show the extreme malignant influence it had, upon our weak fleshly natures, in that it could prevail on us to transgress the law, (which we could not but acknowledge to be holy, just and good) though death was the declared penalty of every transgression: but herein lay the deficiency of the law, as spiritual and opposite to sin as it was, that it could not master and root it out, but sin remained and dwelt in men, as before, and by the strength of their carnal appetites, which were not subdued by the law, carried them to transgressions, that they approved not. Nor did it avail them to disapprove, or struggle, since, though the bent of their minds were the other

way, yet their endeavours after obedience delivered them not from that death, which their bodies, or carnal appetites, running them into transgressions, brought upon them. That deliverance was to be had from grace, by which those who, putting themselves from under the law into the gospel-state, were accepted, if with the bent of their minds they sincerely endeavoured to serve and obey the law of God, though sometimes, through the frailty of their flesh, they fell into sin.

This is a farther demonstration to the converted gentiles of Rome, that they are under no obligation of submitting themselves to the law, in order to be the people of God, or partake of the advantages of the gospel, since it was necessary, even to the jews themselves, to quit the terms of the law, that they might be delivered from death, by the gospel. And thus we see how steadily and skilfully he pursues his design, and with what evidence and strength he fortifies the gentile converts, against all attempts of the jews, who went about to bring them under the observances of the law of Moses.

TEXT.

¹ Know ye not, brethren, (for I speak to them that know the law) how that the law hath dominion over a man, as long as he liveth.

² For the woman, which hath an husband, is bound by the law to her husband, so long as he liveth: but if the husband be dead, she is loosed from the law of her husband.

³ So then, if while her husband liveth, she be married to another man, she shall be called an adulteress: but, if her husband be dead, she is free from that law; so that she is no adulteress, though she be married to another man.

⁴ Wherefore, my brethren, ye also are become dead to the law, by the body of Christ; that ye should be married to another, even to him, who is raised from the dead, that we should bring forth fruit unto God.

⁵ For when we were in the flesh, the motions of sins, which were by the law, did work in our members, to bring forth fruit unto death.

⁶ But now we are delivered from the law, that being dead, wherein we were held; that we should serve in newness of spirit, and not in the oldness of the letter.

⁷ What shall we say then? is the law sin? God forbid. Nay, I had not known sin, but by the law: for I had not known lust, except the law had said, Thou shalt not covet.

⁸ But sin, taking occasion by the commandment, wrought in me all manner of concupiscence. For without the law sin was dead.

⁹ For I was alive without the law, once: but when the commandment came, sin revived, and I died.

¹⁰ And the commandment, which was ordained to life, I found to be unto death.

¹¹ For sin, taking occasion by the commandment, deceived me, and by it slew me.

¹² Wherefore the law is holy; and the commandment holy, and just, and good.

¹³ Was then that, which is good, made death unto me? God forbid! but sin, that it might appear sin, working death in me, by that which is good; that sin, by the commandment, might become exceeding sinful.

¹⁴ For we know that the law is spiritual; but I am carnal, sold under sin.

¹⁵ For that which I do, I allow not; for what I would, that do I not; but what I hate, that I do.

¹⁶ If then I do that which I would not, I consent unto the law, that it is good.

¹⁷ Now then it is no more I that do it, but sin that dwelleth in me.

¹⁸ For I know that in me (that is, in my flesh) dwelleth no good thing: for to will is present with me, but how to perform that which is good, I find not.

¹⁹ For the good, that I would, I do not: but the evil, which I would not, that I do.

²⁰ Now if I do that I would not, it is no more I, that do it; but sin, that dwelleth in me.

²¹ I find then a law, that, when I would do good, evil is present with me.

²² For I delight in the law of God, after the inward man.

²³ But I see another law in my members, warring against the law of my mind, and bringing me into captivity to the law of sin, which is in my members.

²⁴ O wretched man that I am, who shall deliver me from the body of this death?

²⁵ I thank God, through Jesus Christ our Lord. So then, with the mind, I myself serve the law of God; but with the flesh, the law of sin.

PARAPHRASE.

¹ I have let those of you, who were formerly gentiles, see, that they are not under the law, but under grace: I now apply myself to you, my brethren, of my own nation, who know the law. You cannot be ignorant that the authority of the law reaches, or concerns a² man, so long as he liveth, and no longer. For a woman who hath an husband, is bound by the law to her living husband; but if her husband dieth, she is loosed from the law, which made her her husband's, because the authority of the law, whereby he had a right to her, ceased in respect of him, as soon as he died.³ Wherefore she shall be called an adulteress, if while her husband liveth, she become another man's. But if her husband dies, the right he had to her by the law ceasing, she is freed from the law, so that she is not an adulteress, though she become another man's.⁴ So that even ye, my brethren, by the body of Christ, are become dead to the law, whereby the dominion of the law over you has ceased, that you should subject yourselves to the dominion of Christ, in the gospel, which you may do with as much freedom from blame, or the imputation of disloyalty, as a woman whose husband is dead, may, without the imputation of adultery, marry another man. And this making yourselves another's, even Christ's, who is risen from the dead, is, that we ⁵ should bring forth fruit unto God. For when we were after so fleshly a manner, under the law, as not to comprehend the spiritual meaning of it, that directed us to Christ, the spiritual end of the law, our sinful lust, that remained in us under the law, or in the state under the law, wrought in our members, i. e. set our members and faculties on work, in⁶ doing that, whose end was death. But now the law, under which we were heretofore held in subjection, being dead, we are set free from the dominion of the law, that we should perform our obedience, as under the new and spiritual covenant of the gospel, wherein there is a remission of frailties, and not as still under the old rigour of the letter of the law, which condemns every one, who does not perform exact obedience ⁷ to every tittle. What shall we then think, that the law, because it is set aside, was unrighteous, or gave any allowance, or contributed any thing to sin? By no means: for the law, on the contrary, tied men stricter up from sin, forbidding concupiscence, which they did not know to be sin, but by the law. For I had not known concupiscence to be sin, unless the law⁸ had said, Thou shalt not covet. Nevertheless sin, taking opportunity, during the law, or whilst I was under the commandment, wrought in me all manner of concupiscence: for without the law, sin is⁹ dead, not able to hurt me; And there was a time once, when I being without

the law, was in a state of life; but the commandment coming, sin got life and strength again, and I found myself a dead man; ¹⁰ And that very law, which was given me for the attaining of life, was found to produce death to¹¹ me. For my mortal enemy, sin, taking the opportunity of my being under the law, slew me by the law, which it inveigled me to disobey, i. e. the frailty and vicious inclinations of nature remaining in me under the law, as they were before, able still to bring me into transgressions, each whereof was mortal, sin had, by my being under the law, a sure¹² opportunity of bringing death upon me. So that the law is holy, just, and good, such as the eternal, immutable rule of right and good required it to be. ¹³ Was then the law, that in itself was good, made death to me? No, by no means: but it was sin, that by the law was made death unto me, to the end that the power of sin might appear, by its being able to bring death upon me, by that very law, that was intended for my good, that so, by the commandment, the power of sin and corruption in me might¹⁴ be shown to be exceeding great; For we know that the law is spiritual, requiring actions quite opposite to our carnal affections. But I am so carnal, as to be enslaved to them, and forced against my will to do the drudgery of sin, as if I were a slave, that had been sold into the hands of that my domineering¹⁵ enemy. For what I do, is not of my own contrivance; for that which I have a mind to, I do not;¹⁶ and what I have an aversion to, that I do. If then my transgressing the law be what I, in my mind, am against, it is plain, the consent of my mind goes¹⁷ with the law that it is good. If so, then it is not I, a willing agent of my own free purpose, that do what is contrary to the law, but as a poor slave in captivity, not able to follow my own understanding and choice, forced by the prevalency of my own sinful affections, and sin that remains still in me notwithstanding¹⁸ the law. For I know, by woeful experience, that in me, viz. in my flesh, that part, which is the seat of carnal appetites, there inhabits no good. For, in the judgment and purpose of my mind, I am readily carried into a conformity and obedience to the law: but, the strength of my carnal affections not being abated by the law, I am not able to execute what I judge to be right, and¹⁹ intend to perform. For the good, that is my purpose and aim, that I do not: but the evil, that is contrary to my intention, that in my practice takes place, i. e. I purpose and aim at universal obedience,²⁰ but cannot in fact attain it. Now if I do that, which is against the full bent and intention of me myself, it is, as I said before, not I, my true self, who do it, but the true author of it is my old enemy, sin, which still remains and dwells in me, and I would fain

get²¹ rid of. I find it, therefore, as by a law settled in me, that when my intentions aim at good, evil is ready at²² hand, to make my actions wrong and faulty. For that which my inward man is delighted with, that, which with satisfaction my mind would make its rule, is²³ the law of God. But I see in my members another principle of action, equivalent to a law, directly waging war against that law, which my mind would follow, leading me captive into an unwilling subjection to the constant inclination and impulse of my carnal appetite, which, as steadily as if it were a²⁴ law, carries me to sin. O miserable man that I am, who shall deliver me from this body of death?²⁵ The grace of God, through Jesus Christ our Lord. To comfort myself, therefore, as that state requires, for my deliverance from death, I myself, with full purpose and sincere endeavours of mind, give up myself to obey the law of God; though my carnal inclinations are enslaved, and have a constant tendency to sin. This is all I can do, and this is all, I being under grace, that is required of me, and through Christ will be accepted.

SECT. VII.

CHAPTER VIII. 1 — 39.

CONTENTS.

St. Paul having, chap. vi. shown that the gentiles, who were not under the law, were saved only by grace, which required that they should not indulge themselves in sin, but steadily and sincerely endeavour after perfect obedience: having also, ch. vii. shown, that the jews who were under the law, were also saved by grace only, because the law could not enable them wholly to avoid sin, which, by the law, was in every the least slip made death; he in this chapter shows, that both jews and gentiles, who are under grace, i. e. converts to christianity, are free from condemnation, if they perform what is required of them; and thereupon he sets forth the terms of the covenant of grace, and presses their observance, viz. not to live after the flesh, but after the spirit, mortifying the deeds of the body; forasmuch as those, that do so, are the sons of God. This being laid down, he makes use of it to arm them with patience against afflictions, assuring them, that, whilst they remain in this state, nothing can separate them from the love of God, nor shut them out from the inheritance of eternal life with Christ, in

glory, to which all the sufferings of this life bear not any the least proportion.

TEXT.

¹ There is therefore now no condemnation to them which are in Christ Jesus, who walk not after the flesh, but after the spirit.

² For the law of the spirit of life, in Christ Jesus, hath made me free from the law of sin and death.

For what the law could not do, in that it was weak through the flesh, God, sending his own son, in the likeness of sinful flesh, and for sin condemned sin in the flesh:

⁴ That the righteousness of the law might be fulfilled in us, who walk not after the flesh, but after the spirit.

⁵ For they, that are after the flesh, do mind the things of the flesh: but they that are after the spirit, the things of the spirit.

⁶ For to be carnally minded, is death; but to be spiritually minded, is life and peace:

⁷ Because the carnal mind is enmity against God: for it is not subject to the law of God, neither indeed can be.

⁸ So then they that are in the flesh, cannot please God.

⁹ But ye are not in the flesh, but in the spirit, if so be that the spirit of God dwell in you. Now if any man have not the spirit of Christ, he is none of his.

¹⁰ And if Christ be in you, the body is dead, because of sin, but the spirit is life, because of righteousness.

¹¹ But if the spirit of him that raised up Jesus from the dead, dwell in you: he that raised up Christ from the dead, shall also quicken your mortal bodies by his spirit that dwelleth in you.

¹² Therefore, brethren, we are debtors, not to the flesh to live after the flesh.

¹³ For, if ye live after the flesh, ye shall die: but if ye, through the spirit, do mortify the deeds of the body, ye shall live.

¹⁴ For as many as are led by the spirit of God, they are the sons of God.

¹⁵ For ye have not received the spirit of bondage again to fear; but ye have received the spirit of adoption, whereby we cry, Abba, Father.

¹⁶ The spirit itself beareth witness with our spirit, that we are the children of God.

¹⁷ And if children, then heirs; heirs of God, and joint-heirs with Christ: if so be that we suffer with him, that we may be also glorified together.

¹⁸ For I reckon, that the sufferings of this present time are not worthy to be compared with the glory which shall be revealed in us.

¹⁹ For the earnest expectation of the creature waiteth for the manifestation of the sons of God.

²⁰ For the creature was made subject to vanity, not willingly, but by reason of him who hath subjected the same in hope:

²¹ Because the creature itself also shall be delivered from the bondage of corruption, into the glorious liberty of the children of God.

²² For we know that the whole creation groaneth and travaileth in pain together, until now.

²³ And not only they, but ourselves also, which have the first-fruits of the spirit, even we ourselves groan within ourselves, waiting for the adoption, to wit, the redemption of our body.

²⁴ For we are saved by hope: but hope that is seen, is not hope: for what a man seeth, why doth he yet hope for?

²⁵ But if we hope for that we see not, then do we with patience wait for it.

²⁶ Likewise the spirit also helpeth our infirmities: for we know not what we should pray for, as we ought: but the spirit itself maketh intercession for us, with groanings, which cannot be uttered.

²⁷ And he that searcheth the hearts knoweth what is the mind of the spirit, because he maketh intercession for the saints, according to the will of God.

²⁸ And we know that all things work together for good, to them that love God, to them, who are the called according to his purpose.

²⁹ For whom he did fore-know, he also did predestinate to be conformed to the image of his son, that he might be the first-born among many brethren.

³⁰ Moreover, whom he did predestinate, them he also called: and whom he called, them he also justified: and whom he justified, them he also glorified.

³¹ What shall we then say to these things? If God be for us, who can be against us?

³² He that spared not his own son, but delivered him up for us all, how shall he not with him also freely give us all things?

³³ Who shall lay any thing to the charge of God's elect? It is God that justifieth:

³⁴ Who is he that condemneth? It is Christ that died, yea rather that is risen again, who is even at the right hand of God, who also maketh intercession for us.

³⁵ Who shall separate us from the love of Christ? shall tribulation, or distress, or persecution, or famine, or nakedness, or peril, or sword?

³⁶ (As it is written, For thy sake we are killed all the day long; we are accounted as sheep for the slaughter).

³⁷ Nay in all these things we are more than conquerors, through him that loved us.

³⁸ For I am persuaded, that neither death, nor life, nor angels, nor principalities, nor powers, nor things present, nor things to come,

³⁹ Nor height, nor depth, nor any other creature, shall be able to separate us from the love of God, which is in Christ Jesus our Lord.

PARAPHRASE.

¹ There is, therefore, now, no condemnation to, i. e. no sentence of death shall pass upon, those who are christians, if so be they obey not the sinful lusts of the flesh, but follow, with sincerity of heart,² the dictates of the spirit, in the gospel. For the grace of God, which is effectual to life, has set me free from the law in my members, which cannot now produce sin in me, unto death¶. ³ For this (viz. the delivering us from sin) being beyond the power of the law, which was too weak to master the propensities of the flesh, God, sending his son in flesh, that in all things, except sin, was like unto our frail, sinful flesh, and sending him also to be an offering for sin, he put to death, or extinguished, or suppressed sin in the flesh, i. e. sending his son into the world, with the body, wherein the flesh could⁴ never prevail, to the producing of any one sin; To the end that, under this example of the flesh, wherein sin was perfectly mastered and excluded from any life, the moral rectitude of the law might be conformed to by us, who, abandoning the lusts of the flesh, follow the guidance of the spirit, in the law of our minds, and make it our business to live, not after⁵ the flesh, but after the spirit. For as for those who are still under the direction of the flesh, and its sinful appetites, who are under obedience to the law in their members, they have the thoughts and bent of their minds set upon the things of the flesh, to obey it in the lusts of it: but they, who are under the spiritual law of their minds, the thoughts and bent of their hearts is to follow the dictates of the

spirit, in that⁶ law. For to have our minds set upon the satisfaction of the lusts of the flesh, in a slavish obedience to them, does certainly produce and bring death upon us; but our setting ourselves, seriously and sincerely, to obey the dictates and direction of the spirit, produces life and peace, which are not to be had in the contrary,⁷ carnal state: Because to be carnally minded is direct enmity and opposition against God, for such a temper of mind, given up to the lusts of the flesh, is in no subjection to the law of God, nor indeed can be, it ⁸ having a quite contrary tendency. So then they that are in the flesh, i. e. under the fleshly dispensation of the law, without regarding Christ,⁹ the spirit of it, in it cannot please God. But ye are not in that state, of having all your expectation from the law, and the benefits, that are to be obtained barely by that; but are in the spiritual state of the law, i. e. the gospel, which is the end of the law, and to which the law leads you. And so, having received the gospel, you have therewith received the spirit of God: for, as many as receive Christ, he gives power to become the sons of God: and to¹⁰ those that are his sons, God gives his spirit. And if Christ be in you, by his spirit, the body is dead as to all activity to sin, sin no longer reigns in it, but your sinful, carnal lusts are mortified. But the spirit of your mind liveth, i. e. is enlivened, in order to righteousness, or living righteously.¹¹ But, if the spirit of God, who had power able to raise Jesus Christ from the dead, dwell in you, as certainly it does, he, that raised Christ from the dead, is certainly able, and will, by his spirit that dwells in you, enliven even your mortal bodies, that sin shall not have the sole power and rule there, but your members may be made living¹² instruments of righteousness. Therefore, brethren, we are not under any obligation to the flesh, to obey¹³ the lusts of it. For, if ye live after the flesh, that mortal part shall lead you to death irrecoverable; but if by the spirit, whereby Christ totally suppressed and hindered sin from having any life in his flesh, you mortify the deeds of the body, ye shall have¹⁴ eternal life. For, as many as are led by the spirit of God, they are the sons of God, of an immortal race, and consequently like their Father immortal.¹⁵ For ye have not received the spirit of bondage again, to fear; but ye have received the spirit of God, (which is given to those who, having received adoption, are sons) whereby we are all enabled¹⁶ to call God our Father¶. The spirit of God himself beareth witness with our spirits that we are¹⁷ the children of God, And if children, then heirs of God, joint-heirs with Christ, if so be we suffer with him, that we may also be glorified with him.¹⁸ For I count that the sufferings

of this transitory life bear no proportion to that glorious state, that shall be hereafter revealed, and set before the eyes¹⁹ of the whole world, at our admittance into it. For the whole race of mankind, in an earnest expectation of this inconceivable, glorious immortality that²⁰ shall be bestowed on the sons of God (For mankind, created in a better state, was made subject to the vanity of this calamitous fleeting life, not of its own choice, but by the guile of the devil¶, who brought mankind into this mortal state) waiteth in²¹ hope, That even they also shall be delivered from this subjection to corruption, and shall be brought into that glorious freedom from death, which is the²² proper inheritance of the children of God. For we know that mankind, all of them, groan together, and unto this day are in pain, as a woman in labour, to be delivered out of the uneasiness of this mortal²³ state. And not only they, but even those, who have the first fruits of the spirit, and therein the earnest of eternal life, we ourselves groan within ourselves, waiting for the fruit of our adoption, which is, that, as we are by adoption made sons and co-heirs with Jesus Christ, so we may have bodies like unto his²⁴ most glorious body, spiritual and immortal. But we must wait with patience, for we have hitherto been saved but in hope and expectation: but hope is of things not in present possession, or enjoyment. For what a man hath, and seeth in his own hands, he no²⁵ longer hopes for. But if we hope for what is out of sight, and yet to come, then do we with²⁶ patience wait for it. Such, therefore, are our groans, which the spirit, in aid to our infirmity, makes use of. For we know not what prayers to make as we ought, but the spirit itself layeth for us our requests before God, in groans that cannot be expressed²⁷ in words. And God, the searcher of hearts, who understandeth this language of the spirit, knoweth what the spirit would have, because the spirit is wont to make intercession for the²⁸ saints, acceptably to God. Bear, therefore, your sufferings with patience and constancy, for we certainly know that all things work together for good, to those that love God, who are the called, according²⁹ to his purpose of calling the gentiles. In which purpose the gentiles, whom he fore-knew, as he did the jews, with an intention of his kindness, and of making them his people, he pre-ordained to be conformable to the image of his son, that he might be the first-born, the chief amongst many³⁰ brethren. Moreover, whom he did thus preordain to be his people, them he also called, by sending preachers of the gospel to them: and whom he called, if they obeyed the truth, those he also justified, by counting their faith for righteousness: and whom he justified, them he

also glorified, viz. in³¹ his purpose. What shall we say, then, to these things? If God be for us, as, by what he has already done for us, it appears he is, who can be³² against us? He that spared not his own son, but delivered him up to death for us all, gentiles as well as jews, how shall he not with him also give us all³³ things? Who shall be the prosecutor of those, whom God hath chosen? Shall God, who justifieth³⁴ them? Who, as judge, shall condemn them? Christ, that died for us, yea rather that is risen again for our justification, and is at the right hand of God,³⁵ making intercession for us? Who shall separate us from the love of Christ? Shall tribulation, or distress, or persecution, or famine, or nakedness, or peril,³⁶ or sword? For this is our lot, as it is written, For thy sake we are killed all the day long, we are accounted³⁷ as sheep for the slaughter. Nay, in all these things, we are already more than conquerors, by the grace and assistance of him that loved us.³⁸ For I am stedfastly persuaded, that neither the terrours of death, nor the allurements of life, nor angels, nor the princes and powers of this world,³⁹ nor things present; nor any thing future; Nor the height of prosperity; nor the depth of misery; nor any thing else whatsoever; shall be able to separate us from the love of God, which is in Christ Jesus our Lord.

SECT. VIII.

CHAPTER IX. 1. — X. 21.

CONTENTS.

There was nothing more grating and offensive to the jews, than the thoughts of having the gentiles joined with them, and partaking equally in the privileges and advantages of the kingdom of the Messiah: and, which was yet worse, to be told that those aliens should be admitted, and they, who presumed themselves children of that kingdom, to be shut out. St. Paul, who had insisted much on this doctrine, in all the foregoing chapters of this epistle, to show that he had not done it out of any aversion, or unkindness, to his nation and brethren, the jews, does here express his great affection to them, and declares an extreme concern for their salvation. But withal he shows, that whatever privileges they had received from God, above other nations, whatever expectation the promises, made to their forefathers, might raise in them, they had yet no just reason of complaining of God's dealing with them, now under the gospel, since it was according to his promise to

Abraham, and his frequent declarations in sacred scripture. Nor was it any injustice to the jewish nation, if God now acted by the same sovereign power, wherewith he preferred Jacob (the younger brother, without any merit of his) and his posterity, to be his people, before Esau and his posterity, whom he rejected. The earth is all his; nor have the nations, that possess it, any title of their own, but what he gives them, to the countries they inhabit, nor the good things they enjoy; and he may dispossess, or exterminate them, when he pleaseth. And as he destroyed the egyptians, for the glory of his name, in the deliverance of the israelites; so he may, according to his good pleasure, raise or depress, take into favour, or reject, the several nations of this world. And particularly, as to the nation of the jews, all, but a small remnant, were rejected, and the gentiles taken in, in their room, to be the people and church of God; because they were a gainsaying and disobedient people, that would not receive the Messiah, whom he had promised, and, in the appointed time, sent to them. He that will, with moderate attention and indifferency of mind, read this ninth chapter, will see that what is said, of God's exercising of an absolute power, according to the good pleasure of his will, relates only to nations, or bodies politick, of men, incorporated in civil societies, which feel the effects of it only in the prosperity, or calamity, they meet with, in this world, but extends not to their eternal state, in another world, considered as particular persons, wherein they stand each man by himself, upon his own bottom, and shall so answer separately, at the day of judgment. They may be punished here, with their fellow-citizens, as part of a sinful nation, and that be but temporal chastisement for their good, and yet be advanced to eternal life and bliss, in the world to come.

TEXT.

¹ I say the truth in Christ, I lye not, my conscience also bearing me witness in the Holy Ghost,

² That I have great heaviness and continual sorrow at my heart.

³ For I could wish, that myself were accursed from Christ, for my brethren, my kinsmen according to the flesh:

⁴ Who are israelites; to whom pertaineth the adoption, and the glory, and the covenants, and the giving of the law, and the service of God, and the promises;

⁵ Whose are the fathers, and of whom, as concerning the flesh, Christ came, who is over all, God blessed for ever. Amen.

⁶ Not as though the word of God hath taken none effect. For they are not all Israel, which are of Israel.

⁷ Neither because they are the seed of Abraham, are they all children: but in Isaac shall thy seed be called.

⁸ That is, they which are the children of the flesh, these are not the children of God: but the children of the promise are counted for the seed.

⁹ For this is the word of promise, At this time will I come, and Sarah shall have a son.

¹⁰ And not only this, but when Rebecca also had conceived by one, even by our father Isaac,

¹¹ (For the children being not yet born, neither having done any good, or evil, that the purpose of God, according to election, might stand, not of works, but of him that calleth)

¹² It was said unto her, The elder shall serve the younger.

¹³ As it is written, Jacob have I loved, but Esau have I hated.

¹⁴ What shall we say then? Is there unrighteousness with God? God forbid.

¹⁵ For he saith to Moses, I will have mercy on whom I will have mercy, and I will have compassion on whom I will have compassion.

¹⁶ So then it is not of him that willeth, nor of him that runneth, but of God that sheweth mercy.

¹⁷ For the scripture saith unto Pharaoh, Even for this same purpose have I raised thee up, that I might show my power in thee, and that my name might be declared throughout all the earth.

¹⁸ Therefore, hath he mercy on whom he will have mercy, and whom he will, he hardeneth.

¹⁹ Thou wilt say then unto me, Why do he yet find fault? For who hath resisted his will?

²⁰ Nay but, O man, who art thou that repliest against God? shall the thing formed, say to him that formed it, Why hast thou made me thus?

²¹ Hath not the potter power over the clay, of the same lump to make one vessel unto honour, and another unto dishonour?

²² What, if God, willing to show his wrath, and to make his power known, endured with much long-suffering the vessels of wrath, fitted to destruction:

²³ And that he might make known the riches of his glory, on the vessels of mercy, which he had afore prepared unto glory?

²⁴ Even us, whom he hath called, not of the jews only, but also of the gentiles.

²⁵ As he saith also in Osee, I will call them my people, which were not my people; and her beloved, which was not beloved.

²⁶ And it shall come to pass, that in the place where it was said unto them, Ye are not my people; there shall they be called the children of the living God.

²⁷ Esaias also crieth concerning Israel, Though the number of the children of Israel be as the sand of the sea, a remnant shall be saved.

²⁸ For he will finish the work, and cut it short in righteousness: because a short work will the Lord make upon the earth.

²⁹ And as Esaias said before, Except the Lord of Sabbaoth had left us a seed, we had been as Sodome, and been made like unto Gomorrah.

³⁰ What shall we say then? That the gentiles, which followed not after righteousness have attained to righteousness, even the righteousness which is of faith.

³¹ But Israel, which followed after the law of righteousness, hath not attained to the law of righteousness.

³² Wherefore? Because they sought it, not by faith, but (as it were) by the works of the law: for they stumbled at that stumbling-stone.

³³ As it is written, Behold I lay in Sion a stumbling-stone, and rock of offence: and whosoever believeth on him, shall not be ashamed.

X. 1 Brethren, my heart's desire and prayer to God for Israel is, that they might be saved.

² For I bear them record, that they have a zeal of God, but not according to knowledge.

³ For they, being ignorant of God's righteousness, and going about to establish their own righteousness, have not submitted themselves unto the righteousness of God.

⁴ For Christ is the end of the law, for righteousness, to every one that believeth.

⁵ For Moses describeth the righteousness, which is of the law, That the man, which doth these things, shall live by them.

⁶ But the righteousness which is of faith, speaketh on this wise, Say not in thine heart, Who shall ascend into heaven? (that is, to bring Christ down

from above)

⁷ Or who shall descend into the deep? (that is, to bring up Christ again, from the dead)

⁸ But what saith it? The word is nigh thee, even in thy mouth, and in thy heart: that is, the word of faith which we preach,

⁹ That, if thou shalt confess, with thy mouth, the Lord Jesus, and shalt believe in thine heart, that God hath raised him from the dead, thou shalt be saved.

¹⁰ For with the heart man believeth unto righteousness, and with the mouth confession is made unto salvation.

¹¹ For the scripture saith, Whosoever believeth on him shall not be ashamed.

¹² For there is no difference between the jew and the greek: for the same Lord over all is rich unto all that call upon him.

¹³ For whosoever shall call upon the name of the Lord, shall be saved.

¹⁴ How then shall they call on him, in whom they have not believed? and how shall they believe in him, of whom they have not heard? and how shall they hear without a preacher?

¹⁵ And how shall they preach, except they be sent? as it is written, How beautiful are the feet of them that preach the gospel of peace, and bring glad tidings of good things?

¹⁶ But they have not all obeyed the gospel. For Esaias saith, Lord, who hath believed our report?

¹⁷ So then, faith cometh by hearing, and hearing by the word of God.

¹⁸ But I say, Have they not heard? Yes, verily, their sound went into all the earth, and their words unto the ends of the world.

¹⁹ But I say, Did not Israel know? First Moses saith, I will provoke you to jealousy by them that are no people, and by a foolish nation I will anger you.

²⁰ But Esaias is very bold, and saith, I was found of them that sought me not; I was made manifest unto them that asked not after me.

²¹ But to Israel he saith, All day long have I stretched forth my hands unto a disobedient and gainsaying people.

PARAPHRASE.

¹ I as a christian speak truth, and my conscience, guided and enlightened by the Holy Ghost, bears me² witness, that I lye not, In my profession of great³ heaviness and continual sorrow of heart; I could even wish that the destruction and extermination, to which my brethren the jews are devoted by Christ, might, if it could save them from ruin, be executed on me, in the stead of those my kinsmen after the⁴ flesh; Who are israelites, a nation dignified with these privileges, which were peculiar to them; adoption, whereby they were in a particular manner the sons of God; the glory of the divine presence amongst them; covenants, made between them and the great God of heaven and the earth; the moral law, a constitution of civil government, and a form of divine worship prescribed by God himself; and all⁵ the promises of the Old Testament; Had the patriarchs, to whom the promises were made, for their fore-fathers; and of them, as to his fleshly extraction, Christ is come, he who is over all, God be⁶ blessed for ever, Amen. I commiserate my nation for not receiving the promised Messiah, now he is come; and I speak of the great prerogatives, they had from God, above other nations; but I say not this, as if it were possible, that the promise of God should fail of performance, and not have its effect¶. But it is to be observed, for a right understanding of the promise, that the sole descendants of Jacob, or Israel, do not make up the whole nation of Israel , or the people of God, comprehended ⁷ in the promise; Nor are they, who are the race of Abraham, all children, but only his posterity by Isaac, as it is said, “In Isaac shall thy seed be⁸ “called.” That is, the children of the flesh, descended out of Abraham’s loins, are not thereby the children of God, and to be esteemed his people: but the children of the promise, as Isaac was, are⁹ alone to be accounted his seed. For thus runs the word of promise, “At this time I will come, and¹⁰ Sarah shall have a son.” Nor was this the only limitation of the seed of Abraham, to whom the promise belonged; but also, when Rebecca had conceived by that one of Abraham’s issue, to whom the promise was made, viz. our father Isaac, and there¹¹ were twins in her womb, of that one father, Before the children were born, or had done any good, or evil, to show that his making any stock, or race, of men his peculiar people, depended solely on his own purpose and good pleasure, in choosing and calling them, and not on any works or deserts of theirs, he, acting here in the case of Jacob and Esau, according¹² to the predetermination of his own choice, It was declared unto her, that there were two nations in her womb, and that the descendants of the elder¹³

brother should serve those of the younger, As it is written, “Jacob have I loved, so as to make his posterity my chosen people; and Esau I put so much behind him, as to lay his mountains and¹⁴ his heritage waste.” What shall we say then, is there any injustice with God, in choosing one people to himself before another, according to his good¹⁵ pleasure? By no means. My brethren, the jews themselves cannot charge any such thing on what I say; since they have it from Moses himself, that God declared to him, that he would be gracious, to whom he would be gracious; and show mercy, on¹⁶ whom he would show mercy. So then, neither the purpose of Isaac, who designed it for Esau, and willed him to prepare himself for it; nor the endeavours of Esau, who ran a hunting for venison to come and receive it, could place on him the blessing; but the favour of being made, in his posterity, a great and prosperous nation, the peculiar people of God, preferred to that which should descend from his brother, was bestowed on Jacob, by the mere¹⁷ bounty and good pleasure of God himself. The like hath Moses left us upon record, of God’s dealing with Pharaoh and his subjects, the people of Egypt, to whom God saith, “Even for this same purpose have I raised thee up, that I might show my power in thee, and that my name might be ¹⁸ renowned through all the earth.” Therefore, that his name and power may be made known, and taken notice of, in the world, he is kind and bountiful to one nation, and lets another go on obstinately, in their opposition to him, that his taking them off, by some signal calamity and ruin, brought on them by the visible hand of his providence, may be seen, and acknowledged to be an effect of their standing out against him, as in the case of Pharaoh: for this end he is bountiful, to whom he will be bountiful; and whom he will, he permits to make such an use of his forbearance towards them, as to persist obdurate in their provocation of him, and draw on themselves¹⁹ exemplary destruction. To this, some may be ready to say, why then does he find fault? For who, at any time, hath been able to resist his²⁰ will? Say you so, indeed? But who art thou, O man, that repliest thus to God? shall the nations, that are made great or little, shall kingdoms, that are raised or depressed, say to him, in whose hands they are, to dispose of them as he pleases, “Why²¹ hast thou made us thus?” Hath not the potter power over the clay, of the same lump, to make this²² a vessel of honour, and that of dishonour? But what hast thou to say, O man of Judea, if God, willing to show his wrath, and have his power taken notice of, in the execution of it, did, with much long-suffering, bear with the sinful nation of

the jews, even when they were proper objects of that wrath, fit to have it poured out upon them, in their destruction;²³ That he might make known the riches of his glory, on those whom, being objects of his²⁴ mercy, he had before prepared to glory? Even us christians, whom he hath also called, not only of²⁵ the jews, but also of the gentiles; As he hath declared in Osee; “I will call them my people, who were not my people; and her beloved, who was²⁶ not beloved. And it shall come to pass, that in the place, where it was said unto them, Ye are not my people; there shall they be called the children²⁷ “of the living God.” Isaiah crieth also, concerning Israel, “Though the number of the children of Israel be as the sand of the sea, yet it is but a remnant²⁸ that shall be saved. For the Lord, finishing and contracting the account in righteousness, shall make a²⁹ short, or small remainder in the earth.” And, as Isaiah said before, “Unless the Lord of hosts had left us a seed, we had been as Sodom, and been made like unto Gomorrah;” we had utterly³⁰ been extirpated. What then remains to be said, but this? That the gentiles who sought not after righteousness, have obtained the righteousness, which is by faith, and thereby are become the people of³¹ God; But the children of Israel, who followed the law, which contained the rule of righteousness, have not attained to that law, whereby righteousness is to be attained, i. e. have not received the gospel, ³² and so are not the people of God. How came they to miss it? Because they sought not to attain it by faith; but as if it were to be obtained by the works of the law. A crucified Messiah was a stumblingblock to them; and at that they stumbled, As it³³ is written, “Behold, I lay in Sion a stumbling-stone, and a rock of offence: and whosoever believeth in him shall not be ashamed.”

X. 1Brethren, my hearty desire and prayer to God for² Israel is, that they may be saved. For I bear them witness that they are zealous, and as they think for God and his law; but their zeal is not guided by³ true knowledge; For they, being ignorant of the righteousness that is of God, viz. That righteousness which he graciously bestows and accepts of; and going about to establish a righteousness of their own, which they seek for, in their own performances; have not brought themselves to submit to the law of the gospel, wherein the righteousness of God,⁴ i. e. righteousness by faith is offered. For the end of the law was to bring men to Christ, that, by believing in him, every one, that did so, might be justified⁵ by faith; For Moses describeth the righteousness, that was to be had by the law, thus: “That the man, which doth the things required in the law, shall⁶ have life thereby.” But

the righteousness, which is of faith, speaketh after this manner: "Say not in thine heart, Who shall ascend into heaven;" that is, to bring down the Messiah from thence, whom we⁷ expect personally here on earth to deliver us? "Or who shall descend into the deep?" i. e. to bring up Christ again from the dead, to be our Saviour? you mistake the deliverance, you expect by the Messiah, there needs not the fetching him from the other⁸ world, to be present with you: The deliverance, by him, is a deliverance from sin, that you may be made righteous by faith in him, and that speaks thus: "The word is nigh thee, even in thy mouth, and in thy heart;" that is, the word of faith, or the doctrine⁹ of the gospel, which we preach, viz. If thou shalt confess with "thy mouth," i. e. openly own Jesus the Lord, i. e. Jesus to be the Messiah, thy Lord, and shalt believe in thy heart, that God hath raised him from the dead, otherwise he cannot be believed to be the Messiah; thou shalt be saved.¹⁰ It was not for nothing that Moses, in the place above-cited, mentioned both heart and mouth; there is use of both in the case. For with the heart man believeth unto righteousness, and with the¹¹ mouth confession is made unto salvation. For the scripture saith, "Whosoever believe on him, shall not be ashamed:" shall not repent his having believed,¹² and owning it. The scripture saith, Whosoever, for in this case there is no distinction of jew and gentile. For it is he, the same who is Lord of them all, and is abundantly bountiful to all that call¹³ upon him. For whosoever shall call upon his¹⁴ name, shall be saved. But how shall they call upon him, on whom they have not believed? And how shall they believe on him, of whom they have not heard? And how shall they hear, without a¹⁵ preacher? And how shall they preach, except they be sent? As it is written, "How beautiful are the feet of them that preach the gospel of peace, and bring glad tidings of good things?"¹⁶ But, though there be messengers sent from God, to preach the gospel; yet it is not to be expected, that all should receive and obey it. For Isaiah hath foretold that they should not, saying, "Lord, who¹⁷ hath believed our report?" That which we may learn from thence is, that faith cometh by hearing, and hearing from the word of God, i. e. the revelation of the gospel, in the writings of the sacred scriptures, communicated by those, whom God sends as preachers thereof, to those who are ignorant of it; and there is no need, that Christ should be brought down from heaven, to be personally with ¹⁸ you, to be your Saviour. It is enough, that both jews and gentiles have heard of him, by messengers, whose voice is gone out into the whole earth, and words unto the ends of the world, far beyond the¹⁹ bounds

of Judea. But I ask, Did not Israel know this, that the gentiles were to be taken in, and made the people of God? First Moses tells it them, from God, who says, “I will provoke you to jealousy, by them who are no people; and by a²⁰ foolish nation I will anger you.” But Isaiah declares it yet much plainer, in these words: “I was found of them that sought me not; I was made²¹ manifest to them that asked not after me.” And to Israel, to show their refusal, he saith: “All day long have I stretched forth my hands unto a disobedient and gainsaying people.”

SECT. IX.

CHAPTER XI. 1 — 36.

CONTENTS.

The apostle, in this chapter, goes on to show the future state of the jews and gentiles, in respect of christianity; viz. that, though the nation of the jews were, for their unbelief, rejected, and the gentiles taken, in their room, to be the people of God; yet there were a few of the jews, that believed in Christ, and so a small remnant of them continued to be God’s people, being incorporated, with the converted gentiles, into the christian church. But they shall, the whole nation of them, when the fulness of the gentiles is come in, be converted to the gospel, and again be restored to be the people of God.

The apostle takes occasion also, from God’s having rejected the jews, to warn the gentile converts, that they take heed: since, if God cast off his ancient people, the jews, for their unbelief, the gentiles could not expect to be preserved, if they apostatized from the faith, and kept not firm in their obedience to the gospel.

TEXT.

¹ I say then, Hath God cast away his people? God forbid! For I also am an Israelite, of the seed of Abraham, of the tribe of Benjamin.

² God hath not cast away his people, which he foreknew. Wot ye not what the scripture saith, of Elias? how he maketh intercession to God against Israel, saying,

³ Lord, they have killed thy prophets, and digged down thine altars; and I am left alone, and they seek my life.

⁴ But what saith the answer of God unto him? I have reserved to myself seven thousand men, who have not bowed the knee to the image of Baal.

⁵ Even so, then, at this present time also, there is a remnant, according to the election of grace.

⁶ And if by grace, then is it no more of works: otherwise grace is no more grace. But if it be of works, then is it no more grace: otherwise work is no more work.

⁷ What then? Israel hath not obtained that, which he seeketh for; but the election hath obtained it, and the rest were blinded:

⁸ According as it is written, God hath given them the spirit of slumber, eyes that they should not see, and ears that they should not hear, unto this day.

⁹ And David saith, Let their table be made a snare, and a trap, and a stumbling-block, and a recompence unto them:

¹⁰ Let their eyes be darkened that they may not see, and bow down their back alway.

¹¹ I say then, have they stumbled that they should fall? God forbid: but rather through their fall salvation is come unto the gentiles for to provoke them to jealousy.

¹² Now if the fall of them be the riches of the world, and the diminishing of them the riches of the gentiles: how much more their fulness?

¹³ For I speak to you gentiles, in as much as I am the apostle of the gentiles, I magnify mine office:

¹⁴ If, by any means, I may provoke to emulation them, which are my flesh, and might save some of them.

¹⁵ For, if the casting away of them be the reconciling of the world, what shall the receiving of them be, but life from the dead?

¹⁶ For if the first fruit be holy, the lump is also holy: and if the root be holy, so are the branches.

¹⁷ And if some of the branches be broken off, and thou, being a wild olive-tree, were grafted in amongst them, and with them partakest of the root and fatness of the olive-tree;

¹⁸ Boast not against the branches: but if thou boast, thou bearest not the root, but the root thee.

¹⁹ Thou wilt say then, The branches were broken off, that I might be grafted in.

²⁰ Well; because of unbelief they were broken off, and thou standest by faith. Be not high-minded, but fear.

²¹ For, if God spared not the natural branches, take heed lest he also spare not thee.

²² Behold, therefore, the goodness and severity of God: on them which fell, severity; but towards thee, goodness, if thou continue in his goodness: otherwise thou also shalt be cut off.

²³ And they also, if they abide not still in unbelief, shall be grafted in: for God is able to graff them in again.

²⁴ For, if thou wert cut out of the olive-tree, which is wild by nature, and wert grafted, contrary to nature, into a good olive-tree; how much more shall these, which be the natural branches, be grafted into their own olive-tree?

²⁵ For I would not, brethren, that ye should be ignorant of this mystery, (lest ye should be wise in your own conceits) that blindness in part is happened to Israel, until the fulness of the gentiles be come in.

²⁶ And so all Israel shall be saved: as it is written, There shall come out of Sion the deliverer, and shall turn away ungodliness from Jacob.

²⁷ For this is my covenant unto them, when I shall take away their sins.

²⁸ As concerning the gospel, they are enemies for your sakes: but as touching the election, they are beloved for the fathers' sakes.

²⁹ For the gifts and calling of God are without repentance.

³⁰ For as ye, in times past, have not believed God, yet have now obtained mercy, through their unbelief:

³¹ Even so have these also now not believed, that, through your mercy, they also may obtain mercy.

³² For God hath concluded them all in unbelief, that he might have mercy upon all.

³³ O the depth of the riches both of the wisdom and knowledge of God! how unsearchable are his judgments, and his ways past finding out!

³⁴ For who hath known the mind of the Lord, or who hath been his counsellor?

³⁵ Or who hath first given to him, and it shall be recompensed unto him again?

³⁶ For of him, and through him, and to him, are all things: to whom be glory for ever. Amen.

PARAPHRASE.

¹ I say then, “Has God wholly cast away his people, the jews, from being his people?” By no means, for I myself am an Israelite, of the seed of Abraham,² of the tribe of Benjamin. God hath not utterly cast off his people, whom he formerly owned, with so peculiar a respect. Know ye not what the scripture saith, concerning Elijah? How he complained to³ the God of Israel, in these words: “Lord, they have killed thy prophets, and have digged down thine altars, and of all that worshipped thee, I⁴ alone am left, and they seek my life also.” But what saith the answer of God to him? “I have reserved to myself seven thousand men, who have not bowed the knee to Baal,” i.e. have not been⁵ guilty of idolatry. Even so at this time also, there is a remnant reserved and segregated, by the favour⁶ and free choice of God. Which reservation of a remnant, if it be by grace and favour, it is not of works, for then grace would not be grace. But if it were of works, then is it not grace. For then work would not be work, i. e. work gives a right, grace bestows the favour, where there is no right to it; so that what is conferred by the one, cannot be ascribed⁷ to the other. How is it then? Even thus, Israel, or the nation of the jews, obtained not what it seeks, but the election, or that part, which was to remain God’s elect, chosen people, obtained it, but⁸ the rest of them were blinded: According as it is written, “God hath given them the spirit of slumber; eyes that they should not see, and ears that⁹ they should not hear, unto this day.” And David saith, “Let their table be made a snare and a trap, and a stumbling-block, and a recompence unto¹⁰ them: Let their eyes be darkened, that they may not see, and bow down their back away.”¹¹ What then do I say, that they have so stumbled, as to be fallen past recovery? By no means: but this I say, that by their fall, by their rejection for refusing the gospel, the privilege of becoming the people of God, by receiving the doctrine of salvation, is come to the gentiles, to provoke the jews to¹² jealousy. Now, if the fall of the jews hath been to the enriching of the rest of the world, and their damage an advantage to the gentiles, by letting them into the church, how much more shall their completion be so, when their whole nation shall¹³ be restored? This I say to you gentiles, forasmuch as being apostle of the gentiles, I magnify¹⁴ mine office: If, by any means, I may provoke to emulation the jews, who are my own flesh and blood, and bring some of them into the way of¹⁵ salvation. For, if the casting them off be a means of reconciling the world, what shall their restoration

be, when they are taken again into favour, but as it were life from the dead, which is to¹⁶ all mankind of all nations? For if the first fruits be holy and accepted, the whole product of the year is holy, and will be accepted. And if Abraham, Isaac, and Jacob, from whom the jewish nation had their original, were holy, the branches also, that¹⁷ sprang from this root, are holy. If then some of the natural branches were broken off: if some of the natural jews, of the stock of Israel, were broken off and rejected, and thou a heathen, of the wild gentile race, wert taken in, and ingrafted into the church of God, in their room; and there partakest of the blessings,¹⁸ promised to Abraham and his seed; Be not so conceited of thyself, as to show any disrespect to the jews. If any such vanity possesses thee, remember that the privilege thou hast, in being a christian, is derived to thee from the promise made to Abraham, and his seed, but nothing accrues to Abraham, or his¹⁹ race, by any thing derived from thee. Thou wilt perhaps say, "The jews were rejected to make way²⁰ for me." Well, let it be so; but remember that it was because of unbelief, that they were broken off, and that it is by faith alone, that thou hast obtained, and must keep thy present station. This ought to be a warning to thee, not to have any haughty conceit²¹ of thyself, but with modesty to fear. For if God spared not the seed of Abraham, but cast off even the children of Israel, for their unbelief he will certainly not spare thee, if thou art guilty of the like²² miscarriage. Mind, therefore, the benignity and rigour of God; rigour to them that stumbled at the gospel and fell, but benignity to thee, if thou continue within the sphere of his benignity, i. e. in the faith, by which thou partakest of the privilege of being one of his people; otherwise even thou also²³ shalt be cut off. And the jews also, if they continue not in unbelief, shall be again grafted into the stock of Abraham, and be re-established the people of God. For, however they are now scattered, and under subjection to strangers, God is able to collect them again into one body, make them his people, and set them²⁴ in a flourishing condition, in their own land. For if you, who are heathens by birth, and not of the promised seed, were, when you had neither claim, nor inclination to it, brought into the church, and made the people of God; how much more shall those, who are the posterity and descendants of him to whom the promise was made, be restored to the state,²⁵ which the promise vested in that family? For to prevent your being conceited of yourselves, my brethren, let me make known to you, which has yet been undiscovered to the world, viz. That the blindness, which has fallen upon part of Israel, shall

remain upon them, but till the time be come, wherein the whole gentile world shall enter into the church,²⁶ and make profession of christianity. And so all Israel shall be converted to the christian faith, and the whole nation become the people of God: as it is written, “There shall come out of Sion the deliverer, and shall turn away ungodliness from Jacob.”²⁷ For this is my covenant to them, when I²⁸ shall take away their sins.” They are, indeed, at present, strangers to the gospel, and so are in the state of enemies; but this is for your sakes: their fall and loss is your enriching, you having obtained admittance, through their being cast out: but yet they, being within the election, that God made, of Abraham, Isaac, and Jacob, and their posterity, to be his people, are still his beloved people, for Abraham, Isaac, and²⁹ Jacob’s sake, from whom they are descended. For the favours, that God showed those their fathers, in calling them and their posterity to be his people, he doth not repent of; but his promise, that they³⁰ shall be his people, shall stand good. For as you, the gentiles, formerly stood out, and were not the people of God, but yet have now obtained mercy, so as to be taken in, through the standing out of the³¹ jews, who submit not to the gospel: Even so they, now, have stood out, by reason of your being in mercy admitted, that they also, through the mercy you have received, may again hereafter be admitted.³² For God hath put up together, in a state of revolt from their allegiance to him, as it were in one fold, all men, both jews and gentiles, that, through his mercy, they might all, both jews and gentiles, come to be his people, i. e. he hath suffered both jews and gentiles, in their turns, not to be his people, that he might bring the whole body both of jews and gentiles,³³ to be his people. O the depth of the riches of the wisdom and knowledge of God! How unsearchable are his judgments, and his ways not to be³⁴ traced! For who hath known the mind of the Lord;³⁵ or who hath sat in counsel with him? Or who hath been before-hand with him, in bestowing any thing upon him, that God may repay it to him again?³⁶ The thought of any such thing is absurd. For from him all things have their being and original; by him they are all ordered and disposed of, and, for him and his glory, they are all made and regulated, to whom be glory for ever. Amen.

SECT. X.

CHAPTER XII. 1 — 21.

CONTENTS.

St. Paul, in the end of the foregoing chapter, with a very solemn epiphonema, closes that admirable, evangelical discourse, to the church at Rome, which had taken up the eleven foregoing chapters. It was addressed to the two sorts of converts, viz. gentiles and jews, into which, as into two distinct bodies, he all along, through this epistle, divides all mankind, and considers them, as so divided, into two separate corporations.

As to the gentiles, he endeavours to satisfy them, that though they, for their apostacy from God to idolatry, and the worship of false gods, had been abandoned by God, and lived in sin and blindness, without God in the world, strangers from the knowledge and acknowledgment of him; yet that the mercy of God, through Jesus Christ, was extended to them, whereby there was a way now open to them, to become the people of God. For since no man could be saved, by his own righteousness, no not the jews themselves, by the deeds of the law; the only way to salvation, both for jews and gentiles, was by faith in Jesus Christ. Nor had the jews any other way, now, to continue themselves the people of God, than by receiving the gospel; which way was opened also to the gentiles, and they as freely admitted into the kingdom of God, now erected under Jesus Christ, as the jews, and upon the sole terms of believing. So that there was no need at all for the gentiles to be circumcised, to become jews, that they might be partakers of the benefits of the gospel.

As to the jews, the apostle's other great aim, in the foregoing discourse, is to remove the offence the jews took at the gospel, because the gentiles were received into the church, as the people of God, and were allowed to be subjects of the kingdom of the Messiah. To bring them to a better temper, he shows them, from the sacred scripture, that they could not be saved by the deeds of the law, and therefore the doctrine of righteousness, by faith, ought not to be so strange a thing to them. And, as to their being, for their unbelief, rejected from being the people of God, and the gentiles taken in their room, he shows plainly, that this was foretold them in the Old Testament; and that herein God did them no injustice. He was sovereign over all mankind, and might choose whom he would, to be his people, with the same freedom that he chose the posterity of Abraham, among all the nations of the earth, and of that race chose the descendants of Jacob, before those of his elder brother Esau, and that, before they had a being, or were capable of doing good or evil. In all which discourse of his it is plain, the

election spoken of has for its object only nations, or collective bodies politic, in this world, and not particular persons, in reference to their eternal state in the world to come.

Having thus finished the principal design of his writing, he here, in this, as is usual with him in all his epistles, concludes with practical and moral exhortations, whereof there are several in this chapter, which we shall take in their order.

TEXT.

¹ I Beseech you, therefore, brethren, by the mercies of God, that ye present your bodies a living sacrifice, holy, acceptable unto God, which is your reasonable service.

² And be not conformed to this world; but be ye transformed by the renewing of your mind, that ye may prove what is that good, and acceptable, and perfect will of God.

³ For I say, through the grace given unto me, to every man that is among you, not to think of himself more highly than he ought to think; but to think soberly, according as God hath dealt to every man the measure of faith.

⁴ For, as we have many members in one body, and all members have not the same office;

⁵ So we, being many, are one body in Christ, and every one members one of another.

⁶ Having then gifts, differing according to the grace that is given to us, whether prophecy, let us prophesy according to the proportion of faith.

⁷ Or ministry, let us wait on our ministering; or he that teacheth, on teaching;

⁸ Or he that exhorteth, on exhortation: he that giveth, let him do it with simplicity: he that ruleth, with diligence; he that sheweth mercy, with cheerfulness.

⁹ Let love be without dissimulation. Abhor that which is evil, cleave to that which is good.

¹⁰ Be kindly affectioned one to another with brotherly love; in honour preferring one another.

¹¹ Not slothful in business: fervent in spirit; serving the Lord.

¹² Rejoicing in hope: patient in tribulation; continuing instant in prayer:

¹³ Distributing to the necessity of saints; given to hospitality.

¹⁴ Bless them which persecute you: bless and curse not.

¹⁵ Rejoice with them that do rejoice, and weep with them that weep.

¹⁶ Be of the same mind one towards another. Mind not high things, but condescend to men of low estate. Be not wise in your own conceits.

¹⁷ Recompense to no man evil for evil. Provide things honest in the sight of all men.

¹⁸ If it be possible, as much as lieth in you, live peaceably with all men.

¹⁹ Dearly beloved, avenge not yourselves, but rather give place unto wrath; for it is written, Vengeance is mine; I will repay, saith the Lord.

²⁰ Therefore, if thine enemy hunger, feed him; if he thirst, give him drink, for, in so doing, thou shalt heap coals of fire on his head.

²¹ Be not overcome of evil, but overcome evil with good.

PARAPHRASE.

¹ It being so then, that you are become the people of God, in the room of the jews, do not ye fail to offer him that sacrifice, that it is reasonable for you to do, I mean your bodies, not to be slain, but the lusts thereof being mortified, and the body cleansed from the spots and blemishes of sin, will be an acceptable offering to him, and such a way of worship, as becomes a rational creature, which therefore I beseech you, by the mercies of God to you, who has made you his² people to present to him. And be not conformed to the fashion of this world: but be ye transformed, in the renewing of your minds; that you may, upon examination, find out what is the good, the acceptable and perfect will of God, which now, under the gospel, has shown itself to be in purity and holiness of life: the ritual observances, which he once instituted, not being that, his good, acceptable, and perfect will, which he always intended, they were made only the types and preparatory way to this more perfect³ state under the gospel. For by virtue of that commission, to be the apostle of the gentiles, which, by the favour of God, is bestowed on me, I bid every one of you, not to think of himself more highly than he ought to think, but to have sober and modest thoughts of himself, according to that measure of spiritual gifts, which God has bestowed upon him.⁴ For, as there are many members in one and the same body, but all the members are not appointed to the⁵ same work; So we, who are many, make all but one body in Christ, and are all fellow members one⁶ of another. But having, according to the respective favour that is

bestowed upon us, every one of us different gifts; whether it be prophecy, let us prophesy, according to the proportion of faith; or gift of interpretation, which is given us, i. e. as far forth as we are enabled by revelation and an extraordinary illumination to understand and expound⁷ it, and no farther: Or, if it be ministry, let us wait on our ministering; he that is a teacher, let him⁸ take care to teach. He, whose gift is exhortation, let him be diligent in exhorting: he that giveth, let him do it liberally, and without the mixture of any self-interest: he that presideth, let him do it with diligence: he that showeth mercy, let him do⁹ it with chearfulness. Let love be without dissimulation. Abhor that which is evil, stick to that¹⁰ which is good. Be kindly affectioned one towards another, with brotherly love: in honour preferring¹¹ one another. Not slothful in business; but active and vigorous in mind, directing all the service of¹² Christ and the gospel, Rejoicing in the hope you have of heaven and happiness; patient in tribulation;¹³ frequent and instant in prayer: Forward to help christians in want, according to their necessities;¹⁴ given to hospitality. Bless them who persecute¹⁵ you: bless and curse not. Rejoice with them¹⁶ that rejoice, and weep with them that weep. Be of the same mind one towards another. Do not mind only high things; but suit yourselves to the mean condition and low concerns of persons beneath you.¹⁷ Be not wise in your own conceits. Render to no man evil for evil; but take care that your carriage ¹⁸ be such as may be approved by all men. If it be possible, as much as lieth in you, live peaceably with¹⁹ all men. Dearly beloved, do not avenge yourselves, but rather leave that to God. For it is written, “Vengeance is mine, and I will repay it, saith the²⁰ Lord.” Therefore, if thine enemy hunger, feed him; if he thirst, give him drink; if this prevail on him, thou subduest an enemy, and gainest a friend; if he persists still in his enmity, in so doing, thou heapest coals of fire on his head, i. e. exposest him²¹ to the wrath of God, who will be thy avenger. Be not overcome and prevailed on, by the evil thou receivest, to retaliate; but endeavour to master the malice of an enemy in injuring thee, by a return of kindness and good offices to him.

SECT. XI.

CHAPTER XIII. 1 — 7.

CONTENTS.

This section contains the duty of christians to the civil magistrate: for the understanding this right, we must consider these two things:

That these rules are given to christians, that were members of a heathen commonwealth, to show them that, by being made christians and subjects of Christ's kingdom, they were not, by the freedom of the gospel, exempt from any ties of duty, or subjection, which by the laws of their country, they were in, and ought to observe, to the government and magistrates of it, though heathens, any more than any of their heathen subjects. But, on the other side, these rules did not tie them up, any more than any of their fellow-citizens, who were not christians, from any of those due rights, which, by the law of nature, or the constitutions of their country, belonged to them. Whatsoever any other of their fellow-subjects, being in a like station with them, might do without sinning, that they were not abridged of, but might do still, being christians. The rule here being the same with that given by St. Paul, 1 Cor. vii. 17, "As God has called every one, so let him walk." The rules of civil right and wrong, that he is to walk by, are to him the same they were before.

That St. Paul, in this direction to the romans, does not so much describe the magistrates that then were in Rome, as tells whence they, and all magistrates, everywhere, have their authority; and for what end they have it, and should use it. And this he does, as becomes his prudence, to avoid bringing any imputation on christians, from heathen magistrates, especially those insolent and vicious ones of Rome, who could not brook any thing to be told them as their duty, and so might be apt to interpret such plain truths, laid down in a dogmatical way, into sauciness, sedition, or treason, a scandal cautiously to be kept off from the christian doctrine! nor does he, in what he says, in the least flatter the roman emperor, let it be either Claudius, as some think, or Nero, as others, who then was in possession of that empire. For he here speaks of the higher powers, i. e. the supreme, civil power, which is, in every commonwealth, derived from God, and is of the same extent everywhere, i. e. is absolute and unlimited by any thing, but the end for which God gave it, viz. the good of the people, sincerely pursued, according to the best of the skill of those who share that power, and so not to be resisted. But, how men come by a rightful title to this power, or who has that title, he is wholly silent, and says nothing of it. To have meddled with that, would have been to decide of civil rights, contrary to the design and business of the gospel, and the example of our Saviour, who refused

meddling in such cases with this decisive question, “Who made me a judge, or divider, over you?” Luke xii. 14.

TEXT.

¹ Let every soul be subject unto the higher powers. For there is no power, but of God: the powers that be are ordained of God.

² Whosoever, therefore, resisteth the power, resisteth the ordinance of God: and they that resist, shall receive to themselves damnation.

³ For rulers are not a terrour to good works, but to the evil. Wilt thou then not be afraid of the power? do that which is good, and thou shalt have praise of the same.

⁴ For he is the minister of God to thee for good. But if thou do that which is evil, be afraid: for he beareth not the sword in vain: for he is the minister of God, a revenger to execute wrath upon him that doth evil.

⁵ Wherefore ye must needs be subject, not only for wrath, but also for conscience sake.

⁶ For, for this cause, pay you tribute also; for they are God’s ministers, attending continually upon this very thing.

⁷ Render therefore to all their dues: tribute to whom tribute is due, custom to whom custom, fear to whom fear, honour to whom honour.

PARAPHRASE.

¹ Let every one of you, none excepted, be subject to the over-ruling powers of the government he lives in. ² There is no power but what is from God: The powers that are in being, are ordained by God: so that he, who resisteth the power, resisteth the ordinance of God; and they that resist, will be punished by those³ powers that they resist. What should you be afraid of? Rulers are no terrour to those that do well, but to those that do ill. Wilt thou then not live in dread of the civil power? Do that which is good and right, and then praise only is thy due from the magistrate.⁴ For he is the officer and minister of God, appointed only for thy good. But, if thou doest amiss, then thou hast reason to be afraid. For he bears not the sword in vain. For he is the minister of God, and executioner of wrath and punishment upon him that⁵ doth ill. This being the end of government, and the business of the magistrate, to cherish the good, and punish ill men, it is necessary for you to submit to government, not only in apprehension of the punishment, which

disobedience will draw on you, but out of conscience, as a duty required of you by God.⁶ This is the reason why also you pay tribute, which is due to the magistrates, because they employ their care, time and pains, for the publick weal, in punishing and restraining the wicked and vicious; and in countenancing and supporting the virtuous⁷ and good. Render therefore to all their dues: tribute to whom tribute is due, custom to whom custom, fear to whom fear, and honour to whom honour.

SECT. XII.

CHAPTER XIII. 8 — 14.

CONTENTS.

He exhorts them to love, which is, in effect, the fulfilling of the whole law.

TEXT.

⁸ Owe no man any thing, but to love one another: for he, that loveth another, hath fulfilled the law.

⁹ For this, Thou shalt not commit adultery, thou shalt not kill, thou shalt not steal, thou shalt not bear false witness, thou shalt not covet; and, if there be any other commandment, it is briefly comprehended in this saying, namely, Thou shalt love thy neighbour as thyself.

¹⁰ Love worketh no ill to his neighbour: therefore, love is the fulfilling of the law.

¹¹ And that, knowing the time, that now it is high time to awake out of sleep; for now is our salvation nearer than when we believed.

¹² The night is far spent, the day is at hand: let us, therefore, cast off the works of darkness, and let us put on the armour of light.

¹³ Let us walk honestly, as in the day; not in rioting and drunkenness, not in chambering and wantonness, not in strife and envying.

¹⁴ But put ye on the Lord Jesus Christ, and make not provision for the flesh, to fulfil the lusts thereof.

PARAPHRASE.

⁸ Owe nothing to any body, but affection and good will, mutually to one another: for he, that loves others sincerely, as he does himself, has fulfilled

the law.⁹ For this precept, Thou shalt not commit adultery, thou shalt not kill, thou shalt not steal, thou shalt not bear false witness, thou shalt not covet; and whatever other command there be, concerning social duties, it in short is comprehended in this, “Thou¹⁰ shalt love thy neighbour as thyself.” Love permits us to do no harm to our neighbour, and therefore is the fulfilling of the whole law of the second ¹¹ table. And all this do, considering that it is now high time that we rouse ourselves up, shake off sleep, and betake ourselves, with vigilancy and vigour, to the duties of a christian life. For the time of your removal, out of this place of exercise and probationership, is nearer than when you first entered¹² into the profession of christianity. The night, the dark state of this world, wherein the good and the bad can scarce be distinguished, is far spent. The day, that will show every one in his own dress and colours, is at hand. Let us, therefore, put away the works, that we should be ashamed of, but in the dark; and let us put on the dress and ornaments, that we should be willing to appear in, in the light.¹³ Let our behaviour be decent, and our carriage such, as fears not the light, nor the eyes of men; not in disorderly feastings and drunkenness; nor in dalliance and wantonness: nor in strife and envy.¹⁴ But walk in newness of life, in obedience to the precepts of the gospel, as becomes those who are baptized into the faith of Christ, and let not the great employment of your thoughts and cares be wholly in making provision for the body, that you may have wherewithal to satisfy your carnal lusts.

SECT. XIII.

CHAPTER XIV. 1. — XV. 13.

CONTENTS.

St. Paul instructs both the strong and the weak in their mutual duties one to another, in respect of things indifferent, teaching them, that the strong should not use their liberty, where it might offend a weak brother: nor the weak censure the strong, for using their liberty.

TEXT.

¹ Him that is weak in the faith receive you, but not to doubtful disputations.

² For one believeth that he may eat all things: another, who is weak, eateth herbs.

³ Let not him, that eateth, despise him that eateth not: and let not him, which eateth not, judge him that eateth: for God hath received him.

⁴ Who art thou, that judgest another man's servant? to his own master he standeth or falleth: yea, he shall be holden up; for God is able to make him stand.

⁵ One man esteemeth one day above another: another esteemeth every day alike. Let every man be fully persuaded in his own mind.

⁶ He that regardeth the day, regardeth it unto the Lord; and he that regardeth not the day, to the Lord he doth not regard it. He that eateth, eateth to the Lord, for he giveth God thanks; and he that eateth not, to the Lord he eateth not, and giveth God thanks.

⁷ For none of us liveth to himself, and no man dieth to himself.

⁸ For whether we live, we live unto the Lord; and whether we die, we die unto the Lord: whether we live, therefore, or die, we are the Lord's.

⁹ For to this end Christ both died, and rose, and revived, that he might be Lord both of the dead and living.

¹⁰ But why dost thou judge thy brother? or why dost thou set at nought thy brother? for we shall all stand before the judgment seat of Christ.

¹¹ For it is written, As I live, saith the Lord, every knee shall bow to me, and every tongue shall confess to God.

¹² So then every one of us shall give account of himself to God.

¹³ Let us not, therefore, judge one another any more: but judge this rather, that no man put a stumbling-block, or an occasion to fall, in his brother's way.

¹⁴ I know, and am persuaded by the Lord Jesus, that there is nothing unclean of itself: but to him that esteemeth any thing to be unclean, to him it is unclean.

¹⁵ But if thy brother be grieved with thy meat, now walkest thou not charitably. Destroy not him with thy meat, for whom Christ did.

¹⁶ Let not then your good be evil spoken of.

¹⁷ For the kingdom of God is not meat and drink, but righteousness, and peace, and joy in the Holy Ghost.

¹⁸ For he that in these things serveth Christ, is acceptable to God, and approved of men.

¹⁹ Let us, therefore, follow after the things which make for peace, and things wherewith one may edify another.

²⁰ For meat destroy not the work of God. All things indeed are pure; but it is evil for that man who eateth with offence.

²¹ It is good neither to eat flesh, nor to drink wine, nor any thing whereby thy brother stumbleth, or is offended, or is made weak.

²² Hast thou faith? have it to thyself before God. Happy is he that condemneth not himself, in that thing which he alloweth.

²³ And he that doubteth, is damned if he eat, because he eateth not of faith: for whatsoever is not of faith, is sin.

XV. 1. We then that are strong, ought to bear the infirmities of the weak, and not to please ourselves.

² Let every one of us please his neighbour for his good to edification.

³ For even Christ pleased not himself; but as it is written, The reproaches of them that reproached thee, fell on me.

⁴ For whatsoever things were written, aforetime, were written for our learning, that we, through patience and comfort of the scriptures, might have hope.

⁵ Now the God of patience and consolation, grant you to be likeminded one towards another, according to Christ Jesus:

⁶ That ye may, with one mind and one mouth, glorify God, even the father of our Lord Jesus Christ.

⁷ Wherefore, receive ye one another, as Christ also received us, to the glory of God.

⁸ Now I say that Jesus Christ was a minister of the circumcision for the truth of God, to confirm the promises made unto the fathers:

⁹ And that the gentiles might glorify God, for his mercy; as it is written, For this cause I will confess to thee among the gentiles, and sing unto thy name.

¹⁰ And again he saith, Rejoice, ye gentiles, with his people.

¹¹ And again, Praise the Lord, all ye gentiles, and laud him, all ye people.

¹² And again Esaias saith, There shall be a root of Jesse, and he that shall rise to reign over the gentiles, in him shall the gentiles trust.

¹³ Now the God of hope fill you with all joy and peace in believing, that ye may abound in hope, through the power of the Holy Ghost.

PARAPHRASE.

¹ Him, that is weak in the faith, i. e. not fully persuaded of his christian liberty, in the use of some indifferent thing, receive you into your friendship and conversation, without any coldness, or distinction, but do not engage him in disputes and controversies² about it. For such variety is there in men's persuasions, about their christian liberty, that one believeth that he may, without restraint, eat all things; another is so scrupulous, that he eateth nothing but³ herbs. Let not him, that is persuaded of his liberty, and eateth, despise him that, through scruple, eateth not: and let not him, that is more doubtful, and eateth not, judge, or censure, him that eateth, for God hath received him into his church and family:⁴ And who art thou, that takest upon thee to judge the domestic of another, whether he be of his family, or no? It is his own master alone, who is to judge, whether he be, or shall continue, his domestic, or no: what hast thou to do, to meddle in the case? But trouble not thyself, he shall stand and stay in the family. For God is able to confirm and establish him⁵ there. One man judgeth one day to be set apart to God, more than another: another man judgeth every day to be God's alike. Let every one take care to be satisfied in his own mind, touching the⁶ matter. But let him not censure another in what he doth. He that observeth a day, observeth it as the Lord's servant, in obedience to him: and he that observeth it not, passes by that observance, as the Lord's servant, in obedience also to the Lord. He that eateth what another out of scruple forbears, eateth it as the Lord's servant: for he giveth God thanks. And he that, out of scruple, forbeareth to eat, does it also as the Lord's servant: for he giveth God thanks, even for that which he doth,⁷ and thinks he may not eat. For no one of us christians liveth, as if he were his own man, perfectly at his own disposal: and no one of us dies⁸ so. For, whether we live, our life is appropriated to the Lord: or, whether we die, to him we die, as his servants. For whether we live, or die, we are his, in his family, his domestics, appropriated to him. ⁹ For to this end Christ died, and rose, and lived again, that he might be Lord and proprietor of us, both¹⁰ dead and living. What hast thou then to do, to judge thy brother, who is none of thy servant, but thy equal? Or how darest thou to think contemptibly of him? For we shall, thou, and he, and all of us, be brought before the judgment-seat of Christ, and there we shall answer, every one for himself, to¹¹ our Lord and master. For it is written, "As I live, saith the Lord, every knee shall bow to me, and¹² every tongue shall confess to God." So then every one of us shall give an account of himself to¹³ God. Let us not, therefore,

take upon us to judge one another; but rather come to this judgment, or determination of mind, that no man put a stumbling-block, or an occasion of falling, in his brother's ¹⁴ way. I know and am fully assured by the Lord Jesus, that there is nothing unclean or unlawful to be eaten, of itself. But to him, that accounts any¹⁵ thing to be unclean, to him it is unclean. But if thy brother be grieved with thy meat, thy carriage is uncharitable to him. Destroy not him with thy¹⁶ meat, for whom Christ died. Let not then your liberty, which is a good you enjoy, under the gospel,¹⁷ be evil spoken of. For the privileges and advantages of the kingdom of God do not consist in the enjoyment of greater variety of meats and drinks, but in uprightness of life, peace of all kinds, and joy in the gifts and benefits of the Holy Ghost,¹⁸ under the gospel. For he that, in these things, pays his allegiance and service to Jesus Christ, as a dutiful subject of his kingdom, is acceptable to God,¹⁹ and approved of men. The things, therefore, that we set our hearts upon, to pursue and promote, let them be such as tend to peace and good-will, and ²⁰ the mutual edification of one another. Do not, for a little meat, destroy a man, that is the work of God, and no ordinary piece of workmanship. It is true, all sort of wholesome food is pure, and defileth not a man's conscience; but yet it is evil to him, who²¹ eateth any thing so as to offend his brother. It is better to forbear flesh, and wine, and any thing, rather than in the use of thy liberty, in any indifferent things, to do that, whereby thy brother²² stumbleth, or is offended, or is made weak. Thou art fully persuaded of the lawfulness of eating the meat which thou eatest: it is well. Happy is he, that is not self-condemned, in the thing that he practises. But have a care to keep this faith or persuasion, to thyself; let it be between God and thy own conscience: raise no dispute about it; neither make²³ ostentation of it, by thy practice before others. But he that is in doubt, and balanceth, is self-condemned, if he eat; because he doth it, without a full persuasion of the lawfulness of it. For whatever a man doth, which he is not fully persuaded in his own mind to be lawful, is sin. We, then, that are strong, ought to bear the infirmities of the weak, and not to indulge our own appetites, or inclinations, in such an use of indifferent things, as may offend the²⁴ weak. But let every one of us please his neighbour, comply with his infirmities for his good, and to edification.³ For even Christ, our Lord, pleased not himself: but as it is written, "The reproaches of them⁴ that reproached thee, are fallen upon me." For whatsoever was heretofore written, i. e. in the Old Testament, was written for our learning, that we

through patience, and the comfort which the scriptures give⁵ us, might have hope. Now God, who is the giver of patience and consolation, make you to be at unity one with another, according to the will of Christ Jesus;⁶ That you may, with one mind and one mouth, glorify the God and Father of our Lord Jesus Christ.⁷ Wherefore, admit and receive one another into fellowship and familiarity, without shyness, or distance, upon occasion of differences about things indifferent,⁸ even as Christ received us jews to glorify God, (For I must tell you, ye converted romans, that Christ was sent to the jews, and employed all his ministry on those of the circumcision) for his truth, in making good his promise made to the fathers, i. e. Abraham,⁹ Isaac, and Jacob; And received you, the gentiles, to glorify God for his mercy to you, as it is written, “For this cause I will confess to thee among the gentiles, and sing unto thy name.”¹⁰ And again, he saith, “Rejoice, ye gentiles, with¹¹ his people.” And again, “Praise the Lord, all ye¹² gentiles, and laud him, all ye nations.” And again, Isaiah saith, “There shall be a root of Jesse, and he that shall rise to reign over the gentiles,¹³ in him shall the gentiles trust.” Now the God of hope fill you with all joy and peace in believing, that ye may abound in hope, through the power of the Holy Ghost.

SECT. XIV.

CHAPTER XV. 14 — 33.

CONTENTS.

In the remaining part of this chapter, St. Paul makes a very kind and skilful apology to them, for this epistle: expresses an earnest desire of coming to them: touches upon the reasons, that hitherto had hindered him: desires their prayers for his deliverance from the jews, in his journey to Jerusalem, whither he was going; and promises that, from thence, he will make them a visit in his way to Spain.

TEXT.

¹⁴ And I myself also am persuaded of you, my brethren, that ye also are full of goodness, filled with all knowledge, able also to admonish one another.

¹⁵ Nevertheless, brethren, I have written the more boldly unto you, in some sort, as putting you in mind, because of the grace, that is given to me

of God.

¹⁶ That I should be the minister of Jesus Christ to the gentiles, ministering the gospel of God, that the offering up of the gentiles might be acceptable, being sanctified by the Holy Ghost.

¹⁷ I have therefore whereof I may glory, through Jesus Christ, in those things which pertain unto God.

¹⁸ For I will not dare to speak of any of those things which Christ hath not wrought by me, to make the gentiles obedient, by word and deed.

¹⁹ Through mighty signs and wonders, by the power of the spirit of God; so that from Jerusalem, and round about unto Illyricum, I have fully preached the gospel of Christ.

²⁰ Yea, so have I strived to preach the gospel, not where Christ was named, lest I should build upon another man's foundation.

²¹ But as it is written, To whom he was not spoken of, they shall see: and they that have not heard, shall understand.

²² For which cause also I have been much hindered from coming to you.

²³ But now, having no more place in these parts, and having a great desire, these many years, to come unto you,

²⁴ Whensoever I take my journey into Spain, I will come to you: for I trust to see you in my journey, and to be brought on my way thither-ward by you, if first I be somewhat filled with your company.

²⁵ But now I go unto Jerusalem, to minister unto the saints.

²⁶ For it hath pleased them of Macedonia, and Achaia, to make a certain contribution for the poor saints, which are at Jerusalem.

²⁷ It hath pleased them verily, and their debtors they are. For, if the gentiles have been made partakers of their spiritual things, their duty is also to minister unto them in carnal things.

²⁸ When, therefore, I have performed this, and have sealed to them this fruit, I will come, by you, into Spain.

²⁹ And I am sure that, when I come unto you, I shall come in the fulness of the gospel of Christ.

³⁰ Now I beseech you, brethren, for the Lord Jesus Christ's sake, and for the love of the spirit, that ye strive, together with me, in your prayers to God for me.

³¹ That I may be delivered from them that do not believe, in Judea; and that my service, which I have for Jerusalem, may be accepted of the saints;

³² That I may come unto you with joy, by the will of God, and may with you be refreshed.

³³ Now the God of peace be with you all. Amen.

PARAPHRASE.

¹⁴ As to my own thoughts concerning you, my brethren, I am persuaded that you also, as well as others, are full of goodness, abounding in all knowledge, and¹⁵ able to instruct one another. Nevertheless, brethren, I have written to you, in some things, pretty freely, as your remembrancer, which I have been emboldened to do, by the commission, which God has been¹⁶ graciously pleased to bestow on me, Whom he hath made to be the minister of Jesus Christ to the gentiles, in the gospel of God, in which holy ministration I officiate, that the gentiles may be made an acceptable offering to God, sanctified by the pouring ¹⁷ out of the Holy Ghost upon them. I have, therefore, matter of glorying, through Jesus Christ,¹⁸ as to those things that pertain to God. For I shall not venture to trouble you with any concerning myself, but only what Christ hath wrought by me, for the bringing of the gentiles to christianity, both¹⁹ in profession and practice. Through mighty signs and wonders by the power of the Holy Ghost, so that, from Jerusalem and the neighbouring countries, all along, quite to Illyricum, I have effectually²⁰ preached the gospel of Christ; But so as studiously to avoid the carrying of it to those places, where it was already planted, and where the people were already christians, lest I should build upon another²¹ man's foundation. But as it is written, "To whom he was not spoken of, they shall see: and they,²² that have not heard, shall understand." This has ²³ often hindered me from coming to you: But now, having in these parts no place, where Christ hath not been heard of, to preach the gospel in; and having had, for these many years, a desire to come to²⁴ you; I will, when I take my journey to Spain, take you in my way: for I hope, then, to see you, and to be brought on my way thither-ward by you, when I have, for some time, enjoyed your company, and pretty well satisfied my longing, on that account.²⁵ But, at present, I am setting out for Jerusalem,²⁶ going to minister to the saints there. For it hath pleased those of Macedonia and Achaia to make a contribution for the poor, among the saints at Jerusalem.²⁷ It hath pleased them to do so, and they are, indeed, their debtors. For, if the gentiles have been made partakers of their spiritual things, they are bound,

on their side, to minister to them, for the²⁸ support of this temporal life. When, therefore, I have dispatched this business, and put this fruit of my labours into their hands, I will come to you in²⁹ my way to Spain. And I know that, when I come unto you, I shall bring with me to your full satisfaction, concerning the blessedness, which you receive³⁰ by the gospel of Christ. Now I beseech you, brethren, by our Lord Jesus Christ, and by the love which comes from the spirit of God, to join³¹ with me in earnest prayers to God for me, That I may be delivered from the unbelievers in Judea; and that the service I am doing the saints there,³² may be acceptable to them: That, if it be the will of God, I may come to you with joy, and may be³³ refreshed together with you. Now the God of peace be with you all. Amen.

SECT. XV.

CHAPTER XVI. 1 — 27.

CONTENTS.

The foregoing epistle furnishes us with reasons to conclude, that the divisions and offences, that were in the roman church, were between the jewish and gentile converts, whilst the one, over-zealous for the rituals of the law, endeavoured to impose circumcision and other mosaical rites, as necessary to be observed, by all that professed christianity; and the other, without due regard to the weakness of the jews, showed a too open neglect of those their observances, which were of so great account with them. St. Paul was so sensible, how much the churches of Christ suffered, on this occasion, and so careful to prevent this, which was a disturbance almost every where (as may be seen in the history of the Acts, and collected out of the epistles) that, after he had finished his discourse to them, (which we may observe solemnly closed, in the end of the foregoing chapter) he here, in the middle of his salutations, cannot forbear to caution them against the authors and fomenters of these divisions, and that very pathetically, ver. 17 — 20. All the rest of this chapter is spent, almost wholly, in salutations. Only the four last verses contain a conclusion, after St. Paul's manner.

TEXT.

¹ I commend unto you Phœbe our sister, which is a servant of the church which is at Kenchrea:

² That ye receive her in the Lord, as becometh saints, and that ye assist her, in whatsoever business she hath need of you: for she hath been a succourer of many, and myself also.

³ Greet Priscilla and Aquila, my helpers in Christ Jesus:

⁴ (Who have, for my life, laid down their own necks: unto whom not only I give thanks, but also all the churches of the gentiles.)

⁵ Likewise greet the church that is in their house, Salute my well-beloved Epænetus, who is the first fruits of Achaia unto Christ.

⁶ Greet Mary, who bestowed much labour on us.

⁷ Salute Andronicus and Junia, my kinsmen and fellow-prisoners, who are of note among the apostles, who also were in Christ before me.

⁸ Greet Amplias, my beloved in the Lord.

⁹ Salute Urbane, our helper in Christ, and Stachys, my beloved.

¹⁰ Salute Apelles, approved in Christ. Salute them, which are of Aristobulus' household.

¹¹ Salute Herodian, my kinsman. Greet them that be of the household of Narcissus, which are in the Lord.

¹² Salute Tryphena and Tryphosa, who labour in the Lord. Salute the beloved Persis, which laboured much in the Lord.

¹³ Salute Rufus, chosen in the Lord, and his mother and mine.

¹⁴ Salute Asyncritus, Phlegon, Hermas, Patrobas, Hermes, and the brethren which are with them.

¹⁵ Salute Philologus and Julia, Nereus and his sister, and Olympas, and all the saints which are with them.

¹⁶ Salute one another with an holy kiss. The churches of Christ salute you.

¹⁷ Now I beseech you, brethren, mark them which cause divisions and offences contrary to the doctrine which ye have learned; and avoid them.

¹⁸ For they, that are such, serve not our Lord Jesus Christ, but their own belly; and, by good words and fair speeches, deceive the hearts of the simple.

¹⁹ For your obedience is come abroad unto all men. I am glad, therefore, on your behalf: but yet I would have you wise unto that which is good; and simple concerning evil.

²⁰ And the God of peace shall bruise Satan under your feet shortly. The grace of our Lord Jesus Christ be with you. Amen.

²¹ Timotheus, my work-fellow, and Lucius, and Jason, and Sosipater, my kinsmen, salute you.

²² I Tertius, who wrote this epistle, salute you in the Lord.

²³ Gaius mine host, and of the whole church saluteth you. Erastus, the chamberlain of the city, saluteth you, and Quartus, a brother.

²⁴ The grace of our Lord Jesus Christ be with you all. Amen.

²⁵ Now to him, that is of power to stablish you, according to my gospel, and the preaching of Jesus Christ, (according to the revelation of the mystery, which was kept secret, since the world began;

²⁶ But now is made manifest, and, by the scriptures of the prophets, according to the commandment of the everlasting God, made known to all nations, for the obedience of faith.)

²⁷ To God, only wise, be glory, through Jesus Christ, for ever. Amen.

PARAPHRASE.

¹ I commend to you Phœbe, our sister, who is a servant² of the church, which is at Kenchrea, That you receive her, for Christ's sake, as becomes christians, and that you assist her, in whatever business she has need of you, for she has assisted many, and³ me in particular. Salute Priscilla and Aquila, my⁴ fellow-labourers in the gospel, (Who have, for my life, exposed their own to danger, unto whom not only I give thanks, but also all the churches of the⁵ gentiles.) Greet also the church that is in their house. Salute my well-beloved Epænetus, who is⁶ the first-fruits of Achaia unto Christ. Greet Mary,⁷ who took a great deal of pains for our sakes. Salute Andronicus and Junia, my kinsfolk and fellow-prisoners, who are of note among the apostles, who⁸ also were christians before me. Greet Amplias, my⁹ beloved in the Lord. Salute Urbane, our helper in¹⁰ Christ, and Stachys, my beloved. Salute Apelles approved in Christ. Salute those who are of the¹¹ household of Aristobulus. Salute Herodian, my kinsman. Salute all those of the household of Narcissus,¹² who have embraced the gospel. Salute Tryphena and Tryphosa, who take pains in the gospel. Salute the beloved Persis, who laboured much in the¹³ Lord. Salute Rufus, chosen, or selected to be a¹⁴ disciple of the Lord; and his mother and mine. Salute Asyncritus, Phlegon, Hermas, Patrobas, Hermes,¹⁵ and the brethren who are with them. Salute

Philologus, and Julia, Nereus and his sister, and Olympas,¹⁶ and all the saints who are with them. Salute one another with an holy kiss. The churches of Christ salute you.¹⁷ Now I beseech you, brethren, mark those who cause divisions and offences, contrary to the doctrine, which¹⁸ you have learned, and avoid them. For they serve not our Lord Jesus Christ, but their own bellies, and by good words and fair speeches, insinuating themselves,¹⁹ deceive well-meaning, simple men. Your conversion and ready compliance with the doctrine of the gospel, when it was brought to you, is known in the world, and generally talked of: I am glad, for your sakes, that you so forwardly obeyed the gospel. But give me leave to advise you to be wise and cautious in preserving yourselves steady in what is wise and good; but employ no thought, or skill, how to circumvent, or injure another: be in this regard²⁰ very plain and simple. For God, who is the giver and lover of peace, will soon rid you of these ministers of Satan, the disturbers of your peace, who make divisions amongst you. The grace of our Lord Jesus Christ be with you. Amen.

²¹ Timothy, my work-fellow, and Lucius and Jason,²² and Sosipater, my kinsmen, salute you. I Tertius, who wrote this epistle, salute you in the Lord.²³ Gaius mine host, and of the whole church, saluteth you. Erastus, the chamberlain of the city, saluteth²⁴ you; and Quartus, a brother. The grace of our Lord Jesus Christ be with you all. Amen.

²⁵ Now, to him that is able to settle and establish you in an adherence to my gospel, and to that which I deliver, concerning Jesus Christ, in my preaching, conformable to the revelation of the mystery,²⁶ which lay unexplained in the secular times; But now is laid open, and, by the writings of the prophets, made known (according to the commandment of the everlasting God) to the gentiles of all nations, for the bringing them in, to the obedience of the law²⁷ of faith. To the only wise God be glory, through Jesus Christ, for ever. Amen.

A PARAPHRASE AND NOTES ON THE EPISTLE OF ST. PAUL TO THE EPHESIANS.

THE EPISTLE OF ST. PAUL TO THE EPHESIANS; WRIT IN THE
YEAR OF OUR LORD 63, OF NERO IX.

SYNOPSIS.

Our Saviour had, so openly and expressly, declared, to his disciples, the destruction of the temple, that they could, by no means, doubt of it; nor of this consequence of it, viz. that the ἔθνη, customs or rites of the mosaical law, as they are called, Acts vi. 14, and xxi. 21, were to cease with it. And this St. Stephen, by what is laid to his charge, Acts vi. 13, 14, seems to have taught. And upon this ground it might very well be, that the apostles and church of Jerusalem required no more of the convert gentiles, than the observance of such things as were sufficient to satisfy the jews, that they were not still heathens and idolaters. But, as for the rest of the mosaical rites, they required not the convert gentiles (to whom the mosaical law was not given) to observe them. This being a very natural and obvious consequence, which they could not but see, that if by the destruction of the temple and worship of the jews, those rites were speedily to be taken away, they were not observances necessary to the people of God, and of perpetual obligation. Thus far, it is plain, the other apostles were instructed, and satisfied of the freedom of the gentile converts from complying with the ritual law. But, whether it was revealed to them, with the same clearness as it was to St. Paul, that the jews too, as well as the gentiles, who were converted to the christian faith, were discharged from their former obligation to the ritual law of Moses, and freed from those observances, may be doubted: because, as we see, they had not at all instructed their converts of the circumcision, of their being set at liberty from that yoke; which, it is very likely, they would not have forborn to have done, if they had been convinced of it themselves. For, in all that discourse concerning this question, Acts xv. 1 — 21, there is not one syllable said, of the jews being discharged, by faith in the Messiah, from the observance of any of the mosaical rites. Nor does it appear, that the apostles of the circumcision ever

taught their disciples, or suggested to them, any such thing, which one can scarce imagine, they could have neglected, if it had been revealed to them, and so given them in charge. It is certain, their converts had never been taught any such thing. For St. James himself acquaints us, Acts xxi. 20, that the “many thousands, that believed, were all zealous of the law.” And what his own opinion of those rites, was, may be seen, ver. 24, where he calls keeping this part of the law, “walking orderly:” and he is concerned to have St. Paul thought a strict observer thereof. All which could not have been, if it had been revealed to him, as positively and expressly as it was to St. Paul, that all believers, in the Messiah, jews as well as gentiles, were absolved from the law of Moses, and were under no obligation to observe those ceremonies any longer, they being now no longer necessary to the people of God, in this his new kingdom, erected under the Messiah; nor indeed was it necessary, that this particular point should have been, from the beginning, revealed to the other apostles, who were sufficiently instructed for their mission, and the conversion of their brethren, the jews, by the Holy Ghost bringing to their minds (as was promised) all that our Saviour had said unto them, in his life-time here, amongst them, in the true sense of it. But the sending them to the jews with this message, that the law was abolished, was to cross the very design of sending them; it was to bespeak an aversion to their doctrine; and to stop the ears of the jews, and turn their hearts from them. But St. Paul, receiving his whole knowledge of the gospel, immediately from heaven, by revelation, seems to have this particular instruction added, to fit him for the mission he was chosen to, and make him an effectual messenger of the gospel, by furnishing him presently with this necessary truth, concerning the cessation of the law, the knowledge whereof could not but come in time to the other apostles, when it should be seasonable. Whether this be not so, I leave it to be considered.

This, at least, is certain, that St. Paul alone, more than all the rest of the apostles, was taken notice of to have preached, that the coming of Christ put an end to the law, and that, in the kingdom of God, erected under the Messiah, the observation of the law was neither required, nor availed aught; faith in Christ was the only condition of admittance, both for jew and gentile, all, who believed, being now equally the people of God, whether circumcised, or uncircumcised. This was that, which the jews, zealous of the law, which they took to be the irrevocable, unalterable charter of the people of God, and the standing rule of his kingdom, could by no means

bear. And therefore, provoked by this report of St. Paul, the jews, both converts as well as others, looked upon him as a dangerous innovator, and an enemy to the true religion, and, as such, seized on him in the temple, Acts xxi. upon occasion whereof it was, that he was a prisoner at Rome, when he writ this epistle, where he seems to be concerned, lest now, he, that was the apostle of the gentiles, from whom alone the doctrine of their exemption from the law had its rise and support, was in bonds, upon that very account, it might give an opportunity to those judaizing professors of christianity, who contended that the gentiles, unless they were circumcised after the manner of Moses, could not be saved, to unsettle the minds, and shake the faith of those, whom he had converted. This being the controversy, from whence rose the great trouble and danger that, in the time of our apostle, disturbed the churches collected from among the gentiles. That, which chiefly disquieted the minds, and shook the faith of those, who from heathenism were converted to christianity, was this doctrine, that, except the converts from paganism were circumcised, and thereby subjected themselves to the law and the jewish rites, they could have no benefit by the gospel, as may be seen all through the Acts, and in almost all St. Paul's epistles. Wherefore, when he heard that the ephesians stood firm in the faith, whereby he means their confidence of their title to the privileges and benefits of the gospel, without submission to the law (for the introducing the legal observances into the kingdom of the Messiah, he declared to be a subversion of the gospel, and contrary to the great and glorious design of that kingdom) he thanks God for them, and, setting forth the gracious and glorious design of God towards them, prays that they may be enlightened, so as to be able to see the mighty things done for them, and the immense advantages they receive by it. In all which he displays the glorious state of that kingdom, not in the ordinary way of argumentation and formal reasoning; which had no place in an epistle, writ as this is, all as it were in a rapture, and in a style far above the plain, didactical way; he pretends not to teach them any thing, but couches all, that he would drop into their minds, in thanksgivings and prayers, which affording a greater liberty and flight to his thoughts, he gives utterance to them, in noble and sublime expressions, suitable to the unsearchable wisdom and goodness of God, shown to the world in the work of redemption. This, though perhaps at first sight, it may render his meaning a little obscure, and his expressions the harder to be understood, yet, by the assistance of the two following epistles, which were

both writ, whilst he was in the same circumstances, upon the same occasion, and to the same purpose, the sense and doctrine of the apostle here may be so clearly seen, and so perfectly comprehended, that there can hardly be a doubt left about it, to any one, who will examine them diligently and carefully compare them together. The epistle to the colossians seems to be writ the very same time, in the same run and warmth of thoughts, so that the very same expressions, yet fresh in his mind, are repeated in many places; the form, phrase, matter, and all the parts quite through, of these two epistles do so perfectly correspond, that one cannot be mistaken, in thinking one of them very fit to give light to the other. And that to the philippians, writ also by St. Paul, during his bonds at Rome, when attentively looked into, will be found to have the same aim with the other two; so that, in these three epistles taken together, one may see the great design of the gospel laid down, as far surpassing the law, both in glory, greatness, comprehension, grace, and bounty, and therefore they were opposers, not promoters of the true doctrine of the gospel, and the kingdom of God under the Messiah, who would confine it to the narrow and beggarly elements of this world, as St. Paul calls the positive ordinances of the mosaical institution. To confirm the gentile churches, whom he had converted, in this faith which he had instructed them in, and keep them from submitting to the mosaical rites, in the kingdom of Christ, by giving them a nobler and more glorious view of the gospel, is the design of this and the two following epistles. For the better understanding these epistles, it might be worth while to show their harmony all through, but this synopsis is not a place for it; the following paraphrase and notes will give an opportunity to point out several passages wherein their agreement will appear.

The latter end of this epistle, according to St. Paul's usual method, contains practical directions and exhortations.

He that desires to inform himself in what is left upon record, in sacred scripture, concerning the church of the ephesians, which was the metropolis of Asia, strictly so called, may read the 19th and 20th of the Acts.

SECT. I.

CHAPTER I. 1, 2.

CONTENTS.

These two verses contain St. Paul's inscription, or introduction of this epistle; what there is in it remarkable for its difference, from what is to be found in his other epistles, we shall take notice of in the notes.

TEXT.

¹ Paul, an apostle of Jesus Christ, by the will of God, to the saints which are at Ephesus, and to the faithful in Christ Jesus:

² Grace be to you, and peace from God our Father, and from the Lord Jesus Christ.

PARAPHRASE.

¹ Paul, an apostle of Jesus Christ, by the declared will and special appointment of God, to the professors of the gospel, who are in Ephesus; converts, who² stand firm in the faith of Christ Jesus; Favour and peace be to you from God our Father, and the Lord Jesus Christ.

SECT. II.

CHAPTER I. 3 — 14.

CONTENTS.

In this section St. Paul thanks God for his grace and bounty to the gentiles, wherein he so sets forth both God's gracious purpose of bringing the gentiles into his kingdom under the Messiah, and his actual bestowing on them blessings of all kinds, in Jesus Christ, for a complete re-instating them in that his heavenly kingdom, that there could be nothing stronger suggested to make the ephesians, and other gentile converts, not to think any more of the law, and that much inferiour kingdom of his, established upon the mosaical institution, and adapted to a little canton of the earth, and a small tribe of men; as now necessary to be retained under this more spiritual institution, and celestial kingdom, erected under Jesus Christ, intended to comprehend men of all nations, and extend itself to the utmost bounds of the earth, for the greater honour of God, or, as St. Paul speaks, "to the praise of the glory of God."

TEXT.

³ Blessed be the God and Father of our Lord Jesus Christ, who hath blessed us with all spiritual blessings, in heavenly places, in Christ:

⁴ According as he hath chosen us in him, before the foundation of the world, that we should be holy, and without blame before him in love:

⁵ Having predestinated us unto the adoption of children, by Jesus Christ, to himself, according to the good pleasure of his will.

⁶ To the praise of the glory of his grace, wherein he hath made us accepted in the beloved.

⁷ In whom we have redemption through his blood, the forgiveness of sins according to the riches of his grace;

⁸ Wherein he hath abounded towards us in all wisdom and prudence,

⁹ Having made known unto us the mystery of his will, according to his good pleasure, which he hath purposed in himself:

¹⁰ That, in the dispensation of the fulness of times, he might gather together in one all things, in Christ, both which are in heaven, and which are on earth, even in him:

¹¹ In whom also we have obtained an inheritance, being predestinated according to the purpose of him, who worketh all things, after the counsel of his own will:

¹² That we should be to the praise of his glory, who first trusted in Christ.

¹³ In whom ye also trusted, after that ye heard the word of truth, the gospel of your salvation: in whom also after that ye believed, ye were sealed with that holy Spirit of promise.

¹⁴ Which is the earnest of our inheritance, until the redemption of the purchased possession, unto the praise of his glory.

PARAPHRASE.

³ Blessed and magnified be the God and Father of our Lord Jesus Christ, who has, in and by Jesus Christ, furnished us gentiles with all sorts of blessings, that may fit us to be partakers of his heavenly kingdom,⁴ without need of any assistance from the law, According as he chose us gentiles, upon Christ's account alone, before the law was, even before the foundation of the world, to be his people under Jesus the Messiah, and to live unblameable lives before him, in all love and affection, to all the saints, or believers,⁵ of what nation soever; Having predetermined to take us gentiles, by Jesus Christ, to be his sons and people, according to the good pleasure of

his⁶ will. To the end that the gentiles too might praise him for his grace and mercy to them, and all mankind magnify his glory for his abundant goodness to them, by receiving them freely into the kingdom of the Messiah, to be his people again, in a state of peace with him, barely for the sake of him, that is his ⁷ beloved: In whom we have redemption by his blood, viz. the forgiveness of transgressions, according to the⁸ greatness of his grace and favour, Which he has overflowed in towards us, in bestowing on us so full a knowledge and comprehension of the extent and design of the gospel, and prudence to comply with it,⁹ as it becomes you; In that he hath made known to you the good pleasure of his will and purpose, which was a mystery, that he hath purposed ¹⁰ in himself. Until the coming of the due time of that dispensation, wherein he hath predetermined to reduce all things again, both in heaven and¹¹ earth, under one head in Christ; In whom we became his possession and the lot of his inheritance, being predetermined thereunto, according to the purpose of him, who never fails to bring to pass¹² what he hath purposed within himself: That we of the gentiles, who first through Christ entertained hope, might bring praise and glory to God. ¹³ And ye, ephesians, are also, in Jesus Christ, become God's people and inheritance, having heard the word of truth, the good tidings of your salvation, and, having believed in him, have been sealed by the¹⁴ Holy Ghost; Which was promised, and is the pledge and evidence of being the people of God, his inheritance given out for the redemption of the purchased possession, that ye might also bring praise and glory to God.

SECT. III.

CHAPTER I. 15. — II. 10.

CONTENTS.

Having in the foregoing section thanked God for the great favours and mercies which, from the beginning, he had purposed for the gentiles, under the Messiah, in such a description of that design of the Almighty, as was fit to raise their thoughts above the law, and, as St. Paul calls them, beggarly elements of the jewish constitution, which was nothing in comparison of the great and glorious design of the gospel, taking notice of their standing firm in the faith he had taught them, and thanking God for it: he here, in this, prays God, that he would enlighten the minds of the ephesian converts, to

see fully the great things, that were actually done for them, and the glorious estate, they were in, under the gospel, of which, in this section, he gives such a draught, as in every part of it shows, that in the kingdom of Christ they are set far above the mosaical rites, and enjoy the spiritual and incomprehensible benefits of it, not by the tenure of a few outward ceremonies: but by their faith, alone, in Jesus Christ, to whom they are united, and of whom they are members, who is exalted to the top of all dignity, dominion, and power, and they with him, their head.

TEXT.

¹⁵ Wherefore I also, after I heard of your faith in the Lord Jesus, and love unto all the saints,

¹⁶ Cease not to give thanks for you, making mention of you in my prayers;

¹⁷ That the God of our Lord Jesus Christ, the father of glory, may give unto you the spirit of wisdom and revelation, in the knowledge of him:

¹⁸ The eyes of your understanding being enlightened; that ye may know what is the hope of his calling, and what the riches of the glory of his inheritance in the saints,

¹⁹ And what is the exceeding greatness of his power to us-ward who believe, according to the working of his mighty power;

²⁰ Which he wrought in Christ, when he raised him from the dead, and set him at his own right hand, in the heavenly places,

²¹ Far above all principality, and power, and might, and dominion, and every name that is named, not only in this world, but also in that which is to come.

²² And hath put all things under his feet, and gave him to be the head over all things to the church.

²³ Which is his body, the fulness of him that filleth all in all.

II. 1 And you hath he quickened who were dead in trespasses and sins,

² Wherein, in time past, ye walked, according to the course of this world, according to the prince of the power of the air, the spirit that now worketh in the children of disobedience.

³ Among whom also we all had our conversation in times past, in the lusts of our flesh, fulfilling the desires of the flesh, and of the mind; and were by nature the children of wrath, even as others.

⁴ But God, who is rich in mercy, for his great love wherewith he loved us,

⁵ Even when ye were dead in sins, hath quickened us together with Christ, (by grace ye are saved)

⁶ And hath raised us up together, and made us sit together in heavenly places, in Christ Jesus.

⁷ That, in the ages to come, he might show the exceeding riches of his grace, in his kindness towards us, through Christ Jesus.

⁸ For by grace are ye saved, through faith; and that not of yourselves: it is the gift of God:

⁹ Not of works, lest any man should boast:

¹⁰ For we are his workmanship, created in Christ Jesus unto good works, which God hath before ordained, that we should walk in them.

PARAPHRASE.

¹⁵ Wherefore, I also, here, in my confinement, having heard of the continuance of your faith in Christ Jesus, ¹⁶ and your love to all the saints, Cease not to give thanks for you, making mention of you in my prayers;¹⁷ That the God of our Lord Jesus Christ, the father of glory would endow your spirits, with wisdom and revelation, whereby you may know¹⁸ him; And enlighten the eyes of your understandings, that you may see what hope his calling you to be christians carries with it, and what an abundant glory it is to the saints to become his people, and¹⁹ the lot of his inheritance; And what an exceeding great power he has employed upon us who believe:²⁰ A power corresponding to that mighty power, which he exerted in the raising Christ from the dead, and in setting him next to himself, over all things, relating²¹ to his heavenly kingdom; Far above all principality, and power, and might, and dominion, and any other, either man or an angel, of greater dignity or excellency, that we may come to be acquainted with, or hear the names of, either in this²² world, or the world to come: And hath put all things in subjection to him; and him, invested with a power over all things, he hath constituted head of²³ the church, Which is his body, which is completed by him alone, from whom comes all, that gives any thing of excellency and perfection to any of the members of the church: where to be a jew, or a greek, circumcised, or uncircumcised, a barbarian, or a scythian,

a slave, or a freeman, matters not; but to be united to him, to partake of his influence and spirit, is all in all.

II. 1And you, being also dead in trespasses and sins, ² In which you gentiles, before you were converted to the gospel, walked, according to the state and constitution of this world, conforming yourselves to the will and pleasure of the prince of the power of the air, the spirit that now yet possesses³ and works in the children of disobedience. Of which number even we all having formerly been, lived in the lusts of our flesh, fulfilling the desires ⁴ thereof, and of our blinded perverted mind. But God, who is rich in mercy, through his great love,⁵ wherewith he loved us, Even us, gentiles, who were dead in trespasses, hath he quickened, together⁶ with Christ, (by grace ye are saved) And hath raised us up together with Christ, and made us partakers, in and with Jesus Christ, of the glory and power of his heavenly kingdom, which God has put into his ⁷ hands, and put under his rule: That, in the ages to come, he might show the exceeding riches of his grace, in his kindness towards us, through Christ⁸ Jesus. For by God's free grace it is, that ye are, through faith in Christ, saved and brought into the kingdom of God, and made his people, not by any thing you did yourselves to deserve it; it is the free gift of God, who might, if he had so pleased, with ⁹ justice have left you in that forlorn state. That no man might have any pretence of boasting of himself,¹⁰ or his own works, or merit. So that, in this new state in the kingdom of God, we are (and ought to look upon ourselves, as not deriving any thing from ourselves, but as) the mere workmanship of God, created in Christ Jesus, to the end we should do good works, for which he had prepared and fitted us, to live in them.

SECT. IV.

CHAPTER II. 11 — 22.

CONTENTS.

From this doctrine of his, in the foregoing section, that God of his free grace, according to his purpose from the beginning, had quickened and raised the convert gentiles, together with Christ, and seated them with Christ, in his heavenly kingdom; St. Paul here, in this section, draws this inference, to keep them from judaizing, that, though they (as was the state of the heathen word) were heretofore, by being uncircumcised, shut out

from the kingdom of God, strangers from the covenants of promise, without hope, and without God in the world; yet they were, by Christ, who had taken away the ceremonial law, that wall of partition, that kept them in that state of distance and opposition, now received, without any subjecting them to the law of Moses, to be the people of God, and had the same admittance into the kingdom of God, with the jews themselves, with whom they were now created into one new man, or body of men, so that they were no longer to look on themselves, any more, as aliens, or remoter from the kingdom of God, than the jews themselves.

TEXT.

¹¹ Wherefore, remember that ye being, in time past, gentiles in the flesh, who are called uncircumcision, by that which is called the circumcision in the flesh, made by hands;

¹² That, at that time, ye were without Christ, being aliens from the commonwealth of Israel, and strangers from the covenants of promise, having no hope, and without God in the world:

¹³ But now in Christ Jesus, ye, who sometimes were far off, are made nigh, by the blood of Christ.

¹⁴ For he is our peace, who hath made both one, and hath broken down the middle wall of partition between us;

¹⁵ Having abolished, in his flesh, the enmity, even the law of commandments, contained in ordinances, for to make in himself, of twain, one new man, so making peace;

¹⁶ And that he might reconcile both unto God, in one body, by the cross, having slain the enmity thereby:

¹⁷ And came and preached peace to you, which were afar off, and to them that were nigh.

¹⁸ For, through him, we both have access, by one Spirit, unto the Father.

¹⁹ Now, therefore, ye are no more strangers and foreigners, but fellow-citizens with the saints, and the household of God;

²⁰ And are built upon the foundation of the apostles and prophets, Jesus Christ himself being the chief corner-stone.

²¹ In whom all the building, fitly framed together, groweth unto an holy temple in the Lord:

²² In whom you, also, are builded together, for an habitation of God, through the Spirit.

PARAPHRASE.

¹¹ Wherefore remember, that ye, who were heretofore gentiles, distinguished and separated from the jews, who are circumcised by a circumcision made with hands, in their flesh, by your not being circumcised in your flesh, ¹² Were, at that time, without all knowledge of the Messiah, or any expectation of deliverance, or salvation, by him; aliens from the commonwealth of Israel, and strangers to the covenants of promise, not having any hope of any such thing, and living in the world without having the true God for your ¹³ God, or your being his people. But now you, that were formerly remote and at a distance, are, by Jesus ¹⁴ Christ, brought near by his death. For it is he, that reconcileth us ¶ to the jews, and hath brought us and them, who were before at an irreconcilable distance, into unity one with another, by removing the middle wall of partition, that kept us at a distance, ¹⁵ Having taken away the cause of enmity, or distance, between us, by abolishing that part of the law, which consisted in positive commands and ordinances, that so he might make, or frame the two, viz. jews and gentiles, into one new society, or body of God's people, in a new constitution, under himself, so making peace ¹⁶ between them; And might reconcile them both to God, being thus united into one body, in him, by the cross, whereby he destroyed that enmity, or incompatibility, that was between them, by nailing to his cross the law of ordinances, that kept them at a ¹⁷ distance: And, being come, preached the good tidings of peace to you gentiles that were far off from the kingdom of heaven, and to the jews, that were ¹⁸ near, and in the very precincts of it. For it is by him, that we, both jews and gentiles, have access ¹⁹ to the Father, by one and the same Spirit. Therefore ye, ephesians, though heretofore gentiles, now believers in Christ, you are no more strangers and foreigners, but without any more a-do fellow-citizens of the saints, and domestics of God's own family: ²⁰ Built upon the foundation laid by the apostles and prophets, whereof Jesus Christ is the corner-stone: ²¹ In whom all the building, fitly framed together, ²² groweth unto an holy temple in the Lord: In which even the gentiles, also are built up, together with the believing jews, for an habitation of God, through the Spirit.

SECT. V.

CHAPTER III. 1 — 21.

CONTENTS.

This section gives a great light to those foregoing, and more clearly opens the design of this epistle: for here St. Paul, in plain words, tells them it is for preaching this doctrine, that was a mystery till now, being hid from former ages, viz. that the gentiles should be coheirs, with the believing jews, and, making one body, or people, with them, should be equally partakers of the promises, under the Messiah, of which mystery he, by particular favour and appointment, was ordained the preacher. Whereupon he exhorts them not to be dismayed, or flinch, in the least, from the belief, or profession of this truth, upon his being persecuted and in bonds upon that account. For his suffering for it, who was the preacher and propagator of it, was so far from being a just discouragement to them, for standing firmly in the belief of it, that it ought to be to them a glory, and a confirmation of this eminent truth of the gospel, which he peculiarly taught: and thereupon he tells them, he makes it his prayer to God, that they might be strengthened herein, and be able to comprehend the largeness of the love of God in Christ, not confined to the jewish nation and constitution, as the jews conceited; but far surpassing the thoughts of those who, presuming themselves knowing, would confine it to such only, who were members of the jewish church, and observers of their ceremonies.

TEXT.

¹ For this cause, I Paul, the prisoner of Jesus Christ, for you gentiles:

² If ye have heard of the dispensation of the grace of God, which is given me to you-ward;

³ How that, by revelation, he made known unto me the mystery, (as I wrote afore in few words.

⁴ Whereby, when ye read, ye may understand my knowledge in the mystery of Christ)

⁵ Which in other ages was not made known unto the sons of men, as it is now revealed unto his holy apostles and prophets, by the Spirit;

⁶ That the gentiles should be fellow-heirs, and of the same body, and partakers of his promise, in Christ, by the gospel:

⁷ Whereof I was made a minister, according to the gift of the grace of God, given unto me, by the effectual working of his power.

⁸ Unto me, who am less than the least of all saints, is this grace given, that I should preach, among the gentiles, the unsearchable riches of Christ;

⁹ And to make all men see, what is the fellowship of the mystery, which, from the beginning of the world, hath been hid in God, who created all things by Jesus Christ:

¹⁰ To the intent that now unto the principalities and powers, in heavenly places, might be known by the church, the manifold wisdom of God,

¹¹ According to the eternal purpose, which he purposed, in Christ Jesus our Lord:

¹² In whom we have boldness and access with confidence, by the faith of him.

¹³ Wherefore, I desire that ye faint not at my tribulations for you, which is your glory.

¹⁴ For this cause, I bow my knees unto the father of our Lord Jesus Christ,

¹⁵ Of whom the whole family in heaven and earth is named.

¹⁶ That he would grant you, according to the riches of his glory, to be strengthened with might, by his spirit, in the inner man;

¹⁷ That Christ may dwell in your hearts by faith; that ye, being rooted and grounded in love,

¹⁸ May be able to comprehend with all saints, what is the breadth, and length, and depth, and height;

¹⁹ And to know the love of Christ, which passeth knowledge, that ye might be filled with all the fulness of God.

²⁰ Now unto him that is able to do exceeding abundantly, above all that we ask or think, according to the power that worketh in us.

²¹ Unto him be glory in the church by Christ Jesus throughout all ages, world without end. Amen.

PARAPHRASE.

¹ For my preaching of this, I Paul am a prisoner, upon account of the gospel of Jesus Christ, for the sake and service of you gentiles: Which you cannot

doubt of, since ye have heard of the dispensation of the grace of God, which was given to me,³ in reference to you gentiles: How that, by special revelation, he made known unto me, in particular, the mystery, (as I hinted to you above, viz. ⁴ chap. i. 9. By the bare reading whereof ye may be assured of my knowledge in this formerly concealed⁵ and unknown part of the gospel of Christ:) Which in former ages was not made known to the sons of men, as it is now revealed to his holy apostles and⁶ prophets, by the Spirit, viz. That the gentiles should be fellow heirs, be united into one body, and partake of his promise in Christ, jointly with the jews, in⁷ the time of the gospel; Of which doctrine I, in particular, was made the minister, according to the free and gracious gift of God, given unto me, by the effectual working of his power, in his so wonderful⁸ converting the gentiles by my preaching; Unto me, I say, who am less than the least of all saints, is this favour given, that I should preach among the⁹ gentiles the unsearchable riches of Christ: And make all men perceive, how this mystery comes now to be communicated to the world, which has been concealed from all past ages, lying hid in the secret purpose of God, who frames and manages this whole new creation, by Jesus Christ: ¹⁰ To the intent that now, under the gospel, the manifold wisdom of God, in the ordering and management of his heavenly kingdom, might be made known to principalities and powers by the church ¹¹ According to that pre-disposition of the ages, or several dispensations, which he made in Christ Jesus¹² our Lord; By whom we have boldness and access to God the father, with confidence, by faith in¹³ him. Wherefore my desire is, that ye be not dismayed by my present affliction, which I suffer for your sake, and is in truth a glory to you, that ought to raise your hearts, and strengthen your resolutions.¹⁴ Upon this account, I bend my knees, in¹⁵ prayer to the father of our Lord Jesus Christ, From whom the whole family, or lineage, both in heaven and earth have their denomination, viz. Jesus Christ, that is already in heaven, and believers that are still on earth, have all God for their father, are all the¹⁶ sons of God. That he would grant you, according to the great glory he designed to you, gentiles, who should receive the gospel under the Messiah, to be strengthened with might, by his spirit, in the inward¹⁷ man; That Christ may dwell in your hearts by faith; that you, being settled and established in the sense of the love of God to you, in Jesus Christ,¹⁸ May be able, together with all christians, to comprehend the length, and breadth, and height, and depth, of this mystery, of God's purpose of calling and taking in the

gentiles, to be his people, in the¹⁹ kingdom of his Son: And to understand the exceeding love of God, in bringing us to the knowledge of Christ: that you may be filled with that knowledge, and all other gifts, with God's plenty, or to that degree of fulness, which is suitable to his purpose of munificence and bounty towards you.²⁰ Now to him that worketh in us, by a power, whereby he is able to do, exceedingly beyond all²¹ that we can ask or think; Unto him be glory in the church by Christ Jesus, throughout all ages, world without end. Amen.

SECT. VI.

CHAPTER IV. 1 — 16.

CONTENTS.

St. Paul having concluded the special part of his epistle, with the foregoing chapter, he comes in this, as his manner is, to practical exhortations. He begins with unity, love, and concord, which he presses upon them, upon a consideration that he makes use of, in more of his epistles than one, i. e. their being all members of one and the same body, whereof Christ is the head.

TEXT.

¹ I therefore, the prisoner of the Lord, beseech you, that ye walk worthy of the vocation, wherewith ye are called.

² With all lowliness and meekness, with long-suffering, forbearing one another in love;

³ Endeavouring to keep the unity of the spirit, in the bond of peace.

⁴ There is one body, and one spirit, even as ye are called in one hope of your calling;

⁵ One Lord, one faith, one baptism.

⁶ One God and father of all, who is above all, and through all, and in you all.

⁷ But unto every one of us is given grace, according to the measure of the gift of Christ.

⁸ Wherefore he saith, when he ascended up on high, he led captivity captive, and gave gifts unto men.

⁹ (Now that he ascended, what is it, but that he also descended first, into the lower parts of the earth?

¹⁰ He that descended, is the same also, that ascended up, far above all heavens, that he might fill all things.)

¹¹ And he gave some, apostles: and some, prophets: and some, evangelists: and some, pastors and teachers;

¹² For the perfecting of the saints, for the work of the ministry, for the edifying of the body of Christ:

¹³ Till we all come in the unity of the faith, and of the knowledge of the Son of God, unto a perfect man, unto the measure of the stature of the fulness of Christ:

¹⁴ That we henceforth be no more children, tossed to and fro, and carried about by every wind of doctrine, by the sleight of men, and cunning craftiness, whereby they lie in wait to deceive:

¹⁵ But speaking the truth in love, may grow up into him, in all things, which is the head, even Christ:

¹⁶ From whom the whole body, fitly joined together, and compacted by that which every joint supplieth, according to the effectual working, in the measure of every part, maketh increase of the body unto the edifying of itself in love.

PARAPHRASE.

¹ I therefore, who am in bonds, upon account of the gospel, beseech you to walk worthy of the calling² wherewith ye are called, With lowliness and meekness, with long-suffering, bearing with one³ another in love; Taking care to preserve the unity⁴ of the spirit, in the bond of peace; Considering yourselves as being one body, enlivened and acted by one spirit, as also was your calling, in one⁵ hope: There is one Lord, one faith, one baptism,⁶ One God and father of you all, who is above all, in the midst amongst you all, and in every one of you.⁷ And to every one of us is made a free donation, according to that proportion of gifts, which Christ⁸ has allotted to every one. Wherefore the Psalmist saith, “When he ascended up on high, he led⁹ captivity captive, and gave gifts unto men.” (Now that he ascended, what is it, but that he descended¹⁰ first, into the lower parts of the earth? He, that descended, is the same also, that ascended above all heavens, that there, receiving the fulness of power,¹¹ he might be able to fill all his members.)

And therefore, he alone, framing the constitution of his new government, by his own power, and according to such a model, and such rules as he thought best, making some apostles, others evangelists, and others¹² pastors and teachers; Putting thus together, in a fit order and frame, the several members of his new collected people, that each, in its proper place and function, might contribute to the whole, and help to¹³ build up the body of Christ: Till all cementing together, in one faith, and knowledge of the Son of God, to the full state of a grown man, according to the measure of that stature, which is to make up the¹⁴ fulness of Christ: That we should be no longer children, tossed to and fro, and carried about with every wind of doctrine, by men versed in the sleights of cheating, and their cunning artifices, laid in train¹⁵ to deceive: But being steady in true and unfeigned love, should grow up into a firm union, in all things,¹⁶ with Christ, who is the head: From whom the whole body, fitly framed together, and compacted by that which every joint supplies, according to the proper force and function of each particular part, makes an increase of the whole body, building itself up in love, or a mutual concern of the parts.

SECT. VII.

CHAPTER IV. 17 — 24.

CONTENTS.

In this section, the apostle exhorts them wholly to forsake their former conversation, which they had passed their lives in, whilst they were gentiles, and to take up that, which became them, and was proper to them, now they were christians. Here we may see the heathen and christian state and conversation described, and set in opposition one to the other.

TEXT.

¹⁷ This I say, therefore, and testify in the Lord, that ye henceforth walk, not as other gentiles walk, in the vanity of their mind,

¹⁸ Having the understanding darkened, being alienated from the life of God, through the ignorance that is in them, because of the blindness of their heart:

¹⁹ Who being past feeling, have given themselves over unto lasciviousness, to work all uncleanness with greediness.

²⁰ But ye have not so learned Christ;

²¹ If so be, that ye have heard him, and have been taught by him, as the truth is in Jesus;

²² That ye put off, concerning the former conversation, the old man, which is corrupt, according to the deceitful lusts:

²³ And be renewed in the spirit of your mind;

²⁴ And that ye put on the new man, which, after God, is created in righteousness and true holiness.

PARAPHRASE.

¹⁷ This I say, therefore, and testify to you, from the Lord, that ye henceforth walk not as the unconverted gentiles walk, in the vanity of their minds.¹⁸ Having their understandings darkened, being alienated from that rule and course of life, which they own and observe, who are the professed subjects and servants of the true God, through the ignorance that is in them, because of the blindness of their hearts;¹⁹ Who, being past feeling, have given themselves over to lasciviousness, to the committing of all uncleanness, even beyond the bounds of natural desires.²⁰ But you that have been instructed in the religion of ²¹ Christ, have learned other things; If you have been scholars of his school, and have been taught the²² truth, as it is in the gospel of Jesus Christ: That you change your former conversation, abandoning those deceitful lusts, wherewith you were entirely²³ corrupted: And that, being renewed in the spirit of²⁴ the mind, You become new men, framed and fashioned according to the will of God, in righteousness and true holiness.

SECT. VIII.

CHAPTER IV. 25. — V. 2.

CONTENTS.

After the general exhortation, in the close of the foregoing section, to the ephesians, to renounce the old course of life they led, when they were heathens, and to become perfectly new men, conformed to the holy rules of

the gospel, St. Paul descends to particulars, and here, in this section, presses several particulars of those great social virtues, justice and charity, &c.

TEXT.

²⁵ Wherefore, putting away lying, speak every man truth with his neighbour: for we are members one of another.

²⁶ Be ye angry and sin not: let not the sun go down upon your wrath:

²⁷ Neither give place to the devil.

²⁸ Let him that stole, steal no more: but rather let him labour, working with his hands the thing which is good, that he may have to give to him that needeth.

²⁹ Let no corrupt communication proceed out of your mouth, but that which is good, to the use of edifying; that it may minister grace unto the hearers.

³⁰ And grieve not the Holy Spirit of God; whereby ye are sealed unto the day of redemption.

³¹ Let all bitterness, and wrath, and anger, and clamour, and evil-speaking, be put away from you, with all malice.

³² And be ye kind one to another, tender-hearted, forgiving one another, even as God for Christ's sake hath forgiven you.

V. 1 Be ye therefore followers of God, as dear children;

² And walk in love; as Christ also hath loved us, and hath given himself for us, an offering and a sacrifice to God, for a sweet-smelling savour.

PARAPHRASE.

²⁵ Wherefore, putting away lying, let every man speak truth to his neighbour; for we are members one of ²⁶ another. If you meet with provocations, that move you to anger, take care that you indulge it not so far, as to make it sinful: defer not its cure, till sleep calm the mind, but endeavour to recover yourself forthwith, and bring yourself into temper; ²⁷ Lest you give an opportunity to the devil, to produce ²⁸ some mischief, by your disorder. Let him that hath stole, steal no more, but rather let him labour in some honest calling that he may have even wherewithal ²⁹ to relieve others, that need it. Let not any filthy language, or a misbecoming word, come out of your mouths, but let your discourse be pertinent on the occasion, and tending to edification, and such as may have a becoming

gracefulness in the ears of³⁰ the hearers. And grieve not the Holy Spirit of God, whereby ye are sealed to the day of temptation. Let all bitterness, and wrath, and anger, and clamour, and evil-speaking, be put away from³² you, with all malice. And be ye kind one to another, tender-hearted, forgiving one another, even as V. 1 God, for Christ's sake, hath forgiven you. Therefore, as becomes children, that are beloved and cherished by God, propose him as an example to yourselves,² to be imitated; And let love conduct and influence your whole conversation, as Christ also hath loved us, and hath given himself for us, an offering and an acceptable sacrifice to God.

SECT. IX.

CHAPTER V. 3 — 20.

CONTENTS.

The next sort of sins he dehorts them from are those of intemperance, especially those of uncleanness, which were so familiar and so unrestrained among the heathens.

TEXT.

³ But fornication, and all uncleanness, or covetousness, let it not once be named amongst you, as becometh saints:

⁴ Neither filthiness, nor foolish talking, nor jesting, which are not convenient: but rather giving of thanks.

⁵ For this ye know, that no whoremonger, nor unclean person, nor covetous man, who is an idolater, have any inheritance in the kingdom of Christ, and of God.

⁶ Let no man deceive you with vain words: for, because of these things, cometh the wrath of God upon the children of disobedience.

⁷ Be not ye, therefore, partakers with them.

⁸ For ye were sometimes darkness, but now are ye light in the Lord: walk as children of light.

⁹ (For the fruit of the Spirit is in all goodness, and righteousness, and truth)

¹⁰ Proving what is acceptable unto the Lord.

¹¹ And have no fellowship with the unfruitful works of darkness, but rather reprove them.

¹² For it is a shame even to speak of those things which are done of them in secret.

¹³ But all things, that are reproved, are made manifest by the light: for whatsoever doth make manifest, is light.

¹⁴ Wherefore he saith, Awake thou that sleepest, and arise from the dead, and Christ shall give thee light.

¹⁵ See, then, that ye walk circumspectly; not as fools, but as wise;

¹⁶ Redeeming the time; because the days are evil.

¹⁷ Wherefore be ye not unwise, but understanding what the will of the Lord is.

¹⁸ And be not drunk with wine, wherein is excess; but be filled with the Spirit.

¹⁹ Speaking to yourselves in psalms, and hymns, and spiritual songs, singing and making melody in your heart to the Lord,

²⁰ Giving thanks always for all things, unto God and the Father, in the name of our Lord Jesus Christ.

PARAPHRASE.

³ But fornication and all uncleanness, or exorbitant desires in venereal matters, let it not be once named ⁴ amongst you, as becometh saints: Neither filthiness, nor foolish talking, nor pleasantry of discourse of this kind, which are none of them convenient, but rather⁵ giving of thanks. For this you are thoroughly instructed in, and acquainted with, that no fornicator, nor unclean person, nor lewd, lascivious libertine, in such matters, who is in truth an idolater, shall have⁶ any part in the kingdom of Christ, and of God. Let no man deceive you with vain, empty talk; these things in themselves are highly offensive to God, and are that which he will bring the heathen world (who will not come in, and submit to the law of Christ)⁷ to judgment for. Be ye not, therefore, partakers⁸ with them. For ye were heretofore, in your gentile state, perfectly in the dark, but now, by believing in Christ, and receiving the gospel, light and knowledge is given to you, walk as those who are⁹ in a state of light (For the fruit of the Spirit is in¹⁰ all goodness, righteousness, and truth) Practising that which, upon examination, you find acceptable¹¹ to the Lord. And do not partake in the fruitless works of

darkness; do not go on in the practice of those shameful actions, as if they were indifferent,¹² but rather reprove them. For the things, that the gentile idolaters¶ do in secret, are so filthy and abominable, that it is a shame so much as to name¹³ them. This you now see, which is an evidence of your being enlightened; for all things, that are discovered to be amiss, are made manifest by the light.¹⁴ Wherefore he saith, Awake thou that sleepest, and arise from the dead, and Christ shall give thee light; for whatsoever shows them to be such, is¹⁵ light. Since, then, you are in the light, make use of your eyes to walk exactly in the right way, not as fools, rambling at adventures, but as wise, in a¹⁶ steady, right-chosen course, Securing yourselves by your prudent carriage, from the inconveniencies of those difficult times, which threaten them with¹⁷ danger. Wherefore, be ye not unwise, but understanding¹⁸ what the will of the Lord is. And be not drunken with wine, wherein there is excess; seek not diversion in the noisy and intemperate jollity of drinking; but, when you are disposed to a chearful entertainment of one another, let it be with the gifts of the Holy Spirit, that you are filled with,¹⁹ Singing hymns, and psalms, and spiritual songs among yourselves; this makes real and solid mirth in the heart, and is melody well pleasing to God²⁰ himself; Giving thanks always, for all things, in the name of our Lord Jesus Christ, to God and the Father.

SECT. X.

CHAPTER V. 21. — VI. 9.

CONTENTS.

In this section he gives rules concerning the duties arising from the several relations men stand in one to another, in society; those which he particularly insists on, are these three, husbands and wives, parents and children, masters and servants.

TEXT.

²¹ Submitting yourselves one to another, in the fear of God.

²² Wives, submit yourselves unto your own husbands, as unto the Lord.

²³ For the husband is the head of the wife, even as Christ is the head of the church: and he is the Saviour of the body.

²⁴ Therefore, as the church is subject unto Christ, so let the wives be to their own husbands in every thing.

²⁵ Husbands, love your wives, even as Christ also loved the church, and gave himself for it:

²⁶ That he might sanctify and cleanse it, with the washing of water, by the word,

²⁷ That he might present it to himself a glorious church, not having spot, or wrinkle, or any such thing; but that it should be holy, and without blemish.

²⁸ So ought men to love their wives, as their own bodies: he that loveth his wife, loveth himself.

²⁹ For no man ever yet hated his own flesh; but nourisheth and cherisheth it, even as the Lord the church:

³⁰ For we are members of his body, of his flesh, and of his bones.

³¹ For this cause shall a man leave his father and mother, and shall be joined unto his wife, and they two shall be one flesh.

³² This is a great mystery: but I speak concerning Christ and the church.

³³ Nevertheless, let every one of you, in particular, so love his wife, even as himself; and the wife see that she reverence her husband.

VI. 1 Children, obey your parents in the Lord: for this is right.

² Honour thy father and mother, (which is the first commandment with promise)

³ That it may be well with thee, and thou mayest live long on the earth.

⁴ And ye, fathers, provoke not your children to wrath: but bring them up in the nurture and admonition of the Lord.

⁵ Servants, be obedient to them that are your masters, according to the flesh, with fear and trembling, in singleness of your heart, as unto Christ:

⁶ Not with eye-service, as men-pleasers; but as the servants of Christ, doing the will of God from the heart;

⁷ With good-will doing service, as to the Lord, and not to men:

⁸ Knowing that whatsoever good thing any man doth, the same shall he receive of the Lord, whether he be bond or free.

⁹ And ye masters, do the same things unto them, forbearing threatening: knowing that your Master also is in heaven, neither is there respect of persons with him.

PARAPHRASE.

²¹ Submit yourselves one to another, in the fear of²² God. As for example, wives, submit yourselves to your own husbands, or, as being members of the²³ church, you submit yourselves to the Lord. For the husband is the head of the wife, as Christ himself is the head of the church, and it is he, the head, that preserves that his body; so stands it between²⁴ man and wife. Therefore, as the church is subject to Christ, so let wives be to their husbands, in every ²⁵ thing. And, you husbands, do you, on your side, love your wives, even as Christ also loved the²⁶ church, and gave himself to death for it; That he might sanctify and fit it to himself, purifying it by the washing of baptism, joined with the preaching²⁷ and reception of the gospel; That so he himself might present it to himself an honourable spouse, without the least spot of uncleanness, or misbecoming feature, or any thing amiss; but that it might be holy, and without all manner of blemish.²⁸ So ought men to love their wives, as their own²⁹ bodies; he that loveth his wife, loveth himself. For no man ever hated his own flesh, but nourisheth and cherisheth it, even as the Lord Christ doth the³⁰ church: For we are members of his body, of his ³¹ flesh, and of his bones. For this cause shall a man leave his father and his mother, and shall be joined unto his wife, and they two shall be one flesh.³² These words contain a very mystical sense in them,³³ I mean in reference to Christ and the church. But laying that aside, their literal sense lays hold on you, and therefore do you husbands, every one of you in particular, so love his wife, as his own self, VI. 1 and let the wife reverence her husband. Children, obey your parents, performing it as required thereunto by our Lord Jesus Christ; for this is right² and conformable to that command, Honour thy father and mother, (which is the first command with³ promise) That it may be well with thee, and thou⁴ mayest be long-lived upon the earth. And on the other side, ye fathers, do not, by the austerity of your carriage, despise and discontent your children, but bring them up, under such a method of discipline, and give them such instruction, as is suitable to the⁵ gospel. Ye that are bondmen, be obedient to those who are your masters, according to the constitution of human affairs, with great respect and subjection, and with that sincerity of heart which should be⁶ used to Christ himself: Not with service only in those outward actions, that come under their observation; aiming at no more but the pleasing of men; but, as the servants of Christ, doing what⁷ God requires of you, from your very hearts; In this with good-will paying your duty to the Lord, and⁸ not unto men: Knowing that whatsoever good thing any one doth

to another, he shall be considered and rewarded for it by God, whether he be bond or free. ⁹ And ye masters, have the like regard and readiness to do good to your bond-slaves, forbearing the roughness even of unnecessary menaces, knowing that even you yourselves have a Master in heaven above, who will call you, as well as them, to an impartial account for your carriage one to another, for he is no respecter of persons.

SECT. XI.

CHAPTER VI. 10 — 20.

CONTENTS.

He concludes this epistle, with a general exhortation to them, to stand firm against the temptations of the devil, in the exercise of christian virtues and graces, which he proposes to them, as so many pieces of christian armour fit to arm them cap-a-pee, and preserve them in the conflict.

TEXT.

¹⁰ Finally, my brethren, be strong in the Lord, and in the power of his might.

¹¹ Put on the whole armour of God, that ye may be able to stand against the wiles of the devil.

¹² For we wrestle not against flesh and blood, but against principalities, against powers, against the rulers of the darkness of this world, against spiritual wickedness in high places.

¹³ Wherefore, take unto you the whole armour of God, that ye may be able to withstand in the evil day, and having done all, to stand.

¹⁴ Stand therefore, having your loins girt about with truth, and having on the breast-plate of righteousness;

¹⁵ And your feet shod with the preparation of the gospel of peace;

¹⁶ Above all, taking the shield of faith, wherewith ye shall be able to quench all the fiery darts of the wicked.

¹⁷ And take the helmet of salvation, and the sword of the spirit, which is the word of God:

¹⁸ Praying always with all prayer and supplication in the spirit, and watching thereunto, with all perseverance, and supplication, for all saints:

¹⁹ And for me, that utterance may be given unto me, that I may open my mouth boldly, to make known the mystery of the gospel:

²⁰ For which I am an ambassador in bonds: that therein I may speak boldly, as I ought to speak.

PARAPHRASE.

¹⁰ Finally, my brethren, go on resolutely in the profession of the gospel, in reliance upon that power, and in the exercise of that strength, which is¹¹ ready for your support, in Jesus Christ; Putting on the whole armour of God, that ye may be¹² able to resist all the attacks of the devil: For our conflict is not barely with men, but with principalities, and with powers, with the rulers of the darkness, that is in men, in the present constitution of the world, and the spiritual managers of the opposition¹³ to the kingdom of God. Wherefore, take unto yourselves the whole armour of God, that you may be able to make resistance in the evil day, when you shall be attacked, and, having acquitted yourselves in every thing as you ought, to stand¹⁴ and keep your ground: Stand fast, therefore, having your loins girt with truth; and having on the breastplate¹⁵ of righteousness; And your feet shod with a readiness to walk in the way of the gospel of peace,¹⁶ which you have well studied and considered. Above all taking the shield of faith, wherein you may receive, and so render ineffectual all the fiery darts of¹⁷ the wicked one, i. e. the devil. Take also the hopes of salvation for an helmet; and the sword of the¹⁸ spirit, which is the word of God: Praying, at all seasons, with all prayer and supplication in the spirit, attending and watching hereunto, with all perseverance, and supplication, for all the saints;¹⁹ And for me, in particular, that I may, with freedom and plainness of speech, preach the word, to the manifesting and laying open that part of the gospel, that concerns the calling of the gentiles, which has hitherto, as a mystery, lain concealed, and not been²⁰ at all understood. But I, as an ambassador, am sent to make known to the world, and am now in prison, upon that very account: but let your prayers be, that, in the discharge of this my commission, I may speak plainly and boldly, as an ambassador from God ought to speak.

SECT. XII.

CHAPTER VI. 21 — 24.

EPILOGUS.

TEXT.

²¹ But that ye also may know my affairs, and how I do, Tychicus, a beloved brother and faithful minister in the Lord, shall make known to you all things.

²² Whom I have sent unto you for the same purpose, that ye might know our affairs, and that he might comfort your hearts.

²³ Peace be to the brethren, and love, with faith, from God the Father, and the Lord Jesus Christ.

²⁴ Grace be with all them that love our Lord Jesus Christ in sincerity. Amen.

PARAPHRASE.

²¹ Tychicus, a beloved brother, and faithful minister of the Lord, in the work of the gospel, shall acquaint you how matters stand with me, and how I do, and give you a particular account how all things stand²² here. I have sent him, on purpose, to you, that you might know the state of our affairs, and that he²³ might comfort your hearts. Peace be to the brethren, and love, with faith, from God the Father,²⁴ and the Lord Jesus Christ. Grace be with all those that love our Lord Jesus Christ with sincerity.

SOME THOUGHTS ON THE CONDUCT OF THE UNDERSTANDING

Locke's *Of the Conduct of the Understanding* is composed as handbook for autodidacts, describing in detail how to think clearly and rationally. It complements *Some Thoughts Concerning Education*, which concerns how to educate children. The text was first published in 1706, two years after Locke's death, as part of Peter King's *Posthumous Works of John Locke*.

Quid tam temerarium tamque indignum sapientis gravitate atque constantia quam aut falsum sentire aut quod not satis explore perceptum sit et cognitum sine ulla dubitatione defendere ?

“What is so reckless and so unworthy of the earnest and unrelenting endeavour of the philosopher than either to hold a false opinion or to maintain unhesitatingly what has been accepted as knowledge without adequate observation and enquiry?”

CICERO, De Natura Deorum, Lib. I.

Introduction.

The last resort a man has recourse to in the conduct of himself is his understanding ; for though we distinguish the faculties of the mind and give the supreme command to the will as to an agent, yet the truth is, the man which is the agent determines himself to this or that voluntary action upon some precedent knowledge or appearance of knowledge in the understanding. No man ever sets himself about anything but upon some view or other which serves him for a reason for what he does ; and whatsoever faculties he employs, the understanding, with such light as it has, well or ill informed, constantly leads ; and by that light, true or false, all his operative powers are directed. The will itself, how absolute and uncontrollable however it may be thought, never fails in its obedience to the dictates of the understanding. Temples have their sacred images, and we see what influence they have always had over a great part of mankind. But in truth the ideas and images in men's minds are the invisible powers that constantly govern them, and to these they all universally pay a ready submission. It is therefore of the highest concernment that great care should be taken of the understanding to conduct it right in the search of knowledge and in the judgments it makes.

The logic now in use has so long possessed the chair, as the only art taught in the schools for the direction of the mind in the study of the arts and sciences, that it would perhaps be thought an affectation of novelty to suspect that rules that have served the learned world these two or three thousand years and which without any complaint of defects the learned have rested in are not sufficient to guide the understanding. And I should not doubt but this attempt would be censured as vanity or presumption did not the great Lord Verulam's authority justify it, who, not servilely thinking learning could not be advanced beyond what it was because for many ages it had not been, did not rest in the lazy approbation and applause of what was, because it was, but enlarged his mind to what might be. In his preface to his *Novum Organum* concerning logic he pronounces thus, *Qui summas dialecticae partes tribuerunt atque inde fidissima scientiis praesidia comparari putarunt, verissime et optime viderunt intellectum humanum sibi permissum merito suspectum esse debere. Verum infirmior omnino est malo medicina ; nec ipsa mali experts. Siquidem dialectica quae recepta est, licet ad civilia et artes quae in sermone et opinione positae sunt rectissime*

adhibeatur, naturae tamen subtilitatem longo intervallo non attingit ; et prensando quod non capit, ad errores potius stabiliendos et quasi figendos quam ad viam veritati aperiendam valuit. « They, » says he, « who attributed so much to logic perceived very well and truly that it was not safe to trust the understanding to itself without the guard of any rules. But the remedy reached not the evil but became a part of it ; for the logic which took place, though it might do well enough in civil affairs and the arts which consisted in talk and opinion, yet comes very far short of subtlety in the real performances of nature and, catching at what it cannot reach, has served to confirm and establish errors rather than to open a way to truth. » And therefore a little after he says, « That it is absolutely necessary that a better and perfected use and employment of the mind and understanding should be introduced. » Necessario requiritur ut melior et perfectior mentis et intellectus humani usus et adoperatio introducatur.

Parts.

There is, it is visible, great variety in men's understandings, and their natural constitutions put so wide a difference between some men in this respect that art and industry would never be able to master, and their very natures seem to want a foundation to raise on it that which other men easily attain unto. Amongst men of equal education there is great inequality of parts. And the woods of America, as well as the schools of Athens, produce men of several abilities in the same kind. Though this be so, yet I imagine most men come very short of what they might attain unto in their several degrees by a neglect of their understandings. A few rules of logic are thought sufficient in this case for those who pretend to the highest improvement, whereas I think there are a great many natural defects in the understanding capable of amendment which are overlooked and wholly neglected. And it is easy to perceive that men are guilty of a great many faults in the exercise and improvement of this faculty of the mind which hinder them in their progress and keep them in ignorance and error all their lives. Some of them I shall take notice of and endeavor to point out proper remedies for in the following discourse.

Reasoning.

Besides the want of determined ideas and of sagacity and exercise in finding out and laying in order intermediate ideas, there are three miscarriages that men are guilty of in reference to their reason, whereby this faculty is hindered in them from that service it might do and was designed for. And he that reflects upon the actions and discourses of mankind will find their defects in this kind very frequent and very observable.

(i) The first is of those who seldom reason at all, but do and think according to the example of others, whether parents, neighbors, ministers or who else they are pleased to make choice of to have an implicit faith in for the saving of themselves the pains and trouble of thinking and examining for themselves.

(ii) The second is of those who put passion in the place of reason and, being resolved that shall govern their actions and arguments, neither use their own nor hearken to other people's reason any further than it suits their humour, interest or party ; and these, one may observe, commonly content themselves with words which have no distinct ideas to them, though in other matters that they come with an unbiased indifference to they want not abilities to talk and hear reason, where they have no secret inclination that hinders them from being tractable to it.

(iii) The third sort is of those who readily and sincerely follow reason but, for want of having that which one may call large, sound, roundabout sense, have not a full view of all that relates to the question and may be of moment to decide it. We are all shortsighted and very often see but one side of a matter ; our views are not extended to all that has a connection with it. From this defect I think no man is free. We see but in part and we know but in part, and therefore it is no wonder we conclude not right from our partial views. This might instruct the proudest esteemer of his own parts how useful it is to talk and consult with others, even such as came short of him in capacity, quickness and penetration ; for since no one sees all and we generally have different prospects of the same thing according to our different, as I may say, positions to it, it is not incongruous to think nor beneath any man to try whether another may not have notions of things which have escaped him and which his reason would make use of if they came into his mind. The faculty of reasoning seldom or never deceives

those who trust to it ; its consequences from what it builds on are evident and certain ; but that which it oftenest, if not only, misleads us in is that the principles from which we conclude, the grounds upon which we bottom our reasoning are but a part ; something is left out which should go into the reckoning to make it just and exact. Here we may imagine a vast and almost infinite advantage that angels and separate spirits may have over us, who in their several degrees of elevation above us may be endowed with more comprehensive faculties and some of them perhaps have perfect and exact views of all finite beings that come under their consideration, can, as it were, in the twinkling of an eye collect together all their scattered and almost boundless relations. A mind so furnished, what reason has it to acquiesce in the certainty of its conclusions !

In this we may see the reason why some men of study and thought that reason right and are lovers of truth do make no great advances in their discoveries of it. Error and truth are uncertainly blended in their minds ; their decisions are lame and defective, and they are very often mistaken in their judgments ; the reason whereof is, they converse but with one sort of men, they read but one sort of books, they will not come in the hearing but of one sort of notions ; the truth is, they canton out to themselves a little Goshen in the intellectual world where light shines and, as they conclude, day blesses them ; but the rest of that vast expansion they give up to night and darkness and so avoid coming near it. They have a pretty tragic with known correspondents in some little creek ; within that they confine themselves and are dexterous managers enough of the wares and products of that corner with which they content themselves, but will not venture out into the great ocean of knowledge to surveys the riches that nature has stored other parts with, no less genuine, no less solid, no less useful than what has fallen to their lot in the admired plenty and sufficiency of their own little spot, which to them contains whatsoever is good in the universe. Those who live thus mewed up within their own contracted territories and will not look abroad beyond the boundaries that chance, conceit or laziness has set to their enquiries, but live separate from the notions, discourses and attainments of the rest of mankind, may not amiss be represented by the inhabitants of the Mariana Islands, which, being separate by a large tract of sea from all communion with the habitable parts of the earth, thought themselves the only people of the world. And though the straitness of the conveniences of life amongst them had never reached so far as to the use of

fire till the Spaniards, not many years since, in their voyages from Acapulco to Manilla brought it amongst them, yet in the want and ignorance of almost all things they looked upon themselves, even after that the Spaniards had brought amongst them the notice of variety of nations abounding in sciences, arts and conveniences of life of which they knew nothing, they looked upon themselves, I say, as the happiest and wisest people of the universe. But for all that, nobody, I think, will imagine them deep naturalists or solid metaphysicians ; nobody will deem the quickest sighted amongst them to have very enlarged views in ethics or politics ; nor can anyone allow the most capable amongst them to be advanced so far in his understanding as to have any other knowledge but of the few little things of his and the neighboring islands within his commerce, but far enough from that comprehensive enlargement of mind which adorns a soul devoted to truth, assisted with letters and a free consideration of the several views and sentiments of thinking men of all sides. Let not men therefore that would have a sight of what everyone pretends to be desirous to have a sight of, truth in its full extent, narrow and blind their own prospect. Let not men think there is no truth but in the sciences that they study or the books that they read. To prejudge other men's notions before we have looked into them is not to show their darkness but to put out our own eyes. « Try all things, hold fast that which is good » is a divine rule coming from the Father of light and truth ; and it is hard to know what other Bay men may come at truth, to lay hold of it, if they do not dig and search for it as for gold and hid treasure ; but he that does so must have much earth and rubbish before he gets the pure metal ; sand and pebbles and dross usually lie blended with it, but the gold is nevertheless gold and will enrich the man that employs his pains to seek and separate it. Neither is there any danger he should be deceived by the mixture. Every man carries about him a touchstone, if he will make use of it, to distinguish substantial gold from superficial glitterings, truth from appearances. And indeed the use and benefit of this touchstone, which is natural reason, is spoiled and lost only by assumed prejudices, overweening presumption and narrowing our minds. The want of exercising it in the full extent of things intelligible is that which weakens and extinguishes this noble faculty in us. Trace it and see whether it be not so. The day laborer in a country village has commonly but a small pittance of knowledge because his ideas and notions have been confined to the narrow bounds of a poor conversation and employment ; the low

mechanic of a country town does somewhat outdo him ; porters and cobblers of great cities surpass them. A country gentleman who, leaving Latin and learning in the university, removes thence to his mansion house and associates with neighbors of the same strain, who relish nothing but hunting and a bottle (...) with those alone he spends his time, with those alone he converses and can away with no company whose discourse goes beyond what claret and dissoluteness inspire. Such a patriot, formed in this happy way of improvement, cannot fail, as you see, to give notable decisions upon the bench at quarter sessions and eminent proofs of his skill in politics, when the strength of his purse and party have advanced him to a more conspicuous station. To such a one truly an ordinary coffee-house cleaner of the city is an errant statesman, and as much superior to, as a man conversant about Whitehall and the Court is to an ordinary shopkeeper. To carry this a little further, here is one muffled up in the zeal and infallibility of his own sect and will not touch a book or enter into debate with a person that will question any of those things which to him are sacred. Another surveys our differences in religion with an equitable and fair indifference, and so finds probably that none of them are in everything unexceptionable. These decisions and systems were made by men and carry the mark of fallible on them ; and in those whom he differs from, and till he opened his eyes had a general prejudice against, he meets with more to be said for a great many things than before he was aware of or could have imagined. Which of these two now is most likely to judge right in our religious controversies and to be most stored with truth, the mark all pretend to aim at ? All these men that I have instanced in, thus unequally furnished with truth and advanced in knowledge, I suppose of equal natural parts ; all the odds between them has been the different scope that has been given to their understandings to range in, for the gathering up of information and furnishing their heads with ideas, notions and observations whereon to employ their minds and form their understandings.

It will possibly be objected, Who is sufficient for all this ? I answer, more than can be imagined. Everyone knows what his proper business is and what, according to the character he makes of himself, the world may justly expect of him ; and to answer that, he will find he will have time and opportunity enough to furnish himself, if he will not deprive himself by a narrowness of spirit of those helps that are at hand. I do not say to be a good geographer that a man should visit every mountain, river, promontory and

creek ; upon the face of the earth, view the buildings and survey the land everywhere, as if he were going to make a purchase. But yet everyone must allow that he shall know a country better that makes often sallies into it and traverses it up and down than he that, like a mill-horse, goes still round in the same tract or keeps within the narrow bounds of a field or two that delight him. He that will enquire out the best books in every science and inform himself of the most material authors of the several sects of philosophy and religion, will not find it an infinite work to acquaint himself with the sentiments of mankind concerning the most weighty and comprehensive subjects. Let him exercise the freedom of his reason and understanding in such a latitude as this, and his mind will be strengthened, his capacity enlarged, his faculties improved ; and the light which the remote and scattered parts of truth will give to one another still so assist his judgment, that he will seldom be widely out or miss giving proof of a clear head and a comprehensive knowledge. At least, this is the only way I know to give the understanding its due improvement to the full extent of its capacity, and to distinguish the two most different things I know in the world, a logical chicaner from a man of reason. Only, he that would thus give the mind its flight and send abroad his enquiries into all parts after truth must be sure to settle in his head determined ideas of all that he employs his thoughts about, and never fail to judge himself and judge unbiasedly of all that he receives from others either in their writings or discourses. Reverence or prejudice must not be suffered to give beauty or deformity to any of their opinions.

Of practice and habits.

We are born with faculties and powers capable almost of anything, such at least as would carry us further than can be easily imagined ; but it is only the exercise of those powers which gives us ability and skill in anything and leads us towards perfection.

A middle-aged ploughman will scarce ever be brought to the carriage and language of a gentleman, though his body be as well proportioned and his joints as supple and his natural parts not any way inferior. The legs of a dancing-master and the fingers of a musician fall as it were naturally without thought or pains into regular and admirable motions. Bid them change their parts, and they will in vain endeavor to produce like motions in the members not used to them, and it will require length of time and long practice to attain but some degrees of a like ability. What incredible and astonishing actions do we find rope-dancers and tumblers bring their bodies to (...) in almost all manual arts are as wonderful, but I name those which the world takes notice of for such, because on that very account they give money to see them. All these admired motions beyond the reach and almost the conception of unpracticed spectators are nothing but the mere effects of use and industry in men whose bodies have nothing peculiar in them from those of the amazed lookers on.

As it is in the body, so it is in the mind ; practice makes it what it is, and most even of those excellences which are looked on as natural endowments will be found, when examined into more narrowly, to be the product of exercise and to be raised to that pitch only by repeated actions. Some men are remarked for pleasantness in raillery, others for apologues and apposite diverting stories. This is apt to be taken for the effect of pure nature, and that the rather, because it is not got by rules, and those who excel in either of them never purposely set themselves to the study of it as an art to be learnt. But yet it is true that at first some lucky hit, which took with somebody and gained him commendation, encouraged him to try again, inclined his thoughts and endeavours that way, till at last he insensibly got a facility in it without perceiving how, and that is attributed wholly to nature which was much more the effect of use and practice. I do not deny that natural disposition may often give the first rise to it ; but that never carries a man far without use and exercise, and it is practice alone that brings the

powers of the mind as well as those of the body to their perfection. Many a good poetic vein is buried under a trade and never produces anything for want of improvement. We see the ways of discourse and reasoning are very different, even concerning the same matter, at Court and in the university. And he that will go but from Westminster Hall to the Exchange will find a different genius and turn in their ways of talking, and yet one cannot think that all whose lot fell in the City were born with different parts from those who were bred at the university or Inns of Court.

To what purpose all this but to show that the difference so observable in men's understandings and parts does not arise so much from their natural faculties as acquired habits. He would be laughed at that should go about to make a fine dancer out of a country hedger at past fifty ; and he will not have much better success who shall endeavor at that age to make a man reason well or speak handsomely who has never been used to it, though you should lay before him a collection of all the best precepts of logic or orators. Nobody is made anything by hearing of rules or laying them up in his memory ; practice must settle the habit of doing without reflecting on the rule, and you may as well hope to make a good painter or musician extempore by a lecture and instruction in the arts of music and painting as a coherent thinker or strict reasoner be a set of rules showing him wherein right reasoning consists.

This being so, that defects and weaknesses in men's understandings, as well as other faculties, come from want of a right use of their own minds, I am apt to think the fault is generally mislaid upon nature and there is often a complaint of want of parts when the fault lies in want of a due improvement of them. We see men frequently dexterous and sharp enough in making a bargain who, if you reason with them about matters of religion, appear perfectly stupid.

Ideas.

I will not here, in what relates to the right conduct and improvement of the understanding, repeat again the getting clear and determined ideas and the employing our thoughts rather about them than about sounds put for them, nor of settling the signification of words which we use with ourselves in the search of truth or Pith others in discoursing about it. Those hindrances of our understandings in the pursuit of knowledge I have sufficiently enlarged upon in another place , so that nothing more needs here to be said of those matters.

Principles.

There is another fault that stops or misleads men in their knowledge, Which I have also spoken something of but yet is necessary to mention here again, that we may examine it to the bottom and see the root it springs from, and that is a custom of taking up with principles that are not self-evident and very often not so much true. It is not unusual to see men rest their opinions upon foundations that have no more certainty nor solidity than the propositions built on them and embraced for their sake. Such foundations are these and the like, viz. : the founders or leaders of my party are good men and therefore their tenets are true ; it is the opinion of a sect that is erroneous, therefore it is false ; it has been long received in the world, therefore it is true ; or it is new, and therefore false.

These and mans the like, which are by no means the measures of truth and falsehood, the generality of men make the standards by which they accustom their understanding to judge. And thus they falling into a habit of determining of truth and falsehood by such wrong measures, it is no wonder they should embrace error for certainty and be very positive in things they have no ground for.

There is not any who pretends to the least reason but, when any of these his false maxims are brought to the test, must acknowledge them to be fallible and such as he will not allow in those that differ from him ; and yet after he is convinced of this you shall see him go on in the use of them and the very next occasion that offers argue again upon the same grounds. Would one not be ready to think that men are willing to impose upon themselves and mislead their own understanding who conduct them by such wrong measures even after they see they cannot be relied on ? But yet they will not appear so blameable as may be thought at first sight ; for I think there are a great many that argue thus in earnest and do it not to impose on themselves or others. They are persuaded of what they say and think there is weight in it, though in a like case they have been convinced there is none ; but men would be intolerable to themselves and contemptible to others, if they should embrace opinions without any ground and hold what they could give no manner of reason for. True or false, solid or sandy, the mind must have some foundation to rest itself upon, and, as I have remarked in another place, it no sooner entertains any proposition but it presently hastens to

some hypothesis to bottom it on ; till then it is unquiet and unsettled. So much do our own very tempers dispose us to a right use of our understandings, if we would follow as we should the inclinations of our nature.

In some matters of concernment, especially those of religion, men are not permitted to be always wavering and uncertain ; they must embrace and profess some tenets or other ; and it would be a shame, nay a contradiction, too heavy for anyone's mind to lie constantly under, for him to pretend seriously to be persuaded of the truth of any religion and yet not to be able to give any reason of one's belief or to say anything for his preference of this to any other opinion. And therefore they must make use of some principles or other, and those can be no other than such as they have and can manage ; and to say they are not in earnest persuaded by them and do not rest upon those they make use of. is contrary to experience and to allege that they are not misled when we complain they are.

If this be so, it will be urged, why then do they not rather make use of sure and unquestionable principles rather than rest on such grounds as may deceive them and will, as is visible, serve to support error as well as truth ?

To this I answer, the reason why they do not make use of better and surer principles is because they cannot ; but this inability proceeds not from want of natural parts (for those few whose case that is are to be excused) but for want of use and exercise. Few men are from their youth accustomed to strict reasoning and to trace the dependence of any truth in a long train of consequences to its remote principles and to observe its connection ; and he that by frequent practice has not been used to this employment of his understanding, it is no more wonder that he should not, when he is grown into years, be able to bring his mind to it, than that he should not be on a sudden able to grave or design, dance on the ropes, or write a good hand who has never practiced either of them.

Nay, the most of men are so wholly strangers to this, that they do not so much as perceive their want of it. They dispatch the ordinary business of their callings by rote, as we say, as they have learnt it, and if at any time they miss success, they impute it to anything rather than want of thought or skill ; that they conclude (because they know no better) they have in perfection. Or if there be any subject that interest or fancy has recommended to their thoughts, their reasoning about it is still after their own fashion ; be it better or worse, it serves their turns and is the best they

are acquainted with ; and therefore when they are led by it into mistakes and their business succeeds accordingly, they impute it to any cross accident or default of others rather than to their own want of understanding ; that is what nobody discovers or complains of in himself. Whatsoever made his business to miscarry, it leas not want of right thought and judgment in himself ; he sees no such defect in himself, but is satisfied that he carries on his designs well enough by his own reasoning, or at least should have done, had it not been for unlucky traverses not in his power. Thus being content with this short and very imperfect use of his understanding, he never troubles himself to seek out methods of improving his mind, and lives all his life without any notion of close reasoning in a continued connection of a long train of consequences from sure foundations, such as is requisite for the making out and clearing most of the speculative truths most men own to believe and are most concerned in. Not to mention here what I shall have occasion to insist on by and by more fully, viz., that in many cases it is not one series of consequences will serve the turn, but manor different and opposite deductions must be examined and laid together before a man can come to make a right judgment of the point in question. What then can be expected from men that neither see the want of any such kind of reasoning as this nor, if they do, know they how to set about it or could perform it ? You may as well set a countryman who scarce knows the figures and never cast up a sum of three particulars to state a merchant's long account and find the true balance of it.

What then should be done in the case ? I answer, we should always remember what I said above, that the faculties of our souls are improved and made useful to us just after the same manner as our bodies are. Would you have a man write or paint, dance or fence well, or perform any other manual operation dexterously and with ease, let him have never so much vigor and activity, suppleness and address naturally, yet nobody expects this from him unless he has been used to it and has employed time and pains in fashioning and forming his hand or outward parts to these motions. Just so it is in the mind ; would you have a man reason well, you must use him to it betimes, exercise his mind in observing the connection of ideas and following them in train. Nothing does this better than mathematics, which therefore I think should be taught all those who have the time and opportunity, not so much to make them mathematicians as to make them reasonable creatures ; for though we all call ourselves so, because we are

born to it if we please, yet we may truly say nature gives us but the seeds of it ; we are born to be, if it please, rational creatures, but it is use and exercise only that makes us so, and we are indeed so no further than industry and application has carried us. And therefore in ways of reasoning which men have not been used to, he that will observe the conclusions they take up must be satisfied they are not all rational.

This has been the less taken notice of, because everyone in his private affairs uses some sort of reasoning or other, enough to denominate him reasonable. But the mistake is that he that is found reasonable in one thing is concluded to be so in all, and to think or say otherwise is thought so unjust an affront and so senseless a censure that nobody ventures to do it. It looks like the degradation of a man below the dignity of his nature. It is true, that he that reasons well in any one thing has a mind naturally capable of reasoning well in others, and to the same degree of strength and clearness, and possibly much greater, had his understanding been so employed. But it is as true that he who can reason well today about one sort of matters cannot at all reason today about others, though perhaps a year hence he may. But wherever a man's rational faculty fails him and will not serve him to reason, there we cannot say he is rational, how capable however he may be by time and exercise to become so.

Try in men of holy and mean education, who have never elevated their thoughts above the spade and the plough nor looked beyond the ordinary drudgery of a day-laborer. Take the thoughts of such an one, used for many years to one tract, out of that narrow compass he has been all his life confined to, you will find him no more capable of reasoning than almost a perfect natural. Some one or two rules on which their conclusions immediately depend you will find in most men have governed all their thoughts ; these, true or false, have been the maxims they have been guided by. Take these from them, and they are perfectly at a loss, their compass and polestar then are gone and their understanding is perfectly at a nonplus ; and therefore they either immediately return to their old maxims again as the foundations of all truth to them, notwithstanding all that can be said to show their weakness, or, if they give them up to their reasons, they with them give up all truth and further enquiry and think there is no such thing as certainty. For if you would enlarge their thoughts and settle them upon more remote and surer principles, they either cannot easily apprehend them, or, if

they can, know not what use to make of them ; for long deductions from remote principles is what they have not been used to and cannot manage.

What then, can grown men never be improved or enlarged in their understandings ? I say not so, but this I think I may say, that it will not be done without industry and application, which will require more time and pains than grown men, settled in their course of life, will allow to it, and therefore very seldom is done. And this very capacity of attaining it by use and exercise only brings us back to that which I laid down before, that it is only practice that improves our minds as well as bodies, and we must expect nothing from our understandings any further than they are perfected by habits.

The Americans are not all born with worse understandings than the Europeans, though we see none of them have such reaches in the arts and sciences. And among the children of a poor countryman the lucky chance of education and getting into the world gives one infinitely the superiority in parts over the rest, who, continuing at home, had continued also just of the same size with his brethren.

He that has to do with young scholars, especially in mathematics, may perceive how their minds open by degrees, and how it is exercise alone that opens them. Sometimes they would stick a long time at a part of a demonstration, not for want of will or application, but really for want of perceiving the connection of two ideas that, to one whose understanding is more exercised, is as visible as anything can be. The same would be with a grown man beginning to study mathematics ; the understanding, for want of use, often sticks in very plain way, and he himself that is so puzzled, when he comes to see the connection, wonders what it was he stuck at in a case so plain.

Mathematics.

I have mentioned mathematics as a way to settle in the mind a habit of reasoning closely and in train ; not that I think it necessary that all men should be deep mathematicians, but that having got the way of reasoning, which that study necessarily brings the mind to, they might be able to transfer it to other parts of knowledge as they shall have occasion. For in all sorts of reasoning every single argument should be managed as a mathematical demonstration ; the connection and dependence of ideas should be followed till the mind is brought to the source on which it bottoms and observes the coherence all along, though in proofs of probability one such train is not enough to settle the judgment as in demonstrative knowledge.

Where a truth is made out by one demonstration, there needs no further enquiry ; but in probabilities, where there wants demonstration to establish the truth beyond doubt, there it is not enough to trace one argument to its source and observe its strength and weakness, but all the arguments, after having been so examined on both sides, must be laid in balance one against another, and upon the whole the understanding determine its assent.

This is a way of reasoning the understanding should be accustomed to, which is so different from what the illiterate are used to that even learned men oftentimes seem to have very little or no notion of it. Nor is it to be wondered, since the way of disputing in the schools leads them quite away from it by insisting on one topical argument, by the success of which the truth or falsehood of the question is to be determined and victory adjudged to the opponent or defendant ; which is all one as if one should balance an account by one sum charged and discharged, when there are a hundred others to be taken into consideration.

This therefore it would be well if men's minds were accustomed to, and that early, that they might not erect their opinions upon one single view, when so many other are requisite to make up the account and must come into the reckoning before a man can form a right judgment. This would enlarge their minds and give a due freedom to their understandings, that they might not be led into error by presumption, laziness or precipitancy ; for I think nobody can approve such a conduct of the understanding as

should mislead it from truth, though it be never so much in fashion to make use of it.

To this perhaps it will be objected that to manage the understanding as I propose would require every man to be a scholar and to be furnished with all the materials of knowledge and exercised in all the ways of reasoning. To which I answer that it is a shame for those that have time and the means to attain knowledge to want any helps or assistance for the improvement of their understandings that are to be got, and to such I would be thought here chiefly to speak. Those, methinks, who by the industry and parts of their ancestors have been set free from a constant drudgery to their backs and their bellies, should bestow some of their spare time on their heads and open their minds by some trials and essays in all the sorts and matters of reasoning. I have before mentioned mathematics, wherein algebra gives new helps and views to the understanding. If I propose these, it is not, as I said, to make every man a thorough mathematician or a deep algebraist ; but yet I think the study of them is of infinite use even to grown men. First, by experimentally convincing them that to make anyone reason well it is not enough to have parts wherewith he is satisfied and that serve him well enough in his ordinary course. A man in those studies will see that, however good he may think his understanding, yet in many things, and those very visible, it may fail him. This would take off that presumption that most men have of themselves in this part ; and they would not be so apt to think their minds wanted no helps to enlarge them, that there could be nothing added to the acuteness and penetration of their understandings.

Secondly, the study of mathematics would show them the necessity there is in reasoning to separate all the distinct ideas and see the habitudes that all those concerned in the present enquiry have to one another, and to lay by those which relate not to the proposition in hand and wholly to leave them out of the reckoning. This is that which in other subjects besides quantity is what is absolutely requisite to just reasoning, though in them it is not so easily observed nor so carefully practiced. In those parts of knowledge where it is thought demonstration has nothing to do, men reason as it were in the lump ; and if, upon a summary and confused view or upon a partial consideration, they can raise the appearance of a probability, they usually rest content, especially if it be in a dispute where every little straw is laid hold on and everything that can but be drawn in any Bay to give colour to the argument is advanced with ostentation. But that mind is not in a posture

to find the truth that does not distinctly tally all the parts asunder and, omitting what is not at all to the point, draw a conclusion from the result of all the particulars which any way influence it. There is another no less useful habit to be got by an application to mathematical demonstrations, and that is of using the mind to a long train of consequences ; but having mentioned that already I shall not again here repeat it.

As to men whose fortunes and time is narrower, what may suffice them is not of that vast extent as may be imagined, and so comes not within the objection.

Nobody is under an obligation to know everything. Knowledge and science in general is the business only of those who are at ease and leisure. Those who have particular callings ought to understand them ; and it is no unreasonable proposal, nor impossible to be compassed, that they should think and reason right about what is their daily employment. This one cannot think them incapable of without leveling them with the brutes and charging them with a stupidity below the rank of rational creatures.

Religion.

Besides his particular calling for the support of his life, everyone has a concern in a future life which he is bound to look after. This engages his thoughts in religion ; and here it mightily lies upon him to understand and reason right. Men therefore cannot be excused from understanding the words and framing the general notions relating to religion right. The one day of seven, besides other days of rest, allows in the Christian world time enough for this (had they no other idle hours) if they would but make use of these vacancies from their daily labour and apply themselves to an improvement of knowledge with as much diligence as they often do to a great many other things that are useless, and had but those that would enter them according to their several capacities in a right way to this knowledge. The original make of their minds is like that of other men, and they would be found not to want understanding fit to receive the knowledge of religion, if they were a little encouraged and helped in it as they should be. For there are instances of very mean people who have raised their minds to a great sense and understanding of religion. And though these have not been so frequent as could be wished, yet they are enough to clear that condition of life from a necessity of gross ignorance and to show that more might be brought to be rational creatures and Christians (for they can hardly be thought really to be so who, wearing the name, know not so much as the very principles of that religion) if due care were taken of them. For, if I mistake not, the peasantry lately in France (a rank of people under a much heavier pressure of want and poverty than the day-laborers in England) of the reformed religion understood it much better and could say more for it than those of a higher condition among us.

But if it shall be concluded that the meaner sort of people must give themselves up to a brutish stupidity in the things of their nearest concernment, which I see no reason for, this excuses not those of a freer fortune and education, if they neglect their understandings and take no care to employ them as they ought and set them right in the knowledge of those things for which principally they were given them. At least those whose plentiful fortunes allow them the opportunities and helps of improvements are not so few but that it might be hoped great advancements might be made in knowledge of all kinds, especially in that of the greatest concern and

largest views, if men would make a right use of their faculties and study their own understandings.

Ideas.

Outward corporeal objects that constantly importune our senses and captivate our appetites fail not to fill our heads with lively and lasting ideas of that kind. Here the mind needs not be set upon getting greater store ; they offer themselves fast enough and are usually entertained in such plenty and lodged so carefully, that the mind wants room or attention for others that it has more use and need of. To fit the understanding therefore for such reasoning as I have been above speaking of, care should be taken to fill it with moral and more abstract ideas ; for these not offering themselves to the senses, but being to be framed to the understanding, people are generally so neglectful of a faculty they are apt to think wants nothing, that I fear most men's minds are more unfurnished with such ideas than is imagined. They often use the words, and how can they be suspected to want the ideas ? What I have said in the third book of my essay will excuse me from any other answer to this question. But to convince people of what moment it is to their understandings to be furnished with such abstract ideas steady and settled in it, give me leave to ask how anyone shall be able to know whether he be obliged to be just, if he has not established ideas in his mind of obligation and of justice, since knowledge consists in nothing but the perceived agreement or disagreement of those ideas ; and so of all others the like which concern our lives and manners. And if men do find a difficulty to see the agreement or disagreement of two angles which lie before their eyes, unalterable in a diagram, how utterly impossible will it be to perceive it in ideas that have no other sensible objects to represent them to the mind but sounds, with which they have no manner of conformity and therefore had need to be clearly settled in the mind themselves if we would make any clear judgment about them. This, therefore, is one of the first things the mind should be employed about in the right conduct of the understanding, without which it is impossible it should be capable of reasoning right about those matters. But in these and all other ideas care must be taken that they harbor no inconsistencies, and that they have a real existence where real existence is supposed and are not mere chimeras with a supposed existence.

Prejudice.

Everyone is forward to complain of the prejudices that mislead other men or parties, as if he were free and had none of his own. This being objected on all sides, it is agreed that it is a fault and a hindrance to knowledge. What now is the cure ? No other but this, that every man should let alone others' prejudices and examine his own. Nobody is convinced of his by the accusation of another ; he recriminates by the same rule and is clear. The only way to remove this great cause of ignorance and error out of the world is for everyone impartially to examine himself. If others will not deal fairly faith their own minds, does that make my errors truths, or ought it to make me in love with them and willing to impose on myself ? If others love cataracts on their eyes, should that hinder me from couching of mine as soon as I could ? Everyone declares against blindness, and yet who almost is not fond of that which dims his sight and keeps the clear light out of his mind, which should lead him into truth and knowledge ? False or doubtful positions, relied upon as unquestionable maxims, keep those in the dark from truth who build on them. Such are usually the prejudices imbibed from education, party, reverence, fashion, interest, etc. This is the mote which everyone sees in his brother's eye, but never regards the beam in his own. For who is there almost that is ever brought fairly to examine his own principles and see whether they are such as will bear the trial ? But yet this should be one of the first things everyone should set about and be scrupulous in, who would rightly conduct his understanding in the search of truth and knowledge.

To those who are willing to get rid of this great hindrance of knowledge (for to such only I write), to those who would shake off this great and dangerous impostor, prejudice, who dresses up falsehood in the likeness of truth and so dexterously hoodwinks men's minds as to keep them in the dark with a belief that they are more in the light than any that do not see with their eyes, I shall offer this one mark whereby prejudice may be known. He that is strongly of any opinion must suppose (unless he be self-condemned) that his persuasion is built upon good grounds, and that his assent is no greater than what the evidence of the truth he holds forces him to, and that they are arguments, and not inclination or fancy, that make him so confident and positive in his tenets. Now if, after all his profession, he

cannot bear any opposition to his opinion, if he cannot so much as give a patient hearing, much less examine and weigh the arguments on the other side, does he not plainly confess it is prejudice governs him and it is not the evidence of truth, but some lazy anticipation, some beloved presumption that he desires to rest undisturbed in ? For if what he holds be as he give out, well fenced with evidence, and he sees it to be true, what need he fear to put it to the proof ? If his opinion be settled upon a firm foundation, if the arguments that support it and have obtained his assent be clear, good and convincing, why should he be shy to have it tried whether they be proof or not ? He whose assent goes beyond his evidence owes this excess of his adherence only to prejudice and does, in effect, own it when he refuses to hear what is offered against it, declaring thereby that it is not evidence he seeks, but the quiet enjoyment of the opinion he is fond of, with a forward condemnation of all that may stand in opposition to it, unheard and unexamined ; which, what is it but prejudice ? Qui aequum statuerit parte inaudita altera, etiamsi aequum statuerit, haud aequus fuerit. He that would acquit himself in this case as a lover of truth, not giving way to any preoccupation or bias that may mislead him, must do two things that are not very common nor very easy.

Indifferency.

First, he must not be in love with any opinion or wish it to be true till he knows it to be so, and then he will not need to wish it. For nothing that is false can deserve our good wishes nor a desire that it should have the place and force of truth ; and yet nothing is more frequent than this. Often are fond of certain tenets upon no other evidence but respect and custom, and think they must maintain them or all is gone, though they have never examined the ground they stand on, nor have ever made them out to themselves or can make them out to others. We should contend earnestly for the truth, but we should first be sure that it is truth, or else we fight against God, who is the God of truth, and do the work of the devil, who is the father and propagator of lies ; and our zeal, though never so warm, will not excuse us ; for this is plainly prejudice.

Examine.

Secondly, he must do that which he will find himself very averse to, as judging the thing unnecessary or himself incapable of doing it. He must try whether his principles be certainly true or not, and how far he may safely rely upon them. This, whether fewer have the heart or the skill to do, I shall not determine ; but this I am sure, this is that which everyone ought to do who professes to love truth and would not impose upon himself (...) which is a surer way to be made a fool of than by being exposed to the sophistry of others. The disposition to put any cheat upon ourselves works constantly and we are pleased with it, but are impatient of being bantered or misled by others. The inability I here speak of is not any natural defect that makes men incapable of examining their own principles. To such, rules of conducting their understandings are useless, and that is the case of very few. The great number is of those whom the ill habit of never exerting their thoughts has disabled ; the powers of their minds are starved by disuse and have lost that reach and strength which nature fitted them to receive from exercise. Those who are in a condition to learn the first rules of plain arithmetic and could be brought to cast up an ordinary sum are capable of this, if they had but accustomed their minds to reasoning ; but they that have wholly neglected the exercise of their understandings in this way will be very far at first from being able to do it and as unfit for it as one unpracticed in figures to cast up a shop-book, and perhaps think it as strange to be set about it. And yet it must nevertheless be confessed to be a wrong use of our understandings to build our tenets (in things where we are concerned to hold the truth) upon principles that may lead us into error. We take our principles at haphazard upon trust and without ever having examined them, and then believe a whole system upon a presumption that they are true and solid. And what is all this but childish, shameful, senseless credulity ?

In these two things, viz., an equal indifference for all truth (I mean the receiving it in the love of it as truth, but not loving it for any other reason before we know it to be true) and in the examination of our principles and not receiving any for such nor building on them till we are fully convinced, as rational creatures, of their solidity, truth and certainty, consists that freedom of the understanding which is necessary to a rational creature and

without which it is not truly an understanding. It is conceit, fancy, extravagance, anything rather than understanding, if it must be under the constraint of receiving and holding opinions by the authority of anything but their own, not fancied but perceived, evidence. This was rightly called imposition, and is of all other the worst and most dangerous sort of it. For we impose upon ourselves, which is the strongest imposition of all others, and we impose upon ourselves in that part which ought with the greatest care to be kept free from all imposition. The world is apt to cast great blame on those who have an indifferency for opinions, especially in religion. I fear this is the foundation of great error and worse consequences. To be indifferent which of two opinions is true is the right temper of the mind that preserves it from being imposed on and disposes it to examine with that indifference till it has done its best to find the truth ;and this is the only direct and safe way to it. But to be indifferent whether we embrace falsehood for truth or no is the great road to error. Those who are not indifferent which opinion is true are guilty of this ; they suppose, without examining, that what they hold is true and then think they ought to be zealous for it. Those, it is plain by their warmth and eagerness, are not indifferent for their own opinions, but methinks are very indifferent whether they be true or false, since they cannot endure to have any doubts raised or objections made against them ; and it is visible they never have made any themselves, and so, never having examined them, know not nor are concerned, as they should be, to know whether they be true or false.

These are the common and most general miscarriages which I think men should avoid or rectify in a right conduct of their understandings, and should be particularly taken care of in education. The business whereof in respect of knowledge is not, as I think, to perfect a learner in all or any one of the sciences, but to give his mind that freedom, that disposition and those habits that may enable him to attain any part of knowledge he shall apply himself to or stand in need of in the future course of his life. This and this only is well principling, and not the instilling a reverence and veneration for certain dogmas under the specious title of principles, which are often so remote from that truth and evidence which belongs to principles, that they ought to be rejected as false and erroneous ; and is often the cause to men so educated, when they come abroad into the world and find they cannot maintain the principles so taken up and rested in, to cast off all principles and turn perfect skeptics, regardless of knowledge and virtue.

There are several weaknesses and defects in the understanding, either from the natural temper of the mind or ill habits taken up, which hinder it in its progress to knowledge. Of these there are as many possibly to be found, if the mind were thoroughly studied, as there are diseases of the body, each whereof clogs and disables the understanding to some degree and therefore deserves to be looked after and cured. I shall set down some few to excite men, especially those who make knowledge their business, to look into themselves and observe whether they do not indulge some weakness, allow some miscarriages in the management of their intellectual faculty, which is prejudicial to them in the search for truth.

Observation.

Particular matters of fact are the undoubted foundations on which our civil and natural knowledge is built ; the benefit the understanding makes of them is to draw from them conclusions which may be as standing rules of knowledge and consequently of practice. The mind often makes not that benefit it should of the information it receives from the accounts of civil or natural historians, in being too forward or too slow in making observations on the particular facts recorded in them. There are those who are very assiduous in reading and yet do not much advance their knowledge by it. They are delighted with the stories that are told and perhaps can tell them again, for they make all they read nothing but history to themselves ; but not reflecting on it, not making to themselves observations from what they read, they are very little improved by all that crowd of particulars that either pass through or lodge themselves in their understandings. They dream on in a constant course of reading and cramming themselves ; but, not digesting anything, it produces nothing but a heap of crudities. If their memories retain well, one may say they have the materials of knowledge, but, like those for building, they are of no advantage if there be no other use made of them but to let them lie heaped up together. Opposite to these there are others who lose the improvement they should make of matters of fact by a quite contrary conduct. They are apt to draw general conclusions and raise axioms from every particular they meet with. These make as little true benefit of history as the other, nay, being of forward and active spirits receive more harm by it ; it being of worse consequence to steer one's thoughts by a wrong rule than to have none at all, error doing to busy men much more harm than ignorance to the slow and sluggish. Between these, those seem to do best who, taking material and useful hints, sometimes from single matters of fact, carry them in their minds to be judged of by what they shall find in history to confirm or reverse these imperfect observations ; which may be established into rules fit to be relied on when they are justified by a sufficient and wary induction of particulars. He that makes no such reflections on what he reads only loads his mind with a rhapsody of tales fit in winter nights for the entertainment of others ; and he that will improve every matter of fact into a maxim will abound in contrary observations that can be of no other use but to perplex and puddle him if he

compares them ; or else to misguide him, if he gives himself up to the authority of that which, for its novelty or for some other fancy, best pleases him.

Bias.

Next to these we may place those who suffer their own natural tempers and passions they are possessed with to influence their judgments, especially of men and things that may any way relate to their present circumstances and interest. Truth is all simple, all pure, will bear no mixture of anything else with it. It is rigid and inflexible to any by-interests ; and so should the understanding be, whose use and excellency lies in conforming itself to it. To think of everything just as it is in itself is the proper business of the understanding, though it be not that which men always employ it to. This all men, at first hearing, allow is the right use everyone should make of his understanding. Nobody will be at such an open defiance with common sense as to profess that we should not endeavor to know and think of things as they are in themselves, and yet there is nothing more frequent than to do the contrary ; and men are apt to excuse themselves, and think they have reason to do so, if they have but a pretense that it is for God or a good cause, that is, in effect, for themselves, their own persuasion or party ; for those in their turns the several sects of men, especially in matters of religion, entitle God and a good cause. But God requires not men to wrong or misuse their faculties for him, nor to lie to others or themselves for his sake ; which they purposely do who will not suffer their understandings to have right conceptions of the things proposed to them and designedly restrain themselves from having just thoughts of everything, as far as they are concerned to enquire. And as for a good cause, that needs not such ill helps ; if it be good, truth will support it and it has no need of fallacy or falsehood.

Arguments.

Very much of kin to this is the hunting after arguments to make good one side of a question and wholly to neglect and refuse those which favor the other side. What is this but wilfully to misguide the understanding (and is so far from giving truth its due value that it wholly debases it), [to] espouse opinions that best comport with their porter, profit or credit and then seek arguments to support them ? Truth lighted upon this way is of no more avail to us than error ; for what is so taken up by us may be false as well as true, and he has not done his duty who has thus stumbled upon truth in his way to preferment.

There is another but more innocent way of collecting arguments, very familiar among bookish men, which is to furnish themselves with the arguments they meet with pro and con in the questions they study. This helps them not to judge right nor argue strongly, but only to talk copiously on either side, without being steady and settled in their own judgments ; for such arguments gathered from other men's thoughts, floating only in the memory, are there ready indeed to supply copious talk with some appearance of reason, but are far from helping us to judge right. Such variety of arguments only distract the understanding that relies on them, unless it has gone further than such a superficial way of examining ; this is to quit truth for appearance, only to serve our vanity. The sure and only way to get true knowledge is to form in our minds clear settled notions of things, with names annexed to those determined ideas. These we are to consider, and with their several relations and habitudes, and not to amuse ourselves with floating names and words of indetermined signification, which we can use in several senses to serve a turn. It is in the perception of the habitudes and respects our ideas have one to another that real knowledge consists ; and when a man once perceives how far they agree or disagree one with another, he will be able to judge of what other people say and will not need to be led by the arguments of others, which are many of them nothing but plausible sophistry. This will teach him to state the question right and see whereon it turns ; and thus he will stand upon his own legs and know by his own understanding. Whereas by collecting and learning arguments by heart he will be but a retainer to others ; and when anyone questions the

foundations they are built upon, he will be at a nonplus and be fain to give up his implicit knowledge.

Haste.

Labour for labour sake is against nature. The understanding, as well as all the other faculties, chooses always the shortest way to its end, would presently obtain the knowledge it is about and then set upon some new enquiry. But this whether laziness or haste often misleads it and makes it content itself with improper ways of search and such as will not serve the turn. Sometimes it rests upon testimony, when testimony of right has nothing to do, because it is easier to believe than to be scientifically instructed. Sometimes it contents itself with one argument and rests satisfied with that, as it were a demonstration ; whereas the thing under proof is not capable of demonstration and therefore must be submitted to the trial of probabilities, and all the material arguments pro and con be examined and brought to a balance. In some cases the mind is determined by probable topics in enquiries where demonstration may be had. All these and several others, which laziness, impatience, custom and want of use and attention lead men into, are misapplications of the understanding in the search of truth. In every question the nature and manner of the proof it is capable of should first be considered to make our enquiry such as it should be. This would save a great deal of frequently misemployed pains and lead us sooner to that discovery and possession of truth we are capable of. The multiplying variety of arguments, especially frivolous ones, such as are all that are merely verbal, is not only lost labour, but Numbers the memory to no purpose and serves only to hinder it from seizing and holding of the truth in all those cases which are capable of demonstration. In such a way of proof the truth and certainty is seen and the mind fully possesses itself of it ; when in the other way of assent it only hovers about it, is amused with uncertainties. In this superficial way indeed the mind is capable of more variety of plausible talk, but is not enlarged as it should be in its knowledge. It is to this same haste and impatience of the mind also that a not due tracing of the arguments to their true foundation is owing ; men see a little, presume a great deal, and so jump to the conclusion. This is a short way to fancy and conceit and (if firmly embraced) to opiniatrey, but is certainly the furthest way about to knowledge. For he that will know must, by the connection of the proofs, see the truth and the ground it stands on ; and therefore, if he has for haste skipped over what he should have examined,

he must begin and go over all again, or else he will never come to knowledge.

Desultory.

Another fault of as ill consequence as this, which proceeds also from laziness with a mixture of vanity, is the skipping from one sort of knowledge to another. Some men's tempers are quickly weary of any one thing. Constancy and assiduity is what they cannot bear ; the same study long continued in is as intolerable to them as the appearing long in the same clothes or fashion is to a Court lady.

Smattering.

Others, that they may seem universally knowing, get a little smattering in everything. Both these may fill their heads with superficial notions of things, but are very much out of the way of attaining truth or knowledge.

Universality.

I do not here speak against the taking a taste of every sort of knowledge ; it is certainly very useful and necessary to form the mind, but then it must be done in a different way and to a different end (...) not for talk and vanity to fill the head with shreds of all kinds, that he who is possessed of such a frippery may be able to match the discourses of all he shall meet with, as if nothing could come amiss to him and his head was so well a stored magazine that nothing could be proposed which he was not master of and was readily furnished to entertain anyone on. This is an excellency indeed, and a great one too, to have a real and true knowledge in all or most of the objects of contemplation. But it is what the mind of one and the same man can hardly attain unto ; and the instances are so few of those who have in any measure approached towards it, that I know not whether they are to be proposed as examples in the ordinary conduct of the understanding. For a man to understand fully the business of his particular calling in the commonwealth and of religion, which is his calling as he is a man in the world, is usually enough to take up his whole time ; and there are few that inform themselves in these, which is every man's proper and peculiar business, so to the bottom as they should do. But though this be so, and there are very few men that extend their thoughts towards universal knowledge, yet I do not doubt but, if the right way were taken and the methods of enquiry were ordered as they should be, men of little business and great leisure might go a great deal further in it than is usually done. To return to the business in hand, the end and use of a little insight in those parts of knowledge which are not a man's proper business is to accustom our minds to all sorts of ideas and the proper ways of examining their habitudes and relations. This gives the mind a freedom, and the exercising the understanding in the several ways of enquiry and reasoning which the most skillful have made use of teaches the mind sagacity and wariness and a suppleness to apply itself more closely and dexterously to the bents and turns of the matter in all its researches. Besides, this universal taste of all the sciences with an indifferency, before the mind is possessed with any one in particular and grown into love and admiration of what is made its darling, will prevent another evil very commonly to be observed in those who have from the beginning been seasoned only by one part of knowledge. Let a

man be given up to the contemplation of one sort of knowledge, and that will become everything. The mind will take such a tincture from a familiarity with that object, that everything else, how remote however, will be brought under the same view. A metaphysician will bring ploughing and gardening immediately to abstract notions ; the history of nature shall signify nothing to him. An alchemist, on the contrary, shall reduce divinity to the maxims of his laboratory, explain morality by sag sulfur and mercury and allegorize the Scripture itself and the sacred masteries thereof into the philosopher's stone. And I heard once a man who had a more than ordinary excellency in music seriously accommodate Moses' seven days of the first week to the notes of music, as if from thence had been taken the measure and method of the creation. It is of no small consequence to keep the mind from such a possession, which I think is best done by giving it a fair and equal view of the whole intellectual world, wherein it may see the order, rank and beauty of the whole, and give a just allowance to the distinct provinces of the several sciences in the due order and usefulness of each of them.

If this be that which old men will not think necessary nor be easily brought to, it is fit at least that it should be practiced in the breeding of the young. The business of education, as I have already observed, is not, as I think, to make them perfect in any one of the sciences, but so to open and dispose their minds as may best make them capable of any, when they shall apply themselves to it. If men are for a long time accustomed only to one sort or method of thoughts, their minds grow stiff in it and do not readily turn to another. It is therefore to give them this freedom that I think they should be made to look into all sorts of knowledge and exercise their understandings in so wide a variety and stock of knowledge. But I do not propose it as a variety and stock of knowledge, but a variety and freedom of thinking, as an increase of the powers and activity of the mind, not as an enlargement of its possessions.

Reading.

This is that which I think great readers are apt to be mistaken in. Those who have read of everything are thought to understand everything too ; but it is not always so. Reading furnishes the mind only with materials of knowledge ; it is thinking makes what we read ours. We are of the ruminating kind, and it is not enough to cram ourselves with a great load of collections ; unless we chew them over again, they will not give us strength and nourishment. There are indeed in some writers risible instances of deep thought, close and acute reasoning and ideas well pursued. The light these would give would be of great use, if their readers would observe and imitate them ; all the rest at best are but particulars fit to be turned into knowledge ; but that can be done only by our own meditation and examining the reach, force and coherence of what is said ; and then, as far as we apprehend and see the connection of ideas, so far it is ours ; without that it is but so much loose matter floating in our brain. The memory may be stored, but the judgment is little better and the stock of knowledge not increased by being able to repeat what others have said or produce the arguments we have found in them. Such a knowledge as this is but knowledge by hearsay, and the ostentation of it is at best but talking by rote, and very often upon weak and wrong principles. For all that is to be found in books is not built upon true foundations nor always rightly deduced from the principles it is pretended to be built on. Such an examen as is requisite to discover that, every reader's mind is not forward to make, especially in those who have given themselves up to a party and only hunt for what they can scrape together that may favor and support the tenets of it. Such men willfully exclude themselves from truth and from all true benefit to be received by reading. Others of more indifference often want attention and industry. The mind is backward in itself to be at the pains to trace every argument to its original and to see upon what basis it stands and how firmly ; but yet it is this that gives so much the advantage to one man more than another in reading. The mind should by severe rules be tied down to this at first uneasy task ; use and exercise will give it facility, so that those who are accustomed to it, readily, as it were with one cast of the eye, take a view of the argument and presently in most cases see where it bottoms. Those who have got this faculty, one may say, have got the true key of books and the clue to lead

them through the maze of variety of opinions and authors to truth and certainty. This young beginners should be entered in and showed the use of, that they might profit by their reading .Those who are strangers to it still be apt to think it too great a clog in the way of men's studies, and they will suspect they shall make but small progress if, in the books they read, they must stand to examine and unravel every argument and follow it step by step up to its original.

I answer, this is a good objection and ought to weigh with those whose reading is designed for much talk and little knowledge, and I have nothing to say to it. But I am here enquiring into the conduct of the understanding in its progress towards knowledge ; and to those who aim at that, I may say that he, who fair and softly goes steadily forward in a course that points right, will sooner be at his journey's end, than he that runs after everyone he meets, though he gallop all day full speed.

To which let me add that this way of thinking on and profiting by what we read will be a clog and rub to anyone only in the beginning ; when custom and exercise has made it familiar, it will be dispatched in most occasions without resting or interruption in the course of our reading. The motions and views of a mind exercised that way are wonderfully quick ; and a man used to such sort of reflections sees as much at one glimpse as would require a long discourse to lay before another and make out in an entire and gradual deduction. Besides that, when the first difficulties are over, the delight and sensible advantage it brings mightily encourages and enlivens the mind in reading, which without this is very improperly called study.

Intermediate principles.

As a help to this I think it may be proposed that, for the saving the long progression of the thoughts to remote and first principles in every case, the mind should provide itself several stages, that is to say, intermediate principles, which it might have recourse to in the examining those positions that come in its way. These, though they are not self-evident principles, yet, if they have been made out from them by a wary and unquestionable deduction, may be depended on as certain and infallible truths and serve as unquestionable truths to prove other points depending on them by a nearer and shorter view than remote and general maxims. These may serve as landmarks to show what lies in the direct way of truth or is quite besides it. And thus mathematicians do, who do not in every new problem run it back to the first axioms through all the whole train of intermediate propositions. Certain theorems that they have settled to themselves upon sure demonstration serve to resolve to them multitudes of propositions which depend on them and are as firmly made out from thence as if the mind went afresh over every link of the Whole chain that ties them to first self-evident principles. Only in other sciences great care is to be taken that they establish those intermediate principles with as much caution, exactness and indifferency as mathematicians use in the settling any of their great theorems. When this is not done, but men take up the principles in this or that science upon credit, inclination, interest, etc., in haste without due examination and most unquestionable proof, they lay a trap for themselves and as much as in them lies captivate their understandings to mistake, falsehood and error.

Partiality.

As there is a partiality to opinions, which, as we have already observed, is apt to mislead the understanding, so there is often a partiality to studies, which is prejudicial also to knowledge and improvement. Those sciences which men are particularly versed in they are apt to value and extol, as if that part of knowledge which everyone has acquainted himself with were that alone which was worth the having, and all the rest were idle and empty amusements, comparatively of no use or importance. This is the effect of ignorance and not knowledge, the being vainly puffed up with a flatulency arising from a weak and narrow comprehension. It is not amiss that everyone should relish the science that he has made his peculiar study ; a view of its beauties and a sense of its usefulness carries a man on with the more delight and warmth in the pursuit and improvement of it. But the contempt of all other knowledge, as if it were nothing in comparison of law or physic, of astronomy or chemistry, or perhaps some yet meaner part of knowledge wherein I have got some smattering or am somewhat advanced, is not only the mark of a vain or little mind, but does this prejudice in the conduct of the understanding, that it coops it up within narrow bounds and hinders it from looking abroad into other provinces of the intellectual world, more beautiful possibly, and more fruitful than that which it had till then labored in ; wherein it might find, besides new knowledge, ways or hints whereby it might be enabled the better to cultivate its own.

Theology.

There is indeed one science (as they are now distinguished) incomparably above all the rest, where it is not by corruption narrowed into a trade or faction for mean or ill ends and secular interests ; I mean theology, which, containing the knowledge of God and his creatures, our duty to him and our fellow creatures and a view of our present and future state, is the comprehension of all other knowledge directed to its true end, i.e., the honor and veneration of the Creator and the happiness of mankind. This is that noble study which is every man's duty and everyone that can be called a rational creature is capable of. The works of nature and the words of revelation display it to mankind in characters so large and visible, that those who are not quite blind may in them read and see the first principles and most necessary parts of it and from thence, as they have time and industry, may be enabled to go on to the more abstruse parts of it and penetrate into those infinite depths filled with the treasures of wisdom and knowledge. This is that science which would truly enlarge men's minds, were it studied or permitted to be studied everywhere with that freedom, love of truth and charity which it teaches, and were not made, contrary to its nature, the occasion of strife, faction, malignity and narrow impositions. I shall say no more here of this, but that it is undoubtedly a wrong use of my understanding to make it the rule and measure of another man's, a use which it is neither fit for nor capable of.

Partiality.

This partiality, where it is not permitted an authority to render all other studies insignificant or contemptible, is often indulged so far as to be relied upon and made use of in other parts of knowledge to which it does not at all belong and wherewith it has no manner of affinity. Some men have so used their heads to mathematical figures that, giving a preference to the methods of that science, they introduce lines and diagrams into their studies of divinity or politic[al] enquiries, as if nothing could be known without them ; and others, accustomed to retired speculations, run natural philosophy into metaphysical notions and the abstract generalities of logic ; and how often may one meet with religion and morality treated of in the terms of the laboratory and thought to be improved by the methods and notations of chemistry. But he that will take care of the conduct of his understanding to direct it right to the knowledge of things must avoid those undue mixtures and not, by a fondness for Chat he has found useful and necessary in one, transfer it to another science where it serves only to perplex and confound the understanding. It is a certain truth that *res nolunt male administrari* ; it is no less certain *res nolunt male intelligi*. Things themselves are to be considered as they are in themselves, and then they still show us in what way they are to be understood. For to have right conceptions about them we must bring our understandings to the inflexible natures and unalterable relations of things, and not endeavor to bring things to any preconceived notions of our own.

There is another partiality very commonly observable in men of study, no less prejudicial nor ridiculous than the former, and that is a fantastical and wild attributing all knowledge to the ancients alone or to the moderns. This raving upon antiquity in matter of poetry Horace has wittily described and exposed in one of his satyrs. The same sort of madness may be found in reference to all the other sciences. Some will not admit an opinion not authorized by men of old, who were then all giants in knowledge ; nothing is to be put into the treasury of truth or knowledge which has not the stamp of Greece or Rome upon it ; and since their days will scarce allow that men have been able to see, think or write. Others, with a like extravagancy, condemn all that the ancients have left us and, being taken with the modern inventions and discoveries, lay by all that went before, as if whatever is

called old must have the decay of time upon it and truth too were liable to mold and rottenness. Men, I think, have been much the same for natural endowments in all times. Fashion, discipline and education have put eminent differences in the ages of several countries and made one generation much differ from another in arts and sciences ; but truth is always the same ; time alters it not, nor is it the better or worse for being of ancient or modern tradition. Many were eminent in former ages of the world for their discovery and delivery of it ; but though the knowledge they have left us be worth our study, yet they exhausted not all its treasure ; they left a great deal for the industry and sagacity of after ages, and so shall we. That was once new to them which anyone now receives with veneration for its antiquity ; nor was it the worse for appearing as a novelty, and that Which is now embraced for its newness will, to posterity, be old but not thereby be less true or less genuine. There is no occasion on this account to oppose the ancients and the moderns to one another or to be squeamish on either side. He that wisely conducts his mind in the pursuit of knowledge will gather what lights and get what helps he can from either of them, from whom they are best to be had, without adoring the errors or rejecting the truths which he may find mingled in them.

Another partiality may be observed, in some to vulgar, in others to heterodox tenets. Some are apt to conclude that what is the common opinion cannot but be true ; so many men's eyes, they think, cannot but see right ; so many men's understandings of all sorts cannot be deceived ; and therefore [they] will not venture to look beyond the received notions of the place and age nor have so presumptuous a thought as to be wiser than their neighbors. They are content to go with the crowd, and so go easily, which they think is going right or at least serves them as well. But however *Vox populi vox Dei* has prevailed as a maxim, yet I do not remember wherever God delivered his oracles by the multitude or nature truths by the herd. On the other side, some fly all common opinions as either false or frivolous. The title of many-headed beast is a sufficient reason to them to conclude that no truths of weight or consequence can be lodged there. Vulgar opinions are suited to vulgar capacities and adapted to the ends of those that govern. He that will know the truth of things must leave the common and beaten tract, which none but weak and servile minds are satisfied to trudge along continually in. Such nice palates relish nothing but strange notions quite out of the way ; whatever is commonly received has the mark of the

beast on it, and they think it a lessening to them to hearken to it or receive it ; their mind runs only after paradoxes ; these they seek, these they embrace, these alone they vent, and so, as they think, distinguish themselves from the vulgar. But common or uncommon are not the marks to distinguish truth or falsehood and therefore should not be any bias to us in our enquiries. We should not judge of things by men's opinions, but of opinions by things. The multitude reason but ill, and therefore may be well suspected, and cannot be relied on, nor should be followed as a sure guide ; but philosophers who have quitted the orthodoxy of the community and the popular doctrines of their countries have fallen into as extravagant and as absurd opinions as ever common reception countenanced. It would be madness to refuse to breathe the common air or quench one's thirst with water because the rabble use them to these purposes ; and if there are conveniences of life which common use reaches not. it is not reason to reject them because they are not grown into the ordinary fashion of the country and every villager does not know them.

Truth, whether in or out of fashion, is the measure of knowledge and the business of the understanding ; whatsoever is besides that, however authorized by consent or recommended by rarity, is nothing but ignorance or something worse.

Another sort of partiality there is, whereby men impose upon themselves, and by it make their reading little useful to themselves ; I mean the making use of the opinions of writers, and laying stress upon their authorities, wherever they find them to favor their own opinions. There is nothing almost has done more harm to men dedicated to letters than giving the name of study to reading, and making a man of great reading to be the same with a man of great knowledge, or at least to be a title of honor. All that can be recorded in writing are only facts or reasonings. Facts are of three sorts :

1. Merely of natural agents, observable in the ordinary operations of bodies one upon another, whether in the visible course of things left to themselves, or in experiments made by men applying agents and patients to one another after a peculiar and artificial manner.
2. Of voluntary agents, more especially the actions of men in society, which makes civil and moral history.
3. Of opinions.

In these three consists, as it seems to me, that which commonly has the name of learning ; to which perhaps some may add a distinct head of critical

writings, which indeed at bottom is nothing but matter of fact and resolves itself into this, that such a man or set of men used such a word or phrase in such a sense, i.e. that they made such sounds the marks of such ideas. Under reasonings I comprehend all the discoveries of general truths made by human reason, whether found by intuition, demonstration or probable deductions. And this is that which is, if not alone knowledge (because the truth or probability of particular propositions may be known too), suet is, as may be supposed, most properly the business of those who pretend to improve their understandings and make themselves knowing by reading.

Books and reading are looked upon to be the great helps of the understanding and instruments of knowledge, as it must be allotted that they are ; and yet I beg leave to question whether these do not prove a hindrance to many and keep several bookish men from attaining to solid and true knowledge. This, I think, I may be permitted to say, that there is no part wherein the understanding needs a more careful and wary conduct than in the use of books ; without which they will prove rather innocent amusements than profitable employments of our time, and bring but small additions to our knowledge.

There is not seldom to be found, even amongst those who aim at knowledge, [those] Echo with an unwearied industry employ their whole time in books, who scarce allow themselves time to eat or sleep, but read and read and read on, but yet make no great advances in real knowledge, though there be no defect in their intellectual faculties, to which their little progress can be imputed. The mistake here is, that it is usually supposed that, by reading, the author's knowledge is transfused into the reader's understanding ; and so it is, but not by bare reading, but by reading and understanding what he writ. Thereby I mean, not barely comprehending what is affirmed or denied in each proposition (though that great readers do not always think themselves concerned precisely to do), but to see and follow the train of his reasonings, observe the strength and clearness of their connection and examine upon what they bottom. Without this, a man may read the discourses of a very rational author, writ in a language and in propositions that he very well understands, and yet acquire not one jot of his knowledge ; which consisting only in the perceived, certain, or probable connection of the ideas made use of in his reasonings, the reader's knowledge is no further increased than he perceives that, so much as he sees

of this connection, so much he knows of the truth or probability of that author's opinions.

All that he relies on without this perception he takes upon trust upon the author's credit without any knowledge of it at all. This makes me not at all wonder to see some men so abound in citations and build so much upon authorities, it being the sole foundation on which they bottom most of their own tenets : so that in effect they have but a second hand or implicit knowledge, i.e. are in the right if such an one from whom they borrowed it were in the right in that opinion which they took from him, Which indeed is no knowledge at all. Writers of this or former arts may be good witnesses of matters of fact which they deliver, which we may do well to take upon their authority ; but their credit can go no further than this ; it cannot at all affect the truth and falsehood of opinions, which have another sort of trial by reason and proof, which they themselves made use of to make themselves knowing, and so must others too that will partake in their knowledge. Indeed it is an advantage that they have been at the pains to find out the proofs and lay them in that order that may show the truth or probability of their conclusions ; and for this we owe them great acknowledgments for saving us the pains in searching out those proofs which they have collected for us and which possibly, after all our pains, we might not have found nor been able to set them in so good a light as that which they left them us in. Upon this account we are mightily beholding to judicious writers of all ages for those discoveries and discourses they have left behind them for our instruction, if we know how to make a right use of them ; which is not to run them over in a hasty perusal and perhaps lodge their opinions or some remarkable passages in our memories, but to enter into their reasonings, examine their proofs, and then judge of the truth or falsehood, probability or improbability of what they advance, not by any opinion we have entertained of the author, but by the evidence he produces and the conviction he affords us drawn from things themselves. Knowing is seeing, and, if it be so, it is madness to persuade ourselves that we do so be another man's eyes, let him use never so many words to tell us that what he asserts is very visible. Till we ourselves see it with our own eyes and perceive it by our own understandings, we are as much in the dark and as void of knowledge as before, let us believe any learned author as much as we will.

Euclid and Archimedes are allowed to be knowing and to have demonstrated what they say ; and yet, whosoever shall read over their

writings without perceiving the connection of their proofs, and seeing what they shew, though he may understand all their words, yet he is not the more knowing ; he may believe indeed but does not know what they say, and so is not advanced one jot in mathematical knowledge by all his reading of those approved mathematicians.

Haste.

The eagerness and strong bent of the mind after knowledge, if not warily regulated, is often a hindrance to it. It still presses into further discoveries and new objects and catches at the variety of knowledge, and therefore often stays not long enough on what is before it to look into it as it should, for haste to pursue what is yet out of sight. He that rides post through a country may be able from the transient view to tell how in general the parts lie, and may be able to give some loose description of here a mountain and there a plain, here a morass and there a river, woodland in one part and savannas in another. Such superficial ideas and observations as these he may collect in galloping over it. But the more useful observations of the soil, plants, animals and inhabitants with their several sorts and properties must necessarily escape him ; and it is seldom men ever discover the rich mines without some digging. Nature commonly lodges her treasure and jewels in rocky ground. If the matter be knotty and the sense lies deep, the mind must stop and buckle to it and stick upon it with labour and thought and close contemplation, and not leave it till it has mastered the difficulty and got possession of truth. But here care must be taken to avoid the other extreme : a man must not stick at every useless nicety and expect mysteries of science in every trivial question or scruple that he may raise. He that will stand to pick up and examine every pebble that comes in his way is as unlikely to return enriched and loaded with jewels as the other that traveled full speed. Truths are not the better nor the Worse for their obviousness or difficulty, but their value is to be measured by their usefulness and tendency. Insignificant observations should not take up any of our minutes, and those that enlarge our view and give light towards further and useful discoveries should not be neglected, though they stop our course and spend some of our time in a fixed attention.

There is another haste that does often and will mislead the mind, if it be left to itself and its own conduct. The understanding is naturally forward, not only to learn its knowledge by variety (which makes it skip over one to get speedily to another part of knowledge), but also eager to enlarge its views by running too fast into general observations and conclusions without a due examination of particulars enough whereon to found those general axioms. This seems to enlarge their stock, but it is of fancies not realities ;

such theories built upon narrow foundations stand but weakly, and, if they fall not of themselves, are at least very hardly to be supported against the assaults of opposition. And thus men, being too hasty to erect to themselves general notions and ill grounded theories, find themselves deceived in their stock of knowledge when they come to examine their hastily assumed maxims themselves or to have them attacked by others. General observations drawn from particulars are the jewels of knowledge, comprehending great store in a little room ; but they are therefore to be made with the greater care and caution, lest, if we take counterfeit for true, our loss and shame be the greater when our stock comes to a severe scrutiny. One or two particulars may suggest hints of enquiry, and they do well who take those hints ; but if they turn them into conclusions and make them presently general rules, they are forward indeed, but it is only to impose on themselves by propositions assumed for truths without sufficient warrant. To make such observations is, as has been already remarked, to make the head a magazine of materials which can hardly be called knowledge, or at least it is but like a collection of lumber not reduced to use or order ; and he that makes everything an observation has the same useless plenty and much more falsehood mixed with it. The extremes on both sides are to be avoided, and he will be able to give the best account of his studies who keeps his understanding in the right mean between them.

Anticipation.

Whether it be a love of that which brings the first light and information to their minds and want of vigor and industry to enquire, or else that men content themselves with any appearance of knowledge, right or wrong, which when they have once got they will hold fast, this is visible, that many men give themselves up to the first anticipations of their minds and are very tenacious of the opinions that first possess them. They are often as fond of their first conceptions as of their first born, and will by no means recede from the judgment they have once made or any conjecture or conceit which they have once entertained. This is a fault in the conduct of the understanding, since this firmness or rather stiffness of the mind is not from an adherence to truth but a submission to prejudice. It is an unreasonable homage paid to prepossession, whereby we show a reverence not to (what we pretend to seek) truth, but what by haphazard we chance to light one be it what it will. This is visibly a preposterous use of our faculties and is a downright prostituting of the mind to resign it thus and put it under the power of the first comer. This can never be allowed or ought to be followed as a right way to knowledge, till the understanding (whose business it is to conform itself to what it finds on the objects without) can by its own opiniatrety change that and make the unalterable nature of things comply with its own hasty determinations, which will never be. Whatever we fancy, things keep their course, and their habitudes, correspondences and relations keep the same to one another.

Resignation.

Contrary to these, but by a like dangerous excess on the other side, are those who always resign their judgment to the last man they heard or read. Truth never sinks into these men's minds nor gives any tincture to them, but, chameleon-like, they take the colour of what is laid before them and as soon lose and resign it to the next that happens to come in their way. The order wherein opinions are proposed or received by us is no rule of their rectitude nor ought to be a cause of their preference. First or last in this case is the effect of chance and not the measure of truth or falsehood. This everyone must confess and therefore should in the pursuit of truth keep his mind free from the influence of any such accidents. A man may as reasonably draw cuts for his tenets, regulate his persuasion by the cast of a die, as take it up for its novelty or retain it because it had his first assent and he was never of another mind. Well weighed reasons are to determine the judgment ; those the mind should be always ready to hearken and submit to and by their testimony and suffrage entertain or reject any tenet indifferently, whether it be a perfect stranger or an old acquaintance.

Practice.

Though the faculties of the mind are improved by exercise, yet they must not be put to a stress beyond their strength. Quid valeant humeri, quid ferre recusent must be made the measure of everyone's understanding who has a desire not only to perform well but to keep up the vigor of his faculties and not to balk his understanding by what is too hard for it. The mind, by being engaged in a task beyond its strength, like the body strained by lifting at a weight too heavy, has often its force broken and thereby gets an ineptness or an aversion to any vigorous attempt ever after. A sinew cracked seldom recovers its former strength, or at least the tenderness of the sprain remains a good while after and the memory of it longer, and leaves a lasting caution in the man not to put the part quickly again to any robust employment. So it fares in the mind once jaded by an attempt above its power ; it either is disabled for the future or else checks at any vigorous undertaking ever after, at least is very hardly brought to exert its force again on any subject that requires thought and meditation. The understanding should be brought to the difficult and knotty parts of knowledge, that try the strength of thought, and a full bent of the mind by insensible degrees ; and in such a gradual proceeding nothing is too hard for it. Nor let it be objected that such a slow progress will never reach the extent of some sciences. It is not to be imagined how far constancy will carry a man ; however, it is better walking slowly in a rugged way than to break a leg and be a cripple. He that begins with the calf may carry the ox ; but he that will at first go to take up an ox may so disable himself as not be able to lift a calf after that. When the mind by insensible degrees has brought itself to attention and close thinking, it will be able to cope with difficulties and master them without any prejudice to itself, and then it may go on roundly. Every abstruse problem, every intricate question will not baffle, discourage or break it. But though putting the mind unprepared upon an unusual stress that may discourage or damp it for the future ought to be avoided, yet this must not run it, by an over great shyness of difficulties, into a lazy sauntering about ordinary and obvious things that demand no thought or application. This debases and enervates the understanding, makes it weak and unfit for labour. This is a sort of hovering about the surface of things without any insight into them or penetration ; and when the mind has been once habituated to this lazy

recumbency and satisfaction on the obvious surface of things, it is in danger to rest satisfied there and go no deeper, since it cannot do it without pains and digging. He that has for some time accustomed himself to take up with what easily offers itself at first view, has reason to fear he shall never reconcile himself to the fatigue of turning and tumbling things in his mind to discover their more retired and more valuable secrets.

It is not strange that methods of learning which scholars have been accustomed to in their beginning and entrance upon the sciences should influence them all their lives and be settled in their minds by an over-ruling reverence, especially if they be such as universal use has established. Learners must at first be believers, and, their master's rules having once been made axioms to them, it is no wonder they should keep that dignity and by the authority they have once got mislead those who think it sufficient to excuse them if they go out of their way in a well beaten tract.

Words.

I have copiously enough spoken of the abuse of words in another place and therefore shall upon this reflection, that the sciences are full of them, warn those that would conduct their understandings right not to take any term, howsoever authorized by the language of the schools, to stand for any thing till they have an idea of it. A word may be of frequent use and great credit with several authors and be by them made use of as if it stood for some real being ; but Met, if he that reads cannot frame any distinct idea of that being, it is certain[ly] to him a mere empty sound without a meaning, and he learns no more by all that is said of it or attributed to it than if it were affirmed only of that bare empty sound. They who would advance in knowledge and not deceive and swell themselves with a little articulated air should lay down this as a fundamental rule, not to take words for things nor suppose that names in books signify real entities in nature till they can frame clear and distinct ideas of those entities. It will not perhaps be allowed if I should set down « substantial forms » and « intentional species » as such that may justly be suspected to be of this kind of insignificant terms. But this I am sure, to one that can form no determined ideas of what they stand for they signify nothing at all ; and all that he thinks he knows about them is to him so much knowledge about nothing and amounts at most but to a learned ignorance. It is not without all reason supposed that there are many such empty terms to be found in some learned writers, to which they had recourse to etch out their so stems where their understandings could not furnish them with conceptions from things. But yet I believe the supposing of some realities in nature answering those and the like words have much perplexed some and quite misled others in the study of nature. That which in any discourse signifies « I know not what » should be considered « I know not when. » Where men have any conceptions, they can, if they are never so abstruse or abstracted, explain them and the terms they use for them. For our conceptions being nothing but ideas, which are all made up of simple ones, if they cannot give us the ideas their words stand for, it is plain they have none. To what purpose can it be to hunt after his conceptions who has none or none distinct ? He that knew not what he himself meant by a learned term cannot make us know anything by his use of it, let us beat our heads about it never so long. Whether we are able to comprehend all the

operations of nature and the manners of them, it matters not to enquire ; but this is certain, that we can comprehend no more of them than we can distinctly conceive ; and therefore to obtrude terms where we have no distinct conceptions, as if they did contain or rather conceal something, is but an artifice of learned vanity to cover a defect in a hypothesis or our understandings. Words are not made to conceal, but to declare and show something ; where they are, by those who pretend to instruct, otherwise used, they conceal indeed something ; but that they conceal is nothing but the ignorance, error or sophistry of the talker, for there is, in truth, nothing else under them.

Wandering.

That there is constant succession and flux of ideas in our minds I have observed in the former part of this essay and everyone may take notice of it in himself. This I suppose may deserve some part of our care in the conduct of our understandings ; and I think it may be of great advantage if we can by use get that power over our minds as to be able to direct that train of ideas, that so, since there will new ones perpetually come into our thoughts by a constant succession, we may be able by choice so to direct them, that none may come into view but such as are pertinent to our present enquiry, and in such order as may be most useful to the discovery we are upon ; or at least, if some foreign and unsought ideas will offer themselves, that yet we might be able to reject them and keep them from taking off our minds from its present pursuit and hinder them from running away with our thoughts quite from the subject in hand. This is not, I suspect, so easy to be done as perhaps may be imagined ; and yet, for ought I know, this may be, if not the chief, yet one of the great differences that carry some men in their reasoning so far beyond others, where they seem to be naturally of equal parts. A proper and effectual remedy for this wandering of thoughts I would be glad to find. He that shall propose such a one would do great service to the studious and contemplative part of mankind and perhaps help unthinking men to become thinking. I must acknowledge that hitherto I have discovered no other way to keep our thoughts close to their business but the endeavoring as much as we can and by frequent attention and application getting the habit of attention and application. He that will observe children will find that, even when they endeavor their uttermost, they cannot keep their minds from straggling. The way to cure it, I am satisfied, is not angry chiding or beating for that presently fills their heads with all the ideas that fear, dread, or confusion can offer to them. To bring back gently their wandering thoughts by leading them into the path and going before them in the train they should pursue, without any rebuke or so much as taking notice (where it can be avoided) of their roving, I suppose would sooner reconcile and inure them to attention than all those rougher methods which more distract their thought and, hindering the application they would promote, introduce a contrary habit.

Distinction.

Distinction and division are (if I mistake not the import of the words) very different things, the one being the perception of a difference that nature has placed in things, the other our making a division where there is yet none. At least, if I may be permitted to consider them in this sense, I think I may say of them that one of them is the most necessary and conducive to true knowledge that can be, the other, when too much made use of, serves only to puzzle and confound the understanding. To observe every the least difference that is in things argues a quick and clear sight, and this keeps the understanding steady and right in its way to knowledge. But though it be useful to discern every variety [that] is to be found in nature, yet it is not convenient to consider every difference that is in things and divide them into distinct classes under every such difference. This will run us, if followed, into particulars (for every individual has something that differences it from another), and we shall be able to establish no general truths, or else at least shall be apt to perplex the mind about them. The collection of several things into several classes gives the mind more general and larger Viennese but we must take care to unite them only in that and so far as they do agree, for so far they may be united under the consideration. For entity itself that comprehend rational conceptions. If we would well sleigh and keep in our minds what it is we are considering, that would best instruct us when we should or should not branch into further distinctions, which are to be taken only from a due contemplation of things ; to which there is nothing more opposite than the art of verbal distinctions, made at pleasure in learned and arbitrarily invented terms, to be applied at a venture without comprehending or conceiving any distinct notions, and so altogether fitted to artificial talk or empty noise in dispute without any clearing of difficulties or advance in knowledge. Whatsoever subject we examine and Should get knowledge in lie should, I think, make as general and as large as it trill bear ; nor can there be any danger of this if the idea of it be settled and determined ; for if that be so, we shall easily distinguish it from any other idea, though comprehended under the same name. For it is to fence against the entanglements of equivocal words and the great art of sophistry which lies in them that distinctions have been multiplied and their use thought so necessary. But had every distinct abstract idea a distinct

known name, there would be little need of these multiplied scholastic distinctions, though there would be nevertheless as much need still of the mind's observing the differences that are in things and discriminating them thereby one from another. It is not therefore the right way to knots ledge to hunt after and fill the head with abundance of artificial and scholastic distinctions, wherewith learned men's writings are often filled ; and we sometimes find That they treat of so divided and subdivided that the mind of the most attentive reader loses the sight of it, as it is more than probable the writer himself did ; for in things crumbled into dust it is in vain to affect or pretend order or expect clearness. To avoid confusion by too few or too many divisions is a great skill in thinking as well as writing, which is but the copying our thoughts ; but what are the boundaries of the mean between the two vicious excesses on both hands, I think is hard to set down in words ; clear and distinct ideas is all that I yet know able to regulate it. But as to verbal distinctions received and applied to common terms, i.e. equivocal words, they are more properly, I think, the business of criticisms and dictionaries than of real knowledge and philosophy, since they for the most part explain the meaning of words and give us their several significations. The dexterous management of terms and being able to « fend » and « prove » with them I know has and does pass in the world for a great part of learning ; but it is learning distinct from knowledge, for knowledge consists only in perceiving the habitudes and relations of ideas one to another, which is done without words ; the intervention of a sound helps nothing to it. And hence we see that there is least use of distinctions where there is most knowledge ; I mean in mathematics, where men have determined ideas with known names to them ; and so, there being no room for equivocations, there is no need of distinctions. In arguing, the opponent uses as comprehensive and equivocal terms as he can, to involve his adversary in the doubtfulness of his expressions ; this is expected, and therefore the answerer on his side makes it his play to distinguish as much as he can and thinks he can never do it too much ; nor can he indeed in that way wherein victory may be had without truth and without knowledge. This seems to me to be the art of disputing. Use your words as cautiously as you can in your arguing on one side, and apply distinctions as much as you can on the other side to every term to nonplus your opponent ; so that in this sort of scholarship, there being no bounds set to distinguishing, some men have thought all acuteness to have lain in it ; and therefore in all they hale read or thought on, their

great business has been to amuse themselves with distinctions and multiply to themselves divisions, at least, more than the nature of the thing required. There seems to me, as I said, to be no other rule for this but a due and right consideration of things as they are in themselves. He that has settled in his mind determined ideas with names affixed to them will be able both to discern their differences one from another (which is really distinguishing) and, where the penury of words affords not terms answering every distinct idea, will be able to apply proper distinguishing terms to the comprehensive and equivocal names he is forced to make use of. This is all the need I know of distinguishing terms ; and in such verbal distinctions each term of the distinction, joined to that whose signification it distinguishes, is but a new distinct name for a distinct idea. Where they are so and men have clear and distinct conceptions that answer their verbal distinctions, they are right, and are pertinent as far as they serve to clear anything in the subject under consideration. And this is that which seems to me the proper and only measure of distinctions and divisions ; which he that will conduct his understanding right must not look for in the acuteness of invention nor the authority of writers, but will find only in the consideration of things themselves, whether they are led into it by their own meditations or the information of books.

An aptness to jumble things together wherein can be found any likeness is a fault in the understanding on the other side which will not fail to mislead it and, by thus lumping of things, hinder the mind from distinct and accurate conceptions of them.

Similes.

To which let me here add another near of kin to this, at least in name, and that is letting the mind upon the suggestion of any new notion run immediately after similes to make it the clearer to itself ; which, though it may be a good way and useful in the explaining our thoughts to others, yet it is by no means a right method to settle true notions of anything in ourselves, because similes always fail in some part and come short of that exactness which our conceptions should have to things, if we would think aright. This indeed makes men plausible talkers ; for those are always most acceptable in discourse who have the way to let in their thoughts into other men's minds with the greatest ease and facility whether those thoughts are well formed and correspond with things matters not ; few men care to be instructed but at an easy rate. They who in their discourse strike the fancy and take the hearers' conceptions along with them as fast as their words flow, are the applauded talkers and go for the only men of clear thoughts. Nothing contributes so much to this as similes, whereby men think this themselves understand better because they are the better understood. But it is one thing to think right and another thing to know the right way to lay our thoughts before others with advantage and clearness, be they right or wrong. Well chosen similes, metaphors and allegories, with method and order, do this the best of anything, because, being taken from objects already known and familiar to the understanding, they are conceived as fast as spoken ; and the correspondence being concluded, the thing they are brought to explain and elucidate is thought to be understood too. Thus fancy passes for knowledge, and what is prettily said is mistaken for solid. I say not this to decry metaphor, or with design to take away that ornament of speech ; my business here is not with rhetoricians and orators, but with philosophers and lovers of truth ; to whom I would beg leave to give this one rule whereby to try whether, in the application of their thoughts to anything for the improvement of their knowledge, they do in truth comprehend the matter before them really such as it is in itself. The way to discover this is to observe whether, in the laying it before themselves or others, they make use only of borrowed representations and ideas foreign to the thing, which are applied to it by way of accommodation, as bearing some proportion or imagined likeness to the subject under consideration.

Figured and metaphorical expressions do well to illustrate more abstruse and unfamiliar ideas which the mind is not yet thoroughly accustomed to ; but then they must be made use of to illustrate ideas that we already have, not to paint to us those which we yet have not. Such borrowed and allusive ideas may follow real and solid truth, to set it off when found, but must by no means be set in its place and taken for it. If all our search has yet reached no further than simile and metaphor, we may assure ourselves we rather fancy than know and are not yet penetrated into the inside and reality of the thing, be it what it will, but content ourselves with what our imaginations, not things themselves, furnish us with.

Assent.

In the whole conduct of the understanding there is nothing of more moment than to know when and where and how far to give assent, and possibly there is nothing harder. It is very easily said, and nobody questions it, that giving and withholding our assent, and the degrees of it, should be regulated by the evidence which things carry with them ; and yet we see men are not the better for this rule ; some firmly embrace doctrines upon slight grounds, some upon no grounds, and some contrary to appearance. Some admit of certainty and are not to be moved in what they hold ; others waver in everything, and there want not those that reject all as uncertain. What then shall a novice, an enquirer, a stranger do in the case ? I answer, use his eyes. There is a correspondence in things, and agreement and disagreement in ideas, discernible in very different degrees, and there are eyes in men to see them if they please, only their eyes may be dimmed or dazzled and the discerning sight in them impaired or lost. Interest and passion dazzle ; the custom of arguing on any side even against our persuasions, dims the understanding and makes it by degrees lose the faculty of discerning clearly between truth and falsehood, and so of adhering to the right side. It is not safe to play with error and dress it up to ourselves or others in the shape of truth. The mind by degrees loses its natural relish of real solid truth, is reconciled insensibly to anything that can but be dressed up into any faint appearance of it ; and if the fancy be allowed the place of judgement at first in sport, it afterwards comes by use to usurp it, and what is recommended by this flatterer (that studies but to please) is received for good. There are so many ways of fallacy, such arts of giving colors, appearances and resemblance's by this court-dresser, the fancy, that he who is not wary to admit nothing but truth itself, very careful not to make his mind subservient to anything else, cannot but be caught. He that has a mind to believe has half assented already ; and he that by often arguing against his own sense imposes falsehoods on others is not far from believing himself. This takes away the great distance there is betwixt truth and falsehood ; it brings them almost together and makes it no great odds, in things that approach so near, which you take ; and when things are brought to that pass, passion or interest, etc., easily and without being perceived determine which shall be the right.

Indifferency.

I have said above that we should keep a perfect indifference for all opinions, not wish any of them true or try to make them appear so, but, being indifferent, receive and embrace them according as evidence and that alone gives the attestation of truth. They that do thus, i.e. keep their minds indifferent to opinions, to be determined only by evidence, will always find the understanding has perception enough to distinguish between evidence or no evidence, betwixt plain and doubtful ; and if they neither give nor refuse their assent but by that measure, they will be safe in the opinions they have. Which being perhaps but few, this caution will have also this good in it, that it still put them upon considering and teach them the necessity of examining more than they do ; without which the mind is but a receptacle of inconsistencies, not the storehouse of truths. They that do not keep up this indifference in themselves for all but truth, not supposed, but evidenced in themselves, put colored spectacles before their eyes and look on things through false glasses, and then think themselves excused in following the false appearances which they themselves put upon them. I do not expect that by this way the assent should in everyone be proportioned to the grounds and clearness wherewith every truth is capable to be made out, or that men should be perfectly kept from error ; that is more than human nature can by any means be advanced to ; I aim at no such unattainable privilege ; I am only speaking of what they should do who would deal fairly with their own minds and make a right use of their faculties in the pursuit of truth ; we fail them a great deal more than they fail us. It is mismanagement more than want of abilities that men have reason to complain of and which they actually do complain of in those that differ from them. He that by an indifferency for all but truth suffers not his assent to go faster than his evidence, nor beyond it, will learn to examine and examine fairly instead of presuming, and nobody will be at a loss or in danger for want of embracing those truths which are necessary in his station and circumstances. In any other way but this all the world are born to orthodoxy ; they imbibe at first the allowed opinions of their country and parts, and so, never questioning their truth, not one of a hundred ever examines. They are applauded for presuming they are in the right. He that considers is a foe to orthodoxy, because possibly he may deviate from some of the received doctrines there.

And thus men without any industry or acquisition of their own inherit local truths (for it is not the same everywhere) and are inured to assent without evidence. This influences further than is thought ; for what one of a hundred of the zealous bigots in all parties ever examined the tenets he is so stiff in or ever thought it his business or duty so to do ? It is suspected of like warmth to suppose it necessary and a tendency to apostasy to go about it. And if a man can bring his mind once to be positive and fierce for positions whose evidence he has never once examined, and that in matters of greatest concernment to him, What shall keep him from this short and easy way of being in the right in cases of less moment ? Thus we are taught to clothe our minds as we do our bodies after the fashion in vogue, and it is accounted fantasticalness or something worse not to do so. This custom (which who dares oppose ?) makes the short-sighted bigots and the warier skeptics, as far as it prevails. And those that break from it are in danger of heresy ; for, taking the Whole world, how much of it does truth and orthodoxy possess together ? Though it is by the last alone (which has the good luck to be everywhere) that error and heresy are judged of ; for argument and evidence signify nothing in the case and excuse nowhere, but are sure to be borne down in all societies by the infallible orthodoxy of the place. Whether this be the way to truth and right assent, let the opinions that take place and prescribe in the several habitable parts of the earth declare. I never saw any reason yet why truth might not be trusted to its own evidence ; I am sure, if that be not able to support it, there is no fence against error, and then truth and falsehood are but names that stand for the same things. Evidence, therefore, is that by which alone every man is (and should be) taught to regulate his assent, who is then and then only in the right way when he follows it.

Men deficient in knowledge are usually in one of these three states : either wholly ignorant ; or as doubting of some proposition they have either embraced formerly or at present are inclined to ; or, lastly, they do with assurance hold and profess without ever having examined and being convinced by well-grounded arguments.

The first of these are in the best state of the three, by having their minds yet in their perfect freedom and indifferency, the likelier to pursue truth the better, having no bias yet clapped on to mislead them.

Section 35.

For ignorance with an indifference for truth is nearer to it than opinion with ungrounded inclination, which is the great source of error ; and they are more in danger to go out of the way who are marching under the conduct of a guide that it is a hundred to one will mislead them, than he that has not yet taken a step and is likelier to be prevailed on to enquire after the right way. The last of the three sorts are in the worst condition of all ; for if a man can be persuaded and fully assured of anything for a truth without having examined, what is there that he may not embrace for truth ? And if he has given himself up to believe a lie, what means is there left to recover one who can be assured without examining ? To the other two this I crave leave to say that, as he that is ignorant is in the best state of the trio, so he should pursue truth in a method suitable to that state, i.e. by enquiring directly into the nature of the thing itself without minding the opinions of others or troubling himself with their questions or disputes about it, but to see what he himself can, sincerely searching after truth, find out. He that proceeds upon others' principles in his enquiry into any sciences, though he be resolved to examine them and judge of them freely, does yet at least put himself on that side and post himself in a party which he will not quit till he be beaten out ; by which the mind is insensibly engaged to make what defense it can, and so is unawares biased. I do not say but a man should embrace some opinion when he has examined, else he examines to no purpose ; but the surest and safest way is to have no opinion at all till he has examined, and that without any the least regard to the opinions or systems of other men about it. For example, were it my business to understand physic, would not the safer and readier way be to consult nature herself and inform myself in the history of diseases and their cures, than, espousing the principles of the dogmatists, methodists or chemists, engage in all the disputes concerning either of those systems and suppose it true till I have tried what they can say to beat me out of it ? Or supposing that Hippocrates or any other book infallibly contains the whole art of physic, would not the direct way be to study, read and consider that book, weigh and compare the parts of it to find the truth, rather than espouse the doctrines of any party, who, though they acknowledge his authority, have already interpreted and withdrawn all his text to their own sense (...) the tincture whereof when I

have imbibed, I am more in danger to misunderstand his true meaning than if I had come to him with a mind unprepossessed by doctors and commentators of my sect, whose reasonings, interpretation and language, which I have been used to, will of course make all chime that way and make another, and perhaps the genuine, meaning of the author seem harsh, strained and uncouth to me. For words, having naturally none of their own, carry that signification to the hearer that he is used to put upon them, whatever be the sense of him that uses them. This, I think, is visibly so ; and if it be, he that begins to have any doubt of any of his tenets, which he received without examination, ought as much he can to put himself wholly into this state of ignorance in reference to that question and, throwing wholly by all his former notions and the opinions of others, examine with a perfect indifference the question in its source without any inclination to either side or any regard to his or others' unexamined opinions. This I own is no easy thing to do ; but I am not enquiring the easy way to opinion, but the right way to truth, which they must follow who will deal fairly with their own understandings and their own souls.

Question.

The indifference that I here propose will also enable them to state the question right which they are in doubt about, without which they can never come to a fair and clear decision of it.

Perseverance.

Another fruit from this indifferency and the considering things in themselves abstract from our own opinions and other men's notions and discourses on them will be that each man will pursue his thoughts in that method which will be most agreeable to the nature of the thing and to his apprehension of what it suggests to him ; in which he ought to proceed with regularity and constancy until he come to a well-grounded resolution wherein he may acquiesce. If it be objected that this will require every man to be a scholar and quit all his other business and betake himself wholly to study, I answer, I propose no more to anyone than he has time for. Some men's state and condition requires no great extent of knowledge ; the necessary provision for life swallows the greatest part of their time. But one man's want of leisure is no excuse for the oscitancy and ignorance of those who have time to spare ; and everyone has enough to get as much knowledge as is required and expected of him, and he that does not that is in love with ignorance and is accountable for it.

Presumption.

The variety of distempers in men's minds is as great as of those in their bodies ; some are epidemic, few escape them, and everyone too, if he would look into himself, would find some defect of his particular genius. There is scarce anyone without some idiosyncrasy that he suffers by. This man presumes upon his parts that they will not fail him at time of need, and so thinks it superfluous labour to make any provision beforehand. His understanding is to him like Fortunatus's purse, which is always to furnish him without ever putting anything into it beforehand ; and so he sits still satisfied without endeavoring to store his understanding with knowledge. It is the spontaneous product of the country, and what need of labour in tillage ? Such men may spread their native riches before the ignorant ; but they were best not come to stress and trial with the skillful. We are born ignorant of everything. The superficies of things that surround them make impressions on the negligent, but nobody penetrates into the inside without labour, attention and industry. Stones and timber grow of themselves, but yet there is no uniform pile with symmetry and convenience to lodge in without toil and pains. God has made the intellectual world harmonious and beautiful without us ; but it will never come into our heads all at once ; we must bring it home piecemeal and there set it up by our own industry, or else we shall have nothing but darkness and a chaos within, whatever order and light there be in things without us.

Despondency.

On the other side there are others that depress their own minds, despond at the first difficulty, and conclude that the getting an insight in any of the sciences or making any progress in knowledge further than serves their ordinary business is above their capacities. These sit still, because they think they have not legs to go, as the others I last mentioned do, because they think they have wings to fly and can soar on high when they please. To these latter one may for answer apply the proverb, « Use legs and have legs. » Nobody knows what strength of parts he has till he has tried them. And of the understanding one may most truly say that its force is greater generally than it thinks till it is put to it. *Viresque acquirit eundo.*

And therefore the proper remedy here is but to set the mind to work and apply the thoughts rigorously to the business ; for it holds in the struggles of the mind as in those of war, *Dum putant se vincere vicere.* A persuasion that we shall overcome any difficulties that we meet with in the sciences seldom fails to carry us through them. Nobody knows the strength of his mind and the force of steady and regular application till he has tried. This is certain, he that sets out upon weak legs will not only go further but grow stronger too than one who, with a vigorous constitution and firm limbs, only sits still.

Something of kin to this men may observe in themselves when the mind frights itself (as it often does) with anything reflected on in gross and transiently viewed confusedly and at a distance. Things thus offered to the mind carry the show of nothing but difficulty in them and are thought to be wrapped up in impenetrable obscurity. But the truth is, these are nothing but spectres that the understanding raises to itself to flatter its own laziness. It sees nothing distinctly in things remote and in a huddle, and therefore concludes too faintly that there is nothing more clear to be discovered in them. It is but to approach nearer, and that mist of our own raising that enveloped them will remove ; and those that in that mist appeared hideous giants not to be grappled with will be found to be of the ordinary and natural size and shape. Things that in a remote and confused view seem very obscure must be approached by gentle and regular steps, and what is most visible, easy and obvious in them first considered. Reduce them into their distinct parts, and then in their due order bring all that should be

known concerning every one of those parts into plain and simple questions ; and then what was thought obscure, perplexed and too hard for our weak parts will lay itself open to the understanding in a fair view and let the mind into that which before it was awed with and kept at a distance from as wholly mysterious. I appeal to my reader's experience whether this has never happened to him, especially when, busy on one thing, he has occasionally reflected on another. I ask him whether he has never thus been scared with a sudden opinion of mighty difficulties, which yet have vanished when he has seriously and methodically applied himself to the consideration of this seeming terrible subject ; and there has been no other matter of astonishment left, but that he amused himself with so discouraging a prospect of his own raising about a matter which in the handling was found to have nothing in it more strange nor intricate than several other things which he had long since and with ease mastered. This experience should teach us how to deal with such bugbears another time, which should rather serve to excite our vigor than enervate our industry. The surest way for a learner in this as in all other cases is not to advance by jumps and large strides ; let that which he sets himself to learn next be indeed the next, i.e. as nearly conjoined with what he knows already as is possible ; let it be distinct but not remote from it ; let it be new and what he did not know before, that the understanding must advance ; but let it be as little at once as may be, that its advances may be clear and sure. All the ground that it gets this way it will hold. This distinct gradual growth in knowledge is firm and sure ; it carries its own light with it in every step of its progression in any easy and orderly train, than which there is nothing of more use to the understanding. And though this perhaps may seem a very slow and lingering way to knowledge, yet I dare confidently affirm that whoever will try it in himself or anyone he will teach shall find the advances greater in this method than they would in the same space of time have been in any other he could have taken. The greatest part of true knowledge lies in a distinct perception of things in themselves distinct. And some men give more clear light and knowledge as the bare distinct stating of a question than others by tallying of it in gross whole hours together. In this, they who so state a question do no more but separate and disentangle the parts of it one from another and lay them, when so disentangled, in their due order. This often, without any more ado, resolves the doubt and shows the mind where the truth lies. The agreement or disagreement of the ideas in

question, When they are once separated and distinctly considered, is in many cases presently perceived and thereby clear and lasting knowledge gained ; whereas things in gross taken up together, and so lying together in confusion, can produce in the mind but a confused, which is in effect no, knowledge ; or at least, when it comes to be examined and made use of, will prove little better than none. I therefore take the liberty to repeat here again what I have said elsewhere, that in learning anything as little should be proposed to the mind at once as is possible ; and, that being understood and fully mastered, to proceed to the next adjoining part yet unknown, [a] simple, unperplexed proposition belonging to the matter in hand and tending to the clearing what is principally designed.

Analogy.

Analogy is of great use to the mind in many cases, especially in natural philosophy, and that part of it chiefly which consists in happy and successful experiments. But here we must take care that we keep ourselves within that wherein the analogy consists. For example, the acid oil of vitriol is found to be good in such a case, therefore the spirit of nitre or vinegar may be used in the like case. If the good effect of it be owing wholly to the acidity of it, the trial may be justified ; but if there be something else besides the acidity in the oil of vitriol, which produces the good we desire in the case, we mistake that for analogy which is not and suffer our understanding to be misguided by a wrong supposition of analogy where there is none.

Association.

Though I have, in the second book of my Essay Concerning Human Understanding, treated of the association of ideas, yet having done it there historically, as giving a view of the understanding in this as well as its several other ways of operating, rather than designing there to enquire into the remedies [that] ought to be applied to it, it will, under this latter consideration, afford other matter of thought to those who have a mind to instruct themselves thoroughly in the right way of conducting their understandings ; and that the rather because this, if I mistake not, is as frequent a cause of mistake and error in us as perhaps anything else that can be named, and is a disease of the mind as hard to be cured as any, it being a very hard thing to convince anyone that things are not so, and naturally so, as they constantly appear to him.

By this one easy and unheeded miscarriage of the understanding sandy and loose foundations become infallible principles and will not suffer themselves to be touched or questioned ; such unnatural connections become by custom as natural to the mind as sun and light. Fire and warmth go together and so seem to carry with them as natural an evidence as self-evident truths themselves. And where then shall one with hopes of success begin the cure ? Many men firmly embrace falsehood for truth, not only because they never thought otherwise, but also because, thus blinded as they have been from the beginning, they never could think otherwise, at least without a vigor of mind able to contest the empire of habit and look into its own principles (...) a freedom which few men have the notion of in themselves and fewer are allowed the practice of by others, it being the great art and business of the teachers and guides in most sects to suppress as much as they can this fundamental duty which every man owes himself and is the first steady step towards right and truth in the whole train of his actions and opinions. This would give one reason to suspect that such teachers are conscious to themselves of the falsehood or weakness of the tenets they profess, since they will not suffer the grounds whereon they are built to be examined ; whereas those who seek truth only and desire to own and propagate nothing else freely expose their principles to the test, are pleased to have them examined, give men leave to reject them if they can ; and if there be anything weak and unsound in them, are willing to have it

detected, that they themselves, as well as others, may not lay any stress upon any received proposition beyond what the evidence of its truth will warrant and allow.

There is, I know, a great fault among all sorts of people of principling their children and scholars, which at last, when looked into, amounts to no more but making them imbibe their teacher's notions and tenets by an implicit faith and firmly to adhere to them Whether true or false. What colors may be given to this or of what use it may be when practiced upon the vulgar, destined to labour and given up to the service of their bellies, I will not here enquire. But as to the ingenuous part of mankind, whose condition allows them leisure and letters and enquiry after truth, I can see no other right way of principling them but to take heed as much as may be that in their tender years ideas that have no natural cohesion come not to be united in their heads ; and that this rule be often inculcated to them to be their guide in the whole course of their lives and studies, viz., that they never suffer any ideas to be joined in their understandings in any other or stronger combination than what their own nature and correspondence give them, and that they often examine those that they find linked together in their minds, whether this association of ideas be from the visible agreement that is in the ideas themselves or from the habitual and prevailing custom of the mind joining them thus together in thinking. This is for caution against this evil, before it be thoroughly riveted by custom in the understanding ; but he that would cure it when habit has established it must nicely observe the very quick and almost imperceptible motions of the mind in its habitual actions. What I have said in another place about the change of the ideas of sense into those of judgment may be proof of this. Let anyone not skilled in painting be told, when he sees bottles and tobacco pipes and other things so painted as they are in some places shown, that he does not see protuberances, and you will not convince him but by the touch ; he will not believe that by an instantaneous legerdemain of his own thoughts one idea is substituted for the other. How frequent instances may one meet with of this in the arguings of the learned, who not seldom, in two ideas that they have been accustomed to join in their minds, substitute one for the other ; and, I am apt to think, often without perceiving it themselves. This, whilst they are under the deceit of it, makes them incapable of conviction, and they applaud themselves as zealous champions for truth when indeed they are contending for error. And the confusion of two different ideas, which a

customary connection of them in their minds has made to them almost one, fills their head with false views and their reasonings with false consequences.

Fallacies.

Right understanding consists in the discovery and adherence to truth, and that in the perception of the visible or probable agreement or disagreement of ideas as they are affirmed and denied one of another. From whence it is evident that the right use and conduct of the understanding, whose business is purely truth and nothing else, is that the mind should be kept in a perfect indifference, not inclining to either side any further than evidence settles it by knowledge or the over-balance of probability gives it the turn of assent and belief ; but yet it is very hard to meet with any discourse wherein one may not perceive the author not only maintain (for that is reasonable and fit), but inclined and biased to one side of the question With marks of a desire that should be true. If it be asked me how authors who have such a bias and lean to it may be discovered, I answer, by observing how in their Writings or arguings they are often led by their inclinations to change the ideas of the question, either by changing the terms or by adding and joining others to them, whereby the ideas under consideration are so varied as to be more serviceable to their purpose and to be thereby brought to an easier and nearer agreement or more visible and remoter disagreement one with another. This is plain and direct sophistry ; but I am far from thinking that, wherever it is found, it is made use of with design to deceive and mislead the readers. It is visible that men's prejudices and inclinations by this way impose often upon themselves ; and their affection for truth, under their prepossession in favor of one side, is the very thing that leads them from it. Inclination suggests and slides into their discourse favorable terms which introduce favorable ideas, till at last by this means that is concluded clear and evident, thus dressed up, which taken in its native state, by making use of none but the precise determined ideas, would find no admittance at all. The putting these glosses on what they affirm, these (as they are thought) handsome, easy and graceful explications of what they are discoursing on, is so much the character of what is called and esteemed writing well, that it is very hard to think that authors will ever be persuaded to leave what serves so well to propagate their opinions and procure themselves credit in the world for a more jejune and dry way of writing, by keeping to the same terms precisely annexed to the same ideas, a sour and blunt stiffness tolerable in mathematicians only, who force their way and make truth

prevail by irresistible demonstration. But yet, if authors cannot be prevailed with to quit the looser, though more insinuating, ways of writing, if they will not think fit to keep close to truth and instruction by unvaried terms and plain unsophisticated arguments, yet it concerns readers not to be imposed on by fallacies and the prevailing ways of insinuation. To do this, the surest and most effectual remedy is to fix in the mind the clear and distinct ideas of the question stripped of words ; and so likewise in the train of argumentation, to take up the author's ideas, neglecting his words, observing how they connect or separate those in the question. He that does this will be able to cast off all that is superfluous ; he will see what is pertinent, what coherent, what is direct to, what slides by the question. This will readily show him all the foreign ideas in the discourse and where they were brought in ; and though they perhaps dazzled the writer, yet he will perceive that they give no light nor strength to his reasonings.

This, though it be the shortest and easiest way of reading books with profit and keeping oneself from being misled by great names or plausible discourses, yet, it being hard and tedious to those who have not accustomed themselves to it, it is not to be expected that everyone (amongst those few who really pursue truth) should this way guard his understanding from being imposed on by the willful or at least undesigned sophistry which creeps into most of the books of argument. They that write against their conviction or that, next to them, are resolved to maintain the tenets of a party they are engaged in cannot be supposed to reject any arms that may help to defend their cause, and therefore such should be read with the greatest caution. And they who write for opinions they are sincerely persuaded of and believe to be true think they may so far allow themselves to indulge their laudable affection to truth as to permit their esteem of it to give it the best colors and set it off with the best expressions and dress they can, thereby to gain it the easiest entrance into the minds of their readers and fix it deepest there.

One of those being the state of mind we may justly suppose most writers to be in, it is fit their readers, who apply to them for instruction, should not lay by that caution which becomes a sincere pursuit of truth, and should make them always watchful against whatever might conceal or misrepresent it. If they have not the skill of representing to themselves the author's sense by pure ideas separated from sounds and thereby divested of the false lights and deceitful ornaments of speech, this yet they should do : they should

keep the precise question steadily in their minds, carry it along with them through the whole discourse, and suffer not the least alteration in the terms either by addition, subtraction or substituting any other. This everyone can do who has a mind to it ; and he that has not a mind to it, it is plain makes his understanding only the warehouse of other men's lumber, I mean false and unconcluding reasonings, rather than a repository of truth for his own use, which will prove substantial and stand him in stead when he has occasion for it. And whether such a one deals fairly by his own mind and conducts his own understanding right, I leave to his own understanding to judge.

Fundamental verities.

The mind of men being very narrow and so slow in making acquaintance with things and taking in new truths that no one man is capable in a much longer life than ours, to know all truths, it becomes our prudence in our search after knowledge to employ our thoughts about fundamental and material questions, carefully avoiding those that are trifling and not suffering cursed is to be diverted from our main even purpose by those that are merely incidental. How much of many young men's time is thrown away in purely logical enquiries, I need not mention. This is no better than if a man who was to be a painter should spend all his time in examining the threads of the several cloths he is to paint upon and counting the hairs of each pencil and brush he intends to use in the laying on of his colors. Clay, it is much worse than for a young painter to spend his apprenticeship in such useless niceties ; for he, at the end of all his pains to no purpose, finds that it is not painting nor any help to it, and so is really to no purpose. Whereas men designed for scholars have often their heads so filled and wanned with disputes on logical questions, that they take those airy useless notions for real and substantial knowledge and think their understandings so well furnished with science that they need not look any further into the nature of things or descend to the mechanical drudgery of experiment and enquiry. This is so obvious a mismanagement of the understanding, and that in the professed way to knowledge, that it could not be passed by ; to which might be joined abundance of questions and the way of handling of them in the schools. What faults in particular of this kind every man is or may be guilty of would be infinite to enumerate ; it suffices to have shown that superficial and slight discoveries and observations that contain nothing of moment in themselves, nor serve as clues to lead us into further knowledge, should be lightly passed by and never thought worth our searching after.

There are fundamental truths that lie at the bottom, the basis upon which a great many others rest and in which they have their consistency. These are teeming truths, rich in store with which they furnish the mind, and, like the lights of heaven, are not only beautiful and entertaining in themselves, but give light and evidence to other things that without them could not be seen or known. Such is that admirable discovery of Mr. Newton, that all bodies gravitate to one another, which may be counted as the basis of natural

philosophy ; which of what use it is to the understanding of the great frame of our solar system he has to the astonishment of the learned world shown ; and how much further it would guide us in other things, if rightly pursued, is not yet known. Our Saviour's great rule, that we should love our neighbor as ourselves, is such a fundamental truth for the regulating human society, that, I think, by that alone one might without difficulty determine all the cases and doubts in social morality. These and such as these are the truths we should endeavor to find out and store our minds with. Which leads me to another thing in the conduct of the understanding that is no less necessary, viz. :

Bottoming.

To accustom ourselves in any question proposed to examine and find out upon what it bottoms. Most of the difficulties that come in our way, when well considered and traced, lead us to some proposition which, known to be true, clears the doubt and gives an easy solution of the question ; whilst topical and superficial arguments, of which there is store to be found on both sides, filling the head with variety of thoughts and the mouth with copious discourse serve only to amuse the understanding and entertain company without coming to the bottom of the question, the only place of rest and stability for an inquisitive mind whose tendency is only to truth and knowledge.

For example, if it be demanded whether the Grand Seignior can lawfully take what he will from any of his people, this question cannot be resolved without coming to a certainty whether all men are naturally equal ; for upon that it turns, and that truth, well settled in the understanding and carried in the mind through the various debates concerning the various rights of men in society, will go a great way in putting an end to them and showing on which side the truth is.

Transferring of thoughts.

There is scarce anything more for the improvement of knowledge, for the ease of life and the dispatch of business than for a man to be able to dispose of his own thoughts ; and there is scarce anything harder in the whole conduct of the understanding than to get a full mastery over it. The mind in a waking man has always some object that it applies itself to, which, when we are lazier or unconcerned, we can easily change and at pleasure transfer our thoughts to another, and from thence to a third which has no relation to either of the former. Hence men forwardly conclude and frequently say, nothing is so free as thought ; and it were well it were so ; but the contrary will be found true in several instances ; and there are many cases wherein there is nothing more resty and ungovernable than our thoughts ; they will not be directed to what objects to pursue nor be taken off from those they have once fixed on, but run away with a man in pursuit of those ideas they have in view, let him do what he can. I will not here mention again what I have above taken notice of, how hard it is to get the mind, narrowed by a custom of thirty or forty years standing to a scant : collection of obvious and common ideas, to enlarge itself to a more copious stock and grow into an acquaintance with those that would afford more abundant matter of useful contemplation ; it is not of this I am here speaking. The inconvenience I would here represent and find a remedy for is the difficulty there is sometimes to transfer our minds from one subject to another in cases where the ideas are equally familiar to us.

Matters that are recommended to our thoughts by any of our passions take possession of our minds with a kind of authority and will not be kept out or dislodged, but, as if the passion that rules were for the time the sheriff of the place and came with all the posse, the understanding is seized and taken with the object it introduces, as if it had a legal right to be alone considered there. There is scarce anybody, I think, of so calm a temper who has not some time found this tyranny on his understanding and suffered under the inconvenience of it. who is there almost whose mind at some time or another love or anger, fear or grief has not so fastened to some clog, that it could not turn itself to any other object ? I call it a clog, for it hangs upon the mind so as to hinder its vigor and activity in the pursuit of other contemplations, and advances itself little or not [at] all in the knowledge of

the thing which it so closely hugs and constantly pores on. Men thus possessed are sometimes as if they care so in the worst sense and was under the power of an enchantment. They see not what passes before their eyes, hear not the audible discourse of the company ; and is hen by any strong application to them they are roused a little, they are like men brought to themselves from some remote region ; whereas in truth they come no further than their secret cabinet within, where they have been wholly taken up with the puppet which is for that time appointed for their entertainment. The shame that such dumps cause to well bred people, when it carries them away from the company where they should bear a part in the conversation, is a sufficient argument that it is a fault in the conduct of our understanding not to have that power over it as to make use of it to those purposes and on those occasions wherein we have need of its assistance. The mind should be always free and ready to turn itself to the variety of objects that occur and allow them as much consideration as shall for that time be thought fit. To be engrossed so by one object as not to be prevailed on to leave it for another that we judge fitter for our contemplation is to make it of no use to us. Did this state of mind remain always so, everyone would without scruple give it the name of perfect madness ; and while it does last, at whatever intervals it returns, such a rotation of thoughts about the same object no more carries us for cards towards the attainment of knowledge than getting upon a mill horse whilst he jogs on in his circular tract would carry a man on a journey.

I grant something must be allowed to legitimate passions and to natural inclinations. Every man, besides occasional affections, has beloved studies, and those the mind will more closely stick to ; but yet it is best that it should be always at liberty and under the free disposal of the man to act how and upon what he directs This we should endeavor to obtain, unless we would be content with such a flaw in our understandings that sometimes we should be as it were without it ; for it is very little better than so in cases where we cannot make use of it to those purposes we would and which stand in present need of it.

But before fit remedies can be thought on for this disease, we must know the several causes of it and thereby regulate the cure, if we will hope to labour with success.

One we have already instanced in, whereof all men that reflect have so general a knowledge and so often an experience in themselves, that nobody doubts of it A prevailing passion so pins down our thoughts to the object

and concern of it, that a man passionately in love cannot bring himself to think of his ordinary affairs, nor a kind mother drooping under the loss of a child is not able to bear a part as she was wont in the discourse of the company or conversation of her friends.

But though passion be the most obvious and general, yet it is not the only cause that binds up the understanding and confines it for the time to one object, from which it will not be taken off.

Besides this, we may often find that the understanding, when it has a while employed itself upon a subject which either chance or some slight accident offered to it without the interest or recommendation of any passion, works itself into a warmth and by degrees gets into a career, wherein, like a bowl down a hill, it increases its motion by going and will not be stopped or diverted, though, when the heat is over, it sees all this earnest application was about a trifle not worth a thought and all the pains employed about it lost labour.

There is a third sort, if I mistake not, yet lower than this ; it is a sort of childishness, if I may so say, of the understanding, wherein, during the fit, it plays with and dandies some insignificant puppet to no end nor with any design at all, and yet cannot easily be got off from it. Thus some trivial sentence or a scrap of poetry will sometimes get into men's heads and make such a chiming there, that there is no stilling of it, no peace to be obtained nor attention to anything else, but this impertinent guest will take up the mind and possess the thoughts in spite of all endeavors to get rid of it. Whether everyone has experimented in themselves this troublesome intrusion of some striking ideas which thus importune the understanding and hinder it from being better employed, I know not. But persons of very good parts, and those more than one, I have heard speak and complain of it themselves. The reason I have to make this doubt is from what I have known in a case something of kin to this, though much odder, and that is of a sort of visions that some people have lying quiet but perfectly awake in the dark or with their eyes shut. It is a great variety of faces, most commonly very odd ones, that appear to them in train one after another, so that, having had just the sight of one, it immediately passes away to give place to another that the same instant succeeds and has as quick an exit as its leader ; and so they march on in a constant succession ; nor can any one of them by any endeavor be stopped or retained beyond the instant of its appearance, but is thrust out by its follower, which will have its turn.

Concerning this fantastical phenomenon I have talked with several people, whereof some have been perfectly acquainted with it and others have been so wholly strangers to it, that they could hardly be brought to conceive or believe it. I knew a lady of excellent parts who had got past thirty without having ever had the least notice of any such thing. She was so great a stranger to it that, when she heard me and another talking of it, could scarce forbear thinking we bantered her ; but some time after, drinking a large dose of dilute tea (as she was ordered by a physician) going to bed, she told us at next meeting that she had now experimented what our discourse had much ado to persuade her of. She had seen a great variety of faces in a long train succeeding one another, as we had described ; they were all strangers and intruders, such as she had no acquaintance with before nor sought after then, and as they came of themselves they went too ; none of them stayed a moment nor could be detained by all the endeavors she could use, but went on in their solemn procession, just appeared and then vanished. This odd phenomenon seems to have a mechanical cause, and to depend upon the matter and motion of the blood or animal spirits.

When the fancy is bound by passion, I know no way to set the mind free and at liberty to prosecute what thoughts the man would make choice of, but to allay the present passion or counterbalance it with another, which is an art to be got by study and acquaintance with the passions.

Those as find themselves apt to be carried away with the spontaneous current of their own thoughts, not excited by any passion or interest, must be very wary and careful in all the instances of it to stop it and never humour their minds in being thus triflingly busy. Men know the value of their corporal liberty and therefore suffer not willingly fetters and chains to be put upon them. To have the mind captivated is, for the time, certainly the greater evil of the two and deserves our utmost care and endeavors to preserve the freedom of our better part. And in this case our pains will not be lost ; striving and struggling will prevail, if we constantly in all such occasions make use of it. We must never indulge these trivial attentions of thought ; as soon as we find the mind makes itself a business of nothing, we should immediately disturb and check it, introduce new and more serious considerations, and not leave till we have beaten it off from the pursuit it was upon. This at first, if we have let the contrary practice grow to a habit, will perhaps be difficult ; but constant endeavors will by degrees prevail and at last make it easy. And when a man is pretty well advanced and can

command his mind off at pleasure from incidental and undesigned pursuits, it may not be amiss for him to go on further and make attempts upon meditations of greater moment, that at the last he may have a full power over his own mind, and be so fully master of his own thoughts as to be able to transfer them from one subject to another with the same ease that he can lay by anything he has in his hand and take something else that he has a mind to in the room of it. This liberty of mind is of great use both in business and study, and he that has got it will have no small advantage of ease and dispatch in all that is the chosen and useful employment of his understanding.

The third and last way which I mentioned the mind to be sometimes taken up with (I mean the chiming of some particular words or sentence in the memory and, as it were, making a noise in the head, and the like) seldom happens but when the mind is lazy or very loosely and negligently employed. It were better indeed be without such impertinent and useless repetitions ; any obvious idea, when it is roving causelessly at a venture, being of more use and apter to suggest something worth consideration than the insignificant buzz of purely empty sounds. But since the rousing of the mind and setting the understanding on work with some degrees of vigor does for the most part presently set it free from these idle companions, it may not be amiss, whenever we find ourselves troubled with them, to make use of so profitable a remedy that is always at hand.

A DEFENCE OF MR. LOCKE'S OPINION CONCERNING PERSONAL IDENTITY.

The candid author of the late essay upon personal identity cannot justly be offended with any attempt to explain and vindicate Mr. Locke's hypothesis, if it is carried on in the same spirit, though it should be attended with the overthrow of some of his own favourite notions: since he owns that it is of consequence to form right opinions on this point: which was indeed once deemed an important one, how little soever such may be regarded now-a-days. I shall proceed therefore, without farther apology, to settle the terms of this question, and endeavour to state it so as to bring matters to a short and clear determination.

Now the word person, as is well observed by Mr. Locke (the distinguishing excellence of whose writings consists in sticking close to the point in hand, and striking out all foreign and impertinent considerations) is properly a forensic term, and here to be used in the strict forensic sense, denoting some such quality or modification in man as denominates him a moral agent, or an accountable creature; renders him the proper subject of laws, and a true object of rewards or punishments. When we apply it to any man, we do not treat of him absolutely, and in gross, but under a particular relation or precision: we do not comprehend or concern ourselves about the several inherent properties which accompany him in real existence, which go to the making up the whole complex notion of an active and intelligent being; but arbitrarily abstract one single quality or mode from all the rest, and view him under that distinct precision only which points out the idea abovementioned, exclusive of every other idea that may belong to him in any other view, either as substance, quality or mode. And therefore the consideration of this same quality, or qualification, will not be altered by any others of which he may be possessed; but remains the same whatever he shall consist of besides: whether his soul be a material or immaterial substance, or no substance at all, as may appear from examining the import of these pronouns, I, thou, he, &c. [the grammatical meaning of such words generally pointing out the true origin of our ideas primarily annexed to them] which both in their original sense and common acceptation are purely

personal terms, and as such lead to no farther consideration either of soul or body; nay, sometimes are distinguished from both, as in the following line,

Linquebant dulces animas, aut ægra, trahebant Corpora.

An enquiry after the identity of such person will be, whether at different times he is, or how he can be, and know himself to be the same in that respect, or equally subjected to the very same relations and consequent obligations which he was under formerly, and in which he still perceives himself to be involved, whenever he reflects upon himself and them. This we shall find to consist in nothing more, than his becoming sensible at different times of what he had thought or done before: and being as fully convinced that he then thought or did it, as he now is of his present thoughts, acts, or existence.

Beyond this we neither can, nor need go for evidence in any thing; this, we shall soon see, is the clear and only medium through which distant things can be discovered and compared together; which at the same time sufficiently ascertains and establishes their several natures and realities respectively; so far as they relate to ourselves and to each other: or if this should not be esteemed sufficient to that end, we shall find, in the last place, that there is nothing else left for it. This distinct consciousness of our past actions, from whence arise all the ideas of merit and demerit, will most undoubtedly be regarded with the strictest exactness in *foro divino*; and indeed has its due weight in *foro humano*, whenever it can be with certainty determined: wherever this appears to be wanting, all judicial proceedings are at an end. How plain soever any criminal act were, the man would now-a-days be acquitted from guilt in the commission of it, and discharged from the penalties annexed to such fact, could it at the same time be as plainly made out, that he was incapable of knowing what he did, or is now under a like incapacity of recollecting it. And it would be held a sufficient reason for such acquittal, that the punishment or persecution of a creature in these circumstances, could not answer the end proposed by society in punishment, viz. the prevention of evil, the only end that I know of, which can justify punishments in any case. The reason then why such a plea has usually so small regard paid to it in courts of justice, is, I apprehend, either the difficulty of having this incapacity proved with the same clearness that the fact itself is established; or the common maxim that one crime, or

criminal indisposition, is not admissible in excuse for another; as in cases of drunkenness, violent passion, killing and maiming men by mistake when one is engaged in an unlawful pursuit, &c. Or in some of these cases perhaps men are punished for the murders, &c. not because they possibly may be conscious of them, and yet that consciousness not appear; but that such evils may be more effectually prevented by striking at the remoter cause, i. e. exciting a salutary terrour of those confessedly evil practices and habits, which are often found to terminate in such fatal effects. A kind of injustice is here indeed committed by society, which we have no reason to suppose will be admitted in foro divino, and some worse instances may be seen in our statute books. By the 23 of Hen. 8. a man becoming lunatic after an act of treason shall be liable to be arraigned, tried, and executed. But Hale in his P. C. says, That if a traitor becomes non compos before conviction he shall not be arraigned; if after conviction, he shall not be executed: and Hawkins observes the same concerning those who have committed any capital offences.

In human courts, which cannot always dive into the hearts of men and discover the true springs of action, nor consequently weigh the effects and operations of each in an equal balance: in this state of ignorance and uncertainty, such a notorious indisposition as that of drunkenness, v. g. being generally a great fault in itself, is seldom allowed in extenuation of such others as are committed under its influence; nor indeed does it, I believe, often produce any new, materially different trains of thinking, or totally obliterate the old ones; but where this is really so, the Deity would make just abatement for such defect or disability, as was at the time both unconquerable and unavoidable: nor can we properly impute actions consequent upon any real disorder of the rational faculties, howsoever that disorder might have been contracted; and therefore all animadversions upon them must be in vain: nor is a man punishable for any thing beside the bare act of contracting such disorder, or for the original cause of this disability, how great or durable soever; the dangerous consequences of which he did, or might foresee. As is the case in some other confirmed habits, viz. that of swearing, &c. which often operate mechanically and unperceived, and in which therefore all the moral turpitude (or what is so accounted) arising from them, never can reach beyond the fountain head from whence they are derived, and from which all the effects of them naturally, and even necessarily flow. We must therefore conclude in general, that a person's

guilt is estimated according to his past and present consciousness of the offence, and of his having been the author of it. Nor is it merely his having forgotten the thing, but his having so far lost the notion of it out of his mind, that how frequently soever, or in what forcible manner soever, it may be presented to him again, he lies under an utter incapacity of becoming sensible and satisfied that he was ever privy to it before, which is affirmed to render this thing really none of his, or wholly exculpate him when called to answer for it. Suppose this same consciousness to return, his unaccountableness (call it personality, or what you please) will return along with it: that is, the infliction of evil upon him will now answer some purpose, and therefore he must be considered as now liable to it. Thus some wholly lose the use of their intellectual faculties for a time, and recover them at intervals. In such cases they are considered as punishable by laws, and so declared by juries, in proportion to the probability of their being conscious of the fact. Others lie under a partial deprivation of some one faculty for certain periods, while they continue to enjoy the rest in tolerable perfection. I knew a learned man, who was said to recollect with ease subjects upon which he had written, or any others that had been discussed before the last ten or fifteen years; could reason freely, and readily turn to the authors he had read upon them; but take him into the latter part of his life, and all was blank; when any late incidents were repeated to him, he would only stare at you, nor could he be made sensible of any one modern occurrence, however strongly represented to him. Was this man equally answerable for all transactions within the last period of his life, as for those in the first? Or if he could have been made sensible of the latter part, but had irrecoverably lost the former; could that former part have been in like manner imputed to him? Surely not. And the reason plainly is, because society could find no advantage from considering him as accountable in either case. Which shows personality to be solely a creature of society, an abstract consideration of man, necessary for the mutual benefit of him and his fellows; i. e. a mere forensic term; and to inquire after its criterion or constituent, is to inquire in what circumstances societies or civil combinations of men have in fact agreed to inflict evil upon individuals, in order to prevent evils to the whole body from any irregular member. Daily experience shows, that they always make consciousness of the fact a necessary requisite in such punishment, and that all inquiry relates to the probability of such consciousness. The execution of divine justice must

proceed in the same manner. The Deity inflicts evil with a settled view to some end; and no end worthy of him can be answered by inflicting it as a punishment, unless to prevent other evils. Such end may be answered, if the patient is conscious, or can be made conscious of the fact, but not otherwise. And whence then does this difference in any one's moral capacity arise, but from that plain diversity in his natural one? from his absolute irretrievable want of consciousness in one case, and not in the other? Suppose now that one in the former condition kills a man; that he, or some part of what we call him, was ever so notoriously the instrument, or occasion of that death; yet if he was either then insensible of the fact, or afterwards became so, and so continued: Would he be any more guilty of murder, than if that death had been occasioned by another person? since at that time he was truly such, or at least is so now, notwithstanding that most people might be apt to judge him still the same, from a sameness in outward circumstances (which generally supply the best means men have of judging) from his shape, mien, or appearance; though these often differ widely from the internal constitution, yet are so often mistaken for it; and this accordingly thought and spoke of with little more philosophical propriety, than when we, in the vulgar phrase, describe a man's condition by saying, We would not be in his coat.

Suppose one then in the situation above-mentioned; could any pains, think you, inflicted on him suit the idea, or answer the ends of punishment, either with regard to himself or others, farther than mere show and delusion? Rewards and punishments are evidently instituted for the benefit of society, for the encouragement of virtue, or suppression of vice, in the object thus rewarded or punished, and in the rest of the community; but what tendency to the above purposes can either of these have, if dispensed to one who is not so far himself as to become conscious of having done any thing to deserve it? What instruction is conveyed to him? What admonition to such others, as are duly acquainted with the whole of the case, and see every circumstance thus grossly misapplied? And as in these cases, laws only can define the circumstances in which a man shall be treated as accountable, they only can create guilt, i. e. guilt also is a forensic term, or a mode of considering any action, which in its essence implies knowledge of a law, offence against that law, and a sense of having offended against it; i. e. an after consciousness of the fact; without which after consciousness, punishment would be of little avail, as it would neither serve to guard the

man himself against a like delinquency, nor tend to the warning of others, who by such inflictions would openly perceive that they might chance to suffer pain, without being able to assign a reason for it. — Thus may personality be extended or contracted, and vary in various respects, times, and degrees, and thereby become liable to great confusion, in our applying it to various subjects; yet is the ground and foundation of it fixed; and when once discovered, its consequences are not less so, both before God and man.

Abstract, general ideas (of which this is an eminent one) are alone productive of certain, uniform, and universal knowledge: Thus qualities of a certain kind, when abstracted, or taken apart from nature, and set up for common standards, are so far independent as to become absolute, unmixed, or perfect in themselves, however different they may be found in their respective concretes. Thus goodness, justice, guilt, merit, &c. in general, are ever the same goodness, &c. all the world over, however imperfectly they may appear in any particular subjects, times, and places. In the same manner as a line, or the abstract consideration of length without thickness or breadth; the consideration of surface, i. e. length and breadth without thickness, must be the same, in all intelligent beings of like faculties with us, though the natural substances which suggest them may differ with an endless variety. Let personality answer to a line or surface; let the substances it is predicated of, like the infinite variety of solids in nature, (with their appendages, heat, cold, colour, &c.) in which length and breadth are found, vary as you please, still the abstract ideas of line and surface, and therefore of person, will remain invariable. And thus propositions formed out of these general ideas contain certain truths, that are in one sense external and immutable, as depending on no precarious existences whatever. Being merely what we ourselves make them, they must continue the same while the same number of such ideas continue joined together, and appear the same to every intelligent being that contemplates them. They do not stand in need (I say) of an objective reality, or the existence of any external things in full conformity to them, since we here consider things no farther than as coming up to these original standards, settled in the minds of men; or as capable of being included in such measures as are applied to determine their precise quantity, quality, &c. we are ranking them under a certain species or sort, hence called their essence, which entitles them to the name descriptive of it, as is sufficiently explained by Mr. Locke. They want therefore nothing more to establish their reality, than to be consistently put

together, so as may distinguish them from others that are merely chimerical, and qualify them for the admission of any real beings that may occur: Thus, not only the instance of a triangle so frequently used by Mr. Locke, but every theorem in Euclid, may be ranked among the abstract considerations of quantity, apart from all real existence, which seldom comes up to it: As it may be justly questioned whether any triangle or circle, as defined by him, ever existed in nature, i. e. existed so that all the lines of the triangle were right ones, or all the lines drawn from the centre to the circumference equal. These ideas presuppose no one being in particular, they imply nothing more than a proper subject of inquiry (as was said above) or some such creature as is either actually endowed with, or at least susceptible of these specific qualities, or modes, which furnish matter for the whole tribe of abstractions daily made and preserved by such terms as usually serve to denote them; whether appellatives, in order to distinguish men in their several stations and relations, private or public; to describe their character or conduct, office, &c. as parent, patriot, king, &c. or such more general, technical ones, as paternity, patriotism, kingship, &c. the nature, end, and use, of all which abstractions, with their names, are well enough understood, and would not easily be mistaken in affairs of common life, which are happily less liable to such kind of subtile refinements, as have brought metaphysical speculations into that contempt under which they have long laboured. In short, of these same abstractions consist all general terms and theorems of every science; and the truth and certainty contained in them, when applied to morals or theology, is no less determinate than in other sciences; it is equally capable of strict demonstration; as Mr. Locke observes, and equally applicable to full as useful and important purposes: the great general truths, I say, arising out of these general essences, or entities, (as they are sometimes called) are all clear, constant, and invariable in themselves, though the names in which such a collection of ideas should be preserved, are often through the poverty and imperfection of language rendered extremely vague and uncertain in each writer or speaker, and the ideas formed by them in other men's minds (which are their proper archetypes, and a conformity to which alone makes them right or wrong, truly or untruly applied) thereby become no less frequently confused and indeterminate. Thus, in the case before us, the word person is often used to signify the whole aggregate of a rational being, including both the very imperfect idea, if it be any idea at all, of substance, and its several

properties, [as is the common way] or taking all the essential qualities together, [which properly constitute the substance of any thing] with several of their modes. As when speaking of any one, we include soul, body, station, and other circumstances, and accordingly style him a wise, worthy person; a tall, comely, a rich, great one, &c. where person in a lax, popular sense signifies as much as man. In which popular sense Mr. Locke manifestly takes the word, when he says, it “stands for a thinking intelligent being, that has reason and reflection, and can consider itself as itself, the same thinking being, in different times and places.” B. 2. C. 27. § 9. But when the term is used more accurately and philosophically, it stands for one especial property of that thing or being, separated from all the rest that do or may attend it in real existence, and set apart for ranging such beings into distinct classes, (as hinted above) and considering them under distinct relations and connexions, which are no less necessary to be determined in life, and which should therefore have their proper and peculiar demonstration. And thus sameness of person stands to denote, not what constitutes the same rational agent, though it always is predicated of such: but we consider his rationality so far only, as it makes him capable of knowing what he does and suffers, and on what account, and thereby renders him amenable to justice for his behaviour, as above-mentioned.

Whatever ingredients therefore of different kinds go to the composition, what other particulars, whether mental or corporeal, contribute to the formation of this intelligent being, these make no part of our inquiry; which, I beg leave to repeat it again, is not what enters into the natural constitution of a thing, but what renders it so far a moral one, and is the *sine qua non* of its being justly chargeable with any of its past actions, here or hereafter: Or, in other words, it does not affect the reality or the permanency of such intelligent beings, but only regulates and retains those beings under such a moral relation, as makes them properly accountable to some superior for their course of action. It is an artificial distinction, yet founded in the nature, but not the whole nature of man, who must have many other essential powers and properties to subsist as man, and even to support this in question; but none other, we say, that can affect, or in any wise alter his condition in the above-named respect, and therefore none that come with propriety into the present consideration.

This is all the mystery of the matter, which has puzzled so many ingenious writers, and been so marvellously mistaken by such as are not

sufficiently acquainted with the doctrine of abstractions, or are misled by terms of art, instead of attending to the precise ideas which these ought to convey, and would always convey if they were but carefully and steadily applied; for want of which proper application, men of genius and good sense have fallen into such egregious trifling, as serves only to disturb this beyond most other parts of science, and has filled the above celebrated question with a multitude of quibbles, which Mr. Locke's clear and copious answers to his several opponents might, one would have hoped, have most effectually prevented; but which are subsisting to this very day, to the no small mortification of all sincere lovers of truth, and admirers of that able defender of it. And I have been the larger on this head of general words and notions, which have so close a connexion with each other, and with the present question, as the subject perhaps is not sufficiently explained by Mr. Locke in any one place of his admirable essay, though it occurs pretty often: and since the several properties or attributes of these same abstract ideas are still so miserably misunderstood, as to have their very existence disputed, probably because he has been pleased to set it forth in a manner somewhat paradoxical. Though this word existence also is a term often misapplied, as if nothing could really exist which was not an object of the senses: Whereas in these, and several other ideas, as has been often observed, their *esse* is *percipi*.

Again, We are often misled on the other hand by imagining what things are in themselves (as we usually term it) or in their internal essences; instead of considering them as they appear, and stand related to us; or according to the ideas that are obviously suggested by them; which ideas only should be the objects of our contemplation (since we really perceive nothing else) and ought always to regulate our inquiry into things, as these are the sole foundation of all our knowledge concerning them, of all that can with safety direct, or be of service to us.

But to return to our author. The property then, or quality, or whatever he chooses to call it, which, in his own words, renders men "sensible that they are the same" in some respects, is in Mr. Locke's sense, in the legal, and in common sense, that which so far makes them such, or brings them into the same relative capacity of being ranked among moral, social creatures, and of being treated accordingly, for several obvious purposes in social life. This consciousness, I say, of being thus far ourselves, is what, in Mr. Locke's language, makes us so. In this case, as in some other ideal objects,

to be, and be perceived, is really the same, and what this author calls the sign, coincides with the thing signified. Whether any intelligent being is at present what he is in every respect, wants no proof; of this he has self-evident intuitive knowledge, and can go no higher. And whether he now is what he was once before, in this single article of personality, can only be determined by his now being sensible of what he then thought and did, which is equally self-evident; and thus again, consciousness at the same time, and by the same means, that it convinces him of this, does likewise constitute him such to all ends and purposes whatsoever.

Well then, having examined a little into the nature, and enumerated some few properties of an abstract idea in general, and shown that this particular one before us can be nothing more, we may find perhaps that however fluctuating and changeful this account may be judged to render personality; how much soever it may fall short of some sublime systems about purely immaterial substances, and perfectly independent principles of thought; yet there is no help for these changes in the seat of personality; since, in the last place, we know of nothing more stable and permanent in our constitution that has the least pretence to settle and support it. All parts of the body are to a certain degree in perpetual flux, nor is any one of them, that we are acquainted with, concerned in the present case more than another. As to the mind, both its cogitative and active powers are suspended (whether they be so or not is a matter of fact, in which experience only, and not subtile argumentations drawn from the nature of an unknown, perhaps imaginary, essence ought to decide) during sound sleep: Nay, every drowsy nod (as Mr. Locke expresses it) must shake their doctrine, who maintain that these powers are incessantly employed. Call then a resuscitation or revival of these powers, when we awake, another beginning of their existence, a new creation; and argue against the possibility of any such interruption or annihilation of them, as long as you please; yet that it is matter of fact, and nightly experience, and capable of as good proof as a negative proposition will admit, is made out sufficiently by the above-named excellent writer. This, if properly attended to, and pursued through its genuine consequences, would go a great way towards unfolding the true nature of the human mind, which many thoughtful men seem yet very little acquainted with, and very much afraid to examine. And while this disposition holds, we can never expect to come at the original core of all those corruptions that have infected this branch of philosophy, and extended themselves to some other

parts of science. Nor are the several proofs, or, if you please, probabilities, that I was not thinking all the last night, sufficiently answered by the old excuse that I may forget all such thoughts immediately as soon as ever I awake: for setting aside the great improbability of this happening so very constantly, for so long a time, it must appear to any one who understands what he says, that whosoever, or whatsoever, was thus employed, it could not possibly be I who was all this while busily engaged in such thoughts, since they never bore the least share in my series of consciousness, never were connected with the chain of my waking thoughts, nor therefore could any more belong to me, than if you suppose them (as you might full as well, for argument's sake, and to salve an hypothesis) to be the working of some secret mechanism, or kept up in the watch that was lying by me. Something like this, I presume, would be the plea, which all the advocates for this lame system would offer in their own defence, were any one so injurious as to charge them with things done or said in their sleep. The same observation may be urged against that absurd, self-repugnant hypothesis of our having been in a pre-existent state: for whatsoever was done there it can be nothing to us, who had never the least notice or conception of it.

To the difficulties so often objected, of this being a “new creation,” and making the same thing have “two beginnings of existence;” — We may observe, that it would indeed be an absurdity to suppose two beginnings of existence, if the identity of a substance, being, or man were inquired into; but when the inquiry is made into the artificial abstract idea of personality, invented for a particular end, to answer which consciousness only is required, beginning and end of existence are quite out of the question, being foreign to any consideration of the subject. — It may be farther observed, that in fact we meet with something of the same kind every morning after a total interruption of thought (and I hope, we may by this time in one sense be allowed to term it so) during sound sleep: nay, if we search the thing narrowly, and may in our turn enter into such minutiae, thus much will be implied in the successive train of our ideas, even in each hour of the day; that same article of succession including some degree of distance between each of them, and consequently at every successive step there is a new production, which may with equal reason be styled an interruption of thought, or a new exertion of the thinking power. — But enough of these nugæ difficiles. Such changeable, frail creatures then are we through life; yet safe in the hand of that unchangeably just, wise, good, and all-powerful

Being, who perfectly understands our frame, and will make due allowances for each defect or disorder incident to it; who at first created us out of nothing, and still preserves us through each shifting scene, be the revolutions in it never so frequent and rapid, and will at length most assuredly conduct us to immortality. Though in every respect we are here “fleeing as it were a shadow, and never continuing in one stay,” and at last suffer a short seeming pause in our existence, which is in scripture termed the “sleep of death:” yet will he again raise us “out of the dust;” restore us to ourselves, and to our friends; revive our consciousness of each past act or habit, that may prove of the least moral import; cause the “secrets of all hearts to be laid open,” and either reward or punish every one according to his works done in the body.

Nor does it imply a plurality of persons in any man at any time given to charge him with various actions or omissions; since he may become guilty of a plurality of crimes, as often as he is induced or enabled to reflect upon them, though these cannot be crowded into his mind altogether, any more than they could have been so committed. Nor therefore need all past actions become at once present to the mind; which is utterly inconsistent with our frame, as it now stands, and perhaps with that of every other created being; nor is there a necessity for any one idea being always actually in view; which is equally so; but only for a capacity of having such brought to mind again, together with a consciousness of their having been there before, (which distinguishes them from entirely new ones), or a possibility of recognizing them upon occasion, at least whenever we are to account for them, as has been frequently observed. So far as any such recognition reaches, such person is the same; when this faculty varies, that must vary also; and he become the same, or not, at different times and in divers respects, as observed likewise; at least his accountableness must vary in proportion, call this personality, or what you think fit. Nor does it properly lie in a power of causing a return of the same idea; but rather in the capacity of receiving it, of re-admitting the same consciousness concerning any past thought, action, or perception. Nor is it merely a present representation of any such act; but a representation of it as our own, which entitles us to it; one person may know or become conscious of the deeds of another, but this is not knowing that he himself was the author of those deeds, which is a contradiction; and to treat him as such upon that account only, would be inverting all rules of right and wrong; and could not therefore be practised

by either God or man, since no end could possibly be answered by such treatment, as observed above.

To dwell upon those surprising consequences that might attend the transferring the same consciousness to different beings, or giving the same being very different ones, is merely puzzling and perplexing the point, by introducing such confusions as never really existed, and would not alter the true state of the question, if they did.

Such Fairy tales and Arabian transformations, possible or impossible, can only serve to amuse the fancy, without any solid information to the judgment. These flights of mere imagination Mr. Locke generally avoids, though he was here tempted to indulge a few such, in playing with the wild suppositions of his adversaries, [v. g. a change of souls between Socrates and the mayor of Queenborough, &c.] probably to enliven a dry subject, and render it more palatable to the bulk of his readers.

Nor are those cases of a disordered imagination in lunacy or vapours, where persons are for a time beside themselves, (as we usually term it) and may believe such chimerical alterations to befall them, any more to the purpose.

But it were endless to unravel all futile sophisms and false suppositions, that have been introduced into the present question; I have endeavoured to obviate such as appeared most material, and account for them; and at the same time to inculcate a doctrine, which, though common enough, seemed not enough attended to; yet is fundamentally requisite to a right understanding of this intricate subject. And if that which is laid down above be a true state of the case, all the rest of our author's plan, [of placing personal identity in a continuation of thought] will drop of course. I trust the reader will make allowance for some repetitions, which were left to render things as plain as possible, and prevent future subterfuges of the like kind; and if the substance of these few hasty observations on the first part of this ingenious writer's essay, prove in the least degree satisfactory to himself, or have a tendency to enlarge general knowledge, and guard against popular errors, I must rely upon his candour for excusing the manner in which they are thrown out; and shall take the liberty of closing them in the form of a syllogism, which is submitted to his consideration:

Quo posito ponitur personæ identitas, et quo sublato tollitur, id personalem identitatem constituit:

Sed positâ conscientiâ, &c.

Ergo.

APPENDIX.

A friend, well acquainted with the subject of the foregoing sheets, having communicated to me some observations concerning the use of the word Person, which came too late to be inserted in their proper place, I must take the liberty of annexing them, though they occasion some more redundancies and repetitions, in order to throw as much light as is possible on this very obscure and long controverted question.

As Mr. Locke's definition of the term person, (chap. xxvii. § 9.) may possibly create some difficulty, it will be proper to examine into the sense which should be put upon this word, whenever we inquire after the identity of any man's person; which may perhaps at once lead us to a just conception of the whole. In the aforementioned section, Mr. Locke says, that person stands for "a thinking intelligent being, that has reason and reflection," &c. whereas I should imagine, the expression would have been more just, had he said that the word person stands for an attribute, or quality, or character of a thinking intelligent being; in the same sense as Tully uses it, *Orat. pro Syll.* § 3. "*Hanc mihi tu si, propter res meas gestas, imponis in omni vitâ meâ personam, Torquate, vehementer erras. Me natura misericordem, patria severum; crudelem nec patria, nec natura esse voluit: denique istam ipsam personam vehementem et acrem, quam mihi tum tempus et respublica imposuit, jam voluntas et natura ipsa detraxit.*" It came at last to be confounded with, and stand for *homo gerens personam* (Taylor, *Civ. L.* , 248.) and in this sense Locke has incautiously defined the word. It has attributed also to more intelligent beings than one; as by the jesuits in their declaration prefixed to the third book of Newton, *alienam coacti sumus gerere personam*. The word person then, according to the received sense in all classical authors, standing for a certain guise, character, quality, i. e. being in fact a mixed mode, or relation, and not a substance; we must next inquire, what particular character or quality it stands for in this place, as the same man may bear many characters and relations at the same, or different times. The answer is, that here it stands for that particular quality or character, under which a man is considered, when he is treated as an intelligent being subject to government and laws, and accountable for his actions: i. e. not the man himself, but an abstract consideration of him, for

such and such particular ends: and to inquire after its identity is to inquire, not after the identity of a conscious being, but after the identity of a quality or attribute of such a conscious being. All difficulties that relate to a man's forgetting some actions, &c. now vanish, when person is considered as a character, and not a substance, or confounded with *homo gerens personam*: and it amounts to no more than saying a man puts on a mask — continuing to wear it for some time — puts off one mask and takes another, i. e. appears to have consciousness — to recollect past consciousnesses — does not recollect them, &c. The impropriety consists in saying, a man is the same person with him who did such a fact; which is the same as to say, a man is blackness, guilt, &c. i. e. a mixed mode is predicated of a substance; whereas it ought to be, in strict propriety of speech, the person of the man who did such a fact, is the same with the person of him, who now stands before us; or, in plainer terms, the man who now stands before the court is conscious of the former facts, and is therefore the proper object of punishment. It may be observed, that the word personality is really an absurd expression; since person itself stands for the mixed mode or quality; — and personality therefore may be ranked among the old scholastic terms of corporeity, egoity, tableity, &c. or is even yet more harsh: as mixed modes, such as gratitude, murder, and therefore person, cannot be thus re-modified without peculiar absurdity.

SOME THOUGHTS CONCERNING READING AND STUDY FOR A GENTLEMAN.

Reading is for the improvement of the understanding.

The improvement of the understanding is for two ends; first, for our own increase of knowledge; secondly, to enable us to deliver and make out that knowledge to others.

The latter of these, if it be not the chief end of study in a gentleman; yet it is at least equal to the other, since the greatest part of his business and usefulness in the world is by the influence of what he says, or writes to others.

The extent of our knowledge cannot exceed the extent of our ideas. Therefore he, who would be universally knowing, must acquaint himself with the objects of all sciences. But this is not necessary to a gentleman, whose proper calling is the service of his country; and so is most properly concerned in moral and political knowledge; and thus the studies, which more immediately belong to his calling, are those which treat of virtues and vices, of civil society, and the arts of government; and will take in also law and history.

It is enough for a gentleman to be furnished with the ideas belonging to his calling, which he will find in the books that treat of the matters above-mentioned.

But the next step towards the improvement of his understanding, must be, to observe the connexion of these ideas in the propositions, which those books hold forth, and pretend to teach as truths; which till a man can judge, whether they be truths or no, his understanding is but little improved; and he doth but think and talk after the books that he hath read, without having any knowledge thereby. And thus men of much reading are greatly learned, but may be little knowing.

The third and last step therefore, in improving the understanding, is to find out upon what foundation any proposition advanced bottoms; and to observe the connexion of the intermediate ideas, by which it is joined to that foundation, upon which it is erected, or that principle, from which it is derived. This, in short, is right reasoning; and by this way alone true knowledge is to be got by reading and studying.

When a man, by use, hath got this faculty of observing and judging of the reasoning and coherence of what he reads, and how it proves what it pretends to teach; he is then, and not till then, in the right way of improving his understanding, and enlarging his knowledge by reading.

But that, as I have said, being not all that a gentleman should aim at in reading, he should farther take care to improve himself in the art also of speaking, that so he may be able to make the best use of what he knows.

The art of speaking well consists chiefly in two things, viz. perspicuity and right reasoning.

Perspicuity consists in the using of proper terms for the ideas or thoughts, which he would have pass from his own mind into that of another man. It is this, that gives them an easy entrance; and it is with delight, that men hearken to those, whom they easily understand; whereas what is obscurely said, dying, as it is spoken, is usually not only lost, but creates a prejudice in the hearer, as if he that spoke knew not what he said, or was afraid to have it understood.

The way to obtain this, is to read such books as are allowed to be writ with the greatest clearness and propriety, in the language that a man uses. An author excellent in this faculty, as well as several others, is Dr. Tillotson, late archbishop of Canterbury, in all that is published of his. I have chosen rather to propose this pattern, for the attainment of the art of speaking clearly, than those who give rules about it: since we are more apt to learn by example, than by direction. But if any one hath a mind to consult the masters in the art of speaking and writing, he may find in Tully “*De Oratore*,” and another treatise of his called, *Orator*; and in Quintilian’s *Institutions*; and Boileau’s “*Traité du Sublime*,” instructions concerning this, and the other parts of speaking well.

Besides perspicuity, there must be also right reasoning; without which, perspicuity serves but to expose the speaker. And for the attaining of this, I should propose the constant reading of Chillingworth, who by his example will teach both perspicuity, and the way of right reasoning, better than any book that I know; and therefore will deserve to be read upon that account over and over again; not to say any thing of his argument.

Besides these books in English, Tully, Terence, Virgil, Livy, and Cæsar’s *Commentaries*, may be read to form one’s mind to a relish of a right way of speaking and writing.

The books I have hitherto mentioned have been in order only to writing and speaking well; not but that they will deserve to be read upon other accounts.

The study of morality, I have above mentioned as that that becomes a gentleman; not barely as a man, but in order to his business as a gentleman. Of this there are books enough writ both by ancient and modern philosophers; but the morality of the gospel doth so exceed them all, that, to give a man a full knowledge of true morality, I shall send him to no other book, but the New Testament. But if he hath a mind to see how far the heathen world carried that science, and whereon they bottomed their ethics, he will be delightfully and profitably entertained in Tully's Treatises "De Officiis."

Politics contains two parts, very different the one from the other. The one, containing the original of societies, and the rise and extent of political power; the other, the art of governing men in society.

The first of these hath been so bandied amongst us, for these sixty years backward, that one can hardly miss books of this kind. Those, which I think are most talked of in English, are the first book of Mr. Hooker's "Ecclesiastical Polity," and Mr. Algernon Sydney's "Discourses concerning Government." The latter of these I never read. Let me here add, "Two Treatises of Government," printed in 1690; and a Treatise of "Civil Polity," printed this year. To these one may add, Puffendorf "De Officio Hominis et Civis," and "De Jure Naturali et Gentium;" which last is the best book of that kind.

As to the other part of politics, which concerns the art of government; that, I think, is best to be learned by experience and history, especially that of a man's own country. And therefore I think an English gentleman should be well versed in the history of England, taking his rise as far back as there are any records of it; joining with it the laws that were made in the several ages, as he goes along in his history; that he may observe from thence the several turns of state, and how they have been produced. In Mr. Tyrrel's History of England, he will find all along those several authors which have treated of our affairs, and which he may have recourse to, concerning any point, which either his curiosity or judgment shall lead him to inquire into.

With the history, he may also do well to read the ancient lawyers; such as Bracton, "Fleta," Heningham, "Mirrour of Justice," my lord Coke's "Second Institutes," and the "Modus tenendi Parliamentum;" and others of

that kind which he may find quoted in the late controversies between Mr. Petit, Mr. Tyrrel, Mr. Atwood, &c. with Dr. Brady; as also, I suppose, in Sedler's Treatise of "Rights of the Kingdom, and Customs of our Ancestors," whereof the first edition is the best; wherein he will find the ancient constitution of the government of England.

There are two volumes of "State Tracts" printed since the revolution, in which there are many things relating to the government of England.

As for general history, Sir Walter Raleigh and Dr. Howell, are books to be had. He, who hath a mind to launch farther into that ocean, may consult Whear's "Methodus legendi Historias," of the last edition; which will direct him to the authors he is to read, and the method wherein he is to read them.

To the reading of history, chronology and geography are absolutely necessary.

In geography, we have two general ones in English, Heylin and Moll; which is the best of them, I know not; having not been much conversant in either of them. But the last, I should think to be of most use; because of the new discoveries that are made every day, tending to the perfection of that science. Though, I believe, that the countries, which Heylin mentions, are better treated of by him, bating what new discoveries since his time have added.

These two books contain geography in general, but whether an English gentleman would think it worth his time to bestow much pains upon that; though without it he cannot well understand a Gazette; it is certain he cannot well be without Camden's "Britannia," which is much enlarged in the last English edition. A good collection of maps is also necessary.

To geography, books of travels may be added. In that kind, the collections made by our countrymen, Hackluyt and Purchas, are very good. There is also a very good collection made by Thevenot in folio, in French; and by Ramuzion, in Italian; whether translated into English or no, I know not. There are also several good books of travels of Englishmen published, as Sandys, Roe, Brown, Gage, and Dampier.

There are also several voyages in French, which are very good, as Pyrard, Bergeron, Sagard, Bernier, &c. whether all of them are translated into English, I know not.

There is at present a very good "collection of voyages and travels," never before in English, and such as are out of print; now printing by Mr. Churchill.

There are besides these a vast number of other travels; a sort of books that have a very good mixture of delight and usefulness. To set them down all, would take up too much time and room. Those I have mentioned are enough to begin with.

As to chronology, I think Helvicus the best for common use; which is not a book to be read, but to lie by, and be consulted upon occasion. He that hath a mind to look farther into chronology, may get Tallent's "Tables," and Strauchius's "Breviarium Temporum," and may to those add Scaliger "De Emendatione Temporum," and Petavius, if he hath a mind to engage deeper in that study.

Those, who are accounted to have writ best particular parts of our English history, are Bacon, of Henry VII; and Herbert of Henry VIII. Daniel also is commended; and Burnet's "History of the Reformation."

Mariana's "History of Spain," and Thuanus's "History of his own Time," and Philip de Comines; are of great and deserved reputation.

There are also several French and English memoirs and collections, such as la Rochefoucault, Melvil, Rushworth, &c. which give a great light to those who have a mind to look into what hath past in Europe this last age.

To fit a gentleman for the conduct of himself, whether as a private man, or as interested in the government of his country, nothing can be more necessary than the knowledge of men; which, though it be to be had chiefly from experience, and, next to that, from a judicious reading of history: yet there are books that of purpose treat of human nature, which help to give an insight into it. Such are those treating of the passions, and how they are moved; whereof Aristotle in his second book of Rhetoric hath admirably discoursed, and that in a little compass. I think this Rhetoric is translated into English; if not, it may be had in Greek and Latin together.

La Bruyere's "Characters" are also an admirable piece of painting; I think it is also translated out of French into English.

Satyrical writings also, such as Juvenal, and Persius, and above all Horace: though they paint the deformities of men, yet they thereby teach us to know them.

There is another use of reading, which is for diversion and delight. Such are poetical writings, especially dramatic, if they be free from prophaneness, obscenity, and what corrupts good manners; for such pitch should not be handled.

Of all the books of fiction, I know none that equals “Cervantes’s History of Don Quixote” in usefulness, pleasantry, and a constant decorum. And indeed no writings can be pleasant, which have not nature at the bottom, and are not drawn after her copy.

There is another sort of books, which I had almost forgot, with which a gentleman’s study ought to be well furnished, viz. dictionaries of all kinds. For the Latin tongue, Littleton, Cooper, Calepin, and Robert Stephens’s “Thesaurus Linguae Latinae,” and “Vossii Etymologicum Linguae Latinae.” Skinner’s “Lexicon Etymologicum,” is an excellent one of that kind, for the English tongue. Cowell’s “Interpreter” is useful for the law terms. Spelman’s “Glossary” is a very useful and learned book. And Selden’s “Titles of Honour,” a gentleman should not be without. Baudrand hath a very good “Geographical Dictionary.” And there are several historical ones, which are of use; as Lloyd’s, Hoffman’s, Moreri’s. And Bayle’s incomparable dictionary, is something of the same kind. He that hath occasion to look into books written in Latin since the decay of the Roman empire, and the purity of the Latin tongue, cannot be well without Du Cange’s “Glossarium mediae et infimae Latinitatis.”

Among the books above set down, I mentioned Vossius’s “Etymologicum Linguae Latinae;” all his works are lately printed in Holland in six tomes. They are fit books for a gentleman’s library, containing very learned discourses concerning all the sciences.

ELEMENTS OF NATURAL PHILOSOPHY.

CHAPTER I. OF MATTER AND MOTION.

Matter is an extended solid substance; which being comprehended under distinct surfaces, makes so many particular distinct bodies.

Motion is so well known by the sight and touch, that to use words to give a clear idea of it, would be in vain.

Matter, or body, is indifferent to motion, or rest.

There is as much force required to put a body, which is in motion, at rest; as there is to set a body, which is at rest, into motion.

No parcel of matter can give itself either motion or rest, and therefore a body at rest will remain so eternally, except some external cause puts it in motion; and a body in motion will move eternally, unless some external cause stops it.

A body in motion will always move on in a straight line, unless it be turned out of it by some external cause; because a body can no more alter the determination of its motion, than it can begin it, alter or stop its motion itself.

The swiftness of motion is measured by distance of place and length of time wherein it is performed. For instance, if A and B, bodies of equal or different bigness, move each of them an inch in the same time; their motions are equally swift; but if A moves two inches, in the time whilst B is moving one inch; the motion of A is twice as swift as that of B.

The quantity of motion is measured by the swiftness of the motion, and the quantity of the matter moved, taken together. For instance, if A, a body equal to B, moves as swift as B; then it hath an equal quantity of motion. If A hath twice as much matter as B, and moves equally as swift, it hath double the quantity of motion; and so in proportion.

It appears, as far as human observation reaches, to be a settled law of nature, that all bodies have a tendency, attraction, or gravitation towards one another.

The same force, applied to two different bodies, produces always the same quantity of motion in each of them. For instance, let a boat which with its lading is one ton, be tied at a distance to another vessel, which with its lading is twenty-six tons; if the rope that ties them together be pulled, either in the less or bigger of these vessels, the less of the two, in their approach one to another, will move twenty-six feet, while the other moves but one foot.

Wherefore the quantity of matter in the earth being twenty-six times more than in the moon; the motion in the moon towards the earth, by the common force of attraction, by which they are impelled towards one another, will be twenty-six times as fast as in the earth; that is, the moon will move twenty-six miles towards the earth, for every mile the earth moves towards the moon.

Hence it is, that, in this natural tendency of bodies towards one another, that in the lesser is considered as gravitation; and that in the bigger as attraction; because the motion of the lesser body (by reason of its much greater swiftness) is alone taken notice of.

This attraction is the strongest, the nearer the attracting bodies are to each other; and, in different distances of the same bodies, is reciprocally in the duplicate proportion of those distances. For instance, if two bodies at a given distance attract each other with a certain force, at half the distance, they will attract each other with four times that force; at one third of the distance, with nine times that force; and so on.

Two bodies at a distance will put one another into motion by the force of attraction; which is inexplicable by us, though made evident to us by experience, and so to be taken as a principle in natural philosophy.

Supposing then the earth the sole body in the universe, and at rest; if God should create the moon, at the same distance that it is now from the earth; the earth and the moon would presently begin to move one towards another in a straight line by this motion of attraction or gravitation.

If a body, that by the attraction of another would move in a straight line towards it, receives a new motion any ways oblique to the first; it will no longer move in a straight line, according to either of those directions; but in a curve that will partake of both. And this curve will differ, according to the nature and quantity of the forces that concurred to produce it; as, for instance, in many cases it will be such a curve as ends where it began, or recurs into itself; that is, makes up a circle, or an ellipsis or oval very little differing from a circle.

CHAPTER II. OF THE UNIVERSE.

To any one, who looks about him in the world, there are obvious several distinct masses of matter, separate from one another; some whereof have discernible motions. These are the sun, the fixt stars, the comets and the planets, amongst which this earth, which we inhabit, is one. All these are visible to our naked eyes.

Besides these, telescopes have discovered several fixt stars, invisible to the naked eye; and several other bodies moving about some of the planets; all which were invisible and unknown, before the use of perspective glasses were found.

The vast distances between these great bodies, are called intermundane spaces; in which though there may be some fluid matter, yet it is so thin and subtile, and there is so little of that in respect of the great masses that move in those spaces, that it is as much as nothing.

These masses of matter are either luminous, or opake or dark.

Luminous bodies, are such as give light of themselves; and such are the sun and fixt stars.

Dark or opake bodies are such as emit no light of themselves, though they are capable of reflecting of it, when it is cast upon them from other bodies; and such are the planets.

There are some opake bodies, as for instance the comets, which, besides the light that they may have from the sun, seem to shine with a light that is nothing else but an ascension, which they receive from the sun, in their near approaches to it, in their respective revolutions.

The fixt stars are called fixt, because they al wys keep the same distance one from another.

The sun, at the same distance from us that the fixt stars are, would have the appearance of one of the fixt stars.

CHAPTER III. OF OUR SOLAR SYSTEM.

Our solar system consists of the sun, and the planets and comets moving about it.

The planets are bodies, which appear to us like stars; not that they are luminous bodies, that is, have light in themselves; but they shine by reflecting the light of the sun.

They are called planets from a Greek word, which signifies wandering; because they change their places, and do not always keep the same distance with one another, nor with the fixt stars, as the fixt stars do.

The planets are either primary, or secondary.

There are six primary planets, viz. Mercury, Venus, the Earth, Mars, Jupiter, and Saturn.

All these move round the sun, which is, as it were, the centre of their motions.

The secondary planets move round about other planets. Besides the moon, which moves about the earth; four moons move about Jupiter, and five about Saturn, which are called their satellites.

The middle distances of the primary planets from the sun are as follows:

Mercury	$\left\{ \begin{array}{l} \text{Is distant} \\ \text{from the} \\ \text{sun's cen-} \\ \text{tre, about} \end{array} \right.$	32,000,000	$\left\{ \begin{array}{l} \text{Statute miles,} \\ \text{each 5280} \\ \text{English and} \\ \text{4943 French} \\ \text{feet.} \end{array} \right.$
Venus		59,000,000	
The Earth		81,000,000	
Mars		123,000,000	
Jupiter		424,000,000	
Saturn		777,000,000	

The orbits of the planets, and their respective distances from the sun, and from one another, together with the orbit of a comet, may be seen in the figure of the solar system hereunto annexed.

The periodical times of each planet's revolution about the sun are as follows:

		Y.	D.	H.	M.
Mercury	$\left\{ \begin{array}{l} \text{Revolves} \\ \text{about the} \\ \text{Sun, in} \\ \text{the space} \\ \text{of} \end{array} \right.$	0	88	0	0
Venus		0	225	0	0
The Earth		0	365	5	49
Mars		1	322	0	0
Jupiter		11	319	0	0
Saturn		29	138	0	0

The planets move round about the sun from west to east in the zodiac; or, to speak plainer, are always found amongst some of the stars of those constellations, which make the twelve signs of the zodiac.

The motion of the planets about the sun is not perfectly circular, but rather elliptical.

The reason of their motions in curve lines, is the attraction of the sun, or their gravitations towards the sun, (call it which you please); and an oblique or side-long impulse or motion.

These two motions or tendencies, the one always endeavouring to carry them in a straight line from the circle they move in, and the other endeavouring to draw them in a straight line to the sun, makes that curve line they revolve in.

The motion of the comets about the sun is in a very long slender oval: whereof one of the focuses is the centre of the sun, and the other very much beyond the sphere of Saturn.

The moon moves about the earth, as the earth doth about the sun. So that it hath the centre of its motion in the earth; as the earth hath the centre of its revolution in the sun, about which it moves.

The moon makes its synodical motion about the earth, in 29 days, 12 hours, and about 44 minutes.

It is full moon, when, the earth being between the sun and the moon, we see all the enlightened part of the moon: new moon, when, the moon being between us and the sun, its enlightened part is turned from us; and half moon, when the moon being in the quadratures, as the astronomers call it, we see but half the enlightened part.

An eclipse of the moon is, when the earth, being between the sun and the moon, hinders the light of the sun from falling upon, and being reflected by, the moon. If the light of the sun is kept off from the whole body of the moon, it is a total eclipse; if from a part only, it is a partial one.

An eclipse of the sun is, when the moon, being between the sun and the earth, hinders the light of the sun from coming to us. If the moon hides from us the whole body of the sun, it is a total eclipse; if not, a partial one.

Our solar system is distant from the fixt stars 20,000,000,000 semi-diameters of the earth; or, as Mr. Huygens expresses the distance, in his Cosmotheoros: the fixt stars are so remote from the earth, that, if a cannon-bullet should come from one of the fixt stars with as swift a motion as it

hath when it is shot out of the mouth of a cannon, it would be 700,000 years in coming to the earth.

This vast distance so much abates the attraction to those remote bodies, that its operation upon those of our system is not at all sensible, nor would draw away or hinder the return of any of our solar comets; though some of them should go so far from the sun, as not to make the revolution about it in less than 1000 years.

It is more suitable to the wisdom, power, and greatness of God, to think that the fixt stars are all of them suns, with systems of inhabitable planets moving about them, to whose inhabitants he displays the marks of his goodness as well as to us; rather than to imagine that those very remote bodies, so little useful to us, were made only for our sake.

CHAPTER IV. OF THE EARTH, CONSIDERED AS A PLANET.

The earth, by its revolution about the sun in 365 days, 5 hours, 49 minutes, makes that space of time we call a year.

The line, which the centre of the earth describes in its annual revolution about the sun, is called ecliptic.

The annual motion of the earth about the sun, is in the order of the signs of the zodiac; that is, speaking vulgarly, from west to east.

Besides this annual revolution of the earth about the sun in the ecliptic, the earth turns round upon its own axis in 24 hours.

The turning of the earth upon its own axis every 24 hours, whilst it moves round the sun in a year, we may conceive by the running of a bowl on a bowling-green; in which not only the centre of the bowl hath a progressive motion on the green; but the bowl in its going onward from one part of the green to another, turns round about its own axis.

The turning of the earth on its own axis, makes the difference of day and night; it being day in those parts of the earth which are turned towards the sun; and night in those parts which are in the shade, or turned from the sun.

The annual revolution of the earth in the ecliptic, is the cause of the different seasons, and of the several lengths of days and nights, in every part of the world, in the course of the year.

The reason of it, is the earth's going round its own axis in the ecliptic, but at the same time keeping every where its axis equally inclined to the plane of the ecliptic, and parallel to itself. For the plane of the ecliptic inclining to the plane of the equator, 23 degrees and an half, makes that the earth, moving round in the ecliptic, hath sometimes one of its poles, and sometimes the other nearer the sun.

If the diameter of the sun be to the diameter of the earth, as 48 to 1, as by some it is accounted; then the disk of the sun, speaking "numero rotundo," is above 2000 times bigger than the disk of the earth; and the globe of the sun is above 100,000 times bigger than the globe of the earth.

The distance of the earth's orbit from the sun, is above 200,000 semi-diameters of the earth.

If a cannon-bullet should come from the sun, with the same velocity it hath when it is shot out of the mouth of a cannon, it would be 25 years in coming to the earth.

CHAPTER V. OF THE AIR AND ATMOSPHERE.

We have already considered the earth as a planet, or one of the great masses of matter moving about the sun; we shall now consider it as it is made up of its several parts, abstractedly from its diurnal and annual motions.

The exterior part of this our habitable world is the air or atmosphere; a light, thin fluid, or springy body, that encompasses the solid earth on all sides.

The height of the atmosphere, above the surface of the solid earth, is not certainly known; but that it doth reach but to a very small part of the distance betwixt the earth and the moon, may be concluded from the refraction of the rays coming from the sun, moon, and other luminous bodies.

Though considering that the air we are in, being near 1000 times lighter than water; and that the higher it is, the less it is compressed by the superior incumbent air, and so consequently being a springy body the thinner it is; and considering also that a pillar of air of any diameter is equal in weight to a pillar of quicksilver of the same diameter of between 29 and 30 inches height; we may infer that the top of the atmosphere is not very near the surface of the solid earth.

It may be concluded, that the utmost extent of the atmosphere reaches upwards, from the surface of the solid earth that we walk on, to a good distance above us; first, if we consider that a column of air of any given diameter is equiponderant to a column of quicksilver of between 29 and 30 inches height. Now quicksilver being near 14 times heavier than water, if air was as heavy as water, the atmosphere would be about 14 times higher than the column of quicksilver, i. e. about 35 feet.

Secondly, if we consider that air is 1000 times lighter than water, then a pillar of air equal in weight to a pillar of quicksilver of 30 inches high will be 35000 feet; whereby we come to know that the air or atmosphere is 35000 feet, i. e. near seven miles high.

Thirdly, if we consider that the air is a springy body, and that that, which is nearest the earth, is compressed by the weight of all the atmosphere that is above it, and rests perpendicularly upon it; we shall find that the air here,

near the surface of the earth, is much denser and thicker than it is in the upper parts. For example, if upon a fleece of wool you lay another; the under one will be a little compressed by the weight of that which lies upon it; and so both of them by a third, and so on; so that, if 10000 were piled one upon another, the under one would by the weight of all the rest be very much compressed, and all the parts of it be brought abundantly closer together, than when there was no other upon it; and the next to that a little less compressed, the third a little less than the second, and so on till it came to the uppermost, which would be in its full expansion, and not compressed at all. Just so it is in the air; the higher you go in it, the less it is compressed, and consequently the less dense it is; and so the upper part being exceedingly thinner than the lower part, which we breathe in (which is that that is 1000 times lighter than water); the top of the atmosphere is probably much higher than the distance above assigned.

That the air near the surface of the earth will mightily expand itself, when the pressure of the incumbent atmosphere is taken off, may be abundantly seen in the experiments made by Mr. Boyle in his pneumatic engine. In his “Physico-mechanical Experiments,” concerning the air, he declares it probable that the atmosphere may be several hundred miles high; which is easy to be admitted, when we consider what he proves in another part of the same treatise, viz. that the air here about the surface of the earth, when the pressure is taken from it, will dilate itself about 152 times.

The atmosphere is the scene of the meteors; and therein is collected the matter of rain, hail, snow, thunder, and lightning; and a great many other things observable in the air.

CHAPTER VI. OF METEORS IN GENERAL.

Besides the springy particles of pure air, the atmosphere is made up of several steams or minute particles of several sorts, rising from the earth and the waters, and floating in the air, which is a fluid body, and though much finer and thinner, may be considered in respect of its fluidity to be like water, and so capable, like other liquors, of having heterogeneous particles floating in it.

The most remarkable of them are, first, the particles of water raised into the atmosphere, chiefly by the heat of the sun, out of the sea and other waters, and the surface of the earth; from whence it falls in dew, rain, hail, and snow.

Out of the vapours rising from moisture, the clouds are principally made.

Clouds do not consist wholly of watery parts; for, besides the aqueous vapours that are raised into the air, there are also sulphureous and saline particles that are raised up, and in the clouds mixed with the aqueous particles, the effects whereof are sometimes very sensible; as particularly in lightning and thunder, when the sulphureous and nitrous particles firing break out with that violence of light and noise, which is observable in thunder, and very much resembles gunpowder.

That there are nitrous particles raised into the air is evident from the nourishment which rain gives to vegetables more than any other water; and also by the collection of nitre or salt-petre in heaps of earth, out of which it has been extracted, if they be exposed to the air, so as to be kept from rain; not to mention other efforts, wherein the nitrous spirit in the air shows itself.

Clouds are the greatest and most considerable of all the meteors, as furnishing matter and plenty to the earth. They consist of very small drops of water, and are elevated a good distance above the surface of the earth; for a cloud is nothing but a mist flying high in the air, as a mist is nothing but a cloud here below.

How vapours are raised into the air in invisible steams by the heat of the sun out of the sea, and moist parts of the earth, is easily understood; and there is a visible instance of it in ordinary distillations. But how these steams are collected into drops, which bring back the water again, is not so easy to determine.

To those that will carefully observe, perhaps it will appear probable, that it is by that, which the chymists call precipitation; to which it answers in all its parts.

The air may be looked on as a clear and pellucid menstruum, in which the insensible particles of dissolved matter float up and down, without being discerned, or troubling the pellucidity of the air; when on a sudden, as if it were by a precipitation, they gather into the very small but visible misty drops that make clouds.

This may be observed some times in a very clear sky; when, there not appearing any cloud, or any thing opaque, in the whole horizon, one may see on a sudden clouds gather, and all the hemisphere overcast; which cannot be from the rising of the new aqueous vapours at that time, but from the precipitation of the moisture, that in invisible particles floated in the air, into very small, but very visible drops, which by a like cause being united into greater drops, they become too heavy to be sustained in the air, and so fall down in rain.

Hail seems to be the drops of rain frozen in their falling.

Snow is the small particles of water frozen before they unite into drops.

The regular figures, which branch out in flakes of snow, seem to show that there are some particles of salt mixed with the water, which makes them unite in certain angles.

The rainbow is reckoned one of the most remarkable meteors, though really it be no meteor at all; but the reflection of the sun-beams from the smallest drops of a cloud or mist, which are placed in a certain angle made by the concurrence of two lines, one drawn from the sun, and the other from the eye to these little drops in the cloud, which reflect the sun-beams; so that two people, looking upon a rainbow at the same time, do not see exactly the same rainbow.

CHAPTER VII. OF SPRINGS, RIVERS, AND THE SEA.

Part of the water that falls down from the clouds, runs away upon the surface of the earth into channels, which convey it to the sea; and part of it is imbibed in the spongy shell of the earth, from whence sinking lower by degrees, it falls down into subterranean channels, and so under ground passes into the sea; or else, meeting with beds of rock or clay, it is hindered from sinking lower, and so breaks out in springs, which are most commonly in the sides, or at the bottom of hilly ground.

Springs make little rivulets; those united make brooks; and those coming together make rivers, which empty themselves into the sea.

The sea is a great collection of waters in the deep valleys of the earth. If the earth were all plain, and had not those deep hollows, the earth would be all covered with water; because the water being lighter than the earth, would be above the earth, as the air is above the water.

The most remarkable thing in the sea is that motion of the water called tides. It is a rising and falling of the water of the sea. The cause of this is the attraction of the moon, whereby the part of the water in the great ocean, which is nearest the moon, being most strongly attracted, is raised higher than the rest; and the part opposite to it on the contrary side, being least attracted, is also higher than the rest. And these two opposite rises of the surface of the water in the great ocean, following the motion of the moon from east to west, and striking against the large coasts of the continents that lie in its way; from thence rebounds back again, and so makes floods and ebbs in narrow seas, and rivers remote from the great ocean. Herein we also see the reason of the times of the tides, and why they so constantly follow the course of the moon.

CHAPTER VIII. OF SEVERAL SORTS OF EARTH, STONES, METALS, MINERALS, AND OTHER FOSSILS.

This solid globe we live upon is called the earth, though it contains in it a great variety of bodies, several whereof are not properly earth; which word, taken in a more limited sense, signifies such parts of this globe as are capable, being exposed to the air, to give rooting and nourishment to plants, so that they may stand and grow in it. With such earth as this, the greatest part of the surface of this globe is covered; and it is as it were the store-house, from whence all the living creatures of our world have originally their provisions; for from thence all the plants have their sustenance, and some few animals, and from these all the other animals.

Of earth, taken in this sense, there are several sorts, v. g. common mould, or garden earth, clay of several kinds, sandy soils.

Besides these, there is medicinal earth; as that which is called *terra lemnia*, *bolus armena*, and divers others.

After the several earths, we may consider the parts of the surface of this globe, which is barren; and such, for the most, are sand, gravel, chalk, and rocks, which produce nothing, where they have no earth mixt amongst them. Barren sands are of divers kinds, and consist of several little irregular stones without any earth; and of such there are great deserts to be seen in several parts of the world.

Besides these, which are most remarkable on the surface of the earth, there are found deeper, in this globe, many other bodies, which, because we discover by digging into the bowels of the earth, are called by one common name, fossils; under which are comprehended metals, minerals or half metals, stones of divers kinds, and sundry bodies that have the texture between earth and stone.

To begin with those fossils which come nearest the earth; under this head we may reckon the several sorts of oker, chalk, that which they call black-lead, and other bodies of this kind, which are harder than earth, but have not the consistency and hardness of perfect stone.

Next to these may be considered stones of all sorts; whereof there is almost an infinite variety. Some of the most remarkable, either for beauty or

use, are these: marble of all kinds, porphyry, granate, free-stone, &c. flints, agates, cornelians, pebbles, under which kind come the precious stones, which are but pebbles of an excessive hardness, and when they are cut and polished, they have an extraordinary lustre. The most noted and esteemed are, diamonds, rubies, amethysts, emeralds, topazes, opals.

Besides these, we must not omit those which, though of not so much beauty, yet are of greater use, viz. loadstones, whetstones of all kinds, limestones, callamine, or lapis calaminaris; and abundance of others.

Besides these, there are found in the earth several sorts of salts, as eating or common salt, vitriol, sal gemma, and others.

The minerals, or semi-metals, that are dug out of the bowels of the earth, are antimony, cinnabar, zink, &c. to which may be added brimstone.

But the bodies of most use, that are sought for out of the depths of the earth, are the metals; which are distinguished from other bodies by their weight, fusibility, and malleableness; of which there are these sorts, gold, silver, copper, tin, lead, and, the most valuable of them all, iron; to which one may join that anomalous body quicksilver, or mercury.

He that desires to be more particularly informed concerning the qualities and properties of these subterraneous bodies, may consult natural historians and chymists.

What lies deeper towards the centre of the earth we know not, but a very little beneath the surface of this globe, and whatever we fetch from under ground, is only what is lodged in the shell of the earth.

All stones, metals, and minerals, are real vegetables; that is, grow organically from proper seeds, as well as plants.

CHAPTER IX. OF VEGETABLES, OR PLANTS.

Next to the earth itself, we may consider those that are maintained on its surface; which, though they are fastened to it, yet are very distinct from it; and those are the whole tribe of vegetables or plants. These may be divided into three sorts, herbs, shrubs, and trees.

Herbs are those plants whose stalks are soft, and have nothing woody in them, as grass, sowthistle, and hemlock. Shrubs and trees have all wood in them; but with this difference, that shrubs grow not to the height of trees, and usually spread into branches near the surface of the earth, whereas trees generally shoot up in one great stem or body, and then, at a good distance from the earth, spread into branches; thus gooseberries, and currants, are shrubs; oaks, and cherries, are trees.

In plants, the most considerable parts are these, the root, the stalk, the leaves, the flower, and the seed. There are very few of them that have not all these parts, though some there are that have no stalk; others that have no leaves; and others that have no flowers. But without seed or root I think there are none.

In vegetables, there are two things chiefly to be considered, their nourishment and propagation.

Their nourishment is thus: the small and tender fibres of the roots, being spread under ground, imbibe, from the moist earth, juice fit for their nourishment; this is conveyed by the stalk up into the branches, and leaves, through little, and, in some plants, imperceptible tubes, and from thence, by the bark, returns again to the root; so that there is in vegetables, as well as animals, a circulation of the vital liquor. By what impulse it is moved, is somewhat hard to discover. It seems to be from the difference of day and night, and other changes in the heat of the air; for the heat dilating, and the cold contracting those little tubes, supposing there be valves in them, it is easy to be conceived how the circulation is performed in plants, where it is not required to be so rapid and quick as in animals.

Nature has provided for the propagation of the species of plants several ways. The first and general is by seed. Besides this, some plants are raised from any part of the root set in the ground; others by new roots that are

propagated from the old one, as in tulips; others by offsets; and in others, the branches set in the ground will take root and grow; and last of all, grafting and inoculation, in certain sorts, are known ways of propagation. All these ways of increasing plants make one good part of the skill of gardening; and from the books of gardeners may be best learnt.

CHAPTER X. OF ANIMALS.

There is another sort of creatures belonging to this our earth, rather as inhabitants than parts of it. They differ in this from plants, that they are not fixed to any one place, but have a freedom of motion up and down, and, besides, have sense to guide them in their motions.

Man and brute, divide all the animals of this our globe.

Brutes may be considered as either aerial, terrestrial, aquatic, or amphibious. I call those aerial, which have wings, wherewith they can support themselves in the air. Terrestrial, are those, whose only place of rest is upon the earth. Aquatic, are those, whose constant abode is upon the water. Those are called amphibious, which live freely in the air upon the earth, and yet are observed to live long upon the water, as if they were natural inhabitants of that element; though it be worth the examination to know, whether any of those creatures that live at their ease, and by choice, a good while or at any time upon the earth, can live a long time together perfectly under water.

Aerial animals may be subdivided into birds, and flies.

Fishes, which are the chief part of aquatic animals, may be divided into shell-fishes, scaly fishes, and those that have neither apparent scales nor shells.

And the terrestrial animals may be divided into quadrupeds or beasts, reptiles, which have many feet, and serpents, which have no feet at all.

Insects, which in their several changes belong to several of the before-mentioned divisions, may be considered together as one great tribe of animals. They are called insects, from a separation in the middle of their bodies, whereby they are, as it were, cut into two parts, which are joined together by a small ligature; as we see in wasps, common flies, and the like.

Besides all these, there are some animals that are not perfectly of these kinds, but placed, as it were, in the middle betwixt two of them, by something of both; as bats, which have something of beasts and birds in them.

Some reptiles of the earth, and some of aquatics, want one or more of the senses, which are in perfecter animals; as worms, oysters, cockles, &c.

Animals are nourished by food, taken in at the mouth, digested in the stomach, and thence by fit vessels distributed over the whole body, as is

described in books of anatomy.

The greatest part of animals have five senses, viz. seeing, hearing, smelling, tasting, and feeling. These, and the way of nourishment of animals, we shall more particularly consider; because they are common to man with beasts.

The way of nourishment of animals, particularly of man, is by food taken in at the mouth, which being chewed there, is broken and mixed with the saliva, and thereby prepared for an easier and better digestion in the stomach.

When the stomach has performed its office upon the food, it protrudes it into the guts, by whose peristaltic motion it is gently conveyed along through the guts, and, as it passes, the chyle, which is the nutritive part, is separated from the excrementitious, by the lacteal veins; and from thence conveyed into the blood, with which it circulates till itself be concocted into blood. The blood, being by the vena cava brought into the right ventricle of the heart, by the contraction of that muscle, is driven through the arteria pulmonaris into the lungs; where the constantly inspired air mixing with it, enlivens it; and from thence being conveyed by the vena pulmonaris into the left ventricle of the heart, the contraction of the heart forces it out, and, by the arteries, distributes it into all parts of the body; from whence it returns by the veins into the right ventricle of the heart, to take the same course again. This is called the circulation of the blood; by which life and heat are communicated to every part of the body.

In the circulation of the blood, a good part of it goes up into the head; and by the brains are separated from it, or made out of it, the animal spirits; which, by the nerves, impart sense and motion to all parts of the body.

The instruments of motion are the muscles; the fibres whereof contracting themselves, move the several parts of the body.

This contraction of the muscles is, in some of them, by the direction of the mind, and in some of them without it; which is the difference between voluntary and involuntary motions, in the body.

CHAPTER XI. OF THE FIVE SENSES.

OF SEEING.

The organ of seeing is the eye; consisting of variety of parts wonderfully contrived, for the admitting and refracting the rays of light; so that those that come from the same point of the object, and fall upon different parts of the pupil, are brought to meet again at the bottom of the eye, whereby the whole object is painted on the retina that is spread there.

That which immediately affects the sight, and produces in us that sensation which we call seeing, is light.

Light may be considered either, first, as it radiates from luminous bodies directly to our eyes; and thus we see luminous bodies themselves, as the sun, or a flame, &c.; or secondly, as it is reflected from other bodies; and thus we see a man, or a picture, by the rays of light reflected from them to our eyes.

Bodies, in respect of light, may be divided into three sorts; first, those that emit rays of light, as the sun and fixt stars; secondly, those that transmit the rays of light, as the air; thirdly, those that reflect the rays of light, as iron, earth, &c. The first are called luminous; the second pellucid; and the third opake.

The rays of light themselves are not seen; but by them the bodies, from which they originally come; as the sun, or a fixt star; or the bodies, from which they are reflected; as a horse, or a tulip. When the moon shines, we do not see the rays which come from the sun to the moon, but by them we see the moon, from whence they are reflected.

If the eye be placed in the medium, through which the rays pass to it, the medium is not seen at all; for instance, we do not see the air through which the rays come to our eyes. But if a pellucid body, through which the light comes, be at a distance from our eye, we see that body, as well as the bodies, from whence the rays come that pass through them to come to our eyes. For instance, we do not only see bodies through a pair of spectacles, but we see the glass itself. The reason whereof is, that pellucid bodies being bodies, the surfaces of which reflect some rays of light from their solid parts; these surfaces, placed at a convenient distance from the eye, may be

seen by those reflected rays; as, at the same time, other bodies beyond those pellucid ones may be seen by the transmitted rays.

Opake bodies are of two sorts, specular, or not specular. Specular bodies, or mirrors, are such opake bodies, whose surfaces are polished; whereby they, reflecting the rays in the same order as they come from other bodies, show us their images.

The rays that are reflected from opake bodies, always bring with them to the eye the idea of colour; and this colour is nothing else, in the bodies, but a disposition to reflect to the eye more copiously one sort of rays than another. For particular rays are originally endowed with particular colours; some are red, others blue, others yellow, and others green, &c.

Every ray of light, as it comes from the sun, seems a bundle of all these several sorts of rays; and as some of them are more refrangible than others; that is, are more turned out of their course, in passing from one medium to another; it follows, that after such refraction they will be separated, and their distinct colour observed. Of these, the most refrangible are violet, and the least red; and the intermediate ones, in order, are indigo, blue, green, yellow, and orange. This separation is very entertaining, and will be observed with pleasure in holding a prism in the beams of the sun.

As all these rays differ in refrangibility, so they do in reflexibility; that is, in the property of being more easily reflected from certain bodies, than from others; and hence arise, as hath been said, all the colours of bodies; which are, in a manner, infinite, as an infinite number of compositions and proportions, of the original colours, may be imagined.

The whiteness of the sun's light is compounded of all the original colours, mixed in a due proportion.

Whiteness, in bodies, is but a disposition to reflect all colours of light, nearly in the proportion they are mixed in the original rays; as, on the contrary, blackness is only a disposition to absorb or stifle, without reflection, most of the rays of every sort that fall on the bodies.

Light is successively propagated with an almost inconceivable swiftness; for it comes from the sun, to this our earth, in about seven or eight minutes of time, which distance is about 80,000,000 English miles.

Besides colour, we are supposed to see figure, but, in truth, that which we perceive when we see figure, as perceivable by sight, is nothing but the termination of colour.

OF HEARING.

Next to seeing, hearing is the most extensive of our senses. The ear is the organ of hearing, whose curious structure is to be learnt from anatomy.

That which is conveyed into the brain by the ear is called sound; though, in truth, till it come to reach and affect the perceptive part, it be nothing but motion.

The motion, which produces in us the perception of sound, is a vibration of the air, caused by an exceeding short, but quick, tremulous motion of the body, from which it is propagated; and therefore we consider and denominate them as bodies sounding.

That sound is the effect of such a short, brisk, vibrating motion of bodies, from which it is propagated, may be known from what is observed and felt in the strings of instruments, and the trembling of bells, as long as we perceive any sound come from them; for as soon as that vibration is stopt, or ceases in them, the perception ceases also.

The propagation of sound is very quick, but not approaching that of light. Sounds move about 1140 English feet in a second of time; and in seven or eight minutes of time, they move about one hundred English miles.

OF SMELLING.

Smelling is another sense, that seems to be wrought on by bodies at a distance; though that which immediately affects the organ, and produces in us the sensation of any smell, are effluvia, or invisible particles, that coming from bodies at a distance, immediately affect the olfactory nerves.

Smelling bodies seem perpetually to send forth effluvia, or steams, without sensibly wasting at all. Thus a grain of musk will send forth odoriferous particles for scores of years together, without its being spent; whereby one would conclude that these particles are very small; and yet it is plain, that they are much grosser than the rays of light, which have a free passage through glass; and grosser also than the magnetic effluvia, which pass freely through all bodies, when those that produce smell will not pass through the thin membranes of a bladder, and many of them scarce ordinary white paper.

There is a great variety of smells, though we have but a few names for them; sweet, stinking, sour, rank, and musty, are almost all the denominations we have for odours; though the smell of a violet, and of musk, both called sweet, are as distinct as any two smells whatsoever.

OF TASTE.

Taste is the next sense to be considered.

The organ of taste is the tongue and palate.

Bodies that emit light, sounds, and smells, are seen, heard, and smelt at a distance; but bodies are not tasted, but by immediate application to the organ; for till our meat touch our tongues, or palates, we taste it not, how near soever it be.

It may be observed of tastes, that though there be a great variety of them, yet, as in smells, they have only some few general names; as sweet, bitter, sour, harsh, rank, and some few others.

OF TOUCH.

The fifth and last of our senses is touch; a sense spread over the whole body, though it be most eminently placed in the ends of the fingers.

By this sense the tangible qualities of bodies are discerned; as hard, soft, smooth, rough, dry, wet, clammy, and the like.

But the most considerable of the qualities, that are perceived by this sense, are heat and cold.

The due temperament of those two opposite qualities, is the great instrument of nature, that she makes use of in most, if not all, her productions.

Heat is a very brisk agitation of the insensible parts of the object, which produces in us that sensation, from whence we denominate the object hot; so what in our sensation is heat, in the object is nothing but motion. This appears by the way whereby heat is produced; for we see that the rubbing of a brass nail upon a board will make it very hot, and the axle-trees of carts and coaches are often hot, and sometimes to a degree, that it sets them on fire, by the rubbing of the nave of the wheel upon it.

On the other side, the utmost degree of cold is the cessation of that motion of the insensible particles, which to our touch is heat.

Bodies are denominated hot and cold in proportion to the present temperament of that part of our body to which they are applied; so that feels hot to one, which seems cold to another; nay, the same body, felt by the two hands of the same man, may at the same time appear hot to the one, and cold to the other: because the motion of the insensible particles of it may be more brisk than that of the particles of the other.

Besides the objects before-mentioned, which are peculiar to each of our senses, as light, and colour of the sight; sound of hearing; odours of smelling; savours of tasting; and tangible qualities of the touch; there are two others that are common to all the senses; and those are pleasure and pain, which they may receive by and with their peculiar objects. Thus, too much light offends the eye; some sounds delight, and others grate the ear; heat in a certain degree is very pleasant, which may be augmented to the greatest torment; and so the rest.

These five senses are common to beasts with men; nay, in some of them, some brutes exceed mankind. But men are endowed with other faculties,

which far excel any thing that is to be found in the other animals in this our globe.

Memory also brutes may be supposed to have, as well as men.

CHAPTER XII. OF THE UNDERSTANDING OF MAN.

The understanding of man does so surpass that of brutes, that some are of opinion brutes are mere machines, without any manner of perception at all. But letting this opinion alone, as ill-grounded, we will proceed to the consideration of human understanding, and the distinct operations thereof.

The lowest degree of it consists in perception, which we have before in part taken notice of, in our discourse of the senses. Concerning which it may be convenient farther to observe, that, to conceive a right notion of perception, we must consider the distinct objects of it, which are simple ideas; v. g. such as are those signified by these words, scarlet, blue, sweet, bitter, heat, cold, &c. from the other objects of our senses; to which we may add the internal operations of our minds, as the objects of our own reflection, such as are thinking, willing, &c.

Out of these simple ideas are made, by putting them together, several compounded or complex ideas; as those signified by the words pebble, marygold, horse.

The next thing the understanding doth in its progress to knowledge, is to abstract its ideas, by which abstraction they are made general.

A general idea is an idea in the mind, considered there as separated from time and place; and so capable to represent any particular being that is conformable to it. Knowledge, which is the highest degree of the speculative faculties, consists in the perception of the truth of affirmative, or negative, propositions.

This perception is either immediate, or mediate. Immediate perception of the agreement, or disagreement, of two ideas, is when, by comparing them together in our minds, we see, or, as it were, behold, their agreement, or disagreement. This therefore is called intuitive knowledge. Thus we see that red is not green; that the whole is bigger than a part; and that two and two are equal to four.

The truth of these, and the like propositions, we know by a bare simple intuition of the ideas themselves, without any more ado; and such propositions are called self-evident.

The mediate perception of the agreement, or disagreement, of two ideas, is when, by the intervention of one or more other ideas, their agreement, or disagreement, is shown. This is called demonstration, or rational knowledge. For instance: The inequality of the breadth of two windows, or two rivers, or any two bodies that cannot be put together, may be known by the intervention of the same measure, applied to them both; and so it is in our general ideas, whose agreement or disagreement may be often shown by the intervention of some other ideas, so as to produce demonstrative knowledge; where the ideas in question cannot be brought together, and immediately compared, so as to produce intuitive knowledge.

The understanding doth not know only certain truth; but also judges of probability, which consists in the likely agreement, or disagreement, of ideas.

The assenting to any proposition as probable is called opinion or belief.

We have hitherto considered the great and visible parts of the universe, and those great masses of matter, the stars, planets, and particularly this our earth, together with the inanimate parts, and animate inhabitants of it; it may be now fit to consider what these sensible bodies are made of, and that is of unconceivably small bodies, or atoms, out of whose various combinations bigger *moleculæ* are made: and so, by a greater and greater composition, bigger bodies; and out of these the whole material world is constituted.

By the figure, bulk, texture, and motion, of these small and insensible corpuscles, all the *phænomena* of bodies may be explained.

2.

Epistola.] A letter from Mr. Locke to Mr. Toignard, containing a new and easymethod of a common-place-book, to which an index of two pages is sufficient.

At length, sir, in obedience to you, I publish my “method of a common-place-book.” I am ashamed that I deferred so long complying with your request; but I esteemed it so mean a thing, as not to deserve publishing, in an age so full of useful inventions, as ours is. You may remember, that I freely communicated it to you, and several others, to whom I imagined it would not be unacceptable: so that it was not to reserve the sole use of it to myself, that I declined publishing it. But the regard I had to the public discouraged me from presenting it with such a trifle. Yet my obligations to you, and the friendship between us, compel me now to follow your advice.

Your last letter has perfectly determined me to it, and I am convinced that I ought not to delay publishing it, when you tell me, that an experience of several years has showed its usefulness, and several of your friends, to whom you have communicated it. There is no need I should tell you, how useful it has been to me, after five and twenty years experience, as I told you, eight years since, when I had the honour to wait on you at Paris, and when I might have been instructed by your learned and agreeable discourse. What I aim at now, by this letter, is to testify publicly the esteem and respect I have for you, and to convince you how much I am, sir, your, &c.

3.

Before I enter on my subject, it is fit to acquaint the reader, that this tract is disposed in the same manner that the common-place-book ought to be disposed. It will be understood by reading what follows, what is the meaning of the Latin titles on the top of the backside of each leaf, and at the bottom [a little below the top] of this page.

Ebionitæ.] In eorum evangelio, quod secundum Hebræos dicebatur, historia quæ habetur Matth. xix. 16. et alia quædam, erat interpolata in hunc modum: “Dixit ad eum alter divitum, magister, quid bonum faciens vivam? Dixit ei Dominus, legem & prophetas, fac. Respondit ad eum, feci. Dixit ei: vade, vende omnia quæ possides, & divide pauperibus, & veni, sequere me. Cœpit autem dives scalpere caput suum, & non placuit ei. Et dixit ad eum Dominus: quomodo dicis, legem feci & prophetas? cém scriptum sit in lege, diliges proximum tuum sicut teipsum: & ecce multi fratres tui filii Abrahæ amicti sunt stercore, morientes præ fame, & domus tua plena est bonis multis, & non egreditur omnino aliquid ex eâ ad eos. Et conversus, dixit Simoni, discipulo suo, sedenti apud se: Simon fili Johannæ, facilius est camelum intrare per foramen acus, quam divitem in regnum cœlorum.” Nimirum hæc ideo immutavit Ebion, quia Christum nec Dei filium, nec νομοθέτην sed nudum interpretem legis per Mosem datæ agnoscebat.

4.

In the Gospel of the Ebionites, which they called the Gospel according to the Hebrews, the story, that is in the xixth of St. Matth. and in the 16th and following verses, was changed after this manner: “One of the rich men said to him: Master, what shall I do that I may have life? Jesus said to him: Obey

the law and the prophets. He answered, I have done so. Jesus said unto him, Go, sell what thou hast, divide it among the poor, and then come and follow me. Upon which the rich man began to scratch his head, and to dislike the advice of Jesus: and the Lord said unto him, How can you say you have done as the law and the pro- Adversariorum Methodus.] I take a paper book of what size I please. I divide the two first pages that face one another by parallel lines into five and twenty equal parts, every fifth line black, the other red. I then cut them perpendicularly by other lines that I draw from the top to the bottom of the page, as you may see in the table prefixed. I put about the middle of each five spaces one of the twenty letters I design to make use of, and, a little forward in each space, the five vowels, one below another, in their natural order. This is the index to the whole volume, how big soever it may be.

The index being made after this manner, I leave a margin in all the other pages of the book, of about the largeness of an inch, in a volume, in folio, or a little larger; and, in a less volume, smaller in proportion.

If I would put any thing in my Common-Place-Book, I find out a head to which I may refer it. Each head ought to be some important and essential word to the matter in hand, and in that word regard is to be had to the first letter, and the vowel that follows it; for upon these two letters depends all the use of the index.

5.

I omit three letters of the alphabet as of no use to me, viz. K. Y. W. which are supplied by C. I. U. that are equivalent to them. I put the letter Q. that is always followed with an u. in the fifth space of Z. By throwing Q. last in my index, I preserve the regularity of my index, and diminish not in the least its extent; for it seldom happens that there is any head begins with Z. u. I have found none in the five and twenty years I have used this method. If nevertheless it be necessary, nothing hinders but that one may make a reference after Q. u. provided it be done with any kind of distinction; but for more exactness a place may be assigned For Q. u. below the index, as I have formerly done. When I meet with any thing, that I think fit to put into my common-place-book, I first find a proper head. Suppose, for example, that the head be Epistola, I look into the index for the first letter and the following vowel, which in this instance are E. i. if in the space marked E. i.

there is any number that directs me to the page designed for words that begin with an E. and whose first vowel, after the initial letter, is I; I must then write under the word *Epistola*, in that page, what I have to remark. I write the head in large letters, and begin a little way out into the margin, and I continue on the line, in writing what I have to say. I observe constantly this rule, that only the head appears in the margin, and that it be continued on without ever doubling the line in the margin, by which means the heads will be obvious at first sight.

If I find no number in the index, in the space E. i. I look into my book for the first backside of a leaf that is not written in, which, in a book where there is yet nothing but the index, must be . I write then, in my index after E. i. the number 2. and the head *Epistola* at the top of the margin of the second page, and all that I put under that head, in the same page, as you see I have done in the second page of this method. From that time the class E. i. is wholly in possession of the second and third pages.

V. 6.

They are to be employed only on words that begin with an E, and whose nearest vowel is an I, as *Ebionitæ* (see the third page) *Episcopus*, *Echinus*, *Edictum*, *Efficacia*, &c. The reason, why I begin always at the top of the backside of a leaf, and assign to one class two pages, that face one another, rather than an entire leaf, is, because the heads of the class appear *Adversariorum Methodus*.] all at once, without the trouble of turning over a leaf.

Every time that I would write a new head, I look first in my index for the characteristic letters of the words, and I see, by the number that follows, what the page is that is assigned to the class of that head. If there is no number, I must look for the first backside of a page that is blank. I then set down the number in the index, and design that page, with that of the right side of the following leaf, to this new class. Let it be, for example, the word *Adversaria*; if I see no number in the space A. e. I seek for the first backside of a leaf, which being at . I set down in the space A. e. the number 4. and in the fourth page the head *Adversaria*, with all that I write under it, as I have already informed you. From this time the fourth page with the fifth that follows is reserved for the class A. e. that is to say, for the heads that begin with an A, and whose next vowel is an E; as for instance, *Aer*, *Aera*, *Agésilauus*, *Acheron*, &c.

When the two pages designed for one class are full, I look forwards for the next backside of a leaf, that is blank. If it be that which immediately follows, I write, at the bottom of the margin, in the page that I have filled, the letter V, that is to say, Verte, turn over; as likewise the same at the top of the next page. If the pages, that immediately follow, are already filled by other classes, I write at the bottom of the page last filled, V, and the number of the next empty backside of a page. At the beginning of that page I write down the head, under which I go on, with what I had to put in my commonplace-book, as if it had been in the same page. At the top of this new backside of a leaf, I set down the number of the page I filled last. By these numbers which refer to one another, the first whereof is at the bottom of one page, and the second is at the beginning of another, one joins matter that is separated, as if there was nothing between them. For, by this reciprocal reference of numbers, one may turn, as one leaf, all those that are between the two, even as if they were pasted together. You have an example of this in the third and tenth pages.

Every time I put a number at the bottom of a page, I put it also into the index; but when I put only a V, I make no addition in the index; the reason whereof is plain.

If the head is a monosyllable and begins with a vowel, that vowel is at the same time both the first letter of the word, and the characteristic vowel. Therefore I write the words *Ars* in A a and *Os* in O o.

You may see by what I have said, that one is to begin to write each class of words, on the backside of a page. It may happen, upon that account, that the backside of all the pages may be full, and yet there may remain several pages on the right hand, which are empty. Now if you have a mind to fill your book, you may assign these right sides, which are wholly blank, to new classes.

If any one imagines that these hundred classes are not sufficient to comprehend all sorts of subjects without confusion, he may follow the same method, and yet augment the number to five hundred, in adding a vowel. But having experienced both the one and the other method, I prefer the first; and usage will convince those, who shall try it, how well it will serve the purpose aimed at; especially if one has a book for each science, upon which

one makes collections, or at least two for the two heads, to which one may refer all our knowledge, viz. moral philosophy, and natural.

V. 8.

You may add a third, which may be called the knowledge of signs, which relates to the use *Adversariorum Methodus*.] of words, and is of much more extent than mere criticism.

As to the language, in which one ought to express the heads, I esteem the Latin tongue most commodious, provided the nominative case be always kept to, for fear lest in words of two syllables, or in monosyllables that begin with the vowel, the change, which happens in oblique cases, should occasion confusion. But it is not of much consequence what language is made use of, provided there be no mixture in the heads, of different languages.

9.

To take notice of a place in an author, from whom I quote something, I make use of this method: before I write any thing, I put the name of the author in my common-place-book, and under that name the title of the treatise, the size of the volume, the time and place of its edition, and (what ought never to be omitted) the number of pages that the whole book contains. For example, I put into the class M. a. “*Marshami Canon Chronicus Ægyptiacus, Græcus, & disquisitiones fol.*” London 1672, . This number of pages serves me for the future to mark the particular treatise of this author, and the edition I make use of. I have no need to mark the place, otherwise than in setting down the number of the page from whence I have drawn what I have wrote, just above the number of pages contained in the whole volume. You will see an example in *Acherusia*, where the number 259 is just above the number 626, that is to say, the number of the page, where I take my matter, is just above the number of pages of the whole volume. By this means I not only save myself the trouble of writing *Canon Chronicus Ægyptiacus, &c.* but am able by the rule of three to find out the same passage in any other edition, by looking for the number of its pages; since the edition I have used, which contains 626, gives me 259. You will not indeed always light on the very page you want, because of the breaches, that are made in different editions of books, and that are not always equal in proportion; but you are never very far from the place you want, and it is

better to be able to find a passage, in turning over a few pages, than to be obliged to turn over a whole book to find it, as it happens, when the book has no index, or when the index is not exact.

V. 3. 10.

Acheron.] “Pratum, ficta, mortuorum habitatio, est locus prope Memphin, juxta paludem, quam vocant Acherusiam, &c.” This is a passage out of D. Siculus, the sense whereof is this: the fields, where they feign that the dead inhabit, are only a place near Memphis, near a march called Acherusia, about which is a most delightful country, where one may behold lakes and forests of lotus and calamus. It is with reason, that Orpheus said, the dead inhabit these places, because there the Egyptians celebrate the greatest part, and the most august, of their funeral solemnities. They carry the dead over the Nile, and through the march of Acherusia, and there put them into subterraneous vaults. There are a great many other fables, among the Greeks, touching the state of the dead, which very well agree with what is at this day practised in Egypt. For they call the boat, in which the dead are transported, Baris; and a certain piece of money is given to the ferryman for a passage, who, in their language, is called Charon. Near this place is a temple of Hecate in the shades, &c. and the gates of Cocytus and Lethe, shut up with bars of brass. There are other gates, which are called the gates of truth, with the statue of justice, before them, which had no head. Marsham. 259/626. Ebionitæ.] “phets direct you? since it is written in the law, Thou shalt love thy neighbour as thyself; and there are many of thy brethren, children of Abraham, who are almost naked, and who are ready to die with hunger, while thy house is full of good things, and yet thou givest them no help nor assistance. And turning himself towards Simon, his disciple, who sat near him; Simon, son of Johanna, said he, it is easier for a camel to go through the eye of a needle, than for a rich man to enter into the kingdom of heaven.” Ebion changed this passage, because he did not believe Jesus Christ to be the son of God, nor a law-giver, but a mere interpreter of the law of Moses. Grotius 333/1060.

11 12.

Hæretici.] “Nostrum igitur fuit, eligere & optare meliora, ut ad vestram correctionem auditum haberemus, non in contentione & æmulatione & persecutionibus, sed mansuetè consolando, benevolè hortando, lenitur disputando, sicut scriptum est, servum autem Domini non oportet litigare, sed mitem esse ad omnes, docibilem, patientem, in modestia corripientem

diversa sentientes. Nostrum ergo fuit velle has partes expetere; Dei est volentibus & petentibus donare quod bonum est. Illi in vos sæviant qui nesciunt cum quo labore verum inveniatur, & quam difficile caveantur errores. Illi in vos sæviant, qui nesciunt quam rarum & arduum sit carnalia phantasmata piæ mentis serenitate superare. Ille in vos sæviant, qui nesciunt cum quantâ difficultate sanetur oculus interioris hominis, ut possit intueri solem suum; — Illi in vos sæviant, qui nesciunt quibus suspiriis & gemitibus fiat, ut ex quantulacunque parte possit intelligi Deus. Postremo, illi in vos sæviant, qui nullo tali errore decepti sunt, quali vos deceptos vident. In catholicâ enim ecclesiâ, ut omittam sincerissimam sapientiam, ad cujus cognitionem pauci spirituales in hâc vitâ perveniunt, ut eam ex minimâ quidem parte, qui homines sunt, sed tamen sine dubitatione, cognoscant: cæterum quippe turbam non intelligendi vivacitas, sed credendi simplicitas tutissimam facit.” Augustinus, Tom. vi. col. 116. fol. Basilæ 1542, contra Epist. Manichæi, quam vocant fundamenti.

13.

“We were of opinion, that other methods were to be made choice of, and that, to recover you from your errors, we ought not to persecute you with injuries and invectives, or any ill treatment, but endeavour to procure your attention by soft words and exhortations, which would shew the tenderness we have for you: according to that passage of holy writ, “the servant of the Lord ought not to love strife and quarrels, but to be gentle, affable, and patient towards all mankind, and to reprove with modesty those who differ from him in opinion.”— “Let them only treat you with rigour, who know not how difficult it is to find out the truth, and avoid error. Let those treat you with rigour, who are ignorant how rare and painful a work it is calmly to dissipate the carnal phantoms, that disturb even a pious mind. Let those treat you with rigour, who are ignorant of the extreme difficulty that there is to purify the eye of the inward man, to render him capable of seeing the truth, which is the sun, or light of the soul. Let those treat you with rigour, who have never felt the sighs and groans that a soul must have before it can attain any knowledge of the divine Being. To conclude, let those treat you with rigour who never have been seduced into errors, near a-kin to those you are engaged in. I pass over in silence that pure wisdom, which but a few spiritual men attain to in this life; so that though they know but in part,

because they are men; yet nevertheless they know what they do know with certainty: for, in the catholic church, it is not penetration of mind, nor profound knowledge, but simplicity of faith, which puts men in a state of safety.

14.

Barbari quippe homines Romanæ, imo potius humanæ eruditionis expertes, qui nihil omnino sciunt, nisi quod à doctoribus suis audiunt: quod audiunt hoc sequuntur, ac sic necesse est eos qui totius literaturæ ac scientiæ ignari, sacramentum divinæ legis doctrina, magis quam lectione, cognoscunt, doctrinam potius retinere, quam legem. Itaque eis traditio magistrorum suorum & doctrina inveterata, quasi lex est, qui hoc sciunt, quod do-
[Confessio Fidei.] Periculosum nobis admodum atque etiam miserabile est, tot nunc fides existere, quot voluntates: & tot nobis doctrinas esse, quot mores: & tot causas blasphemiarum pullulare, quot vitia sunt: dum aut ita fides scribuntur, ut volumus, aut, ita ut volumus, intelliguntur. Et cum secundum unum Deum & unum Dominum, & unum baptisma, etiam fides una sit, excidimus ab eâ fide, quæ sola est: & dum plures fiant, id esse cœperunt, ne ulla sit; conscii enim nobis invicem sumus, post Nicæni conventûs synodum, nihil aliud quam fidem scribi. Dum in verbis pugna est, dum de novitatibus quæstio est, dum de ambiguis occasio est, dum de autoribus querela est, dum de studiis certamen est, dum in consensu difficultas est, dum alter alteri anathema esse cæpit, prope jam nemo est Christi, &c. Jam vero proximi anni fides, quid jam de immutatione in se habet? Primum, quæ homousion decernit taceri: sequens rursum, quæ homousion decernit & prædicat. Tertium deinceps, quæ ousiam simpliciter à patribus præsumptam, per indulgentiam excusat. Postremum quartum, quæ non excusat, sed condemnat, &c. De similitudine autem filii Dei ad Deum patrem, quod miserabilis nostri temporis est fides, ne non ex toto, sed tantum ex portione sit similis? Egregii scilicet arbitri cœlestium sacramentorum conquisitores, invisibilium mysteriorum professionibus de fide Dei calumniatur, annuas atque menstruas de Deo fides decernimus, decretis pœnitemus, pœnitentes defendimus, defensos anathematizamus, aut in nostri aliena aut in alienis nostra damnamus, & mordentes invicem, jam absumpti sumus invicem.” Hilarius, , in lib. ad Constantium Augustum. Basil. 1550, fol.

“It is a thing equally deplorable and dangerous that there are at present as many creeds as there are opinions among men, as many doctrines as inclinations; and as many sources of blasphemy, as there are faults among us; because we make creeds arbitrarily, and explain them as arbitrarily. And as there is but one faith; so there is but one only God, one Lord, and one baptism. We renounce this one faith, when we make so many different creeds; and that diversity is the reason why we have no true faith among us. We cannot be ignorant that, since the council of Nice, we have done nothing but make creeds. And while we fight against words, litigate about new questions, dispute about equivocal terms, complain of authors, that every one may make his own party triumph; while we cannot agree, while we anathematise one another, there is hardly one that adheres to Jesus Christ. What change was there not in the creed last year! The first council ordained a silence upon the homousion; the second established it, and would have us speak; the third excuses the fathers of the council, and pretends they took the word ousia simply: the fourth condemns them, instead of excusing them. With respect to the likeness of the Son of God to the Father, which is the faith of our deplorable times, they dispute whether he is like in whole, or in part. These are rare folks to unravel the secrets of heaven. Nevertheless it is for these creeds, about invisible mysteries, that we calumniate one another, and for our belief in God. We make creeds every year, nay every moon we repent of what we have done, we defend those that repent, we anathematise those we defended. So we condemn either the doctrine of others in ourselves, or our own in that of others, and, reciprocally tearing one another to pieces, we have been the cause of each other’s ruin.

V. 13. 16.

Hæretici.] centur. Hæretici ergo sunt, sed non scientes. Denique apud nos sunt hæretici, apud se non sunt. Nam in tantam se catholicusesse judicant, ut nos ipsos titulo hæreticæ appellationis infament. Quod ergo illi nobis sunt & hoc nos illis. Nos eos injuriam divinæ generationi facere certi sumus, quod minorem patre filium dicant. Illi nos injuriosos patri existimant, quia æquales esse credamus. Veritas apud nos est; sed illi apud se esse præsumunt. Honor Dei apud nos est: sed illi hoc arbitrantur, honorem divinitatis esse quod credunt. Inofficiosi sunt, sed illishoc est summum

religionis officium. Impii sunt, sed hoc putant esse veram pietatem. Errant ergo, sed bono animo errant, non odio sed affectu Dei, honorare se dominum atque amare credentes. Quamvis non habeant rectam fidem, illi tamen hoc perfectam Dei, æstimant caritatem. Qualiter pro hoc ipso falsæ opinionis errore in die iudicii puniendi sunt, nullus scire potest nisi iudex. Interim idcirco eis, utreor, patientiam Deus commodat, quia videt eos, etsi non rectè credere, affectu tamen piæ opinionis errare.” Salvinus. 162/339.

This bishop speaks here of the Arian Goths and Vandals: “They are, (says he,) Barbarians, who have no tincture of the Roman politeness, and who are ignorant of what is very commonly known among other men, and only know what their doctors have taught them, and follow what they have heard them say. Men so ignorant as these find themselves under a necessity of learning the mysteries of the gospel, rather by the instructions that are given them, than by books.”

17.

The tradition of their doctors and the received doctrines are the only rule they follow, because they know nothing but what they have taught them. They are then heretics, but they know it not. They are so in our account, but they believe it not; and think themselves so good catholics, that they treat us as heretics, judging of us as we do of them. We are persuaded that they believe amiss concerning the divine generation, when they maintain the Son is inferior to the Father; and they imagine that we rob the Father of his glory who believe them both to be equal. We have the truth on our side, and they pretend it is on theirs. We give to God his due honour, and they think they honour him better. They fail in their duty, but they imagine they perform perfectly well; and they make true piety to consist in what we call impious. They are in a mistake, but with a great deal of sincerity; and it is so far from being an effect of their hatred, that it is a mark of their love of God, since, by what they do, they imagine they show the greatest respect for the Lord, and zeal for his glory. Therefore, though they have not true faith, they nevertheless look upon that which they have as a perfect love of God. It belongs only to the judge of the universe to know how these men will be punished for their errors at the last day. Yet I believe God will show compassion towards them, because he sees their heart is more right than their belief, and that, if they are mistaken, it is their piety made them err.”

[none] [none]

The placing of certainty, as Mr. Locke does, in the perception of the agreement or disagreement of our ideas, the bishop of Worcester suspects may be of dangerous consequence to that article of faith which he has endeavoured to defend; to which Mr. Locke answers, since your lordship hath not, as I remember, shone, or gone about to show, how this proposition, viz. that certainty consists in the perception of the agreement or disagreement of two ideas, is opposite or inconsistent with that article of faith which your lordship has endeavoured to defend; it is plain, it is but your lordship's fear, that it may be of dangerous consequence to it, which, as I humbly conceive, is no proof that it is any way inconsistent with that article.

Nobody, I think, can blame your lordship, or any one else, for being concerned for any article of the christian faith; but if that concern (as it may, and as we know it has done) makes any one apprehend danger, where no danger is, are we, therefore, to give up and condemn any proposition, because any one, though of the first rank and magnitude, fears it may be of dangerous consequence to any truth of religion, without showing that it is so? If such fears be the measures whereby to judge of truth and falsehood, the affirming that there are antipodes would be still a heresy: and the doctrine of the motion of the earth must be rejected, as overthrowing the truth of the scripture; for of that dangerous consequence it has been apprehended to be, by many learned and pious divines, out of their great concern for religion. And yet, notwithstanding those great apprehensions of what dangerous consequence it might be, it is now universally received by learned men, as an undoubted truth; and writ for by some, whose belief of the scripture is not at all questioned; and particularly, very lately, by a divine of the church of England, with great strength of reason, in his wonderfully ingenious New Theory of the Earth.

The reason your lordship gives of your fears, that it may be of such dangerous consequence to that article of faith which your lordship endeavours to defend, though it occur in more places than one, is only this, viz. That it is made use of by ill men to do mischief, i. e. to oppose that article of faith which your lordship hath endeavoured to defend. But, my lord, if it be a reason to lay by any thing as bad, because it is, or may be used to an ill purpose, I know not what will be innocent enough to be kept. Arms, which were made for our defence, are sometimes made use of to do

mischievous; and yet they are not thought of dangerous consequence for all that. Nobody lays by his sword and pistols, or thinks them of such dangerous consequence as to be neglected, or thrown away, because robbers, and the worst of men, sometimes make use of them, to take away honest men's lives or goods. And the reason is, because they were designed, and will serve to preserve them. And who knows but this may be the present case? If your lordship thinks, that placing of certainty in the perception of the agreement or disagreement of ideas be to be rejected as false, because you apprehend it may be of dangerous consequence to that article of faith: on the other side, perhaps others, with me, may think it a defence against error, and so (as being of good use) to be received and adhered to.

I would not, my lord, be hereby thought to set up my own, or any one's judgment against your lordship's. But I have said this only to show, whilst the argument lies for or against the truth of any proposition, barely in an imagination that it may be of consequence to the supporting or overthrowing of any remote truth; it will be impossible, that way, to determine of the truth or falsehood of that proposition. For imagination will be set up against imagination, and the stronger probably will be against your lordship; the strongest imaginations being usually in the weakest heads. The only way, in this case, to put it past doubt, is to show the inconsistency of the two propositions; and then it will be seen, that one overthrows the other; the true, the false one.

Your lordship says, indeed, this is a new method of certainty. I will not say so myself, for fear of deserving a second reproof from your lordship, for being too forward to assume to myself the honour of being an original. But this, I think, gives me occasion, and will excuse me from being thought impertinent, if I ask your lordship whether there be any other, or older method of certainty? and what it is? For if there be no other, nor older than this, either this was always the method of certainty, and so mine is no new one; or else the world is obliged to me for this new one, after having been so long in the want of so necessary a thing as a method of certainty. If there be an older, I am sure your lordship cannot but know it: your condemning mine as new, as well as your thorough insight into antiquity, cannot but satisfy every body that you do. And therefore to set the world right in a thing of that great concernment, and to overthrow mine, and thereby prevent the dangerous consequence there is in my having unreasonably

started it, will not, I humbly conceive, misbecome your lordship's care of that article you have endeavoured to defend, nor the good-will you bear to truth in general. For I will be answerable for myself, that I shall; and I think I may be for all others, that they all will give off the placing of certainty in the perception of the agreement or disagreement of ideas, if your lordship will be pleased to show, that it lies in any thing else.

But truly, not to ascribe to myself an invention of what has been as old as knowledge is in the world, I must own I am not guilty of what your lordship is pleased to call starting new methods of certainty. Knowledge, ever since there has been any in the world, has consisted in one particular action in the mind; and so, I conceive, will continue to do to the end of it. And to start new methods of knowledge, or certainty (for they are to me the same thing) i. e. to find out and propose new methods of attaining knowledge, either with more ease and quickness, or in things yet unknown, is what I think nobody could blame: but this is not that which your lordship here means, by new methods of certainty. Your lordship, I think, means by it, the placing of certainty in something, wherein either it does not consist, or else wherein it was not placed before now; if this be to be called a new method of certainty. As to the latter of these, I shall know whether I am guilty or no, when your lordship will do me the favour to tell me, wherein it was placed before: which your lordship knows I professed myself ignorant of, when I writ my book, and so I am still. But if starting new methods of certainty be the placing of certainty in something wherein it does not consist: whether I have done that or no, I must appeal to the experience of mankind.

There are several actions of men's minds, that they are conscious to themselves of performing, as willing, believing, knowing, &c. which they have so particular sense of, that they can distinguish them one from another; or else they could not say, when they willed, when they believed, and when they knew any thing. But though these actions were different enough from one another, not to be confounded by those who spoke of them, yet nobody that I had met with, had, in their writings, particularly set down wherein the act of knowing precisely consisted.

To this reflection upon the actions of my own mind the subject of my Essay concerning Human Understanding naturally led me; wherein if I have done any thing new, it has been to describe to others more particularly than had been done before, what it is their minds do when they perform that action which they call knowing; and if, upon examination, they observe I

have given a true account of that action of their minds in all the parts of it, I suppose it will be in vain to dispute against what they find and feel in themselves. And if I have not told them right and exactly what they find and feel in themselves, when their minds perform the act of knowing, what I have said will be all in vain; men will not be persuaded against their senses. Knowledge is an internal perception of their minds; and if, when they reflect on it, they find it is not what I have said it is, my groundless conceit will not be hearkened to, but be exploded by every body, and die of itself; and nobody need to be at any pains to drive it out of the world. So impossible is it to find out, or start new methods of certainty, or to have them received, if any one places it in any thing, but in that wherein it really consists: much less can any one be in danger to be misled into error, by any such new, and to every one visibly senseless project. Can it be supposed, that any one could start a new method of seeing, and persuade men thereby, that they do not see what they do see? Is it to be feared that any one can cast such a mist over their eyes, that they should not know when they see, and so be led out of their way by it?

Knowledge, I find in myself, and I conceive in others, consists in the perception of the agreement or disagreement of the immediate objects of the mind in thinking, which I call ideas; but whether it does so in others or no, must be determined by their own experience, reflecting upon the action of their mind in knowing; for that I cannot alter, nor, I think, they themselves. But whether they will call those immediate objects of their minds in thinking ideas or no, is perfectly in their own choice. If they dislike that name, they may call them notions or conceptions, or how they please; it matters not, if they use them so as to avoid obscurity and confusion. If they are constantly used in the same and a known sense, every one has the liberty to please himself in his terms; there lies neither truth, nor error, nor science, in that; though those that take them for things, and not for what they are, bare arbitrary signs of our ideas, make a great deal ado often about them; as if some great matter lay in the use of this or that sound. All that I know, or can imagine of difference about them, is that those words are always best, whose significations are best known in the sense they are used; and so are least apt to breed confusion.

My lord, your lordship hath been pleased to find fault with my use of the new term, ideas, without telling me a better name for the immediate objects of the mind in thinking. Your lordship also has been pleased to find fault

with my definition of knowledge, without doing me the favour to give me a better. For it is only about my definition of knowledge that all this stir concerning certainty is made. For, with me, to know and to be certain, is the same thing; what I know, that I am certain of; and what I am certain of, that I know. What reaches to knowledge, I think may be called certainty; and what comes short of certainty, I think cannot be called knowledge; as your lordship could not but observe in the 18th section of cha. of my 4th book, which you have quoted.

My definition of knowledge stands thus: “knowledge seems to me to be nothing but the perception of the connexion and agreement, or disagreement and repugnancy of any of our ideas.” This definition your lordship dislikes, and apprehends it may be of dangerous consequence as to that article of christian faith which your lordship hath endeavoured to defend. For this there is a very easy remedy: it is but for your lordship to set aside this definition of knowledge by giving us a better, and this danger is over. But your lordship chooses rather to have a controversy with my book for having it in it, and to put me upon the defence of it; for which I must acknowledge myself obliged to your lordship for affording me so much of your time, and for allowing me the honour of conversing so much with one so far above me in all respects.

Your lordship says, it may be of dangerous consequence to that article of christian faith which you have endeavoured to defend. Though the laws of disputing allow bare denial as a sufficient answer to sayings, without any offer of a proof: yet, my lord, to show how willing I am to give your lordship all satisfaction, in what you apprehend may be of dangerous consequence in my book, as to that article, I shall not stand still sullenly, and put your lordship upon the difficulty of showing wherein that danger lies; but shall on the other side, endeavour to show your lordship that that definition of mine, whether true or false, right or wrong, can be of no dangerous consequence to that article of faith. The reason which I shall offer for it, is this: because it can be of no consequence to it at all.

That which your lordship is afraid it may be dangerous to, is an article of faith: that which your lordship labours and is concerned for, is the certainty of faith. Now, my lord, I humbly conceive the certainty of faith, if your lordship thinks fit to call it so, has nothing to do with the certainty of knowledge. As to talk of the certainty of faith, seems all one to me, as to

talk of the knowledge of believing, a way of speaking not easy to me to understand.

Place knowledge in what you will; start what new methods of certainty you please, that are apt to leave men's minds more doubtful than before; place certainty on such ground as will leave little or no knowledge in the world: (for these are the arguments your lordship uses against my definition of knowledge) this shakes not at all, nor in the least concerns the assurance of faith; that is quite distinct from it, neither stands nor falls with knowledge.

Faith stands by itself, and upon grounds of its own; nor can be removed from them, and placed on those of knowledge. Their grounds are so far from being the same, or having any thing common, that when it is brought to certainty, faith is destroyed: it is knowledge then, and faith no longer.

With what assurance soever of believing I assent to any article of faith, so that I stedfastly venture my all upon it, it is still but believing. Bring it to certainty, and it ceases to be faith. I believe that Jesus Christ was crucified, dead, and buried, rose again the third day from the dead, and ascended into heaven: let now such methods of knowledge or certainty be started, as leave men's minds more doubtful than before; let the grounds of knowledge be resolved into what any one pleases, it touches not my faith; the foundation of that stands as sure as before, and cannot be at all shaken by it; and one may as well say, that any thing that weakens the sight, or casts a mist before the eyes, endangers the hearing; as that any thing which alters the nature of knowledge (if that could be done) should be of dangerous consequence to an article of faith.

Whether then I am or am not mistaken, in the placing certainty in the perception of the agreement or disagreement of ideas; whether this account of knowledge be true or false, enlarges or straitens the bounds of it more than it should; faith still stands upon its own basis, which is not at all altered by it; and every article of that has just the same unmoved foundation, and the very same credibility, that it had before. So that, my lord, whatever I have said about certainty, and how much soever I may be out in it, if I am mistaken, your lordship has no reason to apprehend any danger to any article of faith from thence; every one of them stands upon the same bottom it did before, out of the reach of what belongs to knowledge and certainty. And thus much of my way of certainty by ideas; which, I hope, will satisfy

your lordship how far it is from being dangerous to any article of the christian faith whatsoever.

In his 2d letter to the bishop of Worcester.

Against that assertion of Mr. Locke, that possibly we shall never be able to know whether any mere material being thinks or no, &c. the bishop of Worcester argues thus: if this be true, then, for all that we can know by our ideas of matter and thinking, matter may have a power of thinking: and, if this hold, then it is impossible to prove a spiritual substance in us from the idea of thinking; for how can we be assured by our ideas, that God hath not given such a power of thinking to matter so disposed as our bodies are? especially since it is said, "That, in respect of our notions, it is not much more remote from our comprehension to conceive that God can, if he pleases, superadd to our idea of matter a faculty of thinking, than that he should superadd to it another substance, with a faculty of thinking." Whoever asserts this can never prove a spiritual substance in us from a faculty of thinking, because he cannot know, from the idea of matter and thinking, that matter so disposed cannot think: and he cannot be certain, that God hath not framed the matter of our bodies so as to be capable of it.

To which Mr. Locke answers thus: here your lordship argues, that upon my principles it cannot be proved that there is a spiritual substance in us. To which, give me leave, with submission, to say, that I think it may be proved from my principles, and I think I have done it; and the proof in my book stands thus: First, we experiment in ourselves thinking. The idea of this action or mode of thinking is inconsistent with the idea of self-subsistence, and therefore has a necessary connexion with a support or subject of inhesion: the idea of that support is what we call substance; and so from thinking experimented in us, we have a proof of a thinking substance in us, which in my sense is a spirit. Against this your lordship will argue, that, by what I have said of the possibility that God may, if he pleases, superadd to matter a faculty of thinking, it can never be proved that there is a spiritual substance in us, because, upon that supposition, it is possible it may be a material substance that thinks in us. I grant it; but add, that the general idea of substance being the same every where, the modification of thinking, or the power of thinking, joined to it, makes it a spirit, without considering what other modifications it has, as, whether it has the modification of solidity or no. As, on the other side, substance, that has the modification of solidity, is matter, whether it has the modification of thinking, or no. And

therefore, if your lordship means by a spiritual, an immaterial substance, I grant I have not proved, nor upon my principles can it be proved, (your lordship meaning, as I think you do, demonstratively proved) that there is an immaterial substance in us that thinks. Though, I presume, from what I have said about this supposition of a system of matter, thinking (which there demonstrates that God is immaterial) will prove it in the highest degree probable, that the thinking substance in us is immaterial. But your lordship thinks not probability enough, and by charging the want of demonstration upon my principle, that the thinking thing in us is immaterial, your lordship seems to conclude it demonstrable from principles of philosophy. The demonstration I should with joy receive from your lordship, or any one. For though all the great ends of morality and religion are well enough secured without it, as I have shown, yet it would be a great advance of our knowledge in nature and philosophy.

To what I have said in my book, to show that all the great ends of religion and morality are secured barely by the immortality of the soul, without a necessary supposition that the soul is immaterial, I crave leave to add, that immortality may and shall be annexed to that, which in its own nature is neither immaterial nor immortal, as the apostle expressly declares in these words, For this corruptible must put on incorruption, and this mortal must put on immortality.

Perhaps my using the word spirit for a thinking substance, without excluding materiality out of it, will be thought too great a liberty, and such as deserves censure, because I leave immateriality out of the idea I make it a sign of. I readily own, that words should be sparingly ventured on in a sense wholly new; and nothing but absolute necessity can excuse the boldness of using any term in a sense whereof we can produce no example. But, in the present case, I think I have great authorities to justify me. The soul is agreed, on all hands, to be that in us which thinks. And he that will look into the first book of Cicero's *Tusculan questions*, and into the sixth book of Virgil's *Æneid*, will find, that these two great men, who of all the Romans best understood philosophy, thought, or at least did not deny the soul to be a subtile matter, which might come under the name of *aura*, or *ignis*, or *æther*, and this soul they both of them called *spiritus*: in the notion of which it is plain, they included only thought and active motion, without the total exclusion of matter. Whether they thought right in this, I do not say; that is not the question; but whether they spoke properly, when they

called an active, thinking, subtile substance, out of which they excluded only gross and palpable matter, spiritus, spirit. I think that nobody will deny, that if any among the Romans can be allowed to speak properly, Tully and Virgil are the two who may most securely be depended on for it: and one of them speaking of the soul, says, *Dum spiritus hos reget artus*; and the other, *Vita continetur corpore et spiritu*. Where it is plain by *corpus*, he means (as generally every where) only gross matter that may be felt and handled, as appears by these words, *Si cor, aut sanguis, aut cerebrum est animus: certe, quoniam est corpus, interibit cum reliquo corpore; si anima est, fortè dissipabitur; si ignis, extinguetur*, Tusc. Quæst. l. 1. c. 11. Here Cicero opposes *corpus* to *ignis* and *anima*, i.e. *aura*, or *breath*. And the foundation of that his distinction of the soul, from that which he calls *corpus* or *body*, he gives a little lower in these words, *Tanta ejus tenuitas ut fugiat aciem*, ib. c. 22. Nor was it the heathen world alone that had this notion of spirit; the most enlightened of all the ancient people of God, Solomon himself, speaks after the same manner, that which befalleth the sons of men, befalleth beasts, even one thing befalleth them; as the one dieth, so dieth the other, yea, they have all one spirit. So I translate the Hebrew word *רוח* here, for so, I find it translated the very next verse but one; Who knoweth the spirit of man that goeth upward, and the spirit of the beast that goeth down to the earth? In which places it is plain, that Solomon applies the word *רוח*, and our translators of him the word *spirit*, to a substance, out of which materiality was not wholly excluded, unless the spirit of a beast that goeth downwards to the earth be immaterial. Nor did the way of speaking in our Saviour's time vary from this: St. Luke tells us, that when our Saviour, after his resurrection, stood in the midst of them, they were affrighted, and supposed that they had seen *πνῆμα*, the Greek word which always answers *spirit* in English; and so the translators of the Bible render it here, they supposed that they had seen a spirit. But our Saviour says to them, behold my hands and my feet, that it is I myself; handle me and see; for a spirit hath not flesh and bones, as you see me have. Which words of our Saviour put the same distinction between *body* and *spirit*, that Cicero did in the place above-cited, viz. That the one was a gross compages that could be felt and handled; and the other such as Virgil describes the ghost or soul of Anchises.

Ter conatus ibi collo dare brachia circum,
Ter frustra comprehensa manus effugit imago,

Par levibus ventis volucrique simillima somno.

I would not be thought hereby to say, that spirit never does signify a purely immaterial substance. In that sense the scripture, I take it, speaks, when it says God is a spirit; and in that sense I have used it; and in that sense I have proved from my principles that there is a spiritual substance; and am certain that there is a spiritual immaterial substance: which is, I humbly conceive, a direct answer to your lordship's question in the beginning of this argument, viz. How we come to be certain that there are spiritual substances, supposing this principle to be true, that the simple ideas by sensation and reflection are the sole matter and foundation of all our reasoning? But this hinders not, but that if God, that infinite, omnipotent, and perfectly immaterial Spirit, should please to give to a system of very subtile matter, sense and motion, it might with propriety of speech be called spirit, though materiality were not excluded out of its complex idea. Your lordship proceeds, It is said indeed elsewhere, that it is repugnant to the idea of senseless matter, that it should put into itself sense, perception, and knowledge. But this doth not reach the present case: which is not what matter can do of itself, but what matter prepared by an omnipotent hand can do. And what certainty can we have that he hath not done it? We can have none from the ideas, for those are given up in this case, and consequently we can have no certainty, upon these principles, whether we have any spiritual substance within us or not.

Your lordship in this paragraph proves, that, from what I say, we can have no certainty whether we have any spiritual substance in us or not. If by spiritual substance your lordship means an immaterial substance in us, as you speak, I grant what your lordship says is true, that it cannot upon these principles be demonstrated. But I must crave leave to say at the same time, that upon these principles it can be proved, to the highest degree of probability. If by spiritual substance your lordship means a thinking substance, I must dissent from your lordship, and say, that we can have a certainty, upon my principles, that there is a spiritual substance in us. In short, my lord, upon my principles, i. e. from the idea of thinking, we can have a certainty that there is a thinking substance in us; from hence we have a certainty that there is an eternal thinking substance. This thinking substance, which has been from eternity, I have proved to be immaterial. This eternal immaterial, thinking substance, has put into us a thinking substance, which, whether it be a material or immaterial substance, cannot

be infallibly demonstrated from our ideas: though from them it may be proved, that it is to the highest degree probable that it is immaterial.

Again, the bishop of Worcester undertakes to prove from Mr. Locke's principles, that we may be certain, "That the first eternal thinking Being, or omnipotent Spirit cannot, if he would, give to certain systems of created sensible matter, put together as he sees fit, some degrees of sense, perception, and thought."

To which Mr. Locke has made the following answer in his third letter.

Your first argument I take to be this; that according to me, the knowledge we have being by our ideas, and our idea of matter in general being a solid substance, and our idea of body a solid extended figured substance; if I admit matter to be capable of thinking, I confound the idea of matter with the idea of a spirit: to which I answer, No; no more than I confound the idea of matter with the idea of a horse, when I say that matter in general is a solid extended substance; and that a horse is a material animal, or an extended solid substance with sense and spontaneous motion.

The idea of matter is an extended solid substance; wherever there is such a substance, there is matter, and the essence of matter, whatever other qualities, not contained in that essence, it shall please God to superadd to it. For example, God creates an extended solid substance, without the superadding any thing else to it, and so we may consider it at rest: to some parts of it he superadds motion, but it has still the essence of matter: other parts of it he frames into plants, with all the excellencies of vegetation, life, and beauty, which is to be found in a rose or peach tree, &c. above the essence of matter, in general, but it is still but matter: to other parts he adds sense and spontaneous motion, and those other properties that are to be found in an elephant. Hitherto it is not doubted but the power of God may go, and that the properties of a rose, a peach, or an elephant, superadded to matter, change not the properties of matter; but matter is in these things matter still. But if one venture to go one step farther and say, God may give to matter thought, reason, and volition, as well as sense and spontaneous motion, there are men ready presently to limit the power of the omnipotent Creator, and tell us he cannot do it; because it destroys the essence, or changes the essential properties of matter. To make good which assertion, they have no more to say, but that thought and reason are not included in the essence of matter. I grant it; but whatever excellency, not contained in its essence, be superadded to matter, it does not destroy the essence of matter,

if it leaves it an extended solid substance: wherever that is, there is the essence of matter: and if every thing of greater perfection superadded to such a substance, destroys the essence of matter, what will become of the essence of matter in a plant or an animal, whose properties far exceed those of a mere extended solid substance?

But it is farther urged, that we cannot conceive how matter can think. I grant it: but to argue from thence, that God therefore cannot give to matter a faculty of thinking, is to say God's omnipotency is limited to a narrow compass, because man's understanding is so; and brings down God's infinite power to the size of our capacities. If God can give no power to any parts of matter, but what men can account for from the essence of matter in general; if all such qualities and properties must destroy the essence, or change the essential properties of matter, which are to our conceptions above it, and we cannot conceive to be the natural consequence of that essence; it is plain, that the essence of matter is destroyed, and its essential properties changed, in most of the sensible parts of this our system. For it is visible, that all the planets have revolutions about certain remote centres, which I would have any one explain, or make conceivable by the bare essence, or natural powers depending on the essence of matter in general, without something added to that essence, which we cannot conceive; for the moving of matter in a crooked line, or the attraction of matter by matter, is all that can be said in the case; either of which it is above our reach to derive from the essence of matter or body in general; though one of these two must unavoidably be allowed to be superadded in this instance to the essence of matter in general. The omnipotent Creator advised not with us in the making of the world, and his ways are not the less excellent, because they are past finding out.

In the next place, the vegetable part of the creation is not doubted to be wholly material; and yet he that will look into it, will observe excellencies and operations in this part of matter, which he will not find contained in the essence of matter in general, nor be able to conceive they can be produced by it. And will he therefore say, that the essence of matter is destroyed in them, because they have properties and operations not contained in the essential properties of matter as matter, nor explicable by the essence of matter in general?

Let us advance one step farther, and we shall in the animal world meet with yet greater perfections and properties, no ways explicable by the

essence of matter in general. If the omnipotent Creator had not superadded to the earth, which produced the irrational animals, qualities far surpassing those of the dull dead earth, out of which they were made, life, sense, and spontaneous motion, nobler qualities than were before in it, it had still remained rude senseless matter; and if to the individuals of each species he had not superadded a power of propagation, the species had perished with those individuals: but by these essences or properties of each species, superadded to the matter which they were made of, the essence or properties of matter in general were not destroyed or changed, any more than any thing that was in the individuals before was destroyed or changed by the power of generation, superadded to them by the first benediction of the Almighty.

In all such cases, the superinducement of greater perfections and nobler qualities destroys nothing of the essence or perfections that were there before; unless there can be showed a manifest repugnancy between them: but all the proof offered for that, is only, that we cannot conceive how matter, without such superadded perfections, can produce such effects; which is, in truth, no more than to say, matter in general, or every part of matter, as matter, has them not; but is no reason to prove, that God, if he pleases, cannot superadd them to some parts of matter, unless it can be proved to be a contradiction, that God should give to some parts of matter qualities and perfections, which matter in general has not; though we cannot conceive how matter is invested with them, or how it operates by virtue of those new endowments; nor is it to be wondered that we cannot, whilst we limit all its operations to those qualities it had before, and would explain them by the known properties of matter in general, without any such induced perfections. For, if this be a right rule of reasoning, to deny a thing to be, because we cannot conceive the manner how it comes to be; I shall desire them who use it to stick to this rule, and see what work it will make both in divinity as well as philosophy: and whether they can advance any thing more in favour of scepticism.

For to keep within the present subject of the power of thinking and self-motion, bestowed by omnipotent power in some parts of matter: the objection to this is, I cannot conceive how matter should think. What is the consequence? Ergo, God cannot give it a power to think. Let this stand for a good reason, and then proceed in other cases by the same. You cannot conceive how matter can attract matter at any distance, much less at the

distance of 1,000,000 miles; ergo, God cannot give it such a power: you cannot conceive how matter should feel, or move itself, or affect an immaterial being, or be moved by it; ergo, God cannot give it such powers: which is in effect to deny gravity, and the revolution of the planets about the sun; to make brutes mere machines, without sense or spontaneous motion; and to allow man neither sense nor voluntary motion.

Let us apply this rule one degree farther. You cannot conceive how an extended solid substance should think, therefore God cannot make it think: can you conceive how your own soul, or any substance, thinks? You find indeed that you do think, and so do I: but I want to be told how the action of thinking is performed: this, I confess, is beyond my conception: and I would be glad any one, who conceives it, would explain it to me. God, I find, has given me this faculty; and since I cannot but be convinced of his power in this instance, which though I every moment experiment in myself, yet I cannot conceive the manner of; what would it be less than an insolent absurdity, to deny his power in other like cases, only for this reason, because I cannot conceive the manner how?
